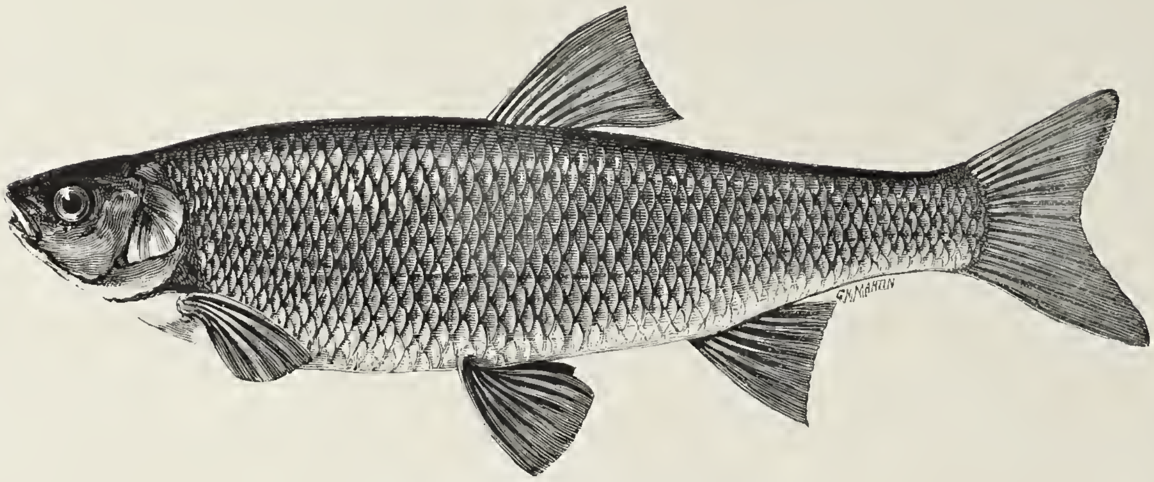
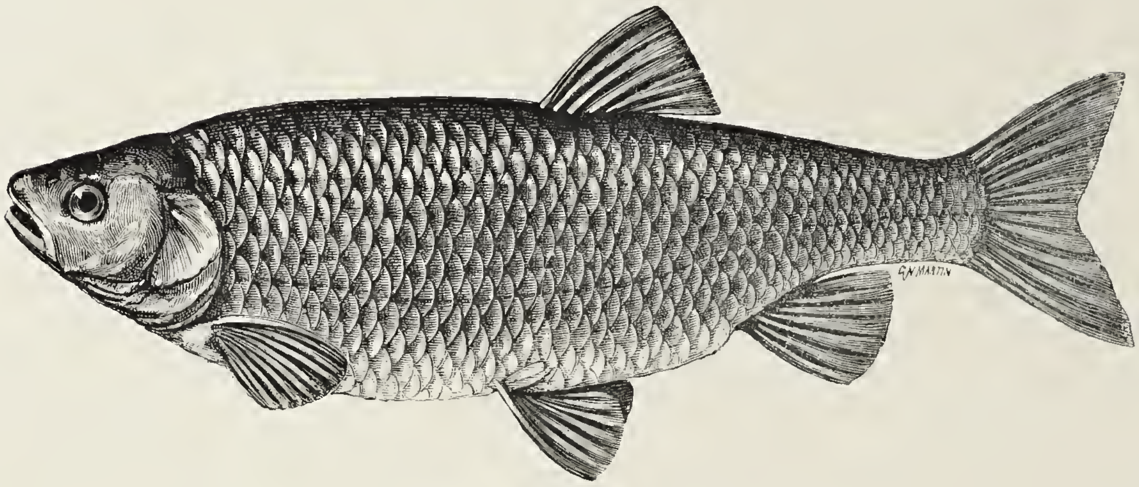
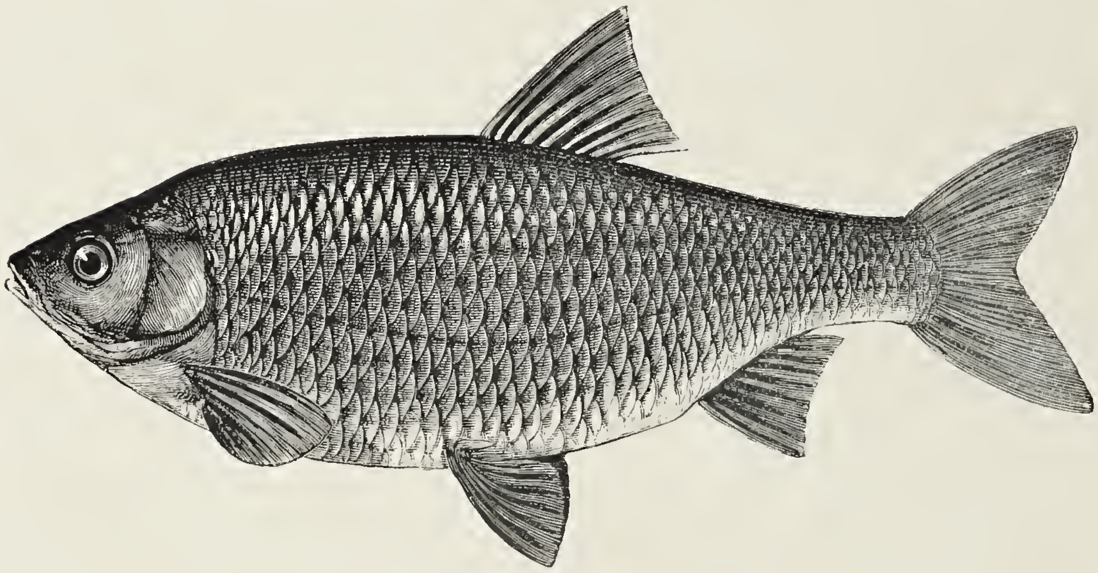
THE LIBRARY
OF THE
UNIVERSITY OF ILLINOIS



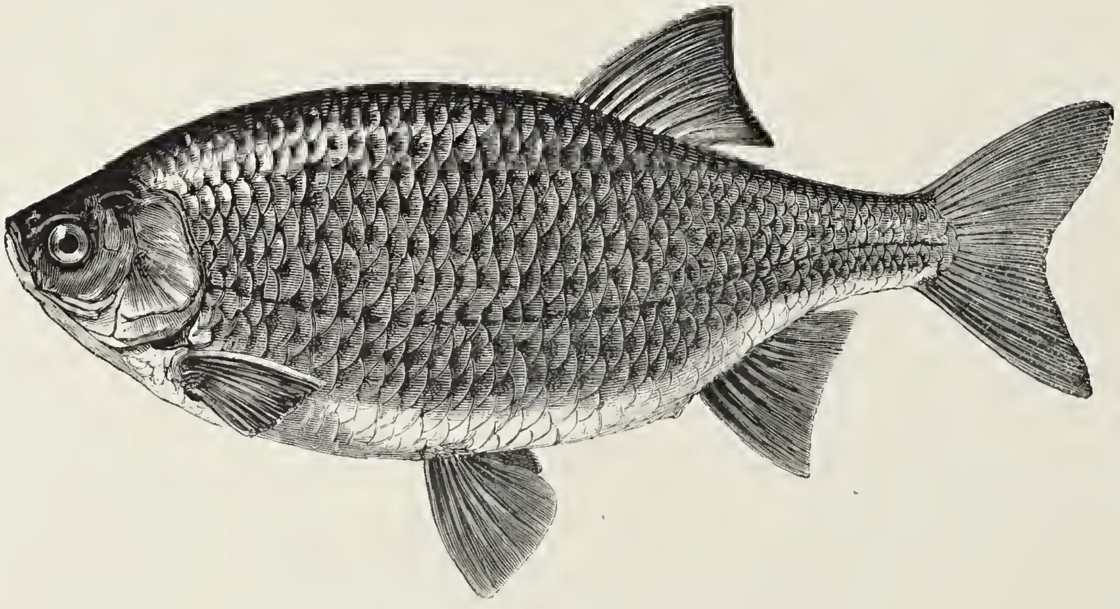
THE DACE (*Leuciscus vulgaris*).
(Showing the concave anal fin.)



THE CHUB (*Leuciscus cephalus*).
(Showing the convex anal fin.)



THE ROACH (*Leuciscus rutilus*).
(Showing the position of the back fin nearly directly over the belly fin, and at the same distance from the eye.)



THE RUDD (*Leuciscus erythropthalmus*).
(Showing the position of the back fin, which is much further from the eye of the fish than the belly fin.)

SOME NEW ILLUSTRATIONS OF OLD FAVOURITES.

(*Specially Drawn and Engraved on Wood for "The Fishing Gazette."*)

See Mr. Alfred Jardine's Article.

— NOTICE. —

THE FISHING GAZETTE is published every Saturday, and can be obtained at Messrs. W. H. Smith and Son's Railway Bookstalls and of the principal Newsagents and Fishing Tackle Dealers in London and the Provinces.

Communications relating to the Literary Department, Fishing Tackle for Notice, Books for Review, &c., must be addressed to R. B. MARSTON, the Editor of the FISHING GAZETTE, St. Dunstan's House, Fetter Lane, London, E.C.

Correspondents are requested to write on one side of the paper only, and give their real names and addresses, not necessarily as signatures to their letters, but as a guarantee of good faith. Unless this rule be adhered to, no notice will be taken of such communications.

Terms of Subscription.

The GAZETTE can be had by sending Postal Order or Stamps to Messrs. Sampson Low, Marston, and Co., Limited, the Proprietors, St. Dunstan's House, Fetter-lane, London, to whom all money payments should be made.

For One Year, post free, to any part of Great Britain and Ireland			10s. 6d.
,, Six Months	ditto	ditto	5s. 4d.
,, Three Months	ditto	ditto	2s. 8d.
To America and the Continent, the annual subscription, including postage			12s 6d

Advertisements.

Applications respecting advertisements should be addressed to the Manager of the FISHING GAZETTE, St. Dunstan's House, Fetter-lane, London.

SATURDAY, JULY 4TH, 1891.

THE PAST MAY-FLY SEASON ON TEST AND ITCHEN.

By HAMPSHIRE.

On the upper portion of the Test, the May-fly made its appearance in numbers on the 8th June, some five or six days later than usual. At one time there were dispiriting rumours afloat to the effect that, owing to the severe winter, all the larvæ had been killed. A little examination of the weeds soon dispelled that idea, as I found the insect crawling up the stalks, and I knew that a few hours would see them on the wing. On the 7th a few came up in the morning, and by the afternoon the fish knew them, and a few brace paid the penalty before six o'clock, when they ceased to rise. The wind for the whole of the first week was too awful to write about, dead down stream, and at times almost a gale. However, it had the effect of keeping the flies on the water, and the fish, taking advantage of their utter helplessness, became very bold and rapidly gained condition. After the 15th the wind veered round to the south-west, and then good takes were the order of the day. Nineteen and a-half brace was the top score on Bransbury, but on several other days it reached eighteen brace. The total up to the 25th was over two hundred brace; but I must say that several of them were of a size that a few years ago one would have scorned to kill; but as the river was overstocked and the fish decreasing in size, the order went forth to slay them, about ¾lb., and to return to the water the larger ones that were not made up. Strange to relate, no large fish were killed. Many, of course (according to the sad stories told), were hooked, but managed to part company in the weeds, which this year were left longer than usual to make up for the deficiency of water.

On the Chilbolton water, which is now much more select than formerly, and will I hope next year shape into a club (everything being in training), a large number of trout were killed, and those who fished it were loud in praise of the stock and quality of the fish it contained. At Stockbridge and Houghton, I am told the fly was scarce, and sport decidedly not up to the mark. What a pity it is the latter water is not stocked with the May-fly, now that it is so easy to import it! A couple of sovereigns would lay down enough larvæ to insure there being a large rise of fly next season. But, as I hear the water is in the market, perhaps the next purchaser may turn his thoughts to it.

There is no use denying it, "the May-fly is a great acquisition to any water": it fattens the fish rapidly, gives one a chance of killing the large ones, which do as much harm as jack, and enables those who are not expert enough with the small fly to make decent baskets, and I take it that a man who kills a fair number of fish with it is well recouped and satisfied for the expense he goes to; besides it gives him a certain amount of confidence, and it frequently happens that what is called a duffer often kills the largest fish, and so makes him as keen as mustard. The May-fly also gives the man of business a certain amount of excitement, if he has not already had enough of it in the city, waiting and expecting the all important-wire to say that "The fly is just coming up; lose no time."

The Houghton Water is, I hear from a friend of mine, swarming with fish, and there are only, I believe, eight rods on it this year, instead of the usual seventeen or eighteen; this would be rectified if there was May-fly. My friend told me he was awfully amused to see two fellows (the first time he went down) fishing with two flies down stream, and he began to think that perhaps that was the only way Houghton fish were to be killed. A few days like that soon sicken men and they don't go again; hence, I presume, the reason the club is not filled up. My friend, after a week's stay, was more than satisfied with his twelve brace, averaging 2lb. each, and he declared to me it was the finest water he had ever fished. I must say he knows how to throw a fly.

I have just been reading an article in last week's *Saturday Review*, headed "The Promise of May-fly," in which the writer, who evidently is not a frequenter of the Test, says only good anglers who can throw to a hair's-breadth and not miss have much chance when the May-fly is up. My experience is, that when the fish are well on the feed (not always when the fly is thickest on the water) an error of judgment in a couple of yards is no detriment. A fish will come quite that distance after your fly—you see the wave and are fully prepared to strike, more often than not too quickly, before it is in the fish's mouth. Still, it gives you a certain amount of warning. The writer goes on to say that in a few days the trout are so gorged—and on grassy level and broken stream, you may gaze all day and never see a rise, or only the one lazy effort, not repeated, of some satiated trout—in May-fly waters there will for months be scarcely any fishing, except when the dusk is washed with silver, and then only for a few minutes, if we have warm evenings, &c.

During the past May-fly season I gave a friend a day here. On arriving, he said, "I did very well on Chilbolton yesterday, when the May-fly was up and the fish not taking it. I killed five and a-half brace on Red Quill." Again, when in town last week, I had a letter on the 25th to say, "The May-fly is at last over, but I had a real nice day yesterday. I bagged eleven and a-half brace on Hare's Ear, ribbed with gold. This was on water where the May-fly had been swarming."

I hope this is sufficient proof to those who would not have the May-fly on their water on any consideration, that it is a mistaken idea "that fish won't rise for weeks after the May-fly."

I could give numerous other instances, but I hope the above two are sufficient. The May-fly lingered on here till the 23rd, and taken on the whole, as far as this neighbourhood is concerned, it was a real good year. True, we did not kill any large fish, like we used to; but as Detached Badger, when fishing here the other day, said, "I have come to the conclusion that it is much better fun to kill three or four takable fish, rather than toil all day and perhaps get one three or four-pounder."

On the Itchen, I am told from various sources, that it has been decidedly a bad season, especially below Winchester. About Worthy it was fairly good. One large fish, 6lb., was killed below Bishopstoke, but two of the best men I know fished the water next day and had a blank.

ANGLING IN THE NORTH SEA.

By D. BELL.

> "I cast my line in Largo Bay,
> A fishes I caught nine;
> There's three to fry, and three to boil,
> And three to bait the line."
> —*The Boatie Rows.*

WITH the coming of summer the angling tourist's fancy lightly turns to thoughts of rippling rivers, lovely lakes, and sunny seas. At this time the ocean rests itself after the toilsome labours of the winter hurricanes, and the feelings now associated with its gentle character are those of health, rest, and recreation. For several months its quiet surface will be intruded on by timid trespassers in search of rest to jaded minds, and new force to languid bodies, and to most of these the prime amusement on the water will be angling. And what a privilege it is. Here are no rents to pay, permissions to ask, disappointments through poaching, or scarcity of fish for lack of water. The sea and its contents are practically as free as air, and those who avail themselves of its bounties and pleasures are wise in their generation.

Choice of locality may be the most difficult problem which the intending holiday-maker has to solve, and while so many places are good, we should like to particularise one which in our opinion can be called excellent. It is that bit of rocky north-east Scotch coast stretching from the old-fashioned little town of Stonehaven, in Kincardineshire, northwards to the bustling, energetic, and splendid town of Aberdeen—"the silver city by the sea"—a stretch, roughly speaking, of sixteen miles. The contour of this rocky line is pleasantly diversified by little inlets, promontories, bays, and deep narrow gullies; while here and there, like sentinels of the cliffs, are isolated rocky knolls, which seem to be bits of the land that have stepped out into the water. Their bases are usually surrounded by the tide, and their green sloping sides and tops repeat the verdure of the mainland. Besides these there are the occasional low-lying half-submerged rocks—the Titan giants with seaweed tresses, who do the real work of storm resistance. What a sight it is to see them wrestle with a mountain wave. How they seem to raise their heads to meet it—how they dash into the wall of water, shattering it to foam like driven snow, through which their black heads rise again, with dripping locks, to meet the next aggressor. And what a sound the battle makes. What turmoil and what tumult seethes about their weedy heads.

But to-day it is entirely different. Raised high above the ebbing tide they seem like sleeping watch-dogs basking in the sun. Their ancient enemy also sleeps, with only a gentle heaving motion as of respiration, to show that life is not extinct. At low tide these half sunk rocks form the most interesting ground for the seaside visitor. There will he find all manner of crabs, limpets, periwinkles, sea anemones, and the multifarious life which inhabits the fringe of the ocean. And then the sea gardens. What lovely pools of marine vegetation he will come upon while clambering in search of crustaceans. No artist has yet done justice to the magnificent forms and colouring which these fathomed caves of ocean bear. Rich reds, olive browns and greens, lovely pinks, and warm burnt sienna, are the unexpected colour tones which meet the astonished gaze; and the shapes assumed by the various plants are both exquisitely delicate and magnificently luxurious. Indeed the impression given by many of these tide-left pools is that of a rich tropical garden, with tertiary colour tints, so harmonised and blended as Nature only faintly attempts above ground in a few lichens and withering leaves in autumn. The limpid medium through which they are seen, too, heightens the colours to their highest brilliancy, and gives a spectacle which nowhere else can be seen.

The high dry hoary cliffs are jagged and strata scarred, with wrinkles and furrows wrought by time upon their stony faces. Yet age with them has no accompanying weakness. Rigid, solid, quiet, strong, they live their life without decay. Here their office seems to be, not so much to stem the waters as to dam back the land, which everywhere rises high behind, threatening to overtop them and rush into the sea. At many unguarded points the soil has overflowed, and runs with steep or gentle declivity to the water's edge. Grassy slopes and lofty terraces, aglow with sea daisies, primroses, crowflower blossom, and wild fuchsia, are traversed by winding footpaths, which lead from rippling waves below to fields of waving corn above—for here the plough has claimed the land to the utmost limit.

Anon a gap occurs, where neither rocks nor land prevent the incursions of the sea. A chasm is formed but ten yards wide, with sheer ascending sides running inland fifty or a hundred yards, and ending as abruptly as a *cul-de-sac*. In stormy weather the scene within is almost fearsome. Great waves rush up the gulley and dash themselves against the walls, which throw them back again upon the next incoming wave. Then up the waters rise together, and dash upon the walls again, sending up spouts of spray to drench the cliff tops. With the tearing, plunging, swirling, seething, foaming, resounding mass of water under him, the spectator soon feels giddy, and turns to steady his brain by looking at something more stable than this fearful fluctuation of the waters.

Another attraction of this coast is the occasional cave which here and there burrows mysteriously into the rocks, and gives an air of romance to its vicinity. One near the little fishing village of Cove is a splendid example of cathedral architecture, with groined and fretted roof of everlasting granite, most gorgeously coloured. To sail on a calm summer day from the quaint, snug, little harbour of the Cove, along the front of the towering cliffs to the recess which leads to the cave is a very pleasant little voyage. Here, in the shadow of the great rocks, the water is a distinct blue-green, and the walls above are a bright pinkish-yellow. But not until the boat has entered the cave itself do the finest beauties of colour disclose themselves. The bold projections of the walls and patterned roof are blazoned with the brightest orange, purple, olive, and green hues, so harmoniously commingled and shaded together, and contrasted with the deep sea-green of the water below, as to give an impression in form and colour not likely soon to be forgotten. The great hall or chamber, twenty yards long and very lofty, is succeeded by a low narrow dark passage penetrating the rocks at a slight angle—how far we cannot tell. With a salmon coble and torch its mysteries might be revealed; but our timid crew prefers to imagine it is the entrance to the abode of some fearful ocean monster—as well it might be—and we retreat in dread.

Besides the lovely colour images presented by material objects at the seaside, what splendid light is sometimes shining on the sea itself. Given a bright, calm, summer afternoon on the east coast, with a mirror-surfaced sea under a white sky, and the spectator will have before him a vision of shining brightness such as will seldom bless his poor mortal eyes this side of eternity. Colour there may be none till the sun declines, but of pure white refulgent light the firmament is full, and finds its radiant image in the sea.

Sitting on the green slopes above the grey cliffs, watching the graceful sailings of the white seagulls below, the eye is suddenly arrested by the movement of what looks like a wand, or tall weed, near the water. Closer observation reveals the figure of an angler perched upon the rocks—looking from this distance like some predatory insect or crustacean with long antenna searching for its prey. The "antenna" consists of a stout bamboo rod, twenty feet long, furnished with a strong hemp line and a single bait hook whipped on three-ply salmon gut, and baited with mussel or soft crab. On a fine day hundreds of these angling "objects" might be discovered here and there on projecting rocks patiently and silently plying their angles—each with Hiawatha's invocation in his heart, if not upon his lips:—

"Take my bait," cried Hiawatha,
Down into the depths beneath him.
"Take my bait, O, codfish, take it!
Come up from below the water;
Let us see which is the stronger!"

Leaving Aberdeen by rail, the rock fisher is set down in a few minutes at Cove, Portlethen, or Muchalls—all good places—and proceeds to his favourite perch over some deep clear pool, where the seaweed and tangle are not too rank. With the bait dropped into the water he has simply to "wait for a bite," and when the bite comes, to hold on. Rod, line, and hook, are all put to a severe test in a battle with the sturdy rock cod. A "two-year-old" gives a lively tussle, and shows great determination to get amongst weeds or under a sheltering rock; but when it comes to hooking a "three-year-old," with no possibility of letting him run, and most likely no power to move on the part of the angler, the issue of the battle may almost be said to be a matter of providence. Cases have occurred in which the watery combatant seemed to have the best of it—angler and rod disappearing in the wake of the huge and victorious codfish. But these cases happily are rare, and if the tackle remain firm and the angler cool, the result is usually a weighty addition to his day's capture. As a sample of what is frequently caught during a few hours of a Saturday afternoon, let us quote from the last report of the Aberdeen Amateur Rock Fisher's Association which appeared in the *Fishing Gazette*. The Association consists of about 150 members, mostly artisans, whose only opportunity to angle occurs on the Saturday half-holiday, and competitions during the summer months are very frequent. At last competition the heaviest basket was 34lb. 13oz.; the second, 22lb. 14oz.; the third, 22lb. 6oz. The heaviest fish on that occasion was 11lb. 9oz., but heavier ones are not at all uncommon. Indeed, a basket from the rocks might easily be half a week's provender to the thrifty housewife.

Boat fishing is also pursued here in much the same manner as elsewhere round the coast. Such terms as "railing" and "whiffing," &c., are in these simpler latitudes unknown, but a resemblance to the methods is carried on all the same. That boat fishing is a popular recreation with the Aberdonian will be apparent to anyone who, on a calm summer evening, ascends the high ground overlooking the harbour entrance. Before him the great sea spreads itself all round, smooth as glass, its horizon lost in the sky. To the north a beautiful bay, margined with a belt of bright golden sand, curves gracefully north-eastwards as far as the eye can follow it in the sunny evening haze. Far out, as if set purposely to accentuate the idea of space, a great ship with wide-spread sails appears like a mere speck painted on the scene; and here and there, in nearer view, the dark-sailed herring yawls stand idly waiting for a breeze. But all round the entrance channel, beyond the pier heads and within the radius of a mile or so, the shining water is literally dotted with black specks, like a lot of water-fowl on an ornamental lake. These are little fishing boats, each containing two or more anglers enjoying the soft sea air and catching whitings, haddocks, and saithe. Sport here is rarely bad. In June, July, and August fish are always plentiful, and the boats usually count their catches by the score.

A more venturesome sport during the herring season in July and August is the mackerel fishing. Indeed, notwithstanding the disparity in size of the two fish, mackerel fishing may be said to be the salmon fishing of the sea. There are many points of similarity in the circumstances surrounding both species—but in particular, the success with mackerel is very precarious, and the search after them calls for more exertion and endurance on the part of the angler than is required in the case of those fish already mentioned.

A night with the mackerel is really an adventure. A deep keel boat with scudding sail, and some skill to manage it are the first requisites, and nerve to be out on the wide sea in an open boat all night are the second. Two or more usually join in a mackerel expedition, and a professional fisherman to accompany is advisable.

The tackling necessary is not elaborate, but must be very strong, as no wickeder fish swims than a mackerel when he finds himself hooked. Twelve, twenty, or thirty showy flies dressed on No. 3/0 Limerick hook, and three-ply salmon gut—and attached as droppers about 18in. apart, on a three or six-ply salmon gut cast line, is the usual tackle in Aberdeen bay. A heavy sinker is hung to the end, and with a hundred yards of strong sea line to pay out, the sail is set and off before the wind you go, trusting pretty much to luck to put you in the track of the shoal. Should "muckle luck attend the boat," the fierce tug-tuggings now and then indicate the hooking of new victims, and it soon becomes necessary to slacken sail in order to clear the line and set off again. Although the best time to catch mackerel is during the night, it does not follow that the angler works in darkness. In the month of July twilight hovers all round the northern sphere, and the sun's track from west to east can easily be traced in the northern sky. It never is quite dark—but an eerie gloaming half hides and half reveals surrounding objects, which when experienced for the first time is apt to waken the senses and nerves to a state of abnormal acuteness. Nor is the angler likely to be solitary. On a good fishing night the herring fleet will be abroad, and sights and sounds of sea and sky, hitherto unfamiliar to his eyes and ears will well repay the hardihood entailed.

Of pier and breakwater fishing, it is only necessary to say that the facilities for it are abundant, and the success almost unlimited. It is not an uncommon thing for a man to leave off fishing for a time on account of fish being too plentiful, and the angler filled to satiety. Housewives lose their temper when the good-man comes home night after night with a burden of fish which require a deal of cleaning, and for whose consumption the combined eating strength of the whole household is utterly unequal. Seven at a time with rod and flies is not uncommon, and must be said to be remarkably good fishing.

Many more particulars might be added regarding special localities and styles of tackles used; but these items are very easily learned on the spot, and a seaside angling holiday is not likely to be an unsuccessful one round the coast about Aberdeen.

"Another Fish Story.—A Salmon's Pedigree.—Mr. Turner some years ago rented a beat ona famous hotel water on the Aberdeenshire Dee for the spring months. It was his first essay at salmon angling, and although as verdant to the art as a cabbage in May, he was exceedingly anxious to learn and doubly so to kill a fish. So was Cowie, the gillie, who had an eye to his half sovereign for the first blood. On the last day of the week the landlord was called into the hall to see a '*beauty of a fish!*' as Cowie asserted (with a double wink across the bar counter, which had a mystic value of its own, and was not lost upon mine host), that Mr. Turner had that day killed. 'It's a splendid fish for the season of the year,' was the landlord's frank backing up of Cowie's opinion, and Mr. Turner thanked him for his compliments, which were showed with no unstinted measure on his success in securing such a prize. Mr. Turuer was a little more at ease, but was not yet confident, so, meeting Lord Gordon soon after, he buttonholed him, and pulled him along to the hall table to see his morning's capture, knowing that his lordship would speak out his mind on the subject. A sign from mine host, and his lordship took in the situation at a glance: 'Yes, I have seen worse fish, Turner, at this season of the year—much worse fish—yes, very much worse fish,' and he nodded very authoritatively over the matter. The fish was packed up and despatched to some dear friend in a compliment. The first kill!! Some three or four years afterwards, when Mr. Turner had grown old in salmon slaying, he and Cowie again came together on the same bit of water, on which he killed his first fish, and naturally the subject came up. 'Now, Cowie,' said Mr. Turner, after a drain had passed between them, 'I have always had my doubts about that fish—just tell me the truth now. It will do you no harm. Was it a clean salmon or not?' 'Well, sir, if you must know the truth, his grandfather might have been a clean fish once.'"—H. C.

Notes

OUR Killaloe correspondent, Mr. S. J. Hurley, writes, and is responsible for the following: "If you should know of a jolly lot of anglers—three or four in number—in want of some tip-top salmon, grilse, and trout fishing for July, pray send them on to me, and I can set them up on one of the best and cheapest several fisheries on the Shannon. Two miles of water, strictly preserved, *paved* with salmon, grilse, and trout; plenty of room for three or four rods, snug quarters close to river. Nice things to eat, nicely cooked. Lovely river, lake, and mountain scenery, and, though last not least, a hearty Irish welcome."

WE are glad to hear that several meetings of London anglers are being arranged to consider the threatened exclusion of the public from the Norfolk Broads. Mr. Richardson informs us that a meeting of North and East London anglers will be held at the club-room of Ye Pluckie Perch, the Earl of Derby, King Edward-road, South Hackney, on Wednesday, July 15, at eight p.m.; and that a meeting will be held by the Gresham Angling Society, in connection with this matter, on the 28th, at nine o'clock. A meeting of Norfolk anglers is fixed for Saturday, July 11, at five o'clock, at the Royal Hotel, Norwich.

WE have strongly urged Dr. Henshall, who has charge of the fishing tackle exhibit at the World's Columbian Exhibition, Chicago, to come over and personally call on our manufacturers, so that this country may have a good and varied show at this "greatest show on earth."

AN INTERESTING GROUP.—Messrs. Gunn and Stuart, Photographers and Miniature Painters, Richmond, Surrey, write:—"We are sending you a copy of a group taken at the garden party at White Lodge, Richmond Park, in connection with the silver wedding of H.R.H. The Duchess of Teck, and H.H. the Duke of Teck. Besides the Duke and Duchess the following are included in the group:—H.R.H. the Princess of Wales, the Princesses Victoria and Maud of Wales, Princess Christian, the Princesses Victoria and Louise of Schleswig-Holstein, Princess Victoria of Teck, Prince Edward of Saxe-Weimar, the Russian and Turkish Ambassadors, &c." The group is an excellent specimen of open-air portrait photography, and the fact that it contains a picture of the most charming and popular princess of the age, lends it general interest and additional value. The print is a permanent platinotype, size 9 by 13.

IN Ross-shire the sea trout angling on Loch Maree, and the summer angling for salmon and grilse on the Conon and Meig rivers connected with the Spa Hotel, Strathpeffer, ought now to be getting about their best.

IT has been proved by the netting that during the past ten days the grilse got in Scotch waters have increased very much in size on an average. The weather has been remarkably warm; and it is the opinion of most of the Scotch netters—an opinion in which they will not be gainsaid—that that during summer and in particular when the weather is extremely warm the *Salmonidæ*, in the sea, increase in size with amazing rapidity. They found their opinion on the fact that before the netting ends in August, the grilse of an average size are fully as heavy as the average sized early spring fish of the first year which ascending in January and February, must be five and six months older fish.

AN Oban correspondent writes: "Within a few days back there has been a regular flock of anglers setting out for the western Highlands and islands, to be present at the start of the summer angling for grilse, sea trout and small salmon."

A GRAND chance for amateur sea fishers! In Aberdeen Bay, close to the mouth of the Dee, there is a most extraordinary show of coal-fish What a royal time feasting upon smolts which left the river these fish must have had during the past six or seven weeks! Their most dainty food—the smolts—having some short time since all disappeared, the "coals" ought now to be hungry enough to bite freely. They are strong fish, and the play the amateur angler will get with them will not be a "wa'cast."

IN the Spey, the summer run of sea trout—the largest and best sea trout of the year—has been going on for some little time. This is the time for it, but more water than has lately been in the river is needed to bring on the flush of the run. Permits to fish on the Duke of Richmond's waters have hitherto been granted by Mr. Aiken, his Grace's factor at Fochabers. Liberty to fish for salmon, which, if retained, have to be paid for, has to be obtained from Mr. Wedderspoon, the Commissioner.

SEVERAL Scotch net fishermen have lately had to "pay the piper" pretty sweetly. Serves them right! They had no business to fish during the weekly close-time or poach others' waters. But it is the lessees of the fishings that are primarily to blame; they pay their men by results, and what can be expected of ignorant men but that when they think they can do it unobserved they should break the law in their desire to make the most of it? The more fish the more pay, you know!

THE popular baronet of Monymusk, Sir Arthur Grant, has been obliged to stake his miles of splendid trouting water—perhaps the cream of the Don—in consequence of the terrible poaching which has been going on. During the volunteer encampment at Monymusk the other week, Sir Arthur gave the officers the run of his fishery, and the men the right to the stretch of water adjoining the camp.

THE tidal waters of the Ythan are known to afford excellent sea trout and whitling fishing. Fly creeper, tube, and Devon all work. A gentleman who has been fishing these waters writes: "If we have not grand scenery we frequently have grand fishing. We can have pleasant boating, sea fishing, sea bathing, a little wild fowl shooting, tennis, and golf, and, not the least enjoyable, we can when so minded have an excursion to Collieston, some miles distant, where the cliff scenery is magnificent, and where in the lochs of Slains perch and pike fishing—the former really excellent—may be had."

ARE Loch Leven trout simply imprisoned sea trout, and will they when they have free access to the sea become migratory? We ask this because five years ago through the bursting of an embankment of an artificial lake a number of Loch Levens got into the river Ythan. That year a fair number were caught. The following year a few; but since then they have entirely disappeared! A correspondent writes: "I have an idea that they are confined sea trout, and that if they have opportunity they will make their way to the sea. You might note this and see whether those lochs which have an unobstructed outlet to the sea, where they have of late been put, they make any headway. We have tried them in Lochs Awe, Katrine, Ard, and others, but they have been a dismal failure. If the loch is confined they cannot get out and walk, but if it is not, they are hardly ever seen again."

MESSRS. COX AND SON, 7, Bernard-street, Southampton, are advertising for a young man to take charge of a fishing tackle department in their business.

SUCCESS OF THE SALMON FISHING SEASON.—It is very interesting to note that up till the present time the salmon season of 1891 has been an undoubted success, and that the failure of last year has in a measure been redeemed. The *Glasgow Herald* is responsible for the following comparison: "Last year the quantity of Scotch salmon sent into the London market for the season up till the present time amounted to 111,000lb. This year to the same date the quantity was 220,000lb., or nearly double." It must, however, be remembered that last year was only about a half average. However, it is satisfactory to note that the black forebodings of those who look not on the bright side of things, are, to a certain extent, not to be realised this year.

Notes and Queries

THAMES PERCH.—A CURIOUS INCIDENT.—Mr. Arthur C. Butler (vice-president of the Reading and District Angling Association), writes that perch in the Thames, which were so sadly decimated by the ravages of the mysterious epidemic of two years ago, are again strongly in evidence in the Reading District. In the neighbourhood of Reading anglers generally returned all perch they caught last year; and this may to a considerable extent account for the present satisfactory state of affairs. Careful and persistent protection of spawn for several years must also be considered. At any rate, there appears to be a good stock of perch once more in the Thames, specimens of this game fish, from ¾lb. to 2lb. having been numerous, both while trout fishing and in the general season. Mr. Alfred Hurley, one of the committee of the Reading Association, while fishing in company with Mr. Butler, and attended by Ned Sheppard, the well-known fisherman of Purley, had a curious experience while spinning for a Thames trout—with a fairly large gudgeon mounted on a "flange" spinner, Mr. Hurley caught in a rapid and shallow stream, two perch, each about ¾lb. in weight, at once. The fish, which were firmly hooked in the upper jaw, on the middle and lower triangles of the spinner respectively, must have made a simultaneous rush at the gudgeon from different angles. Mr. B. adds that he has never before heard of such a remarkable—we cannot say *singular*—angling incident. Have any of our readers ever met with a similar experience?—A. C. BUTLER.

GUT AND EYED HOOKS.—I observe that "South West" considers May-flies tied on eyed hooks are more likely to break than those on gut. I have not found it so, but what I have found is that the knot is liable to slip on the iron of the hook. This is easy to remedy by making a double hitch. He also says that he would not trust a "salmon fly tied on an eyed hook." I have fished with nothing else for the last four years, and have never had a break at the hook. My friend, who shared the river, also has used them for the last three years. For an amateur who ties his own flies they have the great advantage of being much easier to tie on. Our fish ran from 18lb. to 25lb., and the river was rapid, as is usual in Norway, Several fish were foul-hooked, so the flies were well tested.—"L. L.," in *The Field*.

SAVED FROM DEATH BY A TROUT LINE.—Whilst fishing for pike on a sheet of private water near Stratford-on-Avon, Mr. G. Ditchfield, of Alderminster, had recently a narrow escape from drowning; so close a shave was it, in fact, that his life hung on the slender thread of a trout line. Mr. Ditchfield was fishing from a punt which had a few inches of water in the bottom, and whether this caused him to slip, or whether the act of trying to make a longer cast than he habitually did was responsible for his sudden stumble, he cannot for certain say; all he knows, he says, was that he went backwards, and that his leg was lodged under the seat of the punt, and in that posture, with head under water, he found himself powerless. Luckily Mr. Ditchfield was not alone; a friend, Mr. Butler (a neighbour of Mr. D.'s), was at hand on the bank. The punt was fourteen to fifteen feet away, and as Mr. B. presumably couldn't swim, he threw his rod, butt-end first, on to the punt, and, by good luck, got the reel to catch on the metal rowlock. The rod was not of sufficient length to reach the bank, and there was nothing for it but that the punt must be moved by the line (a No. 1!). This held to the strain, and Mr. Ditchfield was landed providentially before quite exhausted. This is the biggest haul we have heard of being safely brought to bank with an Acme thus far.

WITH the advent of the May term mostly all the spring leases terminate, June witnessing the close of the remainder. In the upper water, however, attached to hotels, the lease runs all the year round. Already many of the lower waters have been taken up for next season, and the prospect of competition for a good bit of water appears keener than ever.

A MEMORABLE FISHING MATCH ON THE BORDER.

By GILKNOCKIE.

> "Some books are lies frae end to end,
> And some great lies were never penn'd."

THIS was the plain matter-of-fact statement of one Robert Burns, and he, by all accounts to hand, was a man likely to know what he was talking about. At the outset may I be allowed to state that the following narrative is true as death—in fact, "ower true." I had it from Rab Morrison's ain mooth, and he can be backed against George Washington for producing stark-naked truths, or any of those other old cheese-paring yarners who were as devoid of imagination as a flat-iron. Therefore the intelligent reader will see at a glance that this is neither a cock nor a bull story—though I could tell a tale about a cock fi—— (whew! this is a digression)—but a fair and square report of a genuine fishing match, and all the harrowing circumstances that led up to it. Besides, I would no more think of disagreeing with Rab Morrison than I would dream of disputing the right of way with a Bengal tiger if I met him in the jungle single-handed. Rab has a way of laying down the law that brooks no contradiction. He clashes every nail fair bang on the head, and clenches his arguments by smiting the table in front of him with his ponderous neive, looking round the while, as much as to say, "I should like to see anybody smile." No, Rab Morrison is none of those ——

Here ye Editor of ye *Fishing Gazette* puts his oar in: "Come, old man, come to the point; tell us about this fishing match. Everybody will think you've got some big lee up your sleeve if you do not let Mr. Morrison have an innings soon."

Being thus suddenly hauled up like a cadger's powney, who has just managed to get one leg into a field of clover, I must perforce commence, and reel off my story.

It was during one of my Border raids that I sat in the snug parlour of a celebrated old angling resort among the Eskdale hills, shut out from the noise and turmoil of the busy world, and within hearing of the murmuring Esk, which runs between the quiet village churchyard (where the graves of many well-known anglers of bygone days may be seen) and the cosy ancient inn in which I was located. It was the back end of the year. There had been no summer that season, and the winter had commenced early to fill up the gap; large flakes of snow fell, and anon the wind whistled and darted through the winding passages of the old hostelry, skirled through the key-hole, and finally went roaring up the "lum" at a fearful rate. Evidently the wind was out for the night, and meant going it. Just as I had made up my mind for a dismal evening, while the tempest was holding high carnival outside, who shall land in but Rab Morrison and his "ancient trusty drouthie crony," Sandy Crozier.

"Now I'm fettled," says I.

> "Heap on more wood! the wind is chill;
> But let it whistle as it will,
> We'll keep our merry Christmas still."

"Ho, landlord, ho! A jourm o' red het punch, ye toozie-pated son o' a landless, breekless, heilan' laird. Stir up the fire, Rab! Gar the sperks fly, Sandy! We'll mak' a nicht on't!" I remarked in my best Lowland Scotch, out of compliment to my visitors.

It was a night to remember, and as each succeeding punch-bowl was replenished by the generous steaming liquid, Rab Morrison fairly conjured as he recounted many a good run by flood and field, making the glasses quiver on the table as he smote the mahogany with his clenched fist in order to give point to his vigorous periods.

"Tell Mr. G. aboot yon fishin' match," said Sandy Crozier, at last, when Rab was getting near the end of his tether.

"Oh, ah!" replied the fluent one. "Aw hed nigh forgotten it; but it's a sad story at the best. Well, you see, Mr. G., it came about in this way."

Rab always delivers himself in Scotch; but I'll translate him, excepting when I want the full flavour of his observations to come out strong, then it will be undiluted Rab Morrison.

"It came about in this way," began Rab. "You will remember 'Captain' Elliot, of Liddle Bank. He wasn't a real captain. Well, I need not tell you that he had three beautiful daughters—'the three Queens o' the Border' we used to call them. I was hopelessly in love with the whole three a' at yin time. For months I slept little enough; all I thought of was which of the three charmers I would finally select. This knotty question, however, was speedily and quietly settled one morning at a neighbouring kirk, when the two eldest were married, without saying a single word to me, or anybody else that I know of. I took on dreadfully; but still the youngest one of the girls—Grace (the best o' the lot)—was left, tho' she had far too many sweethearts to please me. The Croozer, nae-less for as quiet and sackless as he looks, turned out to be one of my most formidable rivals. But there was one Dick Foster o' Catlowdy—'Dick o' the Forest,' as he was called: he was aye coming mouching round at a' times, baith day and nicht, hang him!" And here Morrison struck the table a fearful welt and used most unparliamentary language anent the said Dick o' the Forest.

"One night," went on Rab, "the three o' us a' met at Liddle Bank—the Croozer, Dick, and myself. A' min' the nicht weel. After a long and rather painful silence Grace rose from her seat, and in a queer sort o' way she said she was muckle obleeged to us a' for comin' to see her sae often. She liked us every yin alike, but couldna marry mair than yin at a time; but she wad put us to the test—a very slight yin. Would we all engage in a fishin' match on the following day? and the one who brought home the best-filled basket should be her final selection. 'Agreed!' we all said, as one man. The conditions suited Sandy Croozer and me to a hair, as I felt sure that Dick o' the Forest was more versed in horse-couping than angling; therefore I really only had Sandy to fear, and I considered him verra sma' potatoes as a fisher. Dick o' the Forest was in high glee. 'Would we accept a cigar each?' And tumbling a large pocket-book out of his capacious poaching-looking coat, he spread an immense collection of salmon and other flies on the table, from Jock Scott and the Silver Doctor downwards, and invited us to take what we pleased. Then Dick plunged into a flood of conversation about hackle, bumbles, patent winches, Phantoms, Kill Devils, tapered lines, &c. He could also name all the pools from Hermitage water foot to the Roman Camp on the Liddle, and from Eskdale Muir to the Solway Firth on the Esk. Here was certainly a red-hot champion at the game, and our hearts sunk within us. So crest-fallen had we both become that we took ourselves home at an early hour to meditate on the state of our love affairs, and actually left Dick o' the Forest in possession of the field. 'Twas a false and cowardly move. However, we were all early astir the next morning. Sandy Croozer came up with a fearful hang-dog look, as if he had not had a wink of sleep for a month. Dick, however, was as lively as a cricket; and when he cheerily said, 'What fettle, lads?' and slapped us both on the back, I could ha' brained him on the spot. There was a wicked leer lurking about his care-defying face that was simply maddening."

Rab here made a circuitous flourish with his clenched fist, which would have demolished Sandy Crozier, had not that worthy at the precise moment luckily stooped down to poke the fire.

"Aye," remarked Sandy, "he's gey camstairy when he gets on to that fishin' match. Just hark till him!"

"Haud yer whischt, ye donnert auld guff. It was a' your faut," said Rab.

"Well, then," continued Rab, "the conditions were arranged in a jiffey. We were to fish from ten o'clock till five, an hour being allowed for luncheon, and the catches were to be weighed at the Penton Linns Hotel at six o'clock. We all elected to fish in the Esk. Luckily the Cauldron stream fell to my lot, the Croozer got the Willow Pool for his pitch, and Dick airily remarked that as there was little choice left him he would be content with the foot of the Mason's stream. Now I have the two idiots. One salmon, a few grilse, and a handful of brown trout will do the business. Dick's flies are totally unsuitable for the Mason's stream, and the Croozer never knew how to fish the Willow Pool. Hoorah! here's a go! Never did two demented beings fish as we did that morning. Things went a bit slow with me at first, and, much to my horror, I could see that auld Hangie Sandy Croozer cleekin' them oot like mad. He was wadin' too up to his oxters, and I fondly hoped in my heart that the body wad be drooned, and that his auld carcase wad be swept past me to the Solway. I was frantic; they wadna' bite; and barrin' a wheen burn troots, I got nocht worth speaking o'. I tried a' the likely spots, and stood on a fearfu' craig deep in the water, nigh to the neck, but it was no go. Presently luncheon time came, but no one cared to talk of the fishing. As usual, Dick was full of anecdotes. He dismissed angling with a wave of his hand as poor sport, and not to be compared to fox-hunting, or even otter-hunting; and descanted on the merits of the various packs he knew, and the exciting runs he had had in the early mornings when he was nobbut a bit callant. Not a word about the fishing match—he had evidently forgotten it; anyhow he gave it a wide berth.

"Fortune smiled upon me directly after luncheon. At the very first cast something gave a fearful tug. A salmon, by Jupiter! Whirr went the line. I have him up the stream, then across, then down to the head of the pool; when all is soon over—a ten-pounder! My spirits were now up in the stirrups, and as the freshening breeze rippled the water, I began landing the trout like shelling peas. Much to my delight I could see Sandy thrashing the Willow Pool with all his might, but getting nothing; and I heard from a scout, whom I had sent out, that Dick o' the Forest was asleep on the bank, and baith his flask and his creel as toom as a whustle. Now, if I could only lick the creature Sandy, I am a made man for life. No time was to be lost—I must keep threshing away; but scarcely had I made the resolve, when the first stroke of five boomed from the old clock at Kirkandrews Tower, and the match was at an end. We all met on the Willow Pool sand-bed. I was wet up to the neck, and bathed in perspiration; so was the Croozer; as for Dick, he was as dry as bone, and had never turned a hair. 'How have you got on, Mr. Foster?' we both asked. 'Oh, capital—capital! I'll not be far behind you two champions. I have done well—considering.' 'Considering what?' said I, snappishly. 'Well, considering that I went up on to the top of the Roman Camp, and enjoyed the great fishing match through a large telescope I had with me. I never saw two men work harder. You both deserve to win her. I mean, you cannot both have the first prize; but I have caught some fish myself, and I don't despair. Sometimes these contests are won by very small fry.' Upon this Dick opened his basket, and produced two brount trouts, about ¾lb. each. In the excitement of the moment I almost grasped him by the hand, but I endeavoured to subdue my feelings by recollecting that I still had the miserable Croozer to reckon with, and the way his creel was bulged out I feared it would be a close thing. Sandy looked as solemn as a coffin, and I wished he was one with all my heart. Here was a man with whom I had lived all my life on terms of close friendship standing between me and the dearest object of my existence. How I hated the Croozer, and how freely I forgave poor Dick o' the Forest, can easily be imagined. The fateful moment came at last. Sandy's fish were put in the scales; mine followed, but I overtopped the Croozer by 4lb. weight, and won, as they say in racing circles, 'hands down.' Both the defeated candidates took their licking in a philosophical manner. I sent my basket of fish to 'Captain' Elliot's, at Liddle Bank, with a message to Grace that I would follow anon. Dick took his leave, ostensibly for Catlowdy, and the Croozer and I sat down over a drain of toddy. The news of the match had got wind, and by the time Sandy and I were half through the first jorum of punch the 'boys' began to drop in. They seemed to come from all the four winds of heaven, until the ancient hostelry was fairly crammed with officious friends, all bent on congratulating the fortunate winner. Briefly, we made a night of it. Finally I retired to roost. I slept long—in fact, did not wake up from my dream of happiness till ten o'clock the following morning, when I found the Croozer at my bedside—yon grinning auld image ayont the fire-place—caperin' up and down the room like a mad thing. 'What ails ye noo, ye second-hand son o' a water kelpie? What ails ye?' 'What ails me, d'ye ask? and you lying in bed, and Dick o'Catlowdy and Grace Elliot off to get married at Gretna Green at five o'clock this verra mornin', and they're now "ower the Border and awa'," at Grace's new hame in Nicol Forest.'"

THE LATE MAJOR HILL.

We give our readers a portrait of that grand sportsman, the late Major Hill, and think it will be appropriate to reproduce here a few words about him from Mr. James Thurlow, which we published soon after Major Hill's death.

"Dear Sir,—I hoped and expected to see a notice in *F. G.* of the death of that good fisherman and sportsman, Major Hill, late of Maesllwch Castle, Radnorshire. He was the master of one of the finest pack of otter hounds in the country, which were well known all over Wales, and in many parts of England.

"His charming little fishing box at Erwood is situate among the loveliest scenery on the Wye, with the river foaming over the rocks close under the windows. In anything like a good season he used to take a large number of salmon, some years registering over a ton. This is a record hard to beat, considering the fish had such a distance to travel, as, by the river, Erwood must be fully one hundred miles from the sea. Each salmon taken was duly entered in the fish book, with the weight, the fly it was killed with, and the name of its captor.

"You will, I think, remember that Major Hill, a year or two back, sent to the *F. G.* a most graphic account of his struggle with a monster salmon, which he hooked in his water, and which he had on for, I am afraid to say how many hours; but I know it was played far into the night by the aid of lanterns. The fish was unfortunately ultimately lost by the parting of the gut, either by the jaws of the fish, or through being frayed over a ridge of rock. A salmon of over 40lb. was, I think, soon after seen or caught higher up the river, and Major Hill would have it this was his big friend who broke him.

"Having had the pleasure of business transactions with the Major for many years, and also, by his kind courtesy, had the privilege of a few days' salmon fishing with him at Erwood, I can personally testify to his kindly and genial disposition and to his unbounded hospitality. His chief delight was in his merry little pack of hounds, but he was fond of cricket, a first-rate performer with gun and salmon rod, and altogether as fine an all-round sportsman as could be found in the kingdom.

"His funeral, which took place on the 8th June, was attended by a large number of sympathising friends and tenantry. He died universally beloved and lamented, and is laid to rest in the little churchyard at Glasbury, almost within hearing of the murmur of the charming river he loved so well. *R.I.P.*—Faithfully yours, J. Thurlow."

THE LATE MAJOR HILL.

LAKE VYRNWY.

Tempted by the reports of what certain friends of mine have done on the above magnificent rival to Loch Leven, I have been enjoying some splendid sport thereon during the past few days. In looking through the visitors' book at the Lake Hotel, I was struck by the scarcity of anglers' names from "down south," and I feel assured it is only the want of knowing what a real good thing this fishing is that keeps them away, and leaves to Liverpool and Manchester anglers a monopoly of the grand sport here obtainable upon reasonable terms. The lake is five miles long, and it covers one thousand one hundred acres of ground, filling the whole of a lovely valley, with mountains rising pine-clad and heathery from the water's edge on both sides, and possessing at its northern end several sequestered bays, into which flow turbulent mountain streams. Nor must I omit to mention the series of waterfalls which help to feed the lake, because some of these falls are exceedingly pretty, their beauty being enhanced by the rich luxuriance of the surrounding foliage, and the wild wealth of ferns which here flourish so abundantly.

But you want to hear about the fish. Bear with me, brother anglers, but for another brief space, because I want to make you understand, if I can, what a delightful place this is; and most true anglers like to associate their sport with pleasant surroundings. No one would imagine that this lake was for the most part artificial; but such is the case, and it represents the pent-up waters of several rivers with which this Vyrnwy valley was flooded, and as the lake took ten months to fill, some notion of its magnitude may thus be formed. It is now teeming with magnificent trout, of whose bold dashing rises and splendid fighting powers I had ample evidence within the past week. As the best fishing is on the shallows near the shores, those anglers who object to loch fishing because of being compelled to use a boat, may top the scores from the shore. The trout average about 1lb. each; but there are some magnificent fellows of fabulous weight only waiting for some past master of the dry-fly art to beguile them when at eventide they rise in mid-lake, with a boil like a salmon. I am preparing an attack upon these sockdollogers, who are, no doubt, some of the old inhabitants of the original lake which existed at the head of this valley before it was flooded. As a specimen of the fighting powers of Vyrnwy fish, it took fully a quarter of an hour to kill one on Saturday upon a 12ft. Castleconnell rod, and that trout was under 2lb., and he was fairly hooked in the corner of his mouth. How is that for pluck, Mr. Editor? Don't let me be misunderstood—this is not a "duffer's paradise." There no trolling; nothing but artificial fly allowed; a 10in. limit is imposed; and the take is also restricted to seven and a-half brace for one rod, or twelve and a-half brace when two or more men fish from the same boat. This limit has been several times reached this season, and I ran it close, with a friend, in a raging gale on Saturday last, although I am the veriest of duffers at loch fishing. Having told you what a real good thing this is, in the way of sport, let me add a few words upon the mighty question of £ s. d. The single fare (L.N.W.) from London is 14s. 6d. to Llanfyllin, nearest station; the inclusive terms for hotel (*en pension*) is three and a-half guineas; fishing, 4s. per day, or £1 per week; boat and man, 5s. per day. The hotel is replete with every comfort, and in all my angling travels I have never met with more comfortable quarters or more generous fare. By the way, I should add to my description of the lake the fact that it is encircled by a level road, cut like a terrace out of mountain sides, and forming a delightful drive. In conclusion, a few extracts from the official record of the slain will be useful as showing what has been done on the Vyrnwy this season. The season opened on March 26, and up to last Saturday, June 27, the total number of trout weighed in was three thousand and eighty-five, weighing 2,647lb. 3oz., taken in eighty fishing days; no Sunday angling allowed. There are "lashins of trouts" in the lake, and not the slightest risk of the stock running low, because, in addition to the natural breeding ground, artificial breeding is being carried on upon an extensive scale, and the nursery ponds are swarming with young stock. Intending visitors should write beforehand and arrange for hotel trap to meet them at station, and now that the fishing is at its best, the demand upon boats may cause disappointment unless anglers secure one by previous arrangement.

G. W. Gedney.

P.S.—One of the best boatmen on this lake was drowned on Sunday evening by the upsetting of a canoe.

Tremendous Catch of Herring.—Last week the Annan fishermen who are plying the herring industry in the Solway Firth met with an amount of success which has seldom if ever been equalled before. One single fisherman returned with over three thousand herring of prime quality, and he could have returned with more if his boat had been larger, for he had on this account to throw a large quantity out of his nets after they had been captured. But even this record was far out-stripped by a Whitehaven boat, belonging to John Shackley, called "Maggie," and captained by Jonathan Wright, who caught at one fishing no less than six thousand four hundred fine herring. Each day a considerable number of boats have been out this week. Consequent on the big catches prices have fallen considerably, and the fishermen have in many cases been glad to dispose of their herring at the rate of two and sixpence per hundred. The East Coast boats are now in a forward state of readiness for prosecuting the industry, and old hands are predicting a very prosperous season. The white fishing has been suspended.

Fishing in the London Parks.—According to an evening contemporary, certain members of the Bolingbroke (Battersea) Radical Club, who, judging from the steps they shortly intend to take, are anglers, purpose asking the London County Council to allow rod fishing in the waters of the parks, commons, and other open spaces under its control. It would be much better if they induced the London Angling Associations to move in the matter.

A Good Name.—The boy's fishing pole was fastened under the root of a tree on the river bank the other day, and he was sitting in the sun playing with a dog. "Fishing?" inquired a man, passing along the road. "Yes," answered the boy, as briefly. "Nice dog you've got there. What's his name?" "Fish." "Fish? That's a queer name for a dog. What did you call him that for?" "'Cause he won't bite." Then the man proceeded on his way.—*Washington Star.*

"A DAY OR TWO ON THE DEVERON."

READ TO THE GRESHAM ANGLING SOCIETY, ON JUNE 2, 1891, BY DR. BRUNTON.

"O Caledonia, stern and wild."

IT is a pleasant thing to obtain even a short holiday in the spring-time, after one has endured the arduous duties of a more than trying winter. A little recreation of this kind is enhanced by the prospect of a bit of fishing. I was told that I might get an odd salmon and plenty of trout if I could so arrange as to take my "leave" at Huntly, by the banks of the celebrated Deveron. Accordingly, for that end, two angling friends and I made preparations; when these were accomplished on April 20, we started from King's Cross by the Great Northern eight p.m. train, arriving at Aberdeen punctually at eight a.m. next morning—a truly marvellous run.

O tempora! did it "ever enter the heart of man" a hundred years and less ago that steam should so shorten time and space? Well did Sir Walter Scott describe his fellow "literatus," James Watt (Introductory epistle to the Monastery), as "the man whose genius discovered the means of multiplying our national resources . . . giving the feeble arm of man the momentum of an Afrite; commanding manufactures to arise as the rod of the prophet produced water in the desert; affording the means of dispensing with that time and tide which wait for no man; and of sailing without the wind, which defied the commands and threats of Xerxes himself. This potent commander of the elements, this abridger of time and space."

In my young days an aged relative used to amuse me by the history of several of her journeys by sea from her native town to Glasgow, each necessitating preparations of an extensive nature, because the voyage often lasted two or three weeks. What is that distance now? A swift experience of five short hours! How much more is this true on land by rail.

Certainly it must be admitted that when an excursion is made slowly one has increased opportunity of examining and studying things of interest, which in the present rapid method of transit can only be cursorily seen or altogether passed over. "Sleep dwelt in our eyes" till we passed Edinboro'.

I must not forget to mention the magnificent land, sea, and sky scape which presented itself as our train crossed over that stupendous work of engineering skill—the Forth Bridge. By land

"Night's candles are burnt out, and jocund day
Stands tiptoe on the misty mountain tops."

But far down the channel, as we gaze, away on horizon's edge a molten speck appears, in power as severe to mortal eye as is the glare of furnace iron fresh from its pot. It is the sun—"the all-seeing sun, which ne'er saw the bridge's match since first the world began!" It illumines the whole prospect. This "ancient light," with its all-powerful rays, soon dissipates the eastern mist, and makes clear the view below us. It does seem strange to look right down upon large ships moored in the placid sea. They appear like cockle-boats from our lofty height, and all along each side of the channel the towns, villages, and solitary dwellings, trees, cattle, and all, suggest a resemblance to the land of Lilliput.

Yet we know it is a panoramic scene, and that "distance lends enchantment." Too quickly the scene is changed, and we rush along the Fifeshire coast. In something less than an hour we are upon the second edition of the long Tay Bridge. It is needless to recall what became of the disastrous first; suffice that the present is a noble structure, and the run across is nearly, if not quite, as interesting as the one above mentioned. The north part of the bridge ends in the busy port of Dundee. Here we stay a few minutes, and rapidly glide along the eastern coast. Born in a sea-port town, to me the sea has everlasting charms. Many objects in passage deserve to be noted; but the only thing I shall mention in relation to fish is the superabundance of salmon-stake net-engines, closely packed along the coast from the region of the mouths of South and North Esk up to Aberdeen.

In contemplation I said to myself: Is it possible, with so many traps, that a salmon, if he come in to feed in the shallow water, can escape capture? Poor salmon! his only chance of a free run is on the "unlawful" Sabbath. Were it not that it is enacted that the nets shall be "off" for these precious twenty-four hours, "'twixt Saturday and Monday," I fear the presence of a salmon in the Dee or Don during the netting season would be a *rarus piscis*. Commercial instincts prevail, and the angler must suffer and put up with his conditions. He who wishes fish for breakfast or dinner must endure exorbitant charges so long as the products of the sea are manipulated in price as they now are in London.

Curiosity led me to pay a visit to the fish-market in Aberdeen. I saw boat after boat arrive with the "harvest of the sea." "All sorts and conditions" of fish were exposed for sale and auctioned. I shall give an instance. What think you of seven beautiful cod-fish (each of which would bring 2s. 6d. to 3s. a-piece in this our London), lying on a clean slab, put up to auction, and the lot bringing 3s. 6d., or 7d. a-piece? Other fish were sold at a like rate. Large boxes of silver whitings made 8s. or 9s.! Naturally I had a conversation with the master of one of the fishing boats, and on expressing my surprise at the price of his fish in Aberdeen as compared with that which we pay in London, he said, "Oh, we poor fellows don't get any of that money; it all goes to the middle-man." "What," said I, "don't the railway companies by their rates of carriage vastly increase the price?" "Oh, dear, no," said the fisherman; "railway carriage is a trifle. It is the market-rigger who swallows the bulk of the profit." "Them's my sentiments."

I walked away from the Aberdeen fish-market a sadder if not a wiser man. One thing I feel now, and have long felt, that a big reform is needed in London and elsewhere in England as regards the price of fish. Is it not well known that cargoes of fresh fish are often destroyed, either by being thrown overboard or sold as manure, rather than that the price should be cheapened and the market lowered? Why does not the law penalise the destruction of wholesome food? Does the farmer destroy his wheat when the price is low or unremunerative? No; for very good reasons. He feels that he has tilled his land, sown his seed, waited till ripening, then had his crops reaped, and afterwards threshed out. In short, his corn has cost him a large amount of time, trouble, and outlay; so he values it. May-be the fisherman—or rather he who buys the fisherman's cargoes, or contracts for them—acts and thinks thus: "Oh, it is only a case of reaping; if we destroy this lot we have only to reap again; put in the nets and the thing is done." Thereby following the principle of the old proverb, "Lightly come, lightly gone." But can we accept this as a justification of a practice which ought to be abhorred by all? The sooner it is put a stop to the better for the good of the community.

We had ample time for a substantial breakfast; then, making a change of line at Aberdeen, we journeyed by the Great North of Scotland rail up by the banks of the Don, amidst a country which, though one could not exactly call it "wild," was; at all events, at this season of the year, decidedly "stern." There was scarcely a bit of spring green visible; all the fallow land bore on its face the brownness of hard winter. The other fields were tilled, sown, and being sown; but not a blade of corn was through the ground. Away in the distance the mountains carried patches of snow upon their shoulders, making the bitter north-east wind more bitter still as it swept over. The highland railways are engineered in a manner made to follow as nearly as possible the course of a river. After reaching the watershed we commenced to descend by the banks of the Bogie, down the Strath, and into Huntly—a very pleasant and satisfactory journey. Our friends met us, and we proceeded up town to take our quarters at the Gordon Arms. The rest of the day was spent quietly. In the evening a ramble by the banks of the river, which runs about half-a-mile outside of the town, enabled us to prospect for next day, so we resolved to drive up to Glass and fish down.

Next day, as the wind was N.E. and very cold, we thought it useless to start early, so waited for letters, which arrived about eleven. A pleasant drive in the keen air brought us to the neighbourhood of the river just as the fish began to rise. "Buckling to" as quickly as possible, we selected our pools and began, having been advised to use Hare's Ear and March Brown flies. In the pool I fished the trout rose very unsteadily; the flies came floating down in an abundance equal to a swarm such as I have often seen in the mid-day hatch of the Hampshire Itchen.

While the rise was on I only saw one fish rise twice in the same spot; casting over he fell to my artificial—a nice beautifully-marked trout of 12oz.

In half-an-hour the rise was over, the flies were gone, and it became a question to me, Why did these trout in such a cloud of floating flies rise so singly? They came "as single spies." I think the question may be answered by the fact that the hatch of fly was over before the trout realised the presence of their dainty morsels.

Then (and this will apply to our other experiences) why was the rise of fly so limited in time? I will try to solve this question, and I think the answer may be correctly contained in the following remarks:—

(1) We had a very cold wind blowing, and interfering with the action of the sun's rays. When noon arrived, ere the heat was sufficient to force a hatch, the same sun's influence had all the while been acting upon the snow-clad mountains wherefrom the Deveron takes its birth.

(2) A number of thermometrical observations have revealed the conclusion that the same grand sun which hatches out the flies also as sharply ends their course; for while the waters of the Deveron registers a spring-like temperature in the early part of the day, by half-past one or two o'clock it sinks three or more degrees by reason of the sun's action upon the distant snow. Down trickles ice-cold water into the river; down goes the water's temperature; down goes the warmth; and there is an end of the hatch. Geniality is necessary to all life, and very much so to that of winged insects. Cold destroys the life of the living and preserves the dead from decomposition. How inconsistent seems this cold. My friends catch a fish or two, and so do I; and as the rise is over, we wend our way down by the lovely banks of the Deveron, having a cast here and there on the "chuck and chance" principle. An odd trout, perhaps, of a speculative turn of mind now and again falls to our flies, deftly placed; but the whole day's proceedings are meagre. It is a weary trudge to the tired along the banks from Glass to Huntly. We pass some magnificent pools, which in the salmon season ought to yield good sport; as for trouting, the whole river looks as if it were built for that purpose.

Unfortunately a little bird has whispered into my ear that minnow, worm, night line, and net fishing have been too much for poor Deveron; not merely that the constant lining of the fly-fisher has made the fish which remain very timid in their nature, but the thieves and pot-hunters have denuded the water, and by their constant intrusion into the haunts of the inhabitants by their foul means have scared the fish—upon which Nature has bestowed a natural timidity—into a state of continuous dread. Farewell, then, in such circumstances to fair and free fly-fishing.

What a pity, is it not, that when a generous-hearted nobleman (Duke of Richmond and Gordon) gives to the public such a munificent grant of free trout fishing, that it cannot be fished fairly? Now, what I mean by the word "fairly" is, that if a river or stream is fished with fly only, and all fish under half-a-pound are returned, that river never requires re-stocking—it can always hold its own. I know that I am not alone in this opinion. On the other hand, let a river be wormed, minnowed, and netted, it will soon deteriorate, and all the re-stocking in the world will never restore it to its pristine condition. Were such an association formed at Huntly as that which exists at Canobie for the protection of the border Esk, the Deveron would be one of the grandest rivers in Scotland. I don't mean to traduce its character now; but if the regulations suggested were carried out, the river would be at its very best.

The same rule would apply to many other rivers in Scotland; and if there were superadded a close time for capture of trout in all rivers and lochs, it is needless to say that an immediate improvement would take place, not only in the size and quality of the trout, but in their sporting properties. Give the trout a sufficient time to forget the appearance of rod, line, and artificial flies, and the angler will soon find out what an advantage "close time" is. Why the Legislature has paid so much attention to, and taken such precious care of, the salmon, and totally neglected the rights of trout, I have with many others been at a big loss to understand. Some of the Scottish angling clubs, I am pleased to say, have been of late moving in the matter of a close time for trout, but so far their efforts have been of little avail. The sooner the close time comes the better for the angling prospects. Now that the number of anglers is twenty to one in comparison with that of thirty years ago, if they expect sport, anglers must conserve both in time and in the size of fish and mode of capture.

What are we in the south here to think of a club competition in Scotland, in which the first prize was taken the other day with thirty-six trout weighing 6lb. 14oz., and second, thirty-two trout, 5lb. 10oz.? Shade of Izaak Walton, what "a slaughter of the innocents!" Well may the waters be denuded of their trout when such a club exists. I trust this is the only one which "defiles its garments;" better it should walk in white and be worthy.

I trust that if any member of the committee of the club whose competition on the Clyde I refer to reads this, he will bring the matter up at his first meeting, in the interest of angling, and persuade those who reside within a hundred miles of St. Andrews to mend their ways.

I fear that I have by digression said so much, that some will think the history of my trip is very like the thread which the chemist suspends in his liquid when he desires to obtain most beautiful samples of crystalline compounds. My crystals, I am afraid, are rather sharp, if not bitter. To the thread again.

On the following day, by kind permission of friends who rent a part of the Deveron near Marnock, we made an excursion of ten miles through a district of country which, charming in its present barrenness, must be most lovely when all Nature is garbed in green or yellow. The rooks were busy, and the larks sang high in the clear, cool air, while other songsters helped the music of the way. Noon had arrived before we had put up our rods. We saw the trout busy in full rise. I elected to use a single horse-hair cast, with the orthodox flies. My companions at once began in the first pool—a pool with a very uncertain bottom, running over irregular sharp ledges of rock, where one had to "walk, or rather wade, circumspectly." As the N.E. wind made the casting of a light line somewhat difficult, I took myself off across a meadow to a long pool, the bottom of which was unknown to me; and willing as I was, I dared not wade. I was alone. From the bank I was fairly successful while the rise was on. This pool, overlooked by a high bank, well wooded, gave shade and protection from the wind to the thousands of March Browns which were being hatched out. At the throat of the pool I saw a flock of ducks, which were very busy feeding. On carefully watching, I was astonished to find that their particular attention was being paid to the hosts of floating flies, which they followed and gobbled up as fast as they could—one might say, shovelled them down their throats. Little heed did the trout give to these ducks, for they kept rising and taking their share amidst the flock. Had I been able to reach the farther side of this pool I fancy I should have made a big basket. Fishing from a high bank I did fairly well, and was content. What more?

It is very neat and pretty and delicate work to play out a pound and a-half fish in hard-running water on a single hair; but it can be done, though it obviously takes a proportionately longer time to kill the fish. Perhaps had I known how short a period the rise would last I might have used moderately strong gut, and thus punished the fish more rapidly. It was a question, however, of pleasure, not quantity; and I thoroughly enjoyed myself in the thick of the fight. On the distant hills the sun, at its hottest, is actively melting the snow; presently the Deveron runs colder, and the flies cease to burst forth. The rise ends; the ducks take themselves off to preen their feathers under the lee of the opposite bank; and I go on fishing on the chuck and chance plan, and we all do the same, making occasional additions to our creels.

It pleases us to note some likely pools in which "later on" a fair amount of salmon may take up a temporary abode, and with whom, providing all things go right, we hope to make an attachment in the "back-end." At or about half-past four o'clock we assembled to the tune of "down rods" and "count up." Fifty-four trout to four rods, in weight averaging nearly ¾lb. each, was our nett result—no mean basket considering the shortness of the busy time.

We got home at the appointed hour, dined, and went out visiting, being most hospitably received wherever we went. Commend me to my national hospitality—if it is not profusion, it is hearty, and no mistake.

One likes a bit of change, so next day we gave up fishing and had a trip to the country, visiting the little village of Rothiemay. The train carried us by the banks of the Bogie till it joined the Deveron, and then along that river's side. This is a private fishery, extending from Huntly Castle to the Railway Bridge at Rothiemay. Thereafter there is a good length of free water, as well as the whole of the neighbouring tributary called Isla. We enjoyed a pleasant walk to the little village, lunched in the old-fashioned inn (Fife Arms) by the riverside, strolled about, and watched two anglers ply their rods; studied the various kinds of birds, which hopped among the hedgerows or fluttered from tree to tree, singing

> "Under the greenwood tree,
> Who loves to sit with me
> And turn his merry note!"

and home again, with a resolve that our next visit to Rothiemay would be on the following forenoon. So it was, but the fishing was not propitious. It was one of those days when "something," *Je ne sais quoi*, is wrong. There was a short rise and an abundant show of fish, yet they somehow were not to be cheated; nevertheless, by dint of perseverance I managed to get seven fish.

Monday, the 27th, was set apart for a picnic to Marnock. We had the pleasure of the ladies with us. What is a picnic worth without their presence? It is impossible for such a thing to take place unless they be there. Men may sit down on the grass to lunch, and smoke tobacco after; but the whole day's entertainment is altered, toned, modified, smoothed, made truly pleasurable, by the gentle presence of the gentler sex. Is it not recorded by the porter of the Arabian Nights, when he addressed Zobeide: "You know that a company of women without men is as melancholy as a company of men without women?"

The clerk of the weather favoured us with a charming day; so fine was it that we felt inclined to take it as the harbinger of spring, for did we not see a big bright red butterfly flit over the field, airing itself in the mellow sunshine? Our access to the river was a good hour earlier than on the previous occasion, and we were just in time for the commencement of the rise. We placed ourselves much as on the last expedition, and soon were in the fight. I found the flock of ducks at the same old game—spooning up the March Browns.

Wading into the throat of the pool, I had very fine sport. One good fish, a little short of 2lb., fell to my persuaders after a gallant fight, tossing itself out of the water time after time for chance of freedom. When the rise was over we had our lunch, and a very enjoyable one it was. We sat ourselves on the crisp brown grass, and chatted right merrily; anon we took our rods again, and by dint of perseverance added a few more trout to our already well-made basket. Report said that a salmon had been seen leaping in one of the pools, so I put up my spinning rod and tackle, and with a good specimen of Brown's Phantom searched each pool; my luck was that I twice caught the whole county of Banff, which I carefully released, but I saw not a fish. We departed early, arriving in Huntly in time for six o'clock dinner.

My companions elected to go south next morning, having some business to transact in Glasgow, which would occupy them greater part of a day. As there was no particular need for me to go with them—for by so doing I would lose a day—I arranged with the proprietors of the Marnock water to re-visit it, seeing that we had had such a delightful day before, so quiet and warm, which was favoured by a gentle touch of southern wind—a good promise. An old Scotch song says—

> "But many are the ups and the downs of this life,
> When the dice box of Fate jumbles tapsle-teerie.'

The anticipations of another delightful day were sadly overturned, because during the night the wind chopped into the opposite direction, and rude Boreas blew his wintry horn with a vengeance.

In spite of the fierceness of the wind and cold we made our venture. Never in my life-time have I seen such clouds of dust blow up: it was as abundant as on a dusty Derby day, differing, however, in that there was no traffic here to raise the dust. It was simply blown off the dry-parched highways, and in quantities persistent enough to make the distant hill-sides present the appearance of their being a-fire.

On reaching Marnock the fleeting clouds faster and faster scudded by, and soon the blackening storm-cloud beat down upon us in hail-stone squall with impetuous virulence, making our cheeks and ears tingle, and blowing our lines right off the water. Where I fished on the previous days I could not throw a line. In spite of all the cold the March Browns came floating up, only to be wafted away on the "wings of the wind," except where they found shelter under the lee of the opposite bank. Here I saw the ducks again busy as before. During the lulls of the storm we managed to catch a few trout. The "cauld blast" sent us early on our homeward journey, and we whiled away the time in pleasant chat as we drove along. I dined with one of my friends, and had a right good hearty welcome.

During the night the cold became more intense, and when I awoke at half-past five next morning (preparatory to an early start for the south) I found the town of Huntly and the country around clad in a thin morning mantle of fresh-fallen snow, whilst the distant mountains had received a supply sufficient to lower the afternoon temperature of the Deveron for a week or more to come. As I steamed out of the railway station a regretful heart told that I was, for the time being, parting with kind and sincere friends, whose hospitality I very much appreciated, and shall always bear in mind.

GRILSE AND SEA TROUT.

BY RENAE.

ADVICE TO HOLIDAYING ANGLERS.

AT the present time, when many anglers are contemplating a visit to Scotland for a bit of grilse or sea trout fishing, a few hints as to procedure, and wrinkles as to methods, may not be unwelcome to those to whom the fishings may be unknown, or comparatively unknown. First, it should be ascertained that the waters thought of being visited at a particular time are in their "season" at that time. By this is meant that in the event of water and weather both being right, the sport may be counted on to prove as good as at any time during the year. Second, as no angler should estimate himself better than an average "rod," he should ascertain from the hotel keeper, or party letting the fishings, what the average take at the particular time he means to fish has been to one rod in a day or week, for a year or two back. If such particulars are not furnished, it might be wisdom to suspect something. Parties offering fishing should keep full and accurate records of the sport from year to year, and cheerfully furnish particulars of these records to inquirers. Third, those who can bundle up and go at any moment, should not do so until receipt is had of a "wire" to the effect that the water is getting into right ply. This, however, may sometimes cut one out of a good gillie or boatman—a very decided loss to the entire stranger. Fourth, if the angler intends to stick to one place for the whole of his holiday, he should make careful inquiries about five or six different places, and the place which he fancies will suit him best—provided he is satisfied that the information he receives concerning it is genuine—is the one which he should select. Fifth, if the information as to the season and the probabilities of sport does not satisfy the intending angler, a disinterested party should be consulted. The Editor of the *F. G.* will, if not in a position himself to supply the information, be certain to find someone who can. Sixth, be sure in treating with the parties who have the fishings that a definite promise of the services of thoroughly competent men to act as gillies or boatmen is given. This is next in importance to ascertaining that the time of the year you intend to fish is the best time of all, *ceateris paribus*. Seventh, ascertain, if you are an "economist," what distance the various fishings are, the charges for driving (if necessary), boats, gillies, and the fishing. Eighth, know how you will be situated with regard to fishing—whether you will always get on to the best waters whenever you like, or whether you will have to take your, turn or the chance of the ballot. Ninth, find if the fishing is free, what extent of water there is, and how many rods are usually on it. Tenth, should the water be free at all times to all the other rods, try you and all the rest to work harmoniously together, understanding thoroughly amongst yourselves—that everyone may find matters most pleasant—when, where, and how each one is to fish if he cares. Eleventh, do not, if you are satisfied that you have gone at the right time to a place—that you were not taken in by the information you got—get splenetic and abuse your host or your informants behind their back should you, through the water being too high or too low, not have such good sport as you counted on getting. Twelfth, use the right tackle and the right lures, and as to these, and how to fish under different conditions, always cheerfully give and never be above receiving information. Let there be no jealousy, let the most successful anglers do everything that in them lies as becometh brethren of the art to make their unsuccessful companions as successful as themselves.

(To be continued.)

A VERY fine salmon scaling 58lb. was got in the nets at Burghead, near the mouth of the Findhorn in the Moray Firth. It was a finely-proportioned fish, and its weight is quite unusual on any of the Moray Firth stations.

EDUCATE! AGITATE!

OUR salmon and sea trout fisheries! Are they in a good or in a bad way? Have the powers that be a clear knowledge of their state? and are they using the means in their power to keep up the stock of fish? Anglers! What are they doing? They look for fishing—yes, for good fishing; but what are they seeking to do for the fisheries that they may obtain it? Angling lessees pay their rents, take the sport they get, growl frightfully doubtless, and here for a time it ends with them. Next year, most likely, they move to other places to repeat the performance. Free fishers pay nothing; as a rule they are grievously disappointed with the sport; but what efforts are put forth by them to get it made better? Rarely any; nay, rather, they become splenetic, *storm* the hotel-keeper if they have been at an hotel, and behind their backs dirk at every round their defenceless and well-meaning friends who sent them thither. Fishery proprietors! Have they moved, or are they moving, to get matters made more to their mind? They are not pleased with the rents or the sport they get, yet they will not budge one inch; neither spend that they may profit by spending nor take the trouble to agitate. Not one in a score of any of the classes named do we find are doing what they might — what they ought. They must know that year after year the number of anglers increases, and the number of fish decreases. The word to all who see clearly and with pain that matters are rapidly going from bad to worse is, EDUCATE—point out forcibly and clearly to others, whenever opportunity offers, the many abuses to which, to their ever-increasing detriment, the fisheries are subjected—strive to rouse a spirit of inquiry to know more about the fish and their habits, and the effects of fishery abuses and bad laws in this connection; for not until the mass of anglers and angling water proprietors are educated to see that hearty, earnest, and general agitation must precede reform, will anything worth doing be done for our salmon and trout fisheries. Not till then will disappointed anglers get fewer, nay, they will get more numerous as the fish decrease. The state that ere long our fisheries will be in if we remain apathetic, or misdirect our efforts is sad to contemplate; but we must rouse us up—work vigorously and co-operate—educate first, and afterwards agitate with might and main.

W. MURDOCH.

FROM the beginning till about the 20th of the present month is usually the best time of the year for loch trout fishing in the later Highland districts of Scotland, which include most of Sutherland, Caithness, Cromarty, Ross, and the west of Inverness-shire. The trout are in the pink of condition, give most sport, and are therefore best worth catching.

EXTRA SPECIAL SUPPLEMENT TO THE FISHING GAZETTE

JULY 4, 1891.

ANSWERS TO CORRESPONDENTS.

Harry: Write to Mr. J. J. Armistead, Solway Fisheries, Dumfries, for his list of fish and plants for aquaria. Should also advise you to buy an excellent book on the aquarium, recently published by Mr. L. Upcott Gill, Strand, London. The part on the fresh-water aquarium is particularly well done. It is impossible to give advice on the management of an aquarium worth anything in the space of a few lines.

J. Miller (Waltonian Club): It is a dace, and a fine one.

J. R.: Mr. Clark, hon. sec. of the Matlock and Cromford Association, Matlock, Bath, will give you particulars as to cost of day tickets and where accommodation can be had.

Correspondence

"*One of the charms of angling is that it presents an endless field for argument, speculation, and experiment.*"—T. E. Pritt.

[*We do not hold ourselves responsible for opinions expressed by our Correspondents.*]

FISH FROM NEW ZEALAND.

Dear Sir,—Some years ago you introduced to me Mr. W. H. Purvis, chief engineer of the s.s. *Ionic*, and you will be glad to hear that this gentleman has most kindly brought over to me, in the freezing chamber, two New Zealand fishes, which arrived in excellent condition. One is the *Callorhyncus antarcticus*, which I have placed in spirit; the other, a very large specimen of the Hapuku, reputed to be one of the best food-fishes of New Zealand. As this is being made into a skeleton, I had the opportunity of tasting its flesh and found it extremely good, flaky like that of a cod, but very dry. On account of the entire absence of fat or oil, I should say that this fish is particularly to be recommended to invalids. The weather was unfortunately very warm when the fish was taken out of the freezing chamber, and consequently the flesh did not keep beyond a few hours after it had been thawed. But I have no doubt that better results might be obtained if the fish were imported during the colder part of the year. The Hapuku is reported to attain a weight of 100lb.—Believe me, yours truly,

A. Gunther.

British Museum (Natural History), Cromwell-road, London, S.W.

[We are glad to hear that Dr. Günther has got the Hapuku. Mr. Purvis was determined he should have it.—Ed.]

SEVERN PERMITS.

Dear Sir,—I was sorry to see Mr. C. White's letter in your last issue, relative to the above, because it exhibits a want of verity on his own part, and attaches want of care, thought and intelligence to the distributors of licences, and a deplorable amount of ignorance to the Birmingham anglers, which I do not think they deserve. I have always looked upon Mr. White as a man possessed of more than an ordinary amount of shrewdness and intelligence, and quite expected he would have acknowledged the incorrectness of the imputations he made against the Severn Fishery Board, and have expressed regret at having made them. Instead of which he is now trying to shift the blame on to the shoulders of the clerk of the board, a legal gentleman of great experience and ability, whose action in sending out the permits was quite correct. Mr. White should know that when a distributor applies for a book of licences, it is necessary to send with them a supply of permits sufficient to meet any application for the same, but the S. F. B. never for one moment supposed or intended that permits would be issued to purchasers of licences, whether they required one or not, and no distributor should issue one unless it was asked for. Mr. White must have been in a state of absent-mindedness when he states that "*We* (the Birmingham Association) have no station near the places mentioned where fishing could be indulged in during the close season," when in reality they have fishing stations up to Bridgnorth, close to which is Darley Brook, one hundred yards above which is the very district where the permits were issued for. Surely the sec. of this great association should know this, if not, his *geographical* knowledge do indeed want improving. As sec., Mr. White well knows that the necessity of withholding of permits for two years, so as to increase the stock of fish in the river Severn, was discussed by the Provincial Angling Association and myself, and Mr. T. Coles, the president, was requested to bring the matter before the S. F. B., and all the clubs associated would be made aware that the permits were withheld; the only permits issued plainly stated where they could be used. This Mr. W. acknowledges, and it is ridiculous to state that the "error lies in the fact that they did not contain a proper definition of where fishing during the close season was prohibited," and far too bad of him to attach to the Birmingham anglers the deplorable ignorance that they did not know whether their favourite fishing haunts were in Shropshire, Staffordshire, or Worcestershire. I give them credit for far more intelligence than that.

I am happy to bear testimony to Mr. White being an excellent officer of a most important body, the Provincial Angling Association, but in this matter he has gone a bit wrong, and I trust this ventilation of the misuse of permits may result in a more honourable respect by anglers of laws made for their benefit, and more united efforts to punish wrong-doers.—Yours, &c.,

Worcester. R. Wingfield.

Dear Sir,—I see a correspondence in the *Fishing Gazette* between Mr. White, of Birmingham (who I believe is sec. to the Birmingham Angling Association), and Mr. Wingfield, of Worcester, with reference to the granting of permits to holders of licences to fish for coarse fish during the close season.

I am sorry to see in Mr. White's letter what looks very much like an attack upon the Severn Fishery Board, or upon its clerk, with reference to these permits.

It seems that *for the convenience of Birmingham anglers* permits have been sent out with the books of licences to agents, so that anglers in the Birmingham district might be able, without any trouble, to obtain these permits to fish as allowed by the Fishery Board, between the mouth of the Verniew and one hundred yards above Darley Brook, but some Birmingham anglers have been illegally fishing in other parts of the river, even down as far as Worcester.

Ignorance on the part of anglers is pleaded as to the geographical position of the Verniew and Darley Brook, but this is a most feeble excuse, for surely any sixth standard boy in those excellent Birmingham Board Schools could have enlightened them thereon.

Mr. Wingfield's contention is certainly right, and I think Mr. White must see that his friends have either blundered or been very obtuse. The Severn Fishery Board needs no defence from me, but as one of its members I beg to say that it is not deserving of the charge brought against it by Mr. White, neither is the secretary to the board by inference blameable, unless it be for having shown an almost unnecessary regard for the convenience of Birmingham anglers.—I am, Sir, yours very respectfully,

Jas. F. Airey.

Gloucester.

TROUT CAUGHT IN THE TEES.

Dear Sir,—I have read with great interest the various letters which have appeared in your columns about the recent catch of trout made by three young anglers in the river Tees.

The catch was made in his Grace the Duke of Cleveland's liberty, who gives permission on condition that all trout under 7in. in length must be returned to the water. The total number of trout taken was *one hundred and twenty-six*, and they weighed *only* 18lb., or *on an average of seven to the pound.* Seeing that some of the trout were more than 7in., and that they were in fair condition, I think there must have been a good few undersized trout amongst the remainder. Even taking *all* the trout to have been *just exactly* 7in., they should have scaled 18lb., even without counting those which were much larger.—Faithfully yours,

Blue Dun.

THE NORFOLK BROADS.

Dear Sir,—The lord of the manor of Hickling has commenced an action at law to prevent sailing over, or fishing, or shooting on that broad; and the lord of the manor of Wroxham is threatening to close Wroxham Broad.

With the help of some other London friends, notably a local antiquarian, Mr. Walter Rye, who is acting as honorary solicitor, a "Norfolk Broads Protection Society" is being formed, and I hope you will support it, both by subscribing something yourself and obtaining the help of others. I have agreed to act as honorary secretary.

I have only to add that the more support you can give the more the cause of the public rights will be helped.

Subscriptions may be paid to me or to the account of "The Norfolk Broads Protection Society," at Lloyds Bank, Limited.—Yours faithfully,

T. J. Woodrow.

18, Coleman-street, E.C.

Mr. Woodrow also sends the following note on "The Rivers and Broads of Norfolk":—

"In very ancient times an arm of the sea covered the whole flat district now intersected by the rivers and broads of Norfolk. As the sea receded to the present coast line, various tortuous waterways were left, and some of the so-formed rivers, where the soil was exceptionally level, widened out and became the now famous broads. No doubt there was once a direct waterway through all the broads, just as there still is at Barton and Breydon, and several others less defined, and as there was within the memory of man at Wroxham. Some hundred years ago it came to the mind of the landowners in the vicinity of these broads, that as there were many hundreds of acres left high and dry by the receding waters, and as those acres were uncared-for by the King and not sufficiently valued by the public they might get authority from Parliament to apportion them amongst themselves. As Mr. Walter Rye says, in his latest book, every one big enough to protest against this undignified scramble for public property had his mouth shut by being allotted a big slice for himself. Accordingly what were called Allotment Acts were pushed through Parliament, and, under these, awards were made of the waste lands to those who already held property in the vicinity. Some of these awards, however, went so far as to grant the broads to the riparian owners, but as the Acts of Parliament always had saving clauses in favour of the King and the public, and as there was nothing in the Acts implying an intention to make private property of the rivers or broads, it is clear that such awards must have been bad and cannot be sustained. There are many other reasons why it may be argued that the public right to sail and sport over the broads should be held inviolate. But Hickling Broad is a case in point under the Allotment Acts and the lord of the manor has started an action against a man with a view to finally stop this right. Should he win, it will very possibly prejudice the other broads, where riparian owners will not be slow to take advantage of one point gained. And should this happen there will be an end to all holiday-making on the broads. These pleasant resorts of the jaded and weary Londoner will be no longer available, but will be as much preserved as if they were land-locked private lakes.

RE THE GATE SWIM, AMBERLEY, AND A "BRIGHTON ANGLER."

Sir,—"Brighton Angler's" letter shows much spite and envy. I hope London anglers will take it for what it is worth. Let me inform the "Brighton Angler" that Mr. Eldridge's excursion does a vast amount of good, and that bunches of flowers are paid sixpence for, which could be purchased in London for twopence. I am at a loss to understand why the "Brighton Angler" should object to the wives and children. Surely this angler must admit it does them more good than being pent up for ever in London.

I trust for the credit of all true Brighton anglers this feeling of envy does not extend beyond the one man. "It's not exactly what he says, but it's the *nasty way* he says it" (with apologies to Chevalier), that I object to.—Yours truly,

A London Angler.

MATERIALS FOR FLY-TYING.

Dear Sir,—Although I only deal on a small scale, I am glad to bear testimony to the good effects of the *Fishing Gazette*, not only throughout the kingdom, but three thousand miles away have I letters from your readers in application for materials in which I deal.

I dare say that a good many of your readers would be too glad to get possession of the assortment of materials enclosed, which I ask you to kindly notice. The materials comprise Dun hackles (reds, blacks, &c.), water-hen, partridge, grouse, snipe, and woodcock, golden and green plover, hackle feathers. Wings are woodcocks, jays, snipe, grouse, waterhen, starling, hen pheasant, seagull. Sold assorted only.—Yours truly, J. Pickersgill.

12, Bingley-street, Leeds.

[Fly makers will certainly find it to their advantage to send for samples. Mr. Pickersgill supplies very good natural hackles, red, dark red, furnace, &c., at one shilling and ninepence for three gross in assorted sizes; he has also some excellent duns in a variety of shades, also sold in assorted sizes at two shillings and threepence per gross.—Ed.]

ON KILLING FISH—AFTER YOU'VE CAUGHT THEM.

Dear Sir,—Could you kindly suggest in your columns any good way of killing fish? The ordinary method of breaking the spine spoils the appearance of the fish; while the plan of carrying a cudgel wherewith to belabour our spoil does not commend itself to me, though practised by many. "Regan" says that, to eat well, trout should be bled immediately on being killed. Would not the "Hawk Bird-Killer," or something of that sort, fulfil both requirements?—Believe me, sir, yours faithfully. W. D. L.

[Very likely the "Hawk Bird-Killer" would do, but we have not the faintest notion what it is like.—Ed.]

CHAMPION ROACH FISHER.

Dear Sir,—In answer to "E. J. W.'s" inquiry in your last week's *Gazette*, "Who is the champion roach fisher of England?" I beg to say that I believe Mr. Joseph Woodward, of London-road, Clapton, a member of this society, can fairly lay claim to that title.

I hope to be able, in your next week's issue, to give full particulars as to how and when he acquired it.—Yours truly, James Tayler,

Sec. to Gresham Angling Society.

22, Billiter-street, E.C., 25th June, 1891.

THE *FISHING GAZETTE.*

Dear Sir,—Allow me to compliment you on the excellence of your "Special Holiday Number" of the *Gazette*. It was indeed a great treat to your subscribers here, locals and visitors.

One friend of mine has ordered from his newsagent one dozen copies of the "Special" for to send to old angling chums abroad, who, I have no doubt, will appreciate it as highly as did your friends on the Shannon, myself included.—Yours faithfully, S. J. Hurley.

Abbey View, Killaloe, Ireland, June 24, 1891.

FISHING IN THE SMALLER LAKES OF THE WEST OF IRELAND.

Dear Sir,—Will any of your readers kindly inform me where I could get good trout fishing among the smaller lakes in the West of Ireland? I should be grateful for all particulars as regards the means of getting there, and of the living, which must be cheap; also what kind of flies to use. I propose going there in the beginning of August.—I remain, yours truly, H. S.

SEA LAMPREYS.

Dear Sir,—Two of the members of our society (Messrs. W. Holland and H. Perry), when fishing for bream in the tidal water of the Ouse (Sussex), last Saturday, caught (foul-hooked) two sea lampreys (*Petronnyzon marinus*), one weighing 1½lb., and being 2ft. 2in. in length, the other weighing 1lb. 6oz. Is this not unique?—Yours very truly, W. C. F. Gillam,

Asst. Hon. Sec. Sussex Piscatorial Society.

[We do not remember hearing of lampreys being so caught; probably Severn anglers have.—Ed.]

FISHING IN CANADA.

Sir,—As a regular subscriber to your paper, I often notice questions respecting fishing in Canada.

Having just returned from a trip to the Dominion, I take the liberty of giving some slight but probably useful information, which I obtained on the spot from a gentleman residing near Quebec.

First-rate trout and salmon fishing can be had at a reasonable expense by taking a ticket at Quebec, to travel by the Quebec and St. John Railway, which ticket entitles the purchaser to fish for any reasonable time (I was told as long as he liked) in the lakes and rivers which the railway company lease from the Dominion Government.

These waters are from fifty to two hundred miles from Quebec, and extend over an immense area. The lakes are of all sizes, from small ponds up to Lake St. John, which covers about seven hundred square miles.

The streams vary from small brooks up to the river Saguenay, which is of the first rank, and a voyage on its waters will show the traveller some of the most magnificent and awe-inspiring scenery in the world.

The journey is pleasant and cheap, the country is lovely, and the railway company have a number of small houses where board and lodging are charged at five shillings per day. Attendants, with boats, can be had at six shillings per day.

The season closes September 15.

By writing to the secretary of the Quebec and St. John Railway, Quebec, or to the Chinic Hardware Company, St. Peter-street, Quebec, further information and a prompt reply can be obtained.—Yours faithfully, W. H. Elsmore,

(West London Angling Club).

Castlenau, Barnes, S.W.

FISHING NEAR BARMOUTH, WELSH COAST.

Dear Sir,—In answer to the inquiry in last week's *Gazette*, re "Fishing at Barmouth," several of the streams and lakes within easy reach are free; a rod licence is not necessary, but if "Lex" will call on Mr. Rawlings, chemist and fishing tackle dealer, ornithologist, taxidermist, and practical sportsman, whose shop he will easily find in Barmouth, he will tell him, and sell him the correct flies for the time, and also give him all information about the district.—Yours truly,

Macclesfield. G. H. Mason.

GRAYLING FISHING WANTED.

Sir,—I am anxious next year to obtain some fishing on water where fly only is allowed, in the lower part of Teme, Lugg, or on any stream where trout and grayling exist, within easy train service of Worcester. Perhaps some of your readers would kindly give me all information? I do not object to club water, providing that it is not overcrowded with anglers.—Yours, &c., W. Woodward.

Ashdown Cottage, Tenbury.

A GOOD TAKE OF BARBEL.

Sir,—Last week a friend of mine, Henry Cooper, a late member of the Clapham Angling Society, showed me a handsome catch of fish, amongst them being three fine barbel, weighing respectively 8lb. 6oz., 8lb. 1oz., and 8lb. This enthusiastic angler usually catches his fish in the dewy morn, when the river is quiet and most anglers are still slumbering. While I was admiring them, Mr. Cooper, of St. Luke's, arrived and took them away to accompany each other in a case.—Yours truly,

William Pugh.

49, Hazlebury-road, Wandsworth Bridge-road.

ILLUSTRATED PRICE LISTS AND CATALOGUES WANTED.

Dear Sir,—Our angling association would be glad to receive and acknowledge from "Fishing Tackle Manufacturers," illustrated catalogues and price lists to be added to our library for the use of our members.

This association numbering over one hundred members, it would, we think, be beneficial to both manufacturers and members.—Yours truly,

T. Salter, hon. sec.,

Lady of the Lake Angling Association.

Queen of England Hotel, Shepherd's Bush.

TRANSMISSION OF NATURAL FLIES BY POST.

Dear Sir,—I am sure the remarks of Mr. Wm. Brown on this subject, in the *Fishing Gazette* of June 27, will prove very useful to all who wish to forward insects or flies by post. Perhaps he would allow me to supplement his remarks on pinning flies to the bottom of a box by suggesting that a thin piece of cork be first securely fastened on to the bottom of the box, and then the fly pinned on to that. If only stuck into the cardboard, the specimen will be found loose at the end of the journey in nine cases out of ten.

Would it be too much to ask that in all applications for flies the applicant should state whether he requires them *alive* or *dead*?

Thanks to the weather and Dinsdale Dam, there have been no takes of salmon to chronicle in the Barnard Castle district this season, though there have been some good baskets of trout, notably that of Mr. Blenkinsopp, who, amongst other good fish, killed a trout weighing over 1¾lb., all taken with the Stone-fly, and some good baskets of trout taken by Mr. Barker from several neighbouring tributary streams with the worm.

By-the-by, I think your readers can scarcely look for or think it necessary to chronicle the surreptitious killing of a kelted *Salmo (salar?)*. It is no great event in the lives of some pot-hunters here, whatever it appears to "J. H. R."—I am, dear Sir, yours truly, More Water.

TWO HUNDRED AND SIXTY-TWO ANGLERS AND A FEW SMALL FISHES.

Dear Sir,—I enclose a cutting taken from the *Derbyshire Times*, of June 27, 1891, *re* angling match at Killamarsh. I am quite at a loss to understand how any person, let alone a gathering of two hundred and sixty-two competitors who call themselves anglers, can take fish as chronicled. The weights of 6oz. less ½dwt., down to 1oz. 1½dwt., should brand the winners of the prizes as "pot-hunters"; but no. The fact of the match being reported under the head of "*Sporting*," and to look back at the prize, must be a source of gratification to the person who poses as an angler, but who is simply a disgrace to the name. The report says: "There is abundance of fish in the water, which will doubtless afford ample sport in the future." If this is so or not, the way the water is looked after should be known, so that no person may be induced to visit such a quarter and waste his time and money.—Yours truly, C. Ward,

Member of Bostonian A.S.

Midland-yard, Kentish Town, N.W.

Here is the extract:—

"Angling Match at Killamarsh.—A match, promoted by Mr. Ellis, of the Navigation Hotel, was fished at Killamarsh on Saturday. There were two hundred and sixty-two competitors, but owing to the earliness of the season the catch of fish was small. There is abundance of fish in the water, which will doubtless afford ample sport in the future. The arrangements were carried out without a hitch by Mr. Thomas Oxley, hon. sec., Mr. W. Ellis, and Mr. F. Oxley, all of whom gave every satisfaction. The match was carried out under the new principle of exchanging tickets for numbers. The two hundred and sixty-two competitors were despatched to their allotted places in the short time of fourteen minutes. The following were the prize-takers: 1, Heeley, 6oz., less ½dwt.; 2, W. Scott, 4oz. 1dwt.; 3, W. Stacey, 3½oz.; 4, J. Glossop, 2½oz.; 5, W. H. Duty, 1¾oz. ½dwt.; 6, G. Mundy, 1½oz. ½dwt.; 7, W. Bailey, 1½oz.; 8, G. Sanby, 1½oz.; 9, A. Medley, 1¼oz.; 10, G. Harrop, 1oz. 1½dwt."

CHUB AND PERCH FISHING AT LECHLADE.

Sir,—Mr. H. W. Hyde, a Reading Waltonian, fishing the Upper Thames, at Lechlade, on June 22 and four following days, succeeded in taking one hundred and eighty-four pounds of chub. Any gentleman wanting good fishing would do well to pay this locality a visit, as it abounds in chub, perch, and jack, with a good sprinkling of roach. Splendid accommodation is obtained at the Trout Inn, and Host Bower is ever ready to supply any information respecting the fishing, &c.—Yours truly, Readingite.

Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—East London Rubber Co., 8, Shoreditch, E.

VERY EXTRAORDINARY.

SIR,—Mr. E. A. Bane, of Leyton, was rowing on the third lake at Wanstead Park, on June 28, with a lady friend. The lady held a bouquet, the string dragging in the water. Whether the bright colour of the flower was the cause, or a fly alighted on the string, I do not know, but a magnificent jack of 5lb. sprang at the string. Mr. B., with admirable presence of mind, seized the flowers and jerked the fish into the boat. Thinking this account might interest your readers, I venture to send foregoing.—Yours faithfully,

WILLIAM HARRIS.

34, Colegrave-road, Leyton, Essex.

A FISHING INCIDENT ON THE YORE.

DEAR SIR,—Whilst fishing in the Yore below the bridge at Borobridge with fly, on June 16, 1891, in the pool known to anglers as the Black Hole, I hooked a $\frac{1}{4}$lb. dace, which, whilst landing, was seized by a pike about 10lb. weight, and after playing me in the hole for about ten minutes, made down-stream, where a friend of mine was bottom-fishing for barbel, and ran across his line, knotting mine fast to his, consequently, every run the fish made, both of us had to play him, both reels going at once, and both taking in slack at the same time.

We continued on in this manner for fully twenty minutes, many times having the pleasure of seeing our fish, which was swimming about the water with the dace crossways in his mouth.

Presently both lines were relieved of their strain, and upon bringing them to bank we discovered them minus the pike, but the dace still on my cast quite dead and much mutilated. I have fished the Yorkshire streams for over ten years, but never in my whole experience has such an incident occurred, and I thought it worth relating, as it might interest some of the readers of the *Fishing Gazette*.

I may add that the incident was witnessed by over twenty persons standing on the bridge.—Yours sincerely, H. WALL.

28, South-road, Bishop Auckland.

A CRAY FISH FROM WINDSOR.

DEAR SIR,—By enclosed, which with others, were found near Boveney, by some boys whilst bathing, you will be pleased to know that this favourite crustacean is not extinct in our river, as I and many others thought. About three years ago, I offered one shilling each for all that could be found, they being required for scientific purposes, and though many men and boys went out, not *one* was found. This is a fine specimen, being just over 5in. extreme length. Do not return it.—Yours faithfully, B. R. BAMBRIDGE.

[Mr. Bambridge forgot to make any air-holes in the air-tight box, and the poor cray fish was smothered. Some day we hope to import from Germany, a stock of the edel krebs (noble cray fish), a much finer fresh-water cray fish than ours, which is also found in Germany, and there called the stein krebs (stone cray fish).—ED.]

APPEAL TO CLUB ANGLERS AND FRIENDS.

DEAR SIR,—I beg to acknowledge with thanks £1 from the Gresham Angling Society; 14s. 6d. from the Great Northern Bros. Angling Society, towards the fund being raised for Mr. Camm's widow and family.

I have received altogether £13 15s.; hoping by your sincere kindness you will allow me to keep the appeal in *F. G.* till it nearly reaches £20; then we shall arrange with our committee and the other committee of the Cobden Club to see the best way to put the money to good advantage. The enclosed letter I received with 10s. from a West of England club: you will see they do not wish it acknowledged.—I am, dear Sir, yours truly, B. ABRAHAMS.

25, Silver-street, Notting Hill Gate.

Cheques and Postal Orders can be crossed "Alliance Bank and Co."

FISHING QUERIES.

SIR,—Can any of your readers inform me what sea fishing can be had at Mevagissey, in Cornwall, and Arran (Scotland)? Also whether charges for boat hire and apartments are reasonable, and the best houses to stay at, and oblige yours truly,

G. B. A.

MIGRATION OF EELS.

DEAR SIR,—I have up to now been under the impression that the only period of their growth at which eels migrated from the sea to the fresh water was when as eel fare or eel fry they ascend our rivers in such countless numbers during the late spring and early summer each year, and that in the term "eel fry" were included only fish of three or four inches long, and about the thickness of an ordinary knitting wire. I have, during the last few days, seen ascending the fish pass in the Yearl weir, in our river Derwent, large numbers of eels of about 7in. to 9in. long, and about as thick, or rather thicker than a lead pencil, with an occasional eel in each shoal up to 15in. or 18in. I don't find any mention of a migration of eels up our rivers at such a stage, in either Pennell Houghton or the articles in the *Fishing Gazette* by Hamilton (Rod Fisher, Farmer, &c.), nor do I remember any similar fact recorded in the correspondence which has been published on the eel in the *Gazette*. In this river the "eel-fare" appears to be later than in the rivers referred to by the authorities named. I should give late in April as the earliest, and May as about the time of the greatest run, while a considerable number are still passing up. There is no very pronounced autumn seaward migration of spawning eels with us, but there being no eel fishing here, and very little attention being given to them, and indeed no very favourable opportunity for observation, such a migration might well take place and not be noticed.

"Eel-blobbers" are now catching some eels in the pools about here, the fish ranging from say a foot in length upwards, and I have always considered that these were fish making their way down from the lakes to the sea, and the few men who here do try to get a few eels with the "blob" (*i.e*, a 10ft. or 12ft. stiff pole, and line with a bunch of worms), prefer the hot summer nights of June and July, and we rarely hear of or see anything of the kind in the autumn. I note that Mr. Pennell and Mr. Hamilton and some of the authorites quoted by them consider the fate of the eels after spawning as a mystery, and I think it probable that some of them do return to the fresh water, but nothing in the nature of a migration at this stage of their growth appears to have been observed. I should say the fish I saw passing up the fish-pass could be called nothing else but a migration, as they came along in shoals of from four or five to a dozen or more, and during the times I have watched them only a few minutes elapsed between the shoals, and as quite nine-tenths of those I saw were only about 7in. or 8in. long, I do not think they could be the spawned fish returning to the river (supposing they do so). It has occurred to me, however, that the larger eels which are now being caught here might be spawned fish returning to the river again. The fish-pass is now, in consequence of the lowness of the river, the only passage through the weir, and has consequently exposed this migration to observation, which it might otherwise have escaped, but frequently in previous years the whole of the weir except the fish-pass has been dry, and I have never before heard of a similar migration having been noticed; but this fact also must be noted, that the present weir has only been standing two years, and the fish pass in the preceding weir was not on the same plan as the present one, and I do not think so favourable to an observation of this kind. The strong rush of water through the present pass is an efficient protection to the eels, and would render catching any of them, while in the actual ascent very difficult, and one could not be certain that any eel caught under any other circumstances was actually an ascending fish; but if you or any of your correspondents think a specimen essential to elucidating any question which may arise on the facts stated, I would be pleased to try to secure one.—Yours faithfully,

Workington. J. E. B.

GOOD PLAICE AND DAB FISHING WANTED.

SIR,—Can any of your readers tell me of a nice quiet village on the sea coast where my son can get plenty of plaice and dab fishing? Address 168, Temple-chambers, Temple-avenue, London.—Yours, &c., M. W.

GOOD BREAM-FISHING WANTED.

SIR,—In answer to "H. Lister's" inquiry, I would suggest Brandon, in Suffolk, as a good fishing centre for bream, chub, &c. The fishing is free, and he will find good quarters at the Ram Hotel, where the charges are moderate, and the landlord, Mr. Rolph, takes a personal interest in his guests having good sport. I was there about a month ago and saw a case of magnificent bream (caught last Whitsuntide) in one of the rooms.—Yours, &c., H. S. HARLAND.

8, Arundel-terrace, Brighton.

WANSTEAD BASIN.—A REPLY TO THE LESSEE.

SIR,—There are *two* sailing boats on the water at the time of writing, one 21ft. long. Fancy two sailing boats on a sheet of water under eight acres! It is perfectly certain that one subscriber, at the commencement of the frost, took great pains to break the ice daily—mainly around the stages, to prevent them from being "nipped" and lifted as on a previous occasion.

The water was advertised three years, and that at the expense of a subscriber, who also purchased and paid for a lock and thirty keys, twenty-one of which he handed over to subscribers at cost price, and when several were not found to fit well, was taken to task (for his kindness).

It is quite fair to state that the lessee did express a desire to refund the outlay in advertisements, but the offer was not accepted, for the simple fact that the advertiser's chief desire was to see the water prosper, and for a similar reason; he drew up and had printed a set of rules, a copy of which was handed to every subscriber. Not only this; the weeds were often cut by the united efforts of several subscribers, and they also repaired and renovated the punt, and built the wooden shed for shelter; and then to repay all this kindness by allowing *two* sailing boats on the basin is only adding insult to injury.

I do not intend to refer to this matter again, and if any of your readers are foolish enough to part with their money with the above ugly FACTS staring them in the face, they must put up with their folly.—I am, &c., GRASSHOPPER.

MALLTRAETH BAY, ANGLESEY.

SIR,—At Malltraeth the Government many years ago erected a long dyke to keep the sea from encroaching on the midland plain of Anglesey. In the hollow of excavating for *débris* a lake was naturally formed, into which the sea, to a certain extent, enters every day. Doors are set to prevent a too sudden influx of the sea, but the lake is, to all intents and purposes, a part of the estuary of Malltraeth. In course of time, sea trout, brown trout from the adjacent Cefni river, eels, and flat fish began to congregate to this forty or fifty acres of water, and a few anglers, with unerring instinct, found them out, and enjoyed uninterrupted sport. During the last fifteen years I have fished it in the company of preachers, doctors, and gentlemen of the highest social position, and not a doubt was raised in anyone's mind about the legality of the fishing. My visit there this year was on the evening of the 1st of May, in the company of a rev. gentleman, one of the first and fairest anglers in North Wales. It blew a perfect hurricane, and we experienced the greatest difficulty in keeping the fly on the water. However, I managed to pick eight pure sea trout, averaging about $\frac{3}{4}$lb. each, my rev. companion not being so successful. To my great surprise, rumours got afloat, and were kept alive by presumably quasi-commissioners and nonentities at Malltraeth, that we were to be summoned for daring to fish in this all-of-a-sudden preserved water. The lessee this year—a Mr. Richardson, Aberbraint, Llanfair, P.G., who pays £2 a year for the right of netting it—happened to be at the Meyrick Arms Hotel on the 18th inst., just returned with his friends from netting this lake. Being the last person on earth to trespass on another's rights, and to set the matter at rest, I accosted him in the most civil and respectful manner, and, by way of introducing the subject, asked him that, presuming he had the *whole* right of fishing the lake, would he give me, who was a flyfisher only, permission to go there occasionally. His answer, which precluded any further inquiries on my part, was this: that he "owned a portion of the lake, and 'we' cannot give anyone permission to fish it." To gentlemen from Bolton, Manchester, Liverpool, and Birmingham who come fishing to this neighbourhood, and who generally have a day's fishing at Malltraeth, this prohibitive reply will come with a great deal of surprise. Mr. Coles, Bodorgan Arms Hotel, rented it for netting last year, and he never interfered with a few anglers who went there occasionally; in fact, the lake has for many years not been let at all, and Mr. Meyrick, Bodorgan Hall, and his friends amused themselves by netting it and sharing the fish with the poor about. The lake is not even a part of the Cefni river, where a licence is required, and no sign is exhibited that fishing is not allowed, and I am told that no one at Malltraeth will rent the lake because of the open way in which the local fishermen net it. The question, then, arises, Has this Mr. Richardson the right to prevent fair fishing in the lake, inasmuch as it is in daily connection with the sea? In the interest of the angling community generally, and to prevent friction in future, perhaps he will be good enough to establish his claim to the satisfaction of readers of the *Fishing Gazette*.—Yours truly,

Abberffraw. W. H.

Waltoniana

FARMERS, who, it is said, are born into the world grumbling, go out of it in a state of discontentment, and are never satisfied between-whiles, may not have altogether approved of the glorious showers with which July came upon the scene on Wednesday last. But those same showers were exactly what the fisherman wanted, and though they had but little effect on very large rivers like the Thames, considerably freshened up the smaller streams, and caused an increase of sport to both the trout and the bottom-fisher.

As soon as perch are ready to be caught in rivers, and the time should not be far distant, a paternoster made of fine gut and small hooks, (say about the largest size used for roach) and worked among the weeds, the bait being minnows, will be found one of the best methods of taking these fish. The paternoster for summer use should be as much finer than the one commonly used in winter, as summer pike tackle should be finer than the gimp and hooks which are deemed essential on a December day by the great majority of anglers. As a matter of fact, I invariably fish very fine for perch, whatever the season, but generally speaking it is only in summer that exceedingly fine tackle is requisite. A great deal, of course, depends on the water to be fished. Tackle which would answer very well in private water where the fish are confiding and rarely fished for, would be quite useless in the Thames, where the fish know what's what, which has been said to be about as high as metaphysic wit can fly.

BUT the best tackle in the world is of little use if it is not worked properly. In summer perch fishing the paternoster has to be worked with considerable skill. To begin with, the perch do not love dead water, during the hot months, and are to be found principally among those weeds which grow in a gentle stream on a gravelly bottom. The rod should be of cane, long and light; the line should be fine. The lead should be small. All being ready, let the boat drift very slowly down over the perch-haunted shallows, and with skill and dexterity drop the paternoster lightly and without splash into every likely opening among the weeds. If for a first attempt you choose a part of the river where the weeds grow thickly on the bottom, you will wish I had never been born for suggesting this way of fishing, but in very truth the fault will be yours in not going to a suitable spot. There are many parts of the Thames where the weeds grow sparsely, and where every here and there are little openings, with clean gravelly bottoms, and those are the places for paternostering. Where the stream flows gently by the side of old camp-sheathing, and a few weeds grow on the bottom, there, between the weeds and the old wood-work, perch are almost sure to lie.

THIS kind of fishing is not for blunderers or clumsy persons. Paternostering in winter, when the minnows have only to be cast into a hole, is child's-play compared to paternostering among the weeds in summer. The lead should first be brought towards the angler and then by slightly raising the point of the rod swung out quietly without jerk towards the open space in the weeds, perhaps not more than a yard in diameter, into which the baits have to be dropped. Immediately the lead hovers over the hole the line is released and down shoots the paternoster to the bottom. An astonished perch suddenly finds himself face to face with two crippled minnows which struggle as he approaches but are not able to gain safety among the weeds. Up go his fins and for a second he hesitates, then he suddenly seizes one of the unfortunate little fish, and the paternosterer feels a something (much or little) at the rod-point or on the line which he is holding gently in his left hand. He lowers the point of the rod for a couple of seconds, so that the perch may feel no resistance, then strikes but not too hard, for the hooks are small and penetrate easily; and in two minutes later a fat golden perch of half-a-pound or more is swimming round the well of the punt vainly looking for a way out and much puzzled by this strange experience. "Cotswold Isys," who has given us in humorous verses the "Strange Experiences of an Angler," might find, in the still more strange experiences of fish, a no less worthy theme.

THE country is just lovely. The roses have come with a burst, and each tree seems to vie with its neighbour as to which can bear the greatest burden of sweet-smelling flowers. The more gaudy but scentless Sweet William makes a blaze of colour in every cottage garden. In the hedgerows and over-hanging old-fashioned garden walls, are great masses of delicate and fragrant elder-flowers. From the fields the summer airs bear the scent of newly-made hay. So strong is this after sunset as to be almost overpowering. Bright marigolds commence to show their yellow heads wherefrom the bees, coming home from their labours among the sweetest of sweet flowers (the honey-suckle) extract still more honey. By the river the sedge has grown rank and long, but is inter mixed with many flowering weeds and grasses. Here and there a stately Iris rises from among the lowlier plants, and looks a very queen of waterside flowers. In the evening great moths come out. Some these, which are brown, now and again forget to use their wings and attempt preposterous excursions in their leap across the river. Rarely do they reach the other side in safety, for lurking beneath the water and on the look-out for such fat morsels as these, are many hungry trout. Over the meadow and for the most part wisely avoiding the water, are fat yellow-bodied white moths which, as night falls, flit hither and thither in a ghostly and uncanny fashion. Bats and trout feed eagerly on swarms of tiny insects which fly in their millions over the water, and—but whither am I rambling? Writing of these things makes one long to put down the pen and take up the rod; so farewell for seven short days. TEMPLAR.

A SINGULAR FISHING INCIDENT.—The other day a party of ladies and gentlemen were fishing from a boat in the roads off Whitby. The fish were taking splendidly, and all were enjoying themselves vastly. Suddenly it dawned upon them that the supply of bait was becoming exhausted; and in the end they had to deplore the baiting with the very last bit. One of the party, however, hooked a fish, and on hauling it in it, was, much to the astonishment and delight of all, found to be a herring. This was speedily cut up, and served as bait till the close of the evening. The catching of a herring with a hook is a circumstance of very rare occurrence.—J. J. JACKSON.

DEATH OF A WESTMEATH LAKES VETERAN FISHERMAN.—On Thursday, June 11, one of the most respected and inoffensive of the fishermen of these lakes breathed his last at his residence in Mullingar. Mick Berne, familiarly known as "The Whacker," in consequence of his having bestowed the appellation of "whackers" on the big and lusty trout of Owell and Ennell, was a typical fisherman, and plied the craft upon these lakes from his childhood, always obliging and agreeable, ready and willing to help and guide novices in the art; a splendid fly-tyer, and ever liberal in imparting knowledge of the best patterns and how to dress them, he will be long remembered by the fishing fraternity of Westmeath and other places. He leaves four sons, who are each and all clever anglers, and worthy sons of a worthy father. The respect in which he was held was amply testified to by the large concourse which followed his remains to their resting-place, and by none was he held in more veneration than your correspondent—T. J. W.

NOTES FROM BIRMINGHAM AND DISTRICT.

BY C. W.

ON Friday evening, June 26, an important meeting of the committee of the Birmingham Anglers' Benevolent Society was held at the association's headquarters. Mr. T. Coles presided, and Mr. C. White occupied the vice-chair. The roll-call was not so well responded to as it might have been, and mention was made of this at a later stage of the business. The secretary informed the meeting that the late concert had turned out a financial success, and that the funds of the society had been benefitted to the extent of about £6. Messrs. Marsden and Fitter gave in a report of their visit to the Spring Hill Society, which was of a very satisfactory nature, inasmuch as nearly the whole of the members had given in their names to be enrolled. Mr. Hughes, of the St. Paul's Society, spoke to the warm and hearty manner in which the members of this society had taken the matter in hand, and said that at the next meeting of the society a great number of the members would become identified with the Benevolent Society. Mr. Marsden, of the Camden Society, gave in a report of the way in which the members of this society had interested themselves in the work of the society, and announced that at the last club meeting a good number of members had been enrolled, and on the next club night seven more members would be enrolled. The whole of the reports were eminently satisfactory, and it was moved by the chairman that the best thanks of the committee be given to the members of the divisional committees for their endeavours in trying to obtain members for the society. This, upon being put to the meeting, was carried unanimously. Mr. Hall at this point spoke at some length on the advisability of each of the committeemen bringing the objects of the Benevolent Society before their respective societies, as much could be done by them adopting this course. He also spoke upon the attendance of the committee both at the committee and also at the divisional committee meetings, and finished his remarks by proposing the following resolution: "That any committeeman failing to put in an appearance at three consecutive meetings without sending an apology, his place shall be filled at the next general meeting. This rule to be made applicable to divisional and general committee meetings." This new rule was unanimously adopted, when Mr. Hughes brought forward the advisability of making arrangements for the annual contest on behalf of the funds of the society. The suggestion was adopted by the committee, and it was decided to hold an annual contest on October 4 next. This was carried by a small majority, as some of the members were in favour of it being fished on Saturday afternoon. Two places were brought before the committee as suitable places where the contest could be held—namely, Pershore and Fernhill Heath, and, the vote being taken, the latter place was selected. It was decided to leave the other portion of the contest arrangements over until the next committee meeting. Nothing under the heading of general business was brought forward, so the meeting was brought to a close.

ALTHOUGH our Midland rivers and streams are in first-class condition for all kinds of fishing, I have not heard of any large takes worth recording, the average per rod being about 3½lb. to 4lb. Perch, eels, and small pike are the chief fish that have been taken. Very few of the Birmingham anglers have visited their water on the Trent, as they prefer to wait until the fish are in proper condition. The roach are very backward round and about Abrewas, and are to be seen in large numbers in the shallows cleansing themselves. The Avon has been well patronised since the opening season. The roach in this river, as in the Trent, are not in anything like condition. Some of the chub are still spawning, but those who have got over the spawning have been seen rising pretty freely to the fly. The same may be said of the dace. Some few roach have been taken with the stewed wheat and malt, and a few decent perch have been secured by aid of the worm. Eels have been on the run, and some decent-sized ones have been taken with the rod, the worm doing the trick. On the Severn, sport has been very quiet, and up to the present I have not seen or heard of a decent take this year. I have seen a few roach and dace which were taken at Hampton Lode with the gentle. The roach were rather small, but were in nice condition. The river Anken at Tamworth has yielded some decent eels, and some of the private pools near to Birmingham have furnished some very good perch fishing.

I AM informed on the most reliable authority that the fishing in the canal at Witton, near to Birmingham, is equal to any canal fishing within thirty miles of Birmingham. This canal some five weeks ago was partially emptied, and the amount of perch and roach that were to be seen in the channel of the canal was something extraordinary. They were watched day and night until the water was let into the canal again. The water in this canal is purer than the water in the generality of canals, and is fed from the large reservoirs at Perry Barr by means of four powerful engines. These reservoirs are all well stocked with fish, and the fish during the pumping operation which is continually going on are carried with the water into the canal, and so keeps the canal well stocked with fish. The charge for fishing this water is one shilling per day, and tickets may be obtained from Mr. Hutton, secretary of Canal Company, Paradise-street, Birmingham.

THE committee of the Provincial Angling Association will meet this day (July 4) at the Drawbridge Hotel, Bristol, to transact important business in connection with the association. One of the members of the committee will bring forward a suggestion to the effect that the association, in order to make the contest for the Marston Challenge Cup a success, and as an inducement for the members to take part in the competition, the association should grant a sum for the purchasing of three suitable prizes independent of the cup. This, I think, will be carried out by the committee, who will leave no stone unturned to make the contest a success.

THE NORFOLK BROADS.—There is every probability of more litigation as to angler's rights. We hear another attempt is to be made to exclude the public from fishing in some of these Broads which are tidal. The interest of London anglers is to be aroused by four large meetings to be held in London, one in the East, West, and South respectively; and we see by the report of the Gresham Society they have consented for a city meeting, to be held at their room, Mason's Hall Tavern, on Tuesday, the 28th inst. Anglers' privilege tickets will secure admission.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, JULY 4, 1891.

NOTES FROM LANCASHIRE.

BOLTON anglers seem to be full of business. Just at present their attention is being given to a question of great importance. One of the favourite resorts has been polluted to a great extent, and in consequence a disease has resulted amongst the fish. As usual, they have faced the question boldly, and called in science to their aid. A speedy and satisfactory solution to the difficulty may shortly be confidently expected.

CONTESTS on every hand are the prevailing fashion. Already the St. George's, Exchange, Royal Walton, Palatine, Shakespeare, Openshaw, and many others have successfully fished their initial competitions. It would be interesting to ascertain the total value of the prizes given in Lancashire. Judging from those at the headquarters of the Hulme, Crown, the total would be very large. The prizes are good, useful, and numerous; we are not quite sure whether the list included "blankets."

WE would warn anglers in this district against wasting their money on "fishing secrets," as advertised in various papers, unless they have a desire to get free admission to one of H.M. State establishments reserved for poachers. A true sportsman never stoops to such tactics as those recommended.

IT is a step in the right direction that has been taken by the N.A.A. in approaching the various railway companies on the question of concessions in travelling. Most of the waters frequented by the fishermen of this district are at a great distance, so that any concession in the fare will be acceptable. We hope Lancashire will loyally help with their money and influence.

MANY veterans have been out lately and report good sport, the fly seems doing the best work. One basket is rather interesting, fifteen trout, weight 10lb., all taken with Red Spinner, Black Gnat, and Sand Fly.

NOTES FROM NOTTINGHAM.

HEAVY thunderstorms on Thursday night brought on a most unexpected rise, the Trent rising upwards of four feet in less than twelve hours. Fly-fishermen were leisurely pursuing their craft until a dark hour, and imagine their astonishment when, on re-visiting the river early on Friday morning, they found the water the colour of a clay pit! Never in the highest floods do I ever remember seeing it so red, and there is no doubt the influx was chiefly caused by the pelting showers which fell in the Loughborough district, and which quickly found their outlet in the Soar, which flows into the Trent near the wear at the village of Thrumpton. The water began to recede on Friday night, and the stream was fishable on the following day, although the number of rods out was extremely limited. Eels were set freely on the move, and those anglers who visited such reaches as Trent, Sawley, Castle Donington, and Weston-on-Trent (which are above the Soar's junction with the parent river), returned with baskets far above the average. In one case a veritable monster was caught, but I have devoted a special paragraph to its capture. At Weston the coarse fish showed really excellent sport whilst the flood-water remained, and one of the subscribers surpassed previous feats by hooking and landing upwards of 30lb. of roach, bream, perch, and dace in less than a couple of hours. I refer to Mr. W. Atkinson, of Radford, who with Mr. W. Sudbury, of that place, caught in the same fishery, two winters ago some stones of most handsome roach from a punt moored off the backwater near the Cliff Inn. On Monday Mr. Atkinson was out again, but as the river had fined down considerably from Saturday afternoon, he only succeeded in getting a few roach and perch. The takes up to Wednesday night had generally been poor, but I apprehend that as soon as the water is low enough for barbelling the followers of these game fish will have something good to relate. All coarse fish are later this season and will be all the better for the change which has just occurred.

THE spring fishing with the rod for salmon is generally suffered to close with the advent of the legitimate season, and it may be interesting now to note the number of fish which have fallen to it, and compare them with the takes of last year. In a matter of quantity they are nearly identical, and as in 1890 the majority have come from the Shardlow and King's Mills districts. On April 15 Mr. G. Copenhurst, of Burton-on-Trent, had the honour of drawing "first blood" in the channel swim below Kings Mills weirs. The fish weighed 18½lb., and on the 27th of the same month, Mr. Copenhurst killed one of 26lb. in the "Long Swim" at Shardlow. On May 5, he caught a third of 16lb. near the spot where he landed his first, and in a subsequent outing he picked and lost further fish. On April 16, Mr. T. Wood, who holds the right of the fishery from Lord Donington, caught one of 18lb.; on May 11, he caught a second of 11½lb., and on June 2, he landed a third of 13lb. These were all taken from what is known as the Lane End Swim near the weirs, and in addition Mr. Wood lost one estimated at 25lb. At Holme Pierrepont on April 17, Mr. H. Green, the lessee, took one of 16lb. above the weir, and only on Tuesday week he lost a second. On April 28, Mr. J. Lowater, of Nottingham, killed one of 10lb. in the "Long Swim" referred to; and on May 20, Holmes, the local river keeper, landed one of 12lb. above the celebrated Wenham hole at King's Mills. On June 20, the best fish (27lb.) of the year was got by Mr. S. Marcer, of Derby, in the "Long Swim," and two days later the same swim yielded one of 14lb. to the rod of Mr. G. Beeton, of Radford. A fish of over 20lb. is reported as having been caught in April below Newark, and Mr. J. Wilkinson, of Derby, has the credit of having recently killed a couple in the teens in the Willington district. The number actually caught is fourteen, and it will be noticed that a splendid average in weight has been maintained. Last year the takes were: Mr. T. Wood, two, 16lb., and 17lb.; Mr. G. Wood, Nottingham, one, 18½lb.; Mr. W. Drewry, Nottingham, one, 15½lb.; G. Holmes, river keeper, two, 17½lb. and 24lb.; Mr. Birks, Derby, one, 18½lb.; and Mr. G. Beeton, Radford, one, 21½lb. All these were killed in the King's Mills and Shardlow sections, and at Holme Pierrepont, Mr. J. Lowater, Nottingham, landed a couple weighing 14½lb. and 15½lb. respectively. At Averham weirs, near Newark Mr. E. Smith, Nottingham, caught one of 14lb; and one of 20lb. fell to the rod of a Derby gentleman at Willington. There may have been others caught, but I have no record of them. By far the best year ever experienced on the Trent was that of 1885, and holders of licences must long for the time when they will be favoured with another like it. Salmon fishing is certainly a precarious pursuit on our rivers, for everything depends on early conditions as regards height and temperature of water in the ascent of the fish. Odd fish may still be caught in the barbel swims, but the cream of the sport is over until September.

A SOCIETY, which is doing a quiet but excellent work in its way in the town, is the one associated with the Pleasant Sunday Afternoon Classes, held at the Albert Hall, in Derby-road. There are upwards of eighty members, and amongst them some very good all-round anglers. Mr. R. Mellors, the secretary of the Nottingham Chamber of Commerce, and a gentleman highly esteemed in the district, is the president, and the duties of hon. secretary are carried out in an efficient way by Mr. J. Moss, of Campbell-grove. Every summer the society has the privilege of fishing the private waters of Sir Henry Bromley, of Stock Hall, near Newark, and it was perhaps due to the intercession of Mr. Moss, that this concession was first granted. The waters in question are on the Trent, and are well stocked with most coarse fish, including barbel. The meadow below the coal wharf near the hall is a favourite place, and here the river is known to contain hundreds of these game fish. A few seasons ago Sir Henry Bromley took great delight in pursuing the sport, but of late he seems to have contented himself by taking only a passive interest in it. His son, Mr. Henry Bromley, is a keen fisherman, and is a Conservator of the Trent Fishery Board for the Notts. District. What is more, he is a hard-working member, and is likely to be of great service to the great brotherhood of the craft.

IT is not often that an eel weighing above 4lb. is caught in the Trent by an angler using his rod and line. The feat, however, was accomplished last Saturday afternoon in the Weston subscription waters, by a subscriber named Hitchins, from Melbourne. He was tight floating near the ferry during the high and coloured water when he hooked and landed the slimy creature in question. It weighed, so the keeper told me, 4lb. 2oz. A bream of 4lb. 8¾oz. has been caught at Wenham hole by Mr. J. Greaves, of the Larkdale Inn, Oliver-street, Nottingham. He was legering, and the fish showed very little play.

NOTES FROM SHROPSHIRE.

No less than between thirty and forty applications have been received by the Severn Board of Conservators for the vacant post of water bailiff for the Shewsbury district; and these having been fully considered, it has been decided to appoint Mr. T. Morris, of Shrewsbury, a retired army sergeant, to the post left vacant by the retirement of William Darling, the late superintendent water bailiff. Mr. Morris has had a good deal of acquaintance with matters piscatorial, and with a few months' experience of the Severn will doubtless make a very faithful and efficient officer.

AT a committee meeting of the Shrewsbury Severn Angling Society, held a few days ago, a very cordial letter was read from the Ironbridge Severn Angling and Protection Society wherein they expressed their desire for a closer union between the two societies—suggesting a joint outing—and thanking the Shrewsbury Severn Angling Society for the efforts they have put forward in restocking the river and improving the fishing generally. The members of the Ironbridge Society—who thus set an example which angling societies throughout the kingdom will do well to emulate—even go so far as to offer out of the somewhat limited funds at their disposal at present some pecuniary assistance, if necessary, to aid in the work of stocking the river with trout, as a slight recognition and appreciation of the services which the Shrewsbury Severn Angling Society have rendered Shropshire anglers. The anglers from the county town are most anxious to meet the Ironbridge piscators in a joint outing as soon as it can be arranged.

AN important report, it is understood, has been issued by Mr. Berrington, Chief Inspector of Fisheries, wherein he intimates that he intends to visit the Severn and inspect the fish passes, at the suggestion of the chairman of the Severn Board of Conservators, Mr. Willis Bund. It is hoped that Mr. Berrington's inspection will lead to a considerable improvement, for there is no doubt that, whatever other causes are at work decreasing the stock of salmon in the upper waters of the Severn, the inefficient state of the passes has a very great deal to do with the matter.

NOTES FROM YORK AND DISTRICT.

THE cry for more water is pretty general throughout the county of broad acres; and, indeed, the rivers are sadly in need of a freshet. The weather has been very changeable during the past week, and slight rain has fallen, but it has barely been sufficient to keep the streams up to their usual summer level. But then every allowance can be given to this requirement. If the rivers in this district are to be kept in "good form," as far as volume is concerned, it would require heavy rains every two or three days. Almost all the Yorkshire streams, with the exception of those in the East Riding, drain their waters from steep uplands, and the rain is not retained long enough in these carboniferous lime-stone hills to supply the rivers for any great length of time; consequently the result is one day a flood, and a couple of days after a want of water. Local piscators have, however, had fairly good sport. The Ouse has been fished well, and although the season is somewhat backward, the present one is described as the best on record for dace, while other kinds of fish have been pretty plentiful. At the time of writing the conditions are not very first-rate, and the prospects are but dull.

DERWENT anglers have experienced a good time of it during the past week, although about the best stretch of the river—including two admirable falls—is closed. The following ominous announcement still appears in the local papers:—"To Anglers.—Mr. Cholmley gives notice that he is obliged, with regret, to withdraw all permissions which he may have given to fish in the river Derwent, and to refuse, for the present, all fresh applications." Miss Mary Egerton has also, I hear, withdrawn all her permits; and Mrs. St. Quintin, on the opposite side, has done likewise. This action has not been necessitated through any illegal practices having been resorted to by anglers, but reflects on the conduct of certain piscators who unfortunately abused the kindness granted to them. On Saturday morning last, Mr. Preston, the keeper at Kirkham Abbey Hall, the residence of Mrs. St. Quintin, caught a finely-shaped trout, weighing no less than 6¾lb. I confidently believe this is the largest specimen that has been captured in the Derwent; at least, within late years. It was taken to the hall, and, I believe, will be preserved.

THE Spittal Beck, which flows into the Derwent some two miles below Barton Hill, has afforded excellent sport. A friend of mine had a day's fishing there last week and landed a weighty pannier of dace. In the district is situated Castle Howard Lake, and the happy rodster who is lucky enough to secure a permit to fish the waters need have no misgivings as to his success. Three gentlemen, not long ago, in two days' angling, caught no less than two hundred perch each about as large as herrings; and some time ago I had the opportunity of seeing—under preservation of course—a gigantic pike, weighing 40lb., which had been caught there. This monster, I was told, nearly capsized the boat when being landed.

IN the North Riding, angling matters are well to the fore. The Thirsk and Sowerby Angling Society has held a meeting of its committee at the house of Mrs. Bell, the Wheatsheaf Inn, St. James's Green, for the purpose of arranging the amount of money to be given away in prizes, and other minor matters in connection with their forthcoming match on the 18th of next month. This is the ninth year that the society has been in existence, and permission has been again kindly granted by Mr. Henry Reb for the competition to take place in the river Swale, in the vicinity of the village of Catton. In former years the competition extended over a five mile radius of Thirsk, but the society receiving little or no support in the way of subscriptions for the outlying villages, have now decided to limit the competition to residents in Thirsk and Sowerby. This year the amount of money to be awarded in prizes has been increased, also the number of minor prizes, and it is fully anticipated that these extra inducements will greatly swell the number of competitors.

THE question of increased railway facilities is now the all engrossing subject for consideration amongst angling circles at present. The sub-committee of the Northern Anglers' Association had two schemes before them in regard to the matter. The first one is that each centre should purchase from the railway companies concerned a number of return tickets to the angling places they frequent, at a reduced rate—say one and a-quarter fare—unsold tickets to be credited at the end of the season. These tickets to be placed in the hands of some responsible person, say a well-known tackle dealer in each town, for sale to anglers only; the date, place, and number of each member's card being entered by the said tackle dealer for reference, if necessary. It was also suggested, as an alternative scheme, that counterfoil cheque-books should be supplied to clubs, the cheques to be presented at the railway station booking office and filed by the clerk. This latter system, it is argued, will afford the greatest security against fraud, by enabling each club to watch its own members by means of the counterfoil. It would also stop, say its supporters, several well-known methods of swindling. The sub-committee are to consider both schemes at their next meeting, and the one voted for will be submitted to the central council for approval.

NEW PATENTS.

THE following is a weekly list of New Piscatorial Patents, specially compiled for the *F. G.* by Messrs. Hughes, Eli, and Hughes, Patent Agents and Engineers, 76, Chancery-lane, London, W.C., authorised Attorneys for the procuration of English and Foreign Patents, Designs, and Trade Marks:—

10,802.—James Laing, of Marine-villas, Tulles, by Aberdeen, for improvements in apparatus, for fair lead for trawling gear on ships' bulwarks.

11,135.—Philip Green, of Davenham Lodge, Richmond, Surrey, for a new or improved spinning-flight for natural dead-bait fishing.

Holloway's Ointment and Pills.—For bad legs, bad breasts, scorbutic and scrofulous sores this is a genuine specific. The grateful and earnest gratitude of thousands who have experienced its unrivalled power over these complaints, and who have been raised from prostrate helplessness and a condition loathsome to themselves and others, renders it quite unnecessary to enlarge in this place upon its extraordinary virtues. The parts affected should be bathed with lukewarm water, and when the pores are thereby opened the Ointment should be well rubbed in, at least twice a day. It is always advisable to take Holloway's Pills in these disorders, as this much assists the Ointment action. The Pills check the fever, purify the blood, and eject all morbid matter engendered by these diseases.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* Fishing Gazette, *St. Dunstan's House, Fetter Lane, London," and marked* Club Report *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell road, Clerkenwell, E.C.—The monthly meeting of the General Committee will take place on Monday evening next, July 6, at 8.30.—R. Ghurney, sec.

Anglers' Benevolent Society, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—Since my last report I beg to acknowledge with thanks the receipt of 10s. 6d. from the Waltham Brothers Angling Society (donation), and from the donation boxes of the following angling societies: Mildmay, 17s.; Prince of Wales, £1 7s.; Highbury, 7s. 6d.; and the Globe, £2 5s. The next meeting of the committee will take place on Friday evening, July 10, at 8.30.—R. Ghurney, sec.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—The members showed up in good muster on the 29th inst. We fish a roving match for three prizes—viz.: Jack rod, first prize; running-line, second prize; Nottingham winch, third prize; on the 5th July next, two rods allowed. Hoping the prizes will be won, as our pegged-down match on the 21st was unsuccessful. No prize will be taken unless ½lb. of fish is obtained, not ¼oz. gudgeon. Messrs. Thompson and Roberts have been elected auditors for the ensuing quarter. We are still recruiting, H. Skelt and E. W. Cosgrove] were elected as working members of this well-known society, and several others have applied. Urgent business next Monday, July 6.—B. Abrahams, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—Our annual dinner takes place on July 5, at the Swan Hotel, Fittleworth; dinner on the table at one o'clock punctual. All members to meet at London Bridge Station, and proceed to Pulborough by the 6.55 train. On June 28, Mr. Moir weighed in bream and roach. Those members who want tickets for the competition on July 12 can have them by applying to the secretary. We also fish for a series of prizes on the same day. I may say that we do not weigh perch in our society under 8in. from any water.—W. H. Potter, sec.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—On June 28th, several of our members were out, a very nice show of fish being the result. Mr. Embleton, sen., had a very fine show of roach and bream. Mr. W. Hake had a nice show of roach, dace, and bream. Mr. Lambert, M.P., having some nice roach and bream; and Mr. Nunn, M.P., some nice roach. I should like our members to show up next Thursday evening, as there is very important business to be done.—E. R. Embleton, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Our first outing this season takes place at Windsor on July 5, from Eton Bridge to Barney Lock, tow path only, jack barred. All to start by same train from Clapham Junction, at 8.15 a.m. Several of ours were out on the 28th, but the sport was so tame that it is hardly worth recording. But we hope for better luck in the future. I am very proud to say that we have made three new members.—T. Rich, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The above society held their weekly meeting, on Wednesday last, with a fair attendance. Mr. West had bream 5lb. 3oz., on June 28th. Members are reminded that we decide next Wednesday where the July match shall be fished. Tickets for the Central Association Competition, on the 12th of July, and the South London Match can be had on meeting nights. Privilege tickets are waiting to be taken up.—A. G. Smith, sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—The following members weighed in on June 28th, Messrs. J. Smith, R. Smith, Moorby, Warman, and Allum, total gross weight 28lb. 3oz. The competition for the July series of prizes will take place on the 5th inst., place and conditions to be decided at the meeting on the 3rd.—A. Conn, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—On Wednesday we had a good attendance, and two gentlemen, Messrs. Saltor and Bourke, were elected honorary members. I omitted to mention in my last report that Mr. Stillman had been elected chairman for the remainder of the current quarter. I hope members will do their best to attend next Wednesday as we shall proceed to make out the prize list. We had a good show of fish on the 28th ult., Mr. Deplidge, an honorary member, and Mr. F. Barker, a working member, each having a basketful of rudd. The next visit on the S. L. U. V. L. will take place at the above address on Tuesday, July 21.—F. Roberts, hon. sec.

Bloomsbury Brothers Angling Society, the Rose and Crown, Broad-street, Bloomsbury, W.C.—Next Wednesday, July 8, is quarter night, and limit night. Wednesday, 15th inst. I hope that as many will attend as can. On the 28th June, Mr. Warren had a take of bream, 2lb. 15oz., and some roach and dace. We have room for a few more members.—J. Small, sec.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—Several of our members were out on June 28, but had very little sport. Mr. Aitchison had a nice show of chub, largest fish 2½lb.; Mr. Sanders also had some chub. I regret that in my report last week I made a mistake in the date of our first competition, of the season which will take place at Edenbridge on the 12th inst., not on the 5th.—H. Roach, sec.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—Since the opening of the season, we have had a fair show of fish by the following gentlemen: Mr. Wilson, bream and roach (a nice show of 12lb.); Messrs. Watkins, Bissell, Wilson, and Hawks, bream and roach. Mr. Bissell's prize was taken by Mr. Wilson. Members please attend next Tuesday, as we have two guineas offered to fish for. Members are joining each week up to the present.—T. Hawkes, sec.

Burton Piscatorials, the Globe, Derby-street, King's Cross.—The smoking concert for the benefit of Mr. P. Brierly, on the 21th inst., resulted in a great success, our large club-room being well filled by anglers and friends. The entertainment was pronounced *par excellence*, songs, recitations, mimicry, instrumental solos being performed in good style. I wish to thank those good friends who rendered such timely assistance, especially the undermentioned clubs, Golden Barbel, Alma, Great Northern Bros., Seymour Bros., Eustonians, and the Lincoln. I wish to remind members that pen, ink and books are always on duty Wednesday evenings.—C. Roberts, hon. sec.

Cambridge Friendly Angling Society, Masons' Arms, Titchborne-street, Edgware-road, W.—On the 21th prox., Mr. Warsop had roach, rudd, and dace from the Lea, largest rudd, 1lb. 10oz.; largest roach, 1lb. 3½oz. An outing will take place on the 12th inst. at Yalding. Members can leave either on Saturday afternoon or Sunday morning. All fish to weigh. Two rods, bank only.—W. Sutton, sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 28th June we had another fine show of fish on our trays: Mr. C. Chapman, tench, 50lb. 8oz.; Mr. A. C. Chapman, tench and roach, 17lb. 4oz.; Mr. E. Boxall, 19lb. 9½oz., tench, jack, and perch; E. Boxall, jun., tench, 5lb. 9¼oz.; Mr. W. White, bream; Mr. Marshall, bream; Mr. King, roach; Mr. Langton, roach; Mr. Fitter, dace; Mr. Sharp, dace.—E. T. White, sec.

Campbell United A.S.—Seventeen of our members fished the match at Langley, on June 28th, but no member had the requisite weight of fish to take a prize. It will be fished again at the same place, on the 12th inst.; but members can go down on Saturday night if they choose, if not they must report themselves to the first member they come to.—E. W. Wood, hon. sec.

Causton Angling Society.—Coffee Pot Tavern, Warwick-lane, City.—On Monday, June 29, Mr. Joseph Deplidge was unanimously voted chairman for the month of July. The meeting was marked by a discussion on "Angling v. other Sports," wherein reference was made to George Cruickshank's clever sketch of the "Three Mr. Rodds," viz., Nimrod, Ramrod, and Fishingrod. Mr. George Salisbury, of the Second Surrey A.S., was amongst the visitors and presented a prize for dace. Mr. Roberts, secretary of the Blackfriars A.S., was also present, and expressed a favourable opinion of the *modus operandi* adopted by the Causton A.S. with regard to fishing and otherwise. The show of fish has not been anything great during the past week, but it may as well be mentioned that Mr. Deplidge had nine rudd of almost equal size, the heaviest being 13½oz.—J. Smith, hon. sec.

Central Association of London Angling Clubs.—The next delegate meeting will be held at the Bedford Head Hotel, Maiden-lane, Covent-garden, W.C., on Monday, July 6, at 8.30 p.m. The final meeting of the Competition Committee will also take place at the Bedford Head on Thursday, 9th inst., at 8.30 p.m., when everyone interested is requested to be present to settle the final details of the match.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—The following members were successful on the 28th ult.: Messrs. Garbrecht, roach, nearly 13lb.; Castell, dace, from the Association water, Sewardstone; Chambers, perch, from the same water.—Cas.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—Since my last the following fish have been weighed in. On June 25, Mr. Wilson, 26lb. barbel; 27, Mr. A. Trowbridge, 6lb. 10oz. roach; 28, Mr. Painter, 6lb. 3½oz. bream; Mr. Turner, 2lb. 7oz. roach; Mr. Collis, 2lb. 1oz. roach; Mr. Scott, 2lb. 9¼oz. perch. I shall feel obliged by members showing up early on meeting nights, as the prize outings are being arranged.—A. Trowbridge, sec.

Clarence Angling Society, Red Lion Hotel, Harrow-road, Paddington.—Some good business was done at a well attended meeting on Wednesday night. The financial position of the club, after all expenses, proving very satisfactory. Several members have tried the rod and line with fair success in the shape of some good pike, chub, dace, and perch.—Alf. G. Evans, sec.

Clerkenwell and District United.—A visit in connection with the above was paid to the Crown and Buckland Angling Society on Thursday evening, June 25, Mr. Burwash in the chair, the following twelve societies being represented, viz.: Lincoln, St. John's, Convivial, St. Andrew's, Barbican, Crown and Buckland, City of London, Seymour Brothers, Eustonians, Amicable Waltonians, Funny Folks, and North London. The next visit will be to the City of London Angling Society, held at the White Bear, Bride-lane, Ludgate-circus.—F. Castell, hon. sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—We had a good show of fish weighed in on the 28th by Mr. F. Hannabus, weight, 20lb., of bream and tench; Mr. Parbury, bream; E. Baxter, roach and dace. It is proposed to fish a match for club prizes on July 19, conditions to be made next week. And I hope all members will attend.—A. Smith, sec.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—A new member was proposed on the 1st inst., and will be ballotted for at the next meeting. One of our members has had a nice dish of roach from our fishing in the Colne, but no trout have been taken.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 28th, Messrs. Flowers, T. Midson, Cogswell, Parram, Malley, Hills, Wild, Legge, Killick and W. Midson, met with very fair sport, showing among them a good show of roach, perch, dace and bream. In my last report Cogswell should have read—Hills. Members please note that Tuesday the 7th, is general meeting night.—S. Malley, sec.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road.—At the meeting on June 25, a new member in Mr. C. Esmoud was made. Messrs. Morgan, Madden, Dyne, and Foggie, were elected committee men. Messrs. Myers, Woods, and Morgan, were out on the 28th, at the Grand Junction Canal, but did no good; Mr. Dyne went to Staines on the 25th with J. Keene, jun., and got 15½lb. of fish, including one barbel weighing, 2lb. 11oz.; one bream, 1lb. 12oz. A few eligible members are wanted; visit previously required. We meet on Thursday nights at 7.30.—Frank Woods, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—The smoking concert on Monday, June 22, for the benefit of the A.B. Fund, was a great success considering the weather. About fifty members and friends were present. The boxes were emptied by Mr. Jennings, and they were found to contain £2 2s., when our worthy host Mr. Frauks made it up to £2 5s. On the 23th, we were saved from a blank by Mr. Ellis, with 3lb. ½oz. of perch, one fish weighing 1lb. 9½oz. The new privilege tickets are in hand and members wishing to have them must be clear up to last quarter night.—A. Payne, sec.

Gloucester Angling Club.—The first competition of this club took place on Thursday, at the Lower Lode, near Tewkesbury, and although the weather was anything but good for fishing, a goodly number of members, together with their wives and friends, availed themselves of the day's outing. The start was made from the old historic Westgate Bridge, at 10.30, and two hours later the party arrived at their destination. Considering the morning was most awfully wet, those that took part in the outing, thoroughly enjoyed themselves. There were ten prizes to compete for, provided from the committee's reserve fund, which were won respectively by Messrs. Adshead, Yeoman, Green, Belcher, Curtis, Edwards, Harvey, Wood, and Rust, and an outsider's competition, subscribed on the boat, resulted as follows: C. Luker, first; Hopcroft, second, Dix, third.—W. Luker, sec.

Good Intent Angling Society, Crown Inn, Church-street, Shoreditch.—On Tuesday last there was a large attendance of members, it being our annual night. The members decided to fish for prizes on the 12th inst., at Burnt Mill, all start by the eight o'clock train, Liverpool-Street Station.—R. Murphy.

Grange Angling Society.—On Tues, the 30th ult., the members and friends of the above society celebrated their ninth anniversary by a visit to Yalding; the weather being favourable, and the scenery in this neighbourhood all that could be desired. A most enjoyable day was spent. Three prizes were offered for competition, by Messrs. Ryder, Varney, and Farrow, and were taken by Messrs. J. H. Rich, G. Wood, and Chris Green respectively. At the close of the day's sport a group of the party was photographed by Mr. Viner, of Southwark Park-road, after which an adjournment was made to the Bull Inn, where an excellent dinner was provided by the hostess, Mr. Hunt occupying the chair, and Mr. J. H. Rich the vice-chair. The usual toasts having been proposed and duly honoured, our season's prize list was successfully started. A pleasant journey to London ended a day, which thanks to the willing efforts of our indefatigable secretary, Mr. Kayes, proved a perfect success.—F. W. C.

Great Northern Brothers Angling Society, Robin Hood, Southampton-street, Pentonville, N.—We commenced our season on the 21st ult. The takes were small and the fish in poor condition, the following members weighing in bream and roach from the Central Association water at Pulborough: C. Watling, 4lb. 14oz.; W. Parkin, 2lb. 4oz.; C. Large, 1lb. 10oz.; J. A. Fitch, 1lb. 15oz.; H. Proehl and G. Cowper also had fish. From other waters, J. Hewitt, 1lb. 4oz., and W. Barnes, 5lb. of rudd. On the 28th ult., W. Barnes, rudd, 9lb. 1oz.; J. Hewett, 5lb. 13oz.; Messrs. C. Watling, C. Large, W. Parkin, and H. Proehl had bream and roach. At our meeting on the 22nd ult., Mr. Barnes presented a prize towards the Central Association competition at Pulborough. This (including two guineas from the society) will make the seventh prize presented by the members. As the season has just began, we are desirous of electing a few new members to complete our muster, as we are limited to sixty. Our prize list up to the present contains sixty-one prizes, in value from ten shillings and sixpence upwards, and the financial condition of the club was never better.—J. A. Fitch, sec.

Greenwich Angling Society, Prince Albert, Royal-hill.—We had a very pleasant meeting on Wednesday last, the chair being occupied by our president, E. Spencer Stidolph, Esq., faced by Mr. C. Howett. After the usual routine business had been got through, and it had been resolved that the committee draw up a list of fixtures for the ensuing half year. Several members gave amusing and practical experiences of recent fishing excursions. Mr. Dryden, three chub, 5½lb., best 2lb. 6oz.; Messrs. Young, Church, and Toynbee reported a take of about 40lb. of dabs and flounders between them and a friend from Southend-on-Sea, fishing with rod and line. Messrs. E. Lewis and Bassett were unanimously elected honorary members of the society. The following prizes were announced:—E. Spencer Stidolph, Esq., £3 3s., for the best specimen fish taken during the season; Mr. W. Murrin, £2 2s., best pike; Mr. Young, £1 1s., best barbel; Mr. Salter, £1 1s., best chub; Mr. Lewis, a Japanese curio, best dace; Mr. Justice, 10s. 6d., best gudgeon; Messrs. Webb and Bassett, £1 1s roach; Mr. Dryden, £1 1s., best perch; Mr. Child, £1 1s., best bream; the Society, 10s. 6d., best carp. A cordial vote of thanks was passed to Mr. Jesse Birch for his present to the library of Walton and Cotton's "Compleat Angler" and Bickerdyke's "Angling in Salt Water." The meeting concluded with harmony and the usual votes of thanks.—G. J. Toynbee, hon. sec.

Gresham Angling Society.—The usual weekly meeting of this society was held on Tuesday, Mr. J. B Close in the chair. A new member was elected. The question of upholding the rights of the public to fish in the Norfolk Broads was discussed, and it was resolved that Mr. Woodrow be invited to address a meeting of London anglers on the subject at the Gresham room, on Tuesday, July 28, at eight p.m. Anglers will be admitted on presenting their privilege tickets. Mr. C. S. Bentley read an exceedingly interesting paper on "Fish in Legend and Fable," quoting many ancient fish stories, some of which were very curious. He was heartily thanked for his paper. Several members reported having been fishing, but the results were not very good.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On June 28, several of our members were out, but Mr. H. Wells, and J. Pleydell were the only ones to weigh fish, those being rudd.—W. Fenner, secretary.

Highbury Angling Society, Hornsey Wood Tavern, Seven Sisters-road, Finsbury Park.—We had an excellent show on the 23rd inst., Mr. Rutherford having 16lb. of fish, two tench, weighing 8lb., some fine perch and roach; Mr. Wymer also having 6lb. of tench. Several of our members have been out amongst the trout and chub, lately, with some good results, Mr. Gelviling has been quite busy in private waters. I shall be pleased if members and friends will kindly give in their names for the supper to be held at the new club house, by Thursday week, the 9th inst.—J. T. G., sec.

Hoxton Brothers Angling Society.—Since the opening of the season the following members have weighed in fish:—J. Huntley, bream; J. Row, tench; H. Du Costa, trout; and A. Hattemore, roach from the Upper Thames. The special prizes left over from last season will be fished for in the Stort, at Burnt Mill, on July 12. The annual dinner will take place at the Rye House, on July 26. The next return visit No. 1 Eastern District Anglers Association, will take place at the Swan, Bethnal Green-road, Shoreditch, on Tuesday evening, July 14.—R. Ghurney.

Independent Brothers Angling Society, Three Doves, 21, Berwick-street, Oxford-street, W.—On June 28 several members were out, and the following weighed in: Mr. Pope roach, gudgeon, and tench, and Mr. F. Pain, roach. Mr. T. Morris and Mr. J. Woolcot were elected as chairman and vice respectively, and Messrs. A. Pain and Gordon, auditors for last quarter's accounts. Members and friends are asked to note our change of address to above house, and our meeting nights will be Thursdays and Sundays, and not Tuesdays and Sundays as heretofore. The members think that the change will have a beneficial effect; but, at the same time, we cannot help thanking Mr. Galloway for his many kindnesses shown us in the two years we have been in his house.—Snap.

Islington Angling Society, Jubilee House, Hornsey Rise, N.—At the meeting on Monday evening last, Mr. G. A. Smith took the chair. Mr. C. S. Bentley was requested to act as secretary *pro tem* in the absence of the honorary secretary, who was unable to attend. The names of two gentlemen as proposed members were submitted to the meeting, the ballot to take place on the 20th July. At the meeting taking place on Monday, 6th inst., there will be a discussion on the subject of "The lines used for angling." A vote of thanks to the chairman concluded the proceedings.—C. S. B.

Islington Brothers Angling Society, the Rose, Popham-road.—Very little sport was obtained on the 28th ult. The following showed fish: Messrs. W. Stretch, bream, 2lb. 5oz., and J. G. Willsher, dace. We have room for a few more members.—J. H. Herbert, sec.

Izaak Walton Angling Society.—The annual dinners will take place at the Pied Bull, Stanstead, St. Margarets. The week members will dine on Wednesday, 15th inst.; those who intend being present will please send in their names not later than the 12th inst. The other members will dine on the 19th inst.; those who intend being present on this occasion will please send in their names not later than the 15th. The four special prizes competed for at Hatfield Peveril on 1st were not taken; they will be fished again, conditions will be settled on Wednesday next. Mr. G. Rogers had a tray of handsome dace on the 28th ult., Mr. G. Bliss had bream, Mr. Chas. Layton had perch.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—On June 28 the only members weighing in fish were the brothers Challen, who had roach, tench, and bream; and Mr. Ouree, who had roach and tench. Tuesday next being quarterly night, I hope as many members as can possibly attend will do so, as important business will be brought forward.—A. Ide, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—The success attending this association is without precedent. Angling and hon. members now attend meetings in numbers far exceeding previous records. At a committee meeting on the 26th ult. (at our new quarters, the Queen of England Hotel, Goldhawk-road, Shepherd's Bush), several new members were proposed. The prize list was increased by £6 6s., given by hon. and angling members. Many of our members have been out during the week, and have had fair sport in the Stour, Ouse, and Thames.—T. Walter, hon. sec.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On June 28 several members were out, but very few fish were taken—Mr. Belton, dace and gudgeon; Mr. Holmes, one jack. Members who have not got their privilege tickets must take them up before July 12, or they will not be able to compete in the Central competition at Pulborough on that date. I hope members in arrears will turn up on Wednesday next to square up, or they will be subject to rule 4, which comes into force that night.—W. Watling, sec.

Liverpool Angling Association.—We had again a very good meeting last week, and one new member was elected. Several letters were read from gentlemen giving the members permission to fish in their private waters. An outing was fixed for the 9th and one for the 16th inst., both to well-stocked lakes, and these excursions will be almost continuous till the end of September. We have had a twenty-four hours' thunderstorm and very copious rains, which will no doubt be of great benefit to the streams affected thereby. Returning home from a day's fishing the other night, I called at a wayside hostelry for a glass of bitter, and a young man asked me if I belonged to a fishing club, and, on my answering yes, said there was one in the place where he lived (I think he said Blackbrook or Blackrod), and at a competition they had in the Cheshire Dee, the first prize (a copper kettle) was won by three flukes, weighing 4oz. Prodigious!—Rd. Woolfall.

Liverpool East End Friendly Angling Association, 150, West Derby-road, Liverpool. At our meeting on the 23rd the match we were about to propose was postponed till beginning of August, as coarse fish are not fit to be taken yet, and I believe are fully six weeks later this season. It was proposed that two members of the committee should go over to Cheshire to make inquiries as to rent some waters for this new society. Our books were audited by the committee and found to be correct. Several members have been out, one having caught a nice roach, upwards of 1lb. A new member was duly elected on the 23rd—T. C. Segar, sec.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On June 28 our members were out at various waters, and we had some good shows of bream, barbel, dace, and tench, by Messrs. Penfold, W. Pearce, E. Clarke, A. Clark, J. Milburn, and W. Fisher.—W. F. Pearce.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—Our usual weekly meeting was held on Tuesday, Mr. E. Jermy in the chair. Two more new members were made during the evening. We still have a vacancy for a few more. Messrs. Jermy and Garratt weighed in roach, dace, and perch, during the week. I hope all members will make it convenient to come up on Tuesday next as it is the night for election of officers, &c., and we have other important business to settle. Mr. Manning opened our benevolent box during the evening, and gave a good account as to how the Anglers' Benevolent Society was carried on, which very much pleased the members present.—J. Comber, sec.

North London Angling Club, Tap House, Holloway-road, Highbury.—Our smoker takes place on Monday next, when I hope we shall be well supported, as it is to inaugurate the formation of the above club, and to give our Host the opportunity of seeing a good number of anglers together.—H. Stretch, hon. sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park.—On the 28th ult. the following weighed in: Messrs. Swain, tench; Schultz, sen., perch. Several other gentlemen were out, but did not weigh in.—G. Schultz.

Odds and Evens Angling Society, King of Prussia, Bevenden-street, Hoxton.—On Monday last the return visit in the Central Association took place at the above address. Twelve clubs were represented, and a very enjoyable evening was spent.—J. Cuthbert, sec.

Original North Lambeth Angling Society, the Wellington, South-street, Hercules Buildings, Lambeth, S.E.—Tuesday, June 30, being quarterly night, we had a good muster of members, and elected Messrs. H. Spencer and C. Bailey as working members. It was decided to hold our second competition on July 12. Members are requested to attend early on the 5th inst. to make final arrangements.—J. Mann, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—The remainder of the prizes were taken by Messrs. Stidolph, Gardham, and Brancher, the trays being full with a mixture of bream, dace, and rudd. There is a copper kettle to fish for on the 5th open go as you please. Mr. Holbrow was duly elected a fishing member of this society, and Mr. Luff, honorary member.—A. S. Duke, sec.

Phœnix Angling Society, the Crown, Old-street, N.W.—On Monday last our return visit took place, twelve clubs responding to the roll call, Mr. Heclas, chairman; Mr. Mares, vice. A very enjoyable evening was spent. All those gentlemen that attended, please accept our thanks. On Tuesday, Messrs. Morgan, Heclas, Foster, and B. Forster, weighed in some nice fish, especially B. Forster. All members must please attend next Tuesday.—W. Elbourn, sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—The quarterly meeting of the above society took place on July 1, when the following gentlemen were elected to fill the offices: Mr. Rodber, chairman; Mr. W. Arnold, vice; Mr. Corney, auditor. The balance sheet of the past year was received with applause. On the 28th Mr. Rodber weighed in two fine barbel and a roach from the Thames. I hope members will attend on Wednesday next to make themselves eligible to fish in the match at Cookham on July 12, also to receive their privilege tickets.—J. W. Harris, sec.

Richmond Piscatorial Society.—The half-yearly meeting of this society, was held on Friday, June 26th, at the Greyhond Hotel, Richmond, Montague Davenport, Esq., in the chair. The hon. secretary's statement showed the society to be in a most satisfactory and prosperous positian, and although, perhaps, the past season has not been quite so successful in the way of fish taken, an excuse can be found in the exceptionally severe winter, which entirely put a stop to angling during the best part of the season. It was decided to hold several competitions during the ensuing half-year, particulars of which will be duly published. The annual dinner of the society will this year be held, at one of the up river hotels, the precise date will be announced next week. This summer dinner is always a most enjoyable event, and the members of the R.P.S. will be pleased to welcome any brother anglers upon that occasion. Tickets and full particulars can be had from the hon. sec. An important discussion took place upon the present rules of the society, and several alterations were proposed—the most important of which related to season prizes. It was proposed by Mr. J. T. Emery, that a medal be struck bearing the arms of the society upon the obverse, and inscribed upon the reverse with the name of the winner, and the fish for which it was given. It was suggested that this would be an inducement for members to register their fish in the books of the society—no matter in what water taken so long as it was a public water. In order that these medals might be really of value, the following minimum scale of weights was suggested:—Pike (gold medal), 10lb.; trout (gold medal), 6lb.; barbel, 8lb.; bream, 4½lb.; carp, 8lb.; chub, 4½lb.; perch, 2lb.; roach, 1½lb.; tench, 4lb.; and dace, ¾lb (silver medals.) These weights were, however, considered by the majority of those members present to be too prohibitive; and in order to give an opportunity for a full consideration of the question, it was decided upon the motion of Mr. Holt to adjourn the discussion until the 24th July, when all members are earnestly asked to attend. In the meantime members are requested to weigh all specimen fish, and to record them in the society's books, as the proposition if carried will be retrospective to the 26th of June, 1891. The rule relating to recording fish taken must, however, have been observed—viz., that all fish taken must be recorded within three days of capture, to be eligible for any season prize.

Rodney Piscatorials, Rising Sun, Harper-street, New Kent-road.—The result of our punt match at Twickenham on 28th June, was a success. All prizes were taken as follows:—Messrs. Wigley, first; Utting, second; Naylor, third; Mitchell, fourth. One new member was elected, and two others were nominated for election. The next visit on the A. S. V. L. comes to this society on July 14, when I hope to see a good muster from all clubs.—F. T. Lamberton, sec.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—The following members weighed in on June 28: Messrs. Webber, Holder, Gibbons, and myself. I trust members will try and do better in future, as there is a very long list of prizes to be competed for. Members who require privilege tickets had better have them at once.—F. C. Longland.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On the 28th ult. most of our members were out, but did not get a very large show. The following gentlemen weighed in fish: A. Barclay, 10lb. 11oz. roach, rudd, and dace; Mr. Stanley, 4lb. roach, dace, and chub; Mr. Smith, 2lb. ½oz. roach and rudd; Mr. Wells, roach and rudd; Mr. Day, bleak; Mr. Perry, rudd. Members will please note that there is a prize for the greatest number weighed in.—A Barclay, sec.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth—The members were out in force on the 28th ult., but the trays were not overburdened with fish, as only Messrs. Wood and Stone weighed in. Total 7lb. 2oz., roach and dace, Messrs. Green, Brocken, and J. Wright had fish, but did not weigh them in. The three gentlemen proposed last meeting night were unanimously elected members, and several prizes promised. A full list will be published later on.—J. Wright, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On June 21, eighteen members were out on the war-path, with the following result:—Messrs. C. Holmes, roach (one fish, 1lb. 3oz), G. Sanders, roach; J. Barnes, roach, dace and chub; J. Petrie, dace and perch, 2lb. 2oz.; H. Docker, and S. Cane, roach and dace. On the 28th we had a very handsome lot of bream, eleven fish 26lb. 7¾oz. (one fish 2lb. 11oz., taken by Mr. W. North); J. Petrie, roach and dace, 5lb. 10oz.; J. Barnes, roach and dace. On Tuesday two gentlemen were elected working members, and one honorary. All members will greatly oblige by attending on Tuesday next, quarterly night, for the election of officers and other important business for the ensuing year. Members in arrears will also greatly oblige.—S. E. Cane, sec.

Silver Trout Angling Society, Bedford Head Maiden-lane, Covent-garden.—On the 28th June only one of our members weighed in, Mr. Curtis having roach, rudd, jack, and tench. Tuesday we had a very good meeting, and another new member was elected. Our outing at Amberley, on July 5, will be fished under the usual club conditions, four prize winners to choose their prizes. The committee met and completed the prize list for the coming season. A special general meeting will take place on Tuesday, July 14, for important business. A bag containing a quantity of fishing tackle was left in the Shepperton train on Sunday evening last at Twickenham, the finder will greatly oblige by communicating with me at the above address.—Pelican.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—An outing for seven valuable prizes will take place at Amberley on July 5. The following members weighed in fish on the 28th ult.: Messrs. Jones, bream and roach; Hooper, bream and roach; Quinn, bream; Spenceley, dace. July 9 will be quarter night, and I should like to see members early.—R. Spenceley, sec.

South London Angling Society, George and Dragon, 235, Camberwell-road.—At a special meeting held on Wednesday, July 1, it was decided that a fine of one penny be imposed on each undersized fish shown in the club-room. There is an outing on Wednesday next, July 8, for four prizes. Three members weighed in fish this evening, from St. Albans, *via* Wellingboro', the train they went by stopping for the first time at the latter place.

South London United Anglers' Visiting List.—A visit of the clubs enrolled on the above list was paid to the Waggoners A. S. on the 30th ult. On the roll being called by Mr. Y. Wright, vice-president of the list, the following seventeen clubs responded:—Bermondsey Bros., Second Surrey, Rodney, Peckham Bros., Anglers' Pride, Battersea Friendly, Kenningtonians, Blackfriars, St. George's, Clapham Junction, St. Thomas's, Earlsfield, Cliftonville, Causton, Original North Lambeth, City of London, and Waggoners. The next visit will be to the Blackfriars. Due notice of date next week.—A. Conn, hon. sec.

St. Andrew's Piscatorial Society, Turk's Head, East-street, W.C.—We had a very good show of fish on the 28th ult., Mr. A. Long being top scorer with 12lb. of bream, Messrs. H. and J. Long had a few good roach; Mr. Chevalier, roach and bream; and Mr. E. Roberts, roach and bream.—B. Chevalier, sec.

Stepney Angling Society, Beehive, Stepney.—On the 28th inst. the following returned to club-house with fish, viz.: Messrs. Marrows, Willshire, Jolly, Bounds, all with bream; Gerrard, roach and bream.—E. N. P.

Stoke Newington Angling Society, the Dun Horse, Kingsland-road, E.—The opening competition of the season for three prizes will take place at Yalding on the 5th inst. under the usual conditions. The complimentary visit to our club on the 29th ult. was very well attended, the Anglers' Association being represented by Messrs. Manning, Ghurney, Murphy, and S. Malby, and the the special thanks of the society are tendered to the Good Intent, Hoxton Brothers, Hearts of Oak, and Burdett Angling Societies for the handsome manner their members responded to the invitation, and also to Mr. George Manning for carrying out the duties of chairman. The eleventh annual dinner of this society will take place on Wednesday, 22nd inst.—T. Gretton.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—The members of the above club visited Pulborough, on June 28, to fish a peg down competition, for prizes given them at their annual dinner, but returned unsuccessful. Lost on Pulborough station, a top joint, should any angler have found same and return to above club the members will feel grateful.—G. Morton, sec.

United Brothers, Deptford.—Several members of the above were out on the 28th ult. Mr. J. Bolton weighed in three fine tench, each fish weighed over 4lb.; G. Marshall, bream; and S. Cockerton, bream. The members of the above will fish a match on July 5, in the Medway, for several money przes. Hope all members will turn up on this occasion.—H. Tyler, sec.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—Our visit on the S.L.U.V.L. took place on the 30th inst. The following seventeen clubs answered to the call of the roll: Bermondsey Brothers, Second Surrey, Rodney, Peckham Brothers, Anglers Pride, Battersea Friendly, Blackfriars, Waggoners, St. George's Clapham Junction, St. Thomas's, Earlsfield, Original South Lambeth, Cliftonville, Causton, and City of London. Result ofour match on the 28th ult., Mr. Smith, jun., first; Mr. H. Ilsley, second; Mr. Skinner, third, roach and dace. Mr. Clegg weighed in rudd. Several others had fish, but not the stipulated weight. Members are requested to attend early next Tuesday as an important discussion will take place.—H. C., hon. sec.

Walham Green and Fulham Angling Society, Stansford Arms, Fulham.—Mr. C. Weyer was proposed to become a member. I have to remind members that Wednesday, July 8, is quarterly night, when all are earnestly requested to attend. Since the opening day several of our members have been out, but have met with very indifferent success.—E. Sutchall, sec.

Waltonian Angling Society, the Cape of Good Hope, Albany-street, Regent's Park.—On the 21st ult. several of our members were out, but met with very little sport. Messrs. H. Putnam, Wallham, Good and Miller, weighed in. June 28, Messrs. H. Putnam, dace, 2lb. 3oz.; Morris, roach, 2lb. 2½oz.; Miller, roach, 1lb. 8oz.; and Wallham, roach, 1lb. 7½oz. I wish to remind members that we should be glad to see them sometimes, as we want to arrange for the day's outing, and also the drize sheet.—J. Packman, sec.

Walworth Waltonian Angling Society, St. Paul's Tavern, Walworth, S.E.—On Wednesday last we had a good muster, Mr. H. Bayley in the chair. It was decided that the first competition of the season took place on July 12 for two prizes. First, cash one guinea, given by Mr. J. Rump; second, Mr. Resdon, value 10s. 6d. Also the first Wednesday competition of the season to take place on Wednesday, July 29, for two prizes. First, cash, given by Mr. Hardy; second, copper tea kettle, given by Mr. W. T. Crisp. Mr. T. Gill and Mr. C. Johnama were duly elected honorary members of this society. There will be a committee meeting on Wednesday next, July 8, at 7,30, at St. Pauls' Tavern, for important business.—C. Hibble, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—On June 28, Mr. C. Newbery, one of our honorary members, showed 30lb. of barbel and bream. The following members also showed fish; Barnes, bream and roach; Jenkins, bream and roach; Wyre, bream; Dartnall, bream; and Gordon, rudd. On July 5, the first competition of the season will take place at Amberley. All members to go down by 6.55 from London Bridge, cease fishing at 5.30, show fish at the Bridge, and return by 6.15.—R. J. Dartnall, sec.

Western Piscatorials, Bear and Rummer Tavern, Mortimer-street, Cavendish-square.—On Wednesday, June 24, Mr. R. S. Buffery had the pleasure of weighing in the first lot of fish of the new season, consisting of bream, chub, and barbel, one bream alone weighing 4lb. 2oz., a total of 10lb. 12oz. Mr. J. F. Moon was also successful on July 1 with roach, tench, and rudd, one tench weighing 3lb. 2oz., total 13lb. Society prizes for the new season have been decided, and the balance-sheet for last quarter shows the sound financial position of the society.—D. W. Evans, sec.

West London Angling Club, Dartmouth Castle, Hammersmith.—Since my last report we have elected three new members. I was out on Thursday with my brother fishing with J. Brain, jun., wo had six nice barbel and several dace. These fish are very numerous in this district, but are not yet thoroughly clean. A few sharp showers of rain are required to make the sport brisk, and and anglers may depend upon having some first class takes. —J. J. HUNTER, hon. sec.

Worcester Angling Societies.—The Izaak Walton Angling Club had their first competition for prizes at Holt, on the Severn, on Tuesday last. The weather was most unfavourable, strong, cold east wind made it difficult to keep a line in the water, and the rain came on in torrents, consequently the takes of fish were small, first prize being taken by Mr. Webb; second, R. J. Maund. A capital feed at the Holt Fleet Hotel made amends for the cruel weather, and a pleasant evening was spent. The St. John's Angling Society had their annual competition on the club water, the Lower Teme, on Thursday. Their take of fish was small, and consisted chiefly of chub, perch, and gudgeon. The water was much discoloured, and rapidly rising, and a heavy thunderstorm drove tho members from the water, some of them drenched to the skin. First prizo was won by Mr. A. Salter, A. Williams being second, Chamberlain, third.—R. WINGFIELD.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly. meeting, was held on Wednesday, 1st July, Mr. Hesse in the chair, when another new member was proposed for election at the next meeting. Mr. Bursell was elected as a member of the committee. The secretary having read two circulars addressed to him by Mr. Woodrow, hon. sec. of the Norfolk Broads Protection Society, regarding the attempt now being made to close Hickling and Wroxham Broads against fishing, shooting, and sailing, it was resolved that a meeting be held here on Wednesday, 15th inst., at eight p.m., to hear Mr. Woodson and others, on the question to which anglers and others will be admitted on presentation of privilege ticket or private card, and it is hoped this will prove a representative meeting of anglers, etc., in the North and East of London. Messrs. Raynor, Custland, Russell, and a friend fished the Weir Pool, at Broxbourm, on Saturday, 26th ult., dace and four jack (which were all returned), also, two eels, all with lob worms; but they report that the fishing was entirely stopped at the best time of the day, by a large party of bathers, taking possession of the water which they had paid to fish. It is proposed to hold our next club outing on August Bank holiday, at our private water at Hildersham, near Cambridge. A vote of thanks to the chairman concluded a very businesslike and enjoyable evening. I would inform all and sundry gentlemen, that they can join this high class society on very favourable terms, from the 1st July to 31st December. —HY. RICHARDSON, hon. sec.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

REPORTS FROM RIVERS, LOCHS, &c.

☞ *River Reporters who want forms and envelopes should send a post card to the Manager of the* FISHING GAZETTF, *St. Dunstan's House, Fetter-lane, London.*

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add	30 min. for Chelsea.		Add	55 min. for Kew.
	40 " " Putney.			75 " " Richmond.
	45 " " Hammer-smith.			80 " " Twicken-ham.
	50 " " Barnes.			85 " " Teddington.

EXAMPLE:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

English and Welsh Reports.

The Lower Thames.—GENERAL REMARKS.—It is satisfactory to learn the small fry of porch in the pond at Sunbury are going on well, and are thriving rapidly. There is no chance of other fry getting into it, but in the lower part the opening which has been embedded up with fine sand, is being removed, so that the youngsters can get into the channel below, and the grating at the end is so fine, it is impossible for them to pass into the river. I have received a letter from Mr. A. E. Armstrong, the honorary river keeper at Chertsey, who says, "I have now placed the whole of the trout fry into the stream, as I feel sure they would get far more food than bringing them up by hand in tanks. I have shown my stream to several practical friends, and they say it is so near perfection for trout rearing as it is possible for a natural stream to be." This also is satisfactory, and all anglers will join in wishing him success with the rearing of about one thousand young trout, and feel grateful for the trouble and time he is giving himself about them. I have promised to go down this week to see them. There has been the destruction of a large quantity of fine barbel and dace between Kew Bridge and Mortlake—the fish have been found swimming on the top of the water in a very bad condition, and easily caught by hand, whilst others have been found dead on the banks. There are various opinions as to the cause. Some think it is from poisonous fluid escaping from the gas or dye works; others from the disinfectants in the gullies and ditches getting into the river; others from the severe winter and late spawning, which has left them in an unusually weak state. One of my correspondents states that he picked up a fine barbel between 2ft. and 3ft. in length, and there was no mark or injury of any kind about the fish, which was rather putrid and poor. The matter is now in the hands of Mr. G. I. Rough, the intelligent and active head keeper of the Thames Conservancy, and from him I shall learn all about it. The report from Staines, as regards fishing, is very satisfactory, and from all accounts the barbel appear to be very plentiful in the river, and are to be seen jumping about in all directions. The sport in other places has been of an indifferent character.—B.

RICHMOND.—Henry Mansell, in one day, 7lb. of roach and dace and one barbel.

TWICKENHAM.—John Coxen, senior, during the week, four jack, one bream, and three dozen of roach and dace; John Coxen, junior, seven dozen of roach and dace and a couple of bream.

TEDDINGTON.—Joseph Baldwin, in three days, fourteen dozen of roach, dace, and gudgeon; Mr. Shipton, in one day, with B. Stevens, five barbel.

KINGSTON.—John Johnson, during the week, ten dozen of roach and dace and two chub.

SURBITON.—The anglers have been getting roach, dace, bream, chub, and perch. A fine carp caught in the park, weighing 10½lb., is in the hands of Mr. J. R. Richardson, for preservation.

HAMPTON COURT.—Very little has been done, and the punts have been getting from five to six dozen of roach and dace and a few barbel.

SUNBURY.—Messrs. T. and A. Stroud, during the week, twenty dozen of roach and dace, three jack, and two perch, the largest 1½lb. One of their men had a take of fifteen dozen of roach and dace.

CHERTSEY.—J. Poulter, one day, seven barbel, two chub, a bream of 2lb., and two dozen of roach and dace, and in three other days, twenty dozen, and an eel of 1½lb.; L. Hackett, during the week, fourteen dozen, and four bream.

WEYBRIDGE.—Herbert Curr reports there is a large show of barbel this season in his district. One day with Mr. Harris he got ten barbel, five eels, and one chub, and another day, seven barbel and one eel.

STAINES.—John Keene, junior, says he has been out the whole week, and done well with the barbel and bream. One day with Mr. Gambler and friend, of the Larkhall Angling Society, who got twenty fish, weighing 56lb.; another day, with Mr. Millar, twenty-six fish, weighing 63lb.; another day, with Mr. Wilson, of the Clapham Junction Angling Society, fifteen fish, weighing 30lb.; another day, with Mr. Dyne, of the East London Piscatorials, five dozen of dace, four barbel, and two bream, weighing altogether 18lb.; another day, in five hours, with Mr. Horton, of Staines, eight barbel and two bream, weighing 25lb., all of which he put back again; and another day, with Mr. Newbury, of the New Albion Piscatorials, ten barbel and four bream, weighing 30lb.; the gross weight of the six days being 222lb.

Upper Thames.—Thursday Evening.—The recent rains do not seem to have had much influence in pushing up the water, and as I write the river is in grand all-round trim, and fish well on the feed, but unfortunately Henley-bound folks are also on the feed, and in the channel of the river just now it is impossible to fish with comfort or success, because of the procession of boats fearfully and wonderfully made, all bound Henley-wards to see the human race and "form" divine on Tuesday, Wednesday, and Thursday next. At Marsh weir, Major Rogers, with "Bob," a day or so ago, had eighteen barbel, best fish 9lb., and two next, 8lb. each. At Marlow, Mr. Browne is again to the fore with a trout of 5½lb. Weather glorious, with nice breeze from the S.W. Roach, chub, and barbel to be had in out-of-the-way back waters and weir pools.—MARLOW BUZZ.

Thames (Datchet).—Very few anglers about, they are expecting to hear of something being done. I was out to-day. The dace feed very well. Caught a good many fine ones. Had a few barbel bites. Caught one another. Big fish broke away. Bank anglers are catching some very fair roach in the evening. The barbel are not jumping so much as they did a week ago. A large barbel, estimated at 8lb., was found on the tow-path below the Albert Bridge. G. LUMSDEN.

Thames (Richmond).—This well-known angling resort has been considerably patronised of late, but as far as my information goes, sport amongst the barbel, roach, and dace, has not been at all up to the mark. The professional fishermen are, I am glad to say, being fairly well employed, and it is to be hoped that with good weather they will make up for the bad wind-up they had last season, consequent upon the memorable frost. The recent extraordinary assemblage of fish under Richmond bridge still forms the topic of conversation in angling circles, and the professional fishermen say they never witnessed such a sight before. Although there is a good show of barbel, these wary gentlemen up to the present have not fed at all briskly, and I can only hear of takes consisting of from one to half a dozen fish, and the majority of these mere babies. I understand, however, that a gentleman out with J. Brain, senior, has caught one of 6lb. On Saturday another angler, fishing from a punt at the railway bridge, landed four barbel. I watched several anglers there on Sunday, but during the time I stayed on the spot nothing was done. Wednesday's rain has freshened up the river considerably, but we could still do with more rain, in fact, in the words of the song we could do with "A lot of wet—such a lot of wet." Then there might be a chance of getting among some of those fine bream which disported themselves under the bridge. I saw one caught on Sunday near one of the drain-pipes, but it was only a small fish of about ½lb. Some consternation was caused here last week by the appearance of a quantity of dead fish—barbel, roach, dace, and gudgeon—floating about, and I hear that at Kew, Isleworth, and Strand-on-the-Green, similar scenes have been witnessed. Up to the present the cause of the mortality is a mystery, but I hope the officials of the T.A.P.S. have been on the *qui vive* concerning it. I have also heard of fish being seen swimming about in a stupid, sickly condition. Has the pollution fiend been at work? Last Sunday the river was literally crowded with boats and steam launches, and the bank anglers had a sorry time of it. The punt anglers were little better off, and on one or two occasions I saw them "run down" by a crew of hobbledehoys. I believe in their heart of hearts, rowing men seriously think that the Thames was specially made for their own pet hobby, and especially did I think so on Sunday, when, standing near the railway bridge, I witnessed a pretty little scene. Several punts had their rypecks in there, and because one of these individuals found himself rather crowded for room, as he urged on his slim outrigger, he poured forth such a volley of abuse on the "gentle" disciples of Izaak Walton, that I thought the doctor would have been required. Not only was it abusive but filthy language, and there were several ladies standing on the towing-path at the time who must have heard it' And he was a "gentleman," so a sun-burnt boatman informed me!—GOOSEQUILL.

Thames (Twickenham).—Like Richmond, this angling station has not produced any noteworthy takes of fish this season. On June 21 anglers met in large numbers, and punts could not be obtained for love or money after ten in the morning. Since then the river has been well fished, and the local people have made great exertions to get on terms of close acquaintanceship with the barbel. He (tho barbel) has been opposed to the desired intimacy, and has daily "winked the other eye" at his treacherous friends. By the way, a big barbel was pulled up dead in the neighbourhood of the island the other day, and I hear that if it had been in condition it would have gone 15lb.! Whether it was any relation to the barbel called "Paul Jones," which was said to weigh 30lb., and whose mouth used to glisten with hooks when it reared its head out of tho water at Hampton Court to see who was about, I am unablo to state. However large the fish was, its untimely end is much to be regretted. June 28 was again a busy day for the puntsmen, but a bad day for their patrons, even dace being off feed. Early in the afternoon I met several anglers *en route* for the station. Several jack have been caught here lately, but I should fancy they cannot be in very good condition. At the time of writing (Wednesday) rain is falling, and angling prospects look brighter for July 5.—GOOSEQUILL.

Thames (Windsor).—At time of writing the river is in good order and every appearance of rain which must still further improve it. Chub continue to feed well and many have been taken, but beyond fish of 2lb. no large ones have been caught. The same may be said of roach, largest 14oz., but that rare fish in these waters, the carp, have shown up in Bell Weir, three being caught, 11lb., 6lb. and 7lb., the two latter by G. Roules of Egham, and the 11lb. fish together with a jack of 6½lb. were caught at the same time by the same angler who had two rods laying down, both fish taking the bait at the same time. A few barbel have also been caught but very small. Dace are had on the shallows with the fly, Black Gnat proving best, gudgeon have not been tried as far as I can ascertain. Jack also have been left alone, with the exception of the one mentioned above, and ought to be till August at earliest. That favourite little crustacean the cray fish I am pleased to say, has again made its appearance after being looked upon as extinct. Some four years ago requiring a few for scientific purposes, I offered one shilling each for all that could be got, and though several men and boys hunted over the most likely haunts, not one was found. These under notice were caught at Boveney Bridge by some boys whilst bathing, and a specimen brought me was extremely fine being just over 5in. in length. A fine pike of 18lb. has been picked up dead near here, supposed to have been struck by propellor of a launch.—B. R. BAMBRIDGE.

Ancholme District.—The following are the chief catches during the past week. On Wednesday, Mr. A. Rowe had 7lb. of roach and perch, the latter very fine. On Thursday there were a good many visitors all getting fish. Mr. Scott had 8lb. of roach. On Friday, Mr. Hawkins had thirty roach; and on Saturday, a bag of roach and dace. On Monday, Mr. J. R. Ealey had a bag of bream from 1lb. to 2½lb. each; and Messrs. Surley, 8lb. of roach; Mr. Wray, of Hull, is credited with a roach of 2lb. 2oz. The Drake is about over on the trout brooks. The Alder is now one of the leading flies, and there are a good many Duns in the evenings. Messrs. Holebone and Shipley are credited with two trout, and a basket of coarse fish at Kiverhead.—THOMAS FORD.

Barle (Dulverton).—The river is very low at present, but fish are killed after nine p.m. Rain has just commenced to fall, and if it keeps dropping for the next six hours good baskets ought to be killed with Quill Minnow.

Brighton.—SEA FISHING.—There are plenty of sea bream, mackerel, pout, small conger, &c., to be caught just now, but the sea has been rather too rough for boat anglers to venture out since Monday last. To-day (Thursday) it is nearly calm enough, so that sport may be had by "whipping," by which means some nice mackerel were caught close in on Friday last.—H.

Chichester and Sussex Rivers.—More like old times has sport proved during the week, and although not welcome to the haymakers, roots are improving, never looked better, and in our own especial line, rivers are in excellent condition, thanks to the heavy rains. At Chichester canal sport has been above the average. Mr. S. Young, one of the most enthusiastic anglers I have met with for some years, had a grand take of bream a few days since from the lower reaches, over 30lb., and some fish up to 2lb. Mr. H. Terry was not far behind, and Mr. Bedford with Jas. Wright in the Houston reaches has made good record. A tench of 1lb. was taken by Mr. Bedford, jun., and the host of anglers who have frequented the water side have had excellent sport. The Arum in the Amberley and Pulborough district has yielded some good bream. The Odur good baskets of dace, roach, and flat fish, and frequenters of the Ouse have had good sport among the chub and roach. Salt water votaries are having a good time among the bream, whiting, and congers. Trailing for mackerel is remunerative, and in the harbours bass, a few codling, and smelt, make variety baskets.—GEORGE F. SALTER.

Derwent (Ambergate).—Both Derwent and Amber cleared down into good condition on Saturday last after the heavy storm, and good sport was the general rule. Many anglers were out on the Ambergate and Whatstandwell lengths. Mr. J. Musgrave secured the best basket of thirteen trout, with an average of nearly 1lb. each, taken with the Yellow Sally. Prospects for fly-fishing are good for the week end, and the best flies are the Yellow Sally or Throstlewing, Ash Dun and Downlooker. Bottom fishers are doing little or nothing.—AMBER DUN.

Dove and Tributaries.—The May-fly season has now ended. On the whole it has been a good one. We have heard of more good bags being got this year than for many seasons past. Mr. Wheen took over fifty brace during the week ending June 20. These from the Okeover water, and Mr. Gray, who fished the Dove Dale length for some days, took over sixteen per diem on the averoge. This, with Mr. S. Thomas's forty-nine brace for same week on same length, is not a bad record. Mr. G. Ditchfield took a total of ten brace in the three last days of the season last week. D. AND W. H. FOSTER, Ashbourn.

Eden (Carlisle).—The foot of fresh water in the river at the end of last week, though not enough to clean out the bottom, seems to have put the trout more on the feed. Several anglers have made fair baskets. Mr. M. H. Humble, an expert hand, killed forty-five with the worm on Monday, chiefly on the Doctor's Flat, and Mr. Slater had a nice lot with the fly the same evening after eight o'clock. Sea trout and grilse are running freely, and the Solway fishermen are to some extent making up for their want of success in the early part of the season. The netting men at the mouth of the river are also having a good time of it.—SILVER GREY.

Fen Waters (South Lincolnshire).—Angling is now becoming remunerative on many of the better waters. Roach are coming into condition, and in the fine evenings there are plenty of dace to be had by fly-fishing. Perch are also to be met with in the districts of the drains containing them, and anglers are getting very satisfactory takes. Bream are also showing themselves, but are very shy at present. It is expected the present will be a fine summer for bream, and especially in the Welland and other known bream waters. The rains are putting a little colour into the water and causing it to freshen, but very much of the rain soaks into the soil, which is very dry for the season.—Limpet.

Idle (North Notts).—I hear that anglers are able to do very well on the Idle, and also on the canal, both of which are in fine order so far as the height and the colour of the water is concerned. The intolerable nuisance of weeds is again cropping up, and sometimes the river is full of them. A little care on the part of mowers up stream would be a great help to the fishermen. Weeds on the drains in the lower district are growing remarkably fast, and require cutting. Cutting is also said to be started by the Commissioners. Good roach are now procurable, and in some places dace are being caught, and so also perch; but the standing dish when these fail are still the flounders, plentiful on the lower reaches.—L.

Itchen (Winchester).—Fish rise well from nine till eleven a.m.; evening rise from seven till eight. Best killing fly, Pale Olive; wind, S.W.—Ginger Quill.

Lea and Stort.—The changeable weather seems to have put the fish off the feed. The rivers have been improved by the recent rains, but just now the growth of weeds makes it rather difficult for fishermen to find swims where their baits can be put prominently in front of fish. Wherever a decent swim can be found between the beds of weeds, good sport may be had, small red worms, gentles, or caddis baits being preferable to the supposed orthodox Lea angler's paste bait. On Thursday I found both the Lea and Stort in capital condition, and fish were to be seen during the sunny hours in the middle of the day very busily rising at the natural flies. Eels have been running remarkably well, and some capital baskets have been made. Now that all the Lea waters are open, sniggling and ledgering will be found good business. Some few roach and a good chub or two have been caught near St. Margarets and Rye House. In the lower waters at Cook's Ferry, Games's, and Ferrie Boat, some very good roach and plenty of eels have rewarded the efforts of fishermen who know their business. At Sewardstone the water is very low, but fish are plentiful and easy to be seen under the present circumstances. A case of poachers at their nefarious traffic has lately been met with by two members of one of our leading London angling clubs, and I trust that this will begin to open the eyes of the authorities to the fact that the prevention of netting is of much more importance than the question of gross weights or sizeable fish.—Spliced Joint.

Leicester.—Anglers continue to pay attention to the waters in the vicinity of the town, in good round numbers. The few showers that have fallen instead of interfering with sport have tended to keep the waters in excellent order; but with the roach and pike in poor condition. Anglers mostly try for perch, chub and eels. These have furnished ample sport, from the Leicester waters. Messrs. Frisby, Mee, Ellis and Thomas have shown rattling takes fish averaging from 1lb. to 2lb. During the latter part of last week, Messrs. Howard, Green and Pinnock obtained fair baskets of roach; and Mr. Reeves chub fishing had good specimens up to 2lb. Mr. G. Stevenson's basket of fish, is also worthy of mention. The Anglestone brook is not yet available for fishing. At Brooksby, Rearsby, and Blaby matters have been lively, but it is to be regretted that at the Abbey-park waters, pike 6oz. to 1lb. have been taken, which amounted almost to murder.

Loddon (Earley).—The river is in good condition and some good chub has been taken this week by Mr. Griffin, his heaviest scaling 3½lb. Roach are also feeding well, and several nice baskets have been taken.—J. R. Gould.

Lugg and Arrow (Leominster).—Both these streams which were running coloured at the end of last week, are now clear and in good order for fishing. The Pinsley is low and clear.—Gwynne.

Lugg, Arrow, and Pinsley (Kingsland).—These rivers are in capital order, but since the May-fly went off sport has not been good, although a few fair baskets have been made. Stone, Orl, Yellow Dun, Orange Palmer, and Coch-y-bondhu by day, with Spinners, Owls, Caddis, and Sky Blue for evening, are the best flies. Minnow fishing has not been as good as usual this season owing, no doubt, in a great measure to the unsettled state of the weather and frequent thunderstorms.—R. T. Williams.

Medway (Maidstone).—The Medway is simply beautiful. The angler who is fond of the gentle art is gratified if not in a sporting sense, by the beautiful surroundings of the glorious Medway. The anglers have met with little success. The fish have not yet cleaned themselves, in fact some of the bream a week ago had not spawned. I hope to get among the chub at Yalding very soon, it is no use to say anything about bait roach or bream are taking, for the simple reason they are not taking at all. Hope to send you a better report in course of a few weeks.—W. Shrubsole.

Medway (Yalding).—A friend of mine says the fish are very dirty here, and that sport has not been at all encouraging since the opening of the season. A party of London anglers were here on Tuesday, but the most successful member only took two chub. There are plenty of fine fish here, but the backward spawning season has been against them.—Goosequill.

Norfolk, Suffolk, and Cambridgeshire Waters.—There is really nothing of importance to report from any of our waters in the eastern counties. Roach are busy in every creek, dyke, and cutting depositing their ova. Perch have got over their process. Chub and dace are all right. The only sport really to be obtained is amongst the bream in the Norfolk and Cambridgeshire waters, and they are feeding very indifferently. I do not like the idea of painting up rivers and fishing. I have always been careful to avoid that. Nothing, in my opinion, is more disappointing to the angler than to read great takes of fish made here and there, and the first thing he finds out on his arrival is fish are not feeding at all. That there are swarms of fish in most all our rivers there can be no doubt, but the severe and continued frost have had such an effect on them that they are more than a month behind their regular time for spawning. And this is not all; they have become so weakened by the extreme cold and continued frost that quantities of them are now at the present time dying off. In a walk of four miles I had on Sunday along one of the Cambridgeshire lodes, I counted over sixty large roach, dead and dying; no disease, but simply from sheer weakness and inability to deposit. Sharp-running waters like the Brandon Ouse fish have done better, but even there they are not feeding well. My advice is to wait. The best take of fish I have seen for some weeks were taken at Southery yesterday (30th). All bream, and several of them over 4lb. each.—William Howlett.

Plymouth.—Sea Fishing.—There is plenty of fish to be had now in any part of the bay or sound. Hundreds of boats have gone out every day, and have returned laden with fish of all kinds, chiefly bass, mackerel, whiting, pollack, pouting. Mackerel are now paying us a visit nearer land; they are chiefly taken with a Baby Spinner and a strip of mackerel. Last Wednesday one of our boats was fortunate enough to get six hundred of the fish, and they were all taken with a line; they are sold in the streets for about tenpence per dozen. The next two or three months will make all our fishermen very busy with every kind of sea fishing. Bass can now be obtained at Penlee Point and the Rame by casting for them as you would for salmon from the shore; thirteen were taken by one rod alone last week. Now would be the time for those who enjoy sport of this kind to visit Plymouth. I will not describe this mode of fishing unless requested, as I have done so frequently. Pollack can be taken very near the pier, where you can obtain boats at sixpence per hour. They are also taken in any part of the Sound with the grub bait, with a natural worm for the tail; some prefer using the sole skin and worm, and are well rewarded for their toil. A friend of mine caught four dozen before breakfast last week, and they weighed from 2lb. to 7lb. each; they were all caught with the grub and worm. The weather still continues fine, but there is a slight breeze up.—William Hearder.

Severn and Lower Teme (Worcester).—The heavy rains during the past week have slightly affected both rivers, and caused the eels to move freely, a great number having been taken by the bottom-fishers, and some heavy baskets of coarse fish have been taken on the Severn. Mr. Phillips, jun., of Camp Locks, while trolling with one of Warner's pike baits, caught a splendid trout of 6lb. weight in grand condition; Mr. J. Davis (Izaak Walton Club) has also weighed in a grand lot of trout and roach, the latter averaging ½lb. each. The Blue Dun, Cow-dung, and Black Gnat have been killing well on the Teme, and some capital baskets of dace have been taken, but the trout taken have run small, the rapid rise and discolouration of the water on Thursday evening interfered with fly-fishing for a day or two; but both streams are in fair fishing order now.—Fieldwing.

Taw (North Devon).—The rivers have not risen as one would have expected with the rain—only just freshened it; but fish do not this season take properly. The Lynton water is good, and many good catches had. Salmon with the net-men are not so plentiful as years gone by.—Rusty Game.

Teme (Tenbury).—In this district the water has cleared since last week, and has run into good fishing order. The weather is dull. The fish have been rising well.—Worcester.

Trent (Newark).—Atmospheric influences have been antagonistic to the Trent anglers' success during the past week, for shortly after the despatch of my last report the river rose rapidly, and on Friday evening a heavy volume of highly-coloured water was coursing merrily along, and high winds and storms have been prevalent daily since. Worm fishing has been attempted with but moderate success, and no heavy takes are registered, eels being principally taken, and without more settled weather neither the bottom fisherman nor the surface angler can hope for much sport.—Trentsider.

Trent (Nottingham).—The Trent has undergone a substantial rise since my last, although on Wednesday the river had again settled down, and was in splendid condition for all descriptions of angling. There is no doubt, too, that the influx will improve bottom fishing all round. At Weston, on Saturday, one of the subscribers, Mr. W. Atkinso, of Radford, killed with the worm a miscellaneous bag of roach, dace, perch, and bream. The lot weighed over 30lb.; and most of the fish were in very fair condition. Below King's Mills in the same fishery, W. J. Greaves, a member of the Nottingham Wellington Society, has taken a very fine bream of 4lb. 8¾oz.; and an eel of 4lb. odd, has fallen to the rod of Mr. Hitchin of Melbourne, Mr. H. Green, of the Holme Pierrepont, length, has been bagging roach, and white bream on the scours, but the fish were sickly and ought, perhaps, to have been returned. A few lots of roach have come to hand from Hilford.—The-Man-at-the-Clubs.

Yore, Wharfe, Swale, Nidd, &c.—Very little alteration has been made in the above by recent rains, the ground being so dry, that it will require at least two days continuous rain to bring down a perch. A Pateley angler killed eighteen trout with bustard on Tuesday night, some capital sport has also been experienced at Boroughbridge and Tadcaster with chub, roach and barbel.—Francis M. Walbran.

East and West Cleddau (Pembrokeshire).—A nice fresh came down the rivers last week, and a good many sewin went up. The water is now in good fishing order, and nice baskets of trout taken with the fly, more especially by evening fishing.—H.

Lake Vyrnwy (North Wales, via Oswestry).—During the past week we have had a heavy rainfall and very fair baskets have been made. In a succession of thunderstorms on Thursday, Mr. H. I. Bromilow caught twelve very pretty trout, 10lb.; and Messrs. Brookes, eleven, 10¼lb. On Saturday sport was good, and Messrs. C. W. Gedney and G. Ward brought in sixteen lovely fish, 14½lb.; same two anglers in a gale of wind on Monday, got seventeen fine fish, 15lb.; and on the afternoon of Tuesday, twelve, 10lb. 13oz. Heaviest fish: Mr. Bromilow, 1¾lb.; Mr. Ward, 1lb. 10oz. Most successful flies: Black and Grouse, Claret and Grouse, and Alder. There is plenty of fresh water now and heavy baskets ought to be made this month.—Long Drift.

Tan-y-Bwlch Hotel (Capel Curig, N. Wales).—After the recent rain trout have been going very well indeed—one local fisherman taking seventy-eight in a few hours—to-day, July 1st., Mr. J. Dodd took twenty-seven fish, averaging nearly ½lb.; and Mr. E. Cobden, twenty very good trout.—F. C. C.

Teifi (Lampeter, Cardiganshire).—Notwithstanding the recent thunderstorms, the river still remains very low, somewhat coloured from the road washings, but that is all, hence but few trout have been taken during the past week, and sport will not improve until we have had a good heavy downpour.—H.

Towy (Llandilo, Carmarthenshire).—Towards the close of last week we had a welcome flood of water down the river, and as Sundays are close days for salmon netting, we shall probably have a further supply of salmon and sewin up during this week or next. Nice catches of trout are now being made, the heaviest by minnow and worm. Dr. Nawnton Davies—a first-rate fly fisher by the way—is having good sport, as also Dr. Lloyd, on the "Dynevor" water. A number of pike have also been captured, up to 10lb. in weight each. We have an unusual number of sea lampreys up the river this season, and several have been caught up to 4lb. in weight.—H.

Usk (Abergavenny).—Three salmon weighing 13lb., 13lb., 11½lb. each, were caught by Mr. W. Davis, on Monday; and on the same day three more weighing 15½lb., 12½lb., 12lb. each, by Colonel Dalton. And two others weighing 12lb. and 10lb. each, by the Rev. F. de vie Beamish, on Tuesday. Some very fine trout have been taken with the white and brown moths, and Red Spinner. Having had a quantity of rain during the last few days, good sport is expected during the coming week.—Joseph Clare.

Usk (at Usk).—There have been several slight freshets during the past week of a few inches, but this has not materially suspended angling. A big run of salmon has taken place, and grilse are now numerous in the river. On Monday, General Sir C. L. Barnard, K.C.B., caught one 14lb. on No. 2 beat, and Mr. Brown, one, 10lb., on the same beat. Tuesday, on the upper association waters, Mr. Barker had one; Rev. Hair, three; Mr. W. Stone, two; and Mr. Seymour, one; Mr. Clive, one, 16lb., on No. 3 beat; and Mr. H. E. Cole, a grilse, 4½lb.—T.

Yare (Norwich).—Excellent bream fishing is now being had on this river right away from Coldham Hall, Brundall, down past Buckenham Ferry to Cantley. At each station good catches have been had during the past week; fish in numbers up to 3lb. have been landed, and several catches of from four to five stones per two rods are reported. To-day (Thursday) I've tried, but failed altogether, but, I am pleased to say, in good company, as several of the most experienced anglers of the district were there, and they were equally lucky. On the Bure, I am told, sport is good, and improving from week to week. Roach are coming into condition on this river; but it will take another fortnight on the Yare. I trust to be able in next report to send you some accounts of catches which have not been heard for several years, as all the best authorities admit that we have the best possible prospects.—Robert Moll.

Scotch Reports.

Altnacealgach Hotel Waters (via Lairg, N.B.).—On Tuesday, last week, Mr. Mann, Shrewsbury, on Loch Cama, twenty-seven trout, 8lb.; and Messrs. Eskrigge, Hall and Lupton, Liverpool on Loch Veyatie, half the day only, twenty-eight, 10½lb. Loch Urigill was fished by Mr. Hutchison, Perth, three dozen, 10lb.; Mr. Smith, Perth, three dozen, 10lb.; and Mr. Moncrieff, Perth, forty-five, 11lb. On Wednesday, on Loch Urigill, Mr. Mann, forty-two, 12lb.; Mr. Smith, thirty-five, 8lb.; and Mr. Moncrieff, thirty-four, 11lb. On Loch Veyatie, Mr. P. D. Malloch, Perth, six dozen, 21½lb.; and Mr. Hutchinson, three dozen, 13½lb.; Messrs. Eskrigge, Hall and Lupton, on Loch Cama, one hundred and thirteen, 28lb.; Mr. and Mrs. Barrett, Perth, on Loch Boarlan, half day only, fifty-nine, 14½lb.; and Mr. Clay, London, a short time, 3½lb. On Thursday, which was the yearly communion fast day, anglers had to fish from banks, as neither boats nor gillies were obtainable. On Loch Urigill, Mr. Malloch had ninety, 21½lb.; and Mr. Smith, twenty-three, 6½lb. On Loch Cama, Messrs. Clay and Mead, London, and Messrs. Eskrigge and Hall, had in all fifty-seven, 14lb. Friday was stormy, and many of the anglers were out only a short time. On Loch Veyatie, Messrs. Hall and Eskrigge were blown off; and Mr. Mann had twenty-three, 6lb. On Loch Urigill, Mr. Malloch, eighty-four, 25lb.; Mr. Hutchison, forty-nine, 13½lb.; and Messrs. Smith and Moncrieff, blown off early, thirty, 10lb. On Loch Cama, Mr. and Mrs. Barrett, fifty, 17½lb.; and Messrs. Clay and Mead, ninety-four, 16½lb. Messrs. Lupton and R. B. Eskrigge, on Loch Boarlan, sixty, 11½lb. On Saturday, on Loch Veyatie, Mr. Mann had twenty-six, 10lb., one of which weighed 1½lb., and contained an adder 18in. long. On Loch Cama, Messrs. Hall and Eskrigge, fifty-seven, 19½lb.; and Messrs. Lupton and R. B. Eskrigge, eighty-two, 24½lb. On Loch Urigill, Mr. and Mrs. Barrett, seventy-four, 20lb.; and Messrs. Clay and Mead, sixty-three, 16lb.; Mr. Clay, with green and teal fly and small trout rod, landed a beautiful *Salmo ferox* of 7lb., it was in perfect condition, and has been sent to Mr. Malloch, Perth, for preservation. On Monday, this week, Loch Urigill was fished by Messrs. Eskrigge, forty, 11¾lb.; and by Messrs. Lupton and Hall, eighty-three, 26lb.; Messrs. Clay, Mead, and Headlam, London, on Loch Cama, six dozen, 23½lb.; and Professor Harrower, on Loch Boarlan, thirty-nine, 11¾lb. Total basket for the week, 1,675 fish, 466½lb.—McB.

Auchintaple Loch (Forfarshire).—Good sport is the order of the day. On Monday, Messrs. C. Henderson, Glenisla, and J. G. Henderson, U.S. America, landed twelve trout, which weighed 17lb. One trout was exactly 3lb., two stood at 2½lb. each, while another scaled fully 2lb. On Wednesday last week, Lord Alexander Kennedy, Major D. M. Robertson, and Lieutenant D. S. Johnstone, of Alyth, had good sport on the same loch.—David G. Grewar.

Carron (Easter Ross, Ardgay, N.B.).—For the first time during the past four months, sport on this river was *nil* for seven consecutive days. With a burning sun overhead, and a river almost dried up, salmon angling was for a while out of the question. The only fish landed last week was by Mr. W. Allis Smith, of Glencalon, who fished the upper waters on Saturday, and got a salmon weighing 10lb. A good deal of rain fell on Saturday, Sunday, and Monday, and the water is now in fair order. On Tuesday, this week, Dr. MacPherson, Bonarbridge, and Dr. Polson, Edinburgh, fished the waters connected with Balnagown Arms Hotel with success, the one landing a salmon of 9lb., the other a grilse of 5lb.—McB.

Dee (Aberdeenshire).—The past week has been one of drought, heat, thunderstorms, and general ups and downs, which have reduced salmon angling to a minimum; but have induced more attention to the streams in search of trout, and many good baskets have been made. In the upper pools of the Dee, which are actually congested with fish, disease is very serious, and the mortality very considerable. It would be beneficial were some of the more crowded places cleared out of the worst pest which can affect our *Salmonidæ* and this can be easily done about the Braemar district. On the Balmoral and Birkhall reaches the royal keepers have landed several salmon and a good few grilse. On the Invercauld waters at Ballater, Rev. Mr. Upcher, Mr. Upcher, jun., Mr. Lister, and Mr. McGregor landed thirty-one salmon last week, scaling from 7lb. to over 20lb. each. On the Cambus O'May water Captain Gaskill and friends have enjoyed a good time of it during June. On the lower reaches the smallness of the river has been very much felt, and the expectations of a good grilse season have as yet been disappointing. On the Ballogie section, Mr. E. Drummond has just completed his spring lease, and on the whole has had a very successful season. Last week he added to his score, which is above the average, two, 7lb.; one, 19lb.; and a grilse of 3lb. In the previous week he had two of 9lb. and 13lb., which were omitted from that week's report. On the Upper Dess water, Captain Davidson landed a grilse of 3lb. On the Woodend water, Mr. Campbell, keeper, landed two grilse of 3lb. and a salmon of 7lb. On the Blackhall Castle reaches and the Lower Crathes and Feugh waters, a good few small grilse have been got, while anglers for sea trout in the tidal reaches have been making glorious baskets nightly with bait. The show of fish on the coast last week was said to be unprecedented, and a flood just now would be a welcome boon all-round. It is reported that three hundred and three salmon and grilse were got one morning at the Aberdeen Harbour fishing station at the mouth of the river.—Deesider.

Esk (Langholm, Dumfriesshire).—Day fishing has been useless in the bright weather. The whole of the takes were made after sunset. Sea trout are not so plentiful as they might be at this season, but with more water a good run is looked for, and all the more confidently as they were showing well last week in the Solway. The following takes are reported from the lower waters: Mr. Craig, Crosskeys, three sea-trout and a few yellow trout; Mr. J. Graham, Rowanburn, five sea trout; Mr. James Graham, Crookholm, six sea trout; Mr. D. Edgar, Rowanburn, six sea trout; Mr. James Park, Marchbank, three sea trout; Mr. J. Graham, Loaninghead, two sea trout; Mr. William Riddle, Byreburnfoot, three sea trout, and Mr. A. Irving, Rowanburn, two sea trout. In Langholm water, Messrs. William Thorburn, Thomas Martin, John Barnfather, James Bell, George Armstrong, Frank Storey, and Matthew Laidlaw, have had sea trout, the majority of the fish being taken at the Skippers' Gullets. They have not been of large size, the best weighing 2¼lb. Since the above was written, the weather has changed completely, a severe thunderstorm having passed over the district, rain has fallen in torrents; and good sport may now be expected. —W. Douglas, Eskdale Hotel.

Helmsdale (Helmsdale).—Since my report of last week a good deal of rain has fallen, but not sufficient to raise the river in the slightest degree. The consequence is, of course, that anglers have done very little indeed; the only fair basket I have heard of was got by the Suirgill party, who on Friday last landed four salmon, and three grilse, latter fresh run. The river lessees are at present making a salmon channel in the fords which lie between Helmsdale and Kildonan, with the object of allowing fish to run up in any state of the river. I have no doubt it will be of some good even when the water is at its lowest. The netsmen continue to secure great hauls of fish, both grilse and salmon, and are now far ahead of their total catch of last season. The lochs are yielding good sport. The other day Mr. Muir and his brother landed 56lb. trout on Loch Baden. Other lochs are also yielding fair sport.—S. C.

Inchnadamph Hotel Waters (Sutherland).—The following record of the past week's sport will indicate the nice baskets now made on the various lochs attached to this hotel. On Tuesday last week Mr. Cookson, York, fished Loch Assynt and landed three and a-quarter dozen trout, weighing in all 14lb.; and Colonel and Mrs. Flower, London, on Loch Awe, three and one-third dozen, 15lb.; Mr. Cookson fished Loch Awe on Wednesday, and caught two and a-half dozen, 10lb.; on Thursday, Major and Mrs. Gillespie tried Loch Awe and made a basket of forty-four trout, 13lb.; and Mr. Cookson, on Davies' Loch, had four fine trout averaging 2½lb. each; on Friday, Colonel and Mrs. Flower, on Loch Awe, one and a-quarter dozen, 6lb.; Mr. Cookson, on Loch Assynt, two and a-half dozen, which averaged ½lb. each; on Saturday Colonel and Mrs. Flower, on Loch Assynt, five, 3lb.; Mr. Cookson, on Davies' Loch, five, 10lb.; Major and Mrs. Gillespie, on Loch Awe, twenty-five, 8lb.; on Monday, this week, Mr. Cookson fished Loch Awe and made a fine basket of fifty, 17lb.; Colonel and Mrs. Flower, on Loch Assynt, twenty-five, 8lb.; Major Gillespie on same loch, nine, the heaviest of which weighed 2lb.—McB.

Isla (Forfarshire).—Perhaps within human memory the Isla has not been so low as it is at the present time, yet good sport is being got with fly, the trout rising very freely. Worm and natural minnow lures do well in the early mornings. The bed of the stream is very dirty and stands much in need of a spate to clean it out.—David G. Grewar.

Kilmelford.—General and Lady Tower, Messrs. Lyle and Usher, Drs. O. Fergus and Giles, Captain and Mrs. Falls, R.N., and Miss Leggatt, Messrs. Bankart, James Waddell, Kirby and Stott, presently residing at Cuilfail Hotel, are having splendid sport on the Hotel waters, and deep sea fishing on Loch Melford. The total catch during the week was one thousand two hundred and fifty-two trout in grand condition. Two days sea fishing, 60½lb. cod, 37lb. flounders and garnets. Angling weather now in earnest; season in full swing; new visitors arriving daily, at the anglers' favourite resort, Cuilfail Hotel.—John M. Frazer.

Kyle of Durness.—Mr. H. W. Davies, of London, fishing the Kyle during the past five days' has had the following takes: June 23, twenty-one sea trout, 32lb., largest 4lb.; 24th, twenty-six sea trout, 35lb., largest 3½lb.; 25th, eighteen sea trout, 24lb., largest 2½lb.; 26th, two Crosspuil trout, 3lb., largest 2lb.; 27th, thirty-five sea trout, 51lb., largest 3lb.—Ada Turnbull.

Kyle of Sutherland (Bonarbridge, N.B.)—Several anglers have been sea trout angling on these tidal waters during the past week, but details of baskets are not procurable, excepting those by Dr. Polson, Edinburgh, who on Tuesday week landed four sea trout, weighing 1½lb. On Wednesday he got three fine fish of over 2lb. each, and six smaller ones averaging about ½lb. On Thursday he got four sea trout, 2lb.; and on Saturday, five, 2¾lb. On Monday this week he landed five, the heaviest being 1½lb., and hooked a grilse, but it broke away. The net salmon fishers have been very successful of late, the hauls of salmon and grilse during the past week being heavier than in any week since the opening of the season. As compared with the previous week, Mr. Anderson's, South Bonar, Scalp, and Rivermouth fishings showed great improvement, while the takes on Mr. Smith's, Cruggandubh and Inverchurron fishings, almost doubled in productiveness; but Messrs. Powrie and Piteaithley's Skibo fishings at the head of the Dornoch Firth showed a falling-off. The weight of salmon and grilse consigned to Billingsgate from all these fishings in the course of the week is estimated at over five tons.—McB.

Lairg, N.B.—The following is the record of the sport on Lairg Hotel waters during the past week. Weather of greater part of the week was unfavourable for good sport. On Monday, 22nd, Col. Church killed four trout, 3½lb., on Loch Beannoch; Mr. Clay, three, 2¼lb., on Loch Cracail; and Major-Gen. Stafford, seventeen, 8lb., on Loch Namfuar-leachd. On Tuesday, Mr. A. C. Giddes, eight, 3¾lb., on Loch Nam fuar-leachd; Major-Gen. Stafford, eight, 3½lb., on Loch Shin. On Wednesday, Col. Church fished Loch Beannoch, six, 2½lb., and Major-Gen. Stafford, three, on Loch Shin. On Thursday, Mr. Dickens, seven, 5lb., on Loch Craeail; Major-Gen. Stafford, eight, 3¼lb., on Loch Shin. On Friday, Mr. Dickens, four, 3lb., on Loch Beannoch; Major-Gen. Stafford, eight, 3½lb., on Shiness Bay. Saturday forenoon was thundery, with a heavy fall of rain. Mr. Dickens fished Loch Shin for two hours in the afternoon, and killed eleven, 6lb.; Mr. and Mrs. Spicer on same loch had over a dozen.—J. Y.

Loch Garry and River Garry (Tomdoun Inn).—Water in nice trim; excellent sport. Weather favourable. —Hison.

Loch Garry (Invergarry Hotel).—Visitors at this house have been very successful during the past week. Trout up to 3¾lb. have been landed. Particulars next week. Prospects excellent.—Hison.

Loch Leven (Kinross).—Little sport continues to be got, owing to boisterous winds and heavy thunder showers with thunder. The average sport obtained by private parties is about 5lb. The heaviest prize basket of the week was got by Mr. Gibbs, of the Edinburgh Waverley Club, with six trout, 7lb. 6oz. Mr. Gordon, Glasgow, was the most successful of private parties, having captured seventeen trout, 15lb. Several days ago a trout scaling 1¼lb., was captured with the rod, marked with a silver ring. From the markings it would appear to be one marked two years' ago at "back of Castle," it then weighing 6oz. Several other marked fish have been got, all of them showing a development of about 8oz. per annum.—Robt. B. Laing.

Loch Ness and Loch Tarff (Lovat Arms Hotel, Fort Augustus, N.B.).—The fishing got on these waters can hardly be surpassed. Mr. Muir, of Glasgow, has been enjoying good sport during the past ten days. Fishing on Loch Tarff yesterday (30th ult.), Gen. Monsey Grant had a basket of forty trout, weight 23lb., ten of the largest weighing 8lb. Gen. Monsey Grant is one of the best fly-fishers in the North. The waters are now of a good size, and the wind blowing steadily from the west. Prospects for the next week remarkably good. Several large salmon have been seen at the mouth of river Oich, and, with a little more flood, they will be able to ascend and give a chance to anglers on the river.—Hison.

Loch Rannoch (Kinloch Rannoch).—On Friday, the 26th ult., Captain Causton, from the Dimalastair Hotel, had a basket of forty-four trout on Loch Rannoch; and on same water, Mr. Pearce had a take of 9¼lb. On the river, Mr. Wilson and son obtained a basket of 4¾lb.; and on the following day, on Loch Rannoch, the same gentlemen had a basket of 9¾lb., and a beautiful *Salmo ferox*, weighing fully 13¼lb. The *Salmo ferox*, when struck, proved very ferocious, and gave play for about three quarters of an hour, but after it became exhausted its capture was speedily accomplished. On the loch, on same day, the Rev. Mr. Stevenson and Mr. Pearce had a basket of fully 10¼lb. On the following day, Mr. Wilson and son obtained on the loch four trout, 5lb.; and Mr. Noble and friend, a basket of 10½lb.; Mr. Nash and the Rev. Mr. Stevenson, on same water, had a basket of 8¼lb.; and Mr. Singer, one of 7½lb. Captain Causton, within a few hours, had a basket of 4¾lb. On the 30th, Mr. Nash killed thirty-two trout on the loch; and Mr. Noble and friend killed eighteen; on same date, Mr. Graham had a basket of 5lb.; and Mr. Wilson and son, on the river, one of 4lb.; Captain Causton and the Rev. Mr. Stevenson killed seven trout; and Mr. Singer had fourteen. On the following day, Mr. Nash had a basket of 10¼lb. on the loch; Mr. Graham killed twenty-eight very nice trout; Mr. Hodgson, a nice take of sixteen trout; and Mr. Noble and Mr. Turner secured a take of 3¼lb. on the river.

Loch Tay (Kenmore, N.B.).—On the Hotel water on the 25th, Mr. Lewis, nine trout, 4lb.; Mr. Allgood, six trout, 3½lb.; Mr. Anderson, eighteen trout, 5lb. On the 26th, Mr. Allgood, thirteen trout, 4½lb.; Mr. F. Graham, seven trout, 3½lb.; Mr. Anderson, nine trout, 3½lb. On the 27th, Mr. Anderson, five trout, 3½lb. On the 29th, Mr. F. Graham, fifteen trout, 4lb.; Mr. Allgood, twenty-seven trout, 8½lb.; Mr. Anderson, fifty-two trout, 14lb.; Mr. Parker, fifty-seven trout, 12lb.; Doctor Rowlands, fifty-seven trout, 11lb.; Mr. Gardiner, twenty-seven trout, 8lb. On the 30th, Mr. Anderson, sixteen trout, 8½lb.; Mr. Parker, eleven trout, 3½lb.; Mr. Straker, thirty trout, 18lb. Mr. Allgood had fine sport, sixty-four trout, 8lb. Loch is in good ply after the rain.—Knight.

Overscaig Hotel Waters (via Lairg, N.B.).—Heavier baskets are now being made. On Tuesday last week Mr. Sample, Bothal Castle, Morpeth, fished Fiag beat on Loch Shin, and caught sixteen trout, 8½lb. in all. A good basket was also made on Loch Merkland by Mr. R. Ormond and Mr. W. Ormond, Newcastle-on-Tyne. The Rev. Canon Faber, Doncaster, on Loch Fiag, fifty trout, 12lb.; and Mr. A. Paradox and Master Paradox, on Loch Merkland, thirty trout, 10¼lb. On Wednesday, Messrs. Ormond, on Loch Griam, eighteen trout, 7½lb.; Rev. Canon Faber, on same loch, twenty-nine trout, 7½lb.; and Messrs. Paradox on Loch Shin, eighteen trout, 7lb. It should, however, be mentioned that the day was so rough that all the boats were blown off the lochs. On Friday the storm was worse, and the only baskets made were by Rev. Canon Faber, who had twenty-five trout, 7lb., on Loch Merkland; and by Mr. A. Paradox and Master Paradox on Loch Griam, thirty-six trout, 11¼lb. On Saturday the last-named anglers on Fiag beat, forty-nine trout, 20lb.; Rev. Canon Faber, on Loch Fiag, five dozen, 18lb. On Monday this week, Rev. Canon Faber, Doncaster, on Fiag beat, landed twenty-nine trout, 6lb.; and Messrs. A. and R. Paradox, on Loch Shin, forty trout, 14lb.; besides a *Salmo ferox* of 3¼lb., caught by Mr. R. Paradox.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.)—On Monday last week Loch Na-Blarloch was fished by Capt. Burton, Gloucester, who landed twenty-eight trout, weighing 8lb. in all. On the mountain streams, on Tuesday, the same angler had twenty-two trout, 7lb.; on Loch Inchard, on Wednesday, 16lb. lythe; on Loch Tigh Sheilg, on Thursday, twenty-three trout, 11lb.; and on Friday, on same loch, forty-four trout, 17lb. On Saturday, Captain Burton fished Loch Inchard, and got a sea trout of 3lb., and sixty lythe; and Mr. Maitland, fishing off Cape Wrath, got a number of sea fish. Angling prospects for this week are very good, as the spate of Saturday and Sunday enabled sea trout to ascend, and seldom were so many seen in the kyle waiting to get up. The outlook in brown trout fishing is also encouraging.—McB.

Shin (Inveran Hotel Waters, Sutherland, N.B.).—This river has been prolific in sport all through the season up to date, and the past month has been the best June for a great number of years. There can be but little doubt the Shin is now reaping the benefit of the withdrawal of the nets from its mouth. These net fishings of the Invershin, as they were called, were abolished by the Duke of Sutherland, two or three years ago, and the beneficial effects as regards angling are now plainly perceptible. Last week, although the water was not at its best for fishing, the following sport was got by Mr. Buxton and party, Sutherland Arms Hotel. On Monday, a 6lb. grilse on Cromarty Pool, and two of 5lb. and 3lb. on Falls Pool. On Tuesday, one grilse, 5½lb., on Cromarty, and two 5lb. and 4lb. on Coolag. On Wednesday, a 6lb. grilse on Angus Pool, and two of 6lb. and 5lb. on Falls Pool. On Thursday Coolag yielded a 6½lb. grilse, and the upper waters one of 5½lb. On Friday, an 11lb. salmon was grassed on Herbert Pool, a 5lb. grilse on Coolag, and another of the same weight on Falls Pool. On Saturday three salmon of 14lb., 15lb., and 16lb. were caught on Fir Dam, and two grilse weighing 6lb. each on Cromarty Pool. Miss Elwys has been trout angling, and caught a number of nice fish. Heavy rain fell on Saturday and Sunday, and numbers of fish are now seen daily ascending the falls.—McB.

South of Scotland.—On Friday night and Saturday morning there was a heavy rain fell in the Annandale and by mid-day on Saturday the waters were up 18in. Still although the conditions are somewhat more favourable than last week, none of the South of Scotland rivers are in good order. The all-important flood has not yet come. With the colour in the water on Saturday, bait fishers were not in numbers in the Annan, and some heavy baskets of sea trout were caught at Newbie Mill. Mr. James Pollock, High-street, killed four sea trout, weighing from 1lb. to 2½lb. each, and he had besides a grilse of 3lb. Mr. James Scott, Lodge Cottage, caught four sea trout from 1lb. to 1½lb. each, Mr. James Dixon, High-street, had one sea trout of 2½lb.; Mr. Henry Boyd, two sea trout, and he hooked and lost a salmon. On the previous day Mr. Dirom, of Mount Annan, killed two sea trout of 1lb. each, and ten yellow trout, the heaviest of which weighed ¾lb.; a visitor from Manchester had a brace of herling. On Saturday in Mount Annan Water, Mr. A. Bell, killed one sea trout, 1lb. On Monday there were again kills with worm, at the Water Mill, Mr. Barrett, Lady-street, had a couple of sea trout; and Mr. Pollock caught three fine ones. Besides these catches other anglers had baskets of yellow trout, and odd herling have also been caught. In the higher waters some capital angling has been had since the rise of water. On Monday, the Rev. Mr. Colchy, the Parsonage, Annan, killed a beautiful basket of thirty yellow trout in Jardine Hall water, which weighed 12lb. Mr. Robison, Bernock Lodge, Moffat, killed a similar basket; Mr. Jamieson, Ashmount, Moffat, landed a very fine yellow trout out of the Oakriggside water, which weighed 3lb. In the middle reaches Mr. Banning, Lockerbie, had four sea trout and a nice lot of yellow trout, the heaviest of which weighed 2½lb. On Hoddom Castle section, one of the keepers had a sea trout of 2lb., and a yellow trout of 2½lb. Other anglers had smaller baskets, the Border Esk has been slightly improved with the rainfall. On Friday night Mr. Graham, Crookholm, had a salmon of 8lb. in the Double water, with worm. John Edgar Rowanburn had four sea trout in the same water on the following morning. On Monday Mr. James Morrison, Langholm, killed six sea trout in the Skipper Pool, weighing about 2lb. each with worm fishing. Mr. John Reid had three sea trout, and other anglers had smaller catches. Weather is unsettled-looking this (Thursday) evening.—Heatherbell.

St. Mary's Loch and the Meggat (Rodono Hotel, Selkirk).—Anglers are enjoying good sport here at present. Mr. James Anderson, of Edinburgh, fishing with worm on Monday, Tuesday, and Wednesday of this week, basketed over thirteen dozen trout of fair average size. The heaviest, scaling over 1lb., was killed in the loch. Mr. J. B. Mackie, of Edinburgh, fishing with fly, has also had nice baskets. The streams are low and clear, and the loch is much below its normal level.—W. White.

Tongue Hotel.—June 25, Messrs. Bolton on Loch Slamm, twenty trout, 9lb., and a salmon weighing 4½lb. June 26, Messrs. Bolton on Loch Hope, three sea trout, 9lb. June 27, Messrs. Bolton, on Loch Slamm, twenty trout, 7lb.: also a salmon weighing 4½lb.—A. Campbell.

Irish Reports.

Ballinderry (East Tyrone).—Trouting is slightly improved on the Ballinderry and its tributaries by the recent heavy rains, which put the water in nice volume and colour, but the frequent violent thunderstorms were against good baskets being made. Monday last in the Tullyleggan preserves, Mr. James Stevenson had four nice trout, and in the Finvay reaches Mr. J. Hardy killed a 19lb. pike. Friday on the Ardtree sections Mr. William McCord had a brace, and Mr. Robert Campboll three brace of brown trout. Salmon are commencing to run up from Lough Neagh, and some twenty-pounders have been seen, but none have been taken that I hear of. Monday last on the Coagh reaches, Mr. C. B. Irwin had ten trout, Mr. Stamford Leitch had twelve; and Mr. Thomas Bell, nine brown trout. At the time of writing the river is still rising, and the prospects of good sport are increasing.—East Tyrone.

Blackadder.—Ballynahinch fishery, since my last report, General Beresford has headed the list with a total of twenty-three fish, salmon and peal; General Coote, fifteen; Mr. Pike, three; Capt. Coote, three; Mr. Taylor, two; and some sea trout which are now appearing in the lakes, we have had two slight rise of water, but want a good spat to really improve the fishing.—Toombeola.

Erne and Lough Melvin.—The weather continued very hot and bright for the greater part of last week, and but little angling was done until Friday and Saturday, when some heavy rain fell, and since then capital sport has been obtained. The weather at present is very wet and stormy. —M. Rogan and Sons.

Moy and Lakes (Ballina).—The change of weather, from bright sunshine to dark and cloudy, with the fall of rain we have had, has improved sport very much. Suffice to say that rods average from one to three grilse, and while a good many are hooked, played, and lost. Amongst the most successful anglers are Mr. R. W. Murray, Mr. R. Gunn MacKay, Mr. Roberts and friend, Mr. Boyd, and Mr. Wilkinson. There is now fully 9in. of fresh water in the river, which will keep it up some time. More rain to come. The river crowding with hundreds of grilse and sea trout.—Frank Hearn.

Westmeath Lakes.—Now that the Green Drake season is virtually over, fishing as a consequence has lattely been very dull indeed; the weather has also become stormy and showery, and rendered dapping with flies other than Green Drake, a matter almost of impossibility. A second rise comes on in July and August, upon Lough Ennell, and splendid fishing is often obtained. The trout are then in the pink of condition, and again turn to fly-food when satiated with the perch fry. Trolling for pike will be in full swing immediately, and very few days pass over without at least one trout from 4lb. to 7lb. being added to the basket as also some prime perch.—T. J. W.

THE CARBOLIC SMOKE BALL

WILL POSITIVELY CURE

HAY FEVER

For Inhalation only

A disease that has hitherto baffled the skill of the most eminent physicians, who have sought in vain to cure or prevent its annual return.

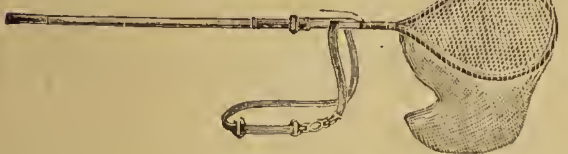
S. ALLCOCK & Co., Standard Works, REDDITCH.

Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

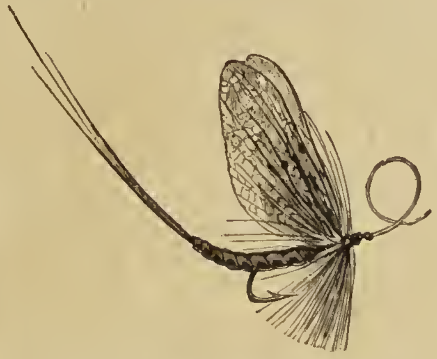
Patent Applied for.



Col. Clarke's Patent L. Handle & Net.

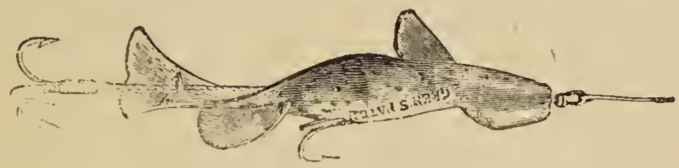
Perfectly secured to the Strap, and can be removed in an instant.

The Patent Ring Mounted Devon.
Platt's Patent Fishing Basket.
The New Aluminium Reel.



Patent Inimitable May Fly.

The nearest approach to nature ever yet attained. Bodies in various Patterns.



Geen's Patent Spiral Minnow.

The most Perfect Spinning Bait ever invented.

It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

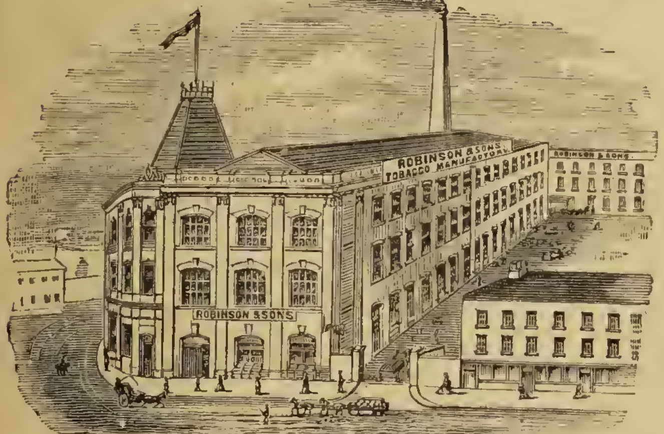
Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.

CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.

London Office: 60, QUEEN VICTORIA STREET, E.C.

SMOKE "ORIEL" NAVY CUT.



THE HIGH CLASS TOBACCO,

MADE FROM PICKED LEAVES OF THE FINEST QUALITY.

Extract from the "FISHING GAZETTE" of February 21st, 1891:—

A GOOD SMOKE.

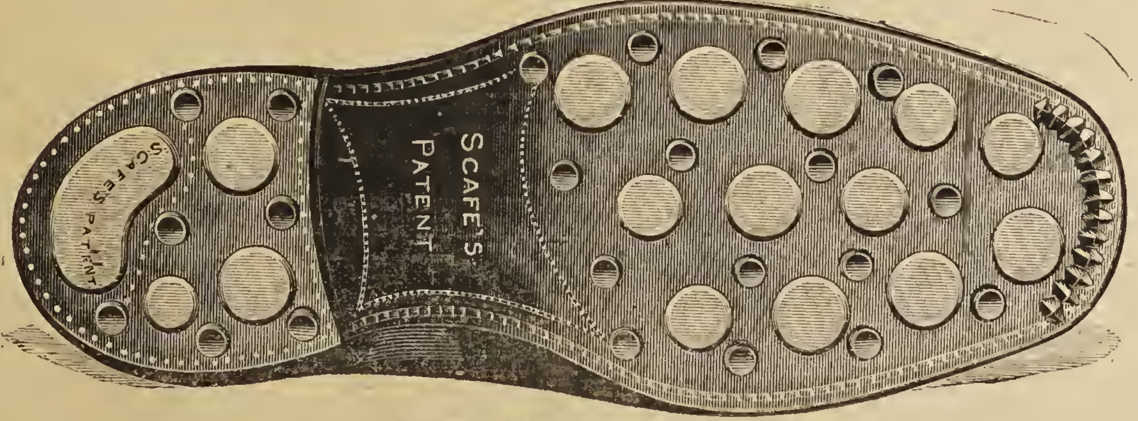
Dear Sir,—Knowing how much you enjoy your pipe when out a-fishing, may I ask if you, or any of your friends, have ever tried "The Oriel" navy cut, manufactured by Robinson's, of Stockport? If you have not, do so at once, and I venture to say that you will be well pleased with it, being very cool and lasting, with an exquisite flavour. I have no interest in the matter whatever, but simply recommend it as my *beau ideal* of what a fisherman's tobacco should be.—Yours truly, Smoker.

Sold at 5d. per ounce, in 1 and 2 oz. Packets, and 4oz. Tins. Any Smoker having difficulty in obtaining it from his usual Tobacconist can obtain it direct from the Manufactory POST FREE. 2oz., 10d., ¼lb., 1s. 8d.; ½lb, 3s. 4d.; 1lb., 6s. 8d. POST FREE.

Sole MANUFACTURERS: **ROBINSON & SONS**, TOBACCO & SNUFF MILLS, **STOCKPORT**

SCAFE'S PATENT ("The Redspinner") FISHING BROGUE.

The "Field" says:—"Mr. Scafe has applied the principle of his leather and rubber combination to fishing brogues with excellent results. That the sole of the brogue should enable the Angler to move about on slippery boulders with confidence, and make a leap from rock to rock, without jarring the system, are points of vital consideration. The Scafe brogue has these distinct recommendations, and to them must be added the extraordinary durability of the sole."



The "Fishing Gazette" says:—"This combination will prove most valuable to Anglers. These brogues fulfil admirably all the purposes for which a brogue is needed, and they will unquestionably be found one of the most durable articles of the kind upon the market."

CASH PRICE 28/6.

The LEATHER & RUBBER BOOT Co. (Scafe's Patent), Ld.,
Manufacturers of Scafe's Patent Shooting, Coursing, Golfing, and other Boots,

Sales by Auction.

TO FISHERMEN AND OTHERS.

MR. T. G. TARGETT (deceased) Blenheim Place, Wilton Road, Salisbury.

JOHN T. WOOLLEY is instructed by the executors of the late Mr. T. G. Targett to Sell by Auction, on the premises, on Wednesday, July 22nd, 1891, a very valuable Collection of OIL PAINTINGS, including 20 works by the late Mr. T. G. Targett, who was awarded a Silver Medal and a Diploma at the International Fisheries Exhibition, 1883, and who was so deservedly renowned as one of the greatest Piscatorial Artists of the day. The Sale will also include about 50 Oil Paintings by other Artists, a number of valuable old Engravings, Prints and Water Colours, also a choice collection of OLD CHINA; and on Thursday, July 23rd, the whole of the Household Furniture and other effects.--Catalogues of the Auctioneer, the Castle Auction Mart, Salisbury.

HANTS.—ON THE RIVER ITCHEN.

Four Miles from Winchester.

MR. JAMES HARRIS has been favoured with instructions from the Trustees of the Will of the late Benjamin Nevill, Esq., to SELL by AUCTION, at the Royal Hotel, Winchester, on Tuesday, July 21st, at four o'clock precisely (unless suitable offer should be made), The valuable FREEHOLD PROPERTY known as "The CHILLAND ESTATE," close to the Itchen Abbas Station, and four miles from Winchester and Alresford, comprising two very substantial FAMILY RESIDENCES, a capital corn mill with miller's house and premises, the Farm House with Homestead and nine Cottages, and an area of about 220 Acres of very fine Water Meadows, Pasture and Arable Land, with three-quarters-of-a-mile of splendid fishing in the River Itchen. Also a well-secured Ground Rent of £25 a year. The main road from Winchester to Alresford bisects the estate, and the land offers many valuable building sites for erection of residences in this favourite locality.

Full particulars with plan and conditions of sale may be obtained of William Collins, Esq., solicitor, Winchester; of Mr. Charles Young, land agent and auctioneer, Alton; or of Mr. James Harris, auctioneer, land agent, and surveyor, Winchester.

HORSEBRIDGE, HANTS,
Close to the Station.

Notice of Sale of COTTAGE RESIDENCE, With Land, and Fishing in the River Test, with early possession.

MR. JAMES HARRIS is favoured with instructions from Mr. Robert Wyeth to SELL by AUCTION, at the ROYAL HOTEL, Winchester, on TUESDAY, July 21st, 1891, at four o'clock precisely.—The very comfortable COTTAGE RESIDENCE, with about 5 acres of land attached, and capital fishing in the River Test, situate at Horsebridge (within 200 yards of the station), as now in the occupation of Arthur Knox, Esq., and specially adapted for a Hunting or Fishing Box.

Full particulars, with conditions of sale, may be obtained of Messrs. F. I. and J. C. WARNER, Solicitors, and of the Auctioneer, Winchester.

FEUGH AND DEE.

TEMPERATURE: ITS BEARINGS ON THE "RUNS," AND TRAVELLING PACE OF THE MIGRATORY *SALMONIDÆ.*

By W. Murdoch.

Given frequent pushes of water at the right time of the year, and, for its size, this stream is one of the best grilse plenished waters in the whole of Scotland. It is now about twelve years since I first became acquainted with it, and saw the grand fishing which, when the water is right and fish are up in plenty, it gives in its proper short season. That season, it may be stated, is from the 18th or 20th of June to the 10th or 12th of July.

Frequently I have pointed out that if, owing to an insufficient body of water, salmon, grilse, or sea trout are kept from ascending at the time they first incline—the natural time—they do not afterwards, even supposing they run in as great strength as they would have done in their proper season, take with anything like the freeness which is shown by undelayed fish that are quite fresh run, or but a few days up from the sea. In corroboration of this statement of fact, the Feugh grilse and sea trout fishing furnishes conclusive evidence.

The Feugh is a mountain stream of Kincardineshire, and an important tributary of the Dee, which it enters about twenty miles from the sea. It flows in the main through a pretty expansive valley, and to many parts of it the lines of the poet, which rendered another stream more famous, pretty accurately apply—

> "You may trace it through the valley
> By the rushing in the springtime,
> By the alders in the summer,
> By the white fog in the autumn,
> By the black line in the winter."

Before sport can be got fish must be up! This will be admitted. Plenty descend in spring and plenty ascend in autumn, but these are neither worth-taking fish, nor fish worth taking. The Feugh is a summer river pure and simple; its right season is at the time stated. This will scarcely be properly understood by those who have no belief in the fact that the runs of the migratory *Salmonidæ* are influenced by temperature. In spring many thousands of fish running the Dee pass the mouth of the Feugh, which not a single one enters till May. This is remarkable; but not until the temperature of the Feugh gets to be about as high as that of the Dee do any fish run up the former. When this state of matters is reached they run about equally freely up both, though only, however, for a short time. The volume of water in the latter must on ordinary occasions be six or seven times greater than that in the former. Yet strange it is that when it is the best time for the Feugh's fishing, and the Feugh is somewhat more flooded for its size than the Dee, scarcely a fish on the run will show a preference for holding on up the larger river. Till the temperature of the two rivers becomes equalised, all the fish hold up the Dee. During most of May and into June a bit, the water in both rivers usually has about an equal temperature. Afterwards, for a long time, the Feugh again has almost constantly the lower temperature. But this temperature it would now seem is more to the taste of the fish than the higher temperature of the Dee. Were it not so it is natural to infer that the mass of the fish would go up the greatly larger river instead of turning out of their straight along and free course abruptly to the left to ascend the feeder. It is obvious that when the water has reached a certain point of warmth the fish show a marked disposition to steer clear of it. The same fact is apparent when the temperature is down below a certain degree. In the case of the Dee and the Feugh—two connected waters, both accessible to the fish—this is strikingly exemplified. Rarely at any time during the whole long time of the year, say from January to August, does the Feugh register a higher temperature than the Dee. Between spring and summer, that is in May, it may, now and again, vary to have a temperature a degree higher, but this is the utmost of the exceeding limit. In spring its water, which at this season of very low temperature is colder than that of the Dee at the confluence, is shunned by the fish, which all pass on up the Dee; while in summer its water, which then also, in the warm weather, has a lower temperature, is preferred to that of the Dee, which running a greatly longer distance exposed to the bright sun, has, when it reaches the Feugh, the higher temperature—a temperature distasteful to the fish as evinced in a very remarkable degree by their almost universal preference for pushing up the Feugh.

The Feugh, as I have already remarked, is a purely summer angling stream. It has only one natural migration of fish—a summer one, as will be understood. The fish found in it in the spring months are the descending kelts, and those noticed going up it in the autumn are the delayed back-lying fish, now filthy discoloured beggars. No salmon—large, bright, and sound—such as ascend the Dee in the autumn past its mouth in thousands, seek its waters. It is a short-seasoned river—as short a seasoned river as one could well imagine; it is fickle also—cannot be depended on. Unless frequent good pushes of water come within the three weeks of its really good time the season will pass without almost anything being done. It does not keep in right fettle for fishing for more than a few hours at a time, unless, indeed, rain should happen to keep on falling heavily for some hours at intervals during the day and night. When the state of matters is such the fishing is best. Once on a time the water stood up well even for some days, but since drainage on the hills of the water-shed became so extensive, it runs out as quickly as it floods, and this it takes precious little time to do.

In summer what a speed the fish must come, in running up river, compared with that which marks their journeying in spring. With a fairish water to run in—a water just the thing for good angling—they seem to run fastest. Let such a circumstance exist, and they will swim from the sea at Aberdeen to the Bridge of Feugh at Banchory, a water run of nearly twenty miles, in eight to nine hours. In the heavier and very much colder water of early spring, most of them take little under a week, and many a longer time to run the same distance.

The Bridge of Feugh spans the stream immediately below the falls—which picturesque sight is only some three hundred yards higher up the Feugh than its entrance into the Dee. A pretty heavy spate occurring within the period mentioned at the commencement of this sketch will insure good sport, provided of course that other conditions and circumstances which are inseparable are conducive to the same end. Should Dee and Feugh both run high, the Feugh for its size higher than the Dee, there is certain to be better fishing than if only the Feugh was flooded. And why? Because the Feugh, however much flooded, will not raise the Dee appreciably. The large broad river below the confluence seems only a trifle changed in colour—nowise increased in size—by the flood of its tributary. Such being the case, the fish do not readily run it, and so are not passing on to the Feugh in sufficient numbers to give good sport. Both waters (the Dee especially) require to be in good volume, and when such is the case the fish if they get away during the weekly slap, or can dodge the netters at other times, run merrily. With a heavy flood on a Saturday in the Dee—the water running down quickly by six or seven o'clock—the mass of grilse, which owing (it is assumed for the purpose of illustration) to great drought for days before, had congregated near the mouth of the river, will begin early in the evening and continue during the night to run splendidly—making all haste for the brown freshened water of the Feugh. The first—a detachment of say a dozen or twenty fish—of a shoal leaving the Dee (seen crossing the fords at Aberdeen) between seven and eight o'clock will, with a fast swimming water get to the Bridge of Feugh about four o'clock on Sunday morning.

I hope to give, in next week's paper, an account of the worm rolling in the Bridge of Feugh pool for salmon, grilse, and sea trout, which was the subject, when I commenced this article, that I intended to make much the most prominent one.

FISHING IN ITALY.

By Rux.

In ancient days no Roman banquet was complete without its fish course, and most lavish prices were paid for turbot and mullet. The Romans used oysters from Britain with their pickled tunny, whilst turbot, mullet, sturgeon, char, eels, lamprey, and pike formed part of the patrician's first course. The taste of the Roman gourmet for fish was so fine, that various kinds were selected from different waters, and placed in fish-ponds, where they were preserved and fed for table. Neither were the Epicureans content with the supply from the Mediterranean and the lakes and rivers of Italy, but fish was imported from Greece, Egypt, Britain, and the Danubian provinces. Lucullus, we are told, dug large trenches or canals from his fish-ponds to the sea near his house at Tusculum, in the Gulf of Naples. Fresh water ran down the canals to the sea, and up them sea fish which spawn in fresh water ascended to deposit their ova. When the fish had entered, the gates at the entrance of the canals were closed, and while the eggs were hatching into young, the parents which had spawned were used for food.

The Italian fisherman is strictly conservative, and his manners, habits, and customs are, in all probability, similar to those of his forefathers five hundred years ago.

In past generations grand *fêtes* and fish carnivals took place every year during Lent, the principal one being held by the inhabitants who lived in the vicinity of the lagoons at Commachio, at the mouth of the River Po. The great eel farm at this point is one of the specialities of the fishing industry which were common a few centuries ago, and is still in existence.

The inhabitants of the Italian sea-board have always been famous as fishermen with nets, and a large proportion of the population of the present day not only follow, but are very expert in the ancient craft.

If historians be correct, in past ages fish abounded in the Mediterranean, and the old proverb says: "There is as good fish in the sea as ever was taken out of it." They must, however, have vastly decreased, both in size and numbers, and this I judge from the catches of fish I have seen taken on several occasions at Genoa, Naples, and other seaports. The draft on each occasion consisted of small fry, no larger than whitebait, also a few crabs. I believe exception proves the rule, and during the months of May and June the Italian toilers of the deep reap a large harvest. During this period the tunny fish move along the shores in large shoals, seeking suitable spots wherein to deposit their spawn. A sentinel is kept continually on the watch from a lofty eminence, and, on perceiving the "school," warns the inhabitants, who at once make ready their boats and nets, and proceed to the spot indicated.

The fresh-water fishing in Italy will in no way compare to that of countries in the north of Europe. In Italian rivers netting is prohibited from April to the middle of October. This law is, however, not strictly enforced, and is often ignored altogether. The fish are not protected in the estuaries of rivers, and the mesh of the nets in general use are so small as to catch even the smallest of fry. Everything is fish that comes to the Italian fisherman's net, and instead of returning to their native element those fish which are of no use for food, he prefers to start a miniature aquarium, but this undertaking has never been attended with any success. Under such circumstances it is not to be wondered at that fish which leave the sea to spawn in fresh waters are scarce, and the streams of Italy afford but little sport to the angler.

Although the Roman patrician had a gastronomic taste for fish, it is not recorded by ancient writers that he or his plebeian brethren were true lovers of the gentle art.

The Italian aristocrat of the present day has on more than one occasion given ample proof of his powers with the gun, but I have yet to learn that he is a keen disciple of Izaac Walton. Occasionally at sea-port towns a few of the Lazaroni, who seem to enjoy poverty and idleness, may be seen stretched at full length on the cliffs, with their bamboo rods stuck between the rocky crags, whilst their lines, supported by small corks, listlessly float on the tideless sea. For a time the fisherman eagerly watches in hopes of a bite, but eventually the heat overcomes him, and the end is peaceful slumber and no fish.

Although the principal rivers of the "Sunny South" afford but little sport to anglers, tourists to Italy who are enthusiastic lovers of the rod may, if they wend their way to the Italian lakes, obtain some little return for their time and money. Lakes Como, Garda, and Lugano are full of fish, amongst which is a species of large trout, weighing from 10lb. to 20lb. That these fish have not been exterminated is due to the great depth of the lakes (900ft. to 2,000ft.), and as the trout generally swim some 300ft. below the surface of the water, the nets are of no avail. The Italians had for years given up all hopes of catching trout, and it was not till an ingenious English angler showed them the way that but few of these splendid fish were taken.

The best time for trout fishing in the lakes of Lombardy is in September and October. They can also be caught before daylight in the summer, but during the months of April and May, which is the spawning season, these fish cannot be hooked with even the most tempting bait. For this sport a flat-bottomed boat is required, as also a strong line some two hundred yards long. One end of this line is fastened to a winch, fixed in a frame a few feet above the gunwale of the boat. The other end of the line must be leaded, and at intervals, say of one hundred feet, smaller lines are tied on with hooks attached which are baited with a kind of small fresh-water herring; the whole tackle is then gently dropped over the side of the boat, which is quietly rowed along.

Besides trout two kinds of fish, known respectively to the Italians by the names of "Pigo" and "Scardola," frequent the lakes of Northern Italy in large numbers. The first-named (Pigo) are a very voracious fish, and when on the feed will take any ordinary bait, and even the fly. The Scardola is a species of roach, and sometimes affords a little sport to the angler. In Lake Como carp are also plentiful, and are occasionally caught weighing 200lb. Although all the lakes in Lombardy are well stocked with the different fish already named, The most suitable water for the lovers of the rod is the romantic Lake Iseo, and I am also given to understand that there is some fair trout fishing to be had in the Sesia river, near to Vorallo, as also in the streams that run through the Sermenta and Mastelone valleys.

There is good hotel accommodation at many of the villages situated on the several lakes in Lombardy, and the various routes by which these waters can be reached are given in Murray's "Handbook of Northern Italy."

In summing up the chances of sport in Italian waters, the angler must not be disappointed if the fishing in Italy does not come up to the standard of other countries, but he will be compensated in a measure by the romantic scenery and lovely climate of the lakes of Lombardy.

A TREATYSE OF FYSSHYNGE WYTH AN ANGLE.

By Dame Juliana Berners.

Written Four Hundred Years Ago.

We think our readers will be interested in our reprint of the oldest work in England on the art of angling, published nearly four hundred years ago, and a hundred and fifty years before Walton published his "Compleat Angler." The *Bibliotheca Piscatoria* thus refers to this interesting work:—

"Dame Julyans or Juliana Barnes, Bernes, or Berners, to whom treatises are ascribed, is supposed to have been a daughter of Sir James Berners, of Roding Berners, in the County of Essex (a favourite of Richard the II.) who was beheaded in 1388. It is said that she was celebrated for her learning and accomplishments, and that she held the office of Prioress of the Benedictine Nunnery of Sopwell, near St. Albans, but as far as we can learn, these statements rest on pure conjecture on meagre inference. The first edition of her Book of St. Albans, was printed by the schoolmaster printer of St. Albans, in 1486, and was one of the first books printed in English. Here begynneth a treatise of fysshynge with an angle [Colophon:] Here endeth the boke of Fysshynge with other dyvers maters. Imprynted at London, by Wynkyn de Woode, dwellynge in Flete-street, at the synge of the sonne. [Circa 1500.] 4º. Black letter A to D IV. The woodcut of a man angling is under the title. This edition appears to have been published as a "lytyll plaunflet" notwithstanding the caution of the authoress against this course, given the concluding paragraph of the treatise in previous editions, which in this instance is omitted. "And for by cause that this present treatyse sholde not come to the hondys of eche ydle persone, whych wolde desire it yf it were enprynted allone by itself, and put in a greter volume of dyverse bokys concernygne to gentyll and noble men to the entent that the forsayd ydle persones whyche sholde have but lytyll mesure in the sayd dysporte of fysshynge sholde not by this meane vtterly dystroye it."

This edition varies the orthography and has some slight corrections of the text and some omissions. The only known copy which was formerly in the Harleian collection subsequently passed through the hands of Mr. Gulston, Mr. Ratcliffe, Mr. Haworth, and Mr. George Wilkinson.

Salamon in his parablys sayth that a good spyryte makyth a flourynge aege, that is a fayre aege and a longe. And syth it is soo: I aske this questyon. Whiche ben the meanes and the causes that enduce a man into a mery spyryte? Truly to my beste dyscrecion it semeth good dysportes and honest gamys in whom a man toyeth without ony repentance after. Thenne folowyth it, ye gods, dysportes and honest games ben cause of mannys fayr aege and longe life. And therfore now woll I chose of foure good dysportes and honest gamys, that is to wyte: of huntynge: hawkynge: fysshyne: and foulgnge. The best to my symple dyscrecion why then is fysshynge callyd anglynge wyth a rodde, and a lyne and a hoke. And therof to treate as my symple wytte may suffyce, both for the sayd reason of Salamon and also for the reason that phisyk makyth in this wyse (*Si tibi deficiant medici tibi fiant: hac tria mens leta labor et moderata dieta*). Ye shall vnderstand that this is for to saye, Yf a man lacke leche or medycyne he shall make thre thynges his leche and medycyne: and he shall nede never no moo. The fyrste of theym is a mery thought. The second is labour not outraged. The thyrde is dyete mesurable. Fyrste that yf a man wyll ever more be in mery thoughtes and have a gladde spyryte, he must eschewe all contraryous company and all places of debate where he myghte have ony occasyons of malencoly. And yf he woll have a labour not outrageous he muste thenne ordeyne him to his hertys ease and pleasaunce wythout studye pensyfnesse or traneyle a mery occupacyon whyche may reioyce his herte: and in which his spyrytes may have a mery delyte. And yf he woll be dyetyd mesurably he must eschewe all places of ryotte whyche is cause of surfette and of syknesses, and he must drawe him to places of swete ayre and hungry, and etė nourishable meetes and dyffyable also.

Now thenne woll I descryue the sayd dysportes and gamys to finde the beste of theym as veryly as I can, alle be it that the ryght noble and full worthy prynce the Duke of York, late callid mayster of game hath discryued the myrthes of huntynge like as I thynke to dyscryue of it and of alle others. For huntynge as to myd entent is to laboryous. For the hunter must alwaye reune and folowe his houndes: traveyllynge and swetynge full sore. He blowth tyll his lyppes blyster, and whan he wenyth it be an hare full oft it is an hegge hogge, thus he chasyth and wote not what. He comyth home at euyn rayn beten pryckyd, and his clothes torn wete shode all myry. Some hounde loste: some surbat. Suche greues and many other hapyth vnto the hunter, whyche for dyspleysaunce of theym yt lone it I dare not reporte. Thus truly me semyth that this is not the beste dysporte and game of the sayd foure. The dysporte and game of hawkynge is laboryous and noyouse also as me semyth. For often the fawkener loseth his hawkes as the hunter his houndes. Thenne is his game and his dysporte goon. Full often cryeth he and whystelyth tyll that he be ryght euyll a thurste. His hawke taketh a bowe and lyste not ones on hym rewarde. Whan he wolde have her for to flee: thenne woll she bathe, with mys fedynge she shall have the Frouse: the Rye, the Cray, and many other syknesses that brynge theym to the Sowse. Thus by prouff this is not the beste dysporte and game of the sayd foure. The dysporte and game of fowlynge me semyth mooste symple. For in the wynter season the fowler spedyth not but in the moost hardest and coldest weder: whyche is grevous: for whan he wolde goes to his gynnes he may not for colde. Many a gynne and many a snare he makyth. Yet soryly dooth he fare. At morn tyde in the dewe he is weete shode vnto his taylle. Many other suche I could tell: but drede of magre makith me for to lene. Thus me semeth that huntynge and hawkynge, and also fowlynge ben so laborous and greuous that none of theym maye perfourme nor bi very meane that enduce a man to a mery spyryte: whyche is cause of his longe lyfe acordynge unto ye sayd parable of Salamon.

Dowteles thenne foloweth it that it must nedes be the dysporte of fysshynge wyth an angle. For all other manere of fysshyng is also laborous and grevous, often makynge folkes ful wete and colde, whych many times hath been cause of grete infirmytees. But the angler may have no colde nor no dysease nor angre, but yf he be causer hymself. For he maye not lese at the moost, but a lyne or an hoke, of whiche he maye haue store plentie of his owne makynge, as this symple treatyse shall teche hym. Soo thenne his losse is not greuous, and other greyffes maye he not haue sauynge, but yf ony fysshe breke away after that he is take on the hoke; or elles that he catche nought: whyche ben not greuous. For yf he faylle of one he maye not faylle of a nother, yf he dooth as this treatyse techyth; but yf there be nought in the water. And yet atte the leest he hath his holsom walk and mery at his ease. A swete ayre of the swete sauoure of the meede floures: that makyth hym hungry. He hereth the melodyous armony of fowles. He seeth the yonge swannes: heerons: duckes: cotes and many foules wyth theyr brodes, whyche me semyth better than alle the noyse of houndys: the blastes of hornys and the scrye of foulis that hunters: fawkeners and fowlers can mak. And yf the angler take fysshe: surely thenne is there no man merie than he is in his spyryte. Also who soo woll vse the game of anglynge: he must ryse erly, whyche thyng is prouffytable to man in this wyse: That is to wyte: moost to the heele of his soule. For it shall cause hym to be holy, and to the heele of his body. For it shall cause hym to be hole. Also to the encrease of his goodys. For it shall make hym ryche. As the olde Englysshe prouerbe sayeth in this wyse (who so woll ryse erly shall be holy, helthy, and syely). Thus haue I prouyd in myn entent that the dysporte and game of anglynge is the very meane and cause that enducith a man in to a mery spyryte. Whyche after the sayde parable of Salamon and the sayd doctryne of phisyk makyth a flouryng aege and a longe. And therefore, to al you that ben vertuous: gentyll: and free borne I wryte and make this symple treatyse, folowynge: by whyche ye may haue the full crafte of anglynge to dysport you at your luste: to the extent that your aege maye be the more floure and the more lenger to endure.

(To be continued.)

BRIGHT WEATHER SALMON AND GRILSE FLIES.

Mr. Wm. Murdoch, of Crown-street, Aberdeen, writes: "I send you a set of my bright weather salmon and grilse flies, and may you have much luck with them! What think you of the flies and the tying?" The flies are—

Green Peacock }
and }
Variety of same. }
Fail Mo Never.
Golden Wasp.
Blue Charm.
Golden Blue.

They are all first-rate, the Blue Charm and Fail Me Never being our favourites. On the 16th May this year we gave a full description of these flies. Mr. Brown, George-street, Aberdeen, and Mr. James Wright, of Sprouston, Kelso, dress them; and both make a speciality of Mr. Murdoch's loch and sea trout flies for Sutherland and northern and north-western Highlands. We are very much obliged to Mr. Murdoch for the set, which make us wish we were on a grilse river instead of listening to a thunderstorm in London.

Two Fish on the Same Bait.—"In last week's issue, under the above, a curious incident of two perch being taken at the same time on a spinning flight is stated, and the writer asks if such a similar experience has been met with. Whilst fishing one of the small lochs, I believe Loch Fad, near Rothesay, Isle of Bute, about four years ago, I took two perch, about ¾lb. weight, with a Derby Killer, such as is used for salmon, whilst spinning. The perch were caught one on each of the side triangles, and were evidently seizing the bait from opposite sides at the same time.—Richard Clarke, hon. sec. to the Burton-on-Trent Angling Association."

Black Forest.—There is good fishing to be had in the Black Forest on the Murg. Headquarters at Gernsbach, Pfeiffer's, or other hotel, according to choice. Go to Baden-Baden, where you can get your fishing ticket and your police permission, both of which it is always necessary to carry with you. Drive from Baden-Baden to Gernsbach. From this place you can fish up to Forbach, and by taking another ticket fish in the water rented by the town. The ticket gives permission to fish below the town water. If "G. W." likes, Pfeiffer, the landlord of the hotel, will buy his fish from him, sending a boy with large can to keep them alive, as they are turned from the can into a tank to be kept till wanted for use. The hotel is not very expensive.—"*M. M. R.*" *in* "*The Field.*"

ROACH FISHING.

"In concluding our remarks upon the roach, it is advisable to consider the question whether gut or hair is the more suitable for the bottom line. Mr. Fennell, in his book on roach-fishing, gives the following opinion of a friend of his, who had great experience on the subject. He says:—

"'I can fully corroborate the experience of those who find hair far superior to gut for fine fishing, and I never use anything else for bottom fishing, except among heavy barbel. I have frequently, on the Thames, killed two, three, and four for one when fishing alongside a friend who used the finest gut. The strength of hair is far greater than is generally supposed—one of moderate quality will lift a pound weight; and it may be obtained occasionally capable of lifting 2lb. Now, few roach rods will take a strain of half a pound without injury; therefore the only risk is in striking, which throws a far greater stress on the line than killing a heavy fish. Striking with a long rod in still water, with the top over the float, is a very different matter from striking in a heavy stream with from 6ft. to 10ft. of water, where a long line is indispensable, and the strikes must be quick and sharp. In fishing such places I use a light rod, Nottingham fashion, about 10ft. long, made with deal butt and lancewood top, a quick reel, very fine silk line, weighing one-eighth of an ounce to the hundred yards; at the bottom of this I have about one yard of twisted human hair, then a yard of single horse-hair, and the hook wrapped on to a length of the finest hair. The hair is always looped together, additional strength being thus obtained at the weakest part; before whipping the loop, a knot should be tied near the end, the whipping being carried past it; this is necessary with hair to prevent it slipping, but not with gut. The silk used should be slightly waxed, and the whipping varnished; the best varnish for this purpose is made by dissolving gum damar in benzole, this unites with the wax and dries very quickly. I believe the inferiority of gut in clear water to arise from its much greater refractive power, as may be readily seen by putting some gut and hair together in a tumbler of water. I was first led to notice the great advantages of hair by seeing a man use thick black hair on the river Trent at a time when the water was as clear as crystal; he told me he had used it for many years, that he preferred it for its great strength, and because it was not noticed by the fish in the water so much as white hair. I have often tried it with success, but prefer hair of a natural shade of cinnamon, sorrel, or chestnut; hair of the latter colour being finer and rounder.'

"Salter, another authority on roach-fishing, writes thus:—

"'In respect to the advantage arising from angling with lines made of single horse-hair, and hooks tied to the same, over those which are made of fine gut, some difference of opinion exists among anglers. The advocates for gut say, when it is equally fine and of the colour of horse-hair, it is not likely to alarm fish any more than the latter, and being much stronger, it certainly deserves the preference. This seems plausible; but I know from practice that fish may be taken when angling with a single horse-hair—especially roach—that will not touch the bait when offered with a gut line, though the line shall be as fine and of the same colour, &c., as the hair one. To ascertain the fact, I have several times taken off my hair line when roach have been well on the feed, and put on one of gut. I could then hardly get a fish. Again, I have changed again for the hair line, and again had excellent sport. Such has invariably been the case with me and many experienced anglers of my acquaintance; therefore I should most certainly recommend hair to those who fish for roach, &c., and assert, without fear of contradiction, they will kill nearly two to one to others who use gut, however fine it may be.'

"Now, I used to be a great believer in hair myself, in fact, used to use nothing else, either for fly or bait fishing; but of late years good single-hair has become so exceedingly scarce that I have taken altogether to the use of the finest drawn gut of the very best quality. Flat hair is more visible, I contend, than drawn gut, and there is no comparison in the strength."—"*Halcyon,*" *in* "*Leeds Weekly Mercury.*'

Notes

NORFOLK BROADS PROTECTION SOCIETY.

Dear Sir,—Will you kindly give *prominent* notice, in your next issue, to the fact that the meeting at Ye Pluckie Percho headquarters, on the above question, has been altered by Mr. Woodrow from the 15th instant to Monday next, the 13th instant, at 8 p.m.; and oblige, yours faithfully,

H. Richardson,
July 8, 1891. Hon. Sec., Ye Pluckie Perch P. S.

A sale of oil paintings of fish by the late Mr. T. G. Targett will take place on July 22 at Mr. Woolley's, the Castle Auction Mart, Salisbury. This sale offers a chance to collectors such as will probably never occur again. Some of the best works of the artist will be in the sale.

A correspondent writes: "I personally wish you could give us some hints when and with what wind, weather, and atmospheric conditions to use the various patterns of flies, which are acknowledged really good, all-round killers in loch fishing, in Scotland more particularly. I mean something that would be a guide when to use a Claret and Mallard, and when to use Green and Mallard or Scarlet and Teal. I have talked it frequently over, and everyone has a kind of rule-of-thumb idea. I think that so frequently the use of Zulu, Magenta, and Scarlet and Teal, is empirical."

It is reported that never was poaching so persistently and extensively carried on, on the Aberdeenshire trout rivers, as it has been most of this year. As a consequence, many waters have had to be staked. Where the water is deep, stakes serve admirably to frustrate the poacher's intentions, but in shallows they can be easily got at and lifted out. The poaching adepts use a small mesh net of silk, which they stretch across the water, one poacher holding the (attached) line at the one end, and another at the other. The net being so fine, they can feel the slightest touch of a fish, which when felt, they haul in. The net is never "booled." The plan is to haul it down the river between two poachers, one of whom when a fish is found to have struck draws it to him. The fish if startled run up stream—and where, for stones, the net cannot be got to sweep the water satisfactorily, it is stretched across stream at a clear place and one or two poachers go into the water and stir up the fish from under the banks and amongst the stones. They thus drive them up into the net. It is a mistake to think, as many do, that they drive the fish down stream. The fish persist in running up. Two or three poachers thoroughly up to the game will clean the largest and longest unobstructed pool or stream of Don or Deveron completely of its sizeable fish in ten minutes. Smart work! But they know how to do it.

A Langholm correspondent writes: "Of late the river Esk has been in grand ply from the weather, which has at last broken, being very showery. The water is kept just right for worm or fly. A good supply of sea trout have ascended. Anglers who get up early in the morning have much the best chance." It is a case of "The early bird picks up the worm"!

Of late thunder showers have been pretty frequent over most of Scotland, and as a result the great bulk of the summer angling rivers have filled and freshened, though in but few cases sufficiently to clear out the sun and heat induced filth accumulated during the recently ended long spell of dry bright weather. Till this filth has been thoroughly swept away by a roaring flood, there is little chance of the angling proving really good. The showers, however, in the case of all rivers which have a summer run of sea trout, have caused the sea trout, where not before begun, to begin ascending. Grilse have almost everywhere been showing a great desire to push inland. Estuary and tidal net-fishing has accordingly been doing remarkably well.

With a few deft hands and old frequenters the Cabrach waters of the Deveron this past spring fairly lost their good name for trouting. In April and May the weather for most of the time was wretched. Snow often fell, and there was a deal of it lying on the mountains near at hand. Besides these sport-precluding conditions, it was evident that the poacher netter, and the trout-lifter had been responsible for a great decrease in the number of good-sized fish. Lately, however, matters have mended somewhat. Rain fell daily for a week on end, and some very fine trout, with an occasional grilse and salmon, rewarded one or two anglers fishing below the Blackwater's junction with the Deveron.

OUR correspondent, Mr. Donald Watson, 19, Inglis-street, Inverness, writes about what seems a nice place in that fine highland glen, Glen Urquhart. It is a house suitable for a fair-sized party or family. The accommodation is two sitting rooms, six bedrooms, kitchen, &c., and the adjuncts are use of garden, pony and trap when required, salmon and trout fishing free on loch and river, and some rabbit shooting. Mr. Watson adds, "You can recommend the place as a very good one. Both on Loch Ness and the Urquhart river sport is excellent at present, and on the latter it will continue so till the end of September."

THE season runs on apace, and still in most localities in Scotland sea trout seem to be scarcer than usual.

UP till the other week the bulk of the Scotch grilse looked fine, healthy, well-fed fish, but since then a large number of thin, rather kelt-looking grilse have been netted in not a few districts. All round, this should now be about the time for the flush of the "crop" of these fish.

THE Tay is the only river in Scotland which has four seasonal migrations of salmon. The Thurso, Naver, and Helmsdale, with their runs of spring, summer, and winter fish, have the same number of salmon migrations as *naturally* have Dee, Spey, Don, Deveron, &c., with their *three*, of spring, summer, and autumn fish, the latter brood or gravid, and on their way to the spawning grounds.

Notes and Queries

A WELL-KNOWN figure to Shrewsbury anglers, whose shady attire, primitive rod, and rude tackle were as striking as they were effective, has just passed away in the person of Tench, an old Italian, who has for years fished the Severn in the neighbourhood of Shrewsbury. The deceased was seen to jump into the river, near Frantwell, on Thursday week, and was quickly drowned. The river has been dragged to a distance of a mile below the spot, but the body has not yet been recovered.

HAY FEVER.—The disciple of Izaac Walton, who is also subject every summer to an attack of that curious malady—hay fever, is indeed in a pitiable plight. This disease has certain peculiar characteristics, among which are its tendency to be hereditary, and the singular regularity of its annual return. Its chief exciting cause is the aroma, or pollen of flowering grasses, rye, and hay; but it may frequently be brought on by a walk along a dusty road, and although damp in the atmosphere is what the sufferer should pray for in the early weeks of June, yet once the malady is started, not all the streams in England will suffice to wash it away. The symptoms of hay fever are somewhat varied, and many persons have suffered from it year after year, without knowing the real nature of their complaint. Frequently it bears so strong a resemblance to influenza, bronchitis, or asthma, as to be mistaken for one of those ailments. The patient usually has symptoms similar to those of severe catarrh, accompanied by paroxysms of sneezing, headache, catarrhal fever, and a general disturbance of the nervous system follow, and these all persist for probably six weeks of the finest out-of-doors this peculiar climate affords. The older medical text-books contain very little on the subject of this curious malady, and modern medical men have hitherto most unscientifically agreed to call it incurable. An American physician, however, has made a discovery which proves that this is only another case of glossing over our ignorance by calling that incurable for which we do not happen to know a cure. For a cure he has found. This is no other than the Carbolic Smoke Ball, which, during the past winter has become so famous in London as a cure for colds, bronchitis, asthma, and all diseases caused by taking cold. The Carbolic Smoke Ball acts homœpathically, and for a short time appears to aggravate all the symptoms with which sufferers from hay fever are so familiar; but it gradually exerts a soothing effect on the irritated mucous membrane, and stops the burning flow of mucous from eyes and nostrils. And not only will it relieve an attack of hay fever, but it will, if inhaled in time, effectually ward off what has hitherto been looked forward to with dismay as an inevitable annual disease. Let the Waltonian therefore reckon his outfit incomplete unless he has invested half a sovereign in the purchase of a Carbolic Smoke Ball.

ANGLING EXCURSIONS.—Some of the orderly folk living in towns and villages visited intermittently by angling excursionists—say, from London or from any other large city and town, view the arrival of any number of amateur fishermen as an unmixed evil. Selfishness is not absent from the minds of certain of the local residents, because a certain type of provincial angler is desperately "Conservative" even over the free fishery; and if a reputable London or any other city's angling club should rent a water close by, the said provincial angler is far too prone to condemn *all* "excursionists" with rods, bait-kettles, and landing nets, as make-believe fishermen, who, getting no fish, set about to damage the growing crops, or break down rails, and make gaps in growing fences, from very devilment. Your provincial pessimistic angler thinks he has some reason on his side from the circumstances that a native of village or small town migrates to London, and perhaps develops the inanities of 'Arry, with a clumsy imitation of the dude. He returns home on a visit, not in an angling "excursion," but in the ordinary "parliamentary," assumes asinine airs, and generally conducts himself as to be a by-word and a reproach. Now, London, or Sheffield, or Leeds angling clubs, when organising a "pegged-downer," or "a go-as you-please" competition, the secretaries know the individual contestants; and men who readily submit to be limited to a certain number of yards, beside a river or rented water, are subjected to a training, so to speak, and if an inexperienced member should be among, the competing excursionists, he would be obliged to behave himself even if no fish smelt at his lure. Well, as angling will doubtless win more and more members of the middle and the artizan classes, the last-named at all events will have greater chances of sport by becoming members of recognised clubs, and "destructive" bumps will get reduced to a *minimum*. Anglers generally have several times in the *Fishing Gazette* been reminded how important it is that gates should be never left open, fences never injured, and also to remember that the tenant-farmers or the owner of waterside meadows, and growing crops can ill-afford to have their property damaged in any way, either by "excursionist" anglers, or the none too innocent local fishermen. But the warning is hardly needed nowadays, and seeing that working-men generally have more self-respect; and every order-loving member of the increasing angling clubs throughout the country must exercise a restraining influence on a larky adult or an occasional thoughtless schoolboy.—*Rusticus*.

A METHOD OF OLD FLY-TYERS.—"For many years I wondered why the old original tyers of salmon flies always selected the rarest and most expensive feathers for their flies. I think I can explain the "why" in at least one case and show that there was "method in their madness." In nearly every salmon fly with a mixed wing, the bustard feather is used when turkey would answer the purpose about as well. In examining a lot of these feathers lately, I put them under a strong glass and found them covered with little globules of oil, which exuded from their fatty skin, making them, to a certain extent, waterproof and very buoyant. As heavy, strong hooks are used for salmon flies, these two points are very essential. As such good judgment was exercised in regard to the bustard feather, certainly there must have been just as good reasons for the use of other rare and expensive feathers. Can "Silver Doctor" or any of your other readers throw any light on the subject?"—"Amateur," in "AMERICAN ANGLER." [This is somewhat like those admirers of a poet who find beauties in his work which he never dreamt of.—ED. *F. G.*]

BARBEL FISHING IN YORKSHIRE.—General anglers have experienced "a royal time," especially among chub and barbel. Tadcaster and Boroughbridge have been the chief scenes of these triumphs, one angler catching 75lb. of barbel in one day by fishing from the bridge at the latter-named place, and having an attendant below to net the fish for him. His bait was a curious one—in fact, long though my experience has been in every branch of angling, I cannot say that I ever heard of it being successful, or in fact, ever used in fishing for barbel. He simply used a dead gudgeon, allowing it to roll down stream with the current. My informant was told of this catch by the landlady of one of the inns. He was sure that she was mistaken and meant pike; but she was mighty indignant at being thought incapable of distinguishing between a pike and a barbel, and replied, "No'wt of t' sort; they all of them had whiskers," a graphic mode of description of the wattles characteristic of the fish in question. Mr. C. Parkinson has also had some capital sport; he had a mixed basket one day, weighing 9lb., and 15lb. another day.—"*Halcyon*," in "*Leeds Mercury*."

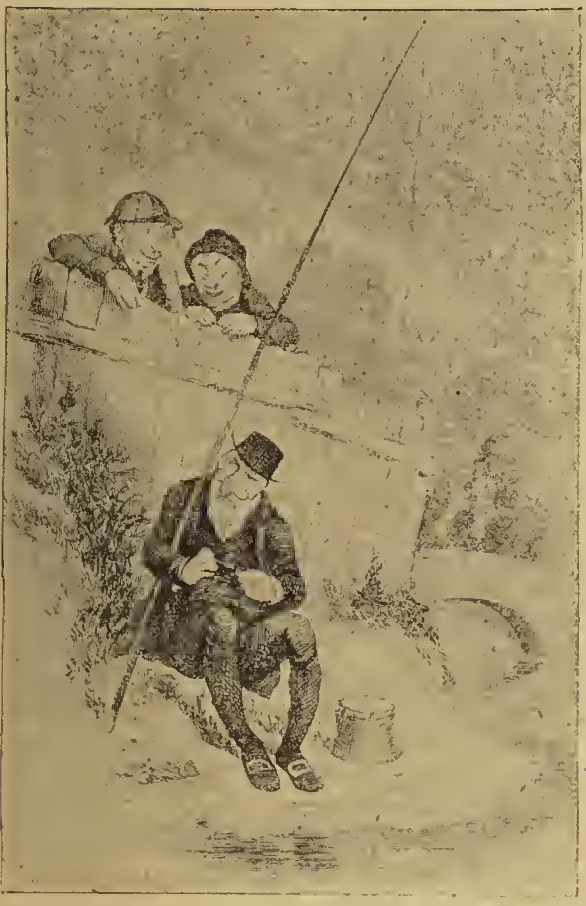
AN ANCIENT ANTON TROUT.—"I wonder if any of my readers can tell what the age of a trout may be? If such there be, he can exercise his ability in this direction by casting a look into the fish trunk at the Star and Garter Hotel, Andover, where he will see something which will rather puzzle him. A fish, with a head as large as a jack's, narrow body, about 2ft. in length, and weighing over 6lb., the colour and shape being so different to the fish usually taken out of the Anton that at first sight a fisherman of my acquaintance was doubtful as to what class it belonged. There can be no doubt, however, that it is a trout, and a very, very old one, and seeing that it was caught somewhat near what is known to fishermen as "Hamman's Corner," it is one that for seasons past—even as far back as the time when the late Colonel Earle fished this water—has been tried for by all the dodges known to fishermen. The poor old fellow cannot have had a very jolly time of it of late years, there being suspicious marks of a bracelet encircling its body. It is an illustration of the size which trout attain in this little stream of ours, as, looking at the length and apparent age of this fish, I don't think that I shall be far wrong in saying that at one time, when in its prime, it would have scaled 8lb. or 9lb."—*Andover Standard*.

SALMON FISHING DISPUTES.—In the Court of Session, Edinburgh, Lord Low last week disposed of two actions of interdict in regard to salmon fishings near Ness Castle. They were raised by Fountain Walker, of Ness Castle, against Geo. Paterson, salmon fisher, Markie Bay; and Wm. Turnor, tenant of those at Kincundy Point, in the Ness. As proprietor of the fishings in the Ness, Mr. Walker complained that respondents had for some time taken salmon from the estuary of the Ness by means of a click net, and that Turnor had fished in the high salmon fishing station adjoining the lands of Kincundy. Recently an interim interdict was granted on the grounds that the operations complained of were illegal, and in respect of no appearance for the defenders, the interdict was made perpetual, and the complainer found entitled to expenses.

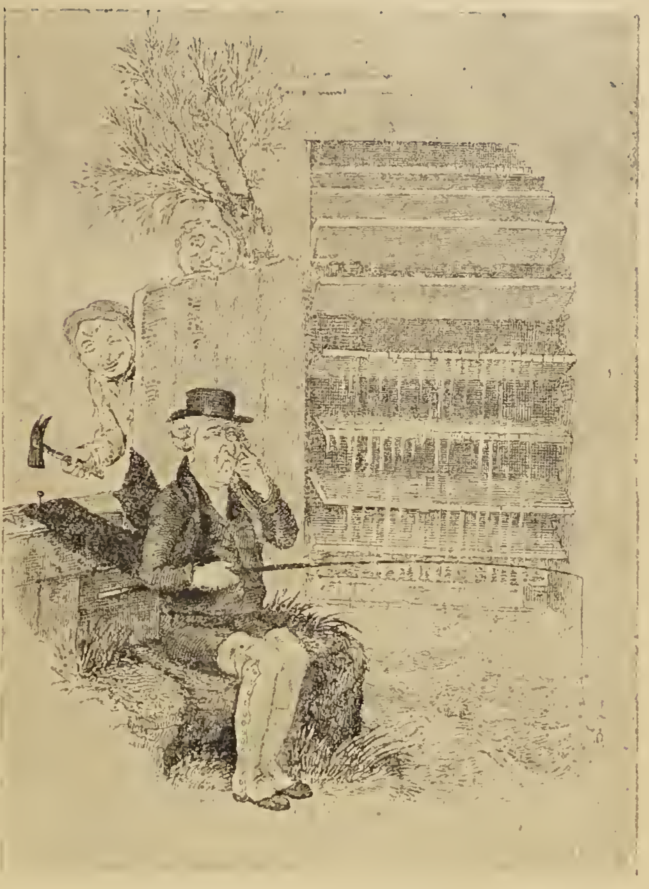
THE following has been recommended in the *Field* as a good recipe for exterminating the worms on a lawn, and it might be worth trying in dry weather, when worms for barbel fishing, &c., are almost unobtainable by the ordinary methods. Pour thirty gallons of water on 12lb. of slaked lime, stir, and let the mixture stand for four hours. Then sprinkle the grass with the mixture by means of a watering-pot, and the worms will come to the surface. But if it is not desired to altogether exterminate the worms (which the shade of Darwin forbid!) I would suggest not more than half the quantity of lime being tried to begin with.—TEMPLAR.

SKETCHES BY SEYMOUR.

— II. —



No. 5.—"Don't you be saucy, boys."

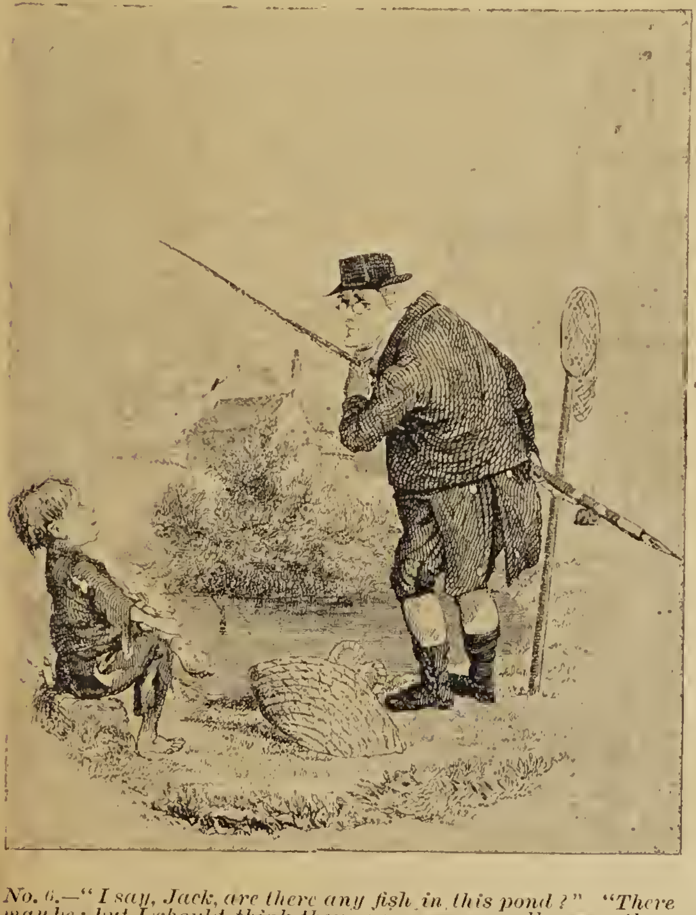


No. 7.—"This mill makes a plaguey hammering."

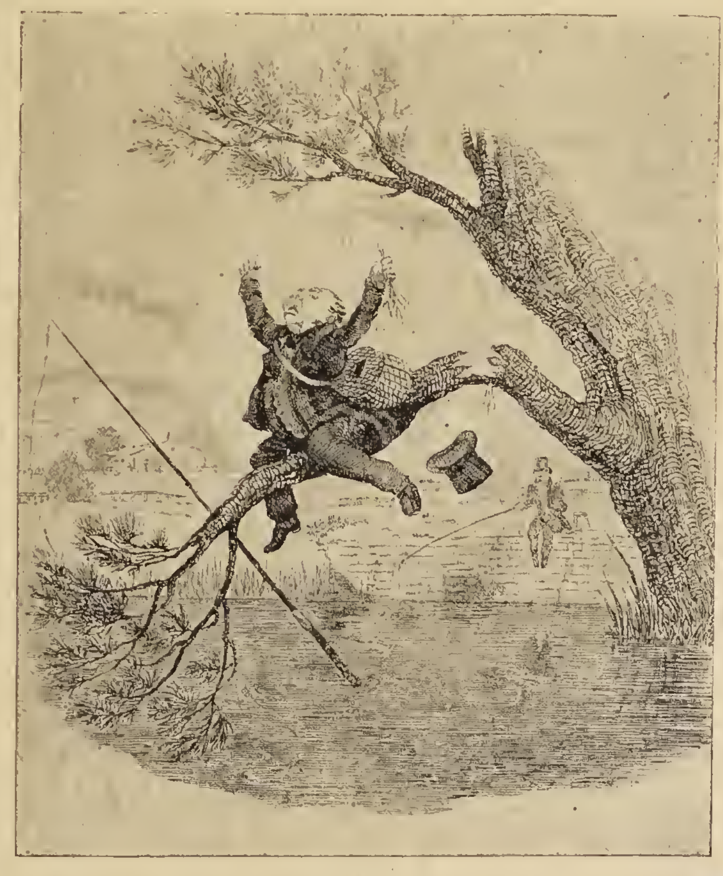
IN our issue of the 20th ult., we gave a condensed sketch of the career of Robert Seymour as an artist, and we now record one of the most important periods of his life. In the autumn of 1835 he had conceived the idea of publishing a series of humorous sketches of sporting life, blended into a connected story by assuming the different individuals to be members of a cockney club. Two or three publishing friends cordially approved his scheme, and he determined to proceed with it. He casually mentioned it to the energetic firm of Chapman and Hall, and they immediately closed with him.

The next object was to find a comic writer of adequate powers to furnish the letter-press; and Mr. Charles Dickens, who had already distinguished himself in humorous writing, under the pseudonym of "Boz," was finally the author engaged. Seymour, we are told, took home the volumes for his wife's critical opinion as to whether "Boz," "a poor and struggling author, would answer the purpose." His wife consented; and, after this, all the parties concerned met, and the first number of the now world-famed Pickwick Papers, containing four etchings by Seymour, appeared in due course. Its reception by the public, though not so unanimous as it became after the introduction of Sam Weller in the fourth number, was unequivocal; and the author, artist, and publisher could not but be elated. Mrs. Seymour thought all the success was due to her husband's sketches, and that Mr. Dickens would have been nowhere without them, or, to quote her exact words: "Consigned to obscurity for the remainder of his days, unless Mr. Seymour had permitted him to edit the Pickwick Papers." Everybody else will be apt to think that Mr. Dickens's writing had a great deal to do with it; but we must make large allowances for conjugal affection.

Mr. Dickens's own account of the origin of the "Pickwick Papers" may well be quoted here:—"I was a young man of three-and-twenty when Messrs. Chapman and Hall, attracted by some pieces I was at that time writing in the *Morning Chronicle* newspaper, waited upon me to propose a something that should be published in shilling numbers. When I opened my door to the managing partner, I recognised in him the person from whose hands I had bought, two or three years previously, my first copy of a magazine in which my first effusion—dropped stealthily one evening at twilight, with fear and trembling, into a dark letter-box, in a dark office, up a dark court in Fleet-street—appeared in all the glory of print. The idea propounded to me was that the monthly something should be a vehicle for certain plates to be executed by Mr. Seymour, and there was a notion, either on the part of that admirable humorous artist or of my visitor (I forget which) that a 'Nimrod Club,' the members of which were to go out shooting, fishing, and so forth, and getting themselves into difficulties through their want of dexterity, would be the best means of introducing these. I objected, on consideration, that, although born and partly bred in the country, I was no great sportsman, except in regard of all kinds of locomotion; that the idea was not novel, and had been already much used; that it would be infinitely better for the plates to arise naturally out of the text; and that I should like to take my own way, with a freer range of English scenes and people, and was afraid I should ultimately do so in any case, whatever course I might prescribe to myself at starting. My views being deferred to, I thought of Mr. Pickwick, and wrote the first number, from the proof-sheets of which Mr. Seymour made his drawing of the club and that happy portrait of its founder, by which he is always recognised, and which may be said to have made him a reality. I connected Mr. Pickwick with a club because of the original suggestion, and I put in Mr. Winkle expressly for the use of Mr. Seymour. We started with a number of twenty-four pages instead of thirty-two, and four illustrations in lieu of a couple. Mr. Seymour's sudden and lamented death before the second number was published brought about a quick decision upon a point already in agitation; the number became one of thirty-two pages, with two illustrations, and remained so to the end. My friends told me it was a low, cheap form of publication, by which I should ruin all my rising hopes; and how right my friends turned out to be everybody knows."



No. 6.—"I say, Jack, are there any fish in this pond?" "There may be; but I should think they were werry small, cause there was no water in this here pond afore that there rain yesterday."



No. 8.
In for it; or, Trying the Middle.

We shall shortly refer to the painful feud between Seymour and Gilbert A'Beckett, and give four more illustrations; this week we give four more of his sporting sketches.

No. 5 needs no comment—it tells its own tale, and tells it well. It is one of Seymour's very best.

"Crowquill's" remarks upon Nos. 6 and 7 are worthy of reproduction here as showing how contemptible he fancied angling was; the latter part of his description of No. 7 is especially "rich."

No. 6.—There is a certain period of life beyond which the plastic mind of man becomes incapable of acquiring any new impressions. . . . There are, indeed, some rare exceptions to the rule, but few, very few. . . . There are many who, having passed a life in the sole occupation of making money, in their retirement entertain themselves with such fantastic pranks and antics as only serve to amuse lookers-on. The subject of this sketch, undoubtedly, has accidentally dipped into the tattered tome of "Walton's Compleat Angler," and the vivid description of piscatorial pleasures therein set forth has so won upon his mind, that he has resolved to taste them. Having more money than wit to spare, he presently supplied himself with reels, and rods, and tackle, landing-nets, gentle-boxes, and all the other necessary paraphernalia of the art. Donning his best wig and spectacles, he sallied forth, defended from the weather by a short spencer buttoned round his loins, and a pair of double-soled shoes and short gaiters. So eager was he to commence, that he no sooner espied a piece of water than, with trembling hands, he put his rod together and displayed his nets, laying his basket—gaping for the fish—on the margin of the water. With eager gaze he watched his newly-varnished and many-coloured float, expecting every moment to behold it sink, the inviting bait being prepared *secundem artem.*

Our picture tells the rest. After awaiting some time, the ragged urchin, who has meantime shown up, informs him of the real state of affairs: "Well, there may be; but I should think they were werry small, 'cause there was no water in this here pond afore that there rain yesterday!"

No. 7.—

"Beside a meandering stream
An elderly gentleman sat;
On the top of his head was his wig,
On the top of his wig was his hat."

I once followed a venerable gentleman along the banks of a mill-stream, armed at all points with piscatorial paraphernalia, looking out for some appropriate spot, with all the coolness of a Spanish inquisitor displaying his various instruments of refined torture. He at last *perch*-ed himself near the troubled waters close to a huge revolving wheel, and threw in his float, which danced upon the mimic waves, and bobbed up and down as if preparing for a reel. Patiently he sat, as motionless and unfeeling as a block. I placed myself under cover of an adjoining hedge, and watched him for the space of about half-an-hour; but he pulled up nothing but his baited hook. What his bait was I know not, but I suppose from the vicinity he was fishing for a *Miller's thumb.* Presently two mealy-mouthed men from the mill made an appearance, cautiously creeping behind him. I drew myself up in the shadow of the luxuriant quickset to observe their motions. A paling in the rear offered the rogues an effectual concealment in case the angler should turn. Close to his seat ran some wood-work, upon which they quietly drew the broad tails of his coat, and driving in a couple of tenpenny nails, left the unconscious old gentleman a perfect fixture, to be taken at a valuation, I suppose, part of his personal property being already brought to the hammer, the clattering clamour of the wheel precluding him from hearing the careful but no less effective taps. I certainly enjoyed the trick, and longed to see the ridiculous issue; but he was so intent upon his sport—so fixed!—that he did not discover the nature of his real attachment while I remained, having merely exclaimed to himself in a half tone, "This mill makes a plaguey hammering!" Doubtless if he were of a quick and sudden temperament, a "snatch" of his humour rent his broad cloth, and he returned home with a woeful tail, and slept not, for his nap was irreparably destroyed.

I hate all twaddle, but when I see an old fool with rod and line, "Sitting like Patience on a monument," and selling the remnant of his life below cost price in the pursuit of angling—"that art of ingeniously tormenting"—a feeling "more in sorrow than in anger" is excited at his profitless inhumanity. Vainly do all the disciples of "honest Izaak Walton" discourse in eulogistic strains of the pleasures of the sport. I can imagine neither pleasure nor sport derivable from the infliction of pain upon the meanest thing endowed with life. This may be deemed Brahminical, but I doubt that man's humanity who can indulge in the cruel "recreation" and "murder while he smiles."

"What heretical sentiments!" exclaims some brother of the angle (now, I am an angle, but no angler). "This fellow hath never trudged at early dawn along the verdant banks of 'the sedgy Lea,' and drunk in the dewy freshness of the morning air. His lines have never fallen in pleasant places. He has never performed a pilgrimage to Waltham Cross. He is, in truth, one of those vulgar minds who take more delight in the simple than the—gentle! and every line of his deserves a rod."

"In for it; or, Trying the Middle."

A little fat man,
With rod, basket, and can,
And tackle complete,
Selected a seat
On the branch of a wide-spreading tree,
That stretch'd over a branch of the Lea.
There he silently sat,
Watching his float, like a tortoise-shell cat
That had scented a mouse
In the nook of a room of a plentiful house.
But, alack!
He hadn't sat long, when a crack
At his back
Made him turn round, and pale,
And catch hold of his tail!
But, oh! 'twas in vain
That he tried to regain
The trunk of the treacherous tree;
So he
With a shake of his head
Despairingly said:
"In for it—eeod!"
And away went his rod
And his best beaver hat,
Untiling his roof!
But he cared not for that,
For it happened to be a superb waterproof,
Which *not* being himself,
The poor elf!
Felt a world of alarm,
As the arm
Most gracefully bow'd to the stream,
As if a respect it would show it,
Though so much *below it!*
No presence of mind he dissembled,
And the ease was no longer a riddle
Or joke,
For the branch snapp'd and broke!
And although
The angler cried, "It's no go!"
He was presently "trying the middle."

ANSWERS TO CORRESPONDENTS.

S. Masters: You must belong to a club enrolled with the Central Association before you can fish the Pulborough Association water. We think the charge is one shilling per day for fishing at Dagenham Lake. There used to be fair fishing for roach, perch, eels, &c. Sixteen is about as young as most clubs care to take members.

Gaff: Write to Mr. Blackadder, Anglers' Hotel, Ballinahinch, Ireland, and ask if the white trout will be up at the time you name.

Correspondence

[We do not hold ourselves responsible for opinions expressed by our Correspondents.]

FISHING AT PENZANCE.

Dear Sir,—I should be very glad if any of your numerous readers could give me a little information as to the fishing obtainable at Penzance, and whether the paternoster and leger would be suitable to fish with about the middle of August.—Yours, &c., John Sheffield.

P.S.—I beg to thank you very much for information I obtained through your columns last year as to fishing at Weymouth, and in consequence of that information was able to "boat" (not grass) about four-score per day, some going 2lb. and 3lb. each. Not a bad result for an inland fisherman, I thought. Must congratulate you on your fine production of '91 Summer Number.—J. S.

FISHING AT BARNARD CASTLE.

Dear Sir,—We have refrained thus far from joining in the discussion between your correspondents "J. H. R." and "Reader of *Gazette*," but we now feel bound to interfere in order to save our reputation.

"J. H. R." in his last letter says that "R. of *G.'s*" statements are incorrect. Now, as "R. of *G.*" must have had the authority for what he wrote indirectly from us, "J. H. R.'s" letter necessarily accuses us of falsehood.

We therefore beg to state that "R. of *G.'s*" assertions are quite correct, except in one particular, viz., instead of 18lb. there were 19lb.; for "J. H. R." states that there were 9½lb. in Mr. Graham's pannier, and we are equally sure that there were 9½lb. in the other two, thus making altogether 19lb. We also think that before "J. H. R." casts a slur on anyone's character he might at least give the person a chance of vindicating himself. During the whole of the discussion he has referred everything to Mr. Graham, and never once questioned either of us regarding the point in dispute. As to "Blue Dun's" letter of July 4, we can simply assure him and all others that, wherever we fish, whether our leave restrict us to a certain size of fish or no, we make it a rule to throw back all fish under 7in.; and as to the particular catch of which he speaks, we might inform him that the greater number of the fish had been out of the water over twenty-four hours before being weighed, and that, as before said, they then scaled 19lb.

In conclusion, although anglers are credited with strong imaginations, we never before believed it possible for one even to suppose that "*all*" the hundred and twenty-six trout could be pressed into such a small compass as "*just exactly 7in.*'—Yours truly, R. Scott and W. Lockey.

[This discussion must now close.—Ed.]

FISHING IN CANADA.

Dear Sir,—Some months ago, when I wrote a series of articles on "Fishing in Canadian Waters," I was called over the coals by a correspondent from Montreal—"Silver Doctor." I am glad to see in your issue of last Saturday that Mr. W. H. Elsmore, of the West London Angling Club, bears out my statements. Strange to say, on the same date (July 4, 1891) I lunched at the Junior United Service Club with a very old angling friend of mine who has only just returned from Canada. I took the opportunity of making inquiries about the salmon fishing across the Atlantic, and was informed there was plenty of fish and plenty of fishing still to be had in the Canadian dominions.—Faithfully yours, Rux.

LAKE VYRNWY—A CORRECTION.

Sir,—In my letter to you last week, I gave the totals of the fish killed on above lake, from March 26 to June 27, as three thousand and eighty-five, weighing 2,647lb. The weight was quite correct, but the number of fish was incorrectly given (I cast the column after midnight!) and as this error reduces the "averages," perhaps you will allow me to correct it. Instead of three thousand and eighty-five, the number killed to June 27, was two thousand eight hundred and thirty-five. *Baily's Magazine* for July has an appreciative article upon the fishing and natural beauties of Lake Vyrnwy, which lovers of the rod ought not to miss. Next to Loch Katrine, I consider Lake Vyrnwy one of the most beautiful lakes in the United Kingdom, and its fishing capabilities are unlimited. The score of myself and friend for five and a-half day's fishing (three days in a raging gale), was seventy-six fish, of which more than a dozen exceeded a pound each, the two best being 1lb. 12oz., 1lb. 10oz., and three of 1¼lb. each.

Thanks to the bad weather and strong south-westerly gales, I did not get a chance to try those big fellows in mid-lake with a dry fly, but their evening rises in a dead calm are something to be remembered! They held one of these high festivals on Sunday week, and I saw rises of scores of fish that were certainly not less than 6lb. or 8lb. each! These big fellows are supposed to have been the tenants of the original lake, which was absorbed by Lake Vyrnwy. They have never been fished for. I was so assured by Mr. Ward, the lessee; and the man who gets over them—when rising—with a biggish Palmer, black or furnace, dressed with showy flat tinsel wound round body, will make a record which will beat all previous performances with the dry fly. I omitted last week to mention the fact that this lake fishes quite as well during the hot weather of August and September, as in the early spring months; and autumn holiday folks would do well to make a note of this fact, because good fishing at such a time of the year is very difficult to obtain, especially in places so accessible and so beautiful as Lake Vyrnwy.

With the exception of one shallow bay—which is one of the best spots on the lake—the fishing is all done around the edges of the lake, where there is much cover amongst boulders, and this gives to the angler more of the variety found in river fishing. There is none of that ordinary lock-fishing monotony of casting your flies aimlessly over a dreary waste of water, the boat meanwhile drifting before the wind. Here on Lake Vyrnwy you must cast your flies deftly into the bank, and fish them out towards you into deep water—or *vice versâ*—the trout often following and rising at the moment of lifting for another cast.

Mr. Ward, the lessee, is a keen sportsman and first-class fly fisherman, and he has supplied his manager of the hotel, Mr. Gibbins, with a good stock of all the most killing flies which have scored upon the lake. This is a great convenience to visitors going to fish strange waters, because it relieves them of all trouble about patterns, and ensures their getting the latest killers up to date.—Yours, &c., C. W. Gedney.

THE HICKLING BROAD DEFENCE FUND.

Dear Sir,—Please find cheque enclosed—one guinea—towards the Hickling Broad Defence Fund, from the Bostonian Angling Society. I take the liberty of sending it to you, knowing how deeply you are interested in these matters, to forward to the right quarter.—Yours faithfully,

J. Jennings, sec.

SEVERN PERMITS.

Dear Sir,—On Saturday afternoon last, at the conclusion of the provincial committee meeting at Bristol, the vexed question of the Severn permits was privately discussed by several members of the committee, and it was finally decided by myself and Mr. Wingfield to let the matter rest, and that steps should be taken next year to prevent a re-occurence of what has been going on during the past close season; and I would suggest that no permits of any kind be sent to any of the Birmingham societies. This will prevent any of the members getting into trouble through not knowing the exact locality where the permit entitles them to fish.—Yours respectfully, C. White.

42, Tenby-street North, Birmingham.

APPEAL TO CLUB ANGLERS AND FRIENDS.

Dear Sir,—Since my last report in *F. G.* of the 4th inst, I beg to acknowledge with thanks £1 14s. from the members of the Cobden Angling Society, which the late Mr. Camm was secretary of.—I am, yours truly, B. Abrahams.

25, Silver-street, Notting Hill Gate, W.

Cheques and Postal Orders can be crossed "Alliance Bank and Co."

P.S.—I hope those clubs that have not yet forwarded me their mite will kindly remit it as soon as possible, as the list will, I hope, soon be handed over to our committee.

THE CHAMPION ROACH FISHER.

Dear Sir,—In the year 1871, a Mr. Hughes, a London angler, wrote to Bailey, of Nottingham, for some fishing tackle, and in some correspondence that ensued Bailey laid claim to be the champion roach fisher of England. It is not easy to trace, after this lapse of time, how or when Bailey became possessed of the championship, but it is well known that he had held it for some time previously.

Joseph Woodard at that time claimed to be the champion of the Lea, and Mr. Hughes made an arrangement that Woodard should fish Bailey the best of three matches for £100.

The *Sporting Life* of Dec. 13, 1871, contains an account of the first match, which was fished at Ponders End, and was won by Bailey. It goes on to say, "As everybody knows who Mr. W. Bailey, of Nottingham, is, there is little occasion to give his history. Suffice it to say, he is the St. Anthony among the fish." The second match was fished in the Trent, and was won by Woodard, as also was the third match, fished in the Stour. Thus Woodard defeated Bailey's championship, and according to his own authority he fished several matches during the next eleven years without having been beaten, and for the last nine years he has not received a challenge.

In a note to the Bi-centenary edition of Walton and Cotton, Mr. J. P. Wheeldon—who was well acquainted with all the particulars connected with these matches—speaking of roach fishing, says:—"Excellence in the art of roach fishing, and such excellence as pushes one man forward, making him a shining light far ahead of all other competitors, can only be achieved by constant and consummate practice in this particularly delicate and skilful branch of the craft of angling. This practice was it, allied perhaps to a natural aptitude, that made Woodard of London *the acknowledged champion amongst roach men*."

Under these circumstances, I think, until Woodard has been challenged and beaten, he is fairly entitled to the honour I claimed for him—that of being *the champion roach fisher of England*.—Yours faithfully, James Tayler,

Secretary of the Gresham A. S.

Waltoniana

It may interest a good many readers of the *Gazette* to know that five or six weed-cutters of the Lambourne have been summoned by the Thames Conservancy for not removing the weeds as soon as cut, and allowing them to float down into the Thames. The matter will be investigated by the local County Bench, sitting at Newbury, on the morning of Thursday next, the 16th of July, when it is to be hoped there will be no weed-cutting magistrates on the bench. I hope to give the result of the proceedings next week.

Last week, in company with Mr. Munro, I spent a holiday on the Pomahaka, king of Otago waters, but found it rather high after the rain in the beginning of the week. However, we managed to land in a day and a-half twenty fish, as fine a lot as ever graced the basket of an angler. They weighed from 3lb. to 5½lb., and were all in splendid condition, with any amount of go in them. But, my friends, when I say "I" spent a holiday, I do not refer to myself, but to a fortunate individual in New Zealand, whose words I am simply quoting. We over here who swagger about and talk big after catching five dozen moorland trout going four to the pound (with the assistance of the basket), or who receive telegrams congratulatory when, after hours of toil, we land a brace of four-pounders, let us hide our heads and talk big no more. What a country for the emigrant! What matters climate, soil, markets, drought, natives, serpents, wild beasts, or scoffers in a land where such fishing is to be obtained!

Both the Chinese and Japanese possess the secret of varnishes and laquers, which are in several respects superior to anything of the kind in Europe. In view of the importance of a good wearing and weather-resisting varnish for fishing rods, the report from the British Consul at Hankow on the subject of the varnish exported from that place seems to deserve attention. It is the gum of the *rhus vernicifera*, and it is obtained in a very peculiar manner. Incisions are made in the tree before daylight and gum which runs out is collected in the dark and strained through a cotton cloth bag. Light spoils the gum, causing it to cake with the refuse in it. It cannot be strained in wet weather as moisture causes it to solidify. On this account it is best applied in wet weather, as in dry weather it will not dry, but remains sticky. The Chinese lay it on the articles to be varnished with a sort of miniature mop, made of waste silk, and in the manner they use it it takes about a month to dry. Altogether it is a remarkable product, and as it appears to work best in wet weather might be valuable for split cane rods.

I was glad to see that our American contemporary, *Forest and Stream*, agrees with the views respecting fry and yearlings, which have more than once been put forward in this column, and in other parts of the paper. "It seems," says the writer of some angling notes in the American journal, "to be the universal opinion of those who have had experience in re-stocking trout water that one hundred yearlings will improve a pond or stream more than ten thousand fry. The only way fry seem to thrive is by placing them in tiny trickling springs, where it is impossible for their enemies to follow them or see them, or else to keep them in little artificial ponds where they can be fed and protected until able to look out for themselves."

I am inclined to take exception to the word "little" in the foregoing paragraph, for our experience in England rather tends to show that fry get on better in deep ponds than in shallow ones. This can I think be explained thus: The water in a shallow pond rapidly rises in temperature in summer and the fry get weakly and die. The water, too, must be constantly changing its temperature with every change of heat and cold in the air. In a deep pond the temperature is more equable. I have recently had the misfortune to lose a pond full of fry owing to the supply of water being cut off for a week. The water in the pond sunk to about a foot, its temperature rapidly rose and the little fish all died one fine day. In another pond where a slight trickle of water continued to run, no fish died so far as I could see. In rivers trout fry are usually found on the shallows, and so it might be argued that they thrive best in shallow water. This they may do, provided there is as great a flow of water as there is in a river. But we never get such a flow of water into our ponds, therefore it has been found necessary to make the ponds deep. In other words it comes to this: If there is a great abundance of flowing water the fry will thrive in shallows, but if the supply is limited and has to be economised the ponds must be deep. Templar.

CHERTSEY ANGLING ASSOCIATION.

One of the principal objects of this association is to supplement the efforts of the T.A.P.S., in the protection and preservation of the river in that neighbourhood, the honorary secretary, Mr. A. E Armstrong, being an honorary river-keeper in connection with the society. At the present time, in a beautiful stream running through the land of Mr. W. Webb, into the Thames near the weir (but at present protected from any of the youngsters escaping), there are about a thousand young fry of trout hatched in the apparatus belonging to Mr. Armstrong, and on an inspection they could be seen in various parts in a most healthy condition. The stream has been kindly lent to the association by Mr. Webb, and is most admirably adapted for the purpose of rearing fish. It is the intention of Mr. Armstrong, who has entire charge of the young fish, to let them remain there until next year, and then by removing the obstruction to let them pass quietly into the Thames.

The eighth annual dinner of the association took place on Thursday evening, July 2, at the headquarters, the Cricketers' Hotel, Chertsey Bridge, of which Mr. Arthur Hebburn is the piscatorial proprietor. Mr. W. Webb occupied the chair, and was supported by Messrs. A. E. Armstrong (hon. sec.), A. Graves (assistant hon. sec.), John Roake (treasurer), W. H. Brougham, W. Dix., jun., F. Hammett, W. Garrett, H. Chaldecott, W. J. Kersley, E. Squire, F. Hadden, Desvignes, and Arthur Hebburn, &c. The dinner, which consisted principally of joints cooked to perfection, gave great satisfaction and evidenced the capacity of the hostelry for similar occasions in the matter of catering and good service. After the loyal toasts came that of the "Thames Angling Preservation Society," which was given in some appropriate remarks by Mr. Graves, who, in associating Mr. Brougham's name therewith, referred to that gentleman having completed thirty-three years in working for the anglers of the Thames. Mr. W. H. Brougham, in his reply, recognised the assistance of the association, with especial reference to Mr. Armstrong, that had been so freely given, both in the protection of the river and in increasing the stock of fish in it by netting the Pound Pond. The chairman, in proposing the toast of the evening, made some graceful allusions to the working of the Chertsey Angling Association, and expressed the pleasure he felt in any assistance he could render them. Mr. John Roake acknowledged the toast, and gave evidence of the healthful position of the association, at the same time hoping others would come forward and join them, as there was plenty of room for more members and an increase of funds.

In the distribution of the prizes which followed, it is well to remark that the association recognises nothing but specimen fish of an increased standard, and in view of the depleted stock of perch, no prizes are offered for that fish. There are only three prizes for "gross weights" of the specimen standard, two of them for all the species excepting perch, and one for roach only. The amount of the prizes in money was £12 6s. 6d., three fishing-rods (two being the gift of Mr. Hebburn, in addition to £2 in money), a silver watch, barometer, teapot, and other useful articles; and the prize-winners were Messrs. H. Grinstead, A. E. Armstrong, G. Stevens, W. Cartwright, John Roake, J. Chapman, A. E. Statham, W. Cosson, F. Hammett, H. Vincent, J. W. Smith, and A. E. Little, each prize being being presented by the chairman in pleasing and congratulatory words.

Mr. Hammett then gave "The Health of the Chairman," in some brief but courteous observations, and Mr. Webb, in reply, expressed the pleasure he felt in being their chairman that evening, and assured them of his desire to help them in every way that he could. On the suggestion of Mr. A. E. Armstrong, the toast was given with musical honours. Other toasts followed, and the remainder of the evening was devoted to harmony, several of the toasts being interspersed with a song. The last toast was that of "The Host," and from the manner in which it was received there can be no doubt as to the popularity Mr. Hebburn has acquired since he has become proprietor of the Cricketers.

The evening altogether was one of great enjoyment, and will not easily be forgotten. B.

THE THAMES ANGLING PRESERVATION SOCIETY.

ANNUAL REPORT, 1890-91.

"THE committee of the Thames Angling Preservation Society, at the close of another financial year—the fifty-third of its existence—have every reason to be satisfied with the result of what has been done during that period.

"Your committee during the past year have received the following contributions: Twenty-five guineas from the Fishmongers' Company, five guineas from the Flyfishers' Club, and £4 3s. 3d. as a moiety of profit from the anglers' tournament at Twickenham, which they desire now most gratefully to acknowledge, and to express a hope in the forthcoming year other City companies will support them in their philanthropic work. They have also the pleasure to acknowledge the receipt of the customary subscriptions from the Anglers' Association and the Central Association of London Angling Clubs, and are gratified to find the utility of the work done by the society is becoming more widely recognised by the great body of anglers.

"As an additional means of increasing the income of the society, your committee have adopted the use of collecting boxes, to be placed in those club rooms where there is a willingness to receive them, and although only half-a-dozen have so far responded in that direction, they have reason to hope other clubs will follow their example. They are pleased to acknowledge the receipt of contributions, in sums varying from seven shillings and sixpence to one guinea, from the following clubs: Alma, Burton, Clapham Junction, Corinthian, Great Northern Brothers, and United Brothers. Your committee have also to thank the members of the New Albion Piscatorial Society, for organising a competition on behalf of the society, and for the result.

"There has been a slight diminution in the general income of the society, as will be seen from the audited balance-sheet, amounting to £13 12s. 11d., which is accounted for from the inability of the Secretary, through a sad bereavement, in being unable during the closing month of the financial year from making his usual collection, but since then a good portion has been received. Your committee have to regret, through deaths, removals, and other causes, there has been a loss in subscriptions of £17 7s. 6d.; which has been partly met by new ones amounting to £7 15s. 6d. It is necessary to explain that in order to maintain the society through the first eight months, when subscriptions are not generally available, each year should commence with a balance of at least £100.

"Your committee have taken much interest in the question of the claims of riparians to exclude anglers from certain portions of the Thames, a subject which has of late occupied much public attention. They would, however, remind anglers that in the vast district preserved by this society, extending from Kew to Staines, the fishing is free to all, and can be enjoyed without question by every angler, subject only to the necessary regulations of the Board of Thames Conservancy, who have shown themselves anxious to co-operate at all times, so far as practicable, in furtherance of the objects of the society.

"As regards the angling of last year, there is not much to refer to of a special character, but the fishing for jack, which promised well in the earlier portion of the season, was interrupted by a long and continued frost at a time when jack fishing would have been practised. At the period referred to, a goodly number of jack from 10lb. to 15lb. each were taken, and one angler, in the day at Hampton, caught eighteen fish, the largest 7½lb. During the trout season, the members of the Friendly Anglers' Society caught a goodly number of fish in the Staines and Shepperton Districts, and one of the Shepperton fishermen piloted customers to the capture of thirty trout, weighing altogether 137lb. 3½oz.

"During the past year there has been the conviction of five defendants for illegal offences—two being professional fishermen—one was fined £2 for taking fish in an illegal manner, and the other £1 and costs for taking unsizeable fish. The other three defendants, who were anglers, for taking unsizeable fish, had to pay fifteen shillings and tenpence each. Your committee consider, from the arrangements of last year, including the poaching season, and with the system of rewards, the river has been thoroughly protected, and the old practice of river poaching about died out. Great care has been taken in the protection of the ova during the close season, and in this particular the services of their river-keepers have been effectively carried out.

"Your committee, being desirous of increasing the present depleted stock of perch in the river, and to improve the species by the introduction of new blood, have recently purchased from Mr. Thomas Ford, of the Manor Fishery at Caistor, in Lincolnshire, five hundred yearling perch, which were distributed in the most suitable places at Kingston, Thames Ditton, Hampton, Walton, Halliford, Shepperton, and Chertsey, under the personal superintendence of their chairman, Mr. Alfred Nuthall, J.P., and in addition have ordered from Mr. J. Armistead, of the Solway Fisheries, Dumfries, Scotland, twenty thousand of perch ova for the rearing stream at Sunbury, where such alterations have been made as will prevent the young fry from escaping into the river—which they must have done last year—and to stop the other fry from coming in. Your committee hope to be able next year to turn into the river another supply of yearling trout.

"Your committee consider it their duty to recognise the kind assistance of Mr. A. E. Armstrong, their honorary river-keeper at Chertsey, in having purchased at his own cost, five hundred ova of trout from Mr. Thomas Andrews, of Guildford (who at the same time sent an additional five hundred as a gift to the society), with the object of hatching the ova, and rearing the young fry in a stream near the weir, for the benefit of the river in his district, and also for having netted the Pound Pond at Chertsey, and placing in the river therefrom two hundred and fifty perch, two hundred bream, two hundred chub, and two hundred roach. They have further to acknowledge the valuable assistance he has given throughout the year in the protection and preservation of the fishery in that portion of the Thames. If your committee had such zealous workers in the other parts of the river, there would be no difficulty in most effectively carrying on the work they have got to do.

"Your committee, as a necessary conclusion to their report, again urge the anglers who are deriving all the benefit of their labours to give them increased support. One thing is certain, if they were not liberally assisted by the general public and those possessing a philanthropic feeling, the beautiful stretch of about twenty-five miles of river under their charge, well stocked with fish, would soon cease to become a recreation ground for the great mass of anglers, who, if they have not the means to contribute largely, can at least do something to show their further appreciation of the great work the society has so long carried out on their behalf."

ILLEGAL SALMON FISHING AT WHITBY.—At the Whitby Police Court, Thomas Gatenby and Thomas Dixon were charged with fishing for salmon during the hours of the weekly close time. The defendants pleaded guilty. Mr. W. Brown, secretary to the Whitby Esk Fishery Board of Conservators, stated to the magistrates that for some time there had been a suspicion that the net sea fishermen were fishing illegally, and a watch was instituted. On Sunday night, the 20th June, some nets were found by the watchers near Saltwick, and they proceeded to haul them in the boat. The defendants then made their appearance, and claimed the nets as belonging to them, which made the case worse. Against the defendants was the fact that by their licence they were only entitled to use 400yds. of netting, but the nets with which they were fishing, and which had been seized, measured 700yds. The board did not ask the magistrates to confiscate the nets, because they did not belong to defendants. Evidence in support of the above statement having been given, defendants were fined ten shillings and £1 respectively.

Holloway's Pills and Ointment are the best, cheapest, and the most popular remedies at all seasons, and under all circumstances they may be used with safety and with the certainty of doing good. Eruptions, rashes, and all descriptions of skin diseases, sores, ulcerations and burns are presently benefited and ultimately cured by these healing, soothing, and purifying medicaments. The Ointment rubbed upon the abdomen checks all tendency to irritation in the bowels, and averts diarrhœa and other disorders of the intestines frequently prevailing through the summer and fruit seasons. Heat lumps, blotches, pimples, inflammations of the skin, muscular pains, neuralgic affections, and enlarged glands can be effectively overcome by using Holloway's remedies according to the instructions accompanying each packet.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, JULY 11, 1891.

NOTES FROM BIRMINGHAM AND DISTRICT.

By C. W.

On Thursday evening, July 2, a meeting of the committee of the Birmingham Angling Association was held at the headquarters, when another stage was advanced in connection with the forthcoming great excursion and contest. The meeting was well attended. Mr. T. Coles presided. An application was made by Mr. Keeling, on behalf of the Plume Society, held at the Plume of Feathers, Miles-street, to remove to the Britannia Inn, Birchall-street. No opposition was offered, and it was resolved by the committee to allow them to remove forthwith. The contest and excursion business was next proceeded with, and the secretary was authorised by the committee to give the necessary guarantee to the G.W.R. Company. The entrance fee to the contest was allowed to remain as last year—viz., sixpence, the same to be paid for on the Thursday previous to the contest. After this date and on the morning of the contest the tickets will be one shilling. It was also decided that all railway tickets should be paid for on the Thursday previous to the contest. The rules for governing the contest will be the same as last year. Messrs. Coles and Dance were appointed as referees, and fifteen shillings was voted to each for expenses. The amount to be voted from the funds of the association for prizes brought about a little discussion. A resolution was proposed by Mr. Holding and seconded by Mr. Dance that £30 be taken from the funds and expended in prizes, and an amendment was moved by Mr. Hughes and seconded by Mr. Allen, that the sum be £35, but upon the president taking the vote, the resolution was carried with three dissentients. The secretary was ordered to get a number of preliminary notices of the contest printed and circulated throughout the association. The balance-sheet for the quarter ending June 30 showed that the income was £56 2s. 5d., and the expenditure £11 12s. 2d., leaving a balance in hand of £44 10s. 3d. The auditors' report together with the balance-sheet was adopted.

A committee meeting of the Provincial Angling Association was held at the Drawbridge Hotel, Bristol, on Saturday last, and business of importance was transacted. Mr. T. Coles, of Birmingham, presided, and Mr. J. W. Cundall, of Bristol, occupied the vice-chair. The president, in opening the business of the meeting, pointed out that, according to a resolution, the present meeting should have been held at Cardiff, but owing to the business engagements of some of the members of the committee and the bad train service, it was decided to hold the meeting at Bristol, but the committee would hold their next meeting at Cardiff. The minutes of the previous committee meeting, held at Worcester, on April 18 last, were read and confirmed, with the alteration of Minute 189, which related to the referee's expenses at the Marston Challenge Cup contest. The minute read that each referee should receive 7s. 6d. as expenses; the alteration will be that each referee receive his third-class railway fare to and from the town to which he may belong, and five shillings each as expenses. Messrs. Coles and Dance gave in a report of their visit to the Dudley Association, who asked to be admitted into the association. The report was adopted, and on the motion of Mr. Cundall, seconded by Mr. Wingfield, the Dudley Association was accepted into the association. The balance-sheet for the half-year ending June 30 was read by the secretary, and was received with the greatest satisfaction by the whole of the committee. The income was £69 7s. 4d.; the expenditure £16 2s. 5d., leaving a balance to be carried forward of £53 4s. 11d. Mr. Dance, the senior auditor, spoke to the correctness of the accounts and balance-sheet, together with the auditors' report, was unanimously adopted, and a vote of thanks was given to Mr. C. White, the secretary, for the manner in which he had kept down the expenses. On the motion of Mr. Dance, which was seconded by Mr. Cundall, the expenses of the committee-men was raised from 2s. 6d. to five shillings, together with the railway fare to and from the places of meetings. The secretary's salary was also increased to £10 per annum. Mr. Miller brought forward the advisability of the association making a grant to be expended in purchasing three special prizes for the first three members taking the heaviest weights of fish in the Marston Cup Competition, and moved the following resolution, which was seconded by Mr. Cundall, "That three medals to the value of £5 be purchased, and presented to the first three successful competitors, the first to be gold, value £3; the second, silver medal (gold centre); and the third, a silver medal." It was also resolved to present the cup and medals on the ground at the conclusion of the contest. This concluded the business in connection with the contest, when Messrs. Coles and Wingfield gave in a report of the business transacted at the last meeting of the Severn Fishing Board, which met at Birmingham on April 16 last. The report went to show that the Board had in hand the important matter of bringing that portion of the river Avon, which lay between Stratford and Tewkesbury, under the control of the Severn Board. The report was received with great satisfaction, and the best thanks of the meeting was accorded to Messrs. Coles and Wingfield for their labours on behalf of the members of the Provincial Association on the Severn Fishery Board. A vacancy having occurred on the committee through the resignation of Mr. Lane, of Worcester, Mr. Charles Evans, the junior representative of the Worcester Association, was unanimously elected to fill the vacancy. A vote of thanks was given to the president for the able manner in which he had conducted the business of the evening, to which he suitably replied, and concluded by moving a vote of thanks to the worthy vice-president, which was acknowledged by that gentleman. A vote of thanks was also given to the Bristol Association for the generous and hearty manner in which they had entertained the committee. This was carried with acclamation, and this the meeting closed.

The Balsall Heath Britannia Angling Society, held at the Britannia Inn, Sherbourne-road, Balsall Heath, held their second annual contest on Saturday last at Bidford, in which about thirty members took part. The contest was of the usual two hours' duration, and the prizes, which were of a useful and ornamental character, were keenly contested for. The result of the contest was as follows: First, Mr. W. Broom; second, Mr. G. Mountford; third, Mr. J. Perkins; fourth, Mr. H. Carpenter; fifth, Mr. R. Sturch; sixth, Mr. G. Langford. The prizes, with the exception of the load of coal, which was selected by Mr. Mountford, were distributed on Monday evening last, after which the members went in for a bit of harmony, Messrs. Broom, Taylor, and J. Coles doing the lion's share. Master Swaffield presided over the pianoforte, and Mr. A. Hipkiss, in the unavoidable absence of the president, carried out the business of the evening in a satisfactory manner.

Fishing during the week has been very tame, owing to the rivers being altogether out of condition, through the heavy rains that we have had. The Trent is reported to be over the meadows in some of the low-lying districts, and the Avon is sadly off colour just at present. A few anglers have been out trying their luck, but I have heard of nothing, with the exception of a few eels, being taken; but I hope to have better news of the weather and fishing to record next week.

NOTES FROM LANCASHIRE.

More water is the cry of the fishermen of this district. Although rain has been our portion almost daily, still no great quantity has found its way into the various rivers and brooks mostly frequented by local anglers. Much disappointment is felt at the poor results of the season, so far, after patiently waiting as we have done. It is quite a common expression to hear from very old hands, "that they have not cast a line this year." Still, when the time comes, they are sure to have their share of sport.

The event of the week has been the annual trip to Lincoln. As yet there are no official returns of the numbers, but judging from a casual inquiry, a satisfactory result is the verdict. Anyone who happened to be at the London-road Station, Manchester, on July 5, and unaware of the trip, would have been amazed at the busy throng assembled there. Anglers, male and female, old and young, all fully equipped for sport, some with bags evidently intending to prolong their excursion over some days. By the time these Notes are in print doubtless all will have returned who went, but if those who remained more than one day do not give a more cheerful report than their less fortunate excursionists do who have returned, then from an angler's point of view the whole trip must be voted a disappointment. The estimate of tickets sold gets very near to one thousand.

An ordinary business meeting of the various clubs in the Manchester district is summoned for the 16th. This association, comprising some thirty clubs, with eight hundred members, is in a flourishing condition, and for the meeting in question some important items are down for discussion. It will be necessary for the future well-being of this large body of anglers that the delegates adopt some spirited policy for acquiring good fishing for the members. Manchester is a city heavily rated, and the ratepayers can with reason demand the privilege of fishing in the Corporation reservoirs.

Canal fishing so far this season has been so poor that it is gratifying to learn that experts are beginning to have good catches. Several baskets of ten or more brace are reported as being obtained last Saturday.

Trout fishing is also a little improved; several good baskets are reported from various resorts, mostly obtained in the dusk of the evening. Great diversity of opinions exist as to the best killing flies, but this is agreed to by all, that greater skill is required to take fish on our much-frequented streams than is possessed by many who are regular visitors. Mr. B. Brook, of Manchester, secured a nice lot of fish at Buxton a few days since. A beautiful specimen was obtained also on this stream recently.

Contests are still in full swing. The Shakespeare brought off theirs on the 4th, and it proved a most enjoyable affair; good prizes were taken with good fish, but this was only to be expected from a club containing so many good men, who are captained by that ideal angler Sam Brooks.

The Free Anglers, and other first-class clubs, are arranging pic-nics on fishing lines, but the final arrangements are not complete; doubtless, they will be as formerly, of a character worthy of emulation by other clubs.

Some of the Manchester officials and their friends were out on the 4th, and in the course of their walk came across five yearling trout, lying dead upon the bank. From their appearance they had been wantonly destroyed, and it is to be hoped that the perpetrator of this contemptible act will be discovered and punished.

NOTES FROM THE LAKE DISTRICT.

From the closing days of June up to the time of writing, thunder showers have fallen throughout this district almost daily. This, notwithstanding, very little improvement took place in many rivers until Tuesday. The earth had become so parched and wells and feeders so generally dried up that the earth readily absorbed all that fell, and, as a consequence, very little of the heavy downpours found its way into the watercourses. Mr. Thos. Mackereth, a Fellow of the Royal Meteorological Society, reports that the mean temperature of the past month at Windermere has been the highest he has recorded for thirty years for the month of June; the mean of the highest temperatures was 68·0 deg., and the mean of the lowest temperatures 50·2 deg. The total rainfall (twelve days) amounted to 1·356in.; at Kendal, the rainfall for the month was 1·33in. as against 4.07in. in June, 1890.

There are a fair number of visitors now in the district, and coarse fishing is being much enjoyed by many, as well as angling for trout, &c., in Rydal, Grasmere, Windermere, and other lakes and tarns. Yorkshire anglers with limited time at disposal would do well to note the new train arrangements commencing on the 1st inst. A fast train now leaves Windermere at 7.30 in the morning, so that visitors spending a few days' holiday at the end of the week may reach business in fair time on Monday morning. The train is due at Leeds at 10.20.

Lake District readers of the *Fishing Gazette* heartily enjoyed "Gilknockie's" story last week, of "A Memorable Fishing Match on the Border." It had the true ring of the "north countree" throughout it, and whether true or not, was a good story well told. Certainly Dick o' the Forest deserved the prize, for did not he in the end secure the best "catch"—a bonny bride? Another illustration of the adage that all is fair in love and—fishing.

We have all heard the story of the man and the ass, in which it is recorded how in his endeavours to please everybody, the poor fellow brought not only ridicule but loss upon himself. Some of our local angling associations have had to encounter rather sharp criticism on the wisdom of their war with the pike, which it is averred will simply be exterminated if present tactics are persisted in. The question is—do these voracious fish afford an amount of sport compensating for the havoc they play amongst trout and char? "Certainly not," would appear to be the verdict of the Coniston Lake Angling Association, judging from their annual report just submitted to the members, and which I quote below owing to its general interest just at this season. Right or wrong, this association is not likely to fall between two stools.

"I have to report," says the secretary, "that during last season very many fewer pike have been caught than during the preceding season. In the season of 1889 something like a thousand pounds of pike were caught, falling down last season to about 413lb. During the season of 1890-91 very many more trout have been taken with the nets than was the case last season, and these were all in splendid condition. Of course, the trout are returned to the lake unharmed. It may appear curious to some that char are not named from time to time in the netting reports the fact being that owing to the fishermen using 1¼in. mesh, the char escape, the net holding nothing less than ¼lb. fish. Nevertheless, Coniston Lake is literally abounding in char. These fish average about four to five to the pound, and are in the pink of condition. One of the fishermen employed by this association caught during the past season, with lines, 1,470lb. of eels, weighing from 3lb. down to a few ounces each. The fish reared last season were distributed in various places by the committee. There have been hatched in the hatchery at Holywath, under the superintendence of the president, over 30,000 trout. These are now in the rearing pond at Coniston Hall, and are thriving well, being in a lively and healthy condition. The fishermen have this season so far caught very few pike, only having obtained fifty-one, weighing about 100lb. The pike average in weight about 2lb. each, and most of these may be fairly considered to have escaped through the meshes of the nets last season. Probably the association may think it worth while to consider the advisability of having a smaller mesh another season, so that smaller pike may be destroyed. The fishermen are confident that pike are becoming scarce in the lake. One day they had numerous draughts on the best pike ground and only caught two small fish. The trout caught in the nets during the spring have been numerous, the estimated average weight being ¾lb. each, the weight of the largest trout being estimated at 3lb. The trout were in splendid condition. Altogether the association, concludes the report, "it is to be congratulated upon their efforts in destroying pike and rearing trout."

NOTES FROM NOTTINGHAM.

Barbel anglers on the Trent are growing impatient for a spell of really summer weather. The last few days have been fearfully unsettled, and until a decided change for the better occurs, it is not likely that the game fish named will be found to give fishermen any serious amount of trouble. I was at Shardlow last Saturday and saw scores of fish leaping on the shallows and scours, and it is clearly evident that they are as yet in backward condition. Hot weather alone will shift them into the ordinary channels, and then their followers should not neglect the opportunity of baiting up the swims with a goodly supply of worms. Some would-be fishermen appear to think that a shillingsworth of worms ought to last them a couple of days. In barbelling, scores—through the current—are frequently wasted, and no experienced thrower of the line would dream of fishing a well-known swim under a supply of at least a couple of thousand. At the close of last week a very fine fish weighing 6¾lb. was taken on a night line below the new Trent Bridge, and the rod has accounted for a few in the Colwick district. An occasional fish has also been picked up in the Shardlow and King's Mills reaches, and the leger contingent have been amongst them at Clifton and Wilford. Very little news is forthcoming from any of the lower lengths, and things cannot alter very much until the weather begins to assume the pure garb of summer.

A meeting, convened by circular, has been held since my last Notes at the Shoulder of Mutton Inn, Smithy Row, Nottingham, for the purpose of forming an angling society to be known by the same name as the hostelry. Mr. Henry Smith Wright, the popular member for the southern division of the borough, has consented to act as president, and there are several vice-presidents, well-known in connection with local sport. Mr. Charles Jackson, of Carrington-street, was elected chairman, and Mr. C. Heald, an expert fisherman, who is devoted to the Newark district, general secretary. The committee appointed consists of Messrs. R. Higginson (host), T. Leak, G. Derrick, G. Clarke, and C. Jackson (chairman). Various suggestions were thrown out as to the way the rules governing the working of the society should be framed, and these were submitted to a further meeting, which was held last Wednesday night. The question of the pollution of the Trent and its numerous tributaries was taken up, and on the motion of Mr. Heald it was unanimously resolved to invite the Derbyshire Anglers' Association to confer with the society at an early date. The society now consists of twenty-five members, and I hear that as soon as the ranks are augmented, it is the intention of the executive to secure a private length on the Trent for their own use. Properly worked, it is certain to become a popular angling institution in the town, as the worthy host is extremely fond of angling and is certain to encourage the love of it among his numerous patrons.

A DISTRICT society has also been formed at Mr. W. Hopkins's, the Victoria Hotel, Beeston, Rylands. Fifty privilege tickets for travelling have been issued by myself as representing the Midland and Great Northern Railway Companies, and I believe that most of them have already been taken up. The society mainly comprises gentlemen living at Chilwell and Beeston, and the duties of hon. sec. have been entrusted to Mr. Metheringham, of the former place. Mr. S. Watson, who rents the Beeston portion of the Trent, has promised his assistance to the society, and will doubtless allow the whole of the members the privilege of using his waters, although he is not likely, I understand, to tolerate any ground baiting of the swims. In addition, he is pretty certain to reserve the immediate vicinity of the weir, which flows by the garden wall near his keeper's house. Mr. Watson rarely uses the rod himself, and when he does he prefers the lower part of the weir to any other portion of the length. Years ago he used to kill scores of pike with the trolling bait in the foamy currents below the waterfall, but in recent times he has very rarely troubled them. In Host Hopkins the members have a thorough sportsman, and one who knows every inch of the Trent, for the reason that for a considerable number of years he was the indefatigable clerk of the Trent Navigation Company.

IN my last Notes I was guilty of an error in the weight of one of the salmon killed on the Trent during the present season in the King's Mills and Shardlow districts. Mr. Marcer's (Derby) fish was returned at 27lb. Last Saturday, Mr. Marcer, whilst pleased to see it recorded, told me that the fish, when weighed at Derby, pulled down the beam at 30½lb. It is certainly the heaviest killed in the river for some years past, the nearest approach being one of 27lb., caught last year at King's Mills, by G. Holmes, the local keeper.

TROUT fishing is looked upon as a "dead letter" in the Trent, and, when odd fish of note are taken, the captors are naturally very proud of their spoil. Just recently five handsome fish have fallen to the rod in the Fiskerton Reach. I have no doubt that during the rise they left their quarters in the Greet, which flows into the parent stream below Fiskerton wall. In each instance they accepted the worm and showed fighting qualities far above the average. The heaviest weighed 3lb. 6oz., the second best 2lb., and the others about 1lb. each. Others, I hear, were hooked, but were lost through bad management. In connection with the capture, it is perhaps as well to remind ignorant fishermen that no trout can be taken without the possession of a licence, which costs half-a-crown, and which lasts throughout the season. Two years ago the cost was only a shilling, but the Trent Fishery Board have since increased the price. Naturally enough they require capital, and some day they may do something that is worth having for coarse fish anglers generally.

IN reference to the monster eel that was caught with the rod in the Weston waters on June 27, I learn from J. Theaker, the Nottingham professional, that he, some years ago, killed one in the same fishery weighing 4lb. 5oz. The same day a friend (the late Mr. W. Oram, of Nottingham) hooked and landed one of 3lb. 11oz. The one taken on June 27 was 4lb. 2oz.

THE Great Northern Railway Company have consented to issue first-class tickets to Carlton-on-Trent from Nottingham at a fixed price of four shillings and fourpence. The station is on the travelling cards, and occasionally first-class tickets are asked for. Anglers will perhaps please note the price.

AT a special meeting of the committee of the Nottingham Wellington Angling Society, held on July 1, the classification of fish for the season was arranged. In the fly-fishing department, the order of prizes stands thus—chub, trout, grayling, dace; and in the bottom-fishing competitions the classes run—chub, barbel, roach, dace, bream, perch, pike, trout, and grayling. The society continues to make great headway, a number of new members having recently been admitted.

NOTES FROM SHROPSHIRE.

THE next meeting of the Severn Board of Conservators, which will be held at the Queen's Hotel, Birmingham, on the 16th inst., promises to be a very important one, inasmuch as another stage of the all-important question of improving the salmon fishing in the Severn, more especially, however, in the upper waters, will be reached. The matter is one in which all interested in the salmon fishing of the river should co-operate for their common good, for if the lower water fishermen take up a course antagonistic to those in the upper districts, and maintain, rightly or wrongly, their power to capture the mature fish without giving any a chance of ascending to the more favourable spawning beds in and above Shropshire, they will in a very few years impoverish their fishing, and do irreparable injury to themselves, as well as those above, who now ask but a fair proportion of the fish. By working amicably together, the members of the board, representing the various interests may accomplish a vast amount of good. With a close time calculated to allow a goodly number of fish to pass to the spawning beds; the fishing stopped below the weirs; the passes improved along the whole length of the river (as it is hoped they will be after the consideration of the report of Mr. Berrington, Chief Inspector of Fisheries); natural and artificial obstructions removed; and the upper water netsmen (of whom there are, however, very few) prevented from sweeping the river of the fish at such points as the mouth of the Vyrnwy, as it is now alleged they do—a condition of things may be brought about which will doubtless bring prosperity to every interest. In the first place, it is obvious that, before the supply of salmon can be increased, there must be every facility given to allow the fish to pass to the upper waters to spawn; and, secondly, when they have been allowed to ascend thus far, a very strict limit should be put upon the takes, and the fishermen of the upper waters should not be allowed to reap a golden harvest at the expense of those who obtain their livelihood below. Thus, it will be at once seen, any attempt on the part of either interest to monopolise the fishing will have a disastrous effect, and the only way to decide the question, for the benefit of all concerned, will be by hearty co-operation and mutual concession.

AT the meeting of the board on the 16th, a special report will be received from the Executive and Pollution Committee as to the close time, a draft of which will be sent very shortly to the members. This report will probably have reference to the recent inquiries made in various districts on the river with regard to the close season and the state of the passes on the river. Special attention seems to have been paid to the weirs in the upper districts, but if this be the case, it is obvious that the policy pursued is hardly calculated to secure the end in view. If the spawning fish are to be allowed a free and uninterrupted passage, it is clear on the face of it that great attention should be first directed to the passes in the lower part of the river before the weirs of the upper waters, however badly constructed they may be, should be touched. The reports of the bailiffs in the districts where the best spawning grounds are situated tend to show that the spawning season has been an exceptionally busy one, and the result will doubtless be felt keenly in a few years to come. Comparatively few fish have ascended to and above Shropshire, disease has destroyed many, and the severe weather has no doubt played havoc with the spawn, so that unless careful measures are taken to repair the loss there will be a bad time in store for salmon-fishers on the Severn.

NOTES FROM YORK AND DISTRICT.

NOTWITHSTANDING that heavy rain fell during the closing days of last week, the Yorkshire rivers, speaking generally, were barely altered in volume, and it was not until further rain had fallen on Monday and Tuesday last that anything like a fresh was obtained, and even then in some places it was but slight. Threatening clouds, however, are still hovering around, up to the time of my penning these Notes this (Wednesday) evening, portending further showers.

FLY-FISHING on the Ouse has been very limited during the past few days, and indeed those anglers who have tried their luck in that direction have but poorly been repaid for their trouble. Worm anglers, too, have not been so fortunate as of late. Fishing in a private stream near Pickering, the other day, Mr. Schumacher, one of the hon. secs. to the York branch of the Northern Anglers' Association, was fortunate enough to hook six brace of trout, weighing in all 20lb. The largest scaled 2lb. 2oz., while a second fish weighed 1lb. Fishing in the Ouse, on Saturday, above the village of Poppleton, the same gentleman had six eels, the largest weighing 1½lb., and the whole scaled about 4lb. He was out from four to nine, but the time occupied in taking the fish was from half-past eight to half-past nine, he prior to that time never receiving a nibble. A member of the York Angling Association while out at Nun-Monkton, the other day, had a nice pannier of chub. Trolling for pike on the same day be had the satisfaction to receive a hook, calculating the pike to weigh not less than 22lb. After playing for some little time, however, he had the misfortune to lose it. Another large pike has been noticed in the river opposite Captain Key's residence, at Fulford.

A FISHING competition, the principal prize being a silk umbrella, offered by Mr. William Bouttell, of York, took place on the river opposite the residence of Captain W. H. Key, at Fulford, on Monday evening. The match was open to the residents of Fulford, and the members of the Fulford Friendly Angling Society, and nearly a score competed in happy rivalry for the superiority. Unfortunately, however, the circumstances were most discouraging. A cold wind blew, compelling nearly all the competitors to use the worm. Towards the close of time the wind somewhat lulled and flies were resorted to by many, but neither they nor worms proved of much avail in alluring the chary fish. Upon the competitors going to weigh in, the catches were—well, suffice it to say that the winner scaled some 4¾oz., which, as might be expected, was the source of much humorous joking. The umbrella was awarded in due course to Mr. Watson, secretary of the Fulford Club, the fortunate competitor. The time fished was from six o'clock to nine, and the match was watched by a fair number of interested spectators. Had the match been held some six weeks later conditions, would, undoubtedly, been otherwise.

AT a meeting of the Yorkshire Fishery Board, held at York last week, under the presidency of the Hon. Captain Duncombe, the following resolution was unanimously agreed to: "That this board desires to record, with deep regret, the loss it has sustained by the death of the Hon. Payan Dawnay, the past chairman of the board, who, during the eleven years he was a member, took the utmost interest in its welfare."

THIRSK anglers seem to have fared somewhat better than their brethren in other parts of Yorkshire. The slight showers of rain have sufficed to supply some nice gentle freshes on the Codbeck, and in consequence local anglers have had excellent sport in this by no means to be despised North Riding trout stream. Perhaps the brambling and the maddock have been the best at allurement; but the artificial minnow has been tried with much success. Some fine dishes of grayling have been made on the sandy reaches down stream, and there is not the least doubt but that this grand autumn and winter fish is greatly on the increase in the Codbeck. There is a good supply of trout in the water up-stream, and those taken have ranged from ½lb. to 2½lb. in weight each.

ALLUDING to the stream, the *Manchester Courier* of the other day said: "Of the Yorkshire streams, the Codbeck is affording a rich harvest to those who know its peculiarities. Trout have been taken in large quantities, whilst quite a bevy of grayling has been obtained. Yorkshire anglers should note the circumstance if a holiday is intended."

IT may be worthy of mention that numerous otters have been noticed in the river during the past few days, but nothing is as yet reported of their having materially destroyed fish.

FOLLOWING on the slight fresh in the latter part of last week good sport was enjoyed by Swale anglers at Richmond. Perhaps the best fly, and the one most generally used, was Partridge and Orange. The Rev. R. E. Ricketts, chaplain to his excellency the Earl of Zetland, made a nice pannier or two, fishing a few miles above the town, and Mr. Isherwood—who, by-the-bye, is regarded as a veteran angler—hooked thirty-nine fish at one outing. Mr. C. Musgrave and a visitor had fifteen each, while Mr. William Earle, Mr. T. Williams, Mr. J. Heslop, Mr. J. Doherty, and others, did well. A heavy thunderstorm passed over the town on Monday and the rain fell heavily, slightly improving the Swale and its tributaries in the direction of angling purposes.

AT the Darlington Police Court, on Monday, three individuals answering to the names of Thomas Ness, Arthur Ness, and John Dawson, were charged with unlawfully attempting to take trout in the Tees at Croft, with a purse net, in June last. Mr. F. Dodds appeared for the Tees Fishery Board, who instituted the prosecution. Three witnesses deposed to seeing the prisoners in the bed of the river and place the net round a stone which they disturbed by means of a crowbar, frightening the fish into the net. They were seen to take a large quantity of fish, but none of the witnesses could say trout were amongst them. They, however, considered that the place where the prisoners were fishing was one of the best for trout about Croft. Mr. Jaynes, who appeared for the defence, said that the charge of taking or attempting to take trout had not been proved, and the case was dismissed. Another too ardent piscator named William Cooper, was fined one shilling for angling in the Skerne at Low Beaumont Hill, without having a licence.

NOTES FROM IRELAND.

(FROM OUR DUBLIN CORRESPONDENT.)

WITH such climatic variations as those to which this country has of late been subject, it is little wonder that the present angling season has not been over successful. Facts are stubborn things which must be met and recognised, and I am sorry to say it is a recognised fact that in many parts of Ireland sport has been rather behind the average this year. It also has been noted that the attendance of anglers, although extremely good—especially in the more popular districts—has not, generally speaking, been such as might in numbers be classed on *par* with former times. To climatic influences this fault is chiefly due. Disparagement must not, however, be gathered from these remarks, because for those whose love of angling encourages them to bear the brunt of many weathers, there are still good fields for action. Salmon fishing in many of the western parts continues fair, and from the Galway and Sligo districts reports are to hand of some very tidy fish being landed, but the latest, from Westmeath Lakes, sattes that owing to adverse circumstances few anglers have been out this past week. A scarcity of Green Drake was felt, and trout are feeding on perch fry. One good capture is, however, recorded of a trout weighing 8lb., a fair specimen of the tribe inhabiting the waters of Westmeath.

LATELY there has been a lack of rods in and around the Dublin and Kildare districts, where trouting at this time of the year has always absorbed the attention of sportsmen, but some fair captures have been effected on the Liffey at Kilcullen Bridge, a well-known spot, adjacent to either Newbridge or Harristown stations, and I hear fair baskets are also being had at the waters of the Brittas Club and Angler's Club of Ireland.

I LEARN a fair number of members of the latter club are scattered over the principal salmon banks down the country, but beyond an occasional good fish nothing remarkable has been accomplished.

SPORT in Wicklow is keeping well to the front. Notwithstanding a falling-off of rods this week at Woodenbridge, a free rise of trout continues. In Wicklow interior—the Dartz, at, Rossanagh for instance—the fish are about in numbers, but are so small as to scarcely reward the enthusiast. I am told, however, that the two lakes slumbering in the Valley of Glendalough (seven churches) are "positively teeming" with good size fish of various kinds.

AMONGST the best records this season of salmon angling the river Suir has taken a prominent place. The yield of fish has been numerous and their condition healthy. Only recently one weighing 37lb. was caught by Mr. John Hassy, at Banard, and many others of whom I have a list, running from 7lb. to 25lb., all taken with the fly. Trout fishing in the Suir this season has been excellent all through.

SEA fishing—since things are rather dull inland—is now proving an immense attraction around the Irish Coast, and during a sail round Dublin Bay, the other day, I never saw so many boats out. The clubs at Ringsend, Greystones, Bray, and Kingstown, were well represented and were rewarded by good takes of gurnet, codling, pollack, &c. Dalby Sound seems to be the most favourite spot along the Dublin Coast and an all-night sitting of sea anglers there is not at all uncommon. Sea fishing on Waterville Coast, Co. Kerry, is also reported to be excellent.

THE mill-owners and others in the north of Ireland opposed to the progress being made by those interested in the promotion and welfare of the salmon fisheries of the north, are on the alert. An important and influential meeting of the County Antrim Mill Owners Defence Association was held at Ballymena, on Saturday last, where resolutions were passed to the effect that in their opinion the protection extended to the fisheries depending upon water power was quite adequate, and any further measures granted would tend to be injurious to more important industries. The association also threatened that any further objection to the Irish Fisheries Amendment Bill by English members would be the means of their circulating broadcast, both now and at the General Election, particulars of what it is they are supporting, "and the destructive persecution that has been carried on in this country under the present Irish Fishery Laws, against those who are engaged in forwarding the industries of Ireland, and increasing the employment of its people."

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The monthly meeting of the Renting and Preservation Committee will take place on Monday evening next, July 13, at 8.30.—R. GHURNEY, sec.

Anglers' Association.—EASTERN DISTRICT No. 1.—The next return visit will be to the Hoxton Brothers, the Swan, Bethnal Green-road, Shoreditch, on Tuesday next, July 14. This well-known club always receives a good share of patronage; therefore, I anticipate our usual crowded meeting.—G. MANNING.

Anglers' Association.—EASTERN DISTRICT No. 2.—The next return visit on the above list will take place at the Convivial Angling Society, on Monday, 13th, when I hope to see the clubs in the district well represented.—F. THORLING.

Anglers' Association (SOUTHERN DISTRICT) VISITING LIST.—The next return visit on the above list will take place on Tuesday next, the 14th inst., at the Rodney A.S., Rising Sun, Harper-street, New Kent-road, where I hope to see all clubs on both lists well represented.—G. W. ARMSTRONG.

Anglers' Association.—WESTERN DISTRICT.—A visit was paid to the Phœnix on the 29th ult., twelve clubs being represented. The next visit will be paid to the Royal George, at the Hope Tavern, Tottenham-street, Tottenham-court-road, on Wednesday next, the 15th, when I hope to see a good muster.—J. JENNINGS.

Aberdeen Amateur Rock Fishers' Association.—Last Saturday the members of this association, which numbers over two hundred members, held their second seasonal competition, when large numbers turned out at such favourite spots as Cove, Portlethen, Newton-hill, Muchalls, and other points along the coast, and in spite of the heavy rains all the afternoon, fished with praiseworthy zeal, as was shown by the large number of baskets weighed in at the club's office in the course of the evening: First, William Riddell, 32lb. 10oz.; second, Jas. Robertson, 25lb. 12oz.; third, William Campbell, 22lb. 2oz.; fourth, Geo. Anderson, 18lb. 13oz.; fifth, Andrew Angus, 10lb. 14oz. —G. M.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—We fished our match on July 5, when the prizes were taken by the following members: H. Davis, first prize, jack rod, with a magnificent show of roach; B. Abrahams, second prize, running line, with perch; Fred Roberts, third prize, a Nottingham winch, with a very pretty tench. One of our members was broke away with a bream about 4lb. on a tight line, but I hope he will succeed on the 12th inst. We are making more working members. F. Hawkins was unanimously elected a working member of this capital society, and H. E. Probert and A. A. Morgan have been proposed as working members to be elected next Monday, when I hope all members will show up as usual at club room, at 9.15 p.m. Messrs. Roberts and Thompson audited the books on the 7th inst., and I am glad to say our club is in a good financial condition.—B. ABRAHAMS, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—On the 5th inst. we had a strong muster of members—not in the club-room, but in a saloon carriage of the L.B. and S.C. Railway—*en route* for the Swan Hotel, Fittleworth, near Pulborough, where we sat down to our thirty-seventh annual dinner, which was a pronounced success in every respect owing to the untiring exertions of our genial hostess, Mrs. Hawkins, who received the well-merited thanks of all the members for the very excellent manner in which she had catered for them. Mr. Medcalf, our president, occupied the chair, faced by Mr. Hill, and assisted by Messrs. Farebrother and Hayward. We fish for six prizes on July 12 at Pulborough Central Fishery; all members to start from London Bridge Station by the 6.55 train.—W. H. POTTER, secretary.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Our first match came off on the 5th inst., at Windsor, when three prizes were fished for, and the successful members were as follows: Mr. G. Rich, first, 1lb. 1¾oz. of dace; Mr. J. Bell, second, 13¼oz. of roach; Mr. D. Coope, third, 12¾oz. chub and the following had fish:—Mr. Jones, dace; Mr. Bond, roach; Mr. Knowler, roach and dace; Mr. King, dace; Mr. S. Lawrence, roach; Mr. A. Bell, gudgeon. Mr. H. Lovett had a nice show of dace from Richmond.—J. RICH, secretary.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—On July 5 our members were out in good force, and some nice shows of fish was the result. Mr. Embleton, sen., roach; Mr. W. Hake, a nice show of roach, dace, and bream; Mr. Lattimore having a fine show of bream: Mr. W. Embleton, jun., roach and bream; Mr. Reeks, with roach and dace; and Mr. Lambarth, jun., a nice show of roach. On the 12th inst. several of our members go to Pulborough to compete in the association competition, also for a prize given by the society.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The weekly meeting was held on Wednesday last, Mr. A. Shakel in the chair. After the usual routine business was disposed of, a discussion ensued as to the outing for our monthly prizes on the 12th inst., when it was decided to visit the Central Fishery at Pulborough for four prizes—viz., one guinea (Mr. Bolland), half-a-guinea (Mr. Palmer), ten shillings (Mr. A. Davis), and five shillings (Mr. A. Jones); also to join in the competition on that date. Members are requested to show up in full force, and to put in an appearance as early as possible at the weighing in, in order to have a photo taken of the club group by Mr. Slaughter. Half-a-guinea was also voted towards the prize list of the competition. On the 5th inst. we experienced the first blank of the season. Mr. F. Mitchell was nominated as a new member, to be balloted for at our next meeting.—A. G. SMITH, sec.

Anglers' Pride Angling Society, the City Arms, Great Dover-street, Old Kent-road.—Members who have not received their privilege and Benevolent tickets will kindly call up on Wednesday next. I have a very promising prize list, and would like to settle early date for monthly outing. I beg to inform honorary and working members that the prize list is still open, and shall be happy to book their names to any amount, large or small. Gentlemen desirous of joining the above society are informed that the terms for working members are two shillings and twopence per quarter, and one shilling and sixpence entrance fee; honorary members, five shillings, including railway privilege ticket.—J. TUCKER, hon. sec.

Beaufoy Angling Society, 143, Upper Kennington Lane.—At our usual weekly meeting it was decided to fish for three prizes not taken on June 28 in the association waters of the river Wey at Byfleet. All start on the morning of the 12th inst. at 8.30, Vauxhall Station.—G. RUSHTON, hon. sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—On the 5th inst. the members of the above society fished a roving competition for their July series of prizes, with the following results:—Mr. James Smith, 12lb. 6oz., first, winning one guinea, by Host J. Fiddes; R. Smith, 4lb. 1oz., second, ten shillings and sixpence, by W. Taylor; and Pallum, third, a tackle case and fittings, by Mr. Gold. Messrs. W. Clarke, Warman, Patman, C. Roake and A. Conn also weighed in.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—A new working member was proposed on Wednesday, and will be balloted for next week. On Thursday week, in company with Mr. Deplidge, I visited the Grange A.S., and we were cordially received, as also were three other of our members who looked in at the Causton A.S., on Monday. On the 5th inst., we had another splendid show of fish. Mr. Deplidge had been amongst the rudd again, and had an even better catch than last week; and the following gentlemen weighed in: Mr. F. Barker, rudd, 14lb.; Mr. J. Barker, carp and roach, 5lb. 5oz.; Mr. F. Roberts, bream, 4¼lb., and Mr. Hacker, bream and perch. I may remind gentlemen that our visit on the S.L.U.V.L. takes place on Tuesday week, July 21, when all who care to attend will be heartily welcomed.—F. ROBERTS, hon. sec.

Bloomsbury Brothers Angling Society, the Rose and Crown, Broad-street, Bloomsbury, W.C.—Wednesday next is limit night, and I hope that all members that have not turned up will do so. The 22nd inst. is audit night, when there is some special business to be done. Mr. Rich had a good take of fish on the 5th inst., roach, perch, jack and dace; Mr. Warren, roach and dace; Mr. Stevens, tench.—J. SMALL, sec.

Bostonian Angling Society.—During the past week the following members have had fair takes: Mr. Chapman, tench and roach; Mr. Ewin, tench; Mr. Ward, perch; Mr. Rundle, chub, perch, and dace. On the 19th inst. we go to King's Langley, by brake, which will start from club house at seven a.m. There will be six prizes to compete for, the first being £1 1s. for the heaviest fish taken, bar jack. Members who intend going will oblige by letting the secretary know not later than Wednesday, the 15th inst. We have forwarded £1 1s. toward the Hickling Broad Defence Fund.—J. H.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—On Wednesday evening Mr. Brown brought up a nice lot of dace and roach. On the 5th inst., Mr. Aitchison weighed in some nice chub, and Mr. Bolt and myself had a very good take of dace from the Thames. The competition arranged to take place at Edenbridge on the 12th inst., has been postponed.—H. ROACH, sec.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—Since my last report the following gentlemen have weighed in: Messrs. Howell, Wilson, and Bissell, bream; Messrs. Wilson, Bissell, and Watkins, roach; and Mr. Watkins, dace. Members are requested to attend a special meeting on Tuesday next, July 14, when the following prizes will be arranged for. Our host's prize, £1 1s., Mr. Bones, 10s. 6d., and £1 1s. from the funds. Members absent on this occasion will have to abide by whatever arrangements are made at the meeting. —T. HAWKES, sec.

Burdett Angling Society:—We had a good meeting last Wednesday and some good work was got through. Mr. J. Pethee had a good show of fish, bream, 8lb., and roach and dace, 1lb.—J. PETHEE, sec.

Caledonian Angling Society.—This society opened their season in a most auspicious manner on July 1st, Mr. A. George having on that date a very fine show of carp, weighing 23¾lb., heaviest fish, 3¼lb.; Mr. A. Knock following the above very close with 19lb. of the same species; Mr. W. Whitelock also had 9lb. 6oz. of rudd, on the same day; total 52lb.—A. GEORGE, sec.

Cambridge Jolly Anglers' Society,—There will be matches on the following dates:—Monday, July 20, at Upware (by boat); Monday, Aug. 3, at Swavesey; Thursday, Aug. 13, at Swavesey; Thursday, Aug. 20, at Waterbeach; Tuesday, Sept. 1, at Upware (by boat); Monday, Sept. 14, at Waterbeach; Thursday, Sept. 24, at Swavesey. There will be no entrance fees for the last six matches. The prizes will be for the best weights—seven and sixpence, five shillings, four shillings, three shillings, two shillings, and one shilling. On July 20, the prizes will amount to about £8, and on Sept. 1, about £10. Each member to bring his fish to the scales at the time and place appointed, or be disqualified at the general meeting, held April 6, 1891; the receipts, including balance in hand were £58, against £25 5s., leaving a balance in treasurer's hands of £32 15s. Number of members, one hundred and ninety-three. Members of this society, on producing their tickets of membership, are booked at single fare (return), by the Great Eastern Company, from Cambridge to nineteen stations all the year round, and twenty-eight other stations all the year round, except from Mar. 15 to June 15 (inclusive). What a boon it would be to anglers if all the other companies would follow their example!

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 5th inst. the following members weighed in: Mr. A. Chapman, tench and roach, 15lb. 12½oz.; Mr. C. Chapman, tench and roach, 5lb. 11½oz.; Mr. Boxall, tench, 4lb. 6¾oz.; Mr. King, roach, 2lb. 15¾oz.; Mr. Marshall, bream; Mr. White, bream and roach; Mr. Sharp, dace. I should like to see members show up a little better on Wednesday evenings.—E. T. WHITE, sec.

Campbell United Angling Society, High-road, Kilburn.—On the 5th inst. our trays were well stocked with bream, roach and tench, contributed by the following: Messrs. J. Smith, Hunt, Pickett and Brothers Lake. Our roving match between Langley and Slough will take place on the 12th, when I hope to see all the prizes taken. Members have the privilege of going down overnight if they choose; those coming down in the morning must report themselves to the first member they come to.—E. W. WOOD, hon. sec.

Causton Angling Society.—Coffee Pot Tavern, Warwick-lane, City.—The meeting on Monday last, was a good one, including three visitors from the Blackfriars A.S. Bourne End was unanimously voted as the scene of operation for the competition announced for the 12th inst. Numerous prizes were presented, and promises of many more were made. The prize committee are (no wonder) more than jubilant. The "piscatorial chit-chat" was as usual animated, and Messrs. W. Sharp (the pianist), F. Barker (Blackfriars), J. Deplidge, Tom Keeble, John Smith, &c., sang some really good songs. With regard to sport, Messrs. Harry Dunn, Tom Keeble, C. Dalton, F. North, W. Guest, H. Thurston, E. Coleman, W. Woods, and J. Deplidge have very good reasons to shake hands with themselves.—JOHN SMITH, hon. sec.

Central Visiting List.—A special meeting will be held at the Bedford Head Hotel, Maiden-lane, Covent Garden, on Monday, July 27, to distribute the prizes won at the Pulborough competition. A capital smoking concert has been arranged to take place. Will secretaries kindly note this important fixture.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—The following members weighed in on the 5th inst.: Messrs. Garbrecht, roach, 10lb. 11oz.; Macdonnell, bream, from Amberley, 7lb.; Castell, roach, dace, and gudgeon, from Woking, the heaviest dace, 8oz. —CAS.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—The following members have weighed in fish since my last report: on the 3rd inst., Mr. Edwards, roach and dace, 16lb.; on the 5th, Mr. Wilson, roach, &c., 11lb. 2oz.; Mr. T. Jameson, chub, 1lb. 14oz.; A. Painter, bream, 2lb. 12oz. Our first match will take place at Staines, from punts; members who intend competing please give in their names as early as possible. We shall have six prizes to go for.—A. TROWBRIDGE, sec.

Clarence Angling Society, Red Lion Hotel, Harrow-road, Paddington.—Nothing has been weighed in, although several members have been out. An addition has been made to the collection of stuffed fish, in the shape of a very handsome grayling. Please note all communications to be addressed to the "Hon. Sec." for the next fortnight, as the sec. will not attend.—ALF. E. EVANS, sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—We had a splendid share of fish weighed in on the 5th instant by the following members: Mr. F. Hamnabus, bream and tench, 40lb.; S. Reddle, 12lb. bream and tench; G. Berham, bream and tench, 11lb. ½oz.; W. Hutchings, bream and tench, 4lb.; and Mr. W. Parbury, a fine bream, 3lb. 6oz. We fish a match for twelve club prizes on the 19th, from Cowley back to Bull-Dog Bridge. Members to register their names at the Shovel. Cease fishing at seven o'clock, and register their fish at the Packet Boat by 7.30 p.m., all to come back by the 8.46 at night. The match to be pegged down; one rod only; jack barred. Members to proceed by the first or second train, or be disqualified from fishing.—A. SMITH, sec.

Convivial Angling Society, City of London, Sydney-street, City-road.—On Monday next, July 13, our return visit on the Anglers' Association No. 2 Eastern List, will take place at the above, when we shall be pleased to welcome brother anglers and friends and hope to get a bumper. On the 5th inst. there were about a dozen members out, and the following weighed in: Mr. W. Sparrow, a nice show of rudd, heaviest, 10oz.; Mr. G. Birch, bream; Mr. W. Adams, bream and roach; and Mr. R. Richard, roach.—P. JUCHAU.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—At the meeting on Wednesday, July 8, Mr. T. W. Tiller was duly elected a member of this club. Mr. C. Stallibrass has had a miscellaneous bag from the Lea, of perch, dace, roach (one 1lb. 8oz.) and one trout, in the pink of condition.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 5th instant most of our members were out, and the successful gentlemen were Messrs. Wright, Hills, W. Richardson, T. Midson, Wild, Flowers, Cogswell, Killick, Parram, and W. Midson, who had a fine show of barbel, roach, bream, rudd, dace and perch. On Tuesday, the 7th, the quarterly general meeting took place, when Mr. H. Killick was elected chairman, in the place of Mr. W. Midson, resigned. The balance-sheet was read and passed. Two new members were elected.—S. MALBY, sec.

Duke of York Angling Society, Dudley.—Mr. G. Warren, a member of the Duke of York Angling Society, Dudley, with a friend, angling in private water, on Monday, July 6, killed 10lb. of roach and perch, largest roach, ¾lb.; largest perch, 13oz.; also one trout, ¾lb.

Eagle Angling Society, Chesnut-road, Tottenham.—Our members have not yet thoroughly settled down to work, owing chiefly to the alteration of the Lea close season. However, on the 5th inst. Mr. Cooper showed in some roach caught at Ware; and on Tuesday last Mr. Dwyer captured at Staines nearly 25lb. of barbel, roach, and dace, and a grand sight they were. At our committee meeting on Tuesday evening last, nine new members were put through their facings and passed.—T. F. B., hon. sec.

Earlsfield Angling Society, Half-way House, Earlsfield, S.W.—There will be an outing of the members of this society on July 19, to fish for a prize offered by Mr. Kimber, M.P., time and conditions to be fixed next Wednesday. There will also be a special general meeting next Wednesday, to get out the prize list, and to discuss important business.—R. W. BIRD.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road.—At the meeting held on July 2, it was decided to fish the first competition of the season on Thursday, July 16 from Richmond Bridge to Teddington Weir, punt or bank, for three prizes, 10s. 6d. each; no prize to be taken with a less weight than 3lb. Train leaves St. Mary's at 7.52. To weigh in at the club before ten or disqualified. A guinea has been added to our prize list from Mr. Balcombe, New London Brewery, Upper Kennington-lane, per Mr. Dyne. Messrs. Myers and Ockelford were out on the 5th inst., with C. Hone, Staines, with the following result: Myers, 7lb., dace and chub; Ockelford, 4lb., chub and dace. A few eligible members wanted; visit previously required.—F. WOODS, sec.

[Received too late for insertion last week.—ED.]

Eustonian Angling Society, King's Head, Swinton-street, King's Cross.—On the 21st ult., we fished at Amberley for Mr. Abbott's prize, which was taken by Mr. Tarner, with bream; Mr. Barrett and Mr. Abbott also weighing in bream and roach. On the 28th, we also fished for a prize given by Mr. Neall (not taken). Mr. Neall's prize will be for the heaviest roach for the month of July, any water. I should like to see our members show up on meeting night.—R. NEALL, sec.

Great Northern Brothers Angling Society, Rob'n Hood, Southampton-street, Pentonville, N.—Our show of fish on the 5th inst. was very poor, with the exception of a fine tray of roach by a new member, Mr. Birch, who has made a very good start; J. Birch, roach, 16lb. 7oz., the fish were (for the time of year) in very clean and bright condition; Messrs. J. Hewitt, W. Barnes, C. Large, and H. Scott, showed a few bream, roach, rudd, and dace. We shall have a strong muster of members at Pulborough, on the 12th inst., when I hope the Central Association will receive the support it so richly deserves.—J. A. Fitch, secretary.

Gresham Angling Society.—The usual weekly meeting was held on Tuesdey, with Mr. A. W. Parker in the chair, when some discussion took place about the society's water at Kelvedon, and an arrangement was made by which better supervision could be had. Mr. Close reported having caught two bream, weighing 4¼lb.; Mr. Allen, two brace of trout; and Mr. Young, one and a-half brace. The programme for the next six months was laid before the meeting, and a committee of five was appointed to carry it out. On July 21, Mr. E. H. Bramley will read a paper entitled "Babble about London." A meeting which, it is hoped, will be largely representative of London anglers, will be held at the Gresham Rooms on Tuesday, the 28th, at which the question of the right of the public to fish in the Norfolk Broads will be fully discussed.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 5th inst. several of our members were out, Mr. C. Levoir bringing the largest catch with rudd; Messrs. Wells and Callcutt, also rudd; and Mr. Russell, roach, dace and chub.—W. Fenner, sec.

Hoxton Brothers Angling Society.—On the 5th, A. Hattemore had a good show of roach, weighing nearly 12lb.; J. Huntley, bream from Dagenham. The members will fish for the prizes left over from last season on the 12th, in the river Stort, roving, from Parden Lock to Harlow Bridge. The annual dinner will take place on the 12th inst., at the Rye House. The next No. 1 Eastern District visit of angling societies will take place at the club-house, the Swan, Bethnal Green-road, on Tuesday next, July 14.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street, W.—On the 5th inst., we had on our trays chub, perch, roach, dace, and gudgeon, weighed in by Messrs. Norman, F. Pain, A. Pain, and Liversage. A. Pope had some roach, but was too late to weigh in.—Snap.

Islington Angling Society, Jubilee House, Hornsey Rise, N.—The meeting on Monday evening last was presided over by the honorary treasurer, Mr. James Taylor; when the duly audited accounts of receipts and disbursements (showing a balance in hand) for the past twelve months, were laid before the members present, the result giving considerable satisfaction. A discussion on the subject of "The Lines used for Angling" was commenced, and will be continued at the next meeting. The customary vote of thanks to the chair terminated the proceedings.—C. S. B.

Islington Brothers Angling Society, the Rose, Popham-road.—Several of our members were out on the 5th inst., when Mr. Croker showed roach and dace, and Mr. Stretch had a nice show of roach, but got up too late to weigh in.—J. H. Herbert, sec.

Izaak Walton Angling Society.—As announced, the members will have their annual dinners at Mr. J. Lyndsell's, the Pied Bull, Stanstead, St. Margarets, Herts, on Wednesday, 15th inst., and the 19th inst. Those who have not yet sent in their names notifying their intention of being present will please do so at once, so that due notice may be given to our host as to the numbers that will be present on each occasion. The members will compete for four special prizes on Wednesday, the 22nd inst.; competitors may choose their own fishing waters, but not leave London before five a.m. on the day of the competition. There are also three specials to be fished for at Pangbourne, on the 26th inst. Mr. George Rogers weighed in chub on the 5th inst.—H. B.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—At a committee meeting on the 3rd inst., three angling and two honorary members were elected, making our total number of members one hundred and eight. Our host (Mr. Downe), proprietor of Queen of England Hotel, gave a prize value one guinea. Two competitions were arranged—first, a roving competition, to take place at Sonning on the 19th inst.; first prize, one guinea; second prize, ten shillings and sixpence. Second, a pegged-down competition at Tilehurst on Thursday, 23rd inst.; first prize, one guinea; second prize, ten shillings and sixpence. These four prizes are presented to the association by our president. The roving commission, which was postponed for two weeks, as it was thought the original date was too early to be a success, took place on July 5, when a good number of our members went on the path, and, we are pleased to say, returned heavily laden with fish. The following members weighed in: Messrs. Dexter and Wilmot (roach and dace), Mason and Evans (chub and roach), Carter (roach and dace), T. Salter (barbel and bream). The first prize was taken by T. Salter, with 18lb. of barbel and bream (including one bream, 3lb. 8oz.). We find it will be necessary to issue a revised prize list, a number of additional prizes having been given since first list was issued.—T. Salter, hon. sec.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 5th inst., several members were out; sport very poor, only Mr. Belton and Mr. Pearce weighing in a few dace. At our last meeting Mr. Bligh was unanimously elected a working member of the above, also one honorary member. I must inform members that did not turn up on last meeting night, that Mr. More's prize of 10s. 6d. is for the 12th inst., largest bream, Pulborough Central Association waters only.—W. Watling, sec.

Liverpool Angling Association.—There was a crowded gathering of members at our quarterly meeting last week. Mr. Leaman, the president, took the chair, and Mr. Titterton occupied the vice-chair. Two new members were nominated for membership, making thirty who have joined the association so far this year, showing the amount of confidence placed in the society by the anglers of Liverpool. The treasurer read and submitted his quarterly account of receipts and payments, showing a balance to the credit of the association of £18 4s., and the account was passed and adopted amid applause. Mr. Hughes withdrew the motion of which he had given notice, in connection with the election of members, out of deference to the expressed wish of those present. Sundry alterations of and additions to the rules and regulations since the last revision in July, 1889, were gone through *seriatim* and ordered to be incorporated with the book of rules and regulations. To pilot these, some twenty in number, through successfully, was a heavy task, but the president, by tact and decision, and with the able assistance of the chairman and vice-chairman, emerged from the ordeal triumphantly. It was resolved, with only four dissentients, that the right of fishing in the Ruabon water, be retained for a further period of twelve months from the 1st of October next. Prizes were presented to Messrs. Jeffreys, Bleasdale, Haughton, Baker, Roberts, Johnson, Bennett, and Gregory. The ballot at the meeting on the 16th, is for two eights for a visit to a specially good water, and those only who are present or send in their names will have a chance.—Richard Woolfall.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On the 5th inst. our members were at various waters, when we had some good shows of fish, the best coming from various parts of the canal. The most successful members were Messrs. Sansom, Bartlett, A. Fisher, W. Fisher, A. Clarke, J. Clarke, Milburn, T. Collins, Butler, and Gray.—W. F. Pearce.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—We have had some good shows of fish this week by Messrs. J. Osborne, E. Jermy, and H. Garratt. Mr. J. Osborne had several nice roach, scaling over 1lb.; and Mr. Garratt had one going 1lb. 2½oz. I hope all members will try and get up on Tuesday for important business. We still have a vacancy for several members; any gentleman wishing to join can do so at once by applying to the secretary, or of our worthy host at the bar.—Mr. Coombes, sec.

North London Angling Club, Tap House, Holloway-road, Highbury.—We had our smoker on Monday last, which was poorly attended, Mr. Stretch, juror, of the Islington Brothers occupied the chair; and a pleasant evening was spent. I take this opportunity of publicly thanking the following clubs who attended, the Lincoln and Globe, who showed up in strong force; also, the Islington Brothers, Anchor and Hope, North Western, City of London, St. John's, and to Mr. Butler, who was the only member who represented the Burton Piscatorials, the harmony was kept going by the following gentlemen—Messrs. Webster, Weaver, Dain, Bennett, Watling, Taylor, alias the Sheeney man; Wall Dean, How, Penny, and others. Mr. Butler recited in his well-known style. Mr. George Hoyie gives a 3½in. brass winch, on behalf of the club to the Central Competition, at Pulborough, on the 12th inst. On the 5th inst., the following weighed in:—Mr. T. Bell, bream; Mr. Black, chub. Mr. Parkinson was elected a honorary member at our meeting on Wednesday,—H. Stretch, hon. sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park.—On the 2nd inst. Mr. Schultz, senr., weighed in perch. It is particularly requested that members attend the Thursday meetings as we have four new members for election.—G. Schultz.

Old Ebor Angling Society, Yorks.—On Monday the members of this society (by the kind permission of Dunnington Jefferson, Esq.) fished their annual match at Cottingwith. The weather was very unfavourable, a heavy thunderstorm prevailing in the afternoon. The principal prize winners were—Messrs. H. Suter, J. Kelly, H. Dale, J. Evans, J. Humphries, W. Thornill, W. Mitchell, F. Lazenby, T. Clayton, and J. Aisbett.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—On the 5th inst., we had a nice show of fish, Mr. Bonsall winning the copper kettle presented by Mr. Crisp with some roach, Mr. Branchers had some good sport among the rudd. Messrs. Webber, Beck and Hutchinson, were elected honorary members of the society.—A. S. Duke, sec.

Phœnix Angling Society, the Crown, Old-street, N.W.—On the 6th inst. Messrs. Mares, Foster, Heelas, Elbourn, and Dove, weighed in a very nice show of tench, bream, perch, and roach. Several new members were made and two more proposed. Several prizes will be angled for on the 19th inst. Place to be named next Tuesday. All members please note.—W. Elbourn, sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—Several members were out on the 5th inst., Mr. Buck weighed in a nice barbel from the Thames. I hope members will turn up in force on the 12th, at Westbourne Park Station to take part in the match at Cookham any member can make himself elegable by applying to the secretary on the morning of the match.—J. W. Harris, secretary.

Prince of Wales Angling Society, the Globe, Lisson-grove.—On the 5th inst. we had one of the best shows on record, upwards of 90lb. of fish being weighed in, most of them being tench, the largest turning the scale at 2lb. 9¼oz. There was also a fine show of rudd by Mr. Dairy, and barbel by Messrs. Wilson and Davis. The above society fish a pegged-down match at Langley on the 19th, members to start from Paddington by the midnight train, on Saturday, the 18th. Further particulars can be had at the club-house. Three new members have been ballotted for.—W. B.

Queen's Angling Society, the Latimer Arms, Walmer, road, Notting-hill.—We had a good show of roach and dace on the 5th inst., taken by Messrs. Pearce, Messenger, sen., Thorburn, Fathers, Pratt, Cook, and Wrench. On June 28, Mr. Fathers had a nice barbel from the Thames.—F. G. Pearce, sec.

Rising Sun Angling Society, Horse Shoe and Magpie, Great Bath-street, Clerkenwell.—An adjourned special meeting was held on Wednesday last, Mr. Bradley occupying the chair, when it was finally decided to remove this club to its original quarters, The George, Brook-street, Holborn, on Monday next the 13th inst., and that a concert to celebrate the opening be fixed for Monday, the 20th inst., due particulars of which will be duly announced. It was also resolved that in future the meeting nights be Sundays and Mondays instead of Sundays and Wednesdays as heretofore. The auditors having duly inspected the books and accounts, the secretary read the balance-sheet, which showed that after paying the heavy expenses of last quarter, a satisfactory balance is carried forward. The report was received and adopted. Members will please meet at the new quarters, The George, Brook-street, Holborn, on Monday evening next as early as possible for the election of officers and other business.—J. Skinner, sec.

Rodney Piscatorials, Rising Sun, Harper-street, New Kent-road.—The following members weighed in on the 5th inst.: Messrs. J. Wigley, bream, 2lb. 3¾oz.; F. T. Lamberton, bream, 14¾oz.; Davis, dace, 2lb. 10¾oz.; F. Lamberton, senr., bream and perch, 3lb. 7¾oz.; Mr. Martin and Mr. Searle were elected working members. The next visit on A. S. V. L. takes place on Tuesday, the 14th inst., when I hope to see a good room full.—F. T. Lamberton, sec.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—Several of our members were out on the 5th inst., but only Mr. Webber and myself weighed in from the Upper Thames. Our return visit on the Anglers' Association will take place on the 15th, which I hope will be a success. Secretaries and members of other clubs will please accept this as an invitation.—F. C. Longland, hon. sec.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On the 5th inst. we had a good show of fish, consisting of chub, roach, dace, perch, and rudd, by the following members: Messrs. A. Barclay, J. Stanley, J. Yeo, F. Barclay, Burrows, J. Holden, Denyer, M. Day, and E. Perry. Messrs. Wells and Smith also had fish, but arrived too late to weigh. One of Mr. Stanley's roach turned the scale at 1lb. 4¼oz., and is now in Mr. Hesse's hands, the taxidermist. Last week's report should read "Most number of *tickets*" instead of "Most number of *fish*."—A. Barclay, secretary.

Royal Windsor and District Piscatorial Society.—At a meeting held at the club-house, New Inn, Eton, on the 8th inst., Mr. Howlett the energetic secretary, was the recipient of an angler's travelling bag, bearing on the inside the following "Presented to Mr. J. C. Howlett, on the occasion of his marriage, July, 1891, by the members of the Royal Windsor and District Piscatorial Society."—B. R. Bambridge.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—Very few members were out on the 5th inst. Messrs. Wood, Stone, Brocken, and Forrester; had a very fair show of fish. On Wednesday a fairly good muster of members attended and two gentlemen were proposed as working members, who will be balloted for next meeting night. We have room for others who would like to join a good old substantial club. Our meeting nights are Wednesdays and Sundays at 8.30 p.m. to 10.30 p.m., and longer, if any special business is to be done.—J. Wright, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On the 5th inst., several members were out, when the following weighed in some very nice fish: Messrs. W. North, bream, 12lb. 3oz., one fish 2lb. 14¼oz.; W. Raine, roach, one fish, 1lb. 3oz.; J. Petrie, a nice tray of roach and dace, 10lb. 9¾oz.; J. Barnes, roach and dace. On Tuesday last we had a good muster of members present, when some important business was gone into. The delegate report from the Central Association, *re* the competition on the 12th inst., was well received by the members. The election of officers for the ensuing year was also done, when the following were elected: J. Petrie, Tyler; C. Lumby, chairman; S. Cane, secretary; W. North and G. Saunders, auditors; S. Cane and J. Arrigona, delegates on the Central; J. Lovibond, jun., and H. Raine, delegates on the Clerkenwell Visiting List; committee, Messrs. H. Raine, J. Barnes, C. Holmes, W. North, and C. Lumby. All members taking part in the competition at Pulborough and fishing on the Central waters only, will be eligible to weigh in at the club-house for Mr. J. Barnes's prize. I should like to see those members who are in arrears attend on Tuesday next.—S. E. Cane, sec.

Silver Trout Angling Society, Bedford Head Maiden-lane, Covent-garden.—On the 5th July our outing took place at Amberley, and was very well patronised, sixteen members taking part in the competition. In consequence of the heavy rain and bad tide very few fish were taken; but our outing champion, Mr. Pettitt, was again first; Mr. Massey, second. Next Tuesday being our special meeting, all members interested are requested to attend.—Pelican.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—The members went to Amberley on the 5th inst., but it turned out a failure, three members only taking prizes. Mr. Barber, first, with bream; Mr. T. Jones, second, bream; Mr. Machin, third, bream. The following members also weighed in fish: Mr. McQuinn, a nice show of bream; Mr. H. Spencely, roach. I hope the members will meet with better success on the 12th inst.—R. Spencely, sec.

South London Angling Society, George and Dragon, 235, Camberwell-road.—Since last report a member sent up a fine perch from Wiltshire, weight on arrival 2lb. ½oz., when caught 2lb. 2oz. On the 5th inst. one member weighed in 5½lb. good roach. In future each undersize fish shown in the room will entail a fine of one penny on the captor.—J. J. F., sec.

South London United Anglers' Visiting List.—The next visit on this list will be to the Blackfriars A. S., held at the Winchester Arms, Southwark-street, on Tuesday, July 21, when I hope they will receive a bumper, as they are always well represented at every visit on the list. The first friendly competition of the season amongst the clubs enrolled on this list, will take place at Amberley, conditions roving, between Houghton and Timberley Bridges. In addition to the usual money prizes, there will be a marble timepiece, presented by Mr. Rennoize, of the St. Thomas's Angling Society, and half a guinea by Mr. Duke, of the Houghton Bridge Inn, Amberley. Tickets for the competition have been sent to every society on the list. Secretaries not having received same, or having sold them and require more, will oblige by communicating with the hon. sec. of the list, A. Conn, 12, Trothey-road, Bermondsey.—A. Conn, hon. sec.

St. Andrew's Piscatorial Society, Turk's Head, East-street, W.C.—On the 5th Messrs. H. Gong, King, and Harris had good shows of bream and roach. A special meeting is called for July 15, to decide time and place for the annual dinner. I trust members will show up in full force.—B. Chevalier, sec.

St. John's Angling Society.—Our shows of fish have been very small from public waters, but from private waters much better. Mr. Jackson has had the best show, thirteen fish, roach and tench, weighing 36lb. 8oz. At our last meeting Mr. Chester, late chairman of the Newmarket Angling Society, was elected a working member, and another member was proposed.—T. Thorling.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—The members of the above club intend fishing on the 12th inst. at Pulborough for the Central Association of London Angling Clubs' prizes. Their last quarter's balance-sheet was duly passed by the auditors, and gave great satisfaction, they having a large balance in hand.—G. Morton, sec.

Uttoxeter Angling Association.—This association celebrated its annual meeting in a decidedly practical form on Monday week. It is about four years since Mr. G. Lovatt, the energetic secretary, established the club, and in spite of the many hints thrown out at the time as to its probable success, it has gone on slowly progressing, though perhaps not quite so much as its originator could have wished. On several previous occasions Mr. Lovatt had endeavoured to get the members together by arranging for a dinner at his house, the Lion, but had failed, probably owing to its distance from the river. At last the happy idea struck him of giving this year's annual meeting the form of a day's fishing in the river. The part of the river Dove near Sedsall was chosen, and about forty put in an appearance. The weather was considered pretty fair for angling, with the exception of a strong wind. Some good catches were taken, including a fine pike (about 5lb.), chub, dace, and other small fish. A tent was erected near the iron bridge which spans the river, and Mr. Lovatt placed before the members an excellent cold luncheon, with an abundant supply of the usual "wash-down." Dr. Fletcher, jun., occupied the chair, and Mr. Pakeman, Derby, the vice-chair, and a short toast list was gone through. Votes of thanks were passed to those gentlemen who occupied the land over which the club fished, and the re-election of officers concluded the proceedings. Fishing was afterwards resumed, and continued until the shades of evening put a stop to the day's enjoyment.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—We had a good attendance on the 7th, Mr. Moning in the chair, faced by Mr. Smith. Mr. Whetstone was balloted for and duly elected. The following gentlemen weighed in on the 5th: Mr. Petty, dace and gudgeon; Mr. Smith, roach and dace; Mr. Ilsley, dace and gudgeon. Mr. Philips also had fish, but did not weigh them in. Members who want tickets for the Amberley match can have them by applying on any Tuesday evening.—H. C., hon. sec.

Walworth Waltonians.—At the last meeting, held at the St. Paul's Tavern, Westmoreland-road, it was decided, for the competition on the 12th, for two prizes given by Messrs. Rump and Risdon, that the members fish how and where they like, subject to club rules. Owing to our worthy secretary's absence, through the loss of his wife, the other business of the society was postponed until Wednesday next, at eight p.m.—W. L. Griffin.

Wellington Angling Society, Prince George, Hill-street, Walworth.—On the 5th inst., the first competition of the season took place at Amberley. Only two members had the requisite amount of fish to take prizes—viz., W. Gordon, first, and W. H. Bryant, second. R. J. Dartnall, having roach and bream not in competition. The remaining prizes will be fished for on the 12th inst., go where you please. Mr. John Jury was proposed as a member, ballot to take place on Wednesday next.—R. J. Dartnall, sec.

Wenlock Angling Society, Clothworkers' Arms, Arlington-street, New North-road.—Our first roving match took place at Pulhorougb, on the 5th inst., the following members weighing in: Mr. Casey, first; Mr. Frauces, second; Mr. Hardin, third, with bream and roach. The next return visit on the Central Association comes to the above society; notice of date will be sent round.—W.M., sec.

Western Piscatorials, Bear and Rummer Tavern, Mortimer-street, Cavendish-square.—Several of our members were out on Wednesday last, the 8th inst., and notwithstanding the great thunderstorm, the following weighed in at night—namely, Mr. M. Schmidt, roach, dace, chub, and barbel, 9lb. 12oz.; Mr. G. F. Jupp, roach, dace, and barbel, 6lb. 1½oz.; Mr. J. W. Bland, roach, dace, chub, and barbel, 5lb. 12½oz. Mr. W. Baker, of 52, Anchor-street, Southwark Park-road, was unanimously elected as hon. member.—D. W. Evans, sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Our members were out on the 5th inst., but sport was very poor, as only one member came to the scales—Mr. J. Newton, with 3lb. 7oz. of roach, one fish weighed 15½oz. Hope for better sport next week.—R. Lowther, sec.

West London Angling Club, Dartmouth Castle, Hammersmith.—The first club match of the season will take place on the 23rd inst. and the 26th inst., in any public water. Prizes and weights as in previous matches. Members fishing on the 23rd inst. must give notice at the club house on or before the morning of the match. Usual club conditions.—J. J. Hunter, hon. sec.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

REPORTS FROM RIVERS, LOCHS, &c.

English and Welsh Reports.

The Lower Thames.—General Remarks.—Although the loss of so many barbel in the tideway as reported last week is a matter of much regret, it is satisfactory to know it was not occasioned by any poisonous fluid escaping from the gas or dye works, but from another cause which is best explained by an official statement from Mr. J. G. Rough, the active head river-keeper of the Thames Conservancy, he writes to me as follows: "I beg to state that there has been large quantities of all kinds of fish killed. It is owing to the recent storms and the dry weather and spring tides, it has always the same effect on the fish. I have noticed this for years past, especially in the month of June, when the fish are weak. No doubt you will remember some years ago when there were such large quantities of flounders and other fish killed by the storm and spring tides." I have interviewed some of the fishermen on the subject, and they are of the same opinion, the barbel especially being weak and thin from spawning. One of the correspondents having stated there was no sign of injury on the fish, but they were in a very lean condition, under the circumstances is easily accounted for. The annual summer trip of the committee and friends of the T.A.P.S. will take place on Thursday, July 23rd, under the old arrangements, and the committee in order to carry it out this year on a larger scale, have engaged the very commodious steam launch of Messrs. T. Tagg and Son, the *Princess Beatrice*, at a considerable expense. The tickets for the trip and a superb dinner at the Castle Hotel, close to the Hampton Court Station, in the evening are half a guinea each, and can be obtained from Mr. W. H. Brougham, Pownall Gardens, Hounslow, who will be pleased to send all particulars. It is not essential that those who take tickets should be members of the T.A.P.S. The Henley Regatta not only takes anglers away from the Lower Thames, but several of the principal fishermen make a point of going there also, and the result is there are few reports coming in this week.—B.

Richmond.—Job Brain, sen., during the week twenty dozen of dace, and thirty barbel, and Henry Mansell 60lb. weight of roach and dace.

Twickenham.—C. Annessey, in one day, four dozen of roach and dace; C. Brown, in two days, seven dozen; Samuel Cole, in one day, five dozen, two barbel, and one bream; R. D. Jackson, in two days, eight dozen; and John Spong, in one day, three dozen and one barbel.

Teddington.—Charles Baldwin, in one day, five barbel; Joseph Baldwin, three barbel and a few roach and dace; B. Stevens, five barbel. A gentleman fishing by himself one day, got two barbel, weighing 13lb.

Kingston.—J. Wilkes, during the week, a few barbel, and a fair quantity of roach and dace; Mr. Sands, from occasional visits, five barbel.

Surbiton.—The anglers have been getting a few perch and chub.

Sunbury.—The punts of Messrs. T. and A. Stroud have been getting on, averaging six dozen of roach and dace in the day, and in one of the takes there was a trout of 2¼lb.; Messrs. E. Clarke and Son, during the week, twenty-one dozen of roach and dace.

Chertsey.—John Poulter, one day, with Mr. Hiscock, a brace of perch, weighing 2½lb., three eels and three barbel, and another day with Mr. C. Westell, six dozen roach and dace, and one bream.

Staines.—John Keene, junior, in one day with Mr. Martin, fourteen barbel and four bream, the largest barbel 5lb.; another day with Mr. Taylor, seven dozen of roach and dace, and four barbel; another day with Mr. Edwards, of the Clapham Junction Angling Society, ten dozen of roach and dace, and three barbel, and another day with Messrs. Eames and Wilson, five dozen of roach and dace and sixteen chub, the largest 2lb.; Charles Hone writes, "I have had good sport amongst the chub and dace—one day thirteen good chub, the largest 3lb., three barbel and five dozen of dace; another day seven chub and ten dozen of dace, and another day three chub and six dozen of dace. I am pretty busy just now, but the barbel are not well on.

Thames (Windsor).—Due to the heavy showers river is in capital condition, and with exception of jack, which are but little tried for as yet, fish have fed well. Several good baskets of roach, dace, chub, and barbel, have been taken. Of the latter, a member of the Friendly Anglers, London, out with James Gray, had nine on one occasion, but the best I have seen this season was a perfectly shaped fish of 4lb., caught by Mr. Marks, of Windsor, who, with Mr. Murley, had a very nice basket of twenty-three roach. Dace are taking gentles freely, one angler in three and a half hours taking in the Windsor weir stream over four dozen. Chub rise well to a good bunch of gentles or good sized flies, tipped with gentle. Gudgeon are getting together and will soon be affording sport to many ladies on the upper reaches of the Thames.

Ancholme District.—It has been a little unsettled during the week, but on the whole fine for angling. The following are the chief takes at one fishing. Messrs. J. R. and R. Spell, Sheffield, thirteen good bream, the heaviest of which was 3½lb.; Mr. E. Hawkins, 6lb. of roach, one of which weighed 1½lb. A local match of two hours duration was fished on Tuesday in which E. Hawkins came out first with 3lb. 10oz.; George White, second, with 2lb. 2oz.; and James White, third, with 1lb. 3oz. A spendid basket of trout weighing 14lb. was taken on a local private stream on Tuesday, total fish eighteen, the largest of which weighed 2lb., the second 1¾lb., and two or three others of about 1lb. each.—Thomas Ford.

Barle (Dulverton).—The rain has freshened up the river, and it is in fine order for fly or minnow. The Spiral and Devon minnows have accounted for some heavy baskets. Killing flies, Blue Uprights and Moor Palmer. A few salmon running up, and we should have some sport if passes were ended in the weirs at Tiverton and below. At present it is nearly impossible for fish to reach the higher waters unless we have an extra heavy flood.—Iron Blue.

Brighton.—Sea Fishing.—The sea has been quite too rough during the week for boat angling. A few boats ventured out yesterday and to-day (9th inst.). The water is quite calm again, so that renewed sport with bream, plaice, and conger, may be counted upon during next week.—H.

Chichester and Sussex Rivers.—Stormy has been the weather during the week; rain has fallen heavily, and in districts the water is much clouded. Strange that at Chichester Canal storm or flood does not affect the water, except in clearing it. Good sport has been had at Chichester among the roach and bream; but fish are not yet clean, and the record does not reach last week's takes. Chub have been feeding well on the Ouse, and several roach up to 1lb. each have been taken; while from the Ouse variety baskets of dace, roach, flat-fish, and carp have come to hand. The Brighton Anglers' Association held their annual outing at Laughton recently, when seventy members attended. The programme of prizes not got through will be competed for on the 12th. The newly-elected chairman (Mr. King) appears to give great satisfaction, and several new members have joined the association. Bass are in the harbours, and on the coast Brighton fish up to 10lb. have been taken.—George F. Salter.

Douglas (Isle of Man).—A good flood last week not only cleared the bottoms of the streams, which were getting rather foul, but has brought the water up to a good height in fact rather over the usual summer level, so sport for some time to come can be relied on. Although mackerel fishing continues poor there are plenty of other fish to reward both boat and pier anglers.—Stormy Petrel.

Dove and Tributaries.—Weather showery and water plentiful, fish recovered from May-fly stupor and are now on the rise and run after any food get-at-able. A young fishing visitor to the Birdgrove water took three heavy fish averaging nearly a pound each, in half-an-hour's fishing on Saturday evening last, with the caterpiller. A dish of two-and-a-half brace of good sized fish were taken from the Dove by Mr. Morbury on Wednesday with the Minnow. Mr. W. Prince took a dish of five brace the other day from the Dove Dale length. The Rev. A. G. Robinson took five brace on Wednesday last, we hear from the Birdsgrove water. There are few fishermen out on either public or private water just now.—D. W. and H. Foster, Ashbourne.

Idle (North Notts).—Water in good colour, but weedy. Farmers and others grass cutting make things even worse in this direction. About Retford Bridge and from the private waters above Carnston some capital takes of trout have been secured, but from the cause just mentioned fly fishing is almost out of the question. Dace are lively in this direction. Roach are now being taken about Bollam and along the canal the best being the gentle bream are also found along the canal, but are chiefly off feeding as yet. Rumour has it that the canal is to cleaned out towards Stockwith, which will improve the prospects of anglers. At this end of the canal roach are poor and small at present. From the river and drains about the lower district anglers are getting occasional baskets worth fetching. Nice perch up to 1lb. each, and bream up to 2lb. each, and eels, up to 4lb. each, have been banked within the last few days—L.

Lea and Stort.—Some few baskets of roach have been made, but nothing specially worthy of recording. Any quantity of bleak have been taken with the natural fly, on the blowline; eels have been fairly on and will now, if the weather remains settled, be well worth anglers' attentions in the late hours of the evening. On Monday, a barbel of about 5lb., was taken from the free waters at Cooks Ferry. There are a great many more barbel in the Lea than most anglers think, and I often wonder that they are not more persistently fished for. To make a good basket of those fish baiting with a lot of lobworms previously is necessary. A gentleman fishing in the Ferry Boat waters, on the 5th instant, landed a jack of about 5lb.; this fish he tells me was in very fair condition, and, of course, was returned as the gentleman was too much of a sportsman to be live-baiting or otherwise for fish out of season. Mr. Wilmott was on Wednesday evening trying for eels with his favourite bait—viz., mussels; he fishes until very late and does not expect to get much sport before the last train. Mr. Harrington, of The Bell, Edmonton, seems to be doing the right thing in stimulating the energies of the members of the Edmonton and Tottenham Angling Club, (whose meetings are held in his house) by giving a prize of one soverign to be fished for in the Stort between Burnt Mill and Harlow. Mr. Thurgood's ground bait (as advertised in the *Fishing Gazette*) seems likely to prove of value to roach fishermen.—Spliced Joint.

Little Ouse (Brandon Suffolk).—Taking advantage of the rather low state of the water, a lot of weed has been cut, and as roach are getting into good condition, we expect to have some good sport next week. There are some very large chub about.—H.

Lugg and Arrow (Leominster).—Both these streams are now running in good order for fishing. Rain has been had, but the water has not been altered. A few rods have been out; but fishing has been best of an evening, when the fish have rose better. Grayling fishing opened on Wednesday, July 1, and the water is supposed to be well stocked with fish. In the Arrow, on Tuesday, a nice lot of trout were taken with the fly. The Pinsley is in order for fishing, but low.—Gwynne.

Nene (Northamptonshire).—Some fair sport has this week been obtained by local anglers. At Wisbech bream are plentiful, and some well-conditioned specimens have been taken, from 2lb. to 3½lb. The champion bream here last season, scaled 5¾lb., but I have no doubt some monsters will be captured before this season has advanced far. Mr. Dobbs has, with several others, tried Wansford, where good angling can be found; and has had fair success with the bream. The recent rains have had a beneficial effect. Nothing much has been done among the perch at present.—Neneband.

Newmarket.—Rain has fallen heavily all through the Eastern Counties during the last two days, several of the rivers are full and getting coloured; weather cold and damp.—W. Howlett.

Norfolk, Suffolk, and Cambridgeshire Rivers.—Since giving my last report there is a great improvement in most all our waters. We have certainly had several severe storms, and many of our rivers are full. Still fish are feeding better. I had a try in the river Lark, Mildenhall, on Friday last, and took some very good dace and roach with the Caddis bait. I also tried Brandon, on Monday, 6th, and there the dace and perch were feeding much better. The water was then very low and bright, they took gentles and red worms best. I saw this day, 7th, some very excellent bream taken near Ely. One angler had over five stone weight, and several others three and four stone each, the largest fish I saw weighed 5½lb. The roach and perch are feeding better in this water, both at the Branch and Littleport in the Yare. Bream are well on, especially at Buckenham and Cantley. Well bait all day with boiled wheat and rice, and if the night is warm you may have good sport up to four o'clock in the morning. Roach are coming on nicely. From the Waveney very encouraging reports have been sent me. A friend of mine took on Monday, 6th, some splendid perch and dace, water light and bright.—William Howlett.

Norwich and District.—The bream are in nice condition, and anglers who are in the habit of visiting these waters can rely on some good sport. Roach also run to a decent size. I was informed that four stone of bream and roach had been taken at Cantley, several of the bream scaling 3½lb. Buckenham has already seen several visitors of the angling fraternity, and on Wednesday afternoon, Mr. W. H. Oury and Mr. Algernon Sidney Wilde landed five stone of bream.—J. E. W.

Severn (Shrewsbury).—The river to-day (Thursday) is in worse condition than it has been in for weeks, and it is so discoloured from the late rains that fishing has been out of the question. Mr. S. Bromley is the only angler whom I have heard of taking trout. He captured two fish early this week, with the Minnow, weighing 1¼lb. and 1½lb.—Piscator.

Tees (Barnard Castle).—With several heavy thunder showers this river is now well flooded, and doubtless the salmon will be able to travel over Dimsdale dam. Several good catches of trout have taken place amongst others Mr. Wilkinson, of the Demesne Farm House, got twenty-seven fish, weighing 6lb.; Mr. John Lax, two, weighing 1¼lb.; the old fisherman who never tires Peter, one, which weighed above 1lb.; and Mr. Wandless and others have done fairly well. A quantity of Black Gnat are on every evening, also Yellow Sally, but most of the above were got with bait after the flood. In the Estuary the boats are averaging three salmon per boat per day.—J. H. R.

Teme (Ludlow).—The Teme is still running in capital order for angling, being clear and a nice level. The weather has been stormy and strong winds blowing. The fish have been rising well at the fly, and a good few anglers have been out. In the Corve some fine trout have been taken with the bee grub and the fly.—S. Ludlow.

Teme (Tenbury).—In this district the water, notwithstanding the heavy fall of rain, is running in good order for either fly or bottom fishing. The weather has been changeable and angling has not been very brisk. A few anglers have been out, and some very nice lots of trout have been landed. On Monday a nice lot of trout were caught with the Marlow and Yellow Dun. The Rea, Kyre, and Ledwyche are all in order; sport in them quiet. Worcester.

Yare (Norwich).—The fickle weather has interfered with the sport on this river, and the bream fishing, which had been good, suddenly stopped, and one would almost think the fish had left the waters, but I am pleased to say that from all parts the same opinion prevails, that we have not had such numbers of fish for several years past, and as this is the belief of some of our most skilled and prominent anglers, I hope we shall find they turn out correct with regard to the roach. No fear need be seen of there not being plenty of good sport, especially between Brundall, Buckenham Ferry, and Cantley, each of which places are the spots to be tried by those fond of roach fishing. To-night (Thursday) it's almost as cold as October, and the wind all day has been half a gale; first-rate for the regatta, but bad for anglers.—Robert Moll.

Yore, Wharfe, Swale, Nidd, &c.—At last the welcome rain has come, and a good flood being the result, the above-named rivers will have got well cleansed, which was greatly needed, the bed of them being covered with green, slimy weed. I have had the pleasure of three days fishing with Mr. Halford, one day on the Wharfe and the other two on a typical dry-fly stream. On the former Mr. H. proved conclusively that the Wharfe trout and grayling are quite open to the attractions of a floating fly, that is, presented to them as he can do it. The river was fearfully low and clear, but I contrived by hard work to kill twenty eight trout, weighing 13lb. I had to take "a back seat" however, on Monday, Mr. H. killing thirteen trout, weighing 12lb., and I only had a brace to show. Tuesday was a regular soaker, and wet-fly had a chance. I killed nine trout weighing 8lb. with Brown Owl, Small Ant, and Knotted Midge. Mr. H. had five good fish with floating fly. I must say that the three days' fishing was a great treat to me, and I learnt one or two things in the art of dry-fly fishing which will probably bear fruit in the future. Since the flood came the bank fishers have had a royal time with the worm.—FRANCIS M. WALBRAN.

East and West Cleddau (Pembrokeshire).—Thanks to the recent rainfall, the rivers are now in good fishing order, and nice takes of sewin and trout have been made during the past week. Trout sport the best towards evening, and have been taking the minnow freely in the early morning. There are a lot of sewin up, and as the water is a good colour, sport should be good for another week.—H.

Lake Vyrnwy (North Wales, via Oswestry).—Heavy rain during the past week has put the water in good order, and those anglers who were fortunate enough to be on the lake did well. These gallant trout fully maintain their sporting reputation, for accounts still come to hand of whole casts being taken off. On Thursday, Messrs. C. W. Gedney and G. Ward brought in twelve lovely fish, 13¾lb. Friday, Mr. Gerard caught ten very nice ones, scaling 8lb., and seven again on Saturday. Mr. F. Weare was successful on Tuesday in taking thirteen plump fish, 11¼lb., and still more so yesterday when he got the prescribed limit and returned in good time with a splendid basket of fifteen, weighing 12lb. 2oz., most of which were taken between two and four o'clock in the afternoon. Mr. W. H. Watts was out for a short time and got half-a-dozen beauties. Heaviest fish: Mr. Weare, 2lb. and 1½lb.; Mr. Gedney, 1½lb.; and Mr. Gerard, 1lb. 6oz. Best flies: Black and Grouse, Zulu, Butcher, and Heckhum-Peckhum. The present is a most favourable opportunity for this lake. The trout are taking well, and very few rods are on the water.—LONG DRIFT.

Teifi (Lampeter, Cardiganshire).—The river is again in good ply, thanks to the rainfall of last week. Some nice trout have been taken chiefly in the evening, but no salmon for some little time past. Sport with trout should be good for another week at least.—H.

Towy (Llandilo, Carmarthenshire).—Sport with trout has only been moderate during the past week, due to more or less flood-water coming down, and baskets have varied from 2½lb. to 5lb. Dr. N. Davies, however, took about sixteen brace of nice trout with the fly a few days ago; and Mr. George Hughes, of Llandilo, also a good hand with the fly, took eight and a-half brace. We had a grand flood of water down last Sunday (a close day for nets), so hope for a further run of salmon and sewin, and a decided improvement in next week's fishing.—H.

Usk (Abergavenny).—The river is rather thick but falling to-day (Wednesday, the 8th.) Mr. R. W. Bigg caught a salmon on Saturday, weighing 11lb.; Mr. W. Davis, one, 7lb.; and Mr. Pochin, one, weight unknown, and two yesterday 20lb. and 16lb. each. If the weather keeps fine the water may be expected to be in very good condition for the fly on Friday. There is a great many fresh run salmon in the river now.—JOSEPH CLARE.

Scotch Reports.

Altnacealgach Hotel Waters (via Lairg, N.B.).—The various lochs have been yielding capital baskets since last reported. On Tuesday week Mr. Mann, Shrewsbury, on Loch Urigill, seventy trout, 17lb.; Mr. Eskrigge and Mr. Hall, Liverpool, on Loch Cama, fifty, 15¾lb; Mr. R. B. Eskrigge and Mr. Lupton, Liverpool, fifty, 13lb.; Mr. F. C. Clay, Mr. Mead, and Mr. Headlam, London, on Loch Veyatie, thirty-six, 11lb.; Professor Hurrowes, London, on Loch Mheallain, sixty-six, 17lb.; and Mr. Butter, Perth, on Loch Boarlan (a short time only), twenty-eight, 8lb. On Wednesday, Mr. Mann, on Loch Cama, thirty-nine, 10lb.; Mr. Lupton and Mr. R. B. Eskrigge, on Loch Veyatie, sixty, 19lb.; Mr. Eskrigge and Mr. Hall, on Loch Boarlan, sixty-four, 16½lb.; Mr. Clay and Mr. Headlam, on Loch Urigill, fifty-six, 16lb.; Mr. and Mrs. Barrett and Mr. Moulton Barrett, Perth, on same loch, fifty-one, 15lb.; and Mr. Butter, Perth, on Loch Cama, thirty-two, 11½lb. On Thursday, Mr. Mann, on Loch Veyatie, thirty-six, 13lb.; Mr. and Mrs. Barrett, on Loch Cama, forty-five, 12½lb.; Mr. Clay and Mr. Headlam, on Loch Mheallain, thirty, 8lb.; Mr. Dicken, London, on Loch Boarlan (a short time only), twenty-four, 7½lb.; Mr. Lupton and Mr. Hall, on Loch Urigill, forty-six, 16lb.; and Mr. R. B. Eskrigge, on same loch, thirty, 10lb. On Friday, Mr. Mann, on Loch Cama, four dozen, 16lb.; Mr. Hall and Mr. R. B. Eskrigge, on same loch, four and one-third dozen, 15½lb.; Mrs. and Messrs. Barrett, on Loch Veyatie, four and a-half dozen, 22½lb.; Mr. Lupton and Mr. Eskrigge, on Loch Boarlan, three and a-half dozen, 12lb.; Mr. Dicken, on Loch Urigill, twenty-six, 7lb.; and Messrs. Clay and Headlam on same loch, forty-seven, 12½lb. On Saturday, Mr. Mann, on Loch Veyatie, twenty-two, 8lb.; Mrs. and Messrs. Barrett, on Loch Urigill, seventy, 23½lb.; Mr. Dicken, on Loch Cama, forty-seven, 12½lb.; and Messrs Clay and Headlam, on Loch Boarlan, twenty-five, 7½lb. On Monday, this week, Mr. Mann, on Loch Cama, twenty-seven, 9lb.; Mr. Clay, on Loch Veyatie, twenty-seven, 8½lb.; Mr. Dicken, on Loch Veyatie, thirty-one, 8½lb.; Messrs. Headlam and Winston, on Loch Cama, thirty, 9½lb.; Mr. and Mrs. Barrett, on Loch Boarlan, forty-three, 13½lb.; and Mr. Moulton Barrett, on Loch Urigill, sixty, 15½lb. Total for the day, 213, 64½lb.; and for the week ending, 1,150, 438¼lb.—McB.

Auchintaple Loch (Forfarshire).—Sport continues fairly good. On Friday last week Mr. Fleming and Mr. Robertson, from Alyth, landed four trout, weighing 7lb. On Saturday, Mr. McDonald, Glenisla, had three trout, 5lb. On Monday, Mr. McDonald, from Aloa, fished six trout, 6lb., and on the same day Captain Montague McDonald, from St. Martin's, Perth, had four trout, scaling 5lb. On Tuesday Mr. Dow and friend, from Kirriemuir, landed ten trout, 10lb.—DAVID G. GREWER.

Ayrshire Lochs and Streams.—Capital sport is now being had on the Ayrshire Lochs, more especially on lochs Doon, and Finlas. Any bright flies are killing well, if there is a breeze on the lochs. I hear of some English angers, and a number of Glasgow anglers killing five and six dozen yellow trout per day. Dallmellington Village is the best centre; and there the angler has the choice of two hotels. Boats and boatmen can be had; but any part of Loch Doon can be fished from the sides of the loch. The lochs are free. In Garnock water, Mr. Robert Crawford, Kilbirnie, had a capital basket the other day of three dozen yellow trout, and on the following day he killed three and a-half dozen. Mr. James Crawford, of the High School, Glasgow, killed two and a-half dozen in Glengarnock river, and on Tuesday he made a nice catch at Routen. Waters in fair order.—HEATHERBELL.

Border Esk.—The recent rain have brought about the long-looked for rise in the Esk and the outlook for sport has considerably improved. There is now a good show of sea trout, and a few new run salmon are seen rising in the pools of the lower water. A good rattling flood is, however, much wanted to clear out the bed of the river. Before this event, which usually takes place about the date of the Langholm Common Riding, near the end of July, angling will not be at its best.—G.

Carron (Easter Ross, Ardgay, N.B.).—The weather has been so adverse that no sport worth speaking of has been got since last reported. Mr. W. Allis Smith, of Glencalvie, landed a few fish on the upper waters. The only other successes of the week were a salmon and a grilse on the Balnagown Arms Hotel water and a 5lb. grilse which Mr. John Mackenzie, Invercharron, caught on Craigs water on Wednesday. A nice fish weighing 10lb. was caught by Capt. Holder, London, on Tuesday.—McB.

Dee (Aberdeenshire).—Thunderstorms have been of daily occurrence all over the north, with frequent rains, which have increased the volume of the rivers to a certain extent. The slight rise in the Dee on Sunday brought away a fine run of grilse and salmon, and when once the water clears of its brown colour good sport will be had. On the Park water, Mr. Hugh McDonald landed a fine grilse of 5lb. last week, while a few were got on the Banchory waters. On the Inchmarlo water, Mr. Duncan Davidson landed four fish, scaling from 4lb. to 9lb., and a sea trout of 2lb.; while Mr. W. E. Nicol had a fresh-run salmon of 7lb. on Monday last, in addition to a sea trout of 2lb., on the Ballogie water. On the Upper Dess water, John Harper, keeper, landed a nice grilse of nearly 4lb. On the Glentana reaches sport has revived greatly during the past week. On the Invercauld water, at Ballater, Mr. McGregor and guests landed over twenty fish during the week, one got by Mr. D. Morgan scaling 19lb. on Wednesday last. There are plenty of fish in the pools, but they will not look at anything. The show of fish on the coast is reported to be quite unprecedented at this season of the year.

Don.—With last week's slight flood, a few grilse and small salmon were enabled to run the gauntlet during the Sunday close-time, and these will enhance the sport on the lower reaches. The mouth of the river is getting dirty, but this season it has been a treat compared with what it was during the past decade at this time of the year. An interesting dispute was last week settled in the Court of Session, Edinburgh, regarding the deepening of the river carried out some time ago by Mr. James, Leith Persley Quarries, and Messrs. J. and J. Crombie, cloth manufacturers, whereby, at the instance of the Messrs. Pirie and on the report of Mr. Blyth, C.E., an order has been made which will practically restore the bed of the river to its former level.—DON.

Esk (Langholm, Dumfriesshire).—Since last report we have had showery weather, which has kept the river in good order for angling. On Monday, Mr. Morrison had a good basket of sea-trout before breakfast, six averaging 2lb. each. On the same day, Mr. Hogg caught two weighing 5lb., Mr. Reid four, and several other anglers had smaller takes. On Tuesday, Mr. Maxwell, had one, 2lb. weight; and Mr. Hogg, two: weighing 2½lb. and 3lb. On Thursday, Mr. Hogg had one, and several others had good baskets of yellow trout. On Friday, Mr. Hogg caught four sea-trout, and other takes before breakfast were:—Messrs. Armstrong, one sea trout, 4½lb.; C. Glendinning, one 2lb.; J. Morrison, one 1½lb. The river is now in capital order.—WM. DOUGLAS, Eskdale Hotel.

Helmsdale (Helmsdale).—Sport here during the past week has been all but *nil*. The river was abnormally low, and few anglers cared to spend their time on what they might very reasonably consider a hopeless task. Still one or two fish have been got daily, either late at night or in the early morning; but now while I write the prospects are much brighter, rain having fallen heavily during the night, and has continued to, well on in the day, so it is expected there will be a rise in the river immediately, and if so this will clear the river of the *debris* of the sheep-washing, which has been going on for some days past, and which—owing to the poisonous nature of the materials used—must be very hurtful, not exactly killing fish, but sickening them, and putting them into a condition that they won't even look at fly or bait. The netsmen continue to obtain excellent hauls, having daily from five to seven boxes of salmon and grilse, and also a good many sea trout. The weight of grilse this season is somewhat under tho average of former years, but the quality is excellent. The herring being just about to begin will interfere considerably with the net fishing, as the boats passing in and out at all hours of the tido drives the fish from the shore.—S. C.

Inchnadamph Hotel Waters (via Lairg, N.B.).—The sport on Wednesday last was as follows: Colonel and Mrs. Flower, London, on Loch Awe, two and a-half dozen trout, 10lb.; Col. Gillespie, London, on Loch Assynt, one trout, 1½lb.; the same loch was fished by Mr. Diggory, Nairn (a few hours only), ten trout, 1lb.; by Mr. and Mrs. Lombi, Norwich, forty-nine trout, 14lb.; and Mr. Cookson, York, forty trout, 12lb., and a grilse of 4½lb. On Thursday, Loch Assynt was fished by Captain and Mrs. Greenwood, Yorkshire, eight trout, averaging ½lb. each; by Mr. Diggory, fourteen, 6lb.; and by Mr. Cookson, fifty, 16lb.; Colonel and Mrs. Gillespie, on Wee lochs, had ten trout, 4½lb.; and Mr. and Mrs. Lombi, on Loch Awe, thirty-two, 14lb. On Friday, Mr. Diggory, Nairn, fished Loch Awe for a few hours, and got two dozen trout, 8lb.; and Colonel Gillespie, on Davie's Loch, two trout, 3lb. The following were on Loch Assynt—viz., Captain and Mrs. Greenwood, fifty-one trout, 20lb.; Colonel Flower, twenty-nine, 8lb., and a grilse of 5lb.; Mr. Cookson, forty-one, 16lb.; and Mr. and Mrs. Lombi, who caught two dozen trout, 8lb., ono sea trout of 2½lb., a *Salmo ferox* of 3½lb., and a grilse weighing 6lb.; Colonel Gillespie was out on Loch Assynt on Saturday, and got three dozen trout, 13lb.—McB.

Kilmelford.—Capt. and Mrs. Falls, R.N., and Miss Leggatt (London), Mr. and Mrs. Kirby (Allesey), Mr. and Mrs. Carrick (Glasgow), Col. Harvie Dollar, Mr. Jevons and Miss Jevons (Cheshire), Mr. and Mrs. Chance (Carlisle), Messrs. Rennie (Dundee), Smith (Leven), S. T. Stott, Edwin Stott, and Harold Stott, Mr. and Mrs. Horsfield (Leeds), residing at Cuilfail Hotel, are having splendid sport on hotel waters. During last week the total catch of trout was ono thousand three hundred and sixty-one, and four hundred various sea fish. It is easy to predict, after the torrents of rain which fell during last week, that July will turn out the month of the present season. Last year it beat June hollow, and there is every reason to expect that it will do the same this year.—JOHN M. FRAZER.

Loch Buidhe (Bonarbridge).—On Thursdry last, Captain Holder, London, and Mr. J. MacPherson, Bridgo Hotel, landed twelve trout, weighing 6lb. in all.—McB.

Loch Cracail.—On Thursday last, Mr. Walter Scott Brock, Achinduick House, Invershin, and Mr. Laidly, London, landed twenty-one fine trout, the heaviest of which weighed 1¼lb. Several other good baskets have been made.—McB.

Loch Leven (Kinross).—Sport here is now at its worst, and several boats have returned to the pier during the week without getting a single rise. The stormy weather and clear and abnormally low water, however, accounts for this, although anglers of an evening have had some pretty fair sport. A few days ago a gentleman from Glasgow, who went out a short time in the evening, captured fourteen trout, 13lb. Some good mixed creels have been got of trout, pike, and perch. The latter appear more numerous than last season, and the late warm and bright weather has brought them to the shallows in large shoals. Last Saturday a boat out a few hours landed about forty very large ones near the Beech Hedge, while several other boats havo been equally successful. A local party who were out informs me that their largest perch scaled 3lb.—R. B. LAING.

Loch Lochy (Invergloy Hotel).—Excellent fishing was had last week on Loch Lochy, by Mr. J. Oden, Capt. A. Stevenson, and Mr. T. Twynam, besides baskets of trout, the first named gentleman caught on Wednesday a sea trout, weighing 3¼lb. On Thursday, one of 1½lb., and on Friday, one of 2¼lb. The fishing is generally good in the looh at present.—J. R. EGGE.

Loch Rannoch (Kinloch Rannoch).—The following is tho angling report and list of takes by gentlemen from the Dimalastair Hotel: On the 3rd inst., Dr. Kirke and the Rev. Mr. Lindsay, obtained a heavy basket weighing fully 11½lb.; and Mr. Noble and Mr. Turner had a nice basket of 11¾lb.; Mr. Nash on same day, secured a take of 11½lb.; and Mr. Graham, one of 11¼lb.; Mr. Singer had a nice basket of 7½lb. On the following day, Mr. Noble and Mr. Turner had a beautiful basket of 14½lb.; and Mr. Singer, one of 11¾lb.; Mr. Graham had a take of 10½lb.; and Dr. Kirke and the Rev. Mr. Lindsay, a basket of fully 10lb.: Mr. Nash also had a nice take of 8½lb.; on the 6th inst., Mr. Nash had a take of fully 7½lb.; and Mr. Noble and Mr. Turner killed seventeen fish, all heavy trout; Mr. Graham on same date killed eight trout; and Mr. Hodgson had fifteen; Dr. Kirk and the Rev. Mr. Lindsay had a basket of fully 13½lb.—GEORGE GOW.

Loch Tay (Kenmore, N.B.).—On the Hotel water on the 2nd inst., Mr. Parker got nineteen trout, 5½lb.; Mr. Anderson, sixteen trout, 4¼lb.; Mr. Allgood, nine trout, 4lb.; on the 3rd Mr. Allgood, nine trout, 3½lb.; Mr. Anderson, nine trout, 4lb.; Mr. Gardiner, eight trout, 2lb.; on the 4th Mr. Anderson, eighteen trout 5lb.; Mr. Gardiner, twenty trout, 6lb.; Miss Allgood, twenty trout, 7lb.; Doctor Rowland, ten trout, 3lb.; Mr. Straker, forty trout, 9½lb.; on the 6th Miss Allgood, fifteen trout, 4lb.; Mr. F. Graham, 4lb.; Mr. Gardiner, eight trout, 3lb.; Mr. Allgood, ten trout, 3lb.; Mr. Parker, twelve trout, 3lb.—W. KNIGHT.

Orchy (Inveroran Hotel).—The Hon. Rowland Leigh, London, fishing from Inveroran Hotel, on 3rd inst., had one salmon, weighing 10lb.; same day, Mr. Vernon Magniac, London, had one salmon, 14lb.; same day, Doctor Leigh, London, one trout, 2lb. On the 4th, the Hon. Rowland Leigh, one salmon, weighing 10lb.; same day, Mr. McKercher, Glasgow, had one salmon, weighing 20lb. On the 7th, the Hon. Rowland Leigh and Mr. Vernon Magniac had five dozen and eight trout averaging three and four to the pound; same day, Mr. Ness, Glasgow, had one salmon, 10lb. Rivers and lochs in full swing after rain. Plenty of fish.—DUNCAN A. FORBES.

Overscaig Hotel Waters (via Lairg, N.B.).—During the past two weeks some splendid baskets have been made of trout which are of excellent quality and of good average weight. The following record will give an idea of the sport obtained. On Monday week Mr. A. Paradox and Master Paradox fished Loch Shin and got forty trout, weighing in all 14lb., and a *Salmo ferox* of 3½lb. Rev. Canon Faber, Doncaster, tried Fiag beat and landed twenty-six trout, 9lb. On Tuesday, Messrs. Paradox on Loch Merkland, sixty-four trout, 18lb.; and Rev. Canon Faber, on Loch Griam, forty-seven trout, 12lb. On Wednesday, Messrs. Paradox on Loch Merkland, forty trout, 17lb.; Rev. Canon Faber, on Loch Shin, sixteen trout, 7lb.; and Captain Burton, Gloucester (a few hours only), nine trout, 4½lb. On Thursday, which was dead calm, Messrs. Paradox on Loch Merkland, fifty-two trout, 15lb.; Captain Burton, on Loch Shin, nineteen trout, averaging ½lb. each; and Mr. Criechton, Edinburgh, for an hour and a-half, on Loch Shin, six trout, 2½lb. On Friday, Mr. Barrett, on Loch Griam, forty trout, 13¾lb.; Messrs. Paradox, on Fiag beat, forty-four trout, 15lb.; Captain Burton and Rev. Mr. Porter, on Loch Shin, thirty-five trout, 15lb.; and Mr. Criechton, on Loch Merkland, thirty-seven trout, 15lb. On Saturday, Mr. Criechton, on Loch Shin, thirty-two trout, 11½lb.; and Captain Burton and Rev. Mr. Porter, on Loch Griam, forty trout, 16lb.; total for the week, five hundred and forty-eight fish, with a total weight of about 200lb. On Monday this week, Captain Burton and Rev. Mr. Porter, on Loch Merkland, eighty trout, 26lb.; Captain Murchison, on Loch Shin, twenty-four trout, 14½lb.; and Mr. Criechton, on Loch Griam, twenty-six trout, 13lb.—McB.

Shin (Inveran Hotel Waters, Sutherland, N.B.).—Mr. Buxton and party, Sutherland Arms Hotel, fished tho lower beats on Tuesday, and landed a salmon of 14lb. on Meadow Pool, a sixteen-pounder on Grief Pool, and a grilse weighing 5½lb. on Big Fall Pool. The total basket by Mr. Buxton's party during the month of June was thirty-three salmon, aggregating 420lb., and twenty-two grilse, 116½lb., or fifty-five fish, 536½lb. Since then Lord Braybrook and party have had as follows: On Thursday one grilse of 5½lb. on Big Fall Pool. On Friday one of 4½lb. on Poll Caolag; and on Saturday a grilse weighing 4½lb. on Poll Caolag, and one of 6½lb. on Big Fall Pool.—McB.

South of Scotland.—The rivers in this district have been much improved since last week's report owing to the number of showers that have fallen. Over all the angling may be said to have also improved. In the Annan quite a turn for the better has been experienced among sea trout. While this has been so with worm fishers, fly-fishing, on the other hand, is not quite the thing to be desired. Angling in Newbie Mill Dam on Friday with worm and drawn gut, Mr. Henry Boyd, Annan, killed seven sea trout, one of which weighed over 3½lb., and his whole catch weighed 11½lb. On the following morning he was out again at the same place, and succeeded in bagging five sea trout, one 3½lb., and the others 1½lb. each. On Tuesday the same gentleman killed three sea trout and two herling. Mr. James Scott, Lodge Cottage, had one of 3lb. and two others of 1½lb. each. Mr. McGiverin, postmaster, had a brace of sea trout weighing 3lb. Mr. Munroe caught 6lb. of herling and one sea trout. Mr. John Laurie had a very nice sea trout of 2lb. 10oz. and three berling. Mr. George Carrick, Annan, killed a grand sea trout in Northfield stream weighing over 3½lb. Mr. Wallas, gunmaker, Wigton, had one sea trout and a number of berling, and Mr. Iveson, Wigton, and others had a few yellow trout. Mr. James Thornton landed one sea trout; Mr. James Dixon one and three herling (with fly). In Mount Annan private water, Mr. Dirom, of Mount Annan, has been killing on an average one sea trout per day, and his fisherman about the same. The Rev. Mr. Kennedy had a capital basket of sea trout and yellow trout in this water on Monday. The Border Esk is giving good sport both in Langholm and Canonbie waters, and the sea trout are of a good average. In the course of a week or ten days berling are expected to be very plentiful in this river, and, as they afford the best of sport, the reports next week will likely be promising. In St. Mary's Loch quite a host of anglers have been out, and in every instance the catches have quite upheld the reputation of the loch. In the neighbouring rivers good baskets of yellow trout have been taken with worm and fly. Mr. White, of the Rodno Hotel, gives the greatest attention to anglers, and is always ready to give them the best of his advice on the prospects of sport and suitable flies. The Milk and Wamphry waters are now giving fair sport. It may be remarked that the South of Scotland rivers would be much improved with a good flood. Galloway streams are doing fairly well, and on the Fleet several good sea trout have been killed, one gentleman having six sea trout in two outings.—HEATHERBELL.

Tongue Hotel.—July 1, Mr. Bolton, on Loch Craggie, 8lb. trout; Dr. Phillips, on the kyle, four sea trout, 10lb.; Mr. Bourne, on Loch Halon, 16lb. trout. July 2, Mr. Bolton, on the kyle, nine sea trout, 14lb.; Dr. Phillips, on Loch Slamm, thirteen trout, 6½lb. June 3, Mr. Bourne, on the kyle, twenty-nine sea trout, 40lb.; Dr. Phillips, on Loch Slamm, one grilse, 2lb., also 14lb. trout. June 4, Mr. Bolton, on Loch Slamm, one grilse, 4½lb.; Mr. Bourne, on Loch Craggie, 10lb. trout.—A. CAMPBELL.

Ythan (Tidal, Newburgh, Aberdeen).—During the past fortnight, and especially during the late freshetts sea sea trout have been running very freely, and many good baskets have been made, by among others: Mr. and Mrs. Geo. Davidson, Wellwood, Aberdeen; Messrs. G. and A. Rennie, London; Mr. and Mrs. Piercy Smith, Sussex; Mr. and Mrs. Walter Smith, Kent; Mr. and Mrs. Leslie, Aberdeen. From now till the end of September, fish will be in the pink of condition, and capital sport may confidently be anticipated. October even, is often considered the best month of the season in favourable weather. There is only limited hotel accommodation, and as that is usually taxed to the utmost of its capacity, the hint to book beforehand may be of some value to intending visitors, and may prevent much disappointment and heartburning.—G. U.

Irish Reports.

Ballinderry (East Tyrone).—Angling remains about the average, as the river is too high and dark coloured to admit of very successful fly fishing. Last Thursday, on the Tullyliggan preserves (Mr. W. H. Kinley's), Mr. C. G. B. Kennedy had a bag of nine brown trout, all over 1lb. each, and in prime condition. Salmon are now running up well, and a few good ones have been landed by professionals, and I regret to say by poachers. On the Coagh reaches, Mr. C. B. Irwin, on Friday, had nine brown trout; Saturday, fourteen; and Monday, twelve trout; and on Tuesday he landed a brace of salmon, 9lb. and 11lb. respectively, on a very light trout tackle. Perch fishing is simply child's play at the bar mouth, they are taking so well. I paid a visit to this part of the river a few evenings ago, and I counted sixty engaged, and each rod landed from thirty to fifty brace of fish, from ¾lb. to 1¼lb. When the river fines down a little sport will be much better, however, in the incoming week a good many of our best anglers will be too busy observing the glories of the Boyne, and drums, orange sashes, and politics will for the time being usurp the place of the rod in loyal East Tyrone.—EAST TYRONE.

Erne and Lough Melvin.—Although the weather was anything but favourable for angling, capital sport was had on the Erne. Particulars: Mr. P. Cooper, in the week, killed four salmon and grilse, 18lb., 15lb., 9lb., and 7lb.; Mr. R. M. Thornley, three salmon. and grilse, 17lb., 9lb., and 7lb.; Mr. J. M. Summerville, eight salmon and grilse, 24lb., 16lb., 15lb., 13lb., 9lb., 7lb., 7lb., 6lb.,; Mr. C. M. Summerville, eight salmon and grilse, 22lb., 19lb., 18lb., 17lb., 13lb., 10lb., 8½lb., and 7½lb.; Mr. J. Hone, six salmon and salmon grilse, 17lb., 16lb., 13lb., 10lb., 7lb., 6lb.; Mr. Jameson, four salmon and grilse, 17lb., 9lb., 8lb., and 6lb.; Captain Barry, on Wednesday, one salmon, 16½lb.; Col. Wallace, in the week, five salmon and grilse, 17lb. 9lb., 8lb., 7lb., and 6lb. Sport continues good, and weather slightly improved. Trout fishing on Melvin is now first-class, and capital baskets are being taken.—M. ROGAN AND SONS.

Shannon and Lough Derg (Killaloe).—My prediction as to sport has been verified. Very nice fishing this week, but really good bags are bound to be made during July. June 22, Major Traherne, one grilse, 5lb.; 23rd, two grilse, 4½lb. each; Capt. Hardisty, one, 8½lb.; 24th, one, 5lb.; Major Traherne, one, 6lb.; 25th, Mr. Martin, one salmon, 12lb.; Major Traherne, two grilse, 7lb. and 6lb.: F. Johnson, two grilse, 8lb. each; 26th, Col. Willans, two salmon, 16lb. and 11lb.; Mr. Martin, one grilse, 4lb.; 27th, Major Traherne, one grilse, 7lb.; Col. Willans, one, 5lb.; Mr. Martin, one, 8lb.; W. Ellis, one, 6lb.; 29th, Major Traherne, one salmon, 13½lb., and two grilse, 7½lb. and 7lb.; Col. Willans, two grilse, 7lb. and 4lb.; Mr. Martin, one grilse, 8½lb.; Frank Johnson and W. Malone, one salmon, 27½lb.; 30th, Mr. Martin, four grilse, 7½lb., 7¼lb., 7lb., and 6¼lb.; Col. Willans, two grilse, 10lb. and 5lb.; July 1, Major Traherne, one grilse, 9lb. Supply of fish in the river something unheard of at Killaloe. River in good fishing order; heavy rain falling.—S. J. HURLEY.

[Received too late for last week.—ED.]

Strule and Mourne (Newton Stewart, Co. Tyrone.)—The welcome change came in the weather last week, and we had a very nice flood; and Dr. Watling, an English gentleman staying at Moore's Hotel, drew first blood on Friday with a nice small grilse in the pink of condition. On July 5, some of the local men went out and made a death, one of them, William Entirean, killing three and losing several. Monday, the rain started again, and the river has remained in a flood since, but the fish have rushed up in great numbers, and with fine weather we are sure of good sport till the end of the season, which lasts here till the 10th of October.—JOHN J. MOORE.

On account of great pressure upon our space, several river reports are unavoidably omitted.—ED.

CENTRAL ASSOCIATION OF LONDON ANGLING CLUBS.

THE monthly delegate meeting of this Association, held at its headquarters, the Bedford Head, Maiden Lane, Covent Garden, W.C., on Monday last, was very largely attended. Mr. C. A. Medcalf, president, occupied the chair; Mr. J. Kelly, vice-president. After the usual routine business, the enrolment of the Royal George, Shepherd's Bush, Izaak Walton, Hatcham Brothers, and North London Angling Societies, was fully confirmed.

The Blackfriars Angling Society, meeting at the Winchester Arms, Southwark-street, wishing to join the association, its enrolment was moved by Mr. Crumplen, and unanimously carried. The Gosport Angling Society, holding its meetings at Camden House, Markhouse-road, Walthamstow, was also added to the list; its representatives showing that its rules were well in accord with those of the Central Association, as regards weighable fish. This new society starts with thirty-five members, and there is every probability of rapid increase. A letter was read from the Gresham Angling Society in regard to pollution of rivers, and the secretary was instructed to say, in reply, that whenever any workable scheme was put forward to get rid of the evils complained of, the Central Association (which has always been foremost in helping forward any movement of importance to anglers), would give it their hearty support.

The Pulborough Competition, fixed for the 12th inst., came under notice, and various useful suggestions were made. It is believed this will prove one of the greatest competitions ever held by the anglers of London, and it was mentioned that a meeting, over which Mr. S. C. Harding will preside, is to be held in the Corn Exchange, Pulborough, to-day (Saturday, 11th inst.), when Mr. Crumplen will give an account of "Pulborough and its surroundings" for the benefit of the funds of the Anglers' Benevolent Society. Mr. Harding has also undertaken to give a recitation: and Mr. Slaughter, the favourite vocalist and photographer of the Great Northern Brothers, and several well-known friends will assist in the musical department. Mr. Nutt, of the Swan Hotel, has the matter in hand, and it is felt he will successfully carry it through. The prize list grows daily, and there are now about forty prizes in hand. Among these are a silver watch from Mr. Farebrother, a beautiful framed fish painting, by Signor Susini, given by Mr. Crumplen, and a gold scarf pin by Mr. Lack, who so well caters for the association at the Bedford Head; the Alma, Great Northern Brothers, Anchor and Hope, and other clubs, have also given prizes. Many others have been offered, of which the secretary will supply a list. The distribution ceremony is to be held on Monday, July 27th, at the headquarters of the association; Mr. C. A. Medcalf in the chair. The rules governing the competition have been carefully considered. No competitor is to carry more than one rod, and all fish must be of not less than the association standard. There will be a large staff of stewards in attendance. All tickets must be stamped at the Swan Hotel, on the morning of the competition, and the fish weighed in, to admit of after display, not later than 4.30 p.m. sharp. The committee feel that they can rely upon the sense of duty which has hitherto been the pride of members of the association, and trust they will take care on this occasion particularly to maintain its reputation, so that no complaint may arise from the large numbers likely to be brought together.

PARKER'S SELF-STRIKING FLOAT.

By Her Majesty's Royal Letters Patent.

A BOON TO ANGLERS.

Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding. No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.

"How is it, Tommy, you catch plenty of fish? but, though I get lots of bites, I can't hook 'em,"
"Well, Uncle George bought me one of **Parker's Patent Self-Striking Floats,** and the fish hook themselves."

Price 2/6 Post Free.

A. PARKER, 20, WALPOLE STREET, NEW CROSS, S.E.

James Ogden,

28, Winchcomb Street, Cheltenham.

Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.

JAMES OGDEN'S MULTUM IN PARVO FLY RODS, £1 1s.

HIS CELEBRATED TROUT FLIES, &c.,

Can only be obtained in Cheltenham at the Old Shop, 28, WINCHCOMB STREET, where all practical work is done by the same experienced hands as employed for so many years past.

THE "STANDARD" MEAT BISCUIT COMPANY.

"STANDARD" MEAT BISCUIT FOR PETS AND PUPPIES

TESTIMONIALS.

ST. BERNARD KENNELS, GORGIE, EDINBURGH.

SIRS,

I have pleasure in testifying to the excellence of your Puppy Dog Biscuits. They seem to be made of the best materials. Puppies, soon as weaned, eat them with avidity, improve rapidly in size and strength, and are maintained in perfect health.

I think the "Standard" Puppy Biscuits supplies a want, and only requires a trial to be appreciated by breeders.

W. R. REID.

SCOTLAND'S PREMIER KENNEL OF PUGS.

I have pleasure in certifying that the Puppy Biscuits manufactured by the "Standard" Meat Biscuit Company are of a very superior quality, and are far the best and cheapest I have ever used; they are eaten readily by puppies as soon as they leave the dam.

I think the "Standard" Meat Biscuit Company have no equal as to their Puppy Biscuits. They seem as near perfect as need be. R. TAIT LINTON,
Pharmaceutical Chemist, Edinburgh.

The above Biscuits are specially adapted for House Dogs and Pets, and may also be given to Puppies immediately after weaning.

PRICES—24s. per cwt., 13s. per ½ cwt., 3s. 6d. per 14 lbs., not carriage paid. Or, paid to any part of the United Kingdom, 26s. per cwt., 14s. 6d. per ½ cwt., 4s. 6d. per 14 lbs.

THE "STANDARD" MEAT BISCUIT COMPANY, EDINBURGH.

GRILSE, SEA TROUT, AND BROWN TROUT.

By RENAE.

ADVICE TO HOLIDAYING ANGLERS.

(*Continued from page 8.*)

As I refrain from claiming to be a "past master," I trust that my readers will understand at the outset that it is not to the knowing experienced deft hands that I address these remarks. It is solely for the inexperienced or little experienced that they are meant. Grilse fishing I shall place first, on account of grilse, in my opinion, being the highest game, taking precedence both of sea trout and fresh-water trout. On a fine rapid dashing rocky boulder-strewn stream it is delightful; indeed, no matter where got it must, if good, be acknowledged the perfection of lively, as undoubtedly ofttimes it is of exciting sport.

As regards the equipment for it, I shall speak first of the rod. The length that I personally like best is 15ft., or little more. This length—if a fleet rod with plenty of bone in it—will be found by most anglers to work admirably on the bulk of waters. It should be evenly balanced throughout, neither whippy nor stiff, particularly the latter at the point. A whippy rod, with but little pith in it, takes over long to land a strong heavy fish; while through the want of pliancy which a stiff point occasions, the hold of the hook consequent on the tenderness of the mouth of the fish, will often be found to give way. My own favourite grilse rod is a 15ft. 3in. one. It is of medium build, and springs evenly all along, from butt to point, which causes the distribution of the strain to be uniform as possible over its entire length.

To tackle strong large hard-fighting grilse with a slim "fusionless" rod on occasions when they are taking freely is what no one should do, and what no one with much sense will do, be it possible to conveniently avoid it. But it is done. I have frequently seen it done. He would, however, be a very stupid angler who would repeat it—that is to say, should the alternative of a suitable rod be within handy reach. Experience is the best teacher; and the novice who once has lost much time playing a fish with a feeble rod will not, if a wise man, allow himself very often afterwards to be placed in the same annoying, exasperating position. Perhaps eventually he loses his fish through, perforce, having to play it senselessly long. Anyhow, he loses a deal of valuable time playing it; with a proper rod he might kill three or four in the same space of time. To illustrate this let me mention a case of not "lang syne" date. Grilse were fresh-run, plentiful, and taking freely. The fishery was a fine length of broadish rocky water, on which two anglers were engaged. Each had a 15ft. rod, but how different were the two rods. As luck would have it, the angler with the silly flimsy rod got hold of a fish first. His companion in following down the long pool behind him soon had on one also. Both fish were now being played at one time, not a hundred yards apart. But while the first hooked one took half-an-hour to land, the other was out in eight minutes. The angler who had the right sort of rod having secured his fish, started afresh, and almost immediately hooked another, which he also landed, and, moreover, had time afterwards to hook still another, before his companion—who had been the first to get fixed—had succeeded in landing his one. I personally am aware that chagrined, disappointed, disgusted, *one* of the two learned a lesson which he did not fail to profit by afterwards. Example is before precept. Experience teaches—and I know that a bitter mortifying experience, such as I have quoted, will do more to make the tyro or young hand realise the necessity for proper equipment than all the lecturing which I could give him for his edification and advantage.

To give and take smartly are the two primary essentials of a model grilse rod. These are combined in the rod of the happy medium build which I have described. As indicated, too great a length of time is taken with a weak, whippy rod to land a fish, and in consequence superadded to this there is the by no means remote probability of the fish being lost. On the other hand, a very stiff rod will often be found to cause the hold of the hook to give. When the strain becomes great, consequent on the fish making a lightning-like rush, or unexpectedly flinging himself out of the water, the disadvantage of an unyielding rod is, alas, too frequently seen in the loss of the fish. Grilse, when fresh-run, are the most tender-mouthed of the *Salmonidæ*, and it stands therefore to reason that if they are held rigidly, the hold which the hook—usually but very small—has of them is liable to be broken. As a rule they do not, for their size, fight so long as salmon, but the fight they give while it lasts is faster; characterised by short rushes like lightning flashes, and frequently a succession of wicked, wriggling leaps following hard upon one another. It is then most commonly that disaster occurs and the angler is caused to rue his using a too stiff rod.

Sometimes it will be found necessary to have a 16ft. or even a 17ft. rod for grilse fishing. To be able to keep the fly over the fish—hang it above them so to speak—is many a time a decided advantage. But it is not on many rivers that the tourist angler will come across that this cannot be done nearly everywhere well enough with a fifteen-footer. Still a few large rivers there are like Spey, Dee, and Lochy where, especially after this time of the year when the fish run large, it is important that the rod should be of the length and strength requisite to—first, put the fly over the fish; second, keep them clear of obstructions after they are hooked; and third, bar accident, bring about their capture within a reasonable time.

Having said thus much about what I consider a model rod, I must now turn to another subject, but before doing so I should like to be allowed just one other word. The don and up-to-date angler will, if he does not call me a duffer, at least consider me a behind-the-time, old-fashioned "fusher" when I make known that my decided preference is for a rod of greenheart. Built of this wood, my model rod of whatever length most suitable, I consider by far the best for fishing for all sorts and sizes of the *Salmonidæ*, from the largest grilse down to the smallest fresh-water trout. Having made this statement, I shall not have anything further to say about the rod for any of the kinds of fishing to be hereafter considered, than simply to mention its length.

Wishing always to recommend what I myself have found answer best—what experience has taught me is best—I would say, with regard to the reel, have it of a good size, capable of containing plenty of line. It should run freely, but not so much so as to over run. It is very desirable to have it of considerable circumference. My own grilse reels, which I had specially made, have this, and so are deep and narrow. With them I never fear a fish breaking the hold, if good, or snapping the cast-line when he makes a sudden rush. Owing to the great circumference of its coil the line spins off without dragging the least, and again, when a fish rushes towards the angler, as often happens, it can be reeled in at a rate which in nine cases out of ten will keep the strain on him from being even for a moment lost—a most important consideration—since often the least slackening of the line will bring about the loss of the coveted prize.

The reel should in all cases balance the rod to a nicety, and though one such as I have recommended may seem too large for the rod, it does not necessarily follow that it should prove too heavy. It should have a revolving plate and be, to not exceed the proper weight, "composite"—of a nature to the angler's taste. To have it well filled is desirable, as thus the circumference which insures quick running out and rapid reeling in is secured, and much line also comes in handy on broad waters or where ready following close up on the fish is precluded. But I would seriously warn the angler not to so cram the reel as that the line touches the pillars. If this is not attended to he may come to grief through the line sticking, and this more than likely just at the very moment when victory appears certain. It is an everyday occurrence to see a fish, which but a moment before seemed dead done out, making, on catching sight of the angler or touching the bank, a final desperate rush out into the stream, and this would be a moment fraught with disaster to the angler whose line, probably not very evenly wound in the hurry and excitement of the struggle, had got jammed to the pillars. Matters like this, though they seem trifling, are yet of great moment. Every precaution which the angler may know or think will conduce to his success should be taken.

The reel line now comes in for brief consideration. The kind of line which I like best for grilse fishing, is that with a taper of some five or six yards—tapering gradually to not too fine an end. Why at the end or point of the taper it should not be too fine is because I attach a plaited tapered gut cast, and I abominate seeing the gut at the thick end of the taper (where it joins the reel line) any thicker to appearance than the silk to which it is united. Besides this—which is a matter of good taste—the casting cannot be so neatly done with a thick gut end attached to a thin silk end. To realise this fully the thing should be tried where best it can be seen, and that is on the dead level unruffled water of a pond or lake (for example). Then will the advantage of having the taper gradual all along from its commencement in the silk to its finish in the gut be strikingly apparent. For very neat fine fishing, so much so as not to be licked, I hold it a *sine quâ non* that the taper should run gradually and gently down the whole—from its very commencement in the silk five or six yards up, through the plaited and along the single gut, right to the hook.

As to the nature of the reel line itself I am very particular. Few lines have I seen that satisfy me entirely. Most of them have too little weight for their bulk; many are far too hard for working nicely in the water; and many crack through too much dressing or *too bad* dressing. As it is often very necessary to fish fine, the reel line, then, which I would most strongly recommend, should commend itself in these respects: Be not very thick; have a slight taper for several yards; be solid plated and very heavy for its bulk; be pliable to a great degree. These qualities will insure (1) neat and light casting; (2) light fly skimming where necessary; (3) the wind being easily cut or cast against; (4) switching accomplished where required; (5) and the almost instant running out of the line—to stretch straight down stream—by the water where streamy which is a most important matter in view of the true swimming and play of the fly. A stiff glazed overdressed line bulges and bellies in the water causing the fly to "set" in all manner of positions bad for scaring the fish, whereas a pliable line runs out at once to the full stretch with the current and thus makes the fly swim exactly true and appear to the fish as tempting as can be while performing the whole of its sweep or circuit. Of course to secure a continuous even taper none of the three or four strands of single gut (attached to such a plaited cast as I have described which complete the cast-line) can be very thick. It is, however, essential that they should be strong, and clean perfectly round gut which seems little thicker than that ordinarily used in loch fishing for brown trout will possess the requisite strength, and, if treated fairly, will stand up for days bar accidents—those unforeseen and unaccountable accidents which do sometimes happen. Without question light casts are of great advantage to the angler where the water is clear or both quiet flowing and clear.

Coming to the character and colour of the water brings me to the subject of hooks. Large hooks are of little use in the world for grilse fishing in summer anywhere, be the height and colour of the water what it may. From the middle of June to the middle of September I should not personally care to try long for grilse with a hook of larger size than No. 3 Limerick—Messrs. William Bartlett & Son's scale. I say so because this is the largest size that ever I have known to be absolutely required. Nos. 5, 6, and 7, will, I should think, to judge from my own experience, be found the best sizes in general. It is true that on some streams which have no great depth of water when the volume is normal, a very small hook will prove the best of all on bright days during a spell of very dry weather. I have seen Nos. 8 and 9 kill remarkably well on not a few rivers—even large rivers—when conditions were such as indicated, and it would be well, therefore, for the angler to have in addition to the best general sizes a few hooks of the very smallest sizes named. When the water has dwindled down to an almost unfishable state, the forenoon may generally be regarded as the prime fishing time of the day, and then it is that the small flies take toll of the fish most effectually. Evening fishing will then also be worth trying well, and for it the average size of flies will come in very handy.

I am made, from what I know of the various kinds of hooks, to have a decided preference for the Limerick bend. From No. 3 down to No. 6 I use the single hook, but for the sizes from the latter to No. 9 inclusive, I have no very particular preference, as the single in my experience has generally been found to answer as well as the double hook. Many anglers are positive that of the fish that rise and are hooked far more are killed on the latter than on the former. This, doubtless, is their experience, but I cannot say it is mine. When an angler has a strong bent in favour of the one, he naturally will use it most, and so, as stands to reason, get most fish with it. It is held by those who favour the dôuble hook that it balances better in the water, and therefore swims accurately true. But the single hook I contend has the advantage over it for fine light fishing, as it creates less "furr" in calm water, wherein fish often lie in the absence of nice holding streams near at hand. I need not, however, enlarge further on this subject, as the tyro or the little practised will learn and be able to judge for himself the merits of the two kinds of hooks when he has developed into an angler of some experience.

Worm-fishing for grilse may be engaged in with greatest success, with a considerably stouter rod, and a good deal less fine running tackle. Good, large, lively, lob worms on a good large round bend hook, which is my favourite, will entice both sea trout and grilse very readily when the water is rising, and for some time after it begins to fall. But when afterwards, as in the case of most moor and hill-run Highland streams, the siping from the peat makes its colour very black, the time for worming has pretty well gone past.

(To be continued.)

BARBEL, AND BARBEL FISHING.

By Alfred Jardine.

I have always had a special sympathy with anglers—yet, I am sorry to confess that sometimes feelings akin to envy have sprung up within me, when younger disciples of Izaak Walton, with time and opportunity at command, have gone to Thames or Trent, Lee or Kennet, to catch that sport-giving fish—the barbel; for when the "sere and yellow leaf" of life's autumn approaches, then veteran anglers must content themselves largely with the pleasures of memory, and the recollections of previous piscatorial victories.

The barbel season has already commenced; fish of large size and good condition have been caught; and records reach us almost daily of heavy captures—one of the most recent, of 75lb. weight, coming from Boroughbridge, on the Yore; but as the bait used are *said* to have been *dead gudgeons*, we should like this corroborated by the angler, the *hook tackle* used stated, and his method of placing the gudgeon *on* the tackle. During April and May it is not unusual to take barbel in swift streams on *spinning* baits, but such a capture in July with dead gudgeons, is certainly singular.

With the recent heavy rains, which will swell and cleanse the streams, there is every prospect of much better sport than was experienced last autumn, when, it will be remembered, there were but few occasions that barbel could be said to be "on" at all, and angling for those fish was almost a failure. Rivers were then unusually scant in volume, the water was stale, and fish consequently ill-disposed to feed; ground-bait was administered to little or no purpose in the choicest of swims, and during the favourite barbelling months of July, August, and September these fish were decidedly "off" their appetites, and respectable catches were few and far between; "red-letter days" were conspicuous by their scarcity, and not many anglers could speak of captures worth recording. One of the largest probably (last autumn on the Thames) was made on Sept. 1 and 2, at Sonning, by myself and a friend. Fishing with leger and Nottingham tackle, we caught twenty-eight barbel, weighing in the aggregate close on 100lb., the two largest being 9½lb. and 8lb. each, with others ranging from 7lb. down to 4½lb. The water was low and very bright; we found the fish in the deepest runs, mostly between the weeds.

The date recurs forcibly to my memory because it was the commencement of the "Feast of Saint Partridge," and the proprietor of that part of the river, who gave me permission to fish, and who, although ninety years of age, had been shooting most of those two days, killing a good bag of birds. This hale "old English gentleman" was so little wearied that he came to the riverside, saw me catch a good-sized fish, and wished me continued sport.

The barbel is essentially a plucky fish, and when hooked fights bravely for life and liberty. The powerful tail and large dorsal fin (which he erects and keeps tense by means of its strong front ray) acts much after the manner of a barge's mainsail, and gives the fish great power in the heavy currents he frequents; added to which, this bony ray is serrated upwards, like the sharp teeth of a fine saw, and in the opinion of many anglers is used as a means to sever the gut when the fish makes his javelin-like darts down into the depths of the stream.

Walton says rightly: "The barbel is so strong that he will often break both rod and line if he proves to be a big one." To hook and play a five or six-pounder in the swift waters of a weir pool is an experience to be remembered; his impetuous rushes and persistent downward "boring" affording sport of such high quality, that *Barbus vulgaris* is entitled to rank among the very gamest of fresh-water fish, for his "pluck and tenacity of life prolong the contest far beyond the measure of any other fish of equal weight, the Thames trout himself not excepted."*

It will, of course, be conceived that angling for barbel demands the very best of tackle. The rod for legering should be of lance-wood, or greenheart, moderately stiff, about 9ft. long, and with upright rings. My own favourite one is in two joints only, was made by Ogden Smith some fourteen years ago, since when it has been the death of hundreds of fish (including a 15lb. pike), and is to-day perfect and strong as when first constructed. The rod for "Nottingham fishing" should be from 11ft. to 12ft. in length, and though springy, not too much so, but with a certain degree of stiffness. I would recommend one built by D. Slater and Co., of Newark-on-Trent, who have recently brought out some capital rods, with pine butts, cane second and third joints, and lance-wood tops. With these, and Slater's combination reels, an angler is properly equipped for either "legering" or "spinning," or fishing in the Nottingham style. When legering in the heavy waters of a weir, with possibly a rugged stony bottom, it is best to use salmon-gut traces, which may be stained pale blue or olive—the last 2ft. or 3ft. between the bullet and the hook should be stained trout-gut of moderate fineness, but carefully selected for strength; and there are no better baits than small lob-worms, nicely scoured in moss for some days to render them bright in colour and tough. Anglers differ, however, as to the most attractive way of baiting the hook with worm. My own experience is, it is best to use a short-shank No. 5 round bend hook, and to put its point "tenderly" through a very small bit of the worm, about the middle of its length, concealing the point of the hook. This method injures the bait but little, and allows it to crawl and work about the bottom in so very tempting a manner that fish can seldom resist taking it. The old-fashioned method of threading a worm through its head and all its length on a long-shanked hook, leaving a bit of the tail hanging over beyond the barb, does very well when barbel are hungry and feeding keenly; but such past-masters as J. P. W.—J. W. Gant, and many others I could name, will "have none of it"—they bait their hooks in the way I have described.

It must be getting on for twenty years ago that Edward Sheppard, of Mapledurham Loch, showed me this "dodge," when I was fishing in the annual barbel competition of the Piscatorial Society. The Thames was in heavy flood, but he had judiciously selected, and sparingly baited, a quiet eddy, where were plenty of fish, resting from the stress of stream. The result was five barbel, weighing 25lb., which won me the prize, and, in addition, twenty-five grand roach, weighing 23lb. The whole of the fish were caught with lob-worms on light ledger tackle, and with the rod (built by Ogden Smith) previously mentioned.

"Legering" has been so often described in the pages of the *Fishing Gazette* that it seems somewhat superfluous to do so again; but in case any young angler is not quite *au fait*, the way to proceed is to gather the line (which should be waterproofed and fine, though strong) into the left hand by a series of small coils, which lie loosely in the palm, thus drawing the ledger-bullet up to near the top ring of the rod; then, with a gentle swing, *not a jerk*, cast the bait into the swim or eddy at the desired place, holding a tight line, the rod at an angle to the line, and a foot or two above the surface of the water. Some anglers prefer to throw "off the reel"—a Nottingham one, of course—and to keep the line tight by placing a finger on the edge of the reel. Either method answers well. The bite of a fish will be instantly felt; when, if slight and gentle (for sometimes the barbel bite like roach), the rod-top should be depressed a little, so as to slack the line; and on the second bite, which most probably will be bolder, the hook should be driven home by instantly tightening the line with a firm turn of the wrist, rather than a violent snatch. When the barb is thus imbedded in the leathery mouth of the fish, there is little chance of a "break-away" unless the tackle parts. It is always prudent to try hooks first before using them, for if too much tempered they are brittle, and likely to break at the bend or barb; while, if soft—*i.e.*, insufficiently tempered—they straighten under the strain, and the fish escapes.

Sometimes, however, barbel will merely "nozzle" or turn over the bait, as if in a spirit of inquiry or, maybe, unfavourable criticism; or possibly a crafty old stager attempts to suck off the head or tail of the worm, avoiding the hook, thus sending a thrill of expectation up the line. Gentle twitchings or "taps" frequently proceed from a shoal of dace and roach which have invaded the swim, allured there by the ground-bait; but at length the unmistakable sensation of a well-defined bite makes the angler's heart beat faster, and then comes the excitement of a tussle with, maybe, a six or seven-pounder—a pleasure "better felt than described," for the fish does not soon "give in," like a chub or bream, but fights so long as any strength remains; and when he appears about to "throw up the sponge," no sooner does he catch sight of the landing-net than he seems to take a new lease of life and advantage, perhaps, of some want of skill or carelessness on the angler's part, then snaps the tackle, and gets clear away.

---

* Rev. J. J. Manley, Fish and Fishing.

It is a fact beyond dispute, and well known to all barbel anglers, that many "breaks away" will utterly ruin a barbel hole or swim. These fish (like perch) seem to have the faculty of communicating to one another that the "lobs" they are feeding on are not salubrious (for stings are in their tails), that affairs from a commissariat point of view are not at all "serene," and they suddenly cease to feed. I have known one of the best barbel holes of the Thames spoiled for most of the season in consequence of an unskilful angler leaving half-a-dozen broken legers hanging to the jaws of the barbel there.

"Nottingham fishing," or "travelling," is a pretty method—more artistic than legering; and under certain conditions of clean, gravelly, level swims, with moderately clear water, is, in some rivers, even more killing. It is, however, somewhat trying, as this style necessitates much standing, especially if fishing from a river bank; but when legering the angler is at rest, quietly sitting on a chair, or the well of his punt.

Having fitted up the Nottingham rod and tackle, selected a float adapted to the strength of the stream, and the weight of shot needed; next plumb the depth of the swim, adjust the float accordingly, but so as to let the bait drag two or three inches on the bottom. I should explain that when the swim is some distance from the bank, and cannot be plumbed, the depth may be guessed as near as possible, and the float placed higher or lower, until it "cocks" properly; if it lies flat on the watert, he float is too far away from the shots, and must be lowered a few inches. A few trials and a little patience will soon determine the depth of the swim, which being ascertained, sufficient line should be drawn off the reel and neatly coiled on the grass or floor of punt, if clear of obstructions; or, better still, in the hand, as previously described. Many anglers prefer to cast from the reel—a very good method when "traveller" fishing. The bait should be swung out gently into the top of the swim, without splash or noise, and the float held a little back, so that the bait "trips" along the bottom in advance of the shots, thus coming to the fish in an enticing and natural way. On this, much of the success depends when fishing in the Nottingham style for barbel and various other fish.

To ensure good sport it is generally necessary to ground-bait the hole or swim previous to fishing by throwing in some handfuls of chopped-up lob-worms, in order to draw the fish together and keep them there; but they should be left at least twelve hours, by which time the fish will have consumed the "baiting," and be eager for more food. The hook-baits should be the reddest and brightest of the worms, well scoured in moss; those without the fleshy knots, known as "maidens," are the best to use. Sometimes scalded "greaves," the refuse of tallow-chandlers' factories, proves a killing bait, the whitest pieces being selected for the hook, and the less sightly mixed with clay into balls and used for ground-bait. What is termed "cross-baiting" is worse than useless—that is, fishing with worms on a baiting of greaves, or *vice versâ*.

The barbel gets his distinctive name from the beards, or *barbules (barbæ)*, on his nose and upper lips; these, no doubt, enable him to find food as he "roots about" like a pig among the stones and gravel at the bottom of the streams and the deep pools. Barbel spawn in May, as a rule; rapidly regain condition, and make for the weirs, in the heavy waters of which they are often caught by anglers spinning for trout. Some years since, when fishing the Kennet one fine April morning, I caught a 12lb. barbel on a large "phantom bait," and after a quarter of an hour's splendid sport I grassed the fish. A right reverend angling companion was with me; also Mills, then of Caversham. The fish being captured within the fence months was returned to the river. On another occasion, at Molesey weir, fishing with William Millbourne, I caught a brace, "spinning," of 9lb. and 6lb. This also happening in April, they were replaced in the water. And my friend, J. P. W., had two such experiences, I am informed, early this season. In April, barbel will at times take almost any moving bait.

But, it is said, "Exceptions prove the rule." In July, 1879, a gentleman and his wife, fishing the weir-pool of Streatley-on-Thames, with Ned Andrews for their attendant, the lady caught, on spoon-bait, a barbel just exceeding 9lb. I had the pleasure once of landing one for Mr. T. W. Gant, of 11½lb., from the "Gate Swim" at Sonning. It was killed after half-an-hour's superb sport on light Nottingham tackle.

But, alas! the glories of Sonning, from a fisherman's point of view, have departed. The fishing is not what it was; and that charming hostelry, the Old French Horn, embowered in roses and honeysuckles—erst an angler's paradise—so admirably managed by the then proprietor, William Hull, and his excellent wife, is demolished, and a pretentious inn erected in its place.

The White Hart, on the Berkshire side of the river, is clean and comfortable; good viands and cooking can be obtained there. The only other place is a public-house called the Bull, in a bye-lane, removed from the river.

When "legering" for barbel, other fish—such as perch, chub, bream, &c.—are frequently taken; and occasionally a large trout succumbs to the allurements of a lob-worm, thus meeting with an ignominious end. Several splendid Thames *fario* have been caught by anglers when "barbelling." Strange captures sometimes occur. It is recorded that Bendigo, the noted pugilist, when barbel fishing from Trent Bridge, Nottingham, hooked an old woman, who, ten days previously, committed suicide by jumping into the river; and as he caught her on fine tackle in a heavy stream, for half-an-hour he had immense sport before he landed her.

Recently I had a letter from a friend in America who is fond of fishing, telling me how, in the autumn of last year, he went "legering" in one of the rivers of New York State. Among other queer fish, he hooked and, after some trouble, landed a 24lb. *Troiynx ferox*—which means in plain fisherman's parlance a "snapping turtle." As his bull-dog was dead, he took it home, and chained it by one of its legs in the front garden, to snap and bark, and keep vagrants away; having accomplished this, the turtle was killed, and made into soup, to feed and fatten my friend's children.

(*To be continued.*)

Notes and Queries

MR. JOHN COOPER, of 28, Radnor-street, St. Luke's, called on us, on Tuesday last, with one of the loveliest trout we ever saw, both for shape and colouring. A 16lb. fish from Lough Neagh, Mr. C. had set it up excellently for a gentleman at the West End, who is making a collection of specimen trout. We hope he will get the 30lb. Lake Geneva trout which he is going for this autumn.

A WELL-KNOWN salmon angler is offering some salmon rods for sale in our columns this week.

WE regret to hear of the death of Mr. Wilson, who for some time rented the salmon fishery of Garry and Loch Oich. Mr. Wilson did a great deal for this fishery by buying off nets, which it is to be hoped his successor will continue, as the fishery is one of the best in Scotland for very large fish, and second to none north of the Dee. We understand several applications have already been made to the factor of the Glengarry estate for this excellent piece of fishing.

DEATH OF A NOTED ANGLER.—Mr. William M'Murdo, Ecclefechan, the well-known angler, died on Sunday morning last week, at his residence, after a brief illness. Only a fortnight before he was out fishing in the middle waters, and as he returned home late he caught a chill. Mr. M'Murdo had attained the age of seventy years, and there were few veteran anglers anywhere in the South of Scotland who could compare with him. A deacon in the Free Church of Ecclefechan, he was a most useful member of the congregation, and there his kindly advice in church management will be much missed by both minister and congregation.

FATAL WAGER.—Mr. John Hedley, an hotel-keeper at Yarm, near Stockton-on-Tees, and well known as lessee of the Tees salmon fisheries, made a bet on Tuesday night with a social party in his house that he could swim across the Tees and back with his clothes on. The party adjourned to the river bank, and Mr. Hedley plunged into the stream, but speedily sank and was drowned. His body was recovered on Wednesday.

A MONSTER SALMON.—On Monday morning a beautifully-shaped salmon, weighing 62lb., was caught in the nets at the Limie Hough, Hole Station, immediately below Perth. It was in splendid condition, and is the heaviest fish yielded by the Tay for six or seven years back.

CLOSE TIME ON THE TAY.—Messrs. MacKenzie and Dickson, solicitors, clerks for the Tay Fishery Board, have received intimation—in reply to a communication from the board—from the Secretary for Scotland, to the effect that he is not prepared to alter the annual close time for net fishing in the Tay district, as fixed by his order of the 15th May, 1888.

A NEW FISH STORY FROM NEBRASKA.—A new fish story comes from Nebraska. It comes in the garb of truth; and how beautiful a thing is truth—and how rare! A certain man has a farm on the Missouri River bottom, near Elk Valley, in the State named. A week ago the river began to rise, and he saw that his land would all be submerged. To be prepared, he transferred his family and also his stock and movable property to higher ground. There was on his farm exactly two miles of barbed wire fencing. It was five-wire fence, and there were thirty-two barbs to the rod, or a grand total of 102,400 barbs. It will hardly be believed, but with a patience worthy of a great cause the farmer and his hired man baited everyone of these barbs with a small bit of meat. They finished, and escaped to the bluffs just as the water came up. For twenty-six hours the water remained five feet above the top of the fence. Then the river receded, and the master and his servant went down to see how great had been the catch. We are told that he found a fish hanging from every barb except three, or 102,397 in all. There were pickerel, bass, pike, suckers, and many other varieties. They averaged 10lb. each in weight, giving him the grand total of 1,023,980lb. of fresh fish. The hired man was discharged because he had not properly baited the three barbs which failed to catch any fish.

GROPING IN THE TAFF VAWR RIVER.—"I believe I am right in stating that there is a board of conservators connected with the river Taff. How is it, then, that the keepers are never seen in the neighbourhood of Cefn Coed and Cwmtaff, where at every period of drought there may be seen dozens of boys and men daily groping? It is no exaggeration to state that during the past few weeks more fish were taken from the river Taff by these means than the many rods which are used will take in three years. This is not the only cowardly and unsportsmanlike means of taking fish. There are also many nets in constant use by night. Now, if it were not for the few feeders passing through Cyfarthfa Works, and one or two other parts more closely watched higher up the river, the fine trout for which the Taff is noted would be all but extinct. It would be interesting to notice the class which indulge in such questionable pastime. Observers cannot fail to see that the majority are nothing but loafers, who give but a day or two a week to the earning of an honest wage at the collieries and iron works. I trust the board of conservators will see to this matter."—"*Angler,*" *in the* "*Western Mail.*"

"UP WITH THE YELLOW."

BY EDGAR S. SHRUBSOLE.

A DAMP, dull, dismal morning; a deplorable drizzling rain; a detestable, depressing, "dem'd awful" outlook—east, north, west, and south; and, to cap all, a railway journey without a friend, for my intended companion did not "turn up" at the railway station. Rather a bad beginning for a day's trout fishing, eh?

Yet, as the train rushed through the quiet country, soothed by a pipe of the weed some faddists would tell us is rank poison, I was eagerly anticipating the steady rise in pools, streams, and glassy glides I know so well, of pound-and-a-half trout, my trusty rod was already bowing to the efforts of the well-conditioned fish to escape, and involuntarily I looked towards my landing-net to make sure I had it with me. For be it known, oh! gentle reader, that I am no believer in throwing up the sponge until a fight has been thoroughly fought—one never knows how near victory is, especially when trout-fishing. Why, some of my best days have been when wind, weather, and everything *but water*, have been dead against sport, judged from a "when the wind is in the south," &c., point of view.

Yet Mark Tapley would have had good cause to be proud of being "jolly" had he been placed like me. When at the station next to the one at which I was to alight, a local gentleman, exhibiting unmistakable signs of agricultural pursuits being his means of gaining a livelihood, told me there had been a tremendous downpour of rain during the night up the valley, "au' fur zertain, zur, t't rivur 'll be flooded afore dinner." However, when I got by the river side the water was coming down about right; and so, notwithstanding the rain still persisted in drizzling, and things generally looked anything but promising, I put up my rod and prepared for the fray.

While thus engaged I noticed a rise a few yards away, and securely mounting a light Blue Quill, I soon had it over the fish, and the fish in my net. It was only a half-pounder, barely that in fact; so it went back; for on the water I was fishing you are not supposed to take less than ½lb. fish, and as there are plenty over a pound I generally give limit fish the benefit of the doubt. Not a bad beginning; and a little farther on another, and yet another under-sized fish was returned. Then I came to a favourite stretch of mine, where, on the right bank, the river is very shallow, gradually deepening towards the left bank, which is fringed with bushes, under which a strong deep stream flows and heavy fish are wont to lie. It is easily fished (comparatively) when the wind is favourable, but in an awkward wind it would make the editor of a religious magazine "quote" from a profane author.

When I reached the stream the wind was not bad and not good. As I stood watching for a rise the rain ceased to drizzle, and the atmosphere quite suddenly became much warmer. Not a fish was moving, not a fly on the water. Very carefully I peered forward into the green depths of the stream, and presently I saw a good fish steadily swim out into a feeding position. He certainly wanted a fly, and I tried him with the Blue Quill; but my gentleman simply ignored it as it floated by him with its little wings cocked up—a perfect picture.

He was worth a little attention, so I tried two or three different patterns over him, all to no purpose. Then I changed to the Yellow Dun (my favourite fly), and the first cast I had him. He took it like a child takes a barley-sugar stick—right in his mouth; and with a shake of his head went away, like the good fish he was, surprised at his want of caution, undoubtedly, and disgusted with himself for having been so easily deceived. He showed good sport, but had to give in in the end; and as I laid him in the bottom of my creel I could but admire his shape, size, and condition; I am afraid that I also had thoughts of what a toothsome breakfast he would make.

A few yards farther on in the same stream the dainty yellow was again deliberately sucked in, and, as I tightened on the fish, the bold plunge and heavy strain upon the line told me I had another trout, which, if successfully brought to the net, would not have to be returned through being under-sized. This proved to be the case; and the two fish made a very handsome brace.

After this I fished more than half-a-mile of the water without adding another to my creel. Many pools, streams, holes, and shallows I had to pass, that under ordinary circumstances I should have been bound to get a fish from. The river was rising, and would soon commence to colour, and then I knew—good-bye to the fishing for the day! It had commenced drizzling again, and altogether it *was* rough, I can tell you.

I had changed my fly several times and had got a small Greenwell's Glory on when I arrived at a famous pool just below a bridge crossing the river I was fishing. Very carefully I whipped that pool all over. Result, *nil.* Without doubt the fish were right in under the bridge; so, wading quietly and carefully out into the middle of the pool, I sent the Greenwell on a journey of inspection under the bridge. It was by no means an easy cast, but the fly settled upon the water very satisfactorily, and then I saw a fine fish undecidedly move towards it, and then sink back into the green depths. He didn't care for Glory in that guise. Without a moment's hesitation I put a Yellow Dun again, and then followed a busy twenty minutes or so. As I made my first cast with the Yellow, a puff of wind took it right under the bridge a treat, and it settled upon the water in such a manner that I knew if a fish there wanted a fly he'd be bound to take the one I presented to him. I would here remark that only about 3ft. 6in. was the distance from the surface of the water to the under part of the bridge.

Well, that Yellow didn't have to sail far. A steady, business-like rise, immediately responded to on my part, and away went the gallant fish bang under the bridge, clean out of sight. Here was a pretty pickle. I knew above the bridge the river was weedy, and for all I knew the fish had run into the weed. I did what I always do under such circumstances—kept a steady strain upon the fish. Presently he eased down through the bridge, and came out into the pool, and then I knew I had my gentleman—for I took deuced fine care he didn't take another walk up stream. He shook his head in an angry manner as I led him towards the net, and turned over on his side as I slipped it under him—as plucky a two-pounder as it has been my lot to kill.

I was afraid the antics of my last fish had disturbed the others, but could not leave such a likely spot without another cast or two, so once more the Yellow was sent on a journey under the bridge. The wind that had favoured me before was kind enough to hitch my fly in a little crevice in the bridge this time; however, just a gentle tug released it, and it fell clean into the open mouth of a trout! For a second I could hardly realise that the fish had taken my fly; but an involuntary action of my wrist tightened on him, and away he came, clean down the pool, right by me, tumbling over the shallow before, and finally resting in a deep hold about 15yds. below me. I cautiously waded down towards him, and having got on the right side (literally) of him, proceeded to let him know that a 10ft. rod decently handled was more than he could put up with for long. We argued this point for several minutes, but in the end I proved right, and completed my second brace to the delightful music of the creaking of the lid of my creel.

Two or three ineffectual casts under the bridge again, and I moved farther on, for I knew every quarter-of-an-hour brought me nearer the time when the state of the water would compel me to stop fishing. The next stretch of water I operated upon is very difficult to fish: for about two hundred yards the banks of the river are heavily wooded, the trees from either side, for the greater part, meeting. The river is also very weedy here, and the angler has to have the temper of an angel and the patience of Job to fish it. I waded into the water, and slowly proceeded up stream. Presently I noticed a very decent trout, and prepared to place the Yellow over him. I was carefully working out sufficient line to reach him, and having got enough, switched it forward, and turned to judge the trees, so I did not catch up in making my cast, when I felt a tug. Luckily my line was clear, and the wing sang out merrily as a good fish made a rush up stream, and then came clean out of the water—"more than a pound of him," I told myself. He had evidently meant taking that fly, for to the best of my belief it must have been under water. As he fell back into the river he made a plunge, and then a pull and a jerk told me he was in a weed. There was nothing left to be done but to keep on a steady strain, and trust to the fish clearing himself. This he eventually did; and as I gently led him to my net, carefully lifted him from his native element, and transferred him to my creel, I found I was quite right in my conjecture—he was over a pound.

This bit of fun disturbed the fish I really intended trying for; but a grand rise in front of me accelerated the action of my heart, and I turned my attention to the fish that had risen. Thank goodness! he was in a pool clear of weeds, and if I could only manipulate my fly properly that fish was mine for a certainty. By creeping under the boughs, and working my line close to the surface of the water, I succeeded in snicking the Yellow just about a yard above the rising fish. He didn't wait for it to reach him, but went for it like a needle to a magnet, and it was some minutes before he joined his brethren in my creel, and so completed my third brace.

As I waded out of the stream, and started along the bank for another spot I knew well would hold a good fish, my friend showed up, clad in a long waterproof which reached to his heels, and a "sou'-wester" that would have well graced a coal-heaver. He reckoned it was no use fishing such a day, and seemed surprised when I told him I intended keeping on as long as the water was at all decent. He asserted I must be a born idiot to fish in such weather; but when I showed him the half-dozen trout I had, his eyes and mouth opened, and his congratulations were hearty and sincere. There is no doubt I deserved the fish; it wasn't a case of chuck-and-chance-it, I can assure you.

Together we walked to a spot where the only chance of getting a fly on the water was to work it very carefully between an alder and a thorn bush, which were only about five feet apart. Two good friends, eh? Peering between them, I perceived a lusty trout quietly poising himself in the pool below. It was a long shot, and a difficult one, that would reach him; but by carefully working out my line in the meadow, and then gradually approaching the aperture between the alder and the thorn-bush, I managed to send the Yellow in the desired direction. It alighted quite two yards above the fish, and as the stream here ran very slow and deep, it seemed an age before it reached him. When it did, it sailed clean over his nose; and I was just going to pick my line off the water in disgust, when he turned lazily round, gave a wag of his broad tail, and deliberately sucked in my fly. Gentle reader, you probably know what it is to hit a fish like that, with a lot of slack line on the water, an alder on one side of you, a thorn-bush the other, and trees in every direction. That fish must have "eat" that fly, for such a muff of a strike is not often seen as the one with which I hooked him. However, the plunge told me I had him on, and quickly lowering my rod (I dared not keep it up for fear of a tangle among the bushes), I played him much after the manner one has to play a chub under like circumstances—that is, anyhow I could. Well, he bored about for some time in the pool; but at last my friend had the net under him, and whipped him out upon the bank. When I went to the net to take the hook out, I found I was saved the trouble, for the hold gave way as the fish was laid on the bank. Quite near enough that! My seventh fish was a good pound weight.

And now the drizzle turned to a smart shower; and drenched to the skin almost (for I hate a macintosh), I reluctantly came to the conclusion I had better turn it up for the day. The water was getting slightly coloured, I knew I had only about another half-an-hour's fishing, and hardly thought it worth while continuing against such odds. And so we turned to retrace our steps. When we came to the bridge where I had caught the brace in the earlier part of the morning, I could not resist the temptation of making a trial cast down stream. I took a long shot, lost sight of my fly in the driving rain, but knew it was somewhere under or near to the bridge. Presently—tug! and turning to my friend, I quietly remarked, "He's on!" Oh! the capers that fish had! Down came the rain—a perfect deluge! But what cared we? I knew I had a good fish on, and meant creeling it if possible. Presently the 10ft. of built-cane told its tale, and we had a sight of the fish—a regular beauty. Soon after the net was brought into use, and another two-pounder was added to our creel.

The water was now coming down almost unfishable; but breaking off the very fine end of my cast, I mounted a Yellow Dun of the same pattern, but a size larger, and hurried down to the stream where I killed the first fish of the day. Getting in below, and fishing it up, I hooked a trout of about 7oz., which I returned. The rain suddenly ceased, the water was rapidly colouring, and I made my last cast of the day. I believe the spirit of Izaak Walton watches over persevering anglers, for a grand fish rolled right over my fly, and striking, I had him! He showed such a fight as is seldom seen, and no wonder. When landed (as of course he was ultimately) he proved to be foul-hooked—the Yellow was firmly imbedded in the root of one of his pectoral fins.

With this fish I ended my day (or rather half-day). We got back to a snug little cottage on the estate; I fetched my waders off, had my coat, &c., dried, we made a hearty meal off country-cured ham and new-laid eggs, and soon after the train was whirling us up back to town.

I don't often weigh my fish, but this four and a-half brace looked so pretty I thought I would. The nine fish weighed exactly 13¼lb.

Now for the lesson this day's fishing (which is a faithful record) should teach those who read this article: Never say die; and when everything seems against a successful day's fishing, "Up with the Yellow!" It will not disappoint you. I've killed fish with it all over England, and all through the season. I have good reason to think highly of it, not only because of the sport I have had with it, but because it was brought to my notice first by one of the best dry-fly fishermen of the day. He used it during the whole of the first day's fishing we ever had together, now several years ago, and killed ten and a-half brace of trout, varying from 1lb. to 1¾lb. upon the same waters that the few hours' fishing I have just described took place on. It was a very enjoyable day, wasn't it, Mr. Marston?

But there are Yellows and Yellows. Some dressed are no more like the real thing than Piccadilly is like a porridge pot. Here is the dressing I refer to: Body, primrose-yellow worsted; two or three strands of pale buff cochin cock for tail; hackle from the same feather; wings, palest starling. Hook for general use, 00. Have a few dressed upon 0 and 1 hooks for exceptional circumstances.

Before long I will give you an account of that first day's fishing with the Yellow—and Mr. Marston. It is worth relating.

OUR readers, before leaving for their holidays, should entrust their canine pets as Boarders to Spratt's Patent Dog Sanatorium. The Sanatorium is on a healthy site near Mitcham. The kennels are large and spacious. The dogs are well groomed and exercised for several hours daily, and above all are not caged or chained. Mr. Sewell, the Canine Specialist and Vet., supervises all. Write Spratt's Patent Limited, Bermondsey, London, for all particulars.

WHILE fishing at Halkirk last week I observed something swimming across the pool towards me. It turned out to be a stoat with a young one in its mouth. Although it saw me, and I even tried to hit it with the line, it kept straight on, and after landing, soon disappeared with its burden in a rough building by the river bank.—A. H.

TO TAKE AWAY THE MUDDY FLAVOUR OF COARSE FISH.—A correspondent sends us the following: "Cram some ordinary table salt into the mouth and down the throat of your carp, tench, roach, pike, &c. Hang up the fish by the gills, and then pour a little water into the mouth so as to partially dissolve the salt and carry a supply of brine down to the inwards, and so let the fish hang over night, or, at any rate, for some hours before cooking."

Holloway's Ointment and Pills.—A Cure for Abscesses, Piles, Fistula, and Sores of every description.—The very satisfactory results arising from the use of this invaluable Ointment, when the patients have been suffering from any of the above disorders, have induced the Medical Profession to introduce it into the hospitals and their private practice, and in many instances where the sufferer was considered incurable, Holloway's Ointment, in conjunction with his Pills, healed the most desperate cases. They are also unequalled for the cure of scrofula, scurvy, and all diseases of the skin, and the cures they effect are not temporary or imperfect, for by their purifying powers they bring about a marvellous and most beneficial change in the whole system, and enable it, with renovated powers, to resist the approach of all future attacks of the same disease.

Waltoniana

IT is often the unexpected which happens in trout fishing. On the best of days, when wind and water and season are all in our favour, we return with empty creels, while on some blazing hot summer's day, with dead low water, we sometimes find the fish rising well, and only requiring a little judicious stalking. Verily trout are kittle cattle. I have seen—and this in a chalk stream, too—trout refuse the most artistic of duns put before them with about as much care and skill as we poor humans are capable of, and then rise to a great bunch of feathers as large as a bumble bee (twelve guillemot's breast feathers as a wing, if you please!) cast in front of them boldly, and with a good hearty splash. Then, on another occasion, when the trout were smutting and seemed unapproachable, a fairly good fish, for the stream, was taken on a huge Black Palmer, such as one would put up for a Thames chub.

WITH considerable trepidation I venture to suggest that many dry-fly fishers—perhaps the majority—are a little too much wedded to duns. The homes of the dry-fly fisher are on the banks of the Test or the Itchen, where great hatches of duns are frequently taking place. Many of our best fly-fishermen hailing from those streams and finding there that duns are the flies which most commonly catch trout, not unnaturally recommend them for other waters, and so it comes about that their humble pupils and followers crowd their books and boxes with tiny duns, sometimes to the exclusion of the very flies which are most useful on other streams. I have not a word to say against duns in their proper place—that is to say, on the streams on which they abound; but of this I feel assured, that it is, generally speaking, bad policy to dun trout which are not accustomed to being dunned by nature. On some parts of the Kennet, for instance, one may fish all day without seeing a dun; but numbers of large flies will be seen, and local anglers know well that the fish there prefer a large fly to a small one.

THE foregoing remarks apply more to the aforesaid pupils and followers than to the old hands, who have shrewd ideas on the subject of flies, wherever they may be fishing. Pupils and followers are very apt to fish by rule of thumb, and when they read that a celebrated fly-fisher considers that a Red Quill Gnat is one of the most killing flies, apply that doctrine to whatever river they may be fishing, without thinking for a moment that the said celebrated angler was writing about the stream he mostly frequented. But these misleading general statements are made all through the various branches of angling. One man writes that the very best bait for roach is the gentle, another that one of the best sea trout flies is dressed in such a manner, another that there is no bait for pike to equal a gudgeon; the truth being that in some rivers gentles only attract the small roach, that the sea trout fly is only good on Devonshire streams, and that in many waters there are far better baits for pike than gudgeon. The fact is, most beginners love rather to lay up a store of rules for their guidance than to take the trouble of thinking out for themselves their best course of proceeding under varying circumstances. I was salmon fishing with a beginner during some weeks, and had many instances of the utter absence of reasoning powers exhibited in some men who fish. One day, it being bright and sunny, I advised a small fly, and my friend apparently stored up in his mind as a rule to be observed in future that whenever the day was sunny a small fly must be used. Why, because the day was sunny, a small fly was necessary he did not trouble to consider. A few days later the river was in spate, but the sky had cleared and the sun shone brightly. Nothing was said about flies. I went up the river and finding the water thick and heavy put up the largest fly in my book. At the end of the day we met. I had two fish, while my friend had none. He seemed rather nettled at his want of success, and on seeing the fly I was using, roundly abused me for telling him to use a small fly on sunny days, while I used a large fly myself. He had been using a very small fly all day, utterly oblivious of the fact that it could hardly by the fish be seen in the thick rough water which was coming down the river.

No, there are very few rules in angling, and nearly all of them are subject to many exceptions. Beginners should therefore try to understand the whys and wherefores of things rather than to cram their heads with a lot of receipts for catching fish. I am not sure that the whole art and mystery of fishing does not consist in putting a bait or fly before the fish which he likes, and keeping from him the fact that a human being is anywhere near. In many cases coarse tackle does less harm than letting the fish see you. When we see the local angler—some poor cobbler, maybe—who catches with the most wretched appliances more fish than we can with masterpieces of the tackle-maker's art, the reason usually is, that while the cobbler knows the water and the best method of fishing it without letting the fish see him, we, who are strangers, as likely as not show ourselves to the fish, and our fine tackle is of no avail. These remarks do not apply to roach in our best roach streams. In summer float fishing for roach, both fine tackle and keeping out of sight are very important. Chub, on the other hand, may be caught on salmon gut, provided they neither see the angler nor are aware of his presence. Some men who fish for trout with large flies and coarse gut owe what success they have to studiously keeping out of sight. In some instances they catch more fish than fairly skilful anglers using finer tackle, but who are not so particular about not showing themselves. A great deal depends, of course, on the standard of education attained by the fish. Cast a fly into one of Mr. Andrew's ponds, where the trout are rarely or never fished for, and there will be a general rush for it, show yourself ever so much. There the trout have not passed even the first standard. Change your position to a club water on the Test, and you will find the sight of your rod-point sufficient to send every trout within twenty yards scurrying off. Sometimes, however, one of these sixth standard fish will take no apparent notice, but go on feeding, but he will be careful to distinguish between the natural insects and the thing you put before him. Had he not seen you he might have risen to your feathers.

THE three men in the employment of Col. Eyre, of Welford, who were summoned for cutting weeds in the Lambourn without removing them from the river, were tried before the Newbury County Bench on Thursday. The case resulted in a nominal fine being inflicted. Counsel retained by Colonel Eyre asked the bench to state a case. The application was granted. TEMPLAR.

ANSWERS TO CORRESPONDENTS.

W. A. P.: It is not worth while to notice the attack you refer to.

JONAS: Not so bad.

NUNQUAM DORMIO: Do not quite catch your meaning; put it plain.

Correspondence

THE GATE SWIM, AMBERLEY.

SIR,—A "London Angler," in his remarks *re* the Gate Swim, Amberley, seems to think that the wives and children must be pent up in London unless they go by the excursion, which was first instituted for the exclusive benefit of anglers.

With regard to the flowers, it is quite possible that one or more persons amongst such a large number of excursionists would pay for them, and it is equally possible that the majority would not.

Again, anglers require to be perfectly quiet to insure success in their sport, and consequently those who take wives and children with them, do not get the requisite quietness and therefore very little fish; and very often those who seek quietness by leaving their wives and children to amuse themselves at home or elsewhere, as they like, are annoyed by the children taken down by others. Also, when wives and children are taken out on fishing excursions, a little suffices them of looking on, and consequently they look round for something more amusing to them, and may resort to picking flowers or fruit without the permission of the owners.—Yours, &c., A LONDON ANGLER.

TROUT FISHING IN IRELAND WANTED.

Sir,—Will some of your readers state, from personal experience, where I could get a few days' good trout fishing in a lake in Ireland—the nearer to Dublin the better? Information *re* accommodation, charges, for boat, licence, &c., would greatly oblige.

I wish to go in next two months, and to a lake where sport is certain, and fish of good size.—Yours, &c., H. N.

THE LATE MAJOR HILL.

Sir,—The interesting account and the bearded likeness of Major, the Hon. Geoffrey Clegg Hill, were misleading to many countrymen. He was the younger son of Sir Rowland Hill, of Hardwick, Salop, afterwards succeeding his uncle, the great Lord Hill, the Peninsular warrior. The late Lord Hill's brother Clement was the man known as Major Hill in Shropshire; another brother being John, or "His Reverence."

Lord Hill's elder son Rowland took the North Shropshire Foxhounds off Mr. Charles Morris in the 60's, handing over the Otter Hounds to the younger son, the Hon. Geoffrey, as he was commonly called, and was then in the Royal Horse Guards or 2nd Life Guards. The Hon. Rowland Clegg Hill bought many hounds and horses at Lord Stamford's celebrated sale at the Quorn Kennels, taking the first whip, Jem McBride, as huntsman, and there was some "pushing along" that season, I can tell you; real Leicestershire style. Fortunately it happened to be a good scenting one.

Writing of good "good scent" reminds me of a little joke on it. The otter hounds were to meet at seven a.m. on a stream of Sir Thomas Meyrick's, of Apley Castle. I saw a water-hen run along the bank, and two hounds speak to the line, so I said to Sir Thomas, "Blessed if these hounds won't hunt anything; they are on the line of a water-hen." He replied, "Yes, and if the scent had been a little otter (hotter) we might have had some fun."—Yours, &c., J. M. Fletcher.

Cheshire.

MAIDSTONE ANGLING SOCIETY.

Sir,—The committee of the above society desire me to write and ask if you could do us a kindness by taking notice of the appeal made by us to the London anglers who fish in the Medway for donations towards the preservation fund, which is in a very low state.

I am sorry to say we do not get the support from the local fishermen we ought to do. We have written the Central Association, Woolwich Brothers, Deptford Brothers, and Peckham Brothers. Have enclosed a copy of letter sent to each club. If you can do this for us we shall be very thankful.—Yours faithfully,

Albert H. Emary, hon. sec.

Anchor and Hope Inn, Bower-lane, Maidstone.

P.S.—Have received a donation of 10s. 6d. from the Deptford Brothers; Central Association referred to next meeting; no answer from Woolwich.

[copy.]

Maidstone Angling Society,
Anchor and Hope Inn,
Bower-lane, Maidstone, July, 1891.

Dear Sir,—At a meeting of members of the above society, it was unanimously decided to apply to your society for assistance in the work of prosecuting and preserving the angling rights in the Medway.

I may say the society recently obtained two convictions for netting the river, besides giving rewards for the capture and destruction of otters, which have been a great source of trouble, as well as an expense on our funds, which, owing to a want of local interest, are not in a very flourishing condition.

Hoping you will lay this before your members for their kind consideration at an early date, —I remain, dear Sir, yours faithfully,

Albert H. Emary, hon. sec.

[When Mr. Shrubsole wrote the articles on "The Medway as an Angling River," which appeared in our columns a few years back, he drew attention to this association. We have asked him to attend one of their meetings, and report upon this matter in our columns. We believe the M. A. S. is worthy of support, and it is a great pity that more local interest is not taken in the matter. —Ed.]

SEA FISHING AT BOURNEMOUTH.

Sir,—I should feel much obliged if some of your readers can give me any information regarding the sea fishing at Bournemouth in August? —Yours truly, F. R.

RE CAMM FUND.—APPEAL TO CLUB ANGLERS AND FRIENDS.

Dear Sir,—I have received 5s. from a West of England club, making the second donation this club has remitted, and by their desire I am asked to acknowledge it in the *F. G.* I hope other societies will forward on their grants to this sad and distressing case.—I am, yours truly,

B. Abrahams,

25, Silver-street, Notting Hill Gate, W.

Cheques and Postal Orders can be crossed "Alliance Bank and Co."

SHORT WADERS OR FISHING BOOTS.

Dear Sir,—I have the privilege of fishing on two adjoining lengths of a trout stream. On one, wading is not allowed, and is not necessary; on the other, some of the best water must be passed over by one who does not wade. But as many of the meadows on either length abound in ditches and "drawns," some sort of waterproof boot, reaching up to the knee, would be extremely useful. Can any of your readers offer advice as to the form of boot which they have found most useful in similar circumstances? Also, I should be glad of hints with regard to knee-pads. Like many other chalk-stream anglers, I find it necessary to do most of my summer fishing on my knees, but I have never yet satisfied myself with anything I have tried. What is wanted is something light, portable, and capable of easy adjustment; but it must be waterproof, and sufficiently strong to stand the wear and tear in places where the bank is often a mixture of pebbles and hard chalk.—Yours faithfully, H. S. Hall.

FISHING FROM DEAL PIER.

Sir,—I am staying at the well-known anglers' hotel, the Antwerp (Mr. Ottaway), and being opposite the pier it is of course handy for the rod fishers. There are at present eighteen men-of-war in the Downs, whose steam pinnaces are to and fro all day long, which upsets the usual good fishing, driving the larger fish to the deeps. Still, for all that, many codlings, poutings, dabs and dog-fish have been caught.

One gentleman, who like me has suffered from influenza, has so far recovered as to commence fishing at two a.m., and coming in to breakfast with a good show of pollack, caught with a piece of parchment cut into the shape of a fish, and a triangle fixed thereto. These fish are usually caught at dusk, moonlight, and very early in the morning, before the boats disturb the water.

I wrote to you last year about Major and Mrs. Major Napier fishing after dark—sometimes till eleven p.m.—with large salmon flies, and with great success. I have brought a salmon with me, and will try the same dodge next week.

The pier has been extended this year, so there is now a promenade all round the concert-room, and being furnished with seats, they are well occupied by visitors. On Thursday evening last electric-light signalling was going on between the flag-ship (*The Benbow*) and other men-of-war, which had a pretty effect when turned on the town, as it made Deal appear as if in sunshine.

Anglers and others requiring a change should come to Deal, and become as ruddy and rosy as the men and women of all degrees are here. Anglers should bring a pickle bottle full of scalded mussels, leaving the shells at home; or if used raw, which is better, bring some fine hemp fibre, which assists in keeping the bait on the hook. Lug-worms can be bought at the pier-head, and sometimes cockles in the town. Cockles are most suitable for ladies to handle, as they do not soil the fingers as worms do. Cockles are used fresh from the shells.—I am yours, &c, T. R. Sachs.

*** **Club and River Reporters will oblige by sending in their Reports early in the week.**

Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—East London Rubber Co., 8, Shoreditch, E.

NOTES FROM BIRMINGHAM AND DISTRICT.

By C. W.

Nearly the whole of the clubs affiliated with the Birmingham Association are busy with making their arrangements for their annual contests, and are trying to get them over previous to the Marston Challenge Cup Competition on Bank Holiday next, or before the great association struggle on the 14th of September next; and great credit is due to the clubs for arranging their contests so as not to interfere with the two contests just mentioned. By the clubs adopting this plan, it will be the means of making both contests a big success. The August Bank Holiday has always been a very popular day with the Birmingham anglers to hold their annual contests, and in previous years I have known as many as a dozen taking place, but owing to the important event at Tewkesbury, I have not heard as yet of any society that will hold their contest on that date. In order to be fully prepared to meet both events, some few of the clubs have brought their contests off since my last Notes. The Camden Society, held at the Camden Tavern, Camden-street, brought their contest to a successful issue on Saturday last, at Droitwich. Sixty-seven members took part. The weight of fish taken was very low, only about twenty-seven taking fish during the first two hours. It was decided to follow on with another contest for the remainder of the prizes. The result of the first weighing-in was as follows, and the following six gentlemen will receive the six best prizes: First, Mr. Dayns; second, Mr. W. Saunders; third, Mr. Partridge; fourth, Mr. G. Orme; fifth, Mr. J. W. Crisp; sixth, Mr. H. Samders. The first prize consists of a splendid eight-day clock and barometer combined, and is given by the worthy host of the house, Mr. Walker. There are also six other clocks and time-pieces, a work-table, writing-desks, three china tea-services, two handsome table lamps, cruet frames, four sets of vases, albums, silver-mounted pipes, fishing tackle, and jewellery. The prizes will be distributed at the annual dinner, which will be held in about three weeks time, and upon which occasion I am informed that a handsome presentation will be made to the president, Mr. J. Marsden, for past services, which extend over four years.

The Bellbarn Society, held at the Queen's Arms Inn, Bellbarn-road, held their annual contest on Monday last, at Pershore in splendid weather. The contest was not so well patronised as the executive could wish, considering the number and quality of the prizes given to be contested for. The prizes numbered twenty-seven, and were of a very useful character. The result was: First, Mr. F. James; second, Mr. C. Haywood; third, Mr. C. Goodwin; fourth, Mr. Bowler; fifth, Mr. G. Lester, &c.

The Sparkbrook Society, held at the Rose Tavern, Henley-street, Sparkbrook, held their contest on Monday last, at Pershore. Twenty-two competitors took part in the contest, which was of three hours' duration, at the end of which time the weighing-in took place, when the old veteran, Mr. J. Pratt, was declared the winner of the first prize by something like 12oz. to spare; Mr. M. Crosby was second; Mr. J. Morris, third; Mr. W. Lawrence, fourth; Mr. W. Davies, fifth; Mr. J. Southam, sixth, &c. The prizes, which are of a valuable kind, being composed of a marble timepiece, china tea service, fishing tackle, and a special prize of a pound-tin of tobacco, given by the firm of Wills, of Bristol, were distributed on Friday evening last. Mr. L. Wilkinson acted as referee; and everything passed off in a very satisfactory manner. I am requested to state by Mr. Rowberry, the secretary, that the host of the club-house intends giving prizes to the value of £5 for another contest, to be fished later in the season.

Mr. W. H. Miller, the secretary of the Birmingham Anglers' Benevolent Society, kindly requests all secretaries of clubs to forward to him at 81, Ladypool-road, Sparkbrook, on or before Wednesday, July 22, all membership cards which have not been issued to June 30 last, together with any subscriptions for cards issued which have not already been forwarded, so as to enable him to get out a balance-sheet for the first financial year ending June 30 last. The subscription of 1s. 1d. per member for the current year is now due, and it is important that all members should pay the same before the end of July, so as to keep in benefit. New membership cards will be forwarded upon receipt of names and subscriptions.

I am pleased to inform those gentlemen who patronise the Warwickshire Avon that the roach which have hitherto been so shy, are beginning to bite a little more freely, and are reported to be getting into good condition.

The Shannon "Otter" Case.—In the Dublin Exchequer High Court, last week, Mr. Justice Andrews and Mr. Justice Murphy had before them the case stated by the magistrates at Nenagh, co. Tipperary, Petty Sessions. The defendant, Mr. Anthony Parker, D.L., Castle Lough, was, as our readers will remember, summoned for having, on April 13, used an "otter" for the purpose of taking fish in Lough Derg, the complainants being the Shannon Board of Conservators. At the hearing it was admitted, on the part of the board, that the engine or implement known as an "otter" had been used in Lough Derg for a considerable number of years, but on inquiry they found, as alleged, that this method of fishing was illegal, and they caused notices to be posted informing the public that it could not be permitted in future. Mr. Parker, acting on legal advice, invited the board to have the question finally set at rest by having a prosecution instituted against him, and having a case stated for the superior courts. A licence had been issued to him for "cross-fishing," and he used the "otter" for the purpose of stretching the line, thus avoiding the use of a second boat—the "otter" being a piece of wood of about 18in. in length—and it was submitted that this method of fishing was contrary to the provisions of the 10th section of the 13th and 14th Vic. cap. 88. The magistrates dismissed the summons, without prejudice, on the ground of ambiguity, and stated a case. The court held that the "otter" used by the defendant was the inanimate contrivance pointed at by the Act of Parliament, and that the method of fishing by the defendant was a contravention of the Act of Parliament. They therefore reversed the decision of the magistrates, and held that there should be a conviction.—S. J. Hurley.

NOTES FROM THE LAKE DISTRICT.

THE question of pollution continues to occupy the public mind, and, in so far as Lake Windermere is concerned, is being tackled in a proper spirit. Dr. Craven, medical officer of health for the Westmoreland portion of the Lake District, has addressed a letter to the Bowness Local Board, urging the desirability of joint action on the part of the Board and the Kendal Sanitary Authority in taking steps to check the pollution of the lake by the Windermere steam yachts and the house-boat; and at the last meeting of the Board the chairman (Mr. D. Clondsdale) said he thought the medical officer had done right in drawing attention to the matter; but as the house-boat was now outside that Board's district he did not see that they could interfere, especially while there were a number of large houses whose cesspools overflowed into the lake and no notice was taken of them. The ashes from the public and other steamers—now numbering about twenty—was quite a different thing, and were calculated to do a hundredfold more harm; and if the Fishery Conservators could have this remedied it would be a good thing for the fish and the lake generally. Another member considered the Board would be lacking in their duty not to enforce the Public Health Acts Amendment Act after having adopted it. If ashes were injurious to fish life their deposit ought to be prevented; it was a question of stopping anything which was of detriment to the inhabitants of the lake, and if the lake could be filled with fish by having the ashes removed it would be the best possible thing for Bowness. It was eventually decided that notices be issued stating that the Public Health Act had been adopted in its entirety, and that prosecutions would follow any infringement of the same. Action is also likely to be taken in regard to the rivers Eden, Kent, and Derwent.

THE weather continues dry, and as a consequence river beds are showing where there should be a good flow of water. Night fishing, however, gives fairly good results; and perch, rudd, pike, &c., may be taken almost at any time on the tarns and lakes. For those who care for the sport, trolling for pike can also be indulged in on the Kendal and Preston Canal. From the former town southwards for many miles this canal is as pure, or purer, than some rivers, and is well-stocked. One adept is said to have captured between thirty and forty pike by this means in a week. Leave must be obtained—which means a shilling ticket for the season—from the London and North-Western Railway Company, the owners of the canal.

POACHING continues despite the "examples" occasionally made in the police courts of offenders. A remarkable case of hard swearing occurred in one case heard by a Cumberland bench of magistrates last week. A tinplate worker rejoicing in the classic name of "W. Shakespear" was charged with taking fish by means of a click-hook, and two policemen swore to seeing the fellow capture a fish by this means at three o'clock a.m. They gave chase but were unable to arrest the man, though they knew him well, and heard him addressed by name by a companion. They also saw him throw away his click-hook, of which they obtained possession. In opposition to this evidence a number of fellow workmen, as well as the night watchman at the works, swore positively that the man was not, nor could have been, absent from his work between half-past five p.m. and six a.m. The defendant was in the end fined £2; and four other men of a similar kidney were at the same time convicted and fined £1 10s. each for like offences.

NOTES FROM LANCASHIRE.

REPORTS from Northwioh are of a uniform character, and as a whole more encouraging; the fish are in good condition, and feeding freely, the average basket of this season is better than of the last few seasons. Anglers anywhere within reasonable distance of this rendezvous would do well to pay it a visit.

SOME Lancashire anglers have been to Lake Vyrnwy, and had a good time with the trout, now so plentiful in this lake. Why sport with trout weighing from 1lb. upwards should be described as amusement requires a lot of time to understand!

TRIALS have recently been made with a new combination of hooks for pike fishing. It is very simple in its arrangement, and while reducing to a minimum the hooking necessary to secure the bait, it is very deadly towards the pike. So far the results are satisfactory, and more will be heard of this new tackle shortly.

A PROMINENT Salford angler is promoting a handicap on an extensive scale. He proposes throwing the competition open to the public generally.

THE New Islington Club held a competition a few days since, but every prize offered failed to find a winner, as not a single fish was taken. They attribute their non-success to the fact that the Poynton Canal has been so extensively netted by the boatmen that practically there are no fish.

NOTES FROM NOTTINGHAM.

BARBEL anglers are not doing so well on the Trent as could be desired, and in fluctuating waters the fish show no real disposition to feed. The river of late has constantly been up and down, and until the swims reach the customary height of summer, I question very much whether sport will improve. Of course it is possible to kill a few fish with the leger line, but no great quantity seems to result from the favourite and popular method of swimming the worm. At Shardlow the length teems with fish, and settled weather alone is likely to cause a flutter amongst them. Last season the takes were unimportant, and there is no doubt that on the majority of the subscription waters the numbers bagged were considerably below those of the previous year. Prospects, therefore, should be brighter so far as quantity is concerned. Bream fishing has recently engaged ample attention, and the rise last week would set the fish freely on the feed. More especially was this the case at Weston, for I hear that nearly every subscriber with any pretensions to skill failed to return home without a substantial basket. Weston is a famous haunt of the big bellows fellows, and already many very fine specimens have succumbed. Anglers, however, need not go to the trouble of swimming the worm; they should, to enjoy sport, fall back on the tight-floating system. Sawley, since my last Notes, has yielded well. and I hear that matters are looking up at Colwick and Holme Pierrepont. At Wilford, on Tuesday, one of the subscribers experienced a novel adventure. Whilst legering for eels a barbel seized both bait and hook and dragged the rod, which had been fixed on the bank, into mid-stream. Here it made sundry gyrations and ultimately stood nearly upright in the water. The fish broke away with upwards of thirty yards of line, and a friend coming up recovered the derelict rod by means of throwing his corking leads across it. The same thing has often happened, and all I can say is that if an angler is too lazy to hold his rod when on the "war path" he deserves the loss of an occasional good fish. News is very quiet from the lower districts of the Trent, and the salmon fishermen have thrown up the sponge until the declining days of September.

THE Barton fishery is just now producing great quantities of very fine eels, and as the water is within easy reach of Nottingham anglers, it should meet with greater support than has been the case in the past. Tickets are issued at a cheap rate by the lessee of the ferry, who lives on the spot, and who does his best to preserve the fish. Bream of good size are frequently caught in the Osier bed above the ferry, and the backwater, known as "The Parlour," teems with them. This, however, cannot very well be properly fished without the aid of a boat moored from the bank. Last Saturday one of the subscribers, Mr. H. Stafford, of Nottingham, enjoyed very good sport amongst the roach, and a large number of splendid eels fell to the rods of the legering division. But on Saturday the water has many disadvantages: pleasure boats innumerable are rowed up the river from Beeston, and when the weather is really fine the waves their fair occupants create render angling a work of extreme difficulty. Pleasure to the fisherman is out of the question until late in the evening, and if he desires a quiet day I would strongly recommend him to defer his visit until a Tuesday or Wednesday. Barbel swims may be found at the "Stumps," and above the fence near the ferry, and in times past they yielded no end of splendid fish. Recently, however, the frequenters of the length seem to prefer roach and bream fishing, and as to roach, many fish of ½lb. each were killed in the Osier bed already mentioned during the winter months. Mr. Roadley, the ferry proprietor and lessee, will be pleased to show strangers the whole length of the fishery and point out the various spots to which the locals give preference. Half-day tickets are issued, and there is no restriction as to baiting.

THE Beeston Fishery, which commences below, is not let off by ticket. It is leased by Mr. S. Watson, a gentleman residing in the village of Beeston, but he is most liberal in granting permission to any respectable man. Mr. Watson rarely fishes himself, preferring the rugged haunts of Scotland and the attraction of its mighty salmon. His reach at Beeston is noted for its big roach and bream, and occasionally fair takes of perch are made. There are not many dace, excepting in the stream caused by the overflow of the weir, in the centre of which the salmon leap stands out prominently. Salmon will often stay for a rest above the weir, and the wonder to me is that Mr. Watson never gives them a trial during the spring season. Surely if they are to be caught at Shardlow and King's Mills, to say nothing of Willington, they may be hooked and played here. A short time ago a basket of 9¾lb. was taken in the fishery below the weir, but there is reason to believe it fell to a baited night line intended for eels.

ADJOINING the Beeston fishery come the Clifton and Wilford, and I am sorry to say that neither is sufficiently well cared for. Season tickets are issued, price half-a-guinea each, and the use of a punt is denied the holders. The denial is ridiculous, for the reason that irresponsible people row up from Nottingham and seem to do as they like, caring little or nothing for either "squire" or keepers. They contend that the water is a part of their right as burgesses of the borough, and their contention is, perhaps, based on substantial grounds. But their object is not so much legitimate angling as the vicious process known as "skull dragging." Last season one barbel hole alone was "dragged" to death, not only on ordinary days but on the Sabbath, and the language used by the boating scoundrels was really unfit for decent ears to listen to. If a more strict supervision were exercised I have no doubt that a greater number of season tickets would be purchased, especially by gentlemen devoted to fly-fishing, for the water contains many really delightful shallows for holding both dace and chub.

IN club circles progress is being reported. Already many excellent specimen fish have been recorded on the books, and most of the members are now looking forward to a red-letter day amongst Master "Billy" barbel.

ON the tributaries substantial bags of trout have been got, but the whereabouts of the takes are, fishermanlike, kept a profound secret. I may say, however, that one bag, obtained from a private lake in North Notts, contained no fewer than fifteen brace, including several fish running up to 2lb. apiece.

NOTES FROM SHROPSHIRE.

THE members of the Shrewsbury Town Council, at the meeting on Monday, turned attention to the question of river pollution. For years the whole sewerage of Shrewsbury has been allowed to run into the Severn at various points within the limits of the borough, and a more fruitful cause of disease than this wholesale pollution of the silvery Severn can scarcely be conceived. In the summer months, when the water is so low that the river at many points is fordable, the smell from the festering matter is most offensive. Anglers will welcome the day when the Town Council rouses from its lethargy, and formulates some comprehensive scheme for dealing with the sewerage.

THE body of Tench, the old Shrewsbury fisherman who last week committed suicide by drowning himself in the Severn, was recovered at the end of the week in a strange and shocking manner. Deceased's son, who works at a boat-builder's establishment on the river banks, noticed something floating down the river, and on pulling out to it, made the gruesome discovery that it was the body of his father, which had thus floated to a distance of half-a-mile from the spot where he committed suicide. A coroner's jury returned a verdict of "Suicide while temporarily insane."

A CORRESPONDENT in last week's *Fishing Gazette* referred to a curious law case which had arisen, consequent upon certain weed-cutting operations, which had been carried on to the discomfort of people below stream. The Shrewsbury Corporation have been employing their men for the past few weeks in this interesting occupation, much to the destruction of the proverbial good temper of anglers, who, however much they may be inclined to thank the authorities for clearing the fords, scarcely like the idea of fly-fishing for a few weeks over a floating mass of weeds. It would be very desirable if these weeds could be netted from the river, removed and put to some good use, if any good use can be found for them.

NOTES FROM YORK AND DISTRICT.

THE all-engrossing subject in angling circles and out of them this week has been that of the West Riding rivers pollution. The condition of both the Aire and Calder has been recognised all round, but the question has devolved itself into one of discrepency as to the formation of the proposed administrative body. The two points at issue, on which the West Riding County Council on the one side, and Leeds and Bradford Corporation on the other, are unable to agree, are:—(1) As to whether the Conservancy Board should be a joint board for the Aire and Calder; and (2) the basis of representation. The West Riding County Council held a meeting on the 8th instant, when a lengthened report of the Sanitary Committee was presented by Alderman Kendall. After an exhaustive dissertation on the subject—the report of which has already appeared in the *F. G.*—the report says: "The practical questions, therefore, are:—(1) Whether both the Aire and Calder, or only the Aire, should be placed under the joint board? (2) What should be the basis of representation if a Conservancy Board (whether for both or one of the rivers) is formed? As to the first, the following considerations should be borne in mind:—The Calder is a tributary of the Aire, and as such is in exactly the same position as the Bradford Beck or any other feeder (except in degree), and should be treated as a part of the main river. For practical purposes the proposal of Leeds and Bradford deals only with that part of the Aire above the confluence of the Calder, although it must be admitted that the condition of the river below that point stands in as great need of purification as that above, and as the two parts (above and below) are in one and the same flow, it is difficult to understand what can be the reasons for dividing them, forming as they do but one indivisible thing, needing one and the same treatment. After the formal complaints made to the council of the pollution of the Ouse by the filthy waters of the Aire, nothing should be done in the way of dividing the Aire that would be likely to prevent the whole river being dealt with by one and the same administration, thereby ensuring one standard of purity. As to the second question, the usual definite bases for representation are *(a)* population; *(b)* rateable value, or *(c)* a combination of both. At present the County Council are supreme over all their county in this matter. Leeds and Bradford ask that the County Council should deprive itself of that supremacy, and accept a minority position. After most careful consideration, your committee, while feeling strongly that the co-operation of Leeds and Bradford with the County Council in one and the same board is highly desirable, are at the same time of opinion that the advantages of a combination, as proposed by the corporations, would be too dearly bought. Your committee, therefore, have decided to decline the proposals of the two corporations, and beg to recommend—'That with regard to the rivers in the West Riding, the County Council do enforce the provisions of the Rivers Pollution (Prevention) Act, 1876, alone, without the appointment of a joint committee under Section 14 (3) of the Local Government Act, 1888, and that the Riding solicitors do give intimation to this effect to the Corporations of Leeds and Bradford." A letter was received from Sir George Morrison, Town Clerk of Leeds, and Mr. W. T. McGowan, Town Clerk of Bradford, stating that they learnt with regret that the Sanitary Committee had determined to advise the Council to reject the proposals they had offered, that a joint committee of the West Riding and the Leeds and Bradford Councils should be established under the provisions of the Local Government Act for the purification of the Aire, and that instead thereof the council should take the business entirely into their own hands. After stating several arguments the letter concluded by protesting against the course taken, and trusted that the council would decline to give effect to the recommendation, and leave the matter in the hands of the Local Government Board to deal with the Aire by a joint committee. Otherwise they feared that much public ill-feeling would be generated and practically no good effected. Alderman Kendall moved the adoption of the report as presented to the Council. Alderman Kaye proposed, as an amendment, "That, as the question is not ripe, it be referred back to the Sanitary Committee." This was seconded by Mr. J. Dent-Dent, who said the purification of these two rivers was so important that it was not desirable that they should pass any resolutions which would pledge the council to take independent action. Alderman R. E. Clarke said the people of Doncaster felt it very hard that the neighbouring locality should continue to pour into their river, their abominable sewage. He spoke of the necessity of the pollution of the rivers in question, which had become a crying evil, being dealt with; and said that no more important matter could engage their attention. After some further discussion, the amendment was withdrawn, and the original motion unanimously adopted. The Corporations of Leeds and Bradford have indignantly resented the decision of the Council, not only with their representation of the proposed Conservancy Board being ignored, but at what they describe or the flippant manner in which such a serious question had been treated by that body. I hear they have appealed to the Local Government Board, and arrangements have been made for a deputation from the joint authorities to wait upon the President of the House of Commons.

The half-yearly meeting of the York branch of the Northern Anglers' Association was held at their headquarters, the White Swan Hotel, Goodramgate, on Friday. In the unavoidable absence of Captain W. H. Key, J.P., the president, the chair was occupied by Mr. Joseph Ankers (hon. treasurer). Amongst those present were Messrs. J. S. Schumacher and E. A. Robinson (hon. secretaries), E. Staines, J. Humphreys, Hebditch, Kelly, Broadley, &c. The minutes of the previous meeting were read and confirmed, after which Mr. Schumacher brought forward the question of increased railway facilities. He read a letter from Mr. Burns, of Manchester (secretary of the sub-committee appointed at the recent meeting of the Northern Anglers' Association meeting at York) asking for the names of the York clubs, and opinions of the members. In answer to this, he had sent him full particulars of the privileges York anglers enjoyed from the railway, and a list of the clubs, as far as he knew—fourteen in number. He therefore submitted the two schemes, the text of which have already appeared in the *Fishing Gazette* of July 4, and several members were of opinion that the cheque system would be the best. They were also inclined to think that the York centre of the Northern Anglers' Association might take the matter upon themselves without bringing it before the notice of the many clubs in the city. The chairman thought a kind of card should be issued, stamped "The Northern Anglers' Association," and these being distributed to the members might be shown at the booking-office. They would, he thought, serve a better purpose than cheques, and if there was any complaint of abuse, the number of the card could be taken by the railway company. If the card was stamped up to date, there could be no misuse of it; and even if there was, the delinquent could be easily traced, and the matter reported to the council. Mr. Robinson entirely concurred in the suggestion, and said that cards should be issued to the secretaries of the districts by the council every year. Mr. Schumacher then proposed—"That tickets be issued by the Northern Centres to districts, printed "Northern Anglers' Association," with the name of the district and the name of the angler written on each ticket by the secretary; the same to be issued every year." Mr. Staines said there were certain gentlemen who had joined the clubs on purpose to get the railway facilities. If they could get them for a shilling a year by being individual members of the N.A.A. district branch they would retire from the clubs and join the association. Numerous other opinions were expressed, some going as far as to say there were bogus clubs formed on purpose to get the facilities. Mr. Hebditch then seconded the resolution. The Chairman thought it would be better than either of the two previous schemes, because, in the first place, the clubs would have to lay down a large amount of money in the purchase of railway tickets; and, in the second place, it would be an annoyance to the secretary and members, inasmuch as when the member wanted a ticket he would have to apply to the secretary. If that gentleman happened to be away from home, the member would lose his day's fishing. Mr. E. Staines suggested that they should add to the proposition a rider respecting the rights of anglers taking a station-to-station ticket. As matters stood at present the angler could not drop down at any intermediate station without delivering up his ticket. Mr. Schumacher said he had mentioned the matter to Mr. Burns, who said the best thing they could do would be to form a deputation of the centre, and wait upon the responsible persons at the respective railway stations. Eventually the following was added to the previous resolutions:—"That privileges be further extended to anglers—viz., to travel from station to station over all the railway system, and that the Central Association make the application." The resolution, as amended, was agreed to unanimously, and the secretaries were instructed to forward it to the Central Council as the suggestions of the York centre. A letter from Mr. William H. Foster, salmon fisherman, in respect to alleged practices at Linton-on-Ouse, was allowed to "lie on the table," and the meeting concluded with a vote of thanks to the chairman for presiding.

The yearly fishing match amongst the Woollenopolis anglers is being looked forward to, and more than ordinary interest is being evinced in the arrangements. The watch committee connected with the Leeds Amalgamated Society of Anglers, met on the 8th inst., under the presidency of Mr. Wilkinson. The following resolutions were adopted:—"That the drawing for the match take place at the bridge, near Kirkstead Station, but no pegs be fixed within 150 yards of the bridge, the ground to be staked equally above and below; that entries of the match be made through the secretaries of each club; entries close at nine p.m., on Thursday, 17th of Sept., entrance fee one shilling; that two stakers-out be sent; that Messrs. Grassham and Stead be the stakers-out, and allowed to fish in the match, and ten shillings each for expenses; the match to last four hours. That subscription sheets be sent out, and that each club be asked to send in a subscription in money, not in kind." There was a discussion about the prizes, but the time being short, Mr. Hodges gave notice that he would bring up the matter at the next meeting. The secretary of the society wishes to intimate to anglers that he has received information from Boroughbridge that serious complaints have been made there, on account of damage done by anglers, through leaving gates open and breaking fences. If this cause of complaint continues the fishing there is likely to be stopped. It is hoped, therefore, that anglers in the district will not only be careful themselves, but also do all in their power to prevent others doing mischief. The Anchor of Hope Society, fish their annual match, on 15th Aug., at Wressle, while the Holbeck Association, held theirs at Menthorpe Ferry, on Monday.

In the Ouse, both fly-men and bottom fishers are having a royal time, good all-round catches being the rule. The natural fly is the favourite lure, though the Black Gnat has proved very successful. The trout streams, including Riccal and the Nidd, have afforded excellent sport. According to the average account, the fish seem to fight shy of the gaudy-coloured fly, and although in some cases the Pheasant and Orange Partridge have proved a deadly lure, the best casts are with the Snipe Bloas, Dark Snip, March Brown, Iron Blue Dun, and Iron Owls. The Derwent is in excellent trim, and many local anglers have been attracted to its banks. The stringent measures recently taken by certain riparian owners in the matter of granting permits to fish have, I hear, been somewhat relaxed.

The Swale and its tributaries have afforded capital sport to Richmond anglers, while numerous visitors have had a good time of it. Mr. Charles Spencer and his son made a pannier of thirty-three and a-half brace of trout, with the running worm, while on the previous evening another gentleman caught twenty-two brace with the fly; Mr. Charles Musgrave captured twenty brace, and good fishing was experienced by Mr. King, Mr. John Ashton, Mr. James Doherty, and others. Financial questions ever awaken a lively interest amongst anglers as well as among the common run of people; and the piscators around Richmond are up in arms about the extraction by the Yorkshire Fishery Board of their fees. A correspondent signing himself "Gunnerset Brig" writes complaining that the Conservators require the procuration of a licence, whereas they never supply the water with trout. "Why do the Yorkshire Fishery Board," he asks, "draw somewhere between £5 and £6 per annum from people who only fish west of Richmond Force, where there is nothing but trout, and no thanks to the board for them." The question may be a vexed one to the luckless anglers immediately concerned, but I think, after all, the Conservators are in the right.

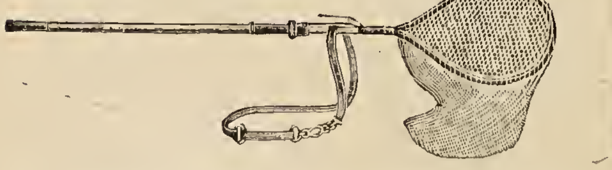
Sea fishing on the Yorkshire Coast is much on the improve, and the number of visitors who indulge in it, is daily on the increase. Whiting, I hear from Scarborough, have not been so plentiful for years, whilst gurnards and sand-dabs are abundant.

An Angler finds an Old Cannon Ball.—"A few days ago, while an angler was pursuing his pastime on the river Teviot, and under the shadow of Roxburgh Castle, his attention was attracted by the roundness of a stone which had afforded him footing in making a difficult cast. The stone was more than half embedded in the bank, and the visible portion almost entirely under water. On being dug out of the embankment the stone was found to be entirely round, and it bore marks showing that it had been chipped into shape. The ball, which is of sandstone, measures 42in. in circumference, and its weight is 95lb. All the circumstances strengthen the supposition that it had been used as a missile for warlike purposes. The missile is of exactly the same dimensions as some of the stone balls which are deposited at the side of Mons Meg at Edinburgh Castle. It is well-known that Mons Meg was used at the siege of Norham in 1496, and it is quite possible it may have been at Roxburgh also. Those interested in archæology may have an opportunity of inspecting the ball at *Kelso Mail* office, where it at present lies. In a notice of some cannon balls found in the parish of Swinton (contributed to the transactions of the Berwickshire Naturalists' Club in 1879 by the late Mr. Milne Home of Milne Graden), it is stated that these, six in number, were found in the river Leet in 1865, when the channel of the stream was being lowered in the neighbourhood of Swinton Mill. Another ball of the same kind was found in the Tweed close to Norham Castle, having, it is supposed, been fired from Mons Meg from Ladykirk village, where are still remains of military ramparts. The writer considered it evident that the Swinton balls belonged to Mons Meg, and conjectured that when the gun was being brought back to Edinburgh from Norham the retreat may have been so hurried that the balls were left behind, or that the vehicle on which they were being carried got swamped in marshy ground near the river's bank."—*Scottish Leader*.

Geo. CORDING'S
Ventilated Fishing Coats,
TROUSERS, STOCKINGS, BOOTS, BROGUES, BAGS, &c.
125, REGENT ST.; 231, STRAND

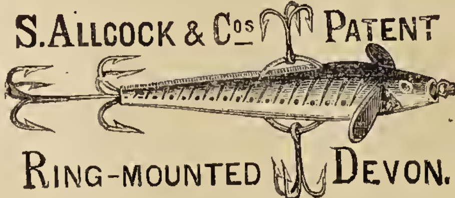
S. ALLCOCK & Co., Standard Works, REDDITCH.
Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

Patent Applied for.



Col Clarke's Patent L. Handle & Net.
Perfectly secured to the Strap, and can be removed in an instant.

Platt's Patent Fishing Basket.
The New Aluminium Reel.



Patent Inimitable May Fly.
The nearest approach to nature ever yet attained. Bodies in various Patterns.

Geen's Patent Spiral Minnow.
The most Perfect Spinning Bait ever invented.
It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.
CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.
London Office: 60, QUEEN VICTORIA STREET, E.C.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, JULY 18, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The monthly delegate meeting will take place on Monday evening next, July 20, at 8.30. Club anglers holding the Association's privilege tickets are invited to a free competition on July 26 in the association water, from Slough to Langley. Mr. E. Cook, of the Brickmakers' Arms, Stoke-road, Slough Station (G.W.R.), has arranged the following to be fished for fairly with two rods: 1st prize, a magnificent pair of field-glasses in case, and shoulder strap; 2nd, a beautiful church clock, with a water scone painted thereon; 3rd, gent's beautiful silk and nickel-plated umbrella; 4th, a handsome album, with pictures and different scenes for photographs; 5th, an American clock and stand; 6th, handsome malacca stick, hall marked, silver top; 7th, acacia walking-stick, hall marked, silver top; 8th, half-a-dozen handsome knives and forks; 9th, a carving-knife and fork; 10th, Russian leather cigar-case; 11th, Russian leather wallet and book combined; 12th, a very handsome case of chased teaspoons in blue plush case; 13th, meerschaum cigar-holder and case; 14th, gold-plated patent drinking-cup, forming compass and watch; 15th, Russian leather cigarette-case; 16th, half-a-dozen teaspoons; 17th, ditto. The names and number of privilege cards must be entered on the morning of competition and tackle examined. Further particulars next week. B. Abrahams, judge and referee. There also will be appointed six stewards, whose names will appear next week.—R. GHURNEY, sec.

Anglers' Association (SOUTHERN DISTRICT) VISITING LIST.—A return visit on the above list took place on Tuesday last at the Rodney A. S., Rising Sun, Harper-street, New Kent-road. when a most enjoyable evening was spent. On the roll being called, the following twelve clubs answered—Anglers Pride, Amicable Excelsior, Battersea Friendly, Bermondsey Brothers, Blackfriars, Clapham Junction, Causton, North Lambeth, Peckham Brothers, Rodney, South London, Original North Lambeth. The next visit will take place at the Original North Lambeth A.S., Wellington, South-street, Hercules Buildings, Westminster Bridge-road, the date I will give next week.—G. W. ARMSTRONG,

Anglers' Benevolent Society, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—Since my last report I beg to acknowledge with thanks the receipt of £1 0s. 2d. from Mr. T. Crumplen, collected at the entertainment at Pulborough on Saturday, July 11. The next meeting of the committee will take place on Friday evening, July 24, at 8.30.—R. GHURNEY, sec.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—Mr. A. A. Morgan and H. E. Probert have been unanimously elected as working members of the above society. Any member of any angling society holding the Anglers' Association privilege ticket can compete in the competition at Slough, on the 26th inst. in the association water, two rods allowed, and all to register their names at the Brickmakers' Arms, Stoke-road, near the water.—B. ABRAHAMS, sec.

Alma Angling Society, Crown Distillery, Vere-street, Clare Market.—On the 12th inst., several of our members fished in the competition at the Central Association's water at Pulborough, when five of them were successful in taking prizes—viz.: J. Scott, J. Windsor, G. Marriott, J. Fairbairn, and W. Hasted. The following members also weighed in: T. Smith (barbel), T. Fairbairn, H. Seymour, and J. Pailes.—J. PAILES, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—Unfortunately, our prizes were not won on the 12th instant, Mr. Hardy being the only member weighing in, he having perch. There are four prizes to be fished for on July 19, at Pulborough Association water. Conditions as before.—W. H. POTTER, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Several members were out on the 12th instant, and the following weighed in fish: Mr. Jones, bream; Mr. Bell, roach and dace; Mr. G. Rich, roach and dace; Mr. Cooper, roach and bream; Mr. King, dace; Mr. Knowler, dace; Mr. H. Levett, roach and dace. Our next outing will take place on July 26, at Woking, when three prizes will be fished for.—J. RICHES, secretary.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—Several of our members were out on the 12th instant, and the following members weighed in: Mr. Reeks, with a good show of roach and rudd; Mr. G. Merry, having a very nice show of rudd; Mr. C. Irwin, bream; Messrs. Embleton, sen., Hazell, and W. Hake also weighed in.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The usual weekly meeting was held on Wednesday night, with a good attendance of members. At the competition at Pulborough, which was held on the 12th inst., in connection with the Central Association, Mr. T. Simpkins, one of our members, was fortunate enough to take second prize with 7lb. 5½oz. bream. Mr. Scott had a splendid show of bream, 20lb. 9oz., from Yarmouth, on the 12th inst. Members are informed that two prizes remain over to be fished for. The South London competition will take place on the 19th, at Amberley.—A. G. SMITH.

Battersea Friendly Angling Society, Queen's-road, Battersea.—The third match of the season will be fished on the 19th, rowing for four valuable prizes. All fish to weigh bar jack; bank or punt. Competitors can start on Saturday night. Members are requested to attend on Tuesday next, to arrange August Bank Holiday prizes; as several new prizes have been added.—G. MUMFORD, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—The following gentlemen weighed in on the 12th inst., Mr. Farmer, bream and roach; Mr. F. Barker, tench and gudgeon; Mr. J. Barker, carp {roach and dace; and Mr. Hacker, bream. dace and perch. Our visit on the S.L.U.V.L., takes place next Tuesday, July 21.—F. ROBERTS, hon. sec.

Bloomsbury Brothers Angling Society, the Rose and Crown, Broad-street, Bloomsbury, W.C.—Members that have not come forward are requested to do so on Wednesday next, as there is a special general meeting, to settle special business. On the 12th inst.. Mr. Rich had a good take of dace; Mr. Payne, dace. Mr. Munday was duly elected as a honorary member.—J. SMALL, sec.

Bomore Angling Society.—This society has removed from the Queen's Arms to the Britannia, Clarendon-road, Notting-hill. We had some good sport on the 12th inst., and brought in some fine roach and dace.—F. STEVENS, secretary.

Bostonian Angling Society.—The following members have had fish: Mr. Ward, bream and roach, heaviest bream, 3½lb.; Mr. Rundle, bream; Mr. Chapman, rudd, tench, jack, and roach, heaviest tench, 3lb. 6oz. Day's outing on the 19th. The brake will start from club-house at seven a.m. precisely. A photo will be taken of members before starting. All should be present that can possibly attend.—J. H.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—On the 12th inst. Mr. Sanders saved us a blank with a show of roach, chub, and dace; and this evening (Wednesday) Mr. Avis weighed in some roach, and chub, barbel.—H. ROACH, sec.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—Since last report Messrs. Wilson and Watkins have weighed in bream and roach. At our special meeting last Tuesday we arranged to fish for the following prizes on July 26, pegged-down, at Dagenham Gulf; fare there and back one shilling. First prize, £1 1s. given by Mr. Young; second prize, 10s. 6d., given by Mr. H. Bones; third prize, 10s. 6d., given by Mr. Grainge; two prizes of five shillings each from the funds, to be fourth and fifth respectively. It is proposed to go by brake from club-house at midnight on Saturday, 25th; to commence fishing by mutual agreement on arrival; to cease fishing at 7 p.m.; one rod only; all fish to weigh. Any member absent last Tuesday, wishing to accompany us, can do so by letting me know as soon as possible, so that brake accommodation may be procured. Mr. Wilson and J. Mearring will mark out the swims.—T. HAWKES, sec.

Burdett Angling Society, 118, Hackney-road.—A few of our members were out on the 12th inst., but the takes were not very large. The following members weighed in fish: J. Pether, 3lb. 10oz.; D. Flint, 3lb. 7¾oz.: J. Gurney, 2¼oz. All members should go out now as the waters are in good order. We have room for a few good members and have some good prizes to be fished for.—J. PETHER, sec.

Burton Piscatorials, the Globe, Derby-street, King's Cross.—A few of our members were out on the 5th inst., Messrs. Jones and Roberts having a small show of roach and dace. On the 12th inst. the following weighed in: Messrs. Brierly, Butler, Roberts, and Jones; amongst the latter gentleman's show was a roach of 1lb. 2¼oz.—C. ROBERTS, hon. sec.

Cambridge Friendly Angling Society, Masons' Arms, Titchborne-street, Edgware-road, W.—The outing at Yalding will be continued on the 19th inst. only one prize having been taken last week, and that re-given by the winner (Mr. Allen); same conditions.—W. SUTTON. sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 12th inst. the following members weighed in: Mr. C. Chapman. tench; Mr. A. Chapman, tench; Mr. Marshall, bream and roach; Mr. W. White, bream; Mr. Fitter, roach; Mr. Sharp, dace. Several other members were out, but were not successful. —E. T. WHITE, sec.

Campbell United Angling Society, High-road, Kilburn.—Sixteen of our members journeyed to Langley for prizes on the 12th, but sport was so indifferent that only one prize was won—by Mr. Wood, with roach and perch. It will be fished out at Langley under the same conditions. —E. W. WOOD, hon. sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—On Monday last, another gentleman was enrolled as a member, and the prize list increased. It was resolved that this society be affiliated to the Central Association, and also that its name should be retained on the South London United Visiting List. The announcement that Mr. Deplidge would, on Monday, the 27th instant, read a paper—"An Account of the River Wey"—was received with acclamation. A lengthy discussion on the "Unfairness of the well-to-do members of angling societies in general to their less fortunate brethren, by the engagement of professional fishermen,' emanated from Mr. J. S. Pulsford. A vote of thanks to Mr. Tom Keeble (host and treasurer), and Mr. J. Deplidge (the chairman), for their exertions in securing for the Causton Angling Society, on the 12th instant, a successful outing at Bourne End, was unanimously carried. There were not many fish caught, but the success otherwise was undoubtedly a *chef-d'œuvre.*—JOHN SMITH, hon. sec.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—Only two members weighed in on the 12th. Mr. Macdonnell weighed 5lb. 14oz. of bream from Amberley; and Mr. Castell, bream, from Dagenham Lake. Our visit on the C. and D. list will be on the 21st inst. Brother anglers or friends who will favour us with a call will find everything cool but the welcome.—CAS.

Clapham Junction Angling Society. the Clarence, Winstanley-road, Clapham Junction, S.W.—On the 12th inst. the following members weighed in: Messrs. Robinson, 12lb. 8oz. barbel, and 20lb. 1oz. roach and dace, in all 32lb. 9oz.; Painter, 3lb. 13oz. bream; A. Bowater, 5lb. 9½oz. roach; Collis, 3lb. 3oz. roach; Chapman, roach, and Turner, roach. On the 26th inst. we fish a punt match at Staines, pegged-down, one rod only; all start together from Clapham Junction Station by the first train on the morning of that day.—A. TROWBRIDGE, sec.

Clerkenwell and District United.—The next visit on the above will be to City of London A. S., on the 21st. Any clubs on the list requiring a further supply of tickets for the match at Yalding can get them by applying to the sec.—F. CASTELL, hon. sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—Several members were out on the 12th inst., but did not weigh in. I must remind members that we fish a club match on July 19 at West Drayton, between Bull Dog Bridge and Cowley Lock. Names to be registered at the Shovel; cease fishing at seven p.m.; register fish at packet boat by 7.30, and return by the 8.48 train home; members to proceed by the 8.13 or 8.38 only; pegged-down match; one rod only; jack barred.—A. SMITH, sec.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—At our meeting on July 15, a new member was proposed. Mr. R. B. Brown had a very handsome show of roach, 19lb, from the Wey, on Monday, three going just over 1lb. each. These were all taken before 8 a.m. Another testimonial for the "early gentle worm."

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 12th instant most of our members were out, but the only gentlemen that were successful were Messrs. Wild, Spong, W. Midson, Malby, T. Midson, Killick, and Cogswell, who had a fine show of roach, bream, perch, and rudd. Members please attend on Tuesday next, by nine o'clock, as some important business was postponed in consequence of the small attendance on Tuesday last.—S. MALBY, sec.

Earlsfield Angling Society, Half-way House, Earlsfield, S.W.—The next outing will take place at Wimbledon Lake on the 19th, to commence fishing at five o'clock, to stop at eight in the evening.—R. W. BIRD, hon. sec.

Eastern Piscatorial Society, Spread Eagle, Gill-street, Limehouse, E.—Our shows of fish this season have not been very large at present. Mr. Jones has shown bream three times, Mr. Bartlett bream and perch. We have two new working members proposed, and there is an opening for a few more to join.—W. BARTLETT, hon. sec.

Enterprise Angling Society, City Arms, High Cross, Tottenham.—This society commenced its fourth season with a club dinner, at the Feathers Hotel, Wades' Mill, Hertfordshire, on the 12th inst. The report of the committee for the past season showed the full realisation of their anticipations for the success of the society, both financially and numerically. The funds already in hand, and a long list of gifts of prizes from members and friends offer a tempting inducement to the more than seventy members to "ply the angle" during the coming season. The prize list will be ready shortly. Four prizes were fished for, the first falling to Mr. Renshaw, sen., for a fine roach; Mr. Phesay (the vice-president) and Mr. Wado divided for the second and third, and Mr. Millard secured the fourth. Owing to the courtesy of the stationmaster of Tottenham, reserved coaches were added to the 7.50 a.m. down, and 8.58 p.m. up trains, thus adding to the comfort of the members during the journey. Two cases of fish, one of four large bream, and one of three fine perch, will shortly adorn the walls of the club-room.—W. H. TUCK, hon. sec.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road.—Messrs. Myers, Worrall, Ewer, Morgan, and myself were out, July 9, Wimbledon Park. We were all successful with roach and small bream. I tried the new lake at Hale End on July 12, but without a touch.—FRANK WOODS, sec.

Funny Folks Angling Society, Rose and Crown, 21, Goswell-road.—On the 12th inst. we had a nice show of fish by the following:—Messrs. Biggs, bream, roach (heaviest 1lb. 4½oz.), and dace; F. Vanhegan, roach, dace, and bream; G. Watling, roach and bream; and S. Hill, roach and dace. Mr. Biggs won the first; and G. Watling, the seventeenth prize in the Central Competition. We have room, for a few more working members.—J. W. BIGGS, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We were saved a blank on the 5th by Mr. Baildham and Mr. Clarke with a few tench and perch. On the 12th we had a fair show of fish—15lb. of perch. roach and dace—taken by Messrs. W. Lawrence, Slade, Ellis, and Jackson. —A. PAYNE, sec.

Great Eastern Angling Society, Castle Inn, Leyton-road, Stratford New Town. Since my last report the following members have weighed fish. Mr. A. Wheeler, 2lb. 11oz., roach; Mr. J. Grande, roach, 3lb.; Mr. F. Bates, roach and dace, 3lb.; Mr. W. Carr also had fish. Other members were out but had no fish.—G. F. WEAVER, sec.

Gresham Angling Society.—The usual weekly meeting was held on Tuesday, when the chair was occupied by Mr. C. J. Bentley. The chairman presented the society with a book "The Pilotage of the British Channel," for which he was thanked. Considerable discussion took place on the question of the right of the public to fish in the Norfolk Broads, and some arrangements were made for the meeting of London anglers, to be held at the Gresham Rooms on Tuesday, the 28th inst. at 8 p.m. It is expected that many anglers of note will be present, as well as several prominent public men, who take an interest in protecting the public rights. On Tuesday, the 21st inst., Mr. E. H. Bramley will read a paper entitled "Babble about London," when members of other angling clubs are invited.

Highbury Angling Society, Hornsey Wood Tavern, Seven Sisters-road, Finsbury Park.—We had a good show of chub on the 12th inst., taken by Mr. J. Gardiner, and since my last report the president has had the pleasure of handing over the club's handsome silver cup for the best specimen fish taken during the season to Mr. Rutherford, roach, 1lb. 12½oz.—J. T. G., sec.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 12th inst. many of our members were out, the following having successful catches: Messrs. Walford and Ford, roach; Rider, perch; Messrs. Geeves, Wells, Levoir, and Callcutt, rudd.—W. FENNER, sec.

Hoxton Brothers Angling Society.—The members fished for five prizes at Burnt Mill on the 12th instant, all being won, Mr. Cooper taking first honours. We had our return visit on No. 1 Eastern District on Tuesday evening last, the chair being taken by T. Gretton, secretary Stoke Newington, faced by E. Brockett, Original Alexandra. We had a crowded meeting and excellent singing. I beg to thank those friends who so kindly paid us the compliment, more particularly our neighbours from the Good Intent, who attended in full force. Our annual dinner will take place at Rye House, on July 26.—R. GHURNEY, sec.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street. W.—A few of our members went to Pulboro' on the 12th inst. but did not get much sport. The following weighed-in from other places: Messrs. Norman, perch; and Wilson, gudgeon.—SNAP.

Islington Brothers Angling Society, the Rose, Popham-road.—At our meeting, on the 9th inst., it was arranged to move to the Middleton Arms, Canonbury-road. Notices will be sent when change takes place. Some of our members went to Pulborough on the 12th. In the match, W. Stretch was one of the successful competitors, coming in third with 6lb. 13oz. of bream and roach; one roach, 1lb. 9¼oz. Mr. Willsher had some roach and dace, but got up too late to weigh in.—J. H. HERBERT, sec.

Izaak Walton Angling Society.—The week-day portion of the members dined at the Pied Bull, Stanstead, St. Margarets, on Wednesday, 15th inst.; the attendance was good and the dinner much enjoyed by all present. Mr. C. Hayward occupied the chair; Mr. J. Featherstone the vice-chair. After the cloth was removed the chairman, in a few well-chosen words, expressed the thanks of all present to the host Mr. J. Lyndsell for the nice manner he had entertained the gathering to which Mr. Lyndsell replied stating that he hoped to have the pleasure over again. There are four special prizes to be competed for on the 22nd inst., and four on the 26th inst.; for particulars see last week's issue of the *Fishing Gazette*, or they can be had at the club-house.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—We had a fine show of fish on the 12th inst., consisting of roach and bream. Mr. H. Challen best roach, 1lb. 1¼oz.; tench, by Mr. Beales, best one 2lb. 2oz.; roach and tench, by Mr. Ide, best roach, 1lb. 4oz.; tench, by Mr. Onree, H. Wright, and Dunham, and roach by Mr. E. Challen. On the 19th inst. we fish a pegged-down match for four prizes in the Shovel Pound, Drayton, one rod only, jack barred; first train from Westbourne Park or any subsequent train; members all to return together straight to the club-house, and weigh-in or be disqualified. A new member was proposed at our last meeting and will be balloted for on Tuesday next.—A. Ide, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—Members mustered in strong force at the committee meeting on Friday, the 10th inst. A new member was balloted for and elected. Mr. Turner deserted the ranks of honorary members and joined those of angling members. Thanks to our numerous friends, two additional prizes of £1 1s. each were added to our long list. I beg to remind members that the President's prizes will be fished for on the 19th instant, and Thursday, the 23rd instant, open to honorary and angling members. It is arranged to have a supper at headquarters on Friday, the 24th instant, at eight o'clock (sharp) when members are specially invited to be present. Some very good fish have been weighed in during the week by Messrs. Evans, Carter, Mason, Newcombe, and Master, from the Thames and Colne. Arrangements are in progress for a party of our members to visit Slapton for a few days, when it is hoped that previous records will be beaten. Reports just to hand from secretary, who is fishing near Cambridge, prove that he is having real good sport.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 12th inst., eleven members of the above society fished in the Pulboro' Competition, Messrs. More and Watling both weighing fish; Messrs. Belton and Pearce having fish from other waters. Mr. Agshead, our new host, was unanimously made treasurer for the society, and also proposed as a working member; he will be balloted for in the usual way at our next meeting.—W. Watling, sec.

Liverpool Angling Association.—We held no meeting last week, the members being away on an excursion. A great number of fish were taken (roach and perch), but they ran phenomenally small, and the lake fished in ought, undoubtedly, to be netted, and these innumerable small fry transferred to some other water, as the overcrowding is decidedly against their attaining any size. Menbers, please attend the meeting next week, 23rd, as details, &c., will then be arranged for the Bank Holiday outing to the Vyrnwy. —R. Woolfall.

Marylebone Angling Society. Pine Apple, Carlisle-street, Edgware-road, W.—On the 12th inst. our members were at various waters, when we had some good shows of bream, tench, roach, and dace by Messrs. Weller, Pearce, Penfold, Milburn, Clark, Collins, Sansom, and Bartlett.—W. F. Pearce.

Midland Angling Society, Prince of Wales, King's-road, Camden Town.—We have had several good shows of fish this week the following members weighing in—viz., J. Tunnycliffe, tench; T. Hull, roach and perch; W. Mogg, rudd and dace; J. Cooper, rudd; J. Rees, perch and roach.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—At our weekly meeting on Tuesday, another addition was made to the prize list. Mr. G. Fortescue had a nice take of roach, over 12lb., heaviest fish 1lb. 5oz. During the week, Messrs. H. K. Applin, C. Oliver, E. Jermy, and Garratt also met with good sport.—J. Coomber, sec.

New Albion Piscatorials, Duke of Kent, Old Kent-road.—On Thursday evening a party of our members journeyed by brake to Old Charlton Village, when we paid a visit to the Bugle Horn, a snug little hostelry lately taken by Mr. W. Bassett, a much-esteemed member of this club. There we partook of an excellent cold collation, under the presidency of Mr. W. T. Grimmett, and after the host's health had been enthusiastically pledged we returned home to the club-house and held our customary weekly meeting. Messrs. S. Stanley and T. Gill were elected as fishing members, Messrs. Canton and Warman as hon. members. Mr. Freeborn was proposed as an honorary member. Mr. La Feuillade, as delegate to the annual meeting of the T.A.P.S., gave an account of the proceedings, and was accorded a vote of thanks for his services on the occasion. A vote of condolence was passed to Mr. C. Hibble, an hon. member, who has just suffered a terrible bereavement in the loss of his wife. Mr. Newbury weighed in roach and dace. Windsor has been selected for the outing of Thursday next; two in a punt; to draw for partners. All to go by 7.35 a.m. or later train.—A. E. Baldwin, sec.

New Albion Piscatorials, Duke of Kent, Old Kent-road.—The competition on Thursday at Windsor was very successful. The two prizes £1 1s. and 10s. 6d., was won by Mr. Mudd, with 11lb. 15¼oz. of barbel and dace, and Mr. Bassett, with 11lb. 1¼oz., barbel and dace (including specimen barbel of 6lb. 1¾oz.) The following members also weighed in roach, dace, chub, and barbel: Mr. Read, 4lb. 1¼oz.; Mr. Arthur Matthews, 3lb. 13¾oz.; Mr. Shonfeld, 3lb. 5oz.; Mr. Marks, 2lb. 12¾oz.; and Mr. Turnham, 1lb. 4½oz. Mr. W. Grimmett, who presided, congratulated the members on the excellent show of fish, especially as regarded the barbel. Mr. Grace was proposed as a fishing member.—A. E. Baldwin, sec.

North Lambeth Angling Society, 106 and 108, Westminster Bridge-road, S.E.—Only two of our members were out on the 12th inst., but unfortunately had nothing to show, this being the first blank since the opening of the season, several good takes having previously been recorded. Members are reminded of the revised rules, and especially the one referring to sizes of fish, any member taking fish less than the increased standard being liable to a fine. Quarterly meeting on the 19th inst.—E. S. R.

North-Western Angling Club. Lord Southampton, Southampton-road, Maitland Park, N.W.—On the 9th inst., Messrs. Schultz, sen., perch; Schultz, jun., roach. On the 12th inst. Messrs. J. Plumpton, perch; Raganot, roach; and Pritchard, roach and dace from Pulborough, winning a prize in the Pulborough Competition. New rules and prize lists now ready. Our annual outing takes place in August, date and place not yet decided.—G. Schultz.

Original Clerkenwell Piscatorial Society, the Three Kings, Clerkenwell Close.—The summer outing and competition is arranged to take place on the 19th instant, at Yalding, for five valuable prizes, one rod only allowed, Thames measurement as club rule. All fish must be brought to scale by 10.45 for the competition. The fine pike caught by our member, Mr. Erwood, turning the scale 24lb., may be seen in the club-room; also two by Mr. Obbard, 17lb. 4oz., 14lb. 1oz., splendidly preserved by that well-known firm, Cooper, of Radnor-street, St. Luke's, which makes a grand addition to our collection.—T. Obbard, sec.

Original North Lambeth Angling Society, the Wellington, South-street, Hercules Buildings, Lambeth, S.E.—The next visit on the A.A.L., will be to this club, on Tuesday, July 28. Any club not receiving our invitation will please accept this as such.—J. Mann, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—The next series of prizes will be fished for on July 26, open match. Members to leave town on the morning only of the match. This club is open for a few good fishing members.—A. G. Duke, sec.

Phœnix Angling Society, the Crown, Pancras-road, N.W.—On the 12th instant, Messrs. C. Dove, Raymond, Mares, Elbourn, Homan, Reed, Foster, and Brown weighed in a nice show of tench, roach, bream, and perch. On the 19th instant, three prizes will be angled for in the Uxbridge Canal.—W. Elbourn, sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—About twenty members of the above society took part in the match at Cookham on the 12th inst., but only one prize was taken, which fell to Mr. Corney. I hope members will attend at Westbourne Park, on the 19th inst., when I hope the three remaining prizes will be taken. Two new members have just been made.—J. W. Harris, sec,

Prince of Wales Angling Society, the Globe, Lisson-grove.—On the 12th inst. the following members weighed-in: Mr. Scott, bream, 10lb. 7¾oz., tench, 1lb. 11½oz., largest bream, 2lb. 15¾oz.; Messrs. Knight, F. Read, R. Brock, Neal, and Anworthy. Members taking part in the match at Langley on the 19th inst., must all start by the midnight train on Saturday.—W. B.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—We had exceptionally good shows of fish on our trays on the 12th inst., being the best this season at present from Messrs. Webber, roach, Upper Thames; Chart, ditto roach; Trotter, ditto; Longland, roach and barbel, ditto; Holder, roach, Reigate; Harris and Harris, jun., roach and gudgeon, Richmond; Bacon, roach and dace, Pulborough fishing in the competition of the Central Association. I am glad to state that one of our members has rejoined us being proposed last week and will be balloted for on Wednesday. I wish to remind members that we have a very good list of prizes to be competed for this season and should like to see them take a little more interest in the working of the society and not leave it to a few. I might mention a few of our prizes from our list: Mr. Webber, 5s., ditto 5s.; Parsons, 5s.; Harris, 10s. 6d.; Gibbons, 5s.; Holder, 5s.; Trotter, 5s.; Holder, 7s. 6d.; Healey, 5s.; Liversage (Independent Brothers), 7s. 6d.; Bacon, 5s.; Hewitt, 10s. 6d.; Jerquet, 5s.; Chart, Longland, Robinson, Cavers, and several more too numerous to mention. Our return visit took place on the 15th inst., being well supported by talent and members of other clubs, full particulars next week. I hope members will show up next Wednesday as we shall arrange for another outing.—F. C. Longland, hon. sec.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On the 12th inst. we had another good show of fish by the following members: Messrs. A. Barclay, roach and perch; Denyer, rudd; J. Stanley, roach and perch; F. Barclay, roach and dace; Barrow, rudd; J. Holden, roach and perch; E. Perry, roach; Cox, roach; J. Yeo, roach; Henson, roach; Parsley, roach; total, 50lb. 4oz. One of Mr. A. Barclay's roach turned the scale at 1lb. 9¾oz., and is now in the hands of our local preserver. —A. Barclay, sec.

Rising Sun Angling Society, The George, Brook-street, Holborn.—On the 12th inst. Mr. Comley had a very nice show of roach and Mr. Sharpless a nice show of roach, dace and perch. On Monday next the 20th inst. a smoking concert will be held in the club-room, when the members of other societies are cordially invited to be present. Members and friends who intend going to the next outing to Amberley which is fixed for the third Sunday in August, are requested to send their names in to the secretary to facilitate the necessary arrangements. — J. Skinner, sec.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—A very poor show of members competed in the tournament at Pulboro' on the 12th, only three, two of which took a prize, viz., H. R. R. Wright and J. Wright. Other members went to different waters, but only Messrs. Wood and Stone weighed in fish. On Wednesday the two gentlemen proposed last meeting night were balloted for, and duly elected members. Two other gentlemen were proposed as working members, and one as a hon. member, who will as usual be balloted for next meeting night. Several members will compete in the tournament at Amberley on the 19th, when I hope to see some of them successful.—J. Wright, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On the 12th inst., several members fished at Pulborough in the Central Waters, but only one member had fish, Mr. Arrigonie, with bream, winning a prize, and also winning Mr. J. Barnes's 10s. 6d. Only two members weighed in from other waters, Messrs. W. North, bream, J. Petrie, roach—a nice tray, 10lb. 8oz. I must again request the attendance of those members who are in arrears.—S. E. Cane, sec.

South London United Anglers' Visiting List.—The clubs enrolled on the above list will fish their first friendly competition of the season at Amberley on the 19th inst.; conditions, roving between Houghton and Timberley Bridges; time of commencing and concluding fishing to be given on the ground. Train leaves London Bridge at 6.55 a.m. The next visit on this list will be to the Blackfriars Angling Society, held at the Winchester Arms, Southwark-street, on Tuesday, the 21st inst. As this society is always represented at every visit on the list, I trust the other societies will return the compliment, and give them a bumper.—A. Conn, hon. sec,

St. Andrew's Piscatorial Society, Turk's Head, East-street, W.C.—On the 12th inst. Mr. A. Long had roach, bream, and dace; Mr. King, roach and bream; Mr. H. Long, roach; Mr. Chevalier, roach and bream. Our annual dinner will take place on Aug. 30.—B. Chevalier, sec.

Stoke Newington Angling Society, the Dun Horse, Kingsland-road, E.—The eleventh annual dinner will take place at the club-house, on Wednesday, the 22nd inst., Mr. Joseph Hayes taking the chair. Members and friends are requested to be in their places at nine o'clock punctually. On the 12th inst. H. Towndrow, S. Orrow, H. Nayler, and T. Gretton, had a few bream and roach, but up to the present, sport with our members has been decidedly slow, —T. Gretton.

Sundial Angling Society, Hammersmith.—Our members fished a match at Slough on the 12th inst., but only two prizes were taken. Members will oblige by attending early on Tuesday next, as the competition prizes are to be distributed, another outing to be arranged, and other important business to be transacted.—H. H. R.

United Brothers, Deptford.—Several members of the above were out on the 12th inst., Mr. J. Turner weighing in some bream. Several other members were out, but returned with blanks.—H. Tyler, sec.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—We had a good attendance on the 14th, and some very important business was got through. If those members who were absent last Tuesday would kindly show up they will hear something to their advantage. I wish to remind the same that our next match takes place on August 2. Place and conditions to follow. Several members were out on the 12th, and the following weighed in: Mr. Smith, barbel and roach; Mr. Clegg, roach and dace; Mr. Ilsley, roach, dace and bream.—H. C., hon. secretary.

Walham Green and Fulham Angling Society, Stansford Arms, Fulham.—Mr. C. Weyer was duly enrolled a member. Since my last several of our members have been out, with the following results: Mr. T. Allder, a fine show of roach and dace, 9lb. 6oz., the largest roach weighing 1lb. 1oz.; Messrs. Warner and Templeman, a fine show of roach and dace each. Of the five members who attended the Pulborough competition, only one, Mr. Achong, had fish, who, however, did not weigh in, the other four having a blank.—E. Sutchall, sec.

Walworth Waltonians.—On the 12th inst. Mr. Risdon weighed in a splendid show of dace from the Thames, all according to the new measurement, winning Mr. J. Pump's prize of £1 1s. Mr. Hardy was fortunate enough to get a roach in prime condition, 1lb. 12oz., making a start with the first specimen fish of the season. There was a good meeting on Wednesday last, when Mr. Albert James was elected unanimously a fishing member of this society; also Mr. J. Gill honorary member. The next competition will take place on Wednesday, July 29.—C. Hibble, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—On the 12th inst., Mr. W. Gordon weighed in rudd, Mr. R. G. Dartnall, roach and bream; Mr. R. W. Land, rudd; and Mr. Barnes, dace. On Wednesday last Mr. John Jury was duly elected a member.—R. J. Dartnall, sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Only a few of our members were out on the 12th instant, and the following weighed in fish: —Mr. J. Newton, 2lb. 5½oz. of roach; Mr. R. Lowther, 2lb. 9oz. of roach and dace. I hope our members will not forget the monthly meeting on Wednesday next, July 22.—R. Lowther, sec.

West London Angling Club, Dartmouth Castle, Hammersmith.—Members are reminded that the first club matches of the season will take place on the 23rd and the 26th inst. for three prizes, any public water, with usual club conditions. We have four new members to elect at our next meeting.—J. J. Hunter, hon. sec.

Woolwich Brothers Angling Society, Green Man, High-street, Plumstead.—On the 7th inst., whilst fishing in the Chelmer, near Chelmsford, honorary member R. Gaywood captured a perch weighing 2½lb., which is now in the hands of the taxidermist. The 11th inst. being "bean feast day," several of our members booked out to various waters and returned with a very good take of fish: W. Davis, chub and barbel, 10lb., heaviest chub, 3lb. 1oz.; G. Grimwood, bream, heaviest, 1lb. 13oz.; W. Hart, bream, 5lb. 14½oz.: W. Brinton, roach, 5lb. 2oz.; W. Stevenson, roach and perch, 5lb. 1oz.; F. Cresswell, chub; E. Morley, roach and perch; J. R. Howcroft, roach; A. Simmonds, roach and bream, G. Hadler, roach. The tea and coffee service kindly presented by Mr. Levitt, senr., for the heaviest catch of fish during the opening month was brought to a conclusion on the 15th inst., W. Davis being returned the winner, J. Hicks, second; and F. Cresswell, third. We shall be pleased to see members of other angling clubs at our meetings held every Wednesday evening.—J. R. Howcroft, sec.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly meeting was held on Wednesday, 15th inst., Mr. Shears in the chair. Another new member was proposed for election at the next meeting. The secretary reported that a meeting *re* the attempted closing of the Norfolk Broads was held here on Monday, the 13th, Mr. A. W. Parker (our president) in the chair, the result of which has been fully reported in the daily papers. Mr. Cartland, fishing at Cheshunt on the 11th inst., caught several very fine dace and chub with the fly.—H. Richardson, hon. sec,

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

THE PISCATORIAL SOCIETY.

At the meeting of the Piscatorial Society on Wednesday evening last the following resolution was unanimously passed: "That the warm thanks of the Piscatorial Society are tendered to the Thames Conservancy for the action they are taking with reference to the nuisance caused in the tributaries of the Thames by persons cutting weeds, and allowing same to float away, so as to become a nuisance, and trust the efforts to abate such nuisance will be crowned with success." W. T. Galloway, hon. sec.

REPORTS FROM RIVERS, LOCHS, &c.

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add	30 min. for Chelsea.	Add	55 min. for Kew.
	40 ,, ,, Putney.		75 ,, ,, Richmond.
	45 ,, ,, Hammersmith.		80 ,, ,, Twickenham.
	50 ,, ,, Barnes.		85 ,, ,, Teddington.

EXAMPLE:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

English and Welsh Reports.

The Lower Thames.—GENERAL REMARKS.—I have been away from the Thames spending a few days in Bloaterland, and although I have my regular headquarters at Great Yarmouth, it was amusing, on leaving the South Town Station on my arrival, to see the number of persons of all ages and sexes touting for lodgers. One man addressing me said, "I have a beautiful house with a splendid garden—just the place that would suit you," but the bait did not act. I was better pleased, as I went by the early trains on practical visits, to notice the number of anglers on their way to Fritton Decoy, Oulton Broad, and other places with every appearance of being Thames anglers; indeed, one was heard to exclaim, "That looks like our Thames secretary," but I did not recognise the remark. I should like to point out some notable alterations that have been made since last year, as it may tempt some of the anglers to go again. The Britannia Pier has been widened in the upper portion above the glass shelters to about double the width, the underneath part on each side being adapted for the use of anglers, where there is room enough for a peg-down match by marks on the railings. The old jetty, which was being lengthened last year, is now complete, with some commodious shelters at the entrance. There is no charge for entrance, and on it there is a beautiful sea breeze, but, according to the notice, angling thereon is strictly prohibited. Between the jetty and within a short distance from the Wellington Pier there is a charming terrace garden with a stone promenade and seats by the sands. At the Aquarium, the ingenuity and tact of Mr. Nightingale has caused to be removed the useless banks on the side facing the sea, and the space thus created has been utilised as a refreshment saloon, where tea can be obtained on temperance principles at a popular price. I need only add two items on angling in the Broads. Mr. John Mason, of the Oulton Broad Fishery, in one day got over 60lb. weight of bream; the three largest weighed 20lb. At Fritton Decoy several fine perch have been taken from 2lb. to 3½lb. each. The trains of the Great Eastern are doing the journey to Yarmouth in little over three hours, and are punctual. I left Yarmouth on Tuesday at two o'clock, and reached Liverpool Street exactly at five.—B.

RICHMOND.—The boats here have been well employed, and the anglers getting some fair takes of roach, dace, and barbel.

TWICKENHAM.—Pert Hammerton, ten dozen of roach and dace, and four barbel, the largest 7½lb.; C. Brown, fifteen dozen and three barbel; Samuel Cole, in two days, six dozen and three barbel; R. Moffatt, in the same time, five dozen and three barbel, the largest 3½lb.; John Frost, in one and a-half days, thirteen dozen and one barbel; J. Annesey, in one day, five dozen; J. Dunn, in one day, nine and a-half dozen and one barbel; and G. Coxen, in one day, five dozen and four bream.

TEDDINGTON.—Joseph Baldwin, in one day, eight dozen of roach and dace, and one brace of jack. A gentleman, fishing by himself, thirteen chub, weighing 25lb.; and another gentleman a barbel of 9½lb.

KINGSTON.—John Johnson, during the week, seventeen barbel, and sixteen dozen of roach and dace; N. Bolton, in three days, fourteen dozen of roach and dace, and a brace of jack; J. Wilkes, eight dozen and two bream, weighing 6lb.; B. Pope, in one day, five dozen, one barbel, and one bream.

SUNBURY.—Messrs. T. and A. Stroud, during the week, thirty dozen of roach and dace, four chub, and one brace of jack; and Messrs. E. Clarke and Son, forty dozen.

WEYBRIDGE.—Herbert Curr, in two days with Mr. Woolley, twenty dozen of roach and dace; another day with Mr. Ellis, seven barbel, three bream (the largest 4½lb.), five chub (the largest 5lb.), and one brace of perch; and another day with Mr. Leaf, some roach and dace and one brace of jack. All the fish were put back again.

CHERTSEY.—J. Poulter, during the week, twelve barbel (the largest 5lb.) and fifteen dozen of roach and dace; and L. Hackett, ten and a-half dozen fine perch and six bream.

STAINES.—John Keene, jun., one day with Mr. Waterer, of Bagshot, seventeen chub, the largest 2lb., and all put back again; another day with Mr. Dyer, of Tottenham, twelve dozen of roach and dace and six chub; another day with Mr. Bland and friend, 23lb. of roach and barbel; another day with Mr. Newbury, three barbel, and eight dozen of roach and dace; another day with Mr. Foggie, ten dozen and four barbel; another day, 20lb. of roach and dace and barbel; and another day with Mr. Robinson of the Clapham Junction A.S., 35lb.

Upper Thames.—The upper portions of the river have again settled down to comparative peace, and quiet after the hub-bub of Henley regatta. The water is in excellent summer condition, and good sport should be had with the barbel in mill-tails and weir pools. Chub are rising well to the fly if sought an hour or so after sun-rise, and a few hours before sun-set. Roach are difficult to obtain of any size, and should be sought for in clear channels between the weeds. I am pleased to note that perch seem coming to the fore once again, many excellent samples in good condition having been had during the past week at Marlow, Temple, Hambledon and Maple Durham. It goes without saying that gudgeon are feeding, twenty to thirty dozens for two rods, being the record for punts daily in the Cookham, Cliveden and Bray waters. Weather very sultry and indicative of thunder. Rain would much improve the angling tone of the water, but even as it is, it is in fair order, and fish on the feed.—MARLOW BUZZ.

Thames (Staines).—From the angler's point of view, the place affords many facilities. First of all the reach of river between Bell Weir, Egham, and Penton Hook contains an excellent stock of fish, including many fine trout, there are several good fishermen to go out with; and last but not least, there is a good service of trains to and from London. There are plenty of good pitches for bank anglers, and later on, say about the end of August, or the beginning of September, we shall have them down in large numbers after the jack and chub. The fish are getting into better condition now, as is also the river, for the rain has freshened it up considerably. Barbel promised to give sport when the season opened, but they have not been feeding well, except on one or two occasions, when I hear that J. Keene, jun., made some good baskets. Dace, on the contrary, have commenced to bite freely, and the gentle and anglers are experiencing good sport. Chub, too, are looking up, and several nice fish have been landed. There are few better places for "chubbing" than this neighbourhood, and last winter heavy baskets were recorded. One or two of the fish went over 4lb. On the 4th inst., Charles Hone, and a patron tried for chub and did well, taking six and a-half brace, all good fish, one weighing 3lb. He also caught three barbel whilst chubing. The basket further included five dozen of dace. The following day, Hone was out with his punt again, the result being that he returned home, with three chub and six dozen of dace. Fishing again with a gentleman, on Monday, he got seven chub and ten dozen of dace. I am glad to hear that Hone has been busy, for he is an excellent fisherman, and works hard to give his clients satisfaction. Many happy days have I spent with him, and I hope before long to again make the acquaintance of the "parlour" of his punt. Both bank and punt anglers should do well here after the rain, and as the barbel may probably be on the rampage, look out for squalls.—GOOSE-QUILL.

Thames (Windsor).—Anglers this July have been favoured with exceptionally good water consequent on the heavy showers of last week. Chub have risen well, and appear to be very plentiful, though can hear of none exceeding 3lb. in weight, Mr. Shepard, jun., of Eton, having amongst others a brace of this weight. Mr. Hale, jun., of Eton College, has also had good sport with them, using artificial flies. Barbel and roach have fed well, but the former will never again, I think, be recorded in hundredweights as of yore, though, to my mind, *braces* sound much more sportsmanlike. Mr. F. Roberts, of Park-street, Windsor, had a sharp run of sport on the 13th inst., taking from eight p.m. till dusk thirty roach, six dace, and a chub. The handsomest roach caught recently was one of 1lb. 3oz. by Mr. Bird, of Eton. Very few jack have been taken in this district, one of 7lb. from Boveney Weir being the best during the week. Water in good condition, and barbel should come well if properly baited.—B. R. BAMBRIDGE.

Ancholme District.—Some fair catches have been made by visitors during the past week. On warm days the fish have taken best early and late, but on cold, breezy days they have fed all day. Two Sheffield anglers took one day 18½lb. of roach between them. The caddis bait and gentles do most execution now. Mr. Ripley on another day had five good bream up to about 3lb. each. Three anglers had sixty-five roach on another day in one and a-half hours' fishing. Messrs. Neal and White had some good bream running up to 3lb. Reports from the Bain and other trout streams state that there is a good head of fish, but, owing to the numerous anglers, they are shy and bad to catch.—THOMAS FORD.

Barle (Dulverton).—The river is lower and clear. A few fish are killed after dusk with small Red Spinner or Coachman. The Quill Minnow gives fair results during the day. Hot and close, likely some thunder.—IRON BLUE.

Derwent (Ambergate).—There has been an improvement in sport here during the last week, and anglers have been out on both Derwent and Amber in fair quantities. Several trout upwards of 2lb. each have been taken with the fly in the deep places, mostly with the Yellow Sally and Downlooker. Tom Lock had, amongst a nice basket of trout, a chub of 4lb. from the Amber, taken with an artificial minnow on the 4th inst. The Derwent is running in grand condition for fishing, and there is a good hatch of fly each evening.—The foregoing was unavoidably omitted last week.—The Derwent has fined down to the ordinary summer level, and fly fishing is improving in the streams. At Whatstandwell, on Tuesday afternoon, Mr. A. Clark had two brace trout with the spinning minnow, and I took two and a-half brace trout and grayling with the Yellow Dun. Few fishermen have been out during the week, many being busy with haymaking. Prospects for stream fishing are good for next week, but there will be little doing in the deeps until there is another fresh. The small Grey Dun Yellow Dun, and Iron Blue are the best flies to use.—AMBER DUN.

Douglas (Isle of Man).—The rivers are at present in excellent order, the majority of anglers that have been out have done very well indeed. Mr. Colquhon, vice-president, weighed in at the association's headquarters, Talbot Hotel, a basket of five dozen trout, six of which collectively turned the scale at 2lb.; Mr. T. H. Fleming had another capital basket full, three of his fish weighing respectively, 12oz., 11oz., and 10oz. Mr. T. Weston and several other members also did very well. Sea fishing during the past week has been very poor, neither amateurs nor professionals can do much. I expect brighter prospects about Friday, when the spring tides begin to make, as there are undoubted signs of mackerel in the offing.—STORMY PETREL.

Dove and Tributaries.—Very little fishing has been done this last week in the neighbourhood. The weather has been too genial for either fish or fishermen to be much on the move in the heat of the day. We hear of a dish of five brace being taken on Wednesday from the Norbury water, but of no other take worthy of special mention. The water courses have not run low as yet; last week there was quite a colour on, so that it will be some little time, if no more rain falls, before the water is too low for a fair chance of sport. The fish are rising well at Sundown. Several rods were out on the Okeover water yesterday. We have not as yet heard the result.—D. & W. H. FOSTER, Ashbourne.

Eden (Carlisle).—Salmon and grilse continue running well, and the Solway fishermen are having a good time. It is rumoured that they are not too particular about the weekly close time when they know the whereabouts of the bailiffs, and, from what I know of them, I can quite believe it of some. Fish are not taking the Eden as freely as they should, owing a good deal, in my opinion, to the filthy state of the river, owing to the sewage pollution. This matter has been taken up by the Eden Board, who will, if necessary, urge the County Council to put in force the extensive powers they have.—SILVER GREY.

Esk (Whitby, Yorkshire).—The river is very low, and a good flood is much wanted. Trout are very scarce and shy, and no takes worth mentioning have been made during the week. A fair number of salmon and salmon trout have got into the upper reaches of the river, but there will be no real sport until after a good freshet. The net fishermen are doing well, this promises to be one of the best seasons for them on record. The Board of Conservators have granted the fishermen extra privileges this season, and it is a pity that in some instances these have been abused. A recent conviction before the local magistrates may, however, act as a warning against further depredations.—JNO. J. JACKSON.

Fen Waters (South Lincolnshire).—Sport is improving on the fen waters. Roach are taking bait more freely and are in better condition. Perch are also lively and are affording work for the worm fishers. Some fine specimens up to 1lb. each, fell to the rod of Mr. Johnson, of Billingborough, on a local water; and Mr. Nelson, of the same place, had several good ones. In the same locality, two very fine tench were taken last week. Bream are being captured in better fashion, but they are still shy. Eels are giving the most sport, and with worm it is comparatively easy to take 6lb. or 8lb. in an evening of eels, up to ¾lb. or 1lb. each. Astackby Fen is a good locality.—LIMPET.

Idle (North Notts).—Since the settlement of the weather the prospects of angling on this stream have improved, the water being nicely coloured and not too low. The weeds are still complained of, but mowing being pretty well over, there is an improvement in this respect in some districts. Roach have been taking bait better, and in the lower districts some nice bream have been taken. Perch in some of the drains are obtainable, and dace in many places are lively, and afford sport for those who may incline to fly-fishing. There is not much doing among trout, unless it be on the private waters. Odd ones get caught as low as Retford Bridge.—L.

Itchen (Winchester).—Sport has been fairly good during the past week. Fish rise from nine till twelve a.m.; evening rise from eight till nine. Best killing fly, Read Quill. Wind, N.E.—GINGER QUILL.

Lea and Stort.—I have had a long walk by the banks of the old waters to-day, as it is always a good time to get an idea of the stock of fish. Everywhere I saw innumerable quantities of all sizes and most kinds. I was pleased to notice perch especially showing well during the hotter part of the day, and amongst them some very nice fish. When they begin to show themselves near the surface it is a sure sign that they have got well over the spawning. A great many anglers have been out almost everywhere, but especially in the lower lengths. Roach have not been by any means so well on the feed as I expected, although some decent catches have been made. In the upper waters, near Ware, several fish of over a pound have been caught, principally, I understand, by legering with paste and gentles. I have been testing Thurgood's ground bait, and it is certainly most attractive in bringing together fish, but I think it would be an improvement to mix it with arrow-root biscuit or bread paste, as it is of such light texture that it does not sink quickly enough, in my opinion, when used alone. I don't know what it is composed of, but it has a most aromatic pleasant smell, resembling curry powder, quite enough to put one on the feed. There is nothing special to record in the way of big takes or big fish, but sport has been had at all stations.—SPLICED JOINT.

Leicester.—The lovely weather which we have enjoyed lately has caused a large influx of anglers to the river-side, and the waters being in splendid condition for summer fishing, fair sport has resulted. The best baits used have been white paste, gentles, and straw worms, and with these lures, fishing for roach has been very successful. At the waters close to Leicester, Messrs. J. Parsons, G. Stevenson, W. Dewick, C. Lings, W. Smith, T. Green, and Pinnock, have been conspicuous with excellent lots of the last-mentioned specie. Mr. Green's basket contained probably the best specimen of fish, weighing 1lb. 3oz., and it is evident that this kind of fish are rapidly getting into good condition. Eel fishing has afforded plenty of amusement during the evenings. Close to Aylestone perch have been taken freely. The few anglers who were out pike fishing only succeeded in getting a brace or two of small fish, which is not to be wondered at, as the weather is so hot. A great many small roach have been taken from the Abbey Park waters. Roach and bream fishing has proved unusually good down the Wreake valley, and the Narborough subscribers have no reason to growl at the results obtained so far.

Loddon (Earley).—Beautiful summer weather, and the fish well on the feed. Mr. Lewis, a brace of nice jack, 5½lb. and 6lb. respectively, and in very fair condition; also some good roach. Mr. Woodman, some perch, scaling from ¼lb. up to 1lb. Several other anglers who have been here this week have had fair sport. J. R. GOULD.

Lugg and Arrow (Leominster).—Both streams are now in good fishing order either for bottom or top.—GWYNNE.

Lugg, Arrow, and Pinsley (Kingsland).—Rivers are in nice order, not quite so low as usual at this season. Weather has been grand for the haymakers, but dead against anglers. The evening rise usually looked for at this time, does but seldom occur, the wind backing to the north about sunset. A swarm of flies are on now. The best should be July and Yellow Dun, Orange Palmer, Black ditto, for day; with Spinners, Owls, Sky Blue and Caddis for evening. The minnow used early morning and late evening should account for some of the "old 'uns." With next month we begin fishing for grayling.—R. T. WILLIAMS.

Medway (Maidstone).—The water is in splendid colour for angling, but the roach and bream are not yet well on the feed. Some few have been taken, but not in good condition. Paste and gentle is the favoured bait. Under present conditions they ought soon to come on the feed. I saw an expert with the fly trying the chub, but they would not rise. Some few perch have been taken with the minnow at the locks. The angler should try the maiden lob if he wishes to get amongst the large bream which abound in all the deeps in the Medway. I expect to see some good catches of roach within the next ten days under present conditions of weather and water. When the roach are well on, boiled wheat is bound to take the best catches. WM. SHRUBSOLE.

Nene (Northamptonshire).—The annual general meeting of the Nene Outfall Commissioners has just been held at Thorny, Mr. T. R. S. Lyster presiding. The chairman was re-elected, and the committee appointed. The Commissioners have not been idle, but nevertheless have a nice little balance in hand of about £366. Some excellent angling has been enjoyed on the Thorny branch of the Nene, where the bream are in good condition, and often run to a large size. In Wansford neighbourhood a friend of mine has been very fortunate with the roach, obtaining a basket of over three dozen, some of which were very useful fish. He baited with wheat. Mr. House and Mr. Mould were busy near by, and among other fish the former landed a decent rudd of 2lb., a good weight for rudd in this river; and the latter was responsible for a well-formed chub of 1lb. 5oz. Water would be improved with a little rain.—NENEBANK.

Norfolk, Suffolk, and Cambridgeshire Rivers.—Angling altogether has improved since last week. It is not now, as most all good fishermen know, first class. All our rivers and broads are teeming with insect life, and most of it in a larva state, and whilst this superabundance of natural food exist, roach very wisely refuse a gentle or red worm, however tempting it may be. I saw a lot of chub taken near Mildenhall, on the river Lark, on Saturday last; the lot of thirteen weighed close on 17lb. From Brandon, on Monday, 14th, I saw a lot of good dace, several of them ¾lb. each; roach are feeding better there than anywhere else. In this district, one lot of seven I looked at were fine good fish; another lot of thirteen were very good and clear. Anglers cannot do better than try at Brandon; every accommodation at Mr. Ralph s, Brandon, close to the river and station. I had a try myself at Southey on Monday night for bream, and took a good lot. The bream continue to feed well all along the Ouse, at and below Ely, the roach are not yet on; perch are feeding well at the branch and Littleport. From the Yare excellent takes of bream and perch continue to be made especially at Cantley, Buckenham, and Reedham. From my favourite perch river, the Waveney, at Beccles, some splendid trays of roach and perch were taken on Saturday. Weather at the time of writing warm and cloudy, rather like rain.—WILLIAM HOWLETT.

Ouse (Brandon, Norfolk).—I hear a great many new members have joined the several fishing clubs in this district. Just now pike are numerous; perch and dace excellent; railway service good for a long day's fishing. Time of writing, wind north-west and cloudy.—JOHN O. GEORGE.

Ouse (Huntingdon).—The late rains have greatly improved the condition of the water, and brought fish on the feed. Some good takes of roach have been had, and some good bream have been taken with brandlings, including one fine fish 4lb. 10oz., and there is good prospects of some good sport. A fine rudd was taken during the week by a local angler, 2lb. 4oz., and a roach nearly 2lb.—H. ROUT.

Ouse, &c. (York).—For nearly a week the river Ouse has been running a thick colour from the effects of last week's rains, and anglers have not had much sport. To-day (Wednesday) it has nearly assumed its normal condition, and better prospects are in view. Already several fair baskets of chub, roach and bream are reported to-day in the drain swims near the city. The river Derwent was in good condition on the 11th, and several York Club members journeyed to Stamford Bridge, Kirkham, and Malton, where some nice panniers of roach and chub were taken. I hear of fair sport from the Foss amongst the perch, a boy taking a fine specimen, which weighed over 2lb. The trout streams in the neighbourhood of Pickering, Kirby Moorside, and Driffield, are being fairly patronised, but the heavy rains have caused the fly to be out of favour just now, and up-stream worming has shown good results in a rather coloured water. Several anglers from London are now visiting the Rye Valley, but I hear of no extraordinary kills. These streams should afford capital sport now that the much desired rains have come. Several of the York Club members are indignant at the steps now being taken to close several of the best lengths on the Derwent by landowners, owing, I understand, to malpractices of some Sunday fishermen, and I am glad to learn that deputations from several clubs will wait upon the owners. Seeing that all club rules here prohibit certain abuses mentioned as the cause of this step being taken by owners of land, I think the best course would be for the latter to summon some one, and so let the public and fishermen generally see who are the real delinquents. It seems a pity innocent people should have to suffer. Recently, whilst pike fishing at Kirkham Dam, Mrs. St. Quintin's gamekeeper hooked and landed a fine bull trout, weighing over 5lb., which is to be set up and placed in Kirkham Hall.—RONALD.

Plymouth.—SEA FISHING.—We are still catching just as much fish as we like—bass, pollock, mackerel, and whiting. The mackerel are being taken in great numbers with the Silver Spinner and artificial bait, and seven or eight dozen is considered a small catch. The pollock are taken just at the back of the breakwater, between the Lighthouse and the Knap Buoy, some seven or eight-pounders very frequently being taken. Another spot for pollock is about two gunshots off the end of the Promenade Pier, round the East Winter and other buoys. In Cattewater, or Sutton Harbour, as it is called, large quantities of flat fish and eels have been caught, the former with No. 6 gut hooks baited with mudworm, and fishing at the bottom, the latter (which are the silver eels or fresh-water species) are caught either with hook or with a sling-net, such as we use for whitebait, smelt, &c., which consists of an iron ring, from 3ft. to 6ft. diameter, having a net bag fastened round it and cross strings dividing the circle into four; in the centre, where the strings cross, is fastened a bunch of worms, and the eels are attracted, and, whilst attacking the worms, the net is lifted, and the eels, of course, drop in the bag.—WILLIAM HEARDER.

Rother (Fittleworth, Sussex).—The water is in good fishing order, and anglers are now enjoying roach fishing. There is a fair supply of bream, and some good jack, but it is rather early to fish for the latter.—H.

Severn and Lower Teme (Worcester).—Both streams in tip-top condition for angling, and the weather all that could be desired; and sport in this neighbourhood has been very good, among the coarse fish in particular, some baskets taken weighing over 20lb. Some fair baskets of trout have been weighed in, Mr. Cooper's, of the Izaak Walton Club, being about the best, with three brace of very nice ones taken with the gentle; while Mr. Littlebury, junr., has taken some good ones, trolling with Warner's special minnow; he also caught a nice perch, 2lb. in weight, with same bait. Chub are rising well at the Black, Red, and White Tag, Palmer, and large buz fly, they are also taking the vamprey and gentle freely. The Blue and Yellow Dun, Red Ant, Whirling Blue, and Orl Flies, have done good execution on the Teme during the week. Salmon fishing here has been good during the week, and the net men have done well, but none have been taken with the rod.—WINOFIELD.

Severn (Shrewsbury).—Dutton has made some grand takes, capturing with the maggot, near Coton Hill, on two days, seventy-five and fifty respectively, principally roach. Trout fishing has not been good. Mr. Ellis, early in the week, took a few heavy chub, trolling two small pike and a perch, but could not succeed in landing a trout. The water is now too low and clear for the minnow, and evening anglers will do best.—PISCATOR.

Stour (Grove Ferry).—The trout fishers have had some good sport lately. Fish averaging from 2lb. up to 3lb. 13oz. have been taken by Messrs. Robinson and Nask, and Capt. Plumbe. Bream up to near 4lb. have also been caught, and some excellent catches of roach. Mr. Davis took eight fish, weighing, 9¼lb., in a very short time, his friend landing forty fish, which averaged over ½lb. each. Messrs. Dannow and Burks have also had some good catches.—H. KINO.

Tees (Barnard Castle).—In the Estuary, the salmon fishing is improving. I saw some fish caught there this afternoon (Wednesday), and obtained one in the pink of condition, the fishermen are much disturbed in their minds just now about the new rules for travelling, about to be enforced by the Fishery Board.—J. H. R.

Teme (Ludlow).—The Teme in this district continues to run in good order for angling, but is getting low. The weather has been fine and warm, and a good many anglers have been out on the water. The fish have been well on the feed. The best killing flies are the Yellow Dun, Owl-fly, Pale Evening Dun, Red Spinner, and Silver Horn. Bottom fishing has been brisk, the best baits being the maggot and Bee Grub. Wasp Grub is scarce as yet. Minnow fishing has been very successful.—S. LUDLOW.

Teme (Tenbury).—The water in this part is still clear and running low. The weather has been very fine and warm, and the fish have been moving well at the fly. Bottom fishing of an evening has been very successful, and some fine trout have been landed.—WORCESTER.

Trent (Newark).—With the settling down of the weather has come increased sport to the angler, and bream, roach, and dace have taken worms and gentles in a satisfactory manner. Bream are coming on in the dead waters of the Muskham Fishery, and some pretty specimen roach have been taken in Mr. David Slater's top water towards Fiskerton. Wednesday evening brought to a close the winter club of the Newark Piscatorials, the premier prizes being secured as follows: Mr. Bagnley, roach, 1lb. 5¼oz.; Mr. F. C. Lees, dace, 8¼oz.; Mr. A. Wilson, chub, 2lb. 6oz.; Mr. C. Brownlow, bream, 4lb. 13oz.; Mr. T. Summan, perch, 13¾oz.; and Mr. T, Cope, bleak, 1½oz. Trent in grand order for all-round angling, and worms and gentles the popular baits.—TRENTSIDER.

Whitby.—AMATEUR SEA FISHING.—The roads at Whitby are teeming with white fish, indeed it is many years ago since there has been such a plentiful supply as there is now. The best way to obtain good sport is to hire a boat and anchor, or drive about half a mile from shore. The lines are usually fitted with three hooks, one above the other, the whole being weighted with a 2oz. lead, the latter being at the extremity of the line and held about a yard from the bottom of the sea. The principal kinds of fish caught, are whiting, billets, gournards, and dabs. No mackerel have yet made their appearance on this part of the coast. The favourite baits now being used are, fresh herring cut into small pieces, mussels, and sand eels.—J. J. JACKSON.

Wye and Derwent (Derbyshire).—Both rivers are still running in capital condition for angling, and fair sport has been had, principally in the evenings as the fish do not rise freely in the day time. Many anglers have been out on the Wye, and better baskets have been shown here than of late. I saw a nice basket of fish taken here (at Bakewell) on Thursday evening last, four brace; and a gentleman on Friday evening last had seven-and-a-half brace. Fishing on the Derwent has been exceptionally good this week, and some heavy fish have been killed. Prospects for the next few days are good and the best flies now are Apple Green Duns, Sand-fly, Stone Midge, and Little Chap.—DOTTEREL.

Yare (Norwich).—The bream are seen in greater numbers than for years past, as they pass in shoals up and down the various reaches between Coldham Hall, Brundall, Buckenham Ferry, and Cantley, at each station, not forgetting Flower's, at Brundall, good takes have from time to time been made. At Acle on the Bure a match between sixteen competitors resulted in first prize being taken with nearly 9lb.; so, of course, they did not get amongst the bream, which are so numerous and large at Acle.—ROBERT MOLL.

East and West Cleddau (Pembrokeshire).—These rivers are in splendid condition, both as to quantity of water and colour, and trout rise well to the fly, especially towards the evening, A local angler caught seven and a-half brace, and a nice sewin the other evening (after five o'clock). Sewin are now abundant in the upper waters.—H.

Lake Coron (Bodorgan, Anglesey).—The fish rise freely to the fly between eight and nine in the evening, and a few local anglers have had good baskets. They take the Sedge and the Cinnamon with a suddenness that is really delightful. Lake full, and no visitors for some time.—W. H.

Lake Vyrnwy (North Wales, via Oswestry).—During the past week we have had several days' very good sport, and on Saturday passed the third thousand (since opening, March 26), the total on that day being thirty thousand and sixteen trout, 2,810¼lb. Messrs. F. Weare and W. H. Watts have been the most successful: the former in three and a-half days caught fifty-two fish, 41¾lb., and the latter in four and a-half days got fifty-three, weighing 49lb. 2oz. On Monday, in very trying weather, Dr. Edwards caught six lovely fish, 6lb. 3oz., two heaviest 1lb. 8oz. and 1lb. 7oz. The above clearly shows that this water fishes well late in the season, as Messrs. Weare and Watts have made five consecutive "limits"; it also endorses the opinion formed during the trial season of last year that this lake would afford good sport in July and August. Best flies—Black and Grouse, Butcher, Lee's Favourite, and a gold-bodied fly with pheasant wings and red topping. Season closes September 15.—LONG DRIFT.

Maelog Lake (Py Croes, Anglesey).—It was too rough to fish in a boat the other day when I paid a visit to this lake. I noticed in the visitors' hook that Mr. Woodall in a few days killed forty-one trout, weighing 25¾lb. A report has reached me that a gentleman killed a 3lb. trout the other evening. A good many visitors about, and angling general.—W. H.

Towy (Llandilo, Carmarthenshire).—Some excellent sport has been had during the past ten days with sewin and trout, of which the following will give a good idea:—On July 6 and 7, we had flood water down the river. On the 8th, Mr. T. Butcher, of Annon, caught about 5lb. in weight of trout by worming. July 10, Dr. Naunton Davies took four sewin on the Cothi (tributary), weights, 3½lb., 2lb., 1¾lb., and 1lb., and on the same day 12lb. in weight of trout, heaviest 1lb., and all with the fly; he also hooked a salmon of about 15lb., but lost it after a hard fight, owing to the fish getting round some wire fencing that had been placed in the river. He also hooked a fine sewin of 4lb. or 5lb., and in drawing it to land it ejected the fly stuck in the tail of a half-digested trout of about ¼lb. in weight. Mr. Davies soon afterwards had two sewin on at the same time, but lost them on the same day. Messrs. Lloyd took nine sewin, and over 30lb. in weight of trout on the Cothi by minnow and worm fishing; Mr. David Edwards, 5lb. of trout, with the worm; and Dr. Lloyd, a nice basket on the Towy, with fly. July 11, Dr. N. Davies, a small basket on the Towy, with fly; Mr. William Phillips, an 8lb. basket, largest trout 2lb., on the Cothi ;and Mr. Edwin Hopkins killed a 3lb. trout with dead minnow on the Towy. The water is still in good fishing order.—H.

Usk (at Usk).—The river has been in excellent order for salmon angling during the past fortnight, and a large number of salmon have been captured. W. Smyth Pigott had four on Monday, Mr. W. Stone three on Wednesday, and Mr. T. Rees five on the same day. Many one's and two's have been taken most days. The weather is rather bright the two past days, which checks sport considerably.—T.

Scotch Reports.

Altnacealgach Hotel Waters (via Lairg, N.B.).—The following have been the baskets since last report. Mr. Mann on Loch Veyatie, thirty-two trout, 13lb.; Messrs. Clay, Headlam, and Winstone, London, on Loch Urigill, twenty trout, 7lb.; Mr. Dicken, on Loch Boarlan, one dozen, 4lb.; Mr. and Mrs. Barrett, on Loch Cama, one-and a-half dozen, 7lb.; and Mr. Moulton Barrett, on Ledbeg stream, 9½lb. trout. On Wednesday Mr. Mann, Shrewsbury, on Loch Cama, three dozen trout, 13lb.; Miss Clay, and Winstone, same loch, forty-four, 16lb.; Mr. and Mrs. Barrett, on Loch Mheallain, eighty trout, 21lb; Mr. Moulton Barrett, on Loch Boarlan, three-and-a-half dozen, 13lb.; and Mr. Dicken, London, on Loch Urigill, four dozen, 11½lb. On Thursday, Mr. Mann, on Loch Cama two-and-a-half dozen, 10lb.; Messrs. Clay and Winstone on Loch Veyatie, two-and-a-half dozen, 8¼lb; Mr. and Mrs. Barrett, on Loch Urigill, close on six dozen, 22½lb.; and Mr. Moulton Barrett, on same loch, seventy trout, 19lb. On Saturday, Mr. Mann, on Loch Veyatie, two dozen trout, 7lb.; Messrs. Clay and Winstone, on Loch Cama, three-and-a-half dozen, 11lb.; Mr. Barrett, on same loch, two dozen, 9lb.; Mr. Barrett on Loch Boarlan, twenty trout, 7lb.; Mr. Moulton Barrett on Loch Cama, twenty-three, 8lb.; and General Rankin, London, on Loch Boarlan (two hours only) seventeen trout, 4½lb. On Monday, this week, Mr. Connacher, Limearty, on Loch Boarlan (a short time only) twenty-three trout, 6½lb.; Mr. Beith, Glasgow, and Mr. Millar, Musselburgh, on Loch Urigill, five dozen, 16lb.; Mr. Mann, Shrewsbury, on Loch Cama, seventeen trout, 12lb., and two *Salmo ferox* of 4½lb. and 2½lb.; General Rankin, London, on Loch Cama, thirty-four trout, 11lb.; and Messrs. Clay and Winstone, London, on Loch Veyatie, two-and-a-half dozen, 12lb.—McB.

Carryhoillie.—Since July has come in we have had a little rain and some very fair sport. On the 3rd Mr. Tattersall had nine salmon which averaged 15¾lb. each. On the the 4th, five, largest, 22lb. On the 6th, he killed a beauty, of 29lb. Grilse still very scarce here, yet of good size. On the rest of the river I believe they are doing fairly well.

Carron (Easter Ross, Ardgay, N.B.).—The river is now in good fishing order after the heavy rains of last week. So far as can be ascertained, the sport during the past week has been as follows: On the Craigs water, Captain Holder, London, caught a salmon of 12lb. on Monday, a ten-pounder on Wednesday, and on Saturday two salmon, weighing 9¼lb. and 9¾lb. On Thursday, Mr. W. Poole, Tain, fished the Balnagown Hotel water, and got a grilse of 5lb.; Mr. Macmillan, Somerset House, London, on same water, a 7lb. grilse; and Mr. Mackenzie, a salmon of 10lb. On the upper waters, Mr. W. Allis Smith, of Glencalvie, landed two grilse, 5lb. and 6lb., and two sea trout of 1½lb. each. On Friday, Mr. George Campbell, on Mr. MacLeod's rod, fished hotel water and landed a grilse of 7lb.; and Mr. W. Allis Smith, of Glencalvie, a salmon of 12lb., and a 6lb. grilse on the upper waters. On Saturday, Mr. George Campbell, on Mr. MacLeod's rod, caught a grilse of 6lb.—McB.

Dee (Aberdeenshire).—Sport has been on the whole fairly rife during the past week. The Dee rose to a fair round water on Sunday and Monday, and a large number of fish came away, which has enhanced the prospects very much. On the upper reaches the same phenomenal run of luck hitherto enjoyed during the spring and early summer, is not now being had, but for all that the sport is still above the average. On the Invercauld Arms water, Lieutenant Allen landed sixteen fish during the past ten days, scaling from 7lb. to 16lb.; M'Lester, before leaving, had one of 7lb.; Mr. McGregor, two, of 9lb. and 20lb. respectively; while Captain Cook landed one of 9lb., and Mr. Yarrow, one of 25lb., and a grilse of 4lb. On the Balmoral waters several fish have been got daily, as also on the Glentana waters, where a fairly good grilse season is being experienced. On the Aboyne waters, Mr. Milne landed a salmon of 7lb., and two sea trout, of 2lb. each, on the Huntly Arms reach. On the Ballogie section, Mr. William E. Nicol had a salmon of 7lb. and a grilse of 3lb., while Mr. Lamond landed a fine fish of 8¼lb., on the Kincardine Lodge water. On the Shin water, Mr. Chalmers had a fish of 7lb. On the Feugh, Messrs. Connor and Carnie are having some fairly good sport, while a few grilse are also being landed on the Banchory and lower reaches. A good few anglers were abroad in the glen streams on the occasion of the Aberdeen annual holiday on Monday last, and some good baskets of trout were made, especially in the upper waters where rain feel heavily.—DEESIDER.

Deveron (Banffshire).—Although the river Deveron was in fair fishing order since the beginning of the present week, scarcely a salmon or trout has been landed by the rod. On most of the pools fish appear to be numerous, but the water continues to run rather dark for the fly. On the lower section the net fishermen continue to get a fair amount of salmon and grilse. The coast stations also yielded well during the week. The heaviest shots of fish were taken from the nets near to Banff and the east side of the mouth of the river. We understand that the salmon fishing—which has been the most productive for several years past in this district—is mostly confined from the station at Black Pots eastward to the fishings on the Gardenstown coast, a distance of about twelve miles, and that little is doing at the stations east or west of that station. The total consignments to the London market on Saturday last from the Deveron district were twenty-six boxes; on Monday nineteen boxes; and on the Wednesday of this week eleven boxes. On the Gardenstown coast the net fishermen had an average of three boxes daily.—H. W.

Don.—The Don was well fished on Monday last, being the occasion of the beginning of the Aberdeen holidays, when every inch of water was fully taken up. Some good baskets of trout were made, but we do not hear of remarkably heavy fish.—DON.

Drumbeg Hotel (Assynt, N.B.).—The loch fishing has improved greatly of late, and meantime round hereabout sea fishing is splendid. Last week hotel visitors were out on the lochs, with results as follow: Monday, Miss A. Schwind and Miss Schwind fished Loch Drumbeg, got thirty-five, weighing 8¾lb.; Messrs. Heathcote and F. Schwind, on Loch Poole, got eighty trout, weighing 15lb. Tuesday, Miss Schwind and Mr. Heathcote, on Drumbeg, got forty, 11lb.; Miss A. Schwind and Mr. G. Schwind, on Loch Poole, got fifty-five, 11lb. Wednesday, Miss Schwind and Mr. G. Schwind, on Loch-na-Loinne, got fifty-two, 14½lb. Friday, Miss A. Schwind and Mr. F. Schwind, on Loch-na-Loinne, fifty-one, 14lb.; Miss Schwind and Mr. Heathcote, on Loch Poole, got eighty, 16lb.; Mr. G. Schwind, on Drumbeg, got thirteen trout, 4½lb. Saturday, Miss A. Schwind and Mr. G. Schwind, on Drumbeg, got thirty-one trout, 9½lb.; Miss Schwind and Mr. Heathcote, on Loch-na Loinne, fifty-four trout, 16lb.—ALEX. MACKENZIE.

Esk (Langholm, Dumfriesshire).—The Esk still remains in fair order for angling, and there is now a good show of sea trout. A few new-run salmon are seen rising in the pools of the lower water, but, generally speaking, angling will not be at its best until a good flood cleans the bed of the river. The following are some recent takes in Langholm water: Mr. J. Charlton, five sea trout; Mr. Thos. Irving, four and two; Mr. Jas. Elliot and Mr. M. Laidlaw, three each: Mr. F. Storey, three and two; Mr. T. Martin, two; Mr. R. Reid, four and one; Mr. J. Harkness, three; Mr. T. M'Lellan, one; and Mr. J. Laidlaw, one of 4lb.; Messrs. Wm. Thorburn, G. Armstrong, and J. Barnfather had also sea trout in the same water. In Canonbie water, Mr. Craig, Cross Keys Hotel, had a salmon of 12lb. and three sea trout in the Willow and Cauldron Pools; Mr. Jas. Park, Marchbank, and W. Scott, Holmfoot, also having sea trout in the same pools. Mr. Wm. Davidson, Byreburnfoot, had five sea trout in the Byreburnfoot waters; while Messrs. W. Riddle, R. Doughty, F. Little, A. Jardine, and R. Irving had also sea trout in these waters. In the Liddle. Mr. J. Graham, Crookholm, had seven sea trout; Mr. A. Irving, Rowanburn, six; Messrs. D. Murray and R. Calvert, Rowanburn, and Graham, Harlawmill, had also sea trout in the Liddle. In Langholm water on Monday, Mr. Alex. M'Millan had seven sea trout; Mr. Wm. Laidlaw had two; Mr. G. Armstrong had one weighing 4¾lb. behind the Distillery; and Messrs. C. Glendinning and J. Morrison had one each. On the same day, Mr. W. Scott, Holmfoot, had a salmon of 13lb. from the double water.—WILLIAM DOUGLAS, Eskdale Hotel.

Glenfintaig (Fort William, N.B.)—Mr. W. Rogers, of Chester, an experienced fly-fisherman has been having capital sport here on Loch Lochy the past week, having returned each evening with from twenty to thirty trout.—THOMAS H. DIXON.

Kilmelford.—Capt. and Mrs. Falls, R.N., Miss Leggatt, Colonel Harvie, Mr. and Miss Horsfield, Messrs. Elliott, Cuthbertson, McNeil, Platt, and Thomson, presently residing at the Cuilfail Hotel, made a total catch of one thousand two hundred and fifty-four trout and five hundred and four various sea fish during last week on the hotel waters.—JOHN M. FAGEN.

Kyle of Sutherland (Bonarbridge, N.B.)—A few anglers have been sea trout fishing with the rod, but as no details are forthcoming except the following, the presumption is that heavy baskets are not the rule. On Wednesday, Dr. Polson, Edinburgh, landed twelve sea trout, weighing 9½lb. in all. On Thursday, he caught one of 2¼lb. and seven others, which aggregated 4¼lb. The same angler landed ten sea trout, 5½lb., on Friday, and five, 2¾lb., on Saturday. During the past week the various netting stations in this neighbourhood have been very productive in both salmon and grilse. As compared with the previous week the hauls on Messrs. Powrie and Pitcaithley's Skibo fishings showed great improvement, but on Mr. Smith's, Cragganduhh and Invercharron fishings, as well as on Mr. Anderson's Scalp, Rivermouth, and South Bonar fishings, a slight decrease was experienced. [The foregoing was unavoidably omitted last week.—ED.] Captain Holder, London; Dr. Polsen, Edinburgh: Mr. MacMillan, London; and others have been out sea trout angling but sport has been poor. The hauls of salmon and grilse on the various netting stations have also fallen off considerably during the past week. As compared with the previous week the takes on Mr. Anderson's Scalp, South Bonar, and Rivermouth fishings showed a decrease; and so did Messrs. Powrie and Pitcaithleys Skibo fishings at the head [of the Dornock Firth; in fact the only nettings on which any improvement was experienced were Mr. Smith's Cragganduhh and Invercharron fishings. From all those nettings combined it is estimated that upwards of 3½ tons of salmon and grilse had been consigned to southern markets in the course of the week.—McB.

Lairg, N.B.—On Monday, 29th ult., Major-General Stafford and Mr. Dickens fished Loch An-Ullavie, and killed two dozen nice trout. On Tuesday, on Loch Beannoch, Mr. Dickens got eight, 5lb.; his basket included a Loch Levenite of 5½oz., one of the two thousand yearlings from Howietoun added to Beannoch's stock in May. On Loch Shin, Major-General Stafford got four, 3lb.; and late in the evening Messrs. Macinness and Mackay killed nearly forty fine trout. On Wednesday, fishing Loch Shin, Major-General Stafford got fourteen, 5lb.; Mr. Barnett, eight, 3lb.; Mr. Grant, seventeen; Messrs. Dunbar and Matheson, forty, and Serjeant Ray excellent sport. Thursday—the sacramental fast day at Lairg—was an angling holiday, Mr. J. Meakem, however, went to Beannoch, and *minus* a gillie, was successful in taking ten fine trout, weighing 10lb. On Friday, on Loch Shin, Major-General Stafford and Mr. J. Meakem had thirty, 9½lb.; Dr. Macleod a fresh-run salmon of 8lb.; Mr. Young, sixteen, 6lb.; Mr. Clay, seventeen, 9lb.; and Mr. Grant, ten. On Loch Beannoch Major Berkeley, one trout of 2lb. On Saturday, on Loch Shin, Sir F. Pollock, made a basket of twenty-five, 10lb.; Mr. Meakem, on Beannoch, eight, 6lb.; and General Stafford, ten. Two local anglers fished Glas Loch early Saturday morning and killed nearly forty lovely trout. The earlier part of last week was very wet, the total rainfall for the week being 1·7 inch. On Monday, on Loch Beannoch, Sir F. Pollock killed fourteen trout, 10lb.; on Loch Shin, Mr. Meakem got eighteen, 8lb., and Mr. Young, ten, 6lb. On Tuesday, which was dull and wet, General Stafford got fifteen, 5½lb., on Loch Shin, and Mr. Meakem, five, 6lb., on Loch Beannoch. On Wednesday, on Loch Shin, Mr. S. Laing killed fifteen trout, 4lb.; on Thursday, Major General Stafford on Loch Beannoch, four, 5lb.; Mr. Meakem, in Loch Nam-fuor-leachd, twenty, 10lb., and on Loch Shin, Sir F. Pollock, twelve, 4lb.; Mr. Young, ten, 3lb., and another local angler twelve. On Friday, a gale blew from the north-west, the Beannoch party were blown off, and Loch Shin could only be fished late in the afternoon. On the latter loch Major General Stafford had thirteen, 5½lb.; Mr. Meakem, nineteen, 9½lb.; Mr. Young, ten; a local angler, fourteen, heaviest 2½lb., and Messrs. Copeland and Cumming, twelve, 4¾lb. On Saturday, on Loch Shin, Messrs. Copeland and Cumming killed twenty, 10lb., Mr. Gowers, nine, 3½lb. Mr. Meakem in the evening, eleven, 6½lb., and A.B.C., six, largest three-quarters of a pound. Weather lovely, lochs in excellent ply.—J. Y.

Laxford and Loch Stock.—After a fortnight of very dry weather, with the water run extremely low, the necessary rain which brought the river into fishable condition, and afforded the fish an opportunity of ascending, came on Wednesday and Thursday. The Earl of Leicester, now staying at Stack Lodge, caught on Thursday and Friday three fish, weighing 7lb., 14lb., and 17lb. Only on the days mentioned have any head of sea trout ascended this year yet. Loch Stack, accordingly has done nothing. It yielded its first sea trout of the year on Thursday. Last year it was giving splendid sport by the same date in July. —J. R.

Loch Lochy (Invergloy Hotel).—Fair fishing has been had on Loch Lochy since last publication. Messrs. A. E. and C. Baker made on Friday, Saturday, and Monday baskets of 4½lb., 7½lb., and 4½lb., respectively, and one sea trout 1½lb.—J. R. EGGER.

Loch Migdale (Bonarbridge, N.B.).—On Monday last week Mr. MacPherson, Bridge Hotel, Bonarbridge, was out in the evening, and got nine trout, aggregating 3½lb. On Wednesday the same angler had six, averaging about ½lb. each; and on Thursday, seven—3lb. in all. Dr. Polsen, Edinburgh, was out on Friday and made a nice basket. On Saturday Mr. MacPherson landed nineteen beautiful trout, several of which scaled ¾lb., while the whole averaged upwards of ½lb. each. Other parties have also been more or less successful.—McB.

Lochmore.—Canon Faber fished Loch Stack, from Monday till Friday of last week, and did not get any sea trout, grilse or salmon, except two sea trout kelts. On Thursday or Friday, he lost three fresh run salmon. Professor Drummond and Mr. Wilson fished on Saturday, got no sea trout or salmon. Mr. Wilson got one grilse, 7lb.

Lochy-Spean (Lord Abinger's).—During June owing to the drought none of the rods got quite an average of two fish per day, but since July came in sport has improved. With the drops of rain the river has been in better ply, and some not at all bad scores have been made. For instance on the 3rd inst., Mr. Tattersall had nine salmon which averaged 15¾lb. On the 6th, he had a beauty of 29lb. In these waters grilse still very scarce but of a good size. I was glad to see your article in last *Gazette*—"Educate and Agitate." The net fishermen would not allow a single fish into the rivers if they could help it, and then what would be the result?—CAPTAIN WAUGH.

Mull.—SEA TROUT FISHING.—Sport with sea trout has now got a commencement, and some particulars of sport had of late on the Hotel waters are: July 6, Mr. MacKerchar, Alloa, four sea trout and three brown trout in two hours on Loch Asapol; 7th, Mr. J. S. Steele, and Mr. E. E. Briggs, twenty sea trout, heaviest, 5lb.; and forty-three brown trout, heaviest, 1lb., on Loch Asapol, in which there is now a good stock of fresh-run fish.—JOHN CAMPBELL, Bunessan Hotel.

Naver (Strathnaver, N.B.).—On Saturday week Mr. Tom Scott, Rhifail, caught two fine fish on beat No. 4. On Thursday last, Sir J. Edwards-Moss, Borgia House, landed several fish on the Borgia, and on Friday he had four on the Naver. Mr. Darwin, Skelpick Lodge, fished the Naver on Friday and caught six, and on Saturday, four. The net fishers on the Borgia had heavy hauls of salmon and grilse until the spate came.—McB.

Overscaig Hotel Waters (via Lairg, N.B.).—On Tuesday last week, which was very wet all through, Capt. Murchison, London, fished Loch Merkland, and got forty trout, aggregating 10lb.; Captain Barton and Rev. Mr. Porter, on Mid Shin beat, got twenty-eight, 10lb.; Mr. T. Sample, Morpeth, on Upper Shin beat (a few hours only), one dozen, 5lb.; and Mr. Crichton, Edinburgh, on Loch Griam, two dozen, 9¾lb. On Wednesday, Capt. Murchison, on Loch Merkland, seventy trout, 14lb.; Mr. Sample, on Loch Griam, two dozen, 8½lb.; Mr. Crichton, on Loch Shin, three and a-half dozen, 13lb.; and Capt Burton, with Rev. Mr. Porter, on Fiag beat, two and a-half dozen, 14lb. On Thursday the last-named fished Loch Shin and got two and three-quarters dozen, 14½lb; Mr. and Mrs. Sample, on same loch, two and a-quarter dozen 10½lb.; Mr. Hill and Mr. Murray, on Fiag beat, thirty-four trout, 14lb.; and Capt. Murchison, on Loch Merkland, seventy trout, 20lb. On Friday boats were blown off lochs; those successful being Captain Murchison, who fished Loch Griam and got seventy trout, 19½lb.; and Mr Crichton on Fiag beat, three and a-quarter dozen, 10½lb. On Saturday Capt. Burton, on Loch Griam, a nice basket, 10½lb.; Capt. Murchison, on Gormloch, forty-six trout, 16lb. Mr. Crichton, on Fiag beat, twenty-nine trout, 13lb.; Mr. and Mrs. Sample, on same beat, twenty-five trout, 11lb.; and Messrs. Murray and Hills, on Loch Merkland, forty trout, 14lb.; Rev. Mr. Porter, on river Merkland, hooked one salmon, but lost it, and rose two others. Master George Ross, an eleven-year-old angler, landed a salmon of 7½lb. On Monday, this week, Mr. Crichton, on Loch Shin, had nineteen trout, 8lb.; Rev. Mr. Porter, on same loch, two and a-half dozen, 10½lb.; Mr. and Mrs. Sample, on Loch Merkland, thirty three trout, 10lb.; Messrs. Hills and Murray, Fiag beat, thirty-eight trout 16lb.; and Capt. Murchison, same beat, fifty-eight trout, 21lb. Total for the week ending, eight hundred and seventy-nine trout, 302¾lb. and one salmon, 7½lb.—McB.

Oykel.—On settling down after the heavy floods of last week, the water was in fine order, and capital sport was obtained. Mr. Fowler, Langwell Lodge, went out for a while shortly after his arrival on Thursday evening, and caught a grilse, 5½lb., on Rock Pool, and two, weighing 6lb. and 7½lb., on Langwell Pool. Mr. John Ross, Wolverhampton, was out the same evening, and caught a six-pounder on Long Pool. On the upper waters, Mr. Hugh Macleod, Benmore Lodge, landed a fine salmon of 18lb. On Friday, Mr. Fowler caught five grilse on the Langwell waters, weighing 7lb., 4½lb., 6½lb., 5½lb., and 5lb., besides a salmon of 16lb. Mr. Ross had one grilse, 4½lb., on Brae Pool, and one of 5lb. on Junction Pool. On the upper waters, Mr. Hugh MacLeod, on Mr. Smith Ryland's rod, caught one of 4½lb. On Saturday, Mr, Ross, Wolverhampton, grassed a 16lb. salmon on Long Pool; Mr. Ross, Leicester, fishing from Oykel Hotel, lost a beauty of 17lb. on Langwell Pool; and Mr. Hugh MacLeod, on Mr. Smith Ryland's rod, a clean-run salmon of 9lb.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.)—On Monday Loch Garbh-bhad-beag was fished by Mr. Maitland, Dover, who got a grilse of 4lb. On Tuesday, Mr. MacDonald, Inshegra on river Achgriskill, caught two grilse, which averaged 5lb. each; and on Wednesday, Mr. Mackintosh, Achgriskill, had one of 5½lb. On Thursday, Rev. B. Cave and Dr. Ervine, Preston, fished Loch Inchard and landed three sea trout, 4lb., and eighty lythe. On Friday. Mr. Young, London, landed a 6lb. salmon on Loch Garbh-bhad-beag. On Saturday, Mr. Maitland, Dover, on same loch, had a 4lb. sea trout, and a salmon of 9½lb.; Mr. MacKay, Oldshore, on Loch Sandwood, one sea trout 3lb., and a salmon of 7½lb. Dr. Ervine, Preston, on Loch Tigh-Sheilg, made a basket of five dozen trout, 21lb.; and Messrs. Ross and Munro, Tain, on Loch Mathair-Gharbhuilt, two and a-half dozen, 9lb.—McB.

Shin.—The upper reaches of the Shin were fished from Lairg Hotel, by Major Berkeley, on Monday, Wednesday, Thursday, and Saturday, of last week, the details of his sport being as follows: Two salmon, of 14lb. and 7lb; three salmon, of 13lb., 10½lb., and 10½lb, and a grilse of 6lb.; four salmon, of 17lb., 13lb., 10lb., and 7lb.; and three salmon, of 16lb. 7lb., and 6lb. River well stocked, and in excellent ply. Lovely weather.—J. Y.

South of Scotland.—Many fine fish have been caught in the Esk. One of the largest sea trout caught in the district streams this season was taken by Mr. M. Laidlaw in Soine's Pool, the trout weighed 5½lb.; Mr. George Maxwell and Mr. Alexander McMillan killed four sea trout each; Mr. W. Their, Commercial Hotel, Langholm, killed one of 2lb.; Mr. A. Glendinning had two in the town water; Mr. Thomas Irving, three sea trout; and several other anglers have had sea trout within the last few days of this week. Mr. John Rae, Mumbie, had several sea trout, some of which scaled 3lb.; Mr. John Harkness killed one of 3½lb.; Mr. John Elliot landed three sea trout at an outing, and Mr, James Elliot had a sea trout and 11lb. of yellow trout. In the neighbouring river, the Annan, heavy baskets have been made in the Mill Dam, at Newbie Mill, with worm and drawn gut. Mr. John Lawrie, Town Hall, Annan, killed about twenty herling the day before yesterday; Mr. Wallas, gunmaker, Wigton, killed thirty herling on Wednesday morning, and thirty-three on Thursday morning; Mr. James Scott had twenty-four herling: Mr. John Iveson, Wigton, had nearly twenty herling; Mr. James Thomson, Annan, killed twenty-three; Mr. Peter Loudon, Oldham, had twelve herling; other anglers, including Mr. Munro, Mr. McGiverm had over a dozen herling each. All these fish were taken with the brandling worm in the mill dam. In the Mount Annan water, Mr. P. A. Pasley-Dirom, of Mount Annan, has been perhaps the most successful angler on the Annan of late. Mr. Dirom sticks to the fly and he has been killing sea trout every day during the past fortnight up to 2½lb. each. His fisherman, Mr. Andrew Bell, landed the finest sea trout caught with the rod this season in the Annan. On Tuesday he landed a beauty of 3lb. 12oz., with fly in the Mount Annan water; Mr. J. Beattie, Brydekirk, killed one of 2½lb. Mr. Tom Thomson, Mr. W. Kerr, Mr. E. Taylor, Mount Annan Lodge, and many others, have been killing sea trout since Monday. In Hoddon Castle water, Mr. W. Wright, Ednam Annan, killed two sea trout on Saturday, of 1¼lb. and 1¾lb. respectively; the same angler lost a fine grilse on a trout fly and drawn gut, besides getting broken four times with large sea trout; Mr. Wardrope, Ecclefechan, landed a sea trout of 2lb. and one of 1½lb., with fly; Mr. Reid, gamekeeper, Hoddon Castle, killed three sea trout on Monday, averaging 1½lb. each; Mr. Sandy Henderson, Ecclefechan, had one of 1½lb. In the lower waters yesterday (Wednesday), Mr. John Pool, Birmingham, landed a basket of thirty herling in the evening, after having fished the most part of the day for nothing; Mr. Thomas Gibson, Bridge Place, Annan, had a few with fly; Mr. W. Wright, Ednam, killed fifteen herling with Spider-fly and Olive Dun, on Tuesday, in the Brewery water. Some nice trout are being caught in the Fleet and also in Dalbeattie Loch, and I hear of some nice yellow trout being had in some of the tributaries of the Dumfriesshire rivers.—HEATHERBELL.

Spey.—Miss Mackie, of Glasgow, Macclesfield House, Craigellachie, fishing on the Easter Elchies section last week, landed a grilse of 5lb. Mr. Mackie, fishing on the same section, landed two sea trout, each weighing 3lb. One of the largest takes with the net on the upper waters for some years was landed on Saturday last, and was obtained from Pol Martaig, on the Duke of Richmond's Kindarnie waters, below Aviemore, leased by the Lord Lieutenant of Ireland. In the haul no fewer than fifty-two fish were landed. They averaged a little over 10lb. each, or an aggregate weight of about 4cwt. 3qr., which at present market price would realise £26. The fish landed seemed to be but a small number of those in the pool. A great many escaped from the net in consequence of the difficult nature of the landing-place. Large numbers of salmon were afterwards seen rising owing to the disturbance in the water.—H. L.

Tay (Perth).—The recent rains have brought the rivers into capital ply. At no time this season have the prospects of sport looked brighter. On the Cogill water, Mr. Mitchell, Cuparangus, had two small fish last week. Mr. Muirhead had a basket of trout, weighing 12lb., on Saturday. Mr. M. Nicol, nine trout; Mr, Smith, twelve trout. On the Tummel, Mr. Cook, Perth, had a basket of trout, weighing 15lb., on Monday.—ALDER.

Thurso and Lochmore (Caithness).—A good spate last week brought up a large run of grilse and a good many salmon. The prospects for the autumn anglers are very bright. None of them have arrived yet, but some are expected this week. The river is falling, and is now in excellent order.—A. H.

Tongue Hotel.—Anglers from Tongue Hotel are still having good fishing. The following is a record of their sport: July 6, Dr. Phillips, on Loch Craggie, ten trout, 4lb.; Mr. Bourne, on Loch Craggie, fifteen, 6½lb.; Mr. Bolton, on Loch Derry, four, 2lb.; Mr. Rigden, on the kyle, twelve sea trout, 22lb., two heaviest fish 6½lb. and 2½lb. July 8, Mr. Bourne, on Loch Slamm, one salmon, 7½lb., also 14lb. trout. July 9, Mr. Bolton, on Loch Slamm, twelve trout, 7½lb.; Mr. Bourne, on Loch Loyal, thirty-two, 11½lb. July 10, Dr.

Phillips, on Loch Craggie, 11lb. trout; Mr. Bourne, on Loch Craggie, 5lb. trout. July 11, Dr. Phillips, on the kyle, ten sea trout, 14lb., heaviest fish 4lb.—A. CAMPBELL.

Tweed.—On the Leader, on Monday, Mr. Munro, Eskbank, Dalkeith, had 11lb. On the Peebles water, Mr. T. Brockie, with minnow, had a trout of 3lb. 2oz.; and Mr. R. Gall had a couple of fine trout, one of 1¾lb., and one 2lb. weight, both caught on the Edleston water. In the Innerleithen district, Mr. A. M'Nab had 11lb. of trout, fishing during the night and morning: Mr. F. Welsh, 6¼lb.; Mr. T. Ritchie, 5lb.; and Mr. Walter Aitken, 4¾lb. On the Teviot, Mr. Alexander Affleck, tailor, had 13lb., six of which weighed 1lb. each and over, the bait used being worm aud maggot. The Tweed net salmon fishings aro also very poor at present, although a good many grilse are being got. One salmon of 37lb. was got on the Goswick fishing. The yield on the netting stations in the river are doing very little, but those on the sea coast are doing a little better. The weather to-day (Wednesday) is fine and mild, with a steady glass, fairly high, and the wind from the south-east.—MAXWHEEL.

Whitadder (Ellemford).—There has been several showers during the past few days, and on the 3rd a thunderstorm in the afternoon. The trout were taking freely before that, yet notwithstanding the small size of the river excellent baskets have been got. On the 8th Mr. R. P. Wilson, of Edinburgh, fishing with worm between Greenhop and Cranshaw had 12lb. Same day Mr. Miller, W. S., Edinburgh, fishing the St. Agnes waters had 8lb. On Wednesday forenoon, Mr. R. P. Wilson, had 5lb. in two hours all got between the blacksmith's and the bridge close to the cottage. The same day Mr. Miller had 4lb. Friday Mr. Wilson had 13lb.; Mr. Miller, 5½lb. On the 4th, very little was done. Monday, Mr. Jardine, of Manchester, had 11lb., all killed with fly, principally Greenwell's Glory, Olive Dun, and Red Spinner; he fished the Dye part of the day. Mr. Percy Chark, of Wigan, had 7½lb., also got with fly, the Black Hackle; he got fourteen trout at night below the bridge, every one over a ¼lb. On the 7th Mr. P. Clark, Wigan, 4½lb.; Mr. Jardine, 7½lb. On the 8th, thunder, wind very changeable, Mr. Jardine, 5lb,; Mr. Clark, 4lb. On the 9th, Mr. Fritz Volck, seventeen good trout all killed with fly; Mr. Clark, 6lb.; Mr. Jardine, 7lb. all with fly. On the 10th, Mr. Jardine, twenty-seven good trout all killed in the dye water, many over ½lb., Dr. Charles Martin a good basket with worm; Mr. Clark had 6½lb. all with fly, principally Little Black Gnat and Greenwell's Glory. The river is greatly in need of a good flood. —R. J. FENTON.

Ythan (Tidal, Newburgh, Aberdeenshire).—The prospects of a good season on the tidal waters is being fully realised, and splendid baskets were made last week by, among others from the Udny Arms Hotel, Mr. Colin Hunter, Tillery; Mr. Snowie, Mr. and Mrs. Briggs, St. Andrews, &c. Fish are quite plentiful and of a large size, and the season gives every prospect of being a success.—G. N.

Irish Reports.

Ballinderry (East Tyrone).—Angling during this week has been decidedly dull from many causes, the chief of which wero the bright, scorching weather, low water, and last but not least, the recent 12th July anniversary. Before Monday a few brace of trout were killed, but the 13th, being the day chosen by the Orangemen to celebrate the victory of the Boyne, the majority of our anglers were too much engaged in political speech-making, marshalling their lodges, &c., to attend to the gentle art. However, should the weather prove propitious, sport will be renewed with greater zest next week. In lieu of better game, I record a basket of twenty-four perch caught a few evenings ago by Mr. R. Greer, in Roan Lake. The bag weighed 38lb. Coarse fishing all over the East Tyrone lakes is good, and many splendid bags are chronicled.—EAST TYRONE.

Erne and Lough Melvin.—Sport with the salmon on the Erne during the past week was very uncertain. The following are the particulars: Mr. C. M. Somerville killed eight salmon and grilse, ranging in weight from 7lb. to 13lb.; Mr. J. M. Somerville had eight, from 6lb. to 16½lb.; Mr. J. Hone had six, from 7½lb. to 22lb.; Mr. Jarvis, six, weighing from 7lb. to 14lb.; Capt. Barry on Wednesday had one salmon, 11lb.; Col. Wallace had eight salmon and grilse, from 8lb. to 15lb.; Mr. Jameson had four, from 6½lb. to 17lb.; Mr. S. Cooper had five, from 7lb. to 16½lb. Most of the fish were taken on Monday, Thursday and Saturday. Capital trout fishing is being had on the river at night, and amongst the fish taken last week was one of 6¼lb., one of 5½lb., and several up to 4lb. Trout fishing on Melvin has improved a good deal during the past few days, and fair sport is now being had.—M. ROGAN & SONS.

Lough Currane, Waterville (County Kerry).—Sport has been pretty good. Captain Reynolds, Mr. H. R. O'Kearney, Mr. Gee, Rev. T. R. Barker, Mr. W. A. S. Riversdale, and a few others have had some fair baskets of white and brown trout. Mr. O'Kearney got a peal of 5lb. on the Cummeragh, and on another day a salmon 8lb., and six white trout, averaging 2lb. Mr. E. Dennehy has had an average during the week of eight white trout and six brown. On one day he had seven white trout 14lb., and a brown trout of 9¼lb. The latter was the finest specimen of a brown trout that I have seen caught here. It was in the pink of condition, and taken every way was a grand fish. I heard he gave grand play. Brown trout are rising freely at present, and white trout are getting more numerous daily. If weather gets more favourable a good season is assured.—THOS. J. DENNEHY.

[Unavoidably omitted last week.—ED.]

Lough Currane (Waterville, Co. Kerry).—Sport on the whole has been of a good description. To give full details would occupy all the space usually devoted in your columns to Irish reports. I will therefore give only an outline, and anglers can see from this what sport is like. July 7, best baskets, Mr. Hunt and friend, one salmon, 9lb.: a peal, 6lb.; six white trout, averaging 1½lb.; and a dozen brown trout, about 6lb. John Sullivan, two salmon, 8lb. and 10lb.; six white trout, 10lb.; and nine brown trout, 5lb. E. Dennehy, eleven white trout, 13lb.; and nine brown trout, 5½lb. July 8, best baskets, Mr. W. A. S. Riversdale, Mr. Hunt, and friend, nine white trout each, and half-a-dozen brown trout. John Sullivan, two peal, 6lb. and 6½lb.: and fonr white trout. Five other boats had about a dozen trout, half white. July 9, best basket (nine white trout and six brown) obtained by Captain Fowler. Other baskets varied from three to seven white trout, and from five to nine browu trout. July 10, the Rev. T. R. Barker,, Mr. Hunt, Captain Fowler, Colonel Rogers, Captain Reynolds, Mr. Adams, had baskets of eight or nine white trout, and about half-a-dozen sizeable brown trout. July 11. Colonel Rogers had seven white trout, 14lb.; including ono 5½lb., and one 4lb.; James Leary (Rev. T. R. Barker's fisherman) had a peal 6lb., and a dozen white trout, all weighing over 1lb.; Mr. Hunt, Captain Reynolds and Captain Fowler had also good baskets. Since then the best basket was seventeen white and six brown trout by Mr. Bannatyne, and another gentleman. Weather glorious, and anglers crowding in.—THOS. J. DENNEHY.

Shannon and Lough Derg (Killaloe).—Since my last report the following English gentlemen have arrived here for the fishing on Mr. W. Young's preserves, lately rented by that grand old English sportsman, Mr. S. Laing: Dr. Gorst, Liverpool, and his son-in-law, Mr. J. D. Banks, Prescot, Lancashire; and his friend Dr. J. Royston, Rodney-street, Liverpool. These gentlemen fished here this time last year in company with Dr. W. Williams and other Liverpool friends, when their captures of salmon and grilse surpassed anything recorded ou the river for many years before. July 1, Major Traherne, five grilse, 10½lb., 9lb., 8lb., 7lb., 6lb.; Col. Williams, one, 7lb.; 2nd, Major Traherne, six grilse, 9lb., 7lb., 7lb., 6lb., 5lb., 5lb.; 3rd, Dr. R. Gorst, Liverpool, immediately after his arrival, one grilse, 7lb.; and Dr. J. Royston, ditto., two grilse, 6lb., 5½lb.; Major Traherne, one, 5lb.; 4th, Mr. J. D. Banks, Prescot, Lancashire, one salmon, 12lb.; Dr. Royston, one grilse, 7½lb.; W. Ellis, one grilse, 5lb.; 6th, Mr. R. G. Twiss, one grilse, 9lb.; Col. Willans, one, 9lb., and lost a huge fish over 30lb. Major Traherne, two, 8lb., 6lb.; 7th, Dr. Royston, one grilse before lunch, 7½lb., and met lots of others, but could not get them to take in consequence of the storm; Col. Willans, one grilse, 8lb.; Mr. Banks, one grilse, 7¾lb.; Dr. Gorst, Dr. Royston, and Mr. Banks have been enjoying splendid evening trout fishing since their arrival. Each evening they made fine baskets, amongst which there were several trout weighing 1½lb., 1¼lb., 1lb., and ¾lb.; ono evening they killed forty-three delicious trout. Their baskets recall the old times at Killaloo, when past generations of English anglers used to kill in a couple of hours 10lb. or 12lb. of lovely trout. Water continues to keep in nice order for the grilse fishing. Sun heat last few days almost unbearable. In the open 101degs.; salmon and trout rather shy in consequence. Trout, especially in the evening, don't seem to mind the great heat a bit, as some really dainty baskets are being made night after night by Dr. R. Gorst (of Liverpool); Mr. W. Gorst; Mr. Banks; and Dr. Williams. Their united bags, when they return each night from the river, are something to be proud of, whether as regards the number of fish taken, or the surpassing symmetry of the latter. In fine, our Killaloe trout are at present perfection itself. Amongst several braco which Dr. Gorst took with the fly last evening, on the preserves, six were great beauties indeed, not one of them under 1¼lb. July 7, Major Traherne, ono grilse, 8lb.; Dr. J. Royston, Liverpool, one grilse, 9lb.; Col. Willans, one salmon, 10lb., one grilse, 8lb.; Mr. J. D. Banks, one grilse, 7lb.; Dr. Gorst, one, 7lb.; H. Johnson, two, 7lb. and 4lb.; 11th, Mr. W. Gorst, one very fine grilse, 10lb.; Mr. J. D. Banks, two, 7lb. and 6lb.; Major Traherne, one, 6lb.; 12th, Mr. W. Gorst, one, 5lb.; 13th, Major Traherne, one, 6lb.; 14th, Mr. W. Gorst, two, 6¾lb., and 6½lb., and some trout. Each rod mentioned above has met and lost scores of other salmon and grilse this week In fact, the bother is to know which fish to throw over, they are rising in such numbers in all parts of the river. Better news still, the grilse are still running up from the sea. Should we get a good spate in August, sport should be excellent. The trout fishing alone is worth coming all the way from England for. Some very nice sea trout have been taken here already. The brown trout are as thick as the gravel in the river.—S. J. HURLEY.

LONDON ANGLERS AT PULBOROUGH.

THE fishing match organized by the Central Association of London Anglers, on behalf of their Fish Preservation Fund, was held on July 12, on the river Arun, at Pulborough, Sussex. The competitors, numbering two hundred, journeyed to the water by the quarter to seven a.m. special Pulborough and Amberley train, which also conveyed about five hundred other anglers, members of the various London clubs—a large number of whom went on to Amberley and fished the river there. The "special" arrives at Pulborough, after a pleasant run through a charming country, shortly before nine o'clock, and the stamping of the competition tickets was immediately commenced at the Swan Hotel. As each competitor received his ticket, he proceeded to the Swan Bridge where, about half-past nine, Mr. C. A. Medcalfe (President of the Central Association), gave the signal to "90." There was an amusing stampede immediately for the favourite "swims" and "shops," and in a very short time the two hundred rods were at work. The day was a beautiful one, better suited a great deal for the general public who had taken advantage of the excursion than the disciplos of Izaak Walton. The match, it should be mentioned, took place in the Central Fishery, a fine stretch of water, situated between the Swan Bridge and Gratton Bridge—a distance of seven miles. From a piscatorial point of view the river was too low, and contained too much weed, and there was also the glare of the sun on the water during the best part of the day. Still, taking everything into consideration, the competition was a great success, and reflects much credit on Mr. W. J. Wade, the energetic and courteous secretary of the Central Association.

In the course of the day Mr. T. Crumplen, Mr. S. C. Harding, Mr. J. Kelly, Mr. Medcalfe, Mr. W. Parkin, Mr. F. Culley, Mr. C. Watling, Mr. J. A. Fitch, and Mr. Wade paid a visit to the anglers, and upon the termination of the proceedings, Mr. J. Slaughter, the well-known angling photographer, took a number of excellent groups.

In order to weigh in, the competitors—who were permitted to use one rod only—had to be at the Corn Exchange adjoining the Swan at half-past four p.m., and several anglers with fish had an exciting rush for it. In fact, one or two of them arrived just as the doors were being closed. Mr. J. A. Fitch fulfilled the duties of clerk-o'-the-scales, and as each competitor's catch was weighed it was placed on a dish. In all, fifty-five anglers weighed in, and much interest was manifested in the show of fish, comprising bream, roach, perch, dace, and gudgeon. A nice perch of half-a-pound was exhibited by one angler. Mr. W. Stretch (of the Islington Brothers) was warmly congratulated on having captured a pretty specimen roach of about 1½lb. Some nice bream was landed; they were in lovely condition—their beautiful golden sides showing up to perfection. Fifty-five dishes of fish was, as may be imagined, a very pretty spectacle. Gudgeon was much in evidence and one angler took a prize with a catch numbering one dozen.

One incident of the competition should not be allowed to go unchronicled. It appears that when Mr. Palmer, member of the Angler and Hopo Club, Old Kent-road, left his swim, in order to weigh in, his son, a lad of about fourteen, went into it, and in a very short time caught a brace of fine golden bream, going—so it was said—over 3lb. each! Master Palmer, though so young, is not altogether a novice; he generally accompanying his father on his piscatorial excursions, and in this way he has obtained considerable experience with the rod and line. Had Mr. Palmer havo had the good fortune to have landed the bream instead of his son they would havo won him one of tho first four prizes.

Appended is a list of some of the principal prize-winners: 1, J. W. Beggs, Funny Folks, 9lb. 13oz.; 2, T. Simpkins, Anchor and Hope, 7lb. 9oz.; 3, W. Stretch, Islington Brothers, 6lb. 13oz.; 4, Farmer, Blackfriars, 4lb. 15½oz.; 5, Scott, Alma, 2lb. 7¼oz.; 6, W. Parkin, Great Northern, 1lb. 12oz.; 7, H. Watling, Great Northern, 1lb. 6oz.; 8, C. Burnett, Reform, 1lb. 5¼oz.; 9, Shorey, Crown Perseverance, 1lb. 3¼oz.; 10, Pettit, Silver Trout, 1lb. ¼oz.; 11, Poole, Blackfriars, 1lb.; 12, H. Wright, Second Surrey, 15½oz.; 13, Creacy, Great Northern Brothers, 13¾oz.; 14, Windsor, Alma, 12¾oz.; 15, Marriott, Alma, 12oz.; 16, Fairburn, Alma, 11¾oz.; 17, G. Mumford, Battersea Friendly, 11½oz.; 18, G. Watling, Funny Folks, 11oz.

Eighteen other prizes were also awarded, the takes ranging from ½lb. to ¼lb. For the last prize, Messrs. George (G.P.O. Angling Society), H. Stretch (North London), and H. Tame (Brothers Well Met) tied. Altogether thirty-six prizes were won. The prizes, estimated at the value of £30, included sums of money, a silver watch, a water-colour drawing, fishing boxes, fly-rods, sportsmen's knives, landing-net, a hook book, winch, a gold pin, a folding chair, &c.

In connection with the competition, a number of London anglers went down to Pulborough on Saturday, and in the evening a grand smoking concert was held in the Corn Exchange, over which Mr. Harding presided. During an interval, Mr. Crumplen, of the Piscatorial Society, made a few remarks about Pulborough as an angling resort. The audience included many of the villagers, also some Brighton anglers, and a very pleasant evening was spent. Mr. W. Miles ably accompanied, and the artistes included Mr. J. Slaughter, Mr. Frank Cowley, Mr. Claud Garrantes, &c. The concert was got up by Mr. E. L. Nutt, of the Swan, who has won golden opinions from the anglers, to whose requirements he has ever given his personal and obliging attention.

LONDON ANGLERS AND THE NORFOLK BROADS.

UNDER the auspices of Ye Pluckie Perche Piscatorial Society, a meeting of anglers was held on Monday night at the headquarters of that club, the Earl of Derby, King Edward-road, South Hackney, for the purpose of hearing an address from Mr. Woodrow, C.C., with respect to the attempts now being made to close the Norfolk Broads to tho public. There was not a large attendance, although invitations had been issued to all the clubs in North and North-East London.

Mr. W. Parker (of the Gresham Angling Society) took the chair.

Mr. Woodrow, C.C., who is the hon. sec. of the Norfolk Broads Protection Society, then addressed those present, and said there could be no doubt that every angler had at heart the question of keeping sacred to the public every bit of water in which swam a fish, and he could tell them that the north-east corner of Norfolk possessed a very large quantity of such waters. He might say that it was a part of England in which there were more waters and more fish than any other part of our island. The general question of keeping up the open spaces of this country was of such great importance to the health of the people, that, as they were aware, the Corporation of London had several times gone to the rescue, evidences of which were to bo found in Coulsden Common, Burnham Beeches, and Epping Forest, and although he (Mr. Woodrow) could not pledge himself that the Corporation would do anything in this matter, yet he had reason to believe that some of the City companies were going to come forward, and he had reason to suppose that support would also be eventually rendered by the Corporation. Mr. Woodrow then proceeded to deal with the legal aspect of the question at some length, and pointed out that the claim in the present instance was based on the Allotment Acts, passed in 1801. The people of Hickling took it into their heads to get the members of Parliament to introduce a Bill into Parliament, whereby the waste lands could be allotted to the people in the neighbourhood who would undertake to cultivate them. That meant that the waste lands which belonged to the people were by that Bill to be distributed amongst the landowners and taken away from the people for ever. The people who were instrumental in getting the Bill passed got themselves appointed commissioners, and they very naturally gave the land to themselves, and their successors held it at the present time. But they would not grumble at that; the law of the land said it was theirs. But as the Act of Parliament of 1801 had a saving clause in it to the effect that such tidal waters as Potter Heigham Sounds and Hickling Broad should be maintained as the property of the king and the people, he contended that the public had been disgracefully robbed of their rights. He held that the award was bad at law, and they wero going to substantiate what they said in a court of law. He believed that the prosent action of the riparian owners had been to some extent brought about by the reprehensible conduct of the cockney visitors to the broads, and he appealed to the anglers to offor as little annoyance as possible to those gentlemen. In conclusion, Mr. Woodrow said ho was pleased to say that subscriptions to the amount of between £300 and £400 had been subscribed towards the defence fund, and he hoped the London anglers would do their best to support the Norfolk Broads Protection Society. (Applause.)

The following resolution was proposed by Mr. G. E. Simms: "That this meeting of London anglers hears with regret the attempts which are being made by certain riparian owners to close the Norfolk Broads to the public, and seeing that, if these attempts are successful, they will lead to further encroachments, which will end in these tracts of water becoming private property, hereby pledges itself to cordially support the Norfolk Broads Protection Society."

Mr. Richardson, hon. sec. of Ye Pluckie Perche Piscatorial Society, seconded the resolution, which was unanimously adopted.

On the proposition of Mr. Woodrow, a vote of thanks to the chairman terminated the proceedings.

PULBOROUGH AND AMBERLEY FISHING EXCURSIONS.—Judging from the number of tickets applied for this week, at Mr. Eldridge's (late Clouts), the Rose and Crown, Goswell-road, there is likely to be a heavy train of anglers, and their friends to Pulborough and Amberley, Sussex, on the 19th inst., from London Bridge.

THE NORFOLK BROADS QUESTION.

Influential Meeting at Norwich.

An influential and thoroughly representative meeting was held at the Royal Hotel, Norwich, on Saturday evening to discuss "The best steps to be taken to defend the public right to sail and fish on the Norfolk Broads, which from time immemorial have been recognised as free to the Crown and its loyal subjects." There was a large attendance, Mr. J. Glasse (London) being voted to the chair, and among those present were—Messrs. H. C. Richards (London), W. Rye, O. Smith, Gurney (secretary of the Associated London Angling Societies), Geo. Cooble (Lea Conservancy), R. Harvey, B. C. Silcock, C. J. Greene, T. Stevenson, R. Moll, F. J. and J. H. Laecy, Spencer Rix, W. Ryley, C. Fasola, J. Allen, &c. Regret was expressed at the absence of Mr. A. J. Baher (London), who was prevented from attending by a bad attack of neuralgia, but who forwarded a donation of ten guineas to the Defence Fund. The chairman said their association was not one that desired to confiscate any man's rights, and where they found rights existing they agreed that they should be protected. As to the alleged private right which had been set up, they were not satisfied that it had existed. Many of the happiest days of his life for the past thirty years had been spent in angling and boating on the Norfolk Broads, and he held that these enjoyments which he inherited that day, which were the birthright of every Englishman, they should take care to see were very strictly preserved for future generations.

Mr. H. C. Richards, who had come down from London, notwithstanding a broken arm, moved:—"That in the opinion of this meeting it is desirable to use every reasonable means to defend the threatened rights of the public to sail, shoot, and fish on the tidal and navigable waters known as the Norfolk Broads." He hoped the landowners concerned would remember that if they had their rights the public had rights as well. In these days it was of the utmost importance that so-called rights, and especially property rights, should not be strained too far. Practically every man had a vote, and what Parliament had done in the past it could unmake in the future. There was nothing more necessary to preserve to the public than open spaces, whether of land or water. The present tendency to crowd into great cities, and the increasing depopulation of our rural districts, if our population was to be preserved in life and health they must have open spaces near their cities especially for purposes of recreation. Consequently our rivers and navigable waters should be free to all. This question had been fought out in London, and the Thames was becoming more and more the playground of the Metropolis. There were attempts on the part of the riparian owners to deprive the public of the rights to which they were unquestionably entitled on the tidal waters of the Thames. Thanks to a Bill which had been passed this Parliament, by the aid of Sir Charles Dilke and Colonel Makins there had been no question between the public and the riparian owners during the past three or four years. He hoped those interested in the question, whether as fishermen, sportsmen, or yachtsmen would induce the corporations and public authorities in Norfolk to assist, if necessary, in promoting a Bill to establish the rights of the public on the Broads, and to define the rights of the owners. If there was an energetic local movement, he had no doubt that the public of London who had done so much to protect the rights of the people in regard to Epping Forest and other monopolies would help the people of Norfolk in preserving the Norfolk Broads for the use of Englishmen and mankind. He was told that until 1882 no one had ever attempted to challenge the public right to fish, shoot and yacht upon these waters. Then, he believed, some unfortunate gentleman from Birmingham, who came down on a political errand, was brought before the magistrates, who very wisely for themselves discovered that they had no jurisdiction. It was somewhat behind the spirit of the last decade of the nineteecth century that gentlemen who had acquired the land round these Broads should put chains across the water to prevent persons coming along in a boat, and that the latter should be prosecuted because they enjoyed God's fresh breezes and the air of heaven. These riparian owners claimed that not only were they entitled to the land which they had bought or inherited, but that they had a right to prevent anyone going on the water in front of their land. It might just as well be suggested that Mr. Colman, the member for the city, because he had a beautiful place at Corton, where he took care of disabled statesmen, had a right over that part of the sea in front of his gardens. There was an old Latin maxim that one should only use his property so as not to damage somebody else's. It might be said that somebody else in the form of the public had no actual property to use, but the public had a right to exist, and even to enjoy itself. Those gentlemen who were endeavouring to deprive the public of the rights they had hitherto enjoyed were the blindest of the blind, and the most foolish of those running their heads against brick walls. He was informed that this winter the owner of Hickling Broad brought an action against a poor fisherman named Vincent to prevent him fishing, shooting, or navigating. Poor people were often attacked because it was thought no one was behind them, and if a conviction was obtained that was a precedent which would prevent rich people stepping in afterwards. The Norfolk Broads had long been the holiday grounds for the wearied workers of the great city, and the Norfolk Broads Protection Society were most anxious that nothing should be done to deprive Englishmen and Londoners of their rights. Among those who were supporting the society were old members of the Oxford and Cambridge boating clubs, prominent members of London athletic societies, stock-brokers, &c. He condemned the spirit of malignant wealth in those who, having made money, bought a place in the country, forgot by whose brains and sinews they had made it, and wished to prevent anyone coming near them. What enjoyment there could be in solitary confiement he never could ascertain.

Mr. George Cooble, of the Lea Conservancy Board, seconded the resolution.

Mr. Councillor Harvey was glad the question had been taken up so heartily. The Yarmouth Piscatorial Society had taken the matter up warmly, and were likely to hand over a good sum of money.

Mr. B. Silcock said that the Liberal candidate for the Division (Mr. R. Price), who took great interest in this matter, had subscribed ten guineas to the fund, and had stated that if necessary he was willing to double it. (Cheers.) Mr. Silcock was asked how many men he had prosecuted for shooting on his marshes, and replied that he had never prosecuted anyone. (Hear, hear.) The resolution was then put, and unanimously adopted.

Mr. R. Moll next moved, That all interested in the rights of the public on the Norfolk Broads are by this meeting invited to co-operate with the Norfolk Broads Protection Society in obtaining help and evidence on the subject." He regarded those who wanted to take away rights which the public had enjoyed from time immemorial as land "holders," not as land "holders," "owners," for they did not make the land: and he contended that because a man held a piece of land against an arm of the sea or alongside a broad part of a river, he had not a claim to the soil beneath the water, which he understood was vested in the Crown.

Dr. Allen seconded the motion, which was unanimously agreed to.

Thanks were accorded the chairman and the speakers, on the proposition of Mr. J. T. Woodrow, of London.

The Chairman, in reply, said that it must be understood they were in earnest about this matter. They had put their backs against the wall, and they meant to carry it through. There was no half-heartedness in this business. Donations and subscriptions to the amount of £300 had been obtained. But that was nothing to what ought to be and would be done; for £3,000, or even £30,000 if necessary, would be raised to fight this question before they would allow their inherited rights to be torn up like a piece of paper.

Islip Angling Society.—Anglers will be interested to hear that an extensive length of stream, offering the greatest attraction, both as regards the cultivation of fish and as to scenery, has been taken in hand by this society, with a view to developing its utmost resources. We allude to the Cherwell in its course from Islip to Cutslow Farm, together with all the water belonging to Islip Mill, an extent of about seven miles. The society is managed by a committee of nine members, of whom the Rev. T. W. Fowler (Islip) is president. William Beckloy, who has long rented the water, is now engaged as the society's fisherman. To him will be entrusted the letting of a punt to ticket-holders, the sale of baits, tackle, &c., to the same, and the care of the water generally. This fishing will be most strictly preserved, the society undertaking at its own expense the immediate prosecution of any persons infringing its rights. The society allows the use of the rod and line only, except as regards the taking of eels, for which the fisherman is instructed to use wheels, and sell the fish for the benefit of the association. It is also an important object of the society to preserve intact the very beautiful scenery through which the stream runs, and of which it is so important a feature. For this reason it earnestly appeals to all ticket-holders to make it their business to preserve the lilies, water-fowl, and kingfishers, which in this sequestered region still hold their own against the ravages of holiday-makers and others. It also urges upon anglers who may take advantage of its protection to avoid all hostile collision with farmers whose land borders the stream, and it proposes to present to these latter season transferable tickets, in return for which act of courtesy it hopes that they will not interfere with or annoy those who are bent on pursuing the "gentle craft." Neither the fisherman nor the water bailiff will be allowed to sell tickets, but week and day tickets are to be obtained at the headquarters of the Oxford Angling Society, at Marston Ferry, at the Post Office, Summertown, and at the society's headquarters, the Red Lion, Islip. Transferable and ordinary season tickets can only be obtained of the treasurer, Mr. W. H. Chapman, Islip.

NEW PATENTS.

The following is a weekly list of New Piscatorial Patents, specially compiled for the *F. G.* by Messrs. Hughes, Eli, and Hughes, Patent Agents and Engineers, 76, Chancery-lane, London, W.C., authorised Attorneys for the procuration of English and Foreign Patents, Designs, and Trade Marks:—

11,055.—J. T. Studley, of 72, Ebury-street, London, for "The 'Perfect' salmon fly Hook."

11,270.—J. E. Harris, of 3, Graham-road, Dalston, London, for "Improvements in apparatus for fishing."

Angling in South Canterbury, New Zealand.—Our Temuka correspondent writes: "The past season has been in some respects a phenomenal one. The rivers during the early part of the year were remarkably low, although full of feed. Good fishing days were few and far between, but upon some of these few occasions splendid records were made. The superiority of the Rangitata as a fishing river has been thoroughly demonstrated, and it is now the most popular stream in South Canterbury for those anglers who go in for heavy takes. The river from source to mouth is full of fish. In its upper waters fish take freely almost any bait, the river itself not being very productive of natural feed. As a result the fish are not in tip-top condition, and have with some exceptions a long lank appearance. Near the mouth they do not take artificial baits quite so readily as higher up, but any fish caught are bound to be in good condition. The fish apparently follow their feed when the tide is flowing, and this has proved to be the best period for fishing. The most taking baits have been the Devon and Whitebait Phantom. Natural baits have not been much used. The mouth of the river has altered somewhat since the late gales, but the fishing has not been greatly interfered with. There is a fairly convenient camping-ground, and the use of a boat can now be obtained if required. The following are authentic records made during the season in several streams, and I venture to say they have never been beaten: September 26, 1890, one rod, two hours' fishing, six fish, weighing 42lb.; four hours' fishing, one rod, thirteen fish, 78lb. October 9, one hour and three-quarters, one rod, eleven fish, 87½lb.; November 8 (Opihi), one rod, twelve fish, 34lb.; November 10 (Opihi), one rod, eleven fish, 46lb. November 14 (Opihi), five fish, 30½lb. On the 15th, 16th, and 17th, three rods, seven hours' fishing thirty fish, 269½lb. On the 26th, one rod, four hours, nine fish, 78½lb. December 8, three rods, six hours, sixteen fish, 178½lb. January 19th, 1891, one rod, five fish, 52lb.; 28th, one rod, nine fish, 54½lb. February 10, one rod, five fish, 37lb.; 19th, one rod, nine fish, 51lb.; 26th, seven fish, 52lb. March 7, one rod, six hours, fourteen fish, 96½lb.; 10th, six fish, 55½lb. The largest fish of the above weighed 19lb. Mr. W. Mendelson, in the Temuka and Opihi, has taken principally with the fly four hundred and thirteen fish, scaling 341¼lb., and has thrown back as under regulation size about one hundred and fifty. In the previous season his record was four hundred and thirty-six fish, weighing 514lb. 15oz. The larger takes recorded above were made by parties conducted by Mr. N. C. Nicholas, of Temuka, who may be looked upon as the anglers' complete guide.—*New Zealand Paper.*

A Large Solway Sea Trout.—There has just been captured in the stake nets of the Solway, "The Loch Fishery," Annan, a splendid specimen of the sea trout which weighed fully 12lb. This is one of the largest sea trout caught in the Solway nets for some years past.—Heatherbell.

Carlisle Otter-hounds.—These hounds met at Clift Bridge on Tuesday last, at seven a.m., to hunt the river Lyne. A numerous company assembled at that early hour, and punctual to the appointed time, Tom Parker, the jolly little huntsman, turned up, accompanied by ten couples of hounds and four terriers, all in splendid fettle. Among numerous keen hunters may be mentioned Mr. J. Ridley and party, Newcastle-on-Tyne; Mr. Stordy, Longtown; Messrs. J. and R. Nixon, Brampton; Messrs. J. Little, William Amos, Harry Tellar, Joe Hine, and J. Pender, Carlisle. Hunting up the river, Milltown, Muckle-Lynn, Breconhill Tower and Fairy Table were all left behind, and never a whimper. Passing Shank Castle and the Rack Bridge, and on to Beattie's Pool, a rare burst of music proceeded from the pack. The hunt now began in earnest up the Black Lyne, towards Stagburn beck, where the otter was marked by Tester among the rocks, and bolted by the terrier, Val. Leaving the water, the game steered for the Trough Woods, when some capital fun ensued for over half-an-hour, the hounds being in full cry all the time. Finally, the game was run into by Stormer and the terrier, Pinch, and assisted by the rest of the pack a brilliant kill was effected—a bitch otter, 15lb. So far, this is the best season Mr. Caneck's hounds have had for many years. Next week I hope to give some additional particulars anent this famous pack.—G.

THE

CARBOLIC SMOKE BALL

WILL POSITIVELY CURE AND PREVENT

✣ HAY FEVER ✣

And also the most Severe Forms of the following ailments:

COLD IN THE HEAD
COLD ON THE CHEST
CATARRH
ASTHMA
BRONCHITIS

HOARSENESS
LOSS OF VOICE
SORE THROAT
SNORING
THROAT DEAFNESS

NEURALGIA
HEADACHE
INFLUENZA
CROUP
WHOOPING COUGH

One **CARBOLIC SMOKE BALL** will last a family several months, making it the cheapest remedy in the world at the price—**10s.** post free.

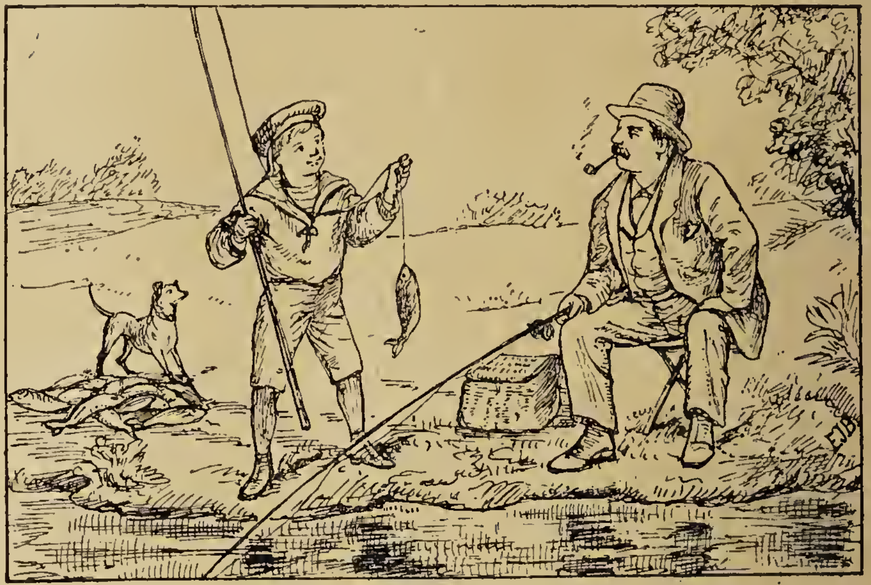
PARKER'S SELF-STRIKING FLOAT.

By Her Majesty's Royal Letters Patent.

A BOON TO ANGLERS.

Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.



"How is it, Tommy, you catch plenty of fish? but, though I get lots of bites, I can't hook 'em,"
"Well, Uncle George bought me one of **Parker's Patent Self-Striking Floats,** and the fish hook themselves."

Price 2/6 Post Free.

A. PARKER, 20, WALPOLE STREET, NEW CROSS, S.E.

Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.

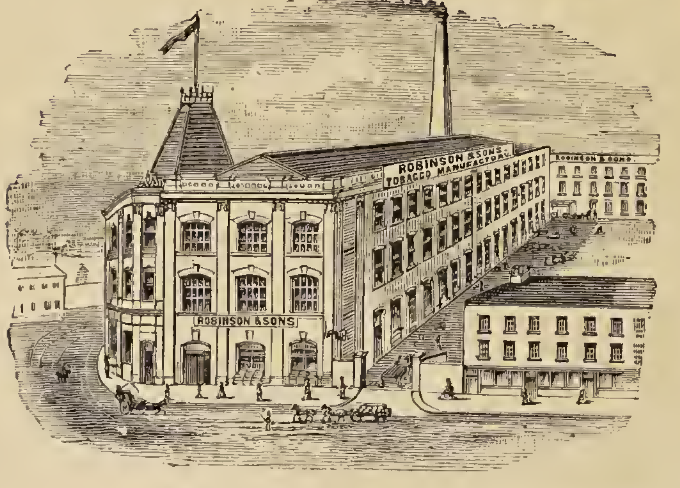
JAMES OGDEN'S MULTUM IN PARVO FLY RODS, £1 1s.

HIS CELEBRATED TROUT FLIES, &c.,

Can only be obtained in Cheltenham at the Old Shop, 28, WINCHCOMB STREET, where all practical work is done by the same experienced hands as employed for so many years past.

N.B.—NO CONNECTION WITH ANY OTHER PERSONS ASSUMING THE SAME NAME.

SMOKE "ORIEL" NAVY CUT.



THE HIGH CLASS TOBACCO,

MADE FROM PICKED LEAVES OF THE FINEST QUALITY,

Extract from the "FISHING GAZETTE" of February 21st, 1891:—

A GOOD SMOKE.

DEAR SIR,—Knowing how much you enjoy your pipe when out a-fishing, may I ask if you, or any of your friends, have ever tried "The Oriel" navy cut, manufactured by Robinson's, of Stockport? If you have not, do so at once, and I venture to say that you will be well pleased with it, being very cool and lasting, with an exquisite flavour. I have no interest in the matter whatever, but simply recommend it as my *beau ideal* of what a fisherman's tobacco should be.—Yours truly, SMOKER.

Sold at 5d. per ounce, in 1 and 2 oz. Packets, and 4oz. Tins. Any Smoker having difficulty in obtaining it from his usual Tobacconist can obtain it direct from the Manufactory

POST FREE. 2oz., 10d.; ¼lb., 1s. 8d.; ½lb., 3s. 4d.; 1lb., 6s. 8d. POST FREE.

FEUGH AND DEE.

By W. MURDOCH.

DURING the succession of wet seasons which occurred nine to twelve years ago, worm-rolling in the Bridge of Feugh pool was the great feature of the summer angling in the Banchory district. Fish were in "galore," and the slaughter by the wormers was great. Especially on Mondays and Tuesdays, when the water was in right fettle, did the fishing get hard pushed. The grand time for it was from the turn of the day onward for three weeks, or speaking more precisely, from the 20th or 22nd of June to the 10th or 12th of July. Then the flush of the year's summer fish was on—the great shoals of grilse and adult sea trout were close to land along the coast near by the mouth of the Dee, and with water in fine flow, which was usual in those years, their seasonal migration was not delayed beyond the natural time. Such being the case, the strength of the "runs" was great, and from not having been kept longer in the salt-water than they inclined, the fish, one and all, were silvery, sound, and vigorous. These were summers—proper summers for rod fishing, and no mistake; but they have passed by, and there seems little hope of experiencing their like for a long time to come. The seasons, it is said, have altered: this may or may not be so, but certainly the copious rains which were never wanting during the latter half of June in the years mentioned have not once been experienced within the present septennial period. Accordingly but little has been done since the days of which I have to speak—those days when the undelayed grilse and sea trout rejoiced in the abundance of the new-freshened water of the well-scoured stream, and were, as only such fish are, the freest of free takers.

A lovelier scene than where the worming is, or used to be carried on, it would be hard to find. The view down stream from the old bridge is magnificent, and the whole combination of rock, water, and wood, coupled with sound of the falls and the almost constant leaping of fish when on the run might well present to most, and to none more readily than the angler, lover of Nature, a picture perfect in effect and fascination. But why this attempt to soar? methinks I hear my readers ask. You are flying away from the subject. We don't want to hear about the scenery; it may be good enough; it is the fishing and how it is done that we wish to know about. Very well, then, so be it, I reply.

The fish leave the sea most readily under the most ascent-conducing conditions, which are a clean flood and a black day, with the wind pretty strong from the south-west. But while this is so, it may be as well to state that they travel fastest up the Dee, to the mouth of the Feugh, when the water is not in flood—simply a good round angling size—and the wind not south-west, but due west—almost right down the river as it mainly runs. A fairly heavy water, however, generally takes up most fish. Grilse, though probably faster, are not such strong swimmers as salmon, and though it is known that they do not so readily attempt to run—leave the sea—with the top of a heavy flood, yet it stands to reason that the proportion of them that escapes on such occasions—gets past the nets and away up to the angling reaches—is greater by a good way than when the water is smaller. But the time of all for a grand run—conditions, of course, being perfect—is during the weekly close-time, as then no sea nets are worked (?) to prevent the river being got to, nor river nets industriously plied to arrest farther up-stream progress. This, then, is why, when the water suits the Bridge of Feugh pool, worming is prosecuted with far and away the greatest success on Mondays and Tuesdays. All the weekly close-time-run fish get free up, and, if the "run" is very strong, the pool by three or four o'clock on Sunday morning is crammed with those which first left the sea on Saturday night after the netting stopped. Further, should it continue during the whole of the weekly close-time—up to six o'clock on Monday—relays of undiminished strength will continue to arrive until early on Tuesday morning. But to cause a run of great strength to be continuously prolonged during the whole of the weekly close-time, wind, weather, and water alike must all the while be exactly right.

The worming is carried on from the bank, or rather the rocks on either side of the pool. The fishing right goes with two places, Tilquhillie and Riverstone, and the sporting tenant of each has his own side. The water is very deep; and the worming place or pool proper is not over ten yards long, by less on an average than seven yards in breadth. In most places the rocks shelve or slope to the water, and have little footholds, whereon if the angler wishes to get close down he can stand. Though the water named is undoubtedly the choice portion, yet higher up, for a dozen yards or so, fish are often caught. This is by fishing at the foot of the falls and underneath the bridge. From the falls down to the end of the worming place is one continued pool, only divided by the bridge overhead. The falls, or fall—for there is really only one—can easily be got past by most of the fish when the water is a fair height, but when it is high or low to an unusual degree, their attempts to ascend, repeated again and again, almost invariably end in failure. Now it may be stated that a water too heavy for the fish managing to get over the falls is the best fishing water. With such a water it will be understood that the fish accumulate. It brings them away from the sea, and keeps them running up along with those before in the intermediate reaches, till they can get no farther. In the Bridge of Feugh pool, then, they must stay until the heavy, or moderately heavy, push of water has gone past, until, indeed, the best coloured, freshest water—in which only they take readily—has given place to that black inky water, the draining of the peat, the last swillings from the black hags, in which scarcely a one will take. With this last-mentioned state of water—which usually brings the best height for letting them clear the falls—they leave the pool to pursue their journey up stream.

At the time I speak of, old Dod Craven, his boy Andrew, Wright, and Minnonie were the great worm rollers. They pushed the fishing hard, and their preliminaries to its commencement were: Counting on a spate they had beforehand, on soft dewy evenings after dusk collected great boxfuls of large lob, or dew worms. This done, they were ready with something tempting when the fish came. Possibly on Saturday a heavy fall of rain raised both Feugh and Dee. This they knew would bring the fish away from the sea, and up the Dee, and on to the Feugh. "Now," said they, "if only it will rain again heavily on Sunday, we shall have grand sport on Monday." Sunday morning I shall assume was fair—a bright fresh morning. All the fishers were early on the bridge to look for the Saturday night's fish—those which left the sea after the nets were off for the week. Six o'clock only it is yet, but already there the fish are, it is certain, in any number. Lots are to be seen trying the falls, but without success, for the water is too high; some to spring in the worming place, and the wormers' teeth water; and others again on the run to leap in the gullet, as the congested outlet of the pool is called. It is a grand sight. More grand, however, giving unbounded satisfaction, is the sight of the evening. A thundering flood comes down; locally it but dropped, but away up the glens, and on the mountains—in Glendye, Glen Aven, and the Forest of Birse, and on Kerloch, Peterhill, Clochnaben, and the other "Bens" there must have been a frightful downpour. Now it is all right for the morrow, and accordingly very early in the evening the several wormers leave the Bridge for their several homes, each with a resolution, uncommunicated to any other, not to be caught napping, but to be first on the water—and that, too, before the day shall "daw," which means in June on the back of the "wee short hour ayont the twal."

All day long on Sunday the bridge is crowded with sight-seers. They come and go—perfect droves; advisedly I say droves, for is not Sunday the Bridge of Feugh fair-day? "All sorts and conditions of men," boys and urchins—gay dames and gayer damsels, may be seen wending their way to the bridge, "the muster place," where, airing off, engaged in conversation, or gazing over the parapet to see the fish leaping to get over the falls, now with the much water a grand sight, and causing the spray fly far up, and the roar to be almost deafening, the time is spent most enjoyably; and where not until far into the summer's night does the mixed throng become reduced to a few—the few who linger on to enjoy the cool and calm of night.

Having now pictured—made clear I hope—all the concomitant circumstances, and also assumed as existent all the conditions inseparable from the very best of sport, I have at last brought my readers forward to the time when the fishers face each other to commence the worm-rolling, which in my next I shall, without preliminary, be in a position to describe. The day I mean to speak about is a "Monday of glorious sport," if sport it can be called. My own opinion I do not give, but leave anglers to judge for themselves according to their taste. As to the description, I may state that although outside the practical part, it will mainly be fancy the results will be actual—known to have been obtained. On that occasion the conditions were such as have been assumed—in every way the choicest. There had been two floods in quick succession; the water was perfect, and fish were plentiful almost beyond precedent. Both floods occurred during the weekly close-time—the best time of all as the nets were "off" in sea and river. The first swept away all filth, and the second—most ascent-encouraging and best of all for fishing—came on before its predecessor had run out enough to enable any of the fish to pass the falls.

(*To be continued.*)

BARBEL AND BREAM FISHING.

By Alfred Jardine.

(Continued from page 37.)

I have heard many noted anglers, who for years fished both of the Metropolitan rivers, assert that the Lea held bigger barbel, and, in proportion to its volume of water, a larger quantity than the Thames. This possibly was the case thirty or forty years ago, for then (to my own knowledge) these fish were plentiful, as near London as the White Hart fishery, Lea Bridge Marshes; and even lower down the river, at Limehouse; where they were caught, not by fair angling, but netted, and "speared" in great numbers in May, when congregated together for spawning.

In the days of the late Mr. Beresford's grandfather, who owned the fishery, some remarkable specimens of fish were captured, and were to be seen preserved in the parlour of the old White Hart Inn—among them, a large salmon, a 14lb. barbel, and a monster carp, besides some remarkably fine trout, and several large bream.

Now, thanks to the Tottenham sewage, every fish below the debouchment of that fetid affluent, has been poisoned; and not even gudgeon or "tommy-tittlers" survive, to provide sport for embryo anglers.

Barbel of large size inhabit the rapid streams of the Lea weir-pools, especially King's Weir and Carthagena Weir; but as a rule they are not much fished for by anglers who frequent that river, and are more plentiful in the old stream than in the navigation water, which is too sluggish for those fish to make their abode in. Their congeners—bream—which grow to great dimensions and weights, are generally found in the deeps, but at certain times of the year in the eddies of the weirs.

It was at Carthagena Weir that the late Mr. Charles Bradlaugh, when fishing the Lea, caught three bream, weighing together 21lb., and a larger one of 8lb. These fine specimens were exhibited at the great International Fisheries, 1883, together with two trout of 11½lb. each, and a carp weighing 14¾lb., all captured in that portion of the Lea, at Broxbourne.

On the same river, at Ponder's End, very large bream are occasionally taken. Mr. J. Sandle, of Edmonton, secured two of nearly 7lb. each; while, during an hour's fishing one evening in August, 1889, the writer of this article caught, at the same place, six bream, weighing together 27½lb. A quarter mile, or thereabouts, lower down stream near Mardyke, Mr. J. W. Gant had a catch of 56lb. weight of barbel.

I could multiply instances of large takes almost indefinitely, but think those given are sufficient to prove that the Lea is a fine fishable river, of which much information respecting the choicest parts to fish can be obtained from a book written by Mr. J. P. Wheeldon, entitled "Angling Resorts near London."

Nearly half a century ago I knew an angler named Hitchcock, whose delight was to fish at Putney. He moored his punt out of the way of the tow-path traffic, near the centre of the old wooden bridge (which has been removed), and caught barbel up to 12lb., with an occasional fourteen-pounder. In those remote days, before the epoch of steam-tugs, launches, and flotillas of pleasure boats which now harass the river, fish of the weights mentioned were not uncommon captures; and barbel as big—grey with age—have been sometimes seen in recent years, disporting about the wooden piles of the old bridge, before that venerable structure was demolished.

But it is of little use to *write about* barbel, barbel-tackle and how to use it. My desire is to be practical: therefore, I will enumerate some of the best barbel pitches on the Thames, many of which I have fished successfully, and as we approach the bream waters shall mention favourite swims where those fish may be caught.

Barbel are plentiful at Pangbourne, and Mr. William Hull, of the Elephant Hotel, will put anglers at their ease as to the best swims and holes to fish. Much of the river at Mapledurham is excellent, also at Caversham, and the water thence to the mouth of the Kennet, which also holds large fish. I have a record of a 14lb. barbel caught in that river by Mr. H. M. Lewis, of Newbury. There are several good "pitches" at Sonning; one especially—seldom tried—viz., the heavy stream just before reaching the horse-bridge, at Shiplake Deeps.

The waters of the Mill-tail, at Shiplake, also Marsh Lock, the Harleyford side of Hurley Weir, Temple Pool, and Marlow Weir, are all capital places. At Cookham is much fine water, Lord Boston's especially; but permission must be obtained for that part of the Thames. Passing below the beautiful woods of Cleveden, Boulter's Weir is reached, where, and at Bray, Monkey Island, and Queen's Ait, are plenty of barbel, and large ones, too; these three miles of river are very fishable.

After passing Windsor—three and a-half miles down stream, and a little beyond Albert Bridge—is a weir, at the commencement of a large bend in the river, known as the Fleet, which is a part of the old Thames, not used for traffic; a straight canal, or cut, having many years ago been constructed to improve the navigation. This portion of the old river is a mile and a-half long, and so undisturbed, that some of the best fishing, within easy distance of London, can be enjoyed, by "shooting" the weir—*i.e.*, floating a punt *endways* over the fall, which is inconsiderable; yet I should advise that a clever attendant be engaged—such professionals as Lumsden, or Gray, of Windsor, are first-class trustworthy men.

At Bell Weir, thence along Staines Reach, and at the bend of the river, by Half-way House (where once was a weir); in the deep streams and holes at Peuton Hook, barbel are plentiful, fine catches being of frequent occurrence, 50lb. and 60lb. weight to one rod not being unusual; the most assiduous and painstaking "professionals" to engage for this part of the river are either John Keen, jun., or Charles Hone, both of Staines.

Bream.

Here bream begin to be met with, these fish having worked-up from the waters lower down stream. It is within a few years, comparatively, that they were but seldom caught higher up the river than Chertsey, where—also at Weybridge—bream and barbel are abundant, and, like those of Walton-on-Thames, "very fine and large."

At Holliday's Hole, Weybridge, one early August morning, between daybreak and seven o'clock, I caught 95lb. weight of bream and barbel, several going 4lb. and 5lb. each, the *four* largest barbel turning the scale at 24lb. I had to be back in London by nine o'clock, but returned to the same "swim" late that afternoon, and added 35lb. weight to my day's catch. From what I am told by friends residing at Weybridge, both barbel and bream are plentiful in the river thereabouts, especially up the backwaters, which are not much disturbed by steam-launches and pleasure boats.

There are two varieties of bream indigenous to England—the golden or carp bream (*Abramis brama*), mostly found in the Thames, Lea, Wey, and Mole; also in the Trent, Ouse, and other Midland rivers; and the white bream, sometimes called the bream flat (*Abramis blicca*), plentiful in the Medway, Arun, Sussex Ouse, &c.; also in the Norfolk Broads, and many lakes and ponds. Of the two varieties, golden bream grow to the largest size, are by far the handsomest fish; and a Walton bream in September, nicely roasted or broiled, is nearly as good eating as a grey mullet. Dame Juliana Berners, in the "Boke of St. Albans," says "the breme is a noble fysshe and a deynteous." Chaucer commends it thus—as fare fit for a friend:—

> "Full many a partrich had he on mewe,
> And many a *breme*, and many luce in stewe."

While Izaak Walton says: "He that hath bream in his pond hath always a welcome for his guest."

As fish affording sport, bream may be fairly well spoken of. They make determined plunges when first hooked, their deep sides enabling them to offer great resistance in the water. They cannot be considered plucky fighting fish, like barbel, yet, when a young angler hooks a four-pounder on fine tackle, his nerve and skill will be well tested before he lands the fish.

There are various methods of angling for bream, and either legering, or fishing with Nottingham tackle, as previously described for barbel, answers well, according to the depth and condition of the water fished. Ordinary roach tackle (strong though fine) also serves for bream, but, as they have smaller mouths than many other fish, the hook should not be very large: a No. 5 short shank round bend is a good size for worms; and No. 7 for gentles, paste, or wasp-grub. The latter is an excellent bait. At times bream will take scalded greaves, the whitest bits being used for the hook, and the coarser and darkest mixed with clay into balls for ground bait, and cast into the water, rather above the commencement of the swim, or eddy. In the mill tails of flour mills (I have in my "mind's eye" one or two splendid pools on the Lea), where there are bream "galore," meal worms are also good baits. The worm is much like a fat centipede, and is the larvæ of a beetle that infests flour sacks, when they remain together in heaps. Mr. R. B. Marston recommends a "sandwich" made of two wasp-grubs and a meal-worm between them, with the hook placed simply through the middle of it—*i.e.*, laterally, not longitudinally; thus, "compounded," it proves so alluring, that few bream, at any rate, can resist it, and it is an equally good bait for winter "chubbing," of which "art"—for it is an enticing art to those anglers who can stand the cold of a winter's day—I shall have something to say anon.

I had almost forgotten that small lamperns, or large ones cut into short lengths of an inch or a little more, are deadly baits for barbel. Some very large "catches" have been made at Teddington on Thames, with lamperns.

The Trent is a barbel river *par excellence*, where fine specimens are caught; and in Yorkshire, the Wharfe, Yore, Ouse, and Derwent, all contain these fish.

Below the weir at Arthington Bridge, on the Wharfe, I have seen immense shoals of barbel, among them very large ones. As next month and September are the very best for sport, I advise my Leeds angling friends to purchase a barbel-rod and the necessary tackle. They can see mine by applying to Max Walbran. Scour a few thousand lob-worms in moss, and then go off to Arthington, Harewood, Witherby, Tadcaster, or Boroughbridge "a-barbelling."

(To be continued.)

A QUIET NOOK AMONG THE SCOTTISH HILLS.

By Gilnockie.

As the fishing season is now fairly launched, and anglers are busy sorting out their implements of warfare, it may not be amiss if I reintroduce to the readers of the *F. G.* a certain quiet fishing retreat, cosily nestled among the most romantic of the Scottish hills, and charmingly surrounded by wood and water—one of those peaceful spots designed by Nature for the especial benefit of those who are averse to the stir and excitement of places of popular and fashionable resort, and where the worried and wearied toiler may renew his elasticity (both of mind and body) by rambling by the bubbling brook, the gliding river, or in contemplating the magnificent mountain scenery which has been so bountifully dealt out in the charming corner of the earth to which I wish to draw attention.

I refer to the unpretending little town of Langholm, in Dumfriesshire, situated at the junction of three streams—the Esk, Ewes, and Wanchope—and surrounded by three hills, Whita, Warbla, and Timpen. It is one of the snuggest little spots to be found in the British Isles—one of those old-fashioned villages, which, in this age of railways, have become a rarity. True, the town boasts of a railway station; but it is a terminus, and consequently the town attracts fewer visitors than it would otherwise do if it possessed a through line. Even its very isolation constitutes one of its charming features to the visitor. It is seventy-three miles from Edinburgh and twenty-one from Carlisle, and easily comeatable either by road or rail. Anyone in search of perfect repose will find it here, especially amid the beautiful walks in the vicinity of the town, which are of the most inviting description.

There are only about four thousand inhabitants, most of them douce, canny, sonsie bodies; and the houses are clean, and many of them well-built. The hotels are mostly of a homely character, both temperance and otherwise; and the proprietors all strive to make visitors feel at home. The air is remarkably invigorating; and that it is conducive to longevity is proved by the parish

Cla
the [illegible]

pleasure.

I wou to Call

and see Mrs

gister, which records several centenarians. One d lady, whom I knew well, died last week at e age of ninety, leaving a surviving brother hose age is ninety-four. I knew an old woman ho died not far from Langholm, about forty years go, at the age of one hundred and two. This as "Sodger Jean." She served many years in e army, and her sex was only discovered during severe illness. Previous to that she had done er duty like a hero, and had actually slept in e same bed with a comrade without being found ut.

But this is a digression.

The season ticket for the Esk and Liddle and heir tributaries from their sources to the Solway, xcept the waters specially reserved, is £4 4s.; ne week, £1; one day, 5s. Upper waters ticket: eason, £1 10s.; per day, 2s. 6d. Some other portions, 10s. for season, and 1s. per day. May and une are the best months for yellow trout; June nd July for sea (salmon) trout; end of July and ugust for whiting; September and October for almon. Many of the tributaries turn out good baskets of yellow trout: the best are the Ewes nd Tarras, close to Langholm; Hermitage, Meggett and Stenneswater, a little farther distant. Should angling not be one of the tourist's hobbies, he may be a geologist; if so, the Scorpion Shales of Eskdale, or the lime-stone strata of Liddle, will reward his labour. Or the rod's companion may be a botanical glass, not a hammer; if such be the case, he is in the midst of a wealth of woods and wild flowers. Such a profusion of genera and species for the study of vegetation through all its stages—from the lichens, the liverworth, the equisetums, the mosses, the ferns, to the hoary oak—is rarely met with. Those, too, blessed with a fair supply of wind and tenacity of limb might scale the heights of Whita Hill, which overlook the town, 1,204 feet above the level of the sea, where a splendid view of the surrounding country is obtainable. The Cumberland and Northumberland mountains from this point of vantage seem close at hand. Criffel, the Nithodale Hills, Burnswark, Whitrop, the Nine-stane Rigg, Comb, and Roanfell are all visible. The Solway, a long silver streak, gleams in the distance; while close beneath lies this romantic little town, smothered in a wilderness of vegetation. Leaving Whita top, a tramp across the moor conjures up recollections of a Perthshire glen. Such is Langholm and its vicinity.

But there are places on the Border scarcely less beautiful; and scores of mountain streams, that babble pleasantly, or leap over linns, and make miniature cascades; and hundreds of dowie dens, where the last new novel or the fragrant weed may be enjoyed in peace. To the antiquarian, and the collector of folk and ballad lore, the district is particularly rich. Eskdale Muir can show its well-preserved Druidical circle and commemoration cairns to murdered Covenanters. The neighbourhood is studded with the remains of ancient strongholds. One of the most famous is Gilnockie Tower, standing on a high promontory overlooking the Esk, about four miles from Langholm, and two miles from the old coaching hotel, the Cross Keys, Canonbie. Gilnockie Tower is one of the most interesting relics of the freebooting days to be found on the Border, and is still well preserved; but the castle proper has been completely swept away, and only faint indications of the site remain. Part of the stones were long ago used in building the bridge which spans the Esk, a little below the venerable keep, and are frequently pointed out to visitors with great relish by the local antiquarians.

Fifteen minutes' walk takes the visitor past Byre Burn—another enchanting spot. The wooded banks of the river rise quite sixty feet above the rocky channel, and the view down the water is indescribably grand as far as the Cross Keys. This old hotel is another interesting landmark. Here Professor Wilson stayed when he annually "swept" the Esk, and often waded, as he used to assert, up to the "oxters."

A little farther down this valley brings the pleasure-seeker to the Moat Linn—a famous old Roman station, overlooking both the Liddle and Esk, nigh the point where the two waters meet. At the extremity of Canonbie Lea, immortalised in Scott's "Young Lochinvar," the top of the linn affords one of the finest views on the Border. To the west lies the Solway Frith, overshadowed by Criffel Hill in Galloway; to the south, the splendid range of the Cumbrian Mountains; the Cheviot Hills in the east; and the whole area of the Scottish Southern Highlands in the north.

> "There's not a spot in Britain's Isle where human feet
> have been,
> There's not a land in foreign climes the eye of man has
> seen,
> There's not a patch on God's green earth like that
> whereon I stand,
> Or half so beautiful as this enchanted fairyland."

From this point it is always well to procced about two miles up the Liddle to Penton Linns, and explore the huge rocks and boulders that stand in the middle of the river like Egyptian pyramids, and the charming walks in the woods, which are the delight of all who have visited them. Returning again to Langholm, which is six miles distant, the tourist should take a day up Eskdale, through the enchanting Gallowside, bright with a carpet of many colours, not forgetting to drink from Peden's Well, where the famous Covenanter once quenched his thirst; on to Westerkirk, the birthplace of Telford the engineer; through the grounds of the Johnstones of Annandale to Burnfoot, the ancient mansion of the "Four Knights of Eskdale," whose father was only a plain country farmer, who buisted and helped to shear his own sheep.

Up the Ewes is another beautiful walk as far as Meikledale, once the residence of that "Beattie o' Meikledale" who supplied Sir Walter Scott with the plot for the "Lay of the Last Minstrel." Then we may go farther afield to the gaunt old Border stronghold of Hermitage Castle. The drive from Langholm thither—about ten miles—is a most interesting one across the wide-stretching moorlands, over whose bleak expanse the giant keep gazes like a mail-clad sentinel.

> "Far from the madding crowd,"

'mid solitude and silence, broken only by the occasional lonely cry of the whaup or the bic-bic-birr of the muircock, there is nought to be seen but hills and heather.

Another day could be well spent in Thomas Carlyle's country, which should include a visit to Haddam Castle and Repentance Tower, famous in Border song and story; to the old Roman camp at Burnsward; thence to Castle Milk, the seat of Sir Robert Jardine, M.P., whose kennel of greyhounds is perhaps the finest in all Scotland; and returning by Sprinkell (the residence of Sir John Heron Maxwell) and Kirkconnell (made famous by the well-known song of "Fair Helen of Kirkconnell Lea." The best and most interesting drives from Langholm are—Carlisle, twenty-one miles; Hawick, twenty-three; Lockerby, twenty; Annan, twenty; Gretna Green, fifteen; Roman Camp at Moat, nine; Penton Linns, six; besides shorter distances in galore.

Those content with plain homely fare can live very cheaply over the Border in the valley of the Esk, either in private apartments or otherwise; and intending visitors are recommended to breakfast always on porridge and milk after having first bathed in the Esk. Such is my practice during my annual visits to the district, and I invariably return to the big village thoroughly braced up for the winter's campaign of hard work.

STRANGE CAPTURE OF A LARGE TROUT ON THE WHITADDER.—Mr. Gillies, Edington Mill, and a friend (Mr. Jones, from London) were fishing from a boat in the dam road at Edington Mill, when a large fish was observed feeding in the shallow water just under Pear Bank stream. Mr. Jones carefully rowed up behind the fish, and Mr. Gillies threw the line, which caught a swallow a few feet off the end of the rod. The swallow and the worm struck the water at the same time, and the fish was seen to move round. On pulling up the line, the fish was found struggling in the water, and the swallow in the air. The latter soon frced itself, and it was fortunate it did, as the fish claimed all attention by at once making for the deep water. The tackle used being very fine, great care had to be used, and the fish had a good deal of its own way, but after a fine run of a quarter of an hour he was safely landed into the boat, and proved to be a yellow trout in splendid condition, which, on being weighed, turned the scale at just over 3lb.—*Newcastle Chronicle.*

Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—EAST LONDON RUBBER Co, 8, Shoreditch, E.

Notes and Queries

THE plumbers are at work laying the pipes to convey the water, by gravitation, from the fountain head to the new salmon hatchery at Brawl Castle, on the river Thurso, which is expected to be finished about the first week in August, when the other necessary preparations will be proceeded with. It is decided to lay all the eggs on a layer of quartz gravel, about an inch thick, in the hatching boxes.

SNIPE UP THE THAMES.—Whilst fishing in the Windsor waters on Thursday, a London angler saw a flock of eleven summer snipe in the vicinity of Boveney Weir. The birds made several attempts to alight between there and Surly Hall, but owing to the presence of numerous boating parties, including many Eton boys, they were too frightened to do so. The birds formed a pretty picture skimming over the river.—GOOSEUQILL

THE NORFOLK BROADS.—Following up the meeting lately held at Norwich on this subject, a meeting of London anglers will be held under the auspices of the Gresham Angling Society, at their rooms, Masons' Hall Tavern, Basinghall-street, on Tuesday, the 28th instant, at eight p.m., to explain and uphold the legal rights of the public to sail and fish in the above Broads, as they have done from time immemorial. The chair will be taken by G. C. T. Bartley, Esq., M.P. for North Islington, who will be supported by Messrs. Walter Rye, George Corble (Clerk to the Lea Conservancy), G. Chambers, T. J. Woodrow, C.C., and many influential anglers and representatives of angling clubs.

RODS AND TACKLE.—(By the late Francis Francis, from his "Angler's Register," 1860.)—"On Rods.—These the angler should suit to his strength and stature, but he will seldom go far wrong in paying a good price, and allowing a good practical maker, who knows his business, to choose one for him, if he mistrusts his own judgment. On Tackle.—Never buy cheap tackle of any kind—it is a delusion, a mockery, and a snare, and will be sure to fail you in your utmost need. A cheap line has a flaw in it for certain; cheap gut frays out, and will not last; and cheap hooks are the devil, with all his imps at his back. We always buy the very dearest hooks we can get in the market, and they never fail us, while the difference is about half-a-crown a year, and many a salmon and trout of good dimensions bagged, that a cheap hook would probably have parted company with. Learn to make your own flies and tackle, and to mend your own rods—not that you may always do so—which would become o'erburdensome—but that you may be able to upon any emergency, and may, moreover, know what is good workmanship and what is not. How awkward it is to lose your only killing fly in a big fish, in some mountain loch or solitary stream, miles and miles from home, and how often the angler wishes he had some fly-making materials with him. A very useful little article is a flyfishers' *vade mecum.* This is a book about the size of a small fly-book, containing every requisite for fly-making, so that the angler may never be at a loss for making a fly, even by the river side; but to aid this, a small screw pocket table vice will need to be carried; also a small flat circular board, on which to screw it. Now if there be a circular hole in the board, by sticking the spear of the butt-end of the fly-rod in the ground upright, and slipping the board over the joint until it jams, the angler has an ever-ready table on which to fasten his vice. There are many who can dress a fly sufficiently neat and killing without a vice, but there are more who cannot, and a good day's sport is often lost for the want of some particular fly, which ten minutes' application at the river side would supply. Now having your vice and table fixed, select hook and gut, and tie on, and now the *vade mecum*, with it stores, comes into play; in the first few pages are small pockets, each containing a diminutive portion of dubbing, of every shade of brown, grey yellow, reddish, greens, and neutral tints; the next few pages contain hackles of all sizes, strips of paper being gummed over the quill ends and ranged in the shades required for trout flies: then comes a page of the wing or tail feathers of various small birds, of different shades, for wings; these are the main requisites. There are sundry small pockets to the book, containing cards, with small portions of floss and other silks and wools of various colours, with a scrap of tinsel, &c., &c.; by this means a small but sufficient collection of materials, and of the most useful kind, can be carried with ease; and no angler who can tie a fly should ever go without the requisites for doing so. As a true brother of the angler, conduct yourself civilly and liberally to all; be not greedy, nor over-reaching; and avoid exaggeration. Never fish in any one's water without permission; a polite note, or request, will, nine times out of ten, get that permission. Added to permission, in Ireland, for salmon fishing, a licence is necessary; this costs ten shillings upon every district but two, and these are Ballyshannon and Ballina, and here the charge is a pound. Above all, study nature, and practise patience."

A MEMORABLE FISHING MATCH ON THE BORDER.

SEVERAL of my friends are complaining that Rab Morrison's narrative came to a very abrupt conclusion. I am aware of that: Rab grat like a bairn; in fact, blubbered like a big Bubbly Jock. I hate scenes; and did not wish to expose Rab; but the worst of it was this: he burst into song at the finish—a weakly sentimental ditty—the kind of stuff that harrows the soul of ye long-suffering Editor of ye *Fishing Gazette*. I once had the *F. G.* office club applied to my cantle anent some verses I sent in, and I don't want such a floorer again. However, as the *poetry* (save the mark!) is Rab's and not mine, I'll chance it.

RAB MORRISON'S SONG.

The saut tear's rinnin' doon my cheek
Wi greetin' sair are baith my een,
For O they've stown my love awa',
They've stown awa' my Border Queen.
The winter wind sweeps doon the vale
In angry gusts baith snell and keen.
Nor wind nor snaw can hurt me now
I've lost my charming Border Queen.
The heather waves on yonder hill,
On yonder banks the grass grows green,
I car'na for those once loved scenes;
I've lost my lovely Border Queen.
What care I now for wordly gear,
What care I now for foe or freen.
Out o'er the heath I cheerless roam
In search o' my sweet Border Queen.
At midnight hour, in lonely glens
My weary feet have oft-times been,
And in the gloaming mirk I stray
But cannot find my Border Queen.
On Eskdale's braes or Wanchope's Knowes,
No fairer flower was ever seen.
But now they've stown my lass awa'
My own bewitchin' Border Queen.
She was the pride o' a' the glen,
Her tartan plaidic braw and clean
Was aye wrapt roun' the lovely form
O' my young strappin' Border Queen.
Now she is married and awa'
May she be happy morn and e'en,
And bonnie bairns rin toddlin' roun'
The fireside o' the Border Queen.

GILNOCKIE.

A NEW DISGORGER.

SOME time ago, a gentleman called on us to get our opinion of a new form of disgorger he had invented. We now hear from his agent, Mr. F. M. Walbran, New Station-street, Leeds, that he has patented it, and that it is now on sale.

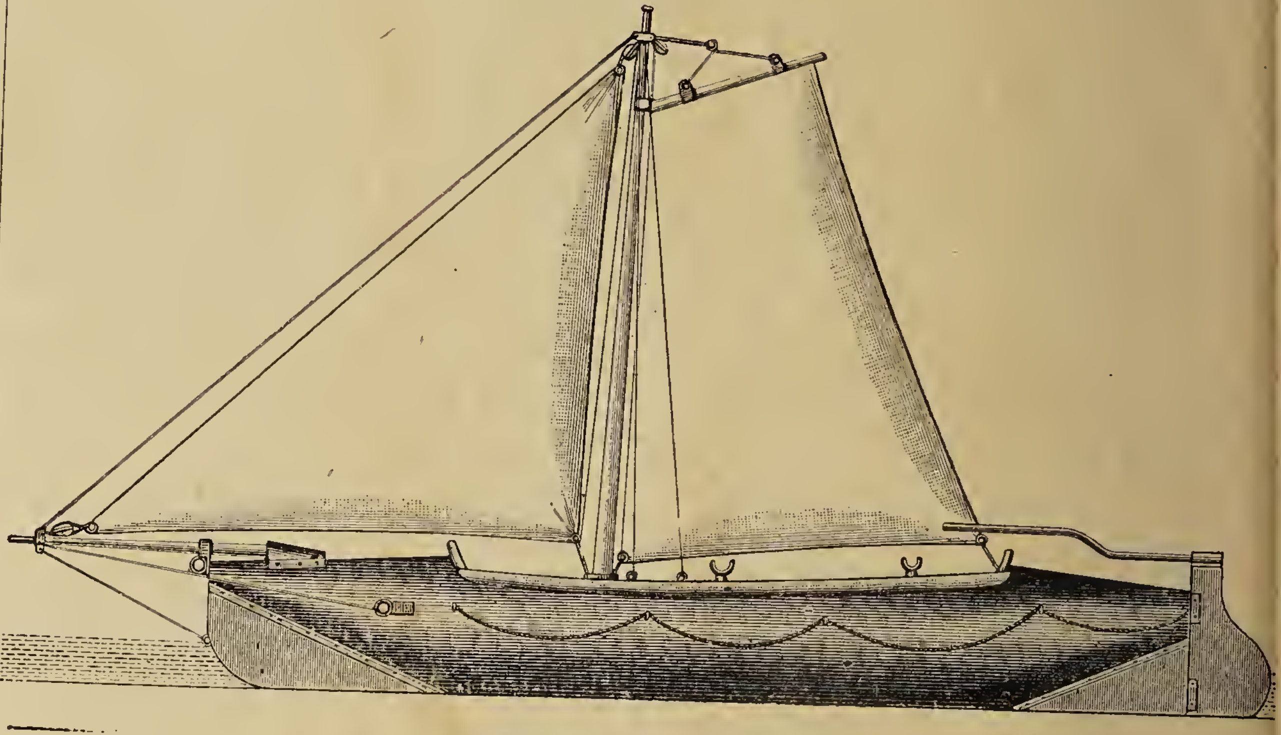
Mr. Walbran writes: "I enclose you a disgorger, which the inventor, Mr. Walker, has had mounted in real silver for your acceptance I call it the best I have ever seen. Please note, the ordinary ones are sold at 6d. each. They are made of riven lance-wood and cannot be broken by fair means." The idea is a very ingenious one, and in many respects this is one of the best disgorgers we have seen, and will be especially appreciated by all who use single hooks on gut or hair, as it certainly prevents injury to the gut as well as enabling one to release a hook from a fish's throat.

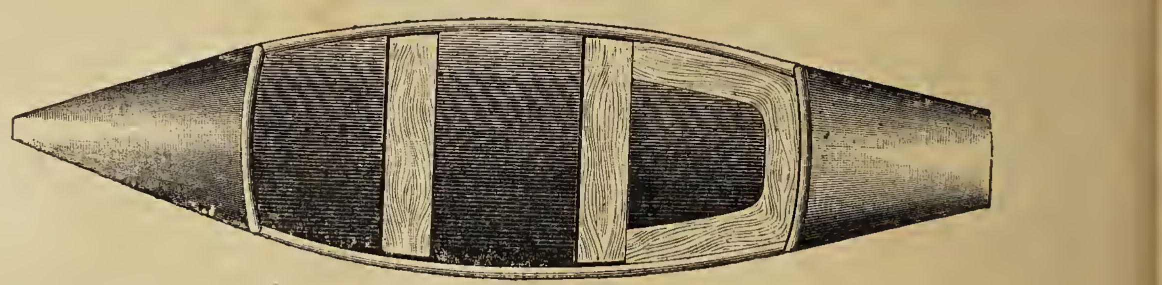
Holloway's Pills.—Good Spirits.—Every one has frequently experienced sudden personal changes from gaiety to gloom. The wind and weather oftentimes receive the blame when a faulty digestion is alone the cause of the depression. Holloway's Pills can be honestly recommended for regulating a disordered stomach and improving digestion. They entirely remove the sense of fulness and oppression after eating. They clear the furred tongue, and act as a wholesome stimulant to the liver, and as a gentle aperient to the bowels. They healthfully rouse both body and mind. Holloway's Pills are the best known antidotes for want of appetite, nausea, flatulency, heartburn, langour, depression, and that apathy so characteristic of chronic derangement of the digestion.

UNSINKABLE AND SELF-RIGHTING STEEL BOATS.

WE give illustrations of the Patent Steel Boat, which is about to be introduced by the inventor and builder, Mr. William Wells, 50, Commercial-street, Leith. These boats are constructed of steel, on an entirely novel design, and claim to possess the invaluable qualities of being *absolutely unsinkable* and *instantaneously self-righting*. Thefore and aft sections of the boat are constructed in the form of hollow cones, slightly flattened and laid horizontally. These sections are thoroughly air and water-tight, and their special form imparts immense strength and rigidity to the whole structure. A friend, who has carefully examined them, says:—

"These boats are pre-eminently suitable for fishing, shooting, rowing, and sailing on sea, lake, or river, and are the only boats of small size which are absolutely safe, and free from the danger of foundering, even in the stormiest sea. They maintain their buoyancy when manned and filled to the gunwale with water, and even when turned bottom-up, and forced bodily under water and released, instantly come to the surface and right themselves. Besides being a unique boat for sportsmen for angling and shooting, and a safe boat for pleasure sailing and rowing, a boat having these qualities is calculated to be *a valuable addition to the life-saving* equipment of vessels of all classes, combining as it does all the qualities of a life-buoy with the advantages of a boat.





On an emergency the Patent Steel Boat could be thrown overboard bodily, without the formality and delay attending the use of boat-lowering gear, as no matter how the boat landed in the water, it would float on an even keel, and could not possibly swamp. It is expected that these boats will be largely adopted as valuable auxiliaries to yachts, being lighter and more easily lowered and worked than ordinary punts or dinghys, and possessing much greater safety than the latter.

From their great strength, remarkable lightness, durability, stability on small draught, and the fact that they can be made to *disjoint into sections for transportation*, and from their non-liability to warp and leak in hot climates, these boats are very specially adapted for river and lake navigation abroad.

These boats have been practically tried in the Firth of Forth in all weathers, and have been demonstrated to possess all the qualities that are claimed for them. They are surprisingly swift under oar or sail, and owing to the peculiar formation of the keel, answer the rudder with unusual readiness.

An idea of the unsinkable qualities of these boats may be formed from a perusal of the following possibilities of accident:—

(1) If *one* of the water-tight sections was pierced below the water-line, the only result would be that the draught of the boat would be slight increased, moreover the supporting capacity of the section would not be destroyed, as the water would seal and naturally compress the air within the chamber, which would still continue to afford support.

(2) If *both* the water-tight sections were pierced below the water-line, the boat would only draw a little more water, and, as explained in the preceding paragraph, the supporting capacity of the sections would not be extinguished, but simply diminished.

(3) If *one* of the water-tight sections and the *midship section* were pierced below the water-line, the boat would still float, and be supported by the remaining section, which besides would be capable of supporting a dead-weight equal to the seat capacity of the boat.

(4) If the *two* end sections of the *midship section* were pierced below the water-line, the boat would still float and be supported by the air sealed within the two end sections.

It will thus be seen that only in the almost inconceivable event of the whole three sections being simultaneously pierced both above and below the water-line, would the boat lose its buoyancy.

The Patent Steel Boats can be produced at a cost that will compare favourably with the price of good class wooden boats.

They will stand usage which would rapidly destroy a wood boat, but they are at the same time remarkably light, a boat 12ft. long and 3ft. broad, complete with mast, oars, sail, &c., approximating only 3cwt."

TO OUR ADVERTISERS.—We shall shortly send out *free* to hotels, clubs, and angling quarters throughout the Kingdom, a large number of cloth reading cases. We will let our readers know when they are ready. Meantime we would draw the attention of our friends to the fact that we have decided to allow a few selected advertisements to appear inside.

Waltoniana

THE great increase of salt-water anglers of late years is more remarkable than astonishing. The astonishing thing is that the sea, as a place for obtaining excellent sport, was so long neglected. At the present day, in seaside towns where the sea fishing is at all good, a number of amateur sea fishermen are to be found who devote themselves entirely to angling in salt water; and in addition to these there are, of course, thousands of anglers who are glad of the change from the river or lake to the really excellent sport to be obtained on certain parts of the coast. Only the other day I had a letter from the owner of a moor in Scotland, asking how he should set about catching some of the sea trout and pollack which abounded in the bay close to his place; and there are many more like him, who would be only too glad to sea fish with rod and line, if they only knew how to set about it. The difficulty is that there are very few professional sea fishermen who can act as gillies and show their employers how to fish. It is only the most experienced anglers who can do without professional assistance. Many men, indeed, who are accounted good fishermen are sadly at a loss without their professional assistant. This is possibly because they do not study the habits and ways of fish, but are content with their skill in working the rod and line. To my mind, to be a a really good angler involves the possession of both skill in using tackle and knowledge of the habits of fish.

THE professional sea fishermen are not only for the most part ignorant of the advantages of using fine tackle in the sea, but often discourage its use. The exceptions I have found to this peculiarity have been on the north-east coast, where sea angling is carried on to a great extent. At Deal and Lowestoft, too, the fishermen are being educated up to the sport of sea fishing, as distinguished from catching fish for the market. If at every sea-side place there could be found men who were able and willing to show visitors the best means of obtaining sport with bass, pollack, and other of the more sporting sea fish, providing rods and lines if need be, as is done on the Thames, and if these men could be hired at moderate rates I have no doubt that sea fishing or sea angling would soon become as popular as angling in fresh water.

MANY men suppose that it is necessary to be a good sailor before one can become a sea fisherman, but as a matter of fact there are places round the coast where really good fishing can be obtained at the right seasons, without going on the sea at all. Concerning Deal, where the fishing is often better than from boats, much has been written in the *Fishing Gazette* by that veteran angler, Mr. Sachs. Another place I may instance is Lowestoft Harbour, where large flat fish are often taken on the rod, and really give excellent sport. Then there is Filey, where, in the months of August and September, most exciting fly-fishing for coal fish, going from 1lb. to 3lb. or more, may be had from a reef of rocks when the wind suits. I once took with the fly, thirty-two fish, weighing over ½cwt., and this in less than two hours' fishing. That take was, however, exceptional. This sport, by the way, is not confined to Filey, but is obtained at several places on the north-east coast. In many harbours, too, the fisherman who is not a good sailor may fish from a boat for bass, flat fish, smelts, &c., without any danger of his interior economy being disturbed. Scarborough is another great sea angling centre, where there are a large number of local salt-water anglers, in addition to the crowds of visitors who fish with rod and line in the bay.

FISHING tackle makers do not sufficiently consider the wants of the salt-water angler. It is, for instance, a most difficult thing to get a large wooden reel for sea fishing, one that will hold 100yds. of stout pike line. Sea rods for use with heavy weights have generally to be made specially, and no one, so far as I am aware, has manufactured tinned hooks of good shape with eyes. I have seen rough, clumsy attempts at eyed hooks for sea fishing, but nothing that was satisfactory. For bait fishing, it is particularly necessary to have a neat eye to the hook. Then I should like to see landing-nets made specially for sea fishing, and rods with special winch-fittings and ferrules. England is a populous place, and there are many tackle makers, some of whom may have already carried out certain of these suggestions, but tackle for sea angling has undoubtedly been neglected by the great majority of rod and tackle manufacturers. For hand-lining, on the other hand, most excellent tackle is made by the two Plymouth houses and others. It is the salt-water angler whose wants have been overlooked. Talking of hand-lining reminds me that an experienced sea fisherman, the Rev. Mr. Tracy, of Totnes, has invented an excellent lead, which consists of several pieces, one or more of which can be removed or replaced in a second. It is often very desirable to have leads to suit the varying strength of the tide. At ten o'clock we may find it necessary to use four or five pounds of lead to keep the baits near the bottom, while a couple of hours later, at slack tide, one pound may be ample. To change the whole lead and to carry a number of leads of different sizes is a nuisance. Mr. Tracy's lead is therefore a distinct advance on the arrangement we have been in the habit of using. It is simple in construction and not likely to get out of order. I understand that Mr. Tracy has no interest in its sale whatever.

TEMPLAR.

ANSWERS TO CORRESPONDENTS.

ANCHOR AND HOPE: As you decide that we should arbitrate on the question which for its weight is the best specimen out of these fish—viz., a pike of 7lb. 5oz., a carp of 4lb. 10½oz., a roach of 1lb. 3oz., a dace of 8oz., a gudgeon of 2oz., we give the palm to the carp.

Correspondence

[*We do not hold ourselves responsible for opinions expressed by our Correspondents.*]

"*One of the charms of angling is that it presents an endless field for argument, speculation, and experiment.*"—T. E. PRITT.

FISHING REPORTS, &c.

SIR,—I am pleased to see that a little discussion has followed the writing of my paper on the above subject, and, so far, my views have not been questioned save by one correspondent, "Long Drift," whose letter gave me a little amusement.

Here we have a model reporter, who, by his own showing, has been sending reports "from a promising lake, which I maintain *are* correct." He then goes on to say that "the system Mr. Tod referred to" (*i.e.*, recommended) "of having a weighing-machine in the hall of the hotel" was carried out there, and so accurately that "some anglers think we are unduly jealous of the last ounce." "Such a diabolical trick as weighing the creel with the fish has on no occasion been attempted"; and, lastly, he says: "This policy, which I am determined to maintain, will, I am sure, eventually bring its reward."

Bravo, "Long Drift"! But as no one was looking (like Diogenes with his lantern) for an honest man, I don't see why *you* should reply for the *dis*honest, who naturally are silent.

If all reporters acted as "Long Drift" does, and all hotels adopted the system he speaks of, I am quite sure that the angling world would recognise the sterling worth of such reporters and their reports.

It is a singular thing to *me* that when I took up my pen it was with the idea of defending the credit of reporters as a body; and I think if "Long Drift" will read my letter over again he will find that this was so. I only condemned those who issued misleading reports. But my chief blow was directed against the "gentleman angler," who gets his boatman or gillie to fish with him into *his* basket, who *allows* his basket to be weighed with his fish, and who generally misleads people in order to brag about his skill; and who *thus* permits stories which he knows to be untrue to get into the sporting papers through the medium of the unsuspecting and distant reporter. I had no idea of hitting at any individual, though I perhaps had the wish to defend one whose report I thought had been *very unfairly* commented upon.

I think that the example set forth in "Long Drift's" letter should be followed by excellent results, and I am glad to have dragged into the light of day such a *worthy* record of conscientious care in the weighing and reporting of "takes."

Long life to such reporters as "Long Drift."—I am, &c.,

E. M. TOD.

THE FLEET AT DEAL, AND FISHING FROM THE PIER.

SIR,—Will you allow me to correct an error in my letter of last week? I wrote—or intended to write—that I would try for pollack with a salmon fly, and had brought a salmon *rod* with me for that purpose. The word rod is unfortunately left out, a mistake which must have been obvious to your readers.

The fleet having left for the north, the fishing with rods and hand lines from the pier has been productive of mostly small fish, one gentleman, in two hours, landing forty-one. Among my lot was a spotted dog-fish, 30in. in length, which when opened contained two immature eggs—I send them on to you—in which you can see the infants. The shells are well supplied with tendrils, which Nature has furnished them with, to twine round the sea weeds. The empty shells are frequently found after a storm at Margate and other places on a sandy beach, and are called "devil's purses." In the late Frank Buckland's last book, the "History of British Fishes," is a full description and illustrations of these eggs, and dog-fishes in general.

The day previous to the departure of the fleet, a fresh breeze made the water rough, and caused much trouble to the numerous steam pinnaces who were engaged in provisioning the fleet. For want of a crane, two quarters of beef slipped off the men's shoulders between the pier and the pinnaces, one of which was recovered and re-sold to the butcher by the ship's steward at half the price paid for it; the other was fished up two days after the fleet had left, the captors sharing ten shillings each from the sale of it to the poorer classes, it being none the worse for being salted. A sack of potatoes also went over, causing the loss of many angler's hooks. The electric display was from nine to 10.30. One of the operators told me that they could flash the light into any room of a house on the beach and see what the inhabitants were doing, so distinct the faces appear.

The pier head has been extended; the concert-room well attended, seats one penny each; otherwise it is open all day, and useful when it rains.

Deal is getting full of quiet people, who do not care about the excursionist's towns, such as Brighton and Margate.—Yours truly,

T. R. SACHS.

RE CAMM FUND.—APPEAL TO CLUB ANGLERS AND FRIENDS.

DEAR SIR,—I beg leave to acknowledge the sum of 21s. from the Westbourne Park Piscatorial Society; 7s. 6d. from the Wenlock Angling Society; 3s. from six anglers of the Peckham Brothers Angling Society; making the total amount £17 10s. 3d.; expenses for postage, &c., 5s. 6d.; balance, £17 4s. 9d. In acknowledging the same, I must thank all those clubs who have responded as yet to this deserving case. I hope all clubs will remit their amounts as promised.

Mrs. Camm, the widow, sends me this letter:—

"MR. ABRAHAMS.—Dear Sir,—I think it nothing but right I should write and let you know I have left the infirmary, and am at present staying at the Cobden Club with Mrs. Mills, and should like very much to see and thank you for your kindness, when it is convenient.—Yours respectfully, MRS. CAMM.—Cobden Club, Kensal-road."

Cheques and Postal Orders can be crossed "Alliance Bank and Co."—I am, dear Sir, yours truly,

B. ABRAHAMS.

25, Silver-street, Notting Hill Gate, London, W.

SEA FISHING QUERY.

SIR,—Can any of your readers inform me what sea fishing can be had at Tenby—say from 15th of August? Also whether apartments, boats, &c., are reasonable.—Yours faithfully,

5A, Garrick-street. GEORGE B. AYLMORE.

[Tenby is about the best place in the whole country for sea fishing.—ED.]

LONDON CLUBS AND THEIR VISITS.

Dear Sir,—It is with much regret that I see reported week after week the indifferent manner in which the London club anglers support their friendly visits. It must be very discouraging to the various visiting officers to see the way in which their endeavours are appreciated. If secretaries of clubs were only to take the trouble to notify their pending visits by post in a proper manner, I think the results in a great many instances would be very different. And then again, in the weekly reports, the different inducements which are sent out by the club officials to entice their members to attend in a more becoming way ought to meet with better approval. I feel certain that if club members were to take more interest in their clubs by attending as often as they possibly could on meeting nights, and assist their secretary by their advice and support, they would soon discover that he would readily and willingly undertake and execute duties, which, under the present circumstances, with few exceptions, are to him an irksome, arduous, and thankless task. If something by way of reform in these matters were introduced, I am of opinion that return visits and everything appertaining to angling interests in general would vastly improve.—Yours faithfully, J. C. R.

FISHING WANTED ON TEST OR ITCHEN.

Dear Sir,—Will some of your readers kindly inform a brother fisherman where good plain quarters can be had for a day or two on the Test and Itchen, and what are the conditions best adapted for the purpose? I have never yet fished either river.—I am, &c., R. P.

[We fancy that day tickets for Mr. Chamberlain's water on the Itchen can be had at the Railway Hotel, Bishopstoke.—Ed.]

ANGLING FOR BARBEL.

Sir,—When angling for barbel with the worm in the manner described by Mr. Jardine in your last issue, would your correspondent kindly inform me if he does not think that barbel, when biting, as he very truly says, "like roach" (and I think I might include dace) would not succeed in stripping the worm clean off the hook without the slightest possibility of being caught. I ask the question, because in using even a maiden lob, the hanging ends would be of considerable length, whilst those from a lob would be terrific, because worms have a knack of elongating themselves to the utmost when in the water; and when barbel are biting in this peculiar manner and the angler frequently strikes without hooking his fish, may I ask would not a *medium*-sized ragged bait be preferable?—I am, &c., Streatham.

TROUT FISHING IN LOUGH MASK.

Sir,—In your last issue I have seen that "H. N." wishes to know from the readers of your paper where he would get good trout fishing on an Irish lake. I would invite him to Lough Mask, when he could have free fishing and boat and two men at six shillings per day. Mr. William Dove caught eleven trout on Saturday, the 18th inst., weighing 42lb. This was the best take for the past fortnight.—Yours, &c.,

Mount Gable Hotel, Scyman Summerly.
Clonbur, Co. Galway.

LARGE TAY SALMON.

Sir,—"Notes and Queries," in *Fishing Gazette* of 18th inst. describes the 62lb. fish recently caught in the nets below Perth as the heaviest yielded by the Tay for six or seven years back.

I gather from *Land and Water* of June 27 last, that as recently as the previous Wednesday, Messrs. Gilson and Sons, of 121, New Bond-street, had on show a Tay salmon, weight 63½lb., length 4ft. 5in., girth 2ft. 6in., the tail being exactly 1ft. across.—Yours, &c., Giant.

FISHING NEAR SOUTHEND.

Dear Sir,—Would you kindly inform me of the nearest place to Southend where I could get some good coarse fishing, and what bait best to use, and whether it is necessary to hire a boat?—I am, Sir, yours truly, E. T. Stoner.

19, Brampton-road, South Hackney.

TEES SALMON.

Sir,—In your issue of May 30 last, "J. H. R." reported that the first specimen of the *Salmo salar* had been caught this season in the upper reaches of the Tees. This statement naturally put the salmon fishers into a great state of excitement. I understand some of them blamed their stars because they were so far behindhand with their preparations, and so they set to work to varnish rods, overhaul tackle, &c. When the facts of the case oozed out, there was some laughing, and some hard words used towards "J. H. R." who had caused the stir with his accurate "facts." When asked to give particulars about this wonderful catch, he fights shy of the business. The fact is, no specimen of the *Salmo salar* was caught at all. What was caught was a miserable sea trout (*Salmo trutta*) kelt, by a man who was fishing for trout, and who had no licence to take salmon, and the fish was therefore poached. And yet "J. H. R." announces that a *Salmo salar* had been caught with as much seriousness as if it were indeed a fact. The fish weighed about 2lb., which would be an unheard-of weight for a *salmon*. Fresh-run sea trout do not reach here until well into July; whilst if a specimen of the *Salmo salar* is killed in June, it is looked upon as quite a wonder. Let us quote the boastful utterance of "J. H. R." in the *F. G.* of 13th June: "In any reports I send to your paper I make accuracy my first aim and care. I do not send you hearsay, but *facts* which I have proved to be correct."

How far the profession and the performance agree in this case I leave your readers to judge. If he had reported the matter as "hearsay," he would have saved his credit. Let him qualify his statements by such little terms as "I hear," when he has not taken the trouble to prove them to be correct.—Yours, &c., Hawthorney.

POACHING ON THE TWEED.

Sir,—I write you to enlist your efforts in redressing a grievance which I am sure will appeal to you or any angler—namely, to put a stop to the netting which is devastating the upper reaches of the Tweed, from Lyne to Stanhope, possibly above and below these points; scarcely a week passes without these poaching scoundrels emptying the river of the finest and best trout. At this time of year the fish leave the pools and come into the long shallow stretches of water to feed at night-time, and a few accomplished netters can take almost every fish out of the water. Last night I was out fly-fishing, and saw a gang of seven or eight of these blackguards at work. The river has been staked by private subscriptions, but one or two wade down in front of the net, and lift it over when they come to a stake, and so can net, however well staked the river may be. The Glasgow and Edinburgh Angling Clubs apparently exhaust their energies and subscriptions in pot-hunting, fishing competitions for prizes, and seem to be quite content to allow what should be the finest trouting stream in Great Britain to be utterly denuded of good fish, while the Tweed Commissioners do nothing to protect trout in any shape or form; and I feel sure that public opinion will have to be stirred up in the matter before they can be induced to make any movement.—Yours obediently, C. E. Hale.

QUERIES ABOUT A POND.

Dear Sir,—I should be very much obliged if you or any of your readers would kindly inform me if there is any way to keep a stagnant pond clear and clean. I have lately had one made for keeping bait in, but directly the water is pumped in, although coming from an excellent well, it gets thick and green. The pond is cemented and has gravel at the bottom which has been thoroughly washed. The water is not shaded by trees, but I have put some white water-lillies in, planted in fish baskets, to give the fish shade. The bait seem to thrive in it well (a Thames dace has lived there more than four months), but it is very unsatisfactory to have the water too thick to see anything three inches below the surface. The pond is about 3ft. 6in. deep, shelving to 18in., and about 20ft. long. I should be very thankful for any advice.—I am, &c.,

Arthur S. Duffield.

Chelmsford, Essex.

THE CHAMPION ROACH ANGLER.

Dear Sir,—Replying to your last week's *Gazette* as regards the champion roach fisher, I was not aware Mr. J. Woodward held the title of champion. I am a member of the Sheffield Angling Association, and quite prepared to make a match for one of our members to fish Mr. Woodward home and home, to draw for the third place, for £50 or £100. Hoping we can arrange a match, I am, &c., C. W. Lockwood.

28 Mushroom-lane.

HOOKING HERRINGS.

Dear Sir,—In your issue of the 4th inst., a "strange incident" is related by some ladies and gentlemen fishing off Whitby as to catching a herring with a hook. It is no rare occurrence, as I have caught hundreds with a "bare hook." When a youth, and could get permission from the pater, I would accompany the herring-fishers to sea, and they used to give me a "jigger" to amuse myself with by fishing. After all had "turned in," while the nets were fishing, I would sit and amuse myself by working my "jigger." The "jigger," as its name implies, is worked up and down with the hand in the sea. Attached to the line are various lengths of wire, 12in. long and about 12in. apart. Tied to each end of the wire are white hooks—the kind usually used for haddock fishing—and a lead sinker. By working or jigging this up and down in the sea I have caught hundreds of herring, when they were plentiful. They all took the bare hook, as every one I have caught by this *modus operandi* was hooked by the mouth. Now the question is. Why did the herring take the hook?—I remain, yours faithfully, J. M.

A GOOD BAG.

Sir,—I think it may interest some of your readers to hear of an incident which I should have imagined to be almost impossible, but for the truth of which I can answer.

A few weeks ago I paid a visit to an old friend of mine who rents a large farm and mill near Neen Sollers, in Shropshire, the mill being upon the river Rea, a tributary of the Teme. Between five and six o'clock in the morning, the man who works the mill set out with his gun for the purpose of shooting magpies, which had been very destructive to the chickens in the poultry-yard, and when a very short distance on his way his attention was attracted by a noise of splashing in the deep water above the weir, and immediately after saw a large otter walking along the river-side towards him. He immediately fired one of the barrels at him, and, although the otter was hit hard, the man, fearing the animal would escape, pulled the trigger of the second barrel to finish him; but the cap missed fire, and, by the time another cap was placed, it was evident to the man that the otter was dead. At that moment another otter left the water on the other side of the river just opposite, and the man then fired his second barrel and shot him through the head. The otters were taken to the house, and found to be very fine animals, both males, weighing 25lb. and 26lb. respectively, and were immediately sent off by my friend to a taxidermist to be stuffed.

I believe the killing of two full-grown otters within the space of a few minutes in such a manner to be almost without precedent, and it was a source of great satisfaction to myself (particularly as my visit to my friend was for a week's trout fishing) to find that two such formidable enemies to all lovers of the "gentle art" had been destroyed. I think the man who shot them deserves great credit and also some reward for his good shooting, although in a small country place like Neen Sollers I am afraid he will not receive a very generous recognition of the services he rendered.—I remain, Sir, yours faithfully, Edwin Mills.

Teddington.

ON KILLING FISH.

Dear Sir,—In answer to "W. D. L.'s" question, I have always killed my trout before taking the fly out by cutting through the spine immediately below the head. I use an ordinary pair of nail scissors, which do not measure in their case more than 3½in.—Yours truly,

W. Pugin Thornton.

Canterbury, July 4, 1891.

NOTES FROM BIRMINGHAM AND DISTRICT.

By C. W.

THE annual meeting of the St. George's Angling Society was held on Monday evening last, at the club-house, the Waggon and Horses, Parade, Birmingham. Mr. A. G. Hall presided, and Mr. E. Simkin occupied the vice-chair. The secretary was called upon to read the balance-sheet for the half-year ending June 30, which showed that the financial position of the society was all that the members could wish for. The amount in hand was £17 17s. 3d., out of which the sum of £7 7s. 3d. was voted for prizes for the club's annual contest. The question of the payment for the boat and boat-house on the Bidford water, was decided upon by the club paying all liabilities as soon as the work is completed, but the whole of the members would be levied two shillings and sixpence each, the same to be paid on or before the end of September next, so that the money may be refunded back to the society again. The election of a member to represent the society in the Marston Challenge Cup Competition, on August Bank Holiday next, at Tewkesbury, resulted in Mr. J. Moore being elected by a substantial majority. The important matter of the club contest was next taken, when it was proposed that the contest should be held on the last Saturday in August, and it was proposed as an amendment that the contest be held on the last Monday in August; the resolution and amendment being put to the vote, the amendment was carried by the narrow majority of one vote. It was also decided to fix a neutral place to hold the contest at, and Wyre Piddle, near Pershore, was unanimously selected, and the arrangements were left in the hands of the committee.

THE St. John's Society, held at the White Horse Inn, Icknield, Port-road, held their annual contest on the 19th inst., at Droitwich. Twenty-seven members sat down to fish, and the contest was of the usual duration—two hours, at the termination of which it was found that only fourteen had been successful in taking fish for weighing in. The first prize-taker came from quite an unexpected quarter, as it was thought that the first prize was at the mercy of the old veteran, Mr. J. Jukes, but he was doomed to disappointment, as the winner turned up in Mr. T. Bird, who never before had taken a rod in hand until the present occasion. This gentleman managed to secure a perch of 13¾oz.; Mr. J. Jukes was second; Mr. W. Darby, third; Mr. T. Howes, fourth; Mr. E. Peters, fifth; Mr. E. Edwards, sixth, &c. The weather was all that could be desired, and the whole of the members were greatly pleased with their outing. The prizes will be distributed on Friday week.

THE Spring Hill Society, held at the Reservoir Tavern, Eyre-street, Spring Hill, held their annual contest on the 19th inst., in the canal at Stourport. The contest was of two hours' duration, during which time it rained without ceasing, and the majority of competitors were wet to the skin. The sport was of the worst possible description owing to the canal in this part being poisoned some little time ago. Twenty-three members took part in the contest, but at the call of time to cease fishing, it was found that only three of the competitors had taken fish, and upon being weighed, Mr. R. Thurman was first, Mr. S. Allen, second; and F. Jones, third. Another contest will be held later on in the season for the remainder of the prizes, which number twenty-five, and consist of some very nice articles, not forgetting the copper kettle.

A FAIR amount of sport has been had lately on the Avon, and more anglers have been seen out than at any other previous week since the season has opened. The roach are getting into capital condition. and have been taking the stewed wheat and malt well; paste fishermen have also had some decent sport. The fish seem to have left the scours, and the best fish have been taken in the deep waters. The best fish taken have weighed a trifle over a pound. Perch fishermen have been also doing well on the Avon. the worm being the chief bait used. Some of the members of the St. George's Club have taken some very nice fish at Bidford, the majority of the fish running large, and over a pound each. Eels have been running freely at Pershore. On the 19th inst. one angler took a very nice lot. The Avon is now in grand condition for all kinds of angling.

THE Trent is also in grand condition, and those members belonging to the Birmingham clubs who rent water in the vicinity of Alrewas, who have been out during the week, have had nothing to complain of. The roach have left the shallows, and are taking the gentles freely, so are the dace. Several fine barbel have been hooked, but lost, owing to the fineness of the tackle. Some decent perch have been taken, up to a pound each. Eels have been rather quiet. The chub have been rising well to the fly, and these fish seem to abound in great numbers in the Midland Piscatorial water. There are rare prospects in store for the Birmingham clubs who rent water in the Trent this year, as the water has been considerably benefited since it has been better looked after.

SOME capital roach were taken on the 19th inst. from the river Anker, near Tamworth, by some of the members of the St. George's Club, who rent the water here. The largest roach weighed, when dry on the following Monday, 1lb. 8¾oz., and was in grand condition.

A SPECIAL committee meeting of the Birmingham Association will be held on Thursday evening, July 30, instead of the first Thursday in August, according to rule. This will enable the members of the committee who think fit to have a week at the water-side.

NEW PATENTS.

THE following is a weekly list of New Piscatorial Patents, specially compiled for the *F. G.* by Messrs. Hughes, Eli, and Hughes, Patent Agents and Engineers, 76, Chancery-lane, London, W.C., authorised Attorneys for the procuration of English and Foreign Patents, Designs, and Trade Marks:—

11,651.—Arthur Hughes Cornwallis Burrow, of Colne Cottage, Staines, for "An artificial convertible bait for spinning, trailing, trolling or dead bait snap fishing."

11,730.—William Hardy, John James Hardy, and Charles Henry Cook, of Alnwick, Northumberland, for "Improvements in fishing rods."

NOTES FROM LANCASHIRE.

SPORT has been bad; still, however, in the preserved portions of our local resorts, good baskets have been made, in one instance, sixteen trout weighing 10lb.; in another fourteen fish (various) 9lb. Wasp-bait can hardly be said to be in yet, but still a few nests have been secured of small size; the amateur who took one testifies to the vigour of the owners of that particular nest, and wisely determines in the future to leave the excitement of wasping to more experienced hands.

A GENERAL meeting of the Manchester clubs was held on the 17th. The various delegates turned up in goodly numbers and disposed of the business in as short a time as possible. Mr. Chadwick read the minutes of the previous meeting, and also the minutes of the delegates from the various districts comprising the amalgamation; these latter minutes came in for severe criticism from the chairman, who pointed out that Manchester was paying the piper for the whole association. The annual meeting in November will doubtless be of an interesting nature. With other business that of the Northern Anglers' Association took a prominent place, and the delegates were urged to loyally support the N.A.A., and to influence every club to support the same with their money and membership. Angling associations in Lancashire, especially in Manchester, need a reformer or two amongst them--one equal in power to Cromwell would be accepted with open arms. Anyone who could move the railway companies in the matter of concessions would be doubly welcome. Club news this week is very scarce, perhaps owing to the near approach of Bank Holiday. The Ellesmere have had an outing, but the members have wisely withheld the details.

THE Free Anglers have also arranged their annual picnic, and he will be a lucky man who participates in the same. The inter-club contest between the Wellington and Royal Walton, resulted in the capture by thirty-eight rods of four very small fish. The rest of the time, however, was filled up in a more satisfying manner. Pollution had again to be blamed for the failure of this spirited arrangement.

LANCASHIRE anglers will be wise when next visiting Lincolnshire to make conclusive arrangements for their fishing. Warning has been given through a legal gentleman that during the last trip fishing of an illegal character was indulged in, and asking for a donation in condonation, and stating terms for the future. This will have a great influence on the success of the next annual trip. The secretary of the amalgamation (responsible for the trip arrangements) is very amusing in his efforts to saddle the Manchester official with the settlement necessary in this novel position. Hitherto we supposed the fishing free, but it is not, and the best thing is to face the question in a manly way, stump up and be thankful.

NOTES FROM NOTTINGHAM.

BARBEL anglers on the Trent are now in full swing, and sport amongst the fish improves daily. Swims, however, must be baited to yield well. The river at Shardlow seems alive with them, and those who patronise the water early and late, stand, by far, the best chance. On a baiting, on Monday, Mr. Sam Poyson, of the Nottingham Bowling Green Inn Society, landed in the King's Mills district, 41lb. of chub, barbel, and dace, and on the following day he again scored heavily amongst the same class of fish. He was accompanied by Mr. W. Dupe, of the "Lace City," and the two had the benefit of the sound advice of J. Theaker, the well-known Nottingham professional. Mr. T. Wood, the lessee of the fishery, has fared well at the "Lane End" swim, and I hear that Mr. George Wood, his son, has weighed in a very heavy chub at the Wellington Society's rooms. Members of this body have been out in force during the past fortnight, and at the last meeting a fair sample of chub, dace, barbel, and eels was shown by Mr. J. Spray, brother of the hon. sec. Most of them frequent Shardlow, King's Mills, and Weston; others preferring Kelham and Hoveringham. A portion of the Hoveringham, or rather Kneeton water is in the hands of Mr. W. Gaskell, the president of the society, and it is sure to yield well in the autumn. The bottom weed has grown to such an extent as to become a complete nuisance to the ordinary run of fishermen. Only those who know how to fish the streams properly stand any chance of success, and in their case they rely on the use of the finest possible lines and tackle. Legering seems a favourite pastime, and at every throw the angler, who selects slow-running water, can boast of showing his friends any amount of "carpet lining." Numbers of eels, varying in weight from three ounces to two pounds, continue to be taken by the method, which often enough proves disastrous to the barbel and chub. Fly-fishermen seem a little quiet, and very few takes are heard of. Most of the shallows are lined with surface weed, and unless they wade into mid-stream they are handicapped by reason of the fish seeking shelter and quiet underneath it.

LAST week two gentlemen baited the celebrated "Fitchett's Hole" with two thousand worms in anticipation of getting the fish freely on the feed, but their wishes were not realised, for after a hard day's work, they only landed one solitary fish, weighing. I was informed, between 4lb. and 5lb. They fished the swim from the bank in Mr. Pearsall's meadow, and were naturally disgusted with the result of their outing. No doubt one great drawback towards sport is the fact that three or four large salmon have taken possession of the hole, and whilst these will not look at a bait, their presence has a tendency to drive away other fish of smaller dimensions. Years ago the hole was unquestionably one of the finest barbel resorts on the whole length of the Trent, but in recent times it has, like most other swims, been over-fished. Anglers frequenting Mr. Pearsall's meadow may angle at the rate of one shilling per rod per day, and if they prefer a season ticket the cost is 10s.

ON the north side of the river, the fishery belongs to Sir Francis Burdett, of Foremask Hall, and season tickets, price one guinea each, are issued by Mr. William Collier, of the Green Man Inn, Willington, and by Messrs. Peach and Son, fishing tackle dealers, of Derby. The sum charged includes salmon fishing, and as, with few exceptions, the water extends downwards to within a short distance of Swarkestone Bridge, anglers cannot do better than give it a trial. It contains great quantities of all kinds of coarse fish, and having frequented it for years with varied success, I can thoroughly recommend it.

A NEW angling club has been commenced at Mr. C. Welker's, Chesterfield Arms Inn, Chesterfield-street, Nottingham. Mr. J. King has been elected secretary, and his intimate knowledge with previous clubs should prove of considerable service to the new venture. The worthy host is devoted to pike and chub fishing during the winter season, and already a large number of well-known anglers have rallied round him. Personally I wish the new club every success.

SOME years ago the late Mr. Greville Fennell, of the *Field* newspaper, offered premiums for a roach weighing 2lb., and I believe the condition was that the fish should be caught by fair angling with rod and line. A Nottingham angler, the late Mr. "Jem" Woodward, killed one off Wilford Bridge, in the Trent, weighing 2lb. 3oz. This fish I sent for him to Mr. Fennell, but the premium never reached the "lace city," the reason being that specimens above 2lb. each had already been received. Now I have to state that a specimen weighing 2lb. 10oz. has been caught with the rod, within the last few days, by Mr. Alton, of Nottingham, in the river Welland, at Deeping, Lincolnshire. The fish was shown to several Nottingham gentlemen, and was finally given by Mr. Alton to a friend. It is to be hoped that this friend will have it "set up" as a memento of a phenomenal specimen of its class.

TROUT anglers seem to have fallen off, and news of takes is extremely scarce from the whole of the tributaries, which, like the Trent, are dead low, and of gin-like consistency.

NOTES FROM SHROPSHIRE.

So far as it has gone the result of the inquiries of the Executive and Pollution Committee of the Severn Board of Conservators in reference to the decrease of salmon in the Severn, and upon their report, the action taken by the Board itself at the last meeting at Birmingham, on Thursday in last week, must be eminently satisfactory, and the experiment of extending the close time should do much to remedy the evil. by allowing the spawning fish more facilities for ascending the river. The committee's report goes to prove beyond all doubt that the decrease in the number of fish of late years has been alarming, and the causes assigned are various. The committee deem pollution to be the real cause of the decrease above the mouth of the Vyrnwy; but although river pollution may have something to answer for, it is, in the opinion of many, only one of the lesser evils. In the first place, the river is pure for many miles above Shrewsbury, and in that district are many excellent spawning beds, so that, even were the salmon turned back by a flow of polluting matter above the Vyrnwy mouth on their way to the narrower portions of the river to spawn, they would still have the lower reaches to fall back upon. Whatever may be the state of the river past the mouth of the Vyrnwy, the stream from there to Shrewsbury is pure—so pure in fact that a large portion of the members of the Shrewsbury Town Council desire to supply it to the town for drinking purposes after filtration. There is no denying that the river is polluted by the sewerage of Shrewsbury and other places below to a considerable extent, and the sooner public bodies on the river banks undertake to dispose of their sewerage otherwise than by allowing it to contaminate the river, the better it will be for the interests of salmon fishing and anglers in general. But, in the opinion of many competent judges, the inefficient state of the weirs and over-netting down stream are far the greater evils which have been at work diminishing the stock of fish. The committee advise that no concession should be made to the nets, but that further restrictions should be placed upon them, and in this they made a very wise recommendation, and one which was in the interests of the netters themselves, as well as those who desire to see the river in the upper reaches so stocked with salmon that rod and line angling would be a practicable and profitable sport. There was a long discussion at the meeting at Birmingham relative to the expediency of extending the close season, and some diversity of opinion was manifested, but eventually the upper water representatives carried the day, and on the proposition of Mr. Buckland, of Worcester, it was resolved that the close season should be extended for a month. With this bye-law in force, and the weirs made passable, as it is hoped they soon will be, there should be a decided change for the better in the future of Severn salmon fishing.

THE chairman of the board mentioned at the meeting that some thousands of trout fry had been forwarded to the Shrewsbury Severn Angling Society, and he hoped that the result would be that a large quantity of fry would be turned into the river. Unfortunately, however, as Mr. J. Williams, the hon. sec. of the Severn Angling Society, informed the board, this ova has not hatched successfully, and has not turned out nearly as good as the ova from the society's own breeding fish or that from Mr. Wood. Notwithstanding the failure of the board's ova, however, the society has had a fairly successful year with ova from other sources.

SHROPSHIRE anglers are beginning to wonder what has become of the Shropshire Severn Angling Association. a body which was recently formed by some influential county landowners, and with every promise of success, for the purpose of propagating and preserving trout and grayling in the river Severn within the limits of the county of Salop. At a recent meeting the draft of an agreement to be used between the riparian owners and the association was presented and passed, and it is to be hoped that the promoters of the association are working quietly and successfully in getting this signed formally and arranging preliminary matters before commencing to work in earnest. Shropshire anglers are waiting to see whether the old adage "No news is good news" will be borne out in this instance.

BUSTARD FISHING.

"As soon as the air clears, and we have a few hot days, bustard or moth fishing will be worth following. I know of few things more refreshing than to stroll down to the river in the cool of the evening, to indulge in an hour or two of this kind of fishing. Ten o'clock is quite soon enough to make a start, and before daylight fades it is best to settle upon your ground, and study well all its bearings, for as wading is necessary, a neglect of this important point may lead to disaster. An ordinary fly-rod, not too supple, a check reel, and waterproof silk line must be provided, also a strong 3yd. gut cast. The three best dressings for bustards are as follows:—

"Brown Bustard—Body, fur from a hare's neck, mixed with a little cinnamon-coloured mohair; legs, hen's hackle, of a mottled brown colour; wings, feather from the wing of a dark-brown owl; tag of white leather at the tail; hook, No. 5 or 6, Kendal scale.

"White Bustard.—Body, white Berlin wool, short and full; legs, two turns of a white hen's hackle; wings from the quill feather of a white pigeon; tag of white leather at tail; hook as above.

"Yellow Bustard.—Body, light yellow mohair, ribbed with red silk; legs and wings, a soft hackle, dyed yellow, struck from head to tail; tag of white leather at tail; hook as above.

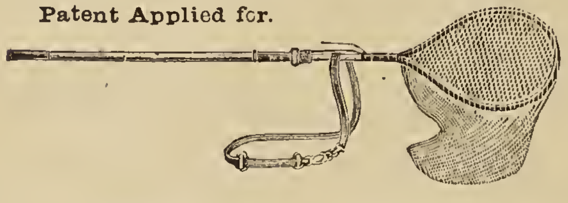
"The flies must be tied on strong gut same as the cast, for the fish must be held with a pretty tight hand. A pair of wading trousers are better than stockings, as you run the chance, in the case of the latter, of getting over the tops in the dark. The best plan is to select some long, flat about 18in. in depth, with a level, gravelly bottom; wade carefully down the centre of the stream, casting on either side. When you obtain a rise, a sudden pull at your rod-top announces the fact, and, as I said before, the sooner you get the fish into the basket the better. Moonlight nights are not considered favourable for this style of fishing; but one when it never really is quite dark, and no mist gathering in the fields, or on the surface of the water."—"*Halcyon*," *in the* "*Leeds Weekly Mercury*."

Geo. CORDING'S
Ventilated Fishing Coats,
TROUSERS, STOCKINGS, BOOTS, BROGUES, BAGS, &c.
125, REGENT ST.; 231, STRAND

S. ALLCOCK & Co., Standard Works, REDDITCH.

Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

Patent Applied for.

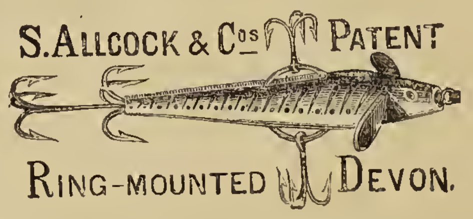


Col Clarke's Patent L. Handle & Net.

Perfectly secured to the Strap, and can be removed in an instant.

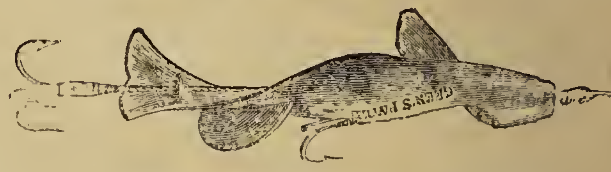
Platt's Patent Fishing Basket.

The New Aluminium Reel.



Patent Inimitable May Fly.

The nearest approach to nature ever yet attained. Bodies in various Patterns.



Geen's Patent Spiral Minnow.

The most Perfect Spinning Bait ever invented.

It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.

CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.

London Office: 60, QUEEN VICTORIA STREET, E.C.

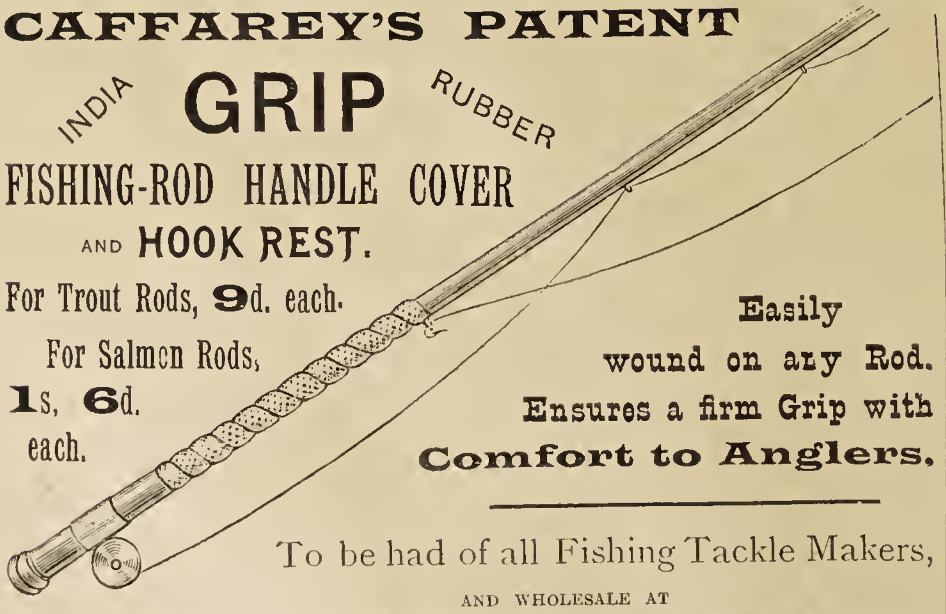
CAFFAREY'S PATENT

INDIA GRIP RUBBER

FISHING-ROD HANDLE COVER AND HOOK REST.

For Trout Rods, 9d. each.

For Salmon Rods, 1s, 6d. each.



Easily wound on any Rod. Ensures a firm Grip with Comfort to Anglers.

To be had of all Fishing Tackle Makers, AND WHOLESALE AT

46 & 47, CHEAPSIDE, LONDON.

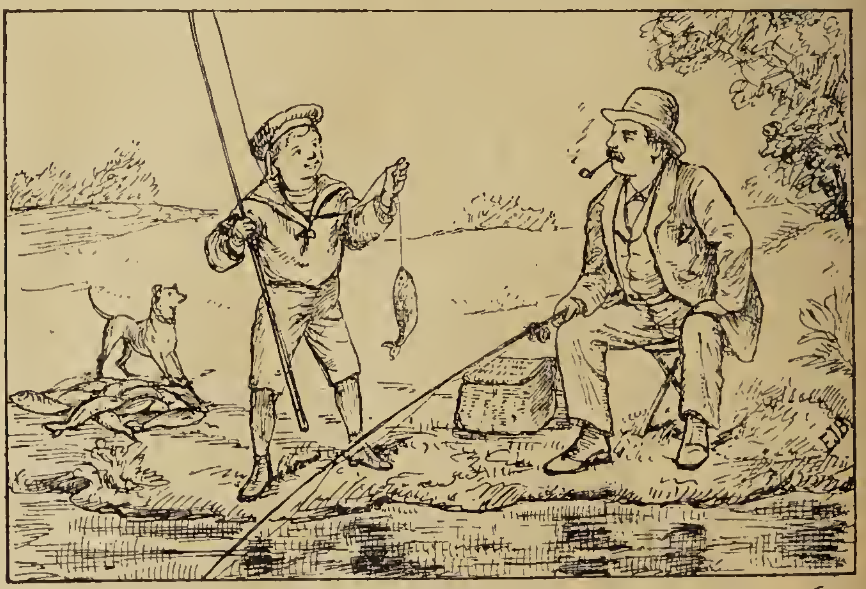
PARKER'S SELF-STRIKING FLOAT.

By Her Majesty's Royal Letters Patent.

A BOON TO ANGLERS.

Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding. No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.



"How is it, Tommy, you catch plenty of fish? but, though I get lots of bites, I can't hook 'em,"

"Well, Uncle George bought me one of **Parker's Patent Self-Striking Floats,** and the fish hook themselves."

Price 2/6 Post Free.

A. PARKER, 20, WALPOLE STREET, NEW CROSS, S.E.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, JULY 25, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night**, *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The delegates assembled at the above, on Monday, the 20th inst., at eight p.m. Mr. R. Murphy occupied the chair. After the minutes of the last delegate meeting, held on 6th inst., had been read and confirmed, the minutes of the last committee meeting, held on the 6th were read, from which it appeared that Mr. R. Ghurney had been instructed to attend the meeting at Norwich, on the 11th inst., to consider the best steps to be taken to defend the public right to sail and fish on the Norfolk Broads, which from time immemorial have been recognised as free to the Crown and its loyal subjects. The chairman next read the minutes of the Renting and Preservation Committee, held on the 13th inst., from which it appeared the committee recognised the great importance of defending angling rights on the Norfolk Broads. The delegates were next called upon to act as a Court of Appeal regarding several matters affecting certain anglers and their clubs. Mr. R. Ghurney gave a short report regarding his visit to Norwich, and referred the members to the supplement of the *Fishing Gazette*, page 49, of July 18th, for further particulars. Messrs. Taylor and Bentley attended, and invited the delegates to a meeting to be held at the Gresham Angling Society's Club-room, Masons' Hall Tavern, Masons' Avenue, Coleman-street, on Tuesday next, the 28th inst., at eight p.m., when Mr. T. J. Woodrow, C.C., Fellow of the Royal Statistical Society, and hon. secretary of the Norfolk Broads Protection Society, will be present to explain the objects of the latter society, as well as to afford information regarding the assumed or usurped rights of the riparian owners of the land adjacent to Hickling and other Broads. The chair will be taken by G. C. T. Bartley, M.P. for the North Division of the Borough of Islington, and various other gentlemen of influence will also attend. An important discussion followed the proposal of Mr. Field, seconded by Mr. Fletcher, to make the Norfolk Broads Protection Society a grant of twenty guineas. Whilst several members preferred waiting until they had had the opportunity of learning more regarding the merits of the case by attending the Gresham meeting, others, supported by W. H. Beckett, vice-president, who had been unavoidably absent at the commencement of the meeting, contended that there was quite sufficient prima-facie evidence to warrant the association in making this grant. After Mr. A. W. Parker had given a brief outline of the case, regarding the claim now being put forward by those wishing to stop the rights of the public, which have been hitherto held without let or hindrance, a division was called and the grant of £21 authorised by an overwhelming majority. Gratuities of £1 each were next voted to sundry lock-keepers on the river Wey. The Clapton Park Angling Society, with twenty-two members, meeting at the Social Club, Clapton-park, was next enrolled, after evidence had been given as to the sizes of fish permitted to be weighed in. The secretary reported that a brickmaker had been convicted of taking fish out of season by means of a net from the river Lea, and fined five shillings, also that he had issued three thousand and thirty-seven railway privilege tickets, which exceeded those issued last year up to same date by sixty-two. The following sixty-three clubs were represented:—Allison United Brothers, Antwerp, Burton Piscatorials, Brompton, Burdett, Bomore, Bostonians, Bermondsey Brothers, Brunswick Brothers, and City of London, Cobden, Crown, Buckland, Clapham Junction, Campbell United, Clissold, Clapton Park, Duke of Norfolk, Dalston, Edmonton and Tottenham, Golden Barbel, Good Intent, Hearts of Oak, Islington Brothers, Kilburn Piscatorial, Lady of the Lake, Midland, Marylebone, North Lambeth, North London, North Western, Original North Lambeth, Odds and Evens, Prince Albert, Rodney, South Hornsey, St. John's, South London, Stepney, South Belgravia, St. Andrew's, Sundial, United Brothers, West Ham Brothers, Westbourne Park, Waggoners, Wenlock, Walworth, Waltonians.—HON. REPORTER.

Anglers' Association, Foresters' Hall, Clerkenwell, E.C.—Free competition (no entrance fee) takes place on July 26, from Slough to Langley Bridge, two rods, roving, for seventeen prizes, previously advertised in *F. G.* of the 18th ult. It will be open to all anglers producing the usual privilege ticket of the Anglers' Association only, and each angler must register his name at the Brickmakers' Arms, Stoke-road, Slough Station. Fishing commences at ten a.m. and ceases at seven p.m. punctual, and winners will be declared at eight p.m. at the appointed house, where the weighing in takes place. Anglers must please note after that time I shall refuse to weigh fish. E. Buildham, Esq., of the Globe Angling Society, has kindly promised to photograph the anglers. Hoping to see many good old friends on this grand occasion, I may mention I have asked the cottage-keepers to supply the anglers with teas cheap, and they charge anglers sixpence for a capital tea. They will take the orders for the teas in the afternoon, and bring it to the anglers. Hoping all brother anglers will not forget this. Tea itself is twopence per pint. Names of stewards appointed to take the names of anglers when catching fish, and the duty of the stewards is to enter correctly the name and size of fish, and the angler's name, so there will be no unfairness to any angler. Stewards: E. Clark, chairman Marylebone Angling Society; W. Harris, secretary Prince Arthur Angling Society; E. Buildham, of the Globe Angling Society; E. Wood, of the Campbell United; T. Harris, Marylebone Angling Society; B. Abrahams, Allason United; T. Corney and W. Arnold, Prince Arthur Angling Society. I hope all anglers who hold the above privileges will compete in this competition. Times of trains which leave Paddington Station (Great Western Railway) on July 26: 8.10, 8.30, 9, 9.20, 10, 10.10, 10.20, and 10.40 a.m. All these trains stop at Slough. All further information can be obtained at the Brickmakers' Arms on the morning, of Benjamin Abrahams, jun., judge and referee to the above competition.

Anglers' Association.—EASTERN DISTRICT No. 1.—The next return visit will be to the Havelock, General Havelock, West-street, London Fields, on Monday next, July 27. Friends who will give us a look in on that occasion will oblige.—G. MANNING,

Anglers' Association.—EASTERN DISTRICT No. 2.—The next return visit on the above list will take place at the Crown annd Buckland Angling Society, on Wednesday, July 29, when I hope to see all the clubs on the list represented by nine o'clock, and so give them what is intended by a return visit—a bumper.—F. THORLING.

Anglers' Association (SOUTHERN DISTRICT) VISITING LIST.—A next return visit on the above list will take place on Tuesday next, the 28th inst., at the Original North Lambeth A. S., Wellington, South-street, Hercules-buildings, Westminster Bridge-road, where I hope to see a good muster of brother anglers.—G. W. ARMSTRONG, District Officer.

Anglers' Benevolent Society, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—Since my last report I beg to acknowledge with thanks the receipt of five shillings, donation from S. Wertheim, late Brunswick Piscatorials.—R. GHURNEY, sec.

Aberdeen Amateur Rock Fishers' Association.—The holiday competition was held on Saturday, when there was a large muster of members at the favourite spots around Muchalls, Newtonhill, Cove, and Portlethen, and very good baskets were obtained, but owing to some cause or other, most likely the irregularity of the arrivals, only three members weighed in. In all probability the competition will be cancelled, and come up again later on.—G. M.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—We had a good muster of members turn up on the 21st. Fred Roberts proposed E. Merritt as working member, and he was duly elected by the members present. The most important business was the change of meeting night. It will now be Wednesday instead of Monday. Secretaries please copy. I wish to remind all anglers who compete in the great competition on the 26th, to enter their names at the Brickmakers' Arms, Stoke-road, Slough, and number of privilege ticket. Fishing starts at ten a.m., ceases at seven p.m., and eight p.m. is the very latest the fish will be weighed in, and winners will then be declared. B. Abrahams, referee and judge.—B. ABRAHAMS, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—The following members weighed in on the 19th inst., viz., Mr. Harding, roach, dace, and perch; Hutchins, roach; Farebrother, dace; Potter, dace. The four prizes are to be fished for on the 26th inst. All members to go where they like but they must go on the same morning.—J. H. POTTER, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Several members were out on the 19th inst., and the following weighed in: Mr. James had a very nice show of roach and bream from Woking; Mr. King had chub, roach, and a very nice tench, 1lb. 5oz., from Windsor. Four of our members fished in the Amberley Competition, but did not reach the required weight. Our next outing will take place at Woking on the 26th inst., jack barred.—J. RICH, sec.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—On the 19th our members were out in strong force, and the trays of the society were well filled with a very nice show of fish, contributed by the following members: Mr. C. Irwin, having a very fine show of bream; Mr. G. Merry, a handsome tray of rudd and tench; Mr. Lattimore, a fine show of roach; Mr. Embleton, sen., some nice roach and perch; Mr. Embleton, jun., roach, dace and perch; Mr. Humphreys, roach and bream; Mr. W. Hake, roach and bream; Mr. Lambarth, jun., roach and bream; Mr. Reeks, roach. We have enrolled four new members, and have to ballot for two more, and are still open for a few more working members. Members are particularly requested to attend to decide where our annual dinner will take place.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The usual weekly meeting was held on Wednesday night, with a fair muster of members present. Our lucky member, Mr. Tom Simpkins, managed again to secure the second prize in the South London match at Amberley, on the 19th, with 3lb. 6½oz. bream. Mr. Scott weighed in barbel and dace, 4lb. 8¾oz.; Mr. Palmer, gudgeon, dace, and roach, 4lb. 6¼oz.: Mr. Bowling, dace and gudgeon, 1lb. 4½oz. I have no doubt that on Wednesday next the photos will be to hand.—A. G. SMITH, sec.

Battersea Friendly Angling Society, Queen's-road, Battersea.—The members of this club fished a match (roving) on the 19th inst., with the following results: Mr. J. Ancliff, first; Mr. G. Mumford, second; Mr. C. Wastell, third; Mr. W. Wastell, fourth; Mr. G. Mumford also took the first prize in the South London Competition at Amberley. The next match will take place on August 2 and 3 (both days to count), for six prizes, value three guineas; all fish to weigh; roving. On Tuesday we made seven new members, making twenty since the opening season. Members are requested to attend on Tuesday next, as several extra prizes are promised for the Bank Holiday Competition.—G. MUMFORD, sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—Several of our members took part in the South London Visiting List Competition on the 19th, two of them being successful—viz., Mr. J. Smith, fifth prize, and A. Conn, ninth. On the same date Mr. W. Streeton weighed in a handsome show of bream, 26lb., five fish, weighing over 21lb., largest fish, 4lb. 7oz.; Mr. Metcalfe, carp: and Mr. Allum, perch.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—On Wednesday Mr. W. Roeszler was proposed as a working member, and will be balloted for next week. Gentlemen attending the match on the 26th will go by the first train on the South-Eastern Railway. Late arrivals must report themselves to the referee, Mr. Aaron, before commencing to fish. Cease fishing at seven p.m. There was a nice show on the 19th inst., the following gentlemen weighing in:—Messrs. Foster, bream and roach; F. Roberts, bream; J. Barker, carp and roach; and F. Barker, rudd. We had a crowded room on the occasion of our visit on Tuesday last, nineteen clubs answering to the roll. I hope members will rally round Mr. Deplidge on Monday next, July 27, when he will read a paper on the Wey and its surrdundings, before the members of the Causton A.S., at the Coffee-Pot Tavern, Warwick-lane, Ludgate-hill, at nine o'clock.—F. ROBERTS, hon. sec.

Bostonian Angling Society.—The first outing of the season came off on the 19th inst., when we journeyed by brake to King's Langley. The members were photographed before starting by our old and esteemed member, Mr. J. Taylor, assisted by Mr. Spalding, likewise. There were six prizes given to be competed for—the first, one guinea, being for the largest fish taken on the day, was won by Mr. Rundle, with chub; the second, ten shillings and sixpence, gross weight, was won by Mr. Jamieson, with roach. The other four prizes were not won. After the competition the members and friends sat down to a capital repast, prepared by Mr. Markitt, host of the Bell Inn, King's Langley, and was done justice to in an angler-like manner. The day was a most enjoyable one, and the members look forward to many such jolly gatherings. Mr. Chapman had tench from other waters.—J. H.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—On the 19th inst. we had some good takes of fish brought up by the following members: Mr. F. Briggs, tench; Mr. E. Briggs, perch; Mr. Ducker, chub; Mr. G. Ducker, chub and dace; and Mr. Aitchison, chub and dace. On the 23rd, Mr. Brown aud Mr. J. Hall brought up a very nice lot of roach and dace. Members will please vote that Wednesday, 29th inst. is quarterly night, when there is some very special business to be done.—H. ROACH, secretary.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—We fish a pegged-down match on the 26th inst. at Dagenham Gulf. A brake will leave the club-house at midnight on Saturday. Fare, one shilling, there and back. Five prizes to be fished for; all fish to weigh (sizeable, of course); one rod only; Messrs. Wilson and Mearing will peg out the swims.—T. HAWKES, secretary.

Burdett Angling Society, 118, Hackney-road.—Several of our members were out on the 19th, and some good fish were brought home: Mr. J. Pether had 7lb. 14oz. roach, bream, and dace; Mr. Donald Flint, 6lb. 12oz., roach, dace, and bream; Mr. B. Mellor, bream, 2lb. 1½oz.; Mr. Green, 7½oz. ,dace. I hope our members won't forget to come up next meeting night, as we want to arrange to go out for a batch of prizes as soon as possible.—J. PETHER, sec.

Burton Piscatorials, the Globe, Derby-street, King's Cross.—On the 19th inst. our trays were fairly patronised with mixed shows of perch, bream, roach, dace, and gudgeon, contributed by Messrs. Biggs, sen., Biggs, jun., Roberts, Butler, and Sturman. A special meeting is called for July 29th.—C. ROBERTS, hon. sec.

Buxton Brothers' Angling Society, Walthamstow Liberal and Radical Club, 4 and 6, Buxton-road.—Members are informed that our first match will take place on August 9, when it is hoped that all members will be present, so as to make it a success.—A. SHUKER, sec.

Caledonian Angling Society.—Since my last report the following members have been out and weighed in some very good takes—viz., Mr. A. Knock, upon one occasion, 11¾lb., roach, and dace, including a specimen dace of 11¾oz.; and upon another occasion, 10lb. 10oz., roach and dace, this time including a handsome roach of 1lb. 9oz., and two dace over ½lb. each; Mr. W. Whitlock, 6lb. 4oz., rudd; Mr. R. Mills, upon one occasion, 6lb. of carp; and upon another, 9¼lb. of the same fish; myself, upon two outings, carp, 15lb. 9oz. and 7lb. 14oz. Members are earnestly requested to attend on Thursday evening next, the 30th inst., to arrange for the annal outing and dinner, and also to fix a competition for prizes in hand.—A. GEORGE, sec.

Cambridge Friendly Angling Society, Masons' Arms, Titchborne-street, Edgware-road, W. — Three prizes were taken at Yalding on the 19th inst., by Messrs. Wilson, Allen, and Scutt. The remaining four prizes will be added to a future outing.—W. SUTTON, sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 19th inst. the following members weighed in: Mr. A. Chapman, tench; Mr. C. Chapman, tench and roach; Mr. King, roach; Mr. Sharp, roach; Mr. Fitter, roach. Our next brake outing will take place on Sept. 6, place to be decided next week.—E. T. WHITE, sec.

Campbell United Angling Society, High-road, Kilburn.—Our trays were well stocked with fish again on the 19th inst., contributed by Mr. J. Smith, bream; Mr. Hunt, bream; J. Tanner, tench; R. Smith, roach; E. T. Lake, tench and roach; and Mr. Wood, tench and roach; Mr. J. Smith and J. Tanner winning second and third prizes left from the outing.—E. W. WOOD, hon. sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—Monday, July 20, Mr. J. Deplidge in the chair, the attendance was fairly good, and included Mr. Birkett, of the Earlsfield A. S., and Mr. F. Ryan, of the Kenningtonians. The chairman started a discussion upon "Roach, Bream, and Rudd," in which Messrs. Harry Dunn, Birkett, Ryan, Tom Keeble, A. Sowerbutts, J. S. Pulsford, and the secretary took part. With regard to sport, Mr. Tom Keeble is at the top of the tree this week, with a 4lb. bream, and a roach-bream, 2lb. Mr. Henry J. Tibbatts has kindly consented to take the chair at the meeting of this society on Monday, July 27, when at nine o'clock Mr. J. Deplidge will read his paper, "An Account of the River Wey." Numerous cards of invitation have been posted, but in the event of any omissions, brothers of the rod and line will please accept this invitation as a *quid pro quo*.—JOHN SMITH, hon. sec.

Central Association.—A special meeting and smoking concert will take place at the Bedford Head Hotel, Maiden-lane, Covent Garden, on Monday next, 27th inst., at nine p.m., when the prizes taken in the recent Pulborough Competition will be handed to the respective winners. Anglers and friends are cordially invited to be present.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—The following weighed in on the 19th: Mr. Garbrecht, roach and tench; Mr. Macdonnell, bream from Amberley, 7lb. 2oz.; Castell, bream from Dagenham Lake. Our visit on the Clerkenwell and District List was on Tuesday evening, Mr. Burwash in the chair, the following fifteen clubs being represented—viz., Lincoln, Crown and Buckland, City of London, Independent Brothers, Rising Sun, Seymour Brothers, Eustonian, Amicable Waltonians, Islington Brothers, Bloomsbury Brothers, Alma, Burton Piscatorials, North London, Royal George, and Midland. The next will go to the Independent Brothers, at the Three Doves, Berwick-street, Oxford-street.—CAS.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—On the 17th inst. Mr. Edwardes weighed in 13lb. 14oz. roach and dace. On 18th, Mr. Trowbridge, tench and roach, 1lb. 15½oz., one tench, 1lb. 8½oz. On 19th we had a splendid show of specimen fish by the following members: Messrs. J. W. Jameson, jack, 6lb.; G. Jameson, one bream, 4lb. 5¼oz.; Scott, 6lb. 2oz., carp, one carp, 3lb. 5¼oz.; Painter, chub and bream, 7lb. 1½oz., one chub, 2lb. 12oz.; and Turner, roach, 2lb. 7oz.—A. TROWBRIDGE, sec.

Clapton Angling Society.—A meeting was held at the club-room, Weyland Hotel, Weyland-avenue, Dalston-lane last Monday evening, Mr. Oliver in the chair. It was resolved to request the special attendance of members at next Monday's meeting to consider matters of importance. As some members think that it would benefit the society to make a fresh departure on new lines, it is hoped that every member taking an interest in it will attend. A new member was proposed by Mr. Colls, and a most enjoyable hour or so was then spent in the discussion of angling reminiscences.

Clerkenwell and District United.—The clubs enrolled on the above will compete in the Medway on July 26 for money prizes, which will be paid over to the winners immediately after the match. Book to Yalding by the 7.10 a.m. train from Cannon-street. Competition tickets only to be shown at the pay box, by which means they will get a reduction of elevenpence off the angler's fare. Mr. Burwash will give a prize. I was much surprised to find in the *Fishing Gazette* last week a notice of another big competition to come off the same day. We have always done our best to avoid two visits coming together, also competitions. Who is responsible for this muddle? Our date has been announced several weeks. It is not fair to the nineteen clubs on our list, and not good business.—F. Castell, hon. sec.

Cliftonville Angling Society, Cliftonville Hotel, Ilderton-road, South Bermondsey.—The society will hold their first pegged-down match on the 26th inst., from the bridge at Ware to the Lock.—W. W. Andrews, sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—We fished a club match at West Drayton on July 19, and the winners were as follows: T. Twyman, J. Slicks, W. Hill, C. Young, F. Hannabus, J. Godfrey, C. Stone. F. Caddle, E. Baxter. There were three prizes left for the 26th instant, under same conditions.—A. Smith, sec.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—On Wednesday, the 22nd, Mr. G. Sharpe was duly elected an active member of this club. Several gentlemen have been out, but with the exception of Mr. E. Day, who had a nice bag of roach from Pangbourne, nothing much has been taken.

Crown and Buckland United Piscatorial Society, Middlesex Arms, Clerkenwell-green, E.C.—The following members were out on the warpath on the 19th, and made a grand show: Mr. Walters, with 6lb. 10½oz., of bream, roach, and perch; W. Long, roach and dace; H. Long, roach; G. Norris, dace. I may as well mention that a return visit will take place at the above on Wednesday, July 29, when we hope to see as many as can make it convenient to attend. Chairman, Mr. G. Norris; vice, G. Franklin. Mr. Burwash and Mr. Draper's prize will be fished for at Yalding on the same terms as the Clerkenwell and District United Competition, and the same day, July 26.—G. Rogers, sec.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 19th instant, Messrs. Wild, Hills, W. Midson, Towndrow, Cogswell, Killick, Parram, J. Edwards, W. Edwards, and Redwood had a very fine show of bream, roach, perch, and dace. On Tuesday, the 21st, a series of prizes for honorary members were decided on, and they will receive full particulars by post.—S. Malby, sec.

Earlsfield Angling Society, Half-way House, Earlsfield, S.W.—The firt outing of the season took place on the 19th inst., with the following result: Mr. Rowsell, first, carp, 3lb. 7½oz.; Mr. Bird, second, roach and bream, 2lb. 3½oz.: Mr. Waterman, 7½oz. A two days' roving match takes place on Aug. 2 and 3, for the sum of £1 1s., and 1s. sweepstakes for every competitor, to be divided into four prizes. All names to be given in by next Wednesday, the 29th inst. The terms are bank and public water only, and the fish can be weighed in both on August 2nd and 3rd or both days' takes together. All fish to weigh. I hope to see as many members as possible turn out for this two days' outing, and a show on Bank Holiday night at the above house.—R. W. Bird, hon. sec.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road, E.—We fished our first competition at Twickenham, on Thursday, July 16. The stipulated weight being 3lb. to obtain a prize, none of our members reached that weight, so no prizes were taken. During the temporary absence of the puntsman, our president was much annoyed by one of the genus "loafer" who hang about fishing stations, in this case not only seeking, but demanding "backsheesh," accompanied with bad language. Three of our members and three friends drove to Dagenham on the 19th. No fish, but a deal of wet.—Frank Woods, sec.

Funny Folks Angling Society, Rose and Crown, 21, Goswell-road.—On the 19th inst. the following weighed in a nice show of fish: Messrs. Biggs, bream, dace, and roach; F. Vanhegan, bream and dace; and S. Hill, bream, dace, and perch. We have made several new members and still have room for some more. Our worthy host, Mr. A. A. Eldridge, is much better and will soon be about again.—J. W. Biggs, sec.

General Post Office Angling Society, Post Office Hotel, Noble-street, E.C.—At our meeting on the 23rd inst., we had a very fine show of fish, Mr. Witmore producing some roach, several exceeding 1lb. in weight. A special meeting will be held on Thursday, July 30, for the purpose of electing a new committee, when it is to be hoped that all members taking an interest in the welfare of this society, will endeavour to be present. A competition will be held on Thursday next, July 30.—L. W. Dornne, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We had a fair show of fish on the 19th inst.: 18lb. of roach, perch and bream, taken by Messrs. Slade, W. Lawrence, Ellis, Snow, and Evans. Other members were out, but not successful.—A. Payne, sec.

Great Eastern Angling Society, Castle Inn, Leyton-road, Stratford New Town.—At our meeting on Tuesday, the 21st, Messrs. W. Savage and W. Creeke were elected working members of the above club. It was also decided that a pegged-down match take place at Cheshunt on August 16. On the 19th inst., Messrs. F. Bates, W. Carr, and A. Wheeler weighed roach, perch, dace, and bream. —G. F. Weaver, sec.

Great Northern Brothers Angling Society, Robin Hood, Southampton-street, Pentonville, N.—On the 19th inst., J. Hewitt weighed in a nice lot of tench and bream weighing 23lb. 5oz. Messrs. W. Parkin, J. A. Fitch, C. Large, C. Watling, junr., and W. Theobald, had small hows of dace, roach, and bream.—J. A. Fitch, sec.

Gresham Angling Society.—The usual weekly meeting was held on Tuesday, presided over by Dr. Brunton, M.D. The secretary read an article from the *Sportsman*, written by Mr. J. P. Wheeldon, entirely confirming the statement made by Mr. Tayler, that Mr. Joseph Woodard, a member of the Gresham Society, is the champion roach fisher of England: and Mr. Wheeldon also says Woodard considers his match days are over. Having held the championship twenty years, he may well be content to rest on his laurels; but, in order that the angling spirit may be revived, Mr. Wheeldon offers a ten-guinea challenge cup to be competed for. Mr. F. R. Ohlson added to the library of the society a set of valuable engravings of aquatic birds, for which he was heartily thanked. A member reported that he had that afternoon seen thousands of roach and dace floating down past Kew Bridge, dead and dying, apparently having been poisoned, it is supposed from some dye works farther up the river. It was stated a short time ago, on the authority of a river-keeper, that the death of many fish lately had been caused by the hot weather, and the quantity of fresh water coming down; but what the latter cause had to do with it is not very apparent. Whatever the cause may be, it is certainly a matter the Thames Preservation Society should inquire into. A paper of an exceedingly valuable and interesting kind was read by Mr. E. H. Bramley, entitled "Babble about London," in which very many of the points of interest—such as the gates, the taverns, and the bournes, were dealt with, and the history of some of them for the last seven or eight hundred years was graphically put before the meeting. Although the paper had no special connection with angling, the writer, from the unusual facilities he has had for acquiring his information, and from the able manner in which he put it before the audience, fairly delighted them, and it is hoped he will shortly continue the subject. A hearty vote of thanks was accorded him.

Havelock Angling Society, General Havelock, West-street, London Fields, Hackney.—I beg to inform you that on July 19, Mr. Young, sen., and Mr. Young jun., and Mr. T. Thompson had a fine show of roach and dace. Members of societies will please take notice that on Monday, July 27, the next return visit of No. 1 District will take place as above. We shall be pleased to see as many members and friends as can attend, as we expect a host of talent to be present.—T. Thompson, sec.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 19th inst. many of our members were again enjoying themselves at the good old sport, many of whom were rewarded for their pains, Mr. Callcutt had a nice show of bream; Walford, roach and bream; Rider, perch; Saalfield, roach and perch; Russell, roach; and Fish, bream; and one of our new propositions, Mr. H. Bagshaw, showed himself to be a promising young angler. Messrs. Geeves and Levoir brought home a curiosity show from the sea.—W. Fenner.

Highbury Angling Society, Hornsey Wood Tavern, Seven Sisters-road, Finsbury Park.—We had a splendid show of bream on Thursday, 16th inst., taken by Mr. Rutherford, weighing 14lb. On the 19th inst., Mr. Monty had some excellent barbel and chub from the Thames, in all, 16lb. I hope all members will send in their names for the sweepstake that is to take place on the 16th of August, at Amberley, as soon as possible.—J. H., sec.

Hoxton Brothers Angling Society.—On the 19th inst, A. Hattemore weighed in a few nice roach. The annual dinner will take place at Rye House, on July 26. —R. Ghurney, sec.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street, W.—We proposed three new members on our last meeting-night (Messrs. Pryer, Richards, and Peacock), who will be balloted for on Thursday, all being well. On the 19th inst., Mr. Davis showed bream, roach, and gudgeon; and Mr. A. Pain roach, dace, and perch. We shall be fishing off a match early in August. I should like all those absent members to understand, so that if they wish to qualify themselves for it, they had better put in an appearance as soon as possible. I believe that the next visit on the C.D.V. List comes to us. Invitations will follow in due course, as soon as we decide on the night, and very probably our esteemed friend, Mr. Harding, will give us his reading on that occasion.—Snap.

Islington Angling Society, Jubilee House, Hornsey Rise, N.—Mr. C. S. Bentley took the chair at the meeting on Monday evening last, when, the ordinary business having been transacted, the discussion on fishing lines (commenced at the last meeting) was continued, special attention being given to those suitable for fly-fishing. The question of the right of the public to angle on the Norfolk Broads was also before the meeting; and, in this connection, members are particularly requested to note that a public meeting, to discuss—and take means to prevent if possible—the threatened closure of these prolific waters, will be held at the Gresham Angling Society, Masons' Hall Tavern, Coleman-street, E.C., on Tuesday, the 28th instant, at eight p.m., when Mr. G. C. T. Bartley, M.P., president of the Islington Angling Society, will take the chair. All gentlemen interested in maintaining the right of the public to fish these magnificent pieces of water are invited to attend.—C. S. B.

Islington Brothers Angling Society, Myddelton Arms, Canonbury-road.—We met on Thursday last, when it was arranged that we should move the club to the Myddelton Arms, Canonbury-road, on Friday last, the 17th inst., which was executed without any damage being done. The members showed up in strong force on the 19th inst. Several of our members were out on that day, but did no good. We have very comfortable quarters, which of course is everything. We have room for a few more members.—J. H. Herbert, sec.

Izaak Walton Angling Society.—A portion of the members dined at the Pied Bull, Stanstead, St. Margarets, on the 19th inst. Twenty-five sat down. Mr. J. Lyndsell served the dinner in his usual very nice manner. The members competed for four special prizes on Wednesday, 22nd inst. Mr. C. Hayward secured first honours; Mr. T. Harris, second; Mr. H. C. Wheatley, third; Mr. J. Featherstone, fourth. There are four specials to be fished for on the 26th inst., at Pangbourne; no competitor to leave London before the morning of the competition, and fish from the towing-path only. Two members and a friend had a day amongst the tench, on Tuesday last, 21st inst.; Mr. T. Harrison had the good fortune to get three nice specimens, which scaled 10lb. 15oz., also a nice rudd, which weighed 2lb. 4oz.; Mr. H. Butt also had three tench, scaling 9lb. 4oz. The whole of the above are being preserved, and will be added to the club collection.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—On the 19th inst. we fished a pegged-down match at West Drayton for four prizes, the result being as follows: First, Mr. Beales, with roach and gudgeon; second, Mr. Mathews, gudgeon; third, Mr. Warner, roach and gudgeon; fourth, Mr. Tomkins, gudgeon.—A. Ide, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—During the past week our members have been out and weighed in very fair shows of bream, perch, roach, dace, &c. We are pleased to find that our higher standard size has up to the present not prevented previous records being kept up.—T. Salter, hon. sec.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 19th inst., a few members were out, the following weighing fish: Mr. Blygh, roach and dace; Mr. Webster, dace and gudgeon; Mr. Belton, roach and dace; and Mr. Holmes, tench. On Wednesday last an outing was arranged to take place at Pulborough on August 23, for several prizes; association waters only. Two members of the above society were successful in getting a prize in the Central Competition. Mr. Adshead was unanimously elected a working member of the above.—W. Watling, sec.

Liverpool Angling Association.—At our last weekly meeting two nominations for membership were made. It was resolved that there be the usual excursion on the August Bank Holiday to the Vyrnwy, at Llanynynech, full arrangements to be made at the next meeting. It was also resolved that, considering the time and cost, we do not send a representative to the contest for the Marston Challenge Cup, presented to the Provincial Angling Association by Mr. Marston, of the *Fishing Gazette*. We regret this, as we should, in honour of the doner, have been glad to compete, but Tewkesbury is a long way from Liverpool, and the P. A. A. declined to meet us in the matter of expense. All things equal, our representative would have troubled the winner.—R. Woolfall

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On the 19th inst. our members were at various waters, and we had some good shows of bream, tench, and roach, by Messrs. Penfold, Pearce, Clarke, Barnard, and Grey. On the 26th, a number of our members go to fish in the Slough Competition.—W. F. Pearce.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—We had a very good attendance of members on Tuesday evening, and another outing was proposed, open to all new members, so I hope to have a good attendance on that day. We had another new member proposed during the evening. I hope all gentlemen desirous of joining will do so at once.—J. Comber, sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park, N.W.—On the 16th inst., Messrs. Schultz, sen., perch; Schultz, jun., roach. One new working member elected, and another gentleman proposed. Our annual outing for prizes takes place at St. Margaret's on August 30. One rod; roving; all fish to weigh bar jack. On the 19th we had a handsome show of tench by Messrs. Plumpton and North.—G. Schultz, chairman.

Original North Lambeth Angling Society, the Wellington, South-street, Hercules Buildings, Lambeth, S.E.—On the 19th inst. only two of our members were out, both weighed in roach and dace. On Tuesday we attended the visit at the Blackfriars. On Tuesday next we receive a visit from A.A.L., when I hope to see a good number of clubs represented.—J. Mann, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—We had a nice show of fish on the 19th inst.: Mr. Gardham, with a bream of 3lb., taking the fourth prize in the South London Competition, at Amberley; Messrs. Duke and Stidolph also showing some good fish. A match will take place on the 26th inst., open to members who leave town that morning only.—A. G. Drake, sec.

Phœnix Angling Society, the Crown, Pancras-road, N.W.—On the 16th instant we had a very nice show of roach, bream, and perch, the prizes being won by Messrs. Reed, Carr, and Elbourn, several other members weighing in fish. One prize will be angled for on the 26th at Uxbridge; and on August 2 and 3 four prizes—viz., Mr. Ben Forster, 30s.; Mr. Brown, 25s.; club, 20s.; Mr. Homan, 10s. 6d.—will be angled for by the members; all to go where they like, and the best shows to win. On Tuesday last we had a very jolly evening, three new members being made and several more proposed. All members are requested to attend next Tuesday, as we are expecting a nice show of fish.—W. Elbourn, sec.

Piscatorial Society.—There was a good attendance at the meeting of the above society last Wednesday evening, it being the last evening but one of the Barbel Competition for the Society's Silver Cup for the heaviest weight, limited to six fish. Among the successful competitors came Mr. Foreman, sen., with a nice show, largest fish 4lb.; Mr. P. Dewar Head, largest fish 4½lb.; Mr. M. G. de Courcy, largest fish 5lb. 8½oz. It is expected there will be a good attendance next Wednesday, as it will be the last day of the competition and several members have decided to compete.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—On the 19th inst. our members went to Cookham to finish the match, with the following result: Mr. W. Buck, second prize; Mr. Rodber, third; the fourth not being taken. On Wednesday we had a first-class meeting, and had the pleasure of electing four new members. I hope to see a good muster of anglers at Westbourne Park Station on the 26th inst., to take part in the competition at Slough.—J. W. Harris, sec.

Prince of Wales Angling Society, the Globe, Lisson-grove.—On the 19th inst. forty-three of our members were pegged down in the Slough Canal, to compete for seven prizes, given by the society. The following were the fortunate ones: Messrs. Stanniford, Wilson, Davy, Robbins, Norris, and Neal, thus leaving one prize for the 19th inst., under the same conditions. The first prize-winner, Mr. Stanniford succeeded in catching a fine roach, which turned the scale at 2lb. 3¼oz., which was much admired by a great number who saw it. I need hardly say that the fish has gone to be cased, as a fish of that weight is very rarely caught. Members are requested not to forget the match which takes place on the 26th inst. in the Slough Canal, given by the landlord of the Brickmakers' Arms as above, and I hope some of our members will be in it.—W. B.

Queen's Angling Society, the Latimer Arms, Walmer-road, Notting-hill.—On the 19th we had a good show of roach, dace, and perch by Messrs. Pearce, Messenger, jun., Messenger, sen., Cook, Thorburn, Edgington, Fathers. Members are requested to attend on July 30, to make arrangements for next outing.—F. G. Pearce, sec.

Richmond Piscatorial Society.—The annual summer dinner of this society took place on Friday evening last at the Castle Hotel, near to Hampton Court Railway Station. In the unavoidable absence of Mr. Montague Davenport, C.C., the popular chairman of the society, it was efficiently presided over by Mr. C. W. Potter, who was supported by Messrs. W. H. Brougham, Harry Davis, G. H. Wright, E. V. Powell, F. W. Perkins, E. Pallant, W. C. Shillito, H. Heath Hebbs, H. H. Holt, F. Rains, W. Spooner, H. Clark, T. Clark, J. Poupart, W. Jones, J. Castle, J. Hansley, C. Davis, W. Reeve, G. Bennett, and W. Wareham. The popularity of Mr. John Mayo as a caterer accounted for the dinner being held at the hostelry, and every satisfaction was expressed by those present at the general excellence of its service; the attendance also being much larger than was expected, and the tables had to be extended to meet the requirements. It is not customary on these occasions to have any formal list of toasts, and after the loyal one, that of "Success to the Richmond Piscatorial Society" was given by the chairman, who, after expressing regret at the indisposition of Mr. Davenport, briefly asked those present to do honour to the toast, which was responded to with great enthusiasm. Shortly afterwards, Mr. E. V. Powell proposed "The Thames Angling Preservation Society," and in coupling the name of Mr. W. H. Brougham, referred to that gentleman's long connection with their own society, and he would be afraid to state the number of years he had so long and honourably occupied the position of secretary to the T.A.P.S. The toast having been drank with musical honours, Mr. W. H. Brougham replied, thanking those present for the compliment they had paid him in the reception of his name, and hoped the work he had done during the last thirty-three years in connection with the river had been of benefit to all classes of anglers. The remainder of the evening was spent in harmony, under the direction of Mr. C. W. Potter, who had previously undertaken to do so, and his services in that direction are always much appreciated by the members. The singing of Mr. W. Harding, Mr. W. Andrews, Mr. F. Perkins, and Mr. Potter himself were much applauded, Mr. W. Wareham ably presiding at the pianoforte.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On the 19th inst. we had a very nice show of fish, consisting of roach, dace, perch, and rudd. The following members weighed in: Messrs. A. Barclay, F. Barclay, J. Stanloy, E. Perry, G. Barclay, Barrow, J. Holden, Denyer, J. Yeo, G. Yeo, Henson, and Sallnow; total, 52lb. 13oz. On Tuesday, Mr. A. Barclay had a nice show of fish (20lb. 9½oz.) of chub, roach, dace, and perch; heaviest chub, 3lb. 14½oz., 2lb. 13oz., and 2lb. 8oz.; heaviest roach, 3lb. 4¾oz.; heaviest dace, 12oz., which made a nice show. Members, please note that fish can be weighed in on August 2, 3, and 4 as one day. We made one new member on Tuesday.—A. Barclay, sec.

Rodney Piscatorials, Rising Sun, Harper-street, New Kent-road.—The return visit on the A.A. on the 14th was a success, when twelve clubs answered the roll call. The next monthly outing takes place on the 29th, at Amberley, start from London Bridge at 6.55 a.m. The following members weighed in on the 12th: Messrs. Wigley, bream and dace, 6lb. 4¼oz.; F. Lamberton, sen., bream and perch, 2lb. 2¾oz.; Davis, roach, dace, and barbel, 5lb. 11¾oz.; F. T. Lamberton, 9¼oz. On 19th, Mr. J. Clark weighed in a splendid show of bream, weighing 13lb. 2oz.; also Mr. Ulling, with a similar show of 10lb. 10¾oz., largest bream, 3lb. 5½oz.; Messrs. Naylor, chub and perch, 2lb. 1½oz.; F. Lamberton, sen., bream, 2lb. 5¾oz.; F. T. Lamberton, 2lb. 5¾oz.; Davis, barbel, 1lb. 14¼oz.; Markins had a very fine roach of 1lb, 6½oz.; Mitchell, roach and dace, 1lb. 1½oz. —F. T. Lamberton, sec.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—Our return visit on the Anglers' Association took place on the 15th inst., but I am sorry to say was not such a success as anticipated, only seven clubs being represented. I have to thank those gentlemen who kindly amused us during the evening: Messrs. Clark, Buck, Shaw (Golden Barbel); Brett, Elmes, King (Midland); Jennings (Bostonians); Holder, Gibbons, Hyde, &c. (Royal George); Ivermey, Clark (Prince of Wales); Liversage (Independent Bros.); and Mr. Ellens (Golden Barbel), chairman; Mr. Harris, vice. Mr. J. Pears presided at the piano. On the 19th inst. several of our members were out, but only three weighed in: Messrs. Webber, roach, Upper Thames, 5lb. 15oz.; Chart, ditto, 2lb. 2oz.; and Holder, 2lb. 1oz. One new member, Mr. Wood, was balloted for, and elected a fishing member, and glad to say he swelled our prize list with two prizes, £1 1s. for last fishing in September, and 10s. 6d. for last fishing in October.—F. C. Longland, hon. sec.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—Mr. Wink, a member of this club, took a prize in the tournament at Amberley on the 19th; Mr. Channer had roach from the Lea; Mr. Stone dace from the Arun. Other members had fish, but did not weigh them in. The two gentlemen proposed last meeting night were duly elected members. A special meeting will take place next Wednesday to arrange for an outing; prizes to be fished for given by members, and money to be withdrawn from the funds. I hope all members will be present.—J. Wright, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On the 19th inst., the following weighed in some nice fish: Messrs. W. North, roach, chub, and dace, 5lb. 4oz.; J. Petrie, roach and dace, 6lb. 7oz.; J. Barnes, roach and dace, 2lb. 10oz.; H. Bigsby, roach and bream (one bream, 3lb. 4oz.) On Tuesday last, members did not attend in very great muster as I should have wished; Mr. F. Moore took the chair for the evening, as our new chairman had not undertaken his duties yet; one working member was proposed and will be balloted for next Tuesday. All members are requested to attend when the balance-sheet will be read out, and the prize list up to date.—S. E. Cane, sec.

Silver Trout Angling Society, Bedford Head, Maiden-lane, Covent-garden.—Although several of our members were out on the 19th, only one, Mr. Williams, weighed in, roach and bream. On Tuesday, the 21st, the auditors went through the accounts for the last quarter, and found a good balance in hand. I have much pleasure in informing members that the negotiations which have been going on for some time respecting the renting of a piece of water for their use, have been satisfactorily concluded, and they can now fish the water at their convenience. There will be no extra charge, and as there are plenty of fish in the water, and a nice quiet spot, any gentleman wishing for the privilege to fish it can obtain the same by joining our society. The two prizes left from the last outing will be fished for on August 9, at Little Baddow.—Pelican.

South London United Anglers' Visiting List.—The clubs enrolled on the above list fished their first friendly competition of the season at Amberley on the 19th inst. with the following result: First, G. Mumford, of the Battersea Friendly, 3lb. 10½oz., winning a marble timepiece and 5s.; second, Mr. Sinking, Anchor and Hope, 3lb. 3½oz., prize 15s.; third, A. Gordon, Wellington, 3lb. 1½oz., 9s., and also a prize value 10s. by Mr. G. George, of the Second Surrey, for the largest roach, 12oz.; fourth, W. Gardham, Peckham Bros., 2lb. 14½oz., 8s.; fifth, J. Smith, Bermondsey Bros., 2lb. 4oz., 7s.; sixth, Mr. Wood, St. Albans and Excelsior, 1lb. 14½oz., 6s.; seventh, Mr. Wink, Second Surrey, 1lb. 11½oz., 5s.; eighth, Mr. Beak, United Bros., 1lb. 11oz., 3s. 6d.; ninth, A. Conn, Bermondsey Bros., 3s. The return visit to the Blackfriars A.S. on the 21st was most successful. The next visit will be to the St. George's A.S., held at the Prince of Wales, St. George's-road, Peckham, due notice of date next week.—A. Conn, hon. secretary.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—On the 19th inst., the members showed up strong, when we had a splendid show of fish by the following members. Mr. W. Hooper, bream, the three largest scaling 9lb.¾; Mr. T. Jones, a fine show of bream and roach; Mr. Polykett, bream and roach; Mr. D. Marks, bream; A. M'Quinn, bream; R. Spenceley, roach and dace.—R. Spenceley, sec.

St. Andrew's Piscatorial Society, Turk's Head, East-street, W.C.—On the 19th instant, the following members weighed in: Messrs. King, roach; A. Long, bream and dace; H. Long, bream; J. Long, roach; E. Roberts, perch; B. Chevalier, roach; and T. Harris, roach and dace.—B. Chevalier, sec.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—The members of this club fished at Harlow on the 19th, a pegged-down competition for club prizes; but the stipulated quantity of a half-pound of fish not being taken, the prizes were not given. Mr. T. Dumbleton was duly balloted for and accepted a member of this society.—G. Morton, sec.

Sundial Angling Society, Plough and Harrow, King-street, Hammersmith.—We had a full meeting on Tuesday last, when three new members were made. The competition prizes were awarded to the following successful competitors:—Messrs. Comley, Fountain, Parker, Taylor, Lewis and G. Boreham. The arrangement of another outing is left over till Tuesday next. Members will oblige by attending early, as there is plenty of business to be done, and new rule books will be ready.—H. R.

United Brothers, Deptford.—Several members of the above have been out during the week with the following result:—On the 17th Mr. R. Lawes weighed in barbel and chub. Two members of the above fished in the South London match on the 19th instt., Mr. F. Beak taking a prize. Messrs. W. Bennett, W. Tyler, J. Turner, Champion and Hayden weighed in bream. The members of the above have voted 10s. 6d. to the Maidstone Preservation Society.—H. Tyler, sec.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—We had a good attendance on the 21st, Mr. Smith in the chair, faced by Mr. Philips. Another new member was proposed, Mr. Denyer, to be ballotted for next week. Members take notice the match on August 2 will take place at Byfleet. Conditions to follow. Our members were out in full force on the 19th. The following weighed in: Mr. Skinner, chub and dace; Mr. Ilsley, roach and dace; Mr. Smith, roach; Mr. Russ, roach and dace; Mr. Bird, jun., roach and dace; and Mr. Clegg, who had a nice show of rudd.—H. C., hon. sec.

Walton and Cotton Angling Association, Crown and Woolpack, St. John's-street, N.—The annual dinner of this association was held on Wednesday, 22nd inst., at the Roebuck Hotel, Tilehurst. About twenty-five members and their friends sat down to a repast which gave general satisfaction. The *cuisine* and attendance reflected great credit to the hostess and her daughter, Mrs. and Miss Noyes. The chair was occupied by the president, Mr. H, P. Isaac; the vice-chair was ably filled by James Collingridge. The usual royal toasts were responded to with enthusiasm; the next in order, "Success to the W. and C.A.A.," was feelingly responded to by Mr. William Potter. A handsome testimonial was presented to Mr. H. P. Isaac, president and hon. sec., consisting of a valuable Tantalus and a silver cigar-case, with suitable inscriptions engraven thereon. The members and friends returned to town after spending a most pleasant and enjoyable day.—H. P. Isaac, hon. sec.

Walworth Waltonian Angling Society, St. Paul's Tavern, Walworth, S.E.—For the competition on Wednesday, July 29th, it was carried that it be open. Two prizes, first given by Mr. Hardy, cash £1 1s.; second, copper-kettle, given by Mr. W. J. Crisp. Members that have not taken up their privilege tickets will please kindly do so.—C. Hibble, secretary.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Our members were out on the 19th inst., but the weather was so bad that there were only two members weighed in fish (Mr. J. Evans, roach and dace; Mr. R. Lowther, roach). Hoping to have a better report in our next.—R. Lowther, sec.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly meeting was held on Wednesday, 22nd inst., Mr. Hesse in the chair. Another new member was elected. Messrs. Rayner and Cartland, fishing at Cheshunt on Saturday, 18th inst., caught two jack and four perch, all of which were returned. Mr. Cartland caught a tench weighing 2lb. 10oz.; and Mr. Rayner, an eel. 2ft. 7in. long; weight, 1lb. 13oz. Mr. Gibson, fishing at Harefield, on the 19th inst., caught a roach weighing 1lb. ½oz.; and Mr. Hesse, fishing in private waters on Tuesday, 21st, caught 7lb. 9½oz., roach and chub; two largest roach, 1lb. 3¾oz. and 1lb. 3½oz. respectively. Our club outing on Bank Holiday will be held at Sunbury-on-Thames.—H. Richardson, hon. sec.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations,

THE FRIENDLY ANGLERS.

THE annual summer dinner of this venerable society, at the New Inn, at Eton, is always regarded as one of the interesting events of the year, and the splendid dinner provided by Mrs. Goddard in the old English style, is one of its greatest attractions. On Saturday last, the members and friends mustered in strong force, and the hour of six o'clock sharp being fixed for the commencement all were ready at that time to do justice to the good things bountifully prepared for them, and which all thoroughly enjoyed. Mr. H. Mitchell, an old and valued member of the club, occupied the chair, and was well supported in the vice-chair by Mr. W. H. Brewer. Amongst those present were Messrs. George Evans, W. H. Brougham, Brownsword, C. H. Woodall, George Newson, T. Barwell, F. Berry, F. W. Howard, George Palmer, W. Bloxham, E. T. Craggs, S. Peet, W. Meakin, H. G. Young, G. A. Duke, Cramer, J. W. Nicholson, W. H. Holland, H. Calcutt, W. Edwards, J. B. Garrett, &c., &c.

After the loyal toast and one verse of the National Anthem, Mr. G. Mitchell, as chairman, introduced the toast of the evening, "Friendly Anglers," in a most effective and practical speech, in which he regarded the present as an eventful year in the history of the society, as they had now entered on its jubilee; but that circumstance could be more fully recognised at their winter dinner in London. He stated there was a good prospect of a favourable fishing year, as up to the present time there was a very fair average, especially with the trout, as 78lb. 13oz., had already been weighed in, and principally from the Thames, Mr. George Palmer and Mr. Howard each having weighed in one of over 7lb., in addition to others of a smaller size. He was glad to find their young members had been industrious amongst the trout, and occupied a most forward position, and also in their constant attendance at the weekly meetings. With reference to the barbel, there had been an excellent commencement, Mr. W. H. Brewer having made a fine show from the Thames. Mr. Garrett, their time-honoured member, had contributed a fine display of roach and tench—one of the roach weighing 2lb. 5oz., and ten of the tench weighing 33½lb. There was another eventful circumstance in the year, which they would all regard with much regret, as the house in which they were now assembled was changing hands, and that would be their last dinner under Mrs. Goddard's excellent catering. Their summer dinners, which at one time were held at West Drayton, had for the last twenty-four years taken place at the present hostelry. The toast was then most enthusiastically responded to, and Mr. W. Meakin, the painstaking secretary, whose name was associated with it, briefly replied, assuring those present that all was going on smoothly, and their treasurer had established a reserve fund.

The next toast was a joint one of "The Thames Angling Preservation Society" and the "Press," proposed by Mr. W. H. Brewer, and after some complimentary remarks on their old friend and honorary member, Mr. W. H. Brougham, he associated that gentleman's name with it.

Mr. W. H. Brougham, after noting he had been connected with the T.A.P.S. for a period of thirty-three years, said he had been associated with the Press for a much longer time, as he commenced writing for some local papers in Staffordshire at least fifty-five years back, and it was always a pleasure to him to attend their dinners.

Dr. Duke then gave "The Visitors," which was replied to by Mr. Brownsword.

Mr. F. Berry was called upon to give the toast of "Mrs. Goddard," their present hostess, and in doing so remarked it would be their last dinner under her catering; and in saying that it would be a keen pang to most of them, as the records of their doings there formed some of the most pleasant pages in the history of the society. He was quite sure in her retirement, after over forty years' possession of the hostelry, every good wish would be expressed by those present.

The toast was drank with much heartiness, and Mrs. Goddard was afterwards escorted into the room by Mr. George Newson amidst great applause, when the chairman reported to her what had been done, and after other complimentary remarks, the venerable lady feelingly thanked them all for their kindness.

The other toasts were "The Chairman," and "The Vice-Chairman," and all the toasts were interspersed with some excellent harmony, contributed by Messrs. Browhsword, George Evans, W. H. Brewer, F. Berry, T. Barwell, W. Bloxham, Cramer, and Dr. Duke.

REPORTS FROM RIVERS, LOCHS, &c.

☞ *River Reporters who want forms and envelopes should send a post card to the Manager of the* FISHING GAZETTE, *St. Dunstan's House, Fetter-lane, London.*

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add	30 min. for Chelsea.		Add	55 min. for Kew.	
	40 ,, ,, Putney.			75 ,, ,, Richmond.	
	45 ,, ,, Hammersmith.			80 ,, ,, Twickenham.	
	50 ,, ,, Barnes.			85 ,, ,, Teddington.	

EXAMPLE:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

TIME OF HIGH WATER AT LONDON BRIDGE.

Friday,	,,	31	9.56	10.31

English and Welsh Reports.

The Lower Thames.—GENERAL REMARKS.—During a visit to some portions of the river the last few days, I found the water very low and in a bright condition, but on inquiry amongst the fishermen I found they had not been doing much, as the fish had gone off their feed. Several of the clubs have been keeping up their annual custom of a summer dinner, and I have been well in amongst them, so that I am maintaining my position, as the *Fishing Gazette* some time ago put me down as "the hero of five hundred dinners." One thing, when I am invited and the coast is clear, I seldom refuse to comply with the request, if within reasonable distance, and I have certain fixtures, for which I am annually booked. One of these is the "Friendly Anglers," and I always enjoy their friendly gatherings. I am pleased to find this club, which is ever moving in the right direction, has recently moved in the question of sizes of fish, and the following standard has been laid down as the "minimum weights":—Salmon, 5lb.; trout (Thames), 16in., 1½lb.; trout (Kennett and Colne), 1lb.; trout (other rivers), ½lb.; jack, 2lb.; barbel, 2lb.; chub, carp, bream, and tench, 1lb.; grayling, perch, roach, and rudd, ½lb.; dace, 3oz. There can be no doubt other clubs will follow in the same direction, but as regards the standard, I prefer it given in sizes to that of weights, as it is very much easier and far less trouble. I was in the neighbourhood of Bishopsgate-street on Tuesday last, and called in at the Citizen, where our old piscatorial friend, Mr. H. J. Tibbatts, is now located, and it was really a pleasure to have a few minutes chat with him. I happened to be somewhat hungry at the time and he strongly recommended me to try his *special* rump steak pies at twopence each, which I relished very much, supplemented with a little "special Scotch." He has a charming daughter to attend upon customers, and altogether the surroundings are so pleasant and comfortable, I hope he will be well supported by his piscatorial friends, who after one visit will be sure to form the same resolution I have done to go there again. I have made these remarks in an angling spirit, as the past services of Mr. Tibbatts, from my own experience in the interest of anglers and angling, entitle him to recognition and regard; and they cannot be considered out of place when writing on angling subjects as anglers, like all other mortals, cannot enjoy life without lubrication, and the Citizen is a good place to get it.—B.

Richmond.—Henry Mansell, during the week, 40lb. of roach and dace, and Job Brain, senr., twenty dozen and a couple of barbel.

Twickenham.—Samuel Cole, in two days, eleven dozen of roach and dace; C. Brown, in two days, thirteen dozen; A. Hammerton, in two days, ten dozen and three barbel; C. Annesey, in one day, six dozen; Richard Coxen, in three days, 40lb.; J. Holden, in one day, 15lb.; John Frost, in three and a-half days, 37lb.; George Coxen, during the week, 60lb.; John Coxen, in two days, 21lb.; J. Dunn, in one day, six dozen; and Richard Moffatt, in two days, seventeen dozen.

Teddington.—W. McBride, in one day, four dozen of roach and dace, and a jack of 7lb.

Kingston.—Angling has been very slack in this district, and nothing worth reporting.

Hampton Court.—John Smith, in five days, twenty-five dozen of roach and dace, and seven barbel; W. Milbourne, in three days, fourteen dozen of roach and dace, five jack, and a couple of barbel.

Sunbury.—The punts of Messrs. T. and A. Stroud, during the week have brought in fifty-six dozen of roach and dace; and those of Messrs. E. Clarke and Son, forty-nine dozen.

Chertsey.—John Poulter, in three days, the first day, seven dozen of roach and dace, which were all returned; the second day, five and a-half dozen, which were put back again, and two bream; the third, day with Mr. C. Wastell, six and a-half dozen and one bream, part being returned as too small for the Battersea Friendly Angling Society. L. Hackett, in two days, fourteen and a-half dozen of roach and dace and some good chub. In the report of this fisherman's take last week, it should have been roach and not perch.

Staines.—John Keene, jun., one day with Mr. Colls, thirteen chub and five barbel; another day, with Mr. Wilson, 28lb. of roach, and dace, and barbel; another day, with Mr. Codd, seven jack, four bream, and three dozen of roach and dace; and another day, with Mr. Dunn and friend, seven dozen of roach and dace and six barbel. Charles Hone, one day, with Mr. Cragg, with the fly, fourteen chub; and another day, with Mr Colson and friend, ten chub.

Upper Thames.—Rain has fallen heavily all up the Thames Valley during the past week, and as I write it keeps on steadily descending. This influx of water into the river will be very welcome, and should put all classes of fish on the feed, better than they have been of late. From most up-river resorts I have encouraging reports of success amid roach, chub, and more especially barbel. In the Harleyford waters, Mr. H. and A. Thompson from London, have done capitally with roach, one short afternoon's take, which I had the pleasure of scaling, going 15lb. odd, and a brighter or better conditioned lot I have not seen this season. In the Marsh and Hambleden waters, Bob Young of Medmenham, with patrons, has been waking the barbel up to the tune of 50lb., 60lb., and 75lb. per outing. At Marlow, Lady Wilton with Bob Plummer, jun., has been going for barbel, but as yet I do not hear of details of success or otherwise. I am pleased to say perch are showing up quite in force. Marlow Buzz.

Thames (Richmond).—Prussian Carp Caught.—Last Sunday's rain—or rather storm—has proved beneficial to the tidal waters, and there is a little colour in the river now. The rain, whilst it lasted, was exceedingly heavy, and anglers and boating people alike fled for shelter, the scene being somewhat amusing. Those of the anglers who were disposed to "stick it" gave in at last, and suddenly the puntsmen were seen to fly to the poles, and punt with wild despair to the shore. Dace have not been feeding well; only a few roach have been caught; and barbel—except in one or two cases—have proved shy. Several good bream have, I hear, been caught out of a certain hole (one of 3½lb.); but the scene is sacred to those who "found them." On July 19, numerous parties of anglers were out, and all the punts were engaged. Fishing is proving most remunerative in the evening, especially just before dusk, when one may get hold of a decent roach or two with soaked bread. Fly fishermen are getting a few dace on the shallows. On July 19 several chub were caught. The heaviest take of barbel I hear of was one of 28lb. Last Tuesday night a member of the New Albion Piscatorial Club, punt fishing with Brain, senr., caught a Prussian carp, weighing about 1lb.; also a fine dace. The carp, a somewhat uncommon fish for this part of the world, was put back. Goosequill.

Thames (Staines).—Chub are feeding well just now, and are being taken with the fly and cheese paste. Having fished this water often for chub, I know what it contains. Anglers fond of "going a chubbing" could not go to a much better place. A few days ago I saw some regular monsters reposing under a bough, and have marked them down for a future call. On the 19th, despite the weather, Mr. Cragg, member of the Friendly Anglers' Club, London, landed seven brace of chub with the fly, out with Charles Hone, who informs me that the water is very low and bright, and no good for roach. The following day Hone had a Mr. Colson and friend for his patrons, and they accounted for five brace of chub, which were caught with cheese paste.—Goosequill.

Thames (Windsor).—Sport in this district for time of year has been good, some fine specimen fish being caught, notably barbel and roach. Of the former, two 7lb. fish were taken, one by Mr. Brewer, of the Friendly Anglers, London, out with R. Gray, and one by a member of the New Albion Piscatorials, out with James Gray. This gentleman also had five other barbel, two chub, and four dace, the entire bag weighing 25lb. In roach, Master Molyneaux, of Windsor, heads the list for specimen fish, having one which I weighed, going 1lb. 3½oz. For the Thames this is a good specimen, but a larger was caught in the Slough canal last week by a member of the Prince of Wales Angling Club, which went 2lb. 5oz. Mr. E. J. Harbard, of Eton, has also had some good roach, his best basket being thirteen fish before breakfast, largest, 11oz. Lumsden, of Datchet, has been giving his patrons some good sport on the the 21st inst., having ten barbel, largest, 6lb., 20th inst., nine barbel, nine chub, largest chub, 3lb.; Mr. Thomas, of the "Christopher," Eton, has also had some good sport with chub. A few jack have been caught. Mr. Battenbury, of Eton, having three, 5lb., 2½lb., and 2lb.; Mr. Coomber, of Eton, one 1¾lb. Water still in good condicion for all-round angling, and though gudgeon have not yet to my knowledge been tried; three rods should in a day now take from forty to fifty dozen.—B. R. Bambridge.

Ancholme District.—It has been unsettled during the week and fewer anglers have been out. Messrs. Dinter, Meanwell, and Ford, went over one day and caught a basket of perch, only fish alone with the worm. The event of the week has been a fisheries fête held on Tuesday and Wednesday last at Cleethorpes. The festivities were marred a little by showers, but the attendance seemed to be fair in evenings. The financial results are not yet made out.—Thomas Ford.

Arun (Pulborough).—Capture of a Salmon.—The river continues low, and sport, therefore, has not been up to the mark at all. A refreshing rain at the time of writing was much required, after which the bream fishermen will no doubt make some good baskets. The rain, and more especially a good push of water, would not only tend to put the fish on the feed, but also help towards carrying away some of the immense quantity of weed, now beginning to decay, which meets the eye of the angler at almost every turn. Just now a great deal of time has to be wasted in looking for swims, and these are few and far between, with more than 3ft. of water in them. The river is full of small eels, and these voracious little "shoe laces" are a source of constant annoyance to anglers ledgering for bream. I am glad to see that the fish are now getting into better condition, and with the advent of September, roach, dace, and bream are expected to yield excellent sport, especially the latter fish, this being the best time of the year for it in this river. I have heard of no more carp being caught here this season, but I see that Mr. Nutt, of the Swan, has had the large trout which was caught in the river here during the winter set up, and it is now proving a source of considerable interest. The fish weighs 10lb. On the 19th numerous anglers were out, but only small takes were recorded, as very boisterous weather was experienced. The catches comprised roach, dace, perch, and bream. On the Central Association water nothing much was done, but at Amberley bream of 3lb., 2lb., 4½oz., and a roach of 12oz., were taken. The members of the South London United Visiting List fished a match there, when fifty-five competitors entered. The prizes were all won, Mr. G. Mumford (of the Battersea Friendly Club) taking first honours. An interesting piece of news has reached me of the capture in this river, below the Central Association's Fishery, of a fine salmon of 16lb. It seem that one of the farmers is in the habit of putting a net in all night, and the other morning on going to examine it, he found a fine salmon fast in the meshes. I may say that I heard of the capture of the fish on good authority. I also understand that several other salmon, smaller fish, have been caught here at different periods, and at Stopham they say there is a large show of grey mullet.—Goosequill.

Barle (Dulverton).—The rain has freshened up the river and put it in perfect order for fly, worm, or minnow. Baskets of from 4lb. to 5½lb. are being taken. Mr. Routh, jun., killed with Green Drake a very ugly fish of 4lb. 1oz., and a handsome little trout of 1½lb. Your reporter has done well in all-round fishing, and, amongst others of good size, a pretty fish of 1lb. Warm and showery. Killing flies, Uprights, hackled and winged, and Coachman. Some salmon now up.—Iron Blue.

Chichester and Sussex Rivers.—Rain is much needed, both by agriculturists and piscatorials. The sluggish waters are low, and in many parts covered with floating weed and slime, and a really good freshet would greatly improve matters. Yet fish have been feeding well, and those who have cared to spend a night by the water side have had no rest (this is not an intentional pun). Mr. Paul Bedford, fishing with the veteran angler, Jas. Wright, at Chichester Canal, during the small hours of Monday morning, landed upwards of eighty sizeable bream and roach, bream up to 2lb., and roach 11oz. A few good tench have been taken; one secured recently at the basin weighed 2lb. 7oz. From the Ouse some good roach and chub have been taken, the heaviest roach notified me weighed 1lb. 9½oz. At the Rother, in the Midhurst district, several fine roach have been landed, and a brace of good trout. From the Adur, near Steyning, roach, dace, and flat fish have made variety baskets; at Littlehampton Harbour several mullet have been taken.—Geo. F. Salter.

Dove and Tributaries.—The water and the weather are now both favourable to sport. Up to the last day or two we have had but little rain and a clear water, and the upshot has been small takes, save at the edge of dusk, when the caterpillar and the Light Turkey Brown have done well. To-day we are having some nice rain, which will prepare the water well by the time this is in print. A few fish have been taken from the Dovedale length, and also from the Okeover and Norbury Club lengths. Mr. W. Bullock has taken a few grayling, including one of 2lb., with the maggot, from the river.—D. and W. H. Foster, Ashbourne.

Douglas (Isle of Man).—The rivers are in very fair order, and thanks to the vigilance of Mr. Caloy, the river inspector, there is much less poaching than usual. The sea fishing is very good; this week's spring tides have brought up shoals of mackerel, but I fear they will not remain long on the coast, as they are of an unusual size—viz., about 2lb. This is never a good sign. Codlings are very plentiful, but should be fished for during the ebb-tide. —Stormy Petrel.

Eden (Armathwaite).—River very high, running bank full, having been raining persistently these two days. No reports of any sport to hand.—C.

Esk (Whitby, Yorkshire).—The fishing season on the waters of the Esk has so far proved anything but satisfactory. The weather, generally speaking, has been much against sport, while as a rule the river has been low and dead. During the last day or two, however, we have had some copious rains, which have had the effect of considerably improving the river, and it is expected that in a few days there will be some good chances of fair sport. A few salmon have got up the river from the sea during the week.—J. J. Jackson.

Fen Waters (South Lincolnshire).—Anglers are doing fairly well in this locality, but on some of the drains the prevalence of weeds is a great hindrance to sport. The water is in capital condition, and in the evening good baskets are obtainable, and particularly from baited swims. In the clearer water roach bite rather shyly, but some good business has been done with perch, baiting with the small red worm. Baskets on the Forty-foot have run to 5lb. or 6lb. in a couple of hours' fishing, and more if longer time was taken. One gentleman caught a tench last week scaling 3½lb. Good business has been done with eels. Mr. Ball, of Billingborough, has had a fine lot from Swatton brick pits.—Limpet.

Idle (North Notts).—The river is now running rather low, and anglers say more rain is wanted to freshen it. Moderate sport is stated to be obtainable about Bollam and at other points down the river, and at some places on the canal very fair baskets are made. Roach, bream, dace, and eels are the fish chiefly sought for. Perch are also to be got from the river and drains in the lower district. Some of the local club-men have this week been patronising the Trent at Laneham. The water of the Trent in that district is in good condition, but the barbel fishermen are rather disappointed with the results so far.—L.

Lake District.—A great revival in fishing has taken place during the past few days throughout the whole of the Lake District. After an almost unprecedented spell of dry weather a change took place on Monday, when rain came in torrents, and copious showers have fallen at frequent intervals up to the hour of writing. For the first time this summer our rivers have presented a tempting appearance, many of them being bank full, and anglers were not slow to take advantage of the opportunity. "Capital sport" was the general report of those out on the 21st and 22nd, and I believe some good hauls might be reported. Messrs. Storey and Quirk, fishing the Kent on Tuesday, had thirty good trout; and similar takes are reported from other quarters.—Westmeria.

Lea and Stort.—The weather lately has been so very unsettled, that at the very best, successful angling has been but a lottery; in some cases and at some places fish have been feeding well. This, however, has not been the rule. Some good sport amongst the bream and roach has been had at St. Margaret's and Rye House. At Waltham Abbey and Cheshunt some fair fishing has been had, roach and bream having constituted the principal takes. A few good bream and some decent takes of roach have been had at Ponder's End. Some roach, dace, and bleak have been taken at Cook's Ferry, and on Saturday last a very good chub. Some dace have been taken at the Ferry Boat, Tottenham, with the fly, and a few roach bottom-fishing. On Monday Mr. Herbert caught a very fine carp, weighing 5lb. Bream have been showing up, but have not been on the feed here as yet. Eels have gone almost entirely off. I fancy the cold winds we are having in the evenings account for this.—Spliced Joint.

Leicester—Anglers hereabouts are having a really good time of it just now. Better weather could hardly prevail, and both the professionals and amateurs have literally been out in swarms. Up to the present the waters have remained in fairly favourable condition, and sport all round has been of a pretty successful kind. At Foxton, Mr. J. Morton was well among the pike a few days since, and generally the large number of anglers who have visited this spot have met with good success with the perch and pike. The charming Wreake Valley, has together with Yarborough, Langton, Rearsley, Wigston, and other places furnished sport of an exceptional kind. At Leicester anglers were extraordinarily thick along the banks of the river Soar in the Abbey Park, but the chief attention at Leicester was bestowed by the experts on the Leicester Angling Society's preserves, from Leicester to Anglestone eels have been again taken in abundance from these preserves during the evenings, and roach up to 1lb. 3oz. were among the fish shown. The last mentioned species have lately greatly improved in condition, and should now show fine sport.

Lugg and Arrow (Leominster).—Both streams have been refreshed with slight storms, which has not altered the state of the water. The weather has been stormy, but the water is in good order for angling. There are plenty of flies on the water, and the fish are taking these fairly well of an evening. A few anglers have been out and tried the wasp grub with success. Minnow fishing has been a good killer. The Pinsley is clear but low, fishing in it quiet.—Gwynne.

Medway (Maidstone).—The water is in grand condition; the roach are now coming on the feed, but biting very finely, only the expert who uses the finest tackle can get them; they are now coming nicely to the boiled wheat and it will assuredly take the best fish. Very few bream have been taken, none of any note to my knowledge, some few perch have also been secured. The changeable weather still prevents the chub from rising to the fly. I should like to see some of our old anglers take steps to secure some of the grand carp that are to my knowledge in the various parts of the Medway.—W. Shrubsole.

Nene (Northamptonshire).—Mr. John Rowell, of Cromwell-road, Pulborough, had good angling in the Castor district on Saturday. His basket included thirty-one roach, the average size being nearly ½lb., many reaching ¾lb. each. This is very good for roach. He also had a bream of 1½lb.—Nenebank.

Norfolk, Suffolk, and Cambridgeshire Rivers.—Weed cutting is now being carried on in most all our waters near here. There ought to be some good roach fishing now the water is a good colour, and when the weeds are gone away, which will not be be long, good takes will, I hope, be the order of the day. I had a try in the Mildenhall river on Monday, and took a nice lot of dace and perch. I also tried the west row swim, there I got a few good fish. I hear very favourable reports from the Yarl, bream and perch are feeding well. From Brandon, the "little Ouse," I saw a nice tray of dace and roach this day, 21st, very clear and bright they were. Roach are not on at all in the Ouse at Ely or Littleport. Bream are feeding fairly well now, also the perch. A gentleman fishing near Denver, took on Thursday a very fine sea trout when spinning for perch. I think roach are all right now in the tideway near Denver sluice, and anglers staying at the Jennyns Arms, close to the sluice, have the privilege of fishing there. Mr. Reid, the landlord, is a capital angler, and very obliging. Weather at time of writing dull and raining; wind in south.—William Howlett.

Ouse (Brandon, Norfolk).—I hope anglers will pray for better and settled weather, this is all the above river requires now. Several angler's down this week. Host Rolph is doing his very best to procure sport in his baited swim—but at present the "weeds" are floating down stream. Hope to report good catches next week after the river is clean. Time of writing wind W.; showery, unsettled. The above place is good for railway service. —John O'George.

Ouse (Huntingdon).—The unsettled state of the weather has put sport almost at a standstill, but lately both roach and bream have been feeding fairly, more especially the roach, and some fair size ones have been taken with gentles and wheat, and it is to be hoped that some good takes may be had now that the water is settled and in prime condition. Bream are not feeding well at present, although great numbers are seen rising in the evening in many parts of the river which have been tried for with both brandlings and lobs. Late in the evening of the 18th thirteen fair fish were taken with brandlings.—H. ROUT.

Plymouth.—SEA FISHING.—On and off the weather has been favourable for fishing, though we have had some nasty days. Some good catches have been had near the Eddystone, the Rev. Mr. Nixon, in his yacht, getting three hundred good fish in three days, and good sized ones. Whilst at dinner one day, an alarm was given on one of the whiting lines, and it was with difficulty hauled in, when it was found that a huge ling, about 4ft. 6in. long, had taken the two whiting that had been caught on the two separate hooks on the line, and was itself firmly hooked; the three fish were safely landed after a deal of care. Some gentlemen staying here went out with Jewell, the boatman, to the west end of the breakwater, and had a dozen nice pollack on Friday, and after they came in to the old ponting pit, and I left them doing well at the bottom with these nice little fish.—WILLIAM HEARDER.

Rother (Fittleworth, Sussex).—Like the Arun, this river is in need of land-water, a push of which would doubtless put the fish on the move. A party of London anglers were out here on the 18th and 19th, but, as far as sport was concerned, were somewhat unfortunate. To make matters worse, one of them hooked a 3lb. bream, but lost it again through not having his landing-net put together. I hear that another angler, on the other hand, had the good fortune to land a fine roach of about 1½lb. This river contains some splendid specimens of the red fins, as it does also of the pike. One caught last year scaled 24lb.—GOOSEQUILL.

Scarborough.—(SEA FISHING).—Whiting, gurnard, and dabs are very abundant in the bay, and boat anglers are having some excellent sport. Pier anglers are also doing fairly well. Mackerel have not yet come in, but may be expected very shortly.—H.

Taw (North Devon).—The heavy rain on Monday caused the water to rise 3ft., but was gone again in twenty-four hours. The salmon ran up, and were taken with the net in large numbers. I fear trout in the Bishmill, Bray, and Mole are almost annihilated.—RUSTY GAME.

Teme (Tenbury).—In this district the water is still clear, but rather low. The weather has been stormy, but it has not stopped anglers going out, and fair sport has been had. The fly has been best at evening. Maggot and wasp grub have been tried and some nice fish landed. On Tuesday, some nice fish were taken with the fly. The Red Kyre and Ledwyche are all clear and in fishing order, but little done in them this week.—WORCESTER.

Whitby.—SEA FISHING.—White fish of all descriptions abound in the roads off Whitby and also among the rocks a little to the south of the harbour mouth. Each night when the weather is favourable and the sea smooth, witnesses large parties of ladies and gentlemen going to the fishing ground in open pleasure boats, which are very handy for the purpose. The whiting is the most plentiful of all the tribe, but billets, dabs, gournard, and the like are also in great abundance. The largest fish caught by the line during the week was a billet which measured 2ft. 4in.—JNO. J. JACKSON.

White Hart, Ringwood.—The river is now in fine condition for angling. Roach and dace are well on the feed, and several good takes have been recorded. Some excellent perch, trout, and grayling have also been taken.

Tees (Barnard-Castle).—This river came down in full flood on Tuesday night, and there will now be no hindrance to the salmon running up. Little fishing has been done last week owing to the low state of the river, Mr. R. Wandlers, Mr. Brown, and others got a few trout, several eels, and an odd chub or two have been obtained. The Red Spider and Black Gnat the most killing flies. In the Estuary good catches of salmon are being obtained, and as a natural consequence, the price has now come down to tenpence per pound retail.—J. H. R.

Wye and Derwent (Derbyshire).—Some excellent sport has been had on these rivers this week, principally late in the evening. Since Wednesday, the Derwent has had a nice flush on it, which will do a good deal of good, and doubtless put the fish off feeding on the Midge, so much as they have done for the last week or so. Mr. W. Higton fishing at Matlock Bath, on Tuesday evening last, killed a grand trout, weighing 2¼lb., with the Throstle Wing Dun. Thts fly Grey Quill and Little Marriott, are best at present.—DOTTERCH.

East and West Cleddau (Pembrokeshire).—The rivers are a good colour and plenty of water. Sewin are again running up to the weirs very freely. Good takes of trout have been made during the past week, by evening fly fishing, one angler taking five brace of very nice fish one evening this week.—H.

Lake Vyrnwy (North Wales, via Oswestry).—For several days since last report the sun has been much too bright, and the lake too calm for very heavy baskets to be expected. However, since the change to rain on Saturday last, very fair sport has been obtained, and the water is now in capital order. Captain Stevenson has been the most successful, on the whole, with twenty-six trout, 23lb. 2oz.; the Rev. St. Vincent Beechy got fifteen very nice fish, 13lb. 1oz.; and Mr. T. S. Odell, fourteen, weighing 11lb. 11oz. Captain Stevenson's number included eight lovely fish, scaling 8lb., caught yesterday, when Mr. Ward also got eight, weighing 6lb. 5oz., taken in the afternoon. Heaviest fish: Mr. T. S. Odell, 1lb. 14oz.; Rev. St. Vincent Beechy, 1lb. 10oz. Best flies: Mal, March Brown, Alder, and a gold-bodied fly with pheasant wing. In last week's report 30,016 should have been 3,016.—LONG DRIFT.

Towy (Llandilo, Carmarthenshire).—Some excellent sport has been had during the past ten days, both on the Towy and its tributary, the Cothy. On the 13th inst., Mr. Owen Richards landed two sewin (2½lb. and 3½lb.), and a trout of 2lb., on the Towy; and the Hon. Hugh Campbell (same day), one sewin, 1½lb., and two others, 2¼lb., besides seven and a-half brace of good-sized trout on the "Golden Goose" water. Mr. John Morgan also took a good basket of trout. On the 14th, Dr. Naunton Davies, 2½lb. to 3lb. of trout, all with fly. On the 17th, the Misses Hughes and Miss Croxen, of Tregib, took 4½lb. of trout; and the Hon. Hugh Campbell, a nice basket of sewin and trout; Sir James Drummond, of Edwinsford, has had some good sport with salmon on the Cothy. On Saturday, Sunday, and Monday last we had more flood-water down the river, and although there are lots of salmon up, none have been taken for some little time past.—H.

Usk (at Usk).—Sport continues to be very good, especially with grilse, and most anglers come in for a share. The slight rise in the water on Monday wonderfully improved angling the past three days, and many fish were taken. Mr. H. W. Pride caught four on Monday, and Gen. Mignon five; Col. Rocke has been very successful, taking two or three most every day. On Tuesday, Mr. T. Rees caught four, and Col. Roche five. No angler could wish for a better season from the commencement.—T.

Scotch Reports.

Altnacealgach Hotel Waters (via Lairg, N.B.).—On Tuesday last week, Mr. Beith, Glasgow, and Mr. Miller, Musselburgh, on Loch Cama, two-and-a-quarter dozen trout, 10lb.; General Ranken, London, on Loch Veyatie, twenty-eight trout, 9lb.; Mr. Conacher, Luncarty, on Loch Cama, thirty-eight trout, 12lb., and a *Salmo ferox* of 1¾lb.; and Messrs. Clay and Winstone, London, on Loch Urigill, twenty-six trout, 6½lb. On Wednesday Messrs. Beith and Millar, on Loch Boarlin, one-and-a-half dozen, 6lb.; General Ranken on Loch Urigill, two-and-a-half dozen, 10½lb.: Mr. Conacher, on the same loch, two-and-three-quarter dozen, 10¾lb.; and Mr. Macintosh along with Mr. Cantrell on Loch Cama (a short time only), twenty trout, 6lb. On Thursday Messrs. Beith and Millar on Loch Urigill, sixty-seven trout, 19lb.; Messrs. Macintosh and Cantrell on the same loch, six-and-a-half dozen, 91lb.; Messrs. Clay and Winstone on Loch Cama, thirty-five trout, 9lb.; General Ranken, on the same loch, forty-seven trout, 20lb.; and Mr. Conacher on Loch Veyatie, five dozen, 17lb. On Friday Messrs. Beith and Millar on Loch Veyatie, four dozen trout, 22lb., and a *Salmo ferox* of 2lb.; General Ranken on Loch Urigill, five dozen, 16½lb.; Mr. Conacher on the same loch, four-and-a-half dozen, 14¼lb.; Messrs. Clay and Winstone, on Loch Boarlan, twenty-nine trout, 9½lb.; and Messrs. Macintosh and Cantrell on same loch (one hour only), ten trout, 4lb.; Major Broadfoot, R. E., London, along with Captain Broadfoot, Royal Horse Artillery, made a nice basket in about two hours fishing. On Saturday Messrs. Beith and Millar on Loch Cama, forty trout, 12¼lb.; Mr. Conacher on same loch, twenty-five trout, 8½lb.; General Ranken on Loch Boarlan, thirteen trout, 4lb.; and Major Broadfoot, R.E., with Captain Broadfoot, R.H.A., on Loch Urigill, fourteen trout, 5½lb. On Monday this week Messrs. Beith and Millar, on Loch Veyatie, twenty-eight trout, 18lb., besides a grilse of 8lb. caught by Mr. Beith, and one of 2lb. by Mr. Millar. Loch Cama was fished by General Ranken, twenty-three trout, 8lb.; by Mr. Coutts, twelve trout, 5lb.; and by Major Broadfoot, R.E., and Captain Broadfoot, R.H.A., nineteen trout, 16lb. Mr. Wilson and Mr. Coull fished Loch Urigill, and got seventy trout, 17lb.—McB.

Border Esk.—Both the Esk and Liddle are gradually decreasing in volume since the recent rains, and day fishing is not much indulged in. At night, however, some good takes have been made. In the upper waters salmon are running in fair numbers. There is a good stock of sea trout and grilse, and whiting are making their appearance. Visitors staying at the Cross Keys, Canonbie, are having good sport in the lower waters, particularly Messrs. Craig and Shard, who seem to favour the well-known Cauldron Pool. On Thursday the former gentleman landed two salmon, 15lb. and 9lb., and four sea trout, weighing in all 8½lb.; while Mr. Shard had seven sea trout from the same pitch, from 1¾lb. to 4½lb.; several sea trout and whiting fell to the rods of Messrs. W. Davidson, D. Murray, D. Edgar, J. Graham, F. Little, W. Riddle, A. Irving, and others. Messrs. Ast and F. W. Kerr, Eskdale Temperance Hotel, have been very successful in the upper reaches; four sea trout, two whiting, and seven yellow were taken by those gentlemen from the reserved water, and a 10lb. basket, which included six sea trout, subsequently rewarded their efforts. Mr. F. Irving and others have had good hauls in the Skipper's gullets, and several sea trout have been had from the Black Stones Pool and Craig Corner Pool, a little above Langholm. I may mention that these are the best salmon pools above the meeting of the three waters, and well worth visiting. Mr. Stubbs is again to the fore in the Metal Brig water, and Messrs. Bell and Mason have each landed sea trout and whiting from the Roost—Miss Cartner's favourite pitch—and also in Wilkin's Pool and Birrel's Weir. Sport has been pretty fair after sunset in the Liddle in the upper waters, near Newcastleton. Baskets of sea trout have been taken from Sandholm Pool, principally by Messrs. A. Crozier, Glasgow, and Jas. Crozier, Carlisle, while Mr. Wm. Murray landed a salmon of 14lb.; Mr. G. Elliot had a sea trout, 4lb.; Mr. J. Beallie had two, and Mr. W. Edgar three sea trout; Mr. J. Graham has also had good sport in the Penton water, in Auld Brig Pool, Maggy's Ford, Double Pot, and Dreble Bank. These pools, by the way, are the best in the Liddle, and close to Penton Linns. I am not at all given to superstition or any other kind of delusion or fad, but I always prophesy a flood in the Esk and Liddle during the last week in July, and I am generally correct in my prognostication. Should the usual deluge take place there will be a slaughter of the innocents, and no mistake, as there is a tidy good crop in both waters.—G.

Carron (Easter Ross, Ardgay, N.B.).—On Tuesday, last week, Mr. Crowdson, Balnagown Arms Hotel, fished the Gruinards water, and landed two grilse, weighing 5lb. and 7lb. With the exception of one fish caught on the Hotel water, sport was nil until Saturday, on all the beats, so far as can be ascertained, the river having been quite out of order owing to heavy rains. On Saturday, an improvement took place. Mr. Crewdson landed a grilse of 7lb. on the Gruinards water; Mr. W. Allis Smith of Glencalvie, had one of similar weight on the upper water; Mr. D. MacMillan, Somerset House, London, grassed a 10lb. salmon on the Hotel water; and Mr. John Mackenzie, Invercharron, who fished Craig's water on Mr. Littlejohn's rod, landed a beautiful clean-run salmon, weighing 22lb. Mr. Crowdson fished the Hotel and the Gruinards water, on Monday, this week, and landed two grilse, weighing 6lb. and 5lb.—McB.

Dee (Aberdeenshire).—The recent freshetts have had the good effect of giving the rivers and streams all over a good scour out. With regard to the Dee, the water has been discoloured—that black peaty colour, where nothing succeeds in moving the fish till it has run itself clear again. The weather variable, the prevailing lights unfavourable, anglers indifferent, and the week's results correspondingly low. However, those who have been prosecuting the work have met with encouraging success. There is a good run of heavy grilse in the water, while not a few of fresh salmon have also come away. On the Ballater and Balmoral reaches the same phenomenal run of luck has not, been experienced lately which prevailed during the whole spring and summer months, yet the sport is good. Mr. Yarrow, Mr. McGregor, Captain Cook, Keeper Morgan, and others are having more or less sport every day. Grilse are plentiful, and the prospects for the next fortnight are of the best as regards summer fishing. On the Glentina water, Sir William C. Brooks, Bart., M.P., and guests are having a fair grilse season, and better things will yet be done when once the water settles. On the Upper Dess waters J. Harper landed a grilse of 4lb. lately; while Mr. Milne, Aboyne, had one grilse and two sea trout on the Huntly Arms reach. On the Ballogie water Mr. W. E. Nicol landed a salmon 10lb. on the Monday, and a grilse of 6½lb. on Thursday last. On the Woodend water lately Charlie Gill had two salmon, of 8lb. and 10lb., several grilse and sea trout, in all light fish, while Mr. Chalmers had one on the sluice water, while several have also been had on the Blackhall, Inchmarlow, and lower reaches. On the Park water Mr. Hugh MacDonald landed a fine grilse of 5½lb. There is a fine show of fish on the coast, and the nets have been doing remarkably well. On the tidal reaches good baskets of sea trout have been plentiful, the fishing on this reach having been assiduously prosecuted on Saturday and Monday last, the occasition of the city holiday.—DEESIDER.

Deveron (Banffshire).—For the past week this river has been more or less in flood; several heavy thunder-showers have fallen. The water has been in very variable condition, and anglers' hopes have, like the stream, risen and fallen. On the 10th inst., Mr. Fraser, keeper, Netherdale, had a salmon of about 6lb.; Mr. Thurburn, of Mayne, had a grilse of 6lb.; and Mr. J. Sanderson, the keeper, had two salmon, weighing 8½lb. and 9¾lb. On the Huntly and tidal waters a few grilse and some fine-sized trout have been landed. Netting continues fair on the river. On the Duff House water as many as a score of grilse and salmon were taken by the net on one day. The remarkably productive fishing that has been got on the coast is now falling off, and this week the hauls of fish were not so large. Notwithstanding, the catch for the past week is up to the average of any previous year. On Friday last fifteen boxes were consigned to the London markets, eighteen on Monday, and eight on Wednesday of this week. The fishings on the coast farther east yielded an average of three boxes per day.—H. W.

Esk (Langholm, Dumfriesshire).—The river has kept low, but in fair fishing order owing to the frequent showers which occur more or less daily. On Wednesday, Mr. A. H. Kerr, and Mr. F. W. Kerr of York, staying at Eskdale Hotel, had an 8lb. basket, containing four sea trout, two whiting, and eight yellow trout. On Thursday, one sea trout, 3lb., and on Saturday night, they had 10lb. of fish, including six sea trout; and again on Monday night, four sea trout, and several yellow trout, all caught at night in the reserve water. Amongst those who have been successful are Mr. T. Irving, and Mr. A. McMillan, both having had several sea trout, besides other anglers who have had good baskets of yellow trout. Mr. Craig, Cross Keys Hotel, two salmon in the Cauldron Pool, 10lb. and 14lb.; and Mr. Shand, six sea trout, weighing from one and-a-half to 5lb., beside a goodly number of anglers who have had smaller catches in the Canobie Waters and in the Liddle. There is a considerable number of sea trout and whiting in the river, and one of the sights of the district is in driving or walking along Gilknockie Bridge, to see the shoal of sea trout lying in the river there.—W. D.

Helmsdale (Helmsdale).—Sport during the last two weeks has been very poor, so far as anglers were concerned, the weather being far too warm and sultry, and fish refusing to move. This has not been the case with the netsmen, who have daily been getting great hauls of grilse and salmon. Of late the river has been several times in Food, and it was so on Friday last, when fish were running very strong, so strong indeed was the run that two boats constantly netting was quite unable to cope with it. The river is so stocked with fish now, that so far as angling is to be considered, the prospects were never better. The river will now remain during the season in good fishing order, and as the weather gets colder, fish will take. Sea trout this season have been remarkably scarce, indeed, on no occasion have I seen them so few, what the cause is for this one cannot tell. The herring fishing has opened very successfully here. On Tuesday one hundred boats landed over a thousand barrels of herrings.—S. C.

Inchnadamph Hotel Waters (via Lairg, N.B.).—Trout angling has fallen off on account of adverse weather. The following are a few of the baskets since last reported. On Mid Assynt, Mr. and Mrs. Kirby, Coventry, in day, landed forty-two trout, 13lb.; and Mr. Leatham, in one day, forty-three trout, 20lb. On Loch Assynt, Mr. Kirby in two days, seventeen trout, 5lb., and a grilse of 6½lb.; Colonel Gillespie, London, one day, sixteen trout, 6lb.: and Mr. Graham, one day, twelve trout, 4lb., and a grilse weighing 6½lb. On Loch Awe, Mr. Kirby, one day, twenty-four trout, 12lb.; and Mr. Cookson, York, one day, thirty-six trout, 14lb.—McB.

Kyle of Durness.—Fishing is going on tolerably. Results for three days by two anglers sea trouting: Rev. H. L. Porter, 16th, fifteen sea trout, 21lb.; Mr. Yarborough, Leeds, three, 3lb. 17th. Mr. Porter, fourteen, 24lb.; Mr. Yarborough, five, 5lb. 18th, Mr. Porter, eight, 9lb.; Mr. Yarborough, five, 5lb.—JOHN SUTHERLAND, head gillie.

Kyle of Sutherland (Bonarbridge, N.B.)—Capt. Holder, London, and party, besides several local anglers have been rod fishing on this tidal water, but sport has not been good for some weeks back. The hauls of salmon and grilse by net fishing have also been less productive of late. As compared with the previous week the takes on Messrs. Penrie and Pitcaithley's skibo fishings were about the same; but Mr. Smith's Invercharron and Craggandubh fishings, as well as Mr. Anderson's nettings at Scalp, River mouth, and South Bonar, all showed a considerable falling off. Taking all the fishings in this neighbourhood together it is estimated that the weight of salmon and grilse consigned to Billingsgate in the course of the week would aggregate about 3 tons 4cwt.—McB.

Lairg, N.B.—On the hotel waters some very good baskets were made last week. The following are the details: On Monday, Mr. Meakem killed twelve trout, 6½lb., on Shinness Bay; Mr. Jowers on Loch Cracail had eleven, 5lb.; Messrs. Copeland and Cumming, fifteen, 8lb., on Loch Shin; and Major-General Stafford, seven, 1¾lb.; on Loch Beannech. On Tuesday, which was much too calm and bright for good sport, Messrs. Copeland and Cumming killed thirty-two, 13lb., on Loch Shin; Mr. Jowers got nine, 5½lb. on Loch Beannoch. On Wednesday, on Loch Shin, Messrs. Copeland and Cumming got nine, 6lb.; Mr. Jowers, nine, 4¼lb.; Mr. and Mrs. Milne, nineteen, 1½lb.; and "X. Y." five. On Loch Beannoch, Mr. Meakem got three of 2¾lb. Thursday was calm and wet but a good fishing day. Mr. and Mrs. Milne caught fifteen, 6lb., on Loch Shin; Messrs. Copeland and Cumming, twelve, 7lb., on same loch; Mr. Meakem, seven, 7lb., on Loch Beannoch; Major-General Stafford, seventeen, 10¾lb., on Loch Naur-fuar-leachd; Mr. Jowers, eight, 4lb., on Loch Cracail. On Friday some excellent baskets were made. Messrs. Copeland and Cumming fishing Loch Shin killed eighteen fine trout, weighing 19lb.; Mr. Jowers on same loch got nineteen, 9½lb.; and Mr. Milne, twenty-seven, 12lb.; Mr. Meakem, six, 4½lb., on Loch Beannoch: Mr. Muir, sixteen, 7lb., on Loch Naur-fuar-leachd. On Saturday, on Loch, Beannoch, Mr. Jowers got five, 4½lb. J. Y.

Lochasopal (Bunessan Hotel Water).—On the 15th inst., Dr. Somerville, of Glasgow, angling on Lochasopal, had four sea trout and fifteen brown trout; 16th, the same gentleman had three sea trout and ten brown trout; 17th, Rev. Mr. Tremeneheere had six sea trout, the heaviest one 2½lb., and fourteen brown trout; 18th, Rev. Mr. Tremeneheere had four sea trout, the heaviest one 3lb., and twelve brown trout. We have had very heavy showers of rain during the week, but on the whole the weather is very suitable for angling.—J. C.

Loch Laro (Sutherland). —On Monday, 20th, Mr. Walter Scott-Brock, Achindinch House, Invershin, and Mr. A. Duncan, Brighton, landed nine fine trout, which averaged ½lb.—McB.

Loch Leven (Kinross).—With a heavy electric atmosphere, clear and low water, and a lack of beneficial moisture, angling is at a great disadvantage here. Evening fishing, however, has been prosecuted with fair success in the deep water, the average basket for about three hours' sport after five p.m. being 5lb. Two gentlemen from Edinburgh had the best evening sport on Saturday, when they captured thirteen trout, 12lb. 8oz. The most successful party out during the day was Messrs. Ferrier and Donaldson, Edinburgh, eighteen trout, 18½lb. The Stirling Club, on Tuesday, with six rods, reported a total capture of nineteen trout, 15lb. 11oz. Perch fishing has been prosecuted with great success here during the week. Three boats landed, with the rod, nearly four hundred in the course of about eight hours.—ROBERT B. LAING.

Loch Lochy (Invergloy Hotel).—Mr. W. F. Webb, fishing on Friday, Saturday, Monday, and Tuesday made the following baskets of trout—4½lb., 4lb., 5lb., and 2lb., and caught one sea trout of 3¼lb., another of 2lb., and one *Salmo ferox*, weighing 6lb.—J. R. EGGER, manager.

Loch Migdale (Bonarbridge, N.B.).—Some nice baskets have been made by various anglers. On Monday this week, Mr. MacPherson, Bridge Hotel, landed several beautiful trout, which weighed ½lb. each on the average.—McB.

Lochy-Spean.—Some remarkably fine large fish, fresh run, and in the perfect pink of condition, have been caught in this river this summer season. July we count our best grilse angling month, but, strange to say, though so large and fine-fed as almost to be an exception, these fish, so far, have proved to be scarcer than usual.—CAPTAIN WAUGH.

Naver (Strathnaver, N.B.).—Salmon and grilse angling appears to be improving. On Saturday week, Mr. Darwin, Skelpick Lodge, caught six fish instead of four, as stated by mistake in last report. Mr. Lundie Tongue, on the Borgie, had two fish on the 11th and two on the 13th. Last week, Mr. Darwin landed five on Monday, two on Tuesday, two on Wednesday, seven on Friday, and two on Saturday; Sir J. Edwards-Moss, Borgie House, caught several fish both on Naver and Borgie, since last reported. River at present well stocked with fish.—McB.

Overscaig Hotel Waters (via Lairg, N.B.). — As full details for the whole week would occupy too much space the following abbreviated record may suffice. Mr. and Mrs. Sample, Morpeth, fished Loch Shin on Tuesday and landed one dozen trout, weighing 5lb., besides a *Salmo ferox* of 7½lb.; and on Wednesday on same loch, seventeen trout, aggregating 8lb. Mr. Hills and Mr. Murrey fishing together on Merkland on Tuesday, twenty-six trout, 11lb.; and on Loch Griam, on Wednesday, forty trout, 11lb.; Mr. Henderson fished Loch Shin, on Tuesday (a few hours only), twenty trout, 7½lb.; and on Wednesday, seventeen trout, averaging ½ib. each. Mr. Criechton, Edinburgh, fished Loch Griam on Tuesday, nine trout, 5lb.; and Fiag beat on Wednesday, twenty-one trout, 7½lb. Captain Murchison, London, fished Fiag beat on Monday, fifty-eight trout, 21lb.; on Tuesday, Loch Gorm, sixty trout, 20lb.; and on Wednesday, same loch, sixty-four trout, 20lb.: a total for three consecutive days of one hundred and eighty-two trout, 61lb. On Saturday, which was very unfavourable for angling, Captain Murchison, on Loch Shin, twenty-eight trout, 12lb.; Mr. Liddell, same loch, three dozen, 9lb.: Mr. Sturrock, on Loch Merkland, one dozen, 5½lb.; and Messrs. Hills and Murray, on Fiag, half-dozen trout averaging ½lb. each. Captain Burton and Rev. Mr. Porter were also out for a day last week, and landed twenty trout, 12lb.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.)—On Wednesday, last week, Dr. Irvine, Preston, and Rev. Cave Brown-Cave, Preston, were out on Loch Inchard, and landed a number of cod and lythe; Mr. and Mrs. Young, London, on Loch Tigh-Seilg, two dozen trout, 8lb.; and Mr. Maitland, Dover, off Cape Wrath, a number of cod. On Thursday, Captain Livett, Oxford, on Loch Mathair-a-Gharbhuilt, one dozen trout, 5lb.; Rev. Mr. McConnell, Dorset, on Loch Tigh-Seilg, thirty-one trout, 9lb.; and Mr. Livetti Scrivener, Oxford, on Loch Garbet-beag, one salmon of 5lb. On Friday, Mr. Livett fished Loch Mathair-a-Gharbhuilt, and landed fifty trout, 21lb. On Saturday, Rev. Mr. McConnell, on Loch Blarloch-Beag, one dozen trout, 5lb.; Mr. and Mrs. Young, London, on Loch Inchard, nine sea trout, aggregating 12lb. and 19lb. lythe; and Mr. Maitland, Dover, on Loch Garbet, one sea trout of 2½lb., and a salmon of 8lb.—McB.

Shin (Sutherland, Arms Hotel, Inveran, N.B.).—Since last reported the sport obtained by Lord Braybrook and party on the lower beats has been as follows: On Wednesday, the 8th, his lordship landed a grilse of 7lb.; and on Thursday three grilse, weighing 6½lb., 7lb., and 8lb. On Friday, Lord Braybrook was again successful, having caught two grilse, 7½lb. and 6lb.; and on Saturday, four, weighing, respectively, 4lb., 5lb., 3½lb., and 6lb. On Monday last week, the same angler caught two nice fish of 6lb. and 7lb. Tuesday was blank; but on Wednesday Captain Greenwood landed a fine salmon of 21lb., on Meadow Pool. On Thursday, Lord Braybrook caught an 8lb. grilse on Big Fall, one of 5lb. on Fir Dam, and a 13lb. salmon on Cromarty. On Saturday Captain Greenwood had a grilse weighing 6½lb. on the upper waters, and Lord Braybrook one of 5½lb., on Cromarty Pool. On Monday this week Lord Braybrook grassed two salmon, a thirteen-pounder on Cromarty Pool, and one of 10lb. on Clarag. A 19lb. salmon was caught on Meadow Pool by Captain Greenwood.—McB.

Sutherlandshire (Forsinard Hotel).—We are having excellent sport and good fishing at Forsinard Hotel this season, both trout and salmon, particularly since July set in; it was not so good in June owing to cold easterly winds. We now get, occasionally, baskets from 25lb. to 30lb., of from 71 to 80 or 90 trout, for one rod. Salmon fishing is very good indeed, owing to frequent spates we are having lately.—DONALD GUNN.

Tongue Hotel.—July 13, Dr. Phillipps, on Kyle, one salmon, weighing 7½lb., and eleven sea trout weighing 15½lb.; Mr. Bourne, on Loch Slam, 7lb. trout; Mr. Ratcliffe, on Loch Craggie, 7lb. trout. On the 11th, Mr. Bourne, on Kyle, two sea trout, weighing 2¼lb: Mr. Bolton, on Kenloch river, twelve salmon, weighing 4½lb.; Mr. Ratcliffe, on Loch Loyal, 12lb. trout. On the 15th, Mr. Bolton, on Kyle, six sea trout, weighing 16lb.; Dr. Phillipps, on Loch Loyal, 10lb. trout; Mr. Rigden on Loch Loyal, 4lb. trout; Mr. Ratcliffe, on Loch Loyal, one salmon, weighing 5lb. On the 16th. Mr. Rigden on Loch Loyal, ten trout, weighing 7lb.; Mr. Bourne, on Kyle, eight sea trout, weighing 12lb., and one bass, weighing 4lb.; Dr. Phillipps, on Loch Loyal, 9lb. trout. On the 17th; Mr. Bourne, on Loch Loyal, 10lb. trout; Dr. Phillipps, on Loch Loyal, 3lb. trout; Mr. Rigden, on Loch Slam, one salmon, weighing 8½lb. On the 18th, Mr. Bourne, on Kyle, two sea trout, weighing 3lb.; Mr. Rigden, on Loch Loyal, 8½lb. trout; Dr. Phillipps, on Loch Loyal, 4½lb. trout.—A. CAMPBELL.

Tweed.—Angling of all kinds is nearly at a standstill, very few Waltonians caring to go out during the day, while the few who try their luck during the evening or early morning have but poor sport. Salmon angling is *nil*, and must continue so until we have a rattling good flood of some five or six feet, so as to allow of an upward run of fish from the sea coast and the lower reaches. In some of the waters further down the river, and nearer to the sea coast, a considerable number of grilse and sea trout have been observed, but there are few captures, the fish evidently awaiting a rise in the rivers to enable them to ascend to the higher stretches. In a few of the deeper pools in the vicinity of Kelso a good few fish have been seen disporting themselves lately; this sign is said by wiseacres to betoken a rise in the rivers, and has certainly proved to be correct, for, as I am writing this (Thursday, noon) the rivers have both suddenly come down, and the Tweed ometer at Kelso Bridge registered a flood of two feet at one o'clock. Few captures have been made of grilse since last week, but when once this flood subsides there are sure to be a few days good fishing, both for trout and fish of the salmon kind. The weather, however, has again turned out very fine, with a nice soft wind from the east; while the barometer is fairly high and steady.—MAXWHEEL.

Ugie (Aberdeenshire).—This once famous sea trout and autumn run salmon stream has been the cause of much discussion in the Peterhead Town Council on account of two of the officials having recently been summoned and fined for allowing the liquid manure being washed out of the depot into the river, under the Rivers Pollution Act. The majority have decided to apply to the higher court for a bill of suspension as the facts of the case did not warrant a conviction. A small but influential majority were for allowing judgment to stand, as against the officials and make them attend better to their business in future. "All's well that ends well," come that when it may, but meantime the Ugie will be all the better of the row.—E. N.

Whitadder (Ellemford).—On the 14th inst. several rods left the cottage but the sport was very poor; wind, north-west. On the 15th, the two best baskets by far were got by Dr. C. Martin and Mr. Sandy Martin, they fishing the upper reaches of the river; Mr. Volck, of London, has been very successful indeed in the evenings, with the fishing, he had one over 2lb., several about 1½lb. The weather is very thundery and heavy showers, but no rain to make any perceptible difference in the water. 21st, Dr. C. Martin had 5½lb.; Mr. Byers, of Edinburgh, 4lb. of pretty good ones.—R. J. FENTON.

Ythan (Udny Arms, Newburgh, Aberdeenshire).—Splendid sea trout fishing is presently being enjoyed on the tidal reaches. The fish are plentiful and of an exceptionally heavy size. Among those making successes recently may be mentioned Mr. and Mrs. Davidson, Wellwood, Aberdeen; Mr. G. and A. Rennie, London; Mr. and Mrs. Piercy Smith, Sussex; Mr. and Mrs. Walter Smith, Kent; Mr. and Mrs. Leslie, Aberdeen; Colonel Hunter, Tillery; Mr. Snowie and Mr. and Mrs. Briggs, of St. Andrews.—G. M.

Irish Reports.

Blackadder.—Ballynahinch fishery, since my last report the following have been the takes: General Beresford, nineteen salmon and twenty-five sea trout; General Cooke, five salmon and some trout; Messrs. Pike and Antoni, four salmon and sixty trout; Mr. Hadden, three salmon and thirty-eight trout; Mr. Woollston, one salmon and forty-five trout; Mr. Moore, in two days, fifty trout; Mr. Houlgrave, one salmon and thirty-six trout; Mr. Winter, two salmon and forty sea trout; Mr. Debenham, one salmon and some trout. Total, thirty salmon and three hundred and forty-eight trout. Water still very low, but a break for wet this last week.—TOOMBEOLA.

Erne and Lough Melvin.—All through the past week the weather was very hot and bright, and not a breath of wind, and hopes of catching salmon was almost out of the question. However, the four salmon anglers who were on the river kept at it with a keenness worthy of a better reward, for but few salmon were taken. This week is looking much better, and capital sport was had on the 20th. Trout fishing on Melvin was also poor, and but few decent baskets were taken.—M. ROGAN AND SONS.

Lough Currane (Waterville, Co. Kerry).—While trout fishing is now in full swing, and brown and lake trout are rising freely as many as twenty white trout were had in a day, and the average basket has been about nine white and six brown trout. The general run of white trout are now very small; in fact, only herring size. The big fellows which came up earlier are very sulky.—THOS. J. DENNEHY.

Lough Neagh (Ulster).—A recent good run of salmon has stopped short again and the fish are getting scarce, only a few brace being netted along the Derry and Tyrone shores. Lake trout are rising better. A Glasgow professional, Mr. James Eccles, the other evening made a bag of forty-two trout off Blackards Rocks, the day being very rough and therefore favourable. Heavy pike are plentiful and some running as high as 40lb. have been taken since my last report. Bream are getting scarce and not taking so well; but perch are in shoals of enormous numbers. Good takes of trout are made by netting.

Moy and Lakes (Ballina).—Fairly good sport has been obtained on the river here last week and the beginning of this. Mr. J. Boyd killed twelve fish in three days, his top score being fix fish one day, weighing 37lb.; Dr. Nodes had six fish for the week, weighing 42lb.; Mr. Clarke, seven fish; others had from three to five fish each; the Rev. Adams, three fish one day. Plenty of sea trout and grilse ascending the river with every tide. Another good fresh would improve angling. Fishing free to tourists and strangers.—FRANK HEARNS.

Shannon and Lough Derg.—Rain is falling in abundance and water rising. In addition to the splendid stock of salmon and grilse already in the river, hundreds of others are certain to run up from Limerick and Castle Connell this week and next, so that sport here at Killaloe during next month (August) stands a good chance of being better than in June or July. As for trout fishing, August is always a good month for the sea and brown trout, and the preserves positively swarm with the latter. I attribute this pleasing state of things to the fact of the wings of the eel weirs having been considerably shortened a year or two ago. On July 12, Mr. W. Gorst, one grilse, 5lb. 13th, Major Traherne, one grilse, 6lb. 14th, Mr. W. Gorst, two grilse, 6¾lb., 6½lb. 15th, Dr. R. Gorst, one salmon, 11½lb. 17th, Dr. W. Williams, one grilse, 5lb.; P. Ryan and W. Fogarty, two grilse, 9½lb., 9lb.; Dr. R. Gorst, one salmon, 7lb., and three grilse, 7lb. each; F. Johnson, one grilse, 3¾lb. 18th, one, 2¾lb.; Dr. W. Williams, two grilse, 7lb., 6lb.; P. Ryan and W. Fogarty, one grilse, 8lb. 19th, one, 9lb. 20th, one, 8lb. 21st, one, 6½lb.; W. Barry and Bill Malone, fishing for Dr. Gorst and party (who have returned to Liverpool), two grilse, 7lb., 6lb., and lost a salmon and a grilse. Dr. Gorst and friends have killed several baskets of grand trout during the week. On the whole these gentlemen have enjoyed very good sport during their three weeks' stay. Fishing prospects good. July 22, Wm. Barry and Bill Malone, fishing for Dr. Gorst, one grilse, 5¾lb.; P. Ryan, and W. Fogarty, one salmon, 11lb.—S. J. HURLEY.

Suir and its Tributaries (Clonmel).—The Inspectors of Irish Fisheries, are holding a series of inquiries in the different divisions of the Waterford District on the following subjects:—(1) To inquire into the alleged diminution in the numbers of salmon that have been taken since 1885, in the fresh water portions of the rivers Nore and Barrow, and to make such bye-laws as may be considered necessary for the further limitation in powers of netting in these rivers, or, to extend the close season for netting therein. (2) To inquire into the present mode of using the draft or Seine net in the river Nore, below Innistioge Weir, and to impose such restrictions as to its length and mode of use as may be considered necessary. (3) To prohibit the use of any engines to take fish in the Navigation Basin at Carrickbeg, on the river Suir. (4) To prohibit the use of draft or Seine nets, on the river Suir above Tinhalla, and to regulate the length and mode of using nets on river Suir below Tinhalla. (5) To prohibit the use of gaffs as auxiliary to angling with rod and line, and also the use of worms or natural bait during February and March. (6) To alter the open season for taking salmon and trout in the whole district, so that fishing shall not commence before the 1st March in any year, instead of as at present on the 1st February. Meetings have already been held at Carlow, on the 18th inst., at Bagnalstown on the 20th, at New Ross, on the 22nd; and Kilkenny, on the 24th; and will be held to-day at Thomastown; Innistioge, 27th; Clonmel, 29th; Carrick-on-Suir, 31st; and at Waterford on the 3rd August, and as these enquiries will be most exhaustive, it is hoped that the result will be a marked improvement in our fisheries.—RICHD. BRADFORD, Clonmel.

NOTES FROM IRELAND.

[FROM OUR DUBLIN CORRESPONDENT.]

ALL over this country, at the present time, anglers are having as busy a time of it as they ever had since the season opened, and reports say a perfect raid has been made on most of the notable fisheries this week. I am not at all surprised that such is the case, for I do not recollect having seen for many years such an influx of tourists as I have met everywhere through Ireland this past fortnight. The Scotch are in the majority, but there are hundreds of English and Americans as well. It is pleasing to be able to say the weather is behaving extremely decent, and in the eastern districts has been especially favourable to the angler. Trout fishing continues excellent in Dublin, Wicklow, and Kildare districts, whilst on Westmeath Lakes sport has improved, particularly on Loughs Owel and Ennell, where dapping has been indulged in with much success. Salmon and peal fishing at Castleconnell is as good as is on record, so far, and although bright, warm weather has latterly prevailed, the score is good, peal captured running up to 9lb. The Newgarden, Summerhill, and Hermitage waters are greatly patronised for salmon and peal, whilst trout fishing at Castleconnell continues fair.

DURING the last fortnight Mr. C. E. Hill, on the New Garden Fishery at Castleconnell, killed seventy-three peal to his own rod. It is said the run of these fish on the Shannon and its tributaries has been the best for years.

SEA angling everywhere around the coast never was better than at present, and it is a positive treat to see numbers of boats that skirt the land along by Howth, Dublin, Kingstown, Bray, &c. I learn one sea angler at Waterville (Co. Kerry), who used the rubber eel, caught twenty-five pollack, 7lb. each on an average. Gurnet are giving fine sport everywhere, too.

IRRESISTIBLE attractions are being just now held out to visit the renowned Loughs Corrib and Mask, where, according to report, salmon fishing is at its best. Mr. Joyce, the proprietor of Clonbur Hotel, has always made the comforts of anglers his special study, and, being a practical angler, is as good an authority as any in the west; therefore I would recommend those going to the district to drop a line to Mr. Joyce.

NOTES FROM YORK AND DISTRICT.

ALTHOUGH thunderstorms have passed over Yorkshire, and rains have fallen almost daily, the rivers in the county of broad acres have, speaking generally, only slightly experienced the sadly-in-need-of freshes. Sport during the past week, however, has been, for the most part, good. On the Cota, the Yore, the Wharfe, the Nidd, and the Derwent I have heard of a few nice panniers being taken. The Tees at Middlesborough has also been improved, and anglers have done well. The Ouse at York has attracted numerous fishermen, especially worm anglers. A few gentlemen have tried the fly but although fish have been fairly well on the feed, they have not been well rewarded for their trouble. The worm anglers have certainly done the best, but nothing out of the ordinary course has been taken. Few anglers have tried the Foss. The York branch of the Northern Anglers' Association did at one time entertain some hopes of remedying its unhappy state, but, so long as the ownership of the river is disputed, any steps in that direction would be impracticable. Several riparian owners, too, according to the accounts given by some anglers, show some little indisposition in allowing fishermen on their lands, but nothing in the way of a stoppage has presented itself.

The Stonegate Angling Association, formed principally of the employées of Messrs. Waddington and Son, held its annual contest at Cottingwith, on Saturday, the requisite permission being kindly accorded by Mr. J. J. Dunnington-Jefferson, J.P., a well-known and highly-appreciated friend of anglers. A strong wind interfered much with sport, and unhappily little was caught. The York Angling Association propose to hold their yearly match on Bank Holiday, when, should the conditions be favourable, the gathering will doubtless be of no little interest.

Of the numerous competitions which have this summer taken place, none has attracted more competitors than that of the annual match in connection with the Thirsk and Sowerby Angling Society, which took place in the river Swale, in the vicinity of the village of Catton, on Saturday last, permission being kindly accorded by Mr. Rob. Nearly sixty anglers journeyed to the stream, the prizes—which were of a substantial character—doubtless being one of the chief causes of so large a numerical assemblage. Although the water was somewhat low, it was not in a bad state for bottom fishing, the majority of the fish being taken with the worm. At the close of the match the successful competitor was Mr. G. Hudson, Thirsk, who scaled 4lb. 3½oz. His pannier consisted principally of roach and perch, the latter fish being seemingly well on feed. There were many minor prizes, and altogether a pleasant and most enjoyable day was spent.

AUGUST BANK HOLIDAY ARRANGEMENTS, 1891.

The Great Eastern Railway Company announce cheap excursions. Bookings on Friday, July 31, to Ely, Hunstanton, Dereham, Colchester, Ipswich, &c., and on Saturday, August 1, to Cambridge, Lynn, Norwich, Yarmouth, Doncaster, Hull, York, Newcastle, Leeds, Manchester, &c. A special booking office will be opened at the Liverpool-street Station from July 28 to August 1, for the issue of ordinary tickets, and of tourist, fortnightly, and Friday or Saturday to Tuesday cheap tickets to the sea-side and the Broads district, for use on forward dates. Tickets can also be obtained at the company's West End offices, 61, Regent-street, 215, Edgware-road, and at their other City and West End offices. Additional relieving trains will be run on Friday and Saturday to Southend-on-Sea, Colchester, Ipswich, Norwich, Clacton, Walton, Yarmouth, Lowestoft, Cambridge, Lynn, &c., and on Saturday for the accommodation of persons detained at business until late in the evening on that day. A special midnight train will leave Liverpool-street at 12.15 for Norwich, Yarmouth, and Lowestoft, via Ipswich, calling at the principal intermediate stations. On Bank Holiday excursion trains will leave Liverpool-street via the new route for Southend-on-Sea, also for Clacton, Walton, Harwich, Yarmouth, Cambridge, and Ely; and St. Pancras, for Yarmouth, Cambridge, and Ely. Excursion tickets will be issued by all trains to Epping Forest, Broxbourne, and Rye House. A special service of trains will run from Liverpool-street every ten minutes to Chingford, and every half-hour to Loughton, and at frequent intervals to Rye House; also from Fenchurch-street every half-hour to Chingford and Loughton. For the accommodation of business people wishing to return to London early on Tuesday morning a special fast train will run from Yarmouth, Lowestoft, Clacton, &c., due at Liverpool-street at 9.1 a.m.

THE
CARBOLIC SMOKE BALL
WILL POSITIVELY CURE AND PREVENT
HAY FEVER
And also the most Severe Forms of the following ailments:

COLD IN THE HEAD
COLD ON THE CHEST
CATARRH

— NOTICE. —

THE FISHING GAZETTE is published every Saturday, and can be obtained at Messrs. W. H. Smith and Son's Railway Bookstalls and of the principal Newsagents and Fishing Tackle Dealers in London and the Provinces.

Communications relating to the Literary Department, Fishing Tackle for Notice, Books for Review, &c., must be addressed to R. B. MARSTON, the Editor of the FISHING GAZETTE, St. Dunstan's House, Fetter Lane, London, E.C.

Correspondents are requested to write on one side of the paper only, and give their real names and addresses, not necessarily as signatures to their letters, but as a guarantee of good faith. Unless this rule be adhered to, no notice will be taken of such communications.

Terms of Subscription.

The GAZETTE can be had by sending Postal Order or Stamps to Messrs. Sampson Low, Marston, and Co., Limited, the Proprietors, St. Dunstan's House, Fetter-lane, London, to whom all money payments should be made.

For One Year, post free, to any part of Great Britain and Ireland			10s. 6d.
,, Six Months	ditto	ditto	5s. 4d.
,, Three Months	ditto	ditto	2s. 8d.
To America and the Continent, the annual subscription, including postage			12s. 6d.

Advertisements.

Applications respecting advertisements should be addressed to the Manager of the FISHING GAZETTE, St. Dunstan's House, Fetter-lane, London.

GRILSE, SEA TROUT, AND BROWN TROUT.

By RENAE.

ADVICE TO HOLIDAYING ANGLERS.

(Continued from page 36.)

GRILSE.—What I have already said on this subject regarding the equipment, I now seek to follow up with some hints concerning the practice. To go right to these without preliminary, I shall assume that the angler has arrived on the spot with all the gear and gibbles wherewith he has deemed it necessary to furnish himself. His holiday is to be spent in fishing for grilse on a Highland river of about the most common size and character. To conduce to his comfort and be a guide and helper to him in getting sport, he has secured the services of a "ferry goot" man—the best available, at all events. No time is lost in getting to the river. It is found to be in ply—delightful! Fish, too, are plentiful, for is it not of all times of the year the time for them—the very height of the season? Great hopes—grand sport certain! Before deciding where he was to go, and ere yet he left his home, he had, by carefully sifting the whole of the information received and comparing the accounts of this place with those of that and the other place, perfectly satisfied himself that if all was gospel and nothing important to know had been concealed from him, his holiday would be spent at this place, on this river, fishing at the choicest time of all, and he now finds he has not been misled. So far so good, then. But first he gets his gillie to select the likeliest fly. This is quickly done, for does not Kenneth know right well from long experience that a certain size of any of the few locally acknowledged good patterns will, when the water as *now* is perfect and the fish are taking freely, prove a thorough nailer. Kenneth, however, finds fault with the hooks: he likes the double ones, but those his "shentleman" has are not the thing; either they are set too far apart or too close to each other. The disadvantages arising from whichever of these faults it may be he points out, and it is forthwith resolved to send for some hooks which are right set—say at an angle of 35 deg. Meanwhile, however, the fishing must go on. It does so, and sport proves good. Lots of fish rise, and that too boldly. With the single hooks, which necessarily require to be a good size owing to the round-running state of the water, they are found to be well held, few, indeed, getting off if fairly hooked at the outset. Nearly all the casts that are in size fish well, and the angler is satisfied. He has lost nothing by using the single hooks, and now he is satisfied that when a good size is required the single hook is as sure a holder as the double one. He has seen also that none of the patterns he has used entirely failed to get him sport. His conviction, therefore, is, that when fresh-run, the fish, provided the water is in right fettle, take any acknowledged good local pattern with a readiness which proves that nice distinctions are merely finical preferences on the part of the angler, fancied, it is true, but not actually found to enhance the character of the sport to any great extent.

I shall now assume that, gradually having run out, the water has at length become very wee—not exactly so terribly small as to be everywhere unfishable, but wholly of no use trying, save here and there. While it kept up, and fish—as they had the chance, or the tide suited—were running up to occupy the catches, it was not required of the angler to fish very fine, dwell long *over* the casts, or trouble himself much about flies. Without doing so he could easily run up a gratifying score. The fish rose freely and boldly; if they meant to come they came at once. Now, however, it is entirely different. Either they are dour and rise badly, or shy and rise distrustfully. Nearly all have become potted; some are getting stale, and most are more or less brown, a colour which they quickly take on in the warm water of summer, and all the more quickly the warmer the weather and the stronger the sun. There is now no longer a fragrant aroma from Nature's garden, or a freshness of earth, air, and water. The earth is parched and thirsty, the air hot and sultry, and the water low run down, heated, and beginning to get filthy. In consequence, no longer, also, are the large hooks—comparatively—which but a few days before took so well, of any use, except late in the evening. They are seen—only too well seen—and the fish fight shy of them. The little skill on the angler's part, which before was required, has now to give place to great skill. He must tax his imagination, the gillie his memory; and the latter, if an observant man, who has practised "noting," should be able to give some most useful wrinkles, tell how, where, and with what, under precisely similar conditions—and at the same time of the year, too—he has before seen fish made to succumb. He will most likely, for one thing, advise his "shentleman" to wade. This previously, I shall assume, had proved unnecessary, indeed not practicable, except at a few places, where, without going in, it had been found that the fishing could be quite as well done. Then the fish lay near the bank, or where not near the bank, at least in water which it was found quite easy to reach and fish perfectly well by throwing a good tearer of a line. Now they are in stream necks, mid-stream runs, and far out catches in deep slow water covering, or only partially covering large stones, which cause eddies and boils. These, then, for the time being, are their holds, and it is out of these holds that they have to be fetched.

The angler is certain to find that for every catch one and the same size of fly is not always the best. Most likely his gillie will inform him of this fact. It is accounted for by depth, velocity, roughness, or placidity of water. Generally speaking, where depth, velocity, and roughness are all combined, the best killing size of fly will be found to be the largest size really good at the time. Even in particularly deep water, which possesses but little current, such a size is not likely to be required; indeed, in nine cases out of ten will not prove the best. As a rule even-running, fair-paced, uncongested, well-out streams, where the water is tolerably shallow, require the smallest flies of all. Along with them, however, owing to their frequency in some rivers, may be named those little odd corners, rush heads, and side casts, which do not stand thrashing, and where if the fish mean to come they come at once. Of such anglers are wont to say, "just a passing throw over it, as we are on our way down, *or up*, to the next cast." The difference between the sizes of the largest and the smallest flies absolutely required is not usually—for summer fishing at least—very great. For example, should nothing larger than No. 5 be required for the strongest, quickest, roughest water, nothing smaller than No. 8 is likely to be needed under almost any circumstances for any of the other casts whatsoever.

On the assumption that the angler is wholly unprovided with flies, I now come to give him what I personally, from experience, conceive to be the best advice he can get as to patterns and sizes for most Highland rivers. The general favourites, Jock Scott and the Silver Doctor, I put to the front, as it is seldom they do not come in useful. The former, when conditions fit, will kill well on almost any river, and the latter is the most widely known and popular bright weather fly. This is so; but, speaking for myself, I should hesitate to say that for many rivers the Jock Scott is the very best fly when the weather is particularly dull, or the Silver Doctor the very best one when the weather is particularly bright. Jock Scott is a rattler in round-running water, and especially so when the day, like the body of the fly, is "mixed"—dark and light. The Silver Doctor is also a rattler of a round-water fly, answering, however, best when the day is bright. Until the water gets very low I am strongly of the conviction that for fishing on mixed days the Jock Scott will, itself alone, be found to be *patterns* enough. In general, it will in a day secure for the angler as many fish as will any number of patterns; as a rule more, because it is seldom an unsuitable fly, while of a lot some are almost certain to be unsuitable, and so in fishing with them time is wasted, as also in often changing. Since I uphold the Jock Scott for a "mixed" day, it is but natural to expect that I should uphold a bright fly for a bright day, and a dull fly for a dull day; and so I do. I am entirely averse to small flies, either for bright or dull weather, having mixed bodies; that is two or more colours. Combinations in small sizes lessen effectiveness, and, moreover, preclude the possibility of thorough adaptability to all circumstances and conditions likely to be met with being compassed by a few patterns. Oh, the indecision, the bewilderment, the humbug of unsuitable selection dead certain to be experienced when the angler has a plethora of mixed bodied flies—a collection, forsooth, that would do no discredit to a peripatetic fishing tackle maker like myself!

The bodies which my own experience has led me to like best, and which I recommend are: For bright weather—light blue, black, herl, silver, golden and green. For dull weather—black, claret, brown and dark orange. The bodies for bright weather should have more, or else much broader tinsel than those for dull weather. This, of course, will be understood to mean as regards size for size. With a couple of Jock Scotts and the same number of another good pattern—say Childers—on No. 3 hooks the angler is equipped with patterns and sizes than which nothing better could be got or larger be required for grilse fishing in summer, on almost any river in the Highlands of Scotland, when the water is in its highest fishable state. Then for all other sizes of water less high, no matter what the size, he will find himself appointed as well as he possibly could be, and not likely to lose anything by losing a fly provided he has six other patterns (with duplicate), in the three sizes, No. 4, 6, and 8,* (according to Messrs. Wm. Bartlett and Sons scale of hooks). Such a stock, which would be eight patterns and forty flies, should not come to much money—might I believe be obtained from the very best fly dresser's for 35s., if not less. The patterns, which I shall name, and leave the angler to make his own *free choice* selection from are: Bright weather—Sun Fly, Dunkeld, Golden Wasp, Green Peacock, Silver Blue, Golden Blue, Blue Doctor, Fail-me-Never, Black and Silver, Green Mantle, Green and Teal, Kelly, and Green Fly: Dull weather—Black Doctor, Claret and Mallard, Brown and Mallard, Dark Bumble, Watson's Fancy, Brown Bumble, Claret Jock, Badger, Cinnamon, and Dark Orange with mallard wing (known in some parts as "Norman").

---

* But in general, when fish are taking particularly well, Nos. 5, 6 and 7 are the sizes which I should say will be found to oftenest come in.

(To be continued.)

ANSWERS TO CORRESPONDENTS.

Anchor and Hope: We consider the carp ranks higher than any of the other fish you refer to.

Straker: Address the Secretary of the United Brothers Angling Society, Druid's Head, Broadway, Deptford.

R. Chapman: Of any bookseller, or at our publishers, price 2s. 6d.

J. W.: Yes, you will get good trout, pike, and perch fishing by staying at the Kenmure Arms, New Galloway, N B. The charges are very moderate. Tariff can be had of the proprietor.

Camp: We fear you will not do much in the daytime in August at either Newbury or Winchester, unless you get private fishing; but the fish often take well for an hour in the evening, when the various sedges and the red rail kill as well as anything. You should have also a supply of quills and spinners for dry fly fishing.

L. W. Donne (G.P.O. Angling Society): The "critter" you sent to us is the hair-worm (*Gordius aquaticus*). It is not uncommon. In appearance it is like a bit of fine fishing line or horse-hair animated, and it is no doubt this animal which gave rise to the absurd idea that eels were bred from horse-hairs, as described in some old angling books. Walton mentions the idea, but with evident incredulity.

Correspondence

[We do not hold ourselves responsible for opinions expressed by our Correspondents.]

"*One of the charms of angling is that it presents an endless field for argument, speculation, and experiment.*"—T. E. Pritt.

ANGLING FOR BARBEL.

Sir,—In reply to "Streatham," in your issue of July 25, I bait as described with a *small* maiden lob. If barbel are feeding well, the bait is almost always sucked *wholly* into the fish's mouth; but if they are "merely nozzling and turning over the bait as if in a spirit of inquiry, &c.," we should find a crafty old stager attempt to suck off the head or tail of the worm. I then slack my line a little, giving the fish time to absorb the bait, and by doing this, I seldom fail to hook the fish.

I don't quite understand what "Streatham" means by a medium-size *ragged* bait.—I am, &c.,

Alfred Jardine.

FISHING QUERY.

Dear Sir,—I should be greatly obliged if any of your readers could inform me, through the medium of your valued paper, as to what salmon and sewin fishing is to be obtained in the Clothi and the upper waters of the Towey (above Llandiloes), at a reasonable cost or fee during August and September? Also where it would be best to make headquarters.—Yours, &c.,

Greenheart.

FOWL IN THE FENS.

Sir,—Excessive game preservation has led to the trapping and shooting of large and small birds of prey, stoats, weasels, &c. Pheasants will be had, and foxes are held sacred. But should a peregrine falcon and her mate, the tiercel, be seen on a manor or a moor, the beautiful and rare birds like the lesser hawks, the buzzards, hen harriers, down to the comparatively harmless kestrel and the owls, alike fall victims, and add to the natural history collections nailed to a barn-door, or on the kennel-house. Fish-eating birds are also thinned down in the interests of fish-breeders, trout-fishers, and anglers generally. And gunners, inexperienced as a percentage always is, help to wing, or wound, or disturb the wildfowl in such splendid waters as the Norfolk Broads, and in the diminished Fen districts. Of course, wildfowl afford fine sport to the clever shot with a ten-bore double (cylinder) gun; and a not too big, but a good retriever. A muff should never go to disturb the birds, and perhaps wound a duck uselessly. You cannot have trout, and herons, and kingfishers, and dabchicks, too, in our shallower streams; and if a golden eagle, a white-tipped eagle, a peregrine falcon, or a bittern be anywhere seen, the impulse of destruction instantly seizes upon most countrymen to shoot or fire at the bird, as if watching the interesting visitor in its glorious freedom was not pleasure enough for the time being.

But is your Eastern Counties' correspondent, William Howlett, quite sure that the ruffs and reeves (male and female of the same species) are among the "now extinct" birds in the Fens? These birds used to be caught early in the summer in large numbers—in springes, it was said—while the pretty-plumaged ruffs were making very comical advances to the more sober-feathered hens. Ruffs and reeves formerly constituted one among several summer tit-bits in every London poulterer's shop, hung beside half-fledged young pigeons, leverets, Aylesbury ducklings, lapwing's eggs, and chicken.

At length somebody suggested how cruel it was to take these migrants in their breeding-time, and the thing got stopped, perhaps about twenty-five years ago or so.

Consequently, one would infer that the ruffs and reeves, so far from being "extinct" visitors to the Fens—land or bog birds—would breed in peace, and increase accordingly. Is William Howlett's experience confined to one locality? He might be interested in reading his old book; and possibly some other person more intimately acquainted with the "feather" *in the Fens*, might give the result of his later observations of Bird Life thereon.

About the time of our good Queen's accession to the Throne, men hawked wildfowl from town to town. The ducks were strung up in a rough staging in the cart, and "ropes" of oxbirds hung in festoons about the vehicle. The fowl, it was stated, were decoy-caught birds, and were sold at a cheapish rate.—Yours, &c.,

Pinion.

LENGTH OF ROACH.

Sir,—Will your correspondent, "Giant," kindly inform me the length of the longest roach he has ever known? The reason I ask is, my friend, Mr. F. Malcom, of 27, Ludgate-hill, caught at Amberley, on July 12 last, a roach that measured from eye to the *fork* of tail 13½in., and the entire length of which was just over 16in., and yet it only weighed 1lb. 7oz. He says: "I have a roach in a case, only 1in. shorter, that turned the scales at the Waltonian Club at 2lb.; and another, 18in. in length from eye to fork of tail, that weighed 1lb. 15¾oz., and obtained the specimen prize. The 2lb. roach was caught at seven a.m., and not weighed until ten p.m."

I should like to hear "Giant's" opinion of the above specimen, and if he has seen one of similar size and weight.—I am, &c.,

G. A. S.

FEATHERS FOR FLY-TYING WANTED.

Dear Sir,—Would you let us know of any place where we could get any feathers? There are a lot of advertisements in your valuable paper on fishing materials, but we are surprised to see so few advertisements on feathers for fly-making. An answer through your valuable paper will oblige.—Yours truly,

John Raisbeck.

Page Bank, Willington, Durham.

REALLY GOOD TROUT FISHING WANTED.

Dear Sir,—Can you kindly inform me, through the medium of your valuable paper, of some really good trout fishing stream not over fished, within say a twenty mile radius of Windermere? Also of quarters where one can put up at, well *in* the country; and I should feel extremely grateful for such information.—Yours, &c.,

X. Y. Z.

Re TROUT FISHING IN THE ARDENNES.

Dear Sir,—I should be much obliged if you could inform me through the *Fishing Gazette*, if there is any fly-fishing likely to be obtainable in the Ardennes district during August, either free or by payment, and if so, what would be the class of flies to take?

Any information will greatly oblige, yours faithfully,

Governor.

[Good trout fishing is to be had in the Ardennes, when water and weather are favourable. The landlord of the Hotel des Ardennes preserves a portion of the river near Deekirch for visitors, as also does the landlord of the Hotel de la Tête d'Or, at Dinant, and others.—Ed.]

LIGHT WADERS.

Dear Sir,—In reply to H. S. Hall, he had best make up his mind to use wading stockings, and light canvas brogues (of course wearing a sock between the two), as these will protect both his feet and knees from wet. High leather boots, or boots with waterproof uppers, reaching over the knee are both great mistakes, as they require two or three days to dry after being saturated with perspiration from the feet, and nothing is more uncomfortable than putting on and wearing a moist boot.

You may fill long boots with hot oats or bran, but it is not good enough, whereas the wading stockings, if turned inside out when taken off, are as dry as a bone next morning, and are quite as light as leather boots.

To protect the knees, take a piece of stout brown canvas, and coat well with india-rubber solution, likewise coat the knees of the wading stockings, allow both to harden, then with rubber solution fix them. The pieces of canvas should be of the size of a soup plate.—Yours faithfully,

Maidenhead. Fraser Sandeman.

AN EEL TAKES THE FLY.

Dear Sir,—Referring to a letter in *F. G.* of June 6, of James Tayler, on "The Life of an Artificial Fly," in which he mentions having caught an eel with a Red Palmer, it may be interesting to your readers to know that while fishing for trout the other evening with an artificial White Moth, I got a rise at once, and was very much astonished to find that I had landed a fine eel, hooked as fairly in the mouth as ever fish was. I write this, as I think it is a rather uncommon occurrence. I may say that the fly was floating, and the fish rose deliberately at it.—Yours truly,

Peeler.

Moynalty, Kells, Ireland.

A HUNGRY THIRTEEN-POUNDER.

Dear Sir,—Fishing to-day in private water, spinning from a punt for jack, I hooked a 3½lb. fish, which was immediately seized by a thirteen-pounder, and so determined was the hold of the larger pike on his victim that I succeeded in landing the brace, although the larger fish hadn't a hook in him.—Yours truly, G. Wilson Wilson.

Buxton.

INIMITABLE MAY FLIES.

Sir,—Kindly allow us to inform those of your readers who, in using our "Inimitable May Flies," found some of the wings stick, that we have now quite overcome the objection, and think that the improvement we have now made in them will make the recurrence of the sticking an impossibility.—Yours truly,

S. Allcock and Co.

A BIG ROACH?

Dear Sir,—On reading my *F. G.* of Saturday last—a paper I metaphorically devour once a week—I notice in your report of the Royal Oak Angling Society, the mention of a roach 3lb. 4¾oz. Is this correct? If so, it is the heaviest I have ever heard of. In reference to "Streatham's" remarks *re* "Angling for Barbel," I have adopted, a (to me) new plan in trout fishing with worm, which has answered admirably; and, I imagine, *may* do for barbel fishing—viz., I thread the worm with a fine baiting needle from head to tail, bringing the head of worm round the bend of the hook.—Yours truly,

Edwin Rogers.

THE CHAMPION ROACH ANGLER.

Sir,—There is a confident ring about the challenge under the above heading in the *Fishing Gazette* of July 25, which seems to imply the possession by the cutlery town of something extraordinary in the way of roach fishermen.

After the memorable series of matches some twenty years ago between our London champion, Woodard, and Bailey, of Nottingham, the latter, excellent all-round fisherman though he was, admitted that for roach fishing pure and simple London stood first; therefore, if the honour now rests with Sheffield, it should be fairly demonstrated by a contest as suggested.

Let this extra keen Sheffield blade be pitted against either Woodard, Fortescue, or Bell, and a very interested circle of *Fishing Gazette* readers will then know if running tackle, however refined in character, is a more effective equipment for capturing roach from the bank than the light tackle generally employed down south.

I cannot help hoping that Woodard will voluntarily come out of his shell of modesty, or that his friends will draw him out from it as blackbirds do snails, and so induce him to do battle once again for the supremacy of the big village. A man is only just as old as he feels, and how our veteran of sixty-five bears his age may be judged from the fact that cold weather has no terrors for him when there is a chance of taking fish, and also that he was quite surprised when, a few seasons ago, he was laid up for the first time in his life through a wetting which would have spelt rheumatic fever and future indoor existence for many a younger man.—I am, &c.,

Clayr Kenwal.

Sir,—Should the proposed roach-fishing contest come off, I believe great interest would be felt by all anglers, and I feel certain the London anglers need not fear they would be disgraced. We have many good men to choose from—Geo. Watling (to say nothing of his clever brothers), and George Fortescue are both clever, quick, with wonderful nerve; even Woodard, old as he is for such a trying contest, would even now be difficult to beat.

In the hands of such men, and I could mention many others, it is impossible for the Lea style of roaching to suffer. I conclude by trusting a match will be made.—Yours truly,

An Old Roacher.

SEA FISHING AT TENBY.

Dear Sir,—In answer to Mr. Aylmore, there is very good mackerel and bass fishing here (Tenby). The former are just coming in, a few odd ones having been caught during the last ten days. There are any quantity of bass, but so far this season, they have taken very badly; but given some warm, settled weather, sport should be had. Conger eel are also plentiful.

Reasonable apartments are to be had; boats at two shillings an hour; but if taken for any length of time a little bargaining will reduce this. If Mr. Aylmore wants bass fishing, I should advise him to inquire for the brothers Howells, as they are out and out the best in that particular line.—Yours faithfully,

George H. Logan.

FISHING QUESTION.

Sir,—Can you or any of your readers suggest the manner in which the trout referred to below were killed?

The watcher employed by the Wensum Preservation Association, whose headquarters are at Fakenham, found, on July 18, about one to one and a-half miles below that place, nineteen trout, from 2¼lb. to ¼lb., lying dead in the deeper holes at the bends of the Wensum, besides two or three very small roach, lying at the bottom, not floating, recently killed, as they were not stiff, showing no external marks of injury. The two largest fish were sent the same day to the public analyser at Norwich, who reports that he "could not find any poison in the intestines or passages leading thereto. If *cocculus Indicus* had been used there would be great difficulty in finding traces of it." The only thing he could find "is lime on the gills. This might come from ordinary chalk, but it might also from caustic lime or chloride of lime put into the water. He could not take upon himself to say that such was the case."

The Wensum is an ordinary, slow, chalk and gravel stream, some 10yds. to 15yds. wide. In it the trout have been increased of late years artificially, but are far outnumbered by roach and dace. The water in the stream is very low, owing to the late dry autumn and winter—not more, I think, than half its average volume—so that when the mill at Fakenham is stopped there is little or no stream below, and the fish retire into the holes at the bends. The difficulty seems to me to be, Why were the trout only killed and no coarse fish, save the two or three small ones mentioned, though far more abundant than the trout? *Cocculus Indicus* is out of the question, as it would be difficult to administer it so as to affect trout only, if at all; and the same may be said of any form of lime or explosives, which would destroy all fish alike. No sewage or gas water is discharged into the stream only at Fakenham Bridge, one to one and a-half miles above where the fish were killed, and where it has been done for very many years.

I own that I am entirely at fault as to the cause of death, and shall be very glad, on behalf of our committee, if you or any of your readers can suggest any way in which it is done, with a view to future prevention.—I am, Sir, yours faithfully,

E. W. Dowell.

The Vicarage, Dunton, Fakenham, Norfolk.

AVERAGE DIMENSIONS OF SALMON AND GRILSE AT DIFFERENT WEIGHTS.

Dear Sir,—A gentleman connected with the Hull Blind Institution has written to me asking what size baskets the inmates should make for 6lb. or 8lb. grilse and 14lb. salmon. I at the moment cannot give him average dimensions, but have told him, as he is in a hurry, that I thought a 24in. long, 9in. deep, and 6in. broad would about do for grilse. Would you be able to give me fair average dimensions of salmon? I enclose a rough form, which I should be much obliged if you could fill up. As a subscriber to your excellent paper I have the less hesitation in writing to you.

I hope you will pardon me for troubling you, but I am anxious that the blind inmates may develop another branch of basket work.—Yours truly,

C. Hutton Coates.

Claxtou Hall, York.

[Mr. W. Murdoch has kindly sent us the following in reply.—Ed.]

Fair Average Dimensions of Salmon and Grilse at Different Weights.

Weight.	Length.	Depth.	Width.
5lb.	25¼ inches	7 inches	4 inches
6 ,,	25½ ,,	7 ,,	4 ,,
7 ,,	25¾ ,,	7 ,,	4 ,,

A GOOD FISHING PLACE IN NORFOLK.

Dear Sir,—I was out on the Broads with A. Nichols, fisherman, Stalham, on Monday week, and caught about a stone and a-half of fish, chiefly roach and perch. Yesterday, we caught over two stone, including bream from 1lb. to 3½lb., roach from half-a-pound to 2lb.; a tench, 2lb.; perch from 6oz. to 1lb.; an eel, 1lb., and several rudd, at 1½lb. Anglers desiring to fish the rods cannot do better than make Stalham their headquarters; they can either lodge with Nichols, who always has a large stock of tackle, and keeps two or three boats, or they will find very comfortable and cheap quarters at the Maid's Head, which I have made my headquarters for the last six or seven years. Host Morfey, though not an angler, makes his visitors thoroughly at home, and they are only five minutes' walk from the river.—Yours truly,

(Dr.) W. J. Simpson Ladell.

Notes and Queries

Mr. F. C. Nash, 3, Parade, Canterbury, informs us that he has a vacancy for a rod on the fine stretch of the Stour preserved by his association. The best of the season is from now to the end, and the water is well stocked with fine trout. Mr. Nash will be happy to give further information.

Messrs. R. Anderson and Sons, of 67, Princes-street, Edinburgh, write: "Fishing in the North has been very bad for some time, but during the last ten days we have had a good lot of rain, and the prospects of the autumn salmon and sea trout fishing are very good indeed."

The Important Solway Sea Trout Case.—On Friday week, in Dumfries Sheriff Court, Sheriff Campion gave decision in the cases in which Robert Beattie, George Irving, and James Johnstone, fishermen, Annan, were charged with fishing for sea trout within the limits of the Solway by means of an anchored boat and a drift net with a weight attached, which, it was contended for the prosecution, constituted a fixed engine. His Lordship had delayed his decision for ten days, and, in announcing his finding, said these prosecutions were for a contravention of the Salmon Fisheries Act of 1861, amended by subsequent Acts. Originally the Act was an English one, but Section 33 of the Scottish Act declared that the provisions of the Act of 1861 should extend to the salmon fishings of the Solway and rivers flowing into the same in so far as they related to the use of fixed engines. Having reviewed the evidence, his Lordship found the accused guilty, but, in consideration of a plea raised by their solicitor that this mode of fishing had been practised in the Solway for a number of years, he fined Beattie and Johnstone 10s. and 31s. expenses each. The charge against Irving, who was a lad, merely in the employment of Beattie, was withdrawn. His Lordship added that if any other case of the kind came before him it simply meant that the penalty would be considerably larger.

Knee Pads for Anglers.—Some one was asking recently who makes these. Mr. Basil Field, the well-known salmon and trout angler, writes that he can recommend those which Mr. F. Malcom, of Messrs. Woolgar and Co., Ludgate-hill, have made for him for years. The pad should be supported by a strap attached to the wader; those which strap on above and below the knee are very uncomfortable if tight, and always slipping if loose.

Mr. J. Richardson, of 151, High-street, Notting Hill, London, W., asks if we will mention that he has removed from the above address to Darenth House, Eynsford, Kent (three minutes from Eynsford Station, L.C.D.R.).

Last week the Deeside Committee of the County Council received the last and final notice from the town's clerk of the "Silver City of the Sea," that legal proceedings would be taken forthwith if steps were not at once taken to remove the grievances complained of as to part of the sewage of several villages finding its way to the Dee, and the council sensibly took the bull by the horns, and appointed their County Sanitary Inspector to confer with an engineer as to what is best to be done rather than dispute the matter longer. The Dee is the purest stream of its size in the kingdom. There is not a single mill on it, nor manufactory of any kind along its banks. Yet this is deemed necessary to make assurance doubly sure that the Aberdeen folks will get literally a draught of *aqua pura* drawn from the river thirty miles off.

Otters in the Solway.—During the recent droughty weather, when the rivers were exceptionally low, several otters were seen by fishermen disporting themselves in the Solway near the estuaries of the Nith and Annan. As all the Border streams have now increased in volume, they will no doubt return to their old haunts, where they have been sadly missed of late by at least two hard-working packs.

To Whip Spliced Rods.—The following is the method recommended by Messrs. William Blacklaws and Son, tackle makers, Kincardine-O'Neil, and is the outcome of half a century's experience on the part of the senior member of the firm. The rod should be fitted with ordinary tiers or keepers and very small brasses, just to keep the parts in position while being whipped. Wax a six-yard cord of from six to ten ply lint, according to the size of rod, and which may be had from any village saddler or cobbler. First make the figure 8 round the keepers, then whip the splices from end to end, covering brasses and all. By this method it is impossible the parts can work out, while the rod may be put up or taken down at will—a new cord being the only necessary requisite.

Eel Choked by a Frog.—Mr. William Howlett writes: "Dear Sir,—I herewith enclose for your inspection one of the most remarkable occurrences I have ever seen—an eel choked in attempting to swallow a frog—and which I thought would be a very interesting illustration for the *F. G.* I had a long walk lately all through the Reach and Wicken Fens, and there I found the eel and frog. A Mr. Wells, a large farmer at Reach, first discovered it on a dry bank about half-a-mile from the river, a fortnight since. It was then scarcely dead. He took it home, and simply hung them up to dry, and kept them until I went over, and as I found them, so I have sent them for your inspection. Please return to me safely. It certainly is a most remarkable occurrence, and well worth recording."

A Trout Fishing Story.—One day a well-dressed man visited a certain hamlet, carrying the newest of fly rods; he intended to fish for trout. Could anyone give him information as to the best place for his day's sport? As he asked for it at the bar of the small inn of the hamlet, the information was soon forthcoming. One of the customers there told him he knew where there was a big one, and no mistake; he could show it to him, and then all he had to do was to catch it. The bait took. After a generous "liquor up" and the tip of a shilling, away they started. He saw the fish, and for nearly the whole of the day he threshed that water hard enough to frighten all the trout that ever swam in it. But not even a fish the size of a sprat did he capture. At the inn, before his train started, as he rested for an hour, his guide of the morning appeared and asked him what sport he had had. "Not a single fish," replied he; adding, "I would spend half-a-sov. in drinks if that trout lay in my basket, or give the same sum to anyone who would put me up to getting it there." Five minutes later the native whispered to him, "Did ye mean what ye said?" The angler pulled out half-a-sovereign and showed it to him. "Bide here a bit," said the man; "your train don't start yet." In less than half an hour the stranger was beckoned out of the bar to see the big trout, still alive and kicking vigorously, on some flags in a basket. He had a hook attached to a piece of broken gut in his upper lip; not a bruise or a mark was on him. "Take him, basket an' all, fur what ye said," quoth the native; "he's a precious sight too big to go into that consarn o' yourn; and I be werry much obleedged to you for this 'ere half-sov'rin, and no mistake." I was informed afterwards that the fish had been so frightened by the threshing of that would-be angler that ho had retreated to the utmost limit of his haver under the bank, and there he had remained, as only a trout will remain. The cute rustic knew this would be so, and he had simply gone down to the spot, taken off his shoes, and tucked up his trousers, and "groped him out." That is how mest of the great trout are captured, but I never saw one that had been groped for that was not shown with a hook in his mouth. A gut hook does not cost much, and it looks so very much better.—"*Ways and Whims of Fresh-water Fishes,*" *by a Son of the Marshes, in* "*Blackwood's Magazine.*"

DEE FISHINGS.

[WITH ILLUSTRATIONS.]

The Roe's Pot.—This famous pool, of which the illustration is a view of the upper portion, is quite two hundred yards in length. Its fishing from the right bank goes wholly with Mr. J. T. Hay's beautiful estate of Blackhall; but from the left, where the photograph was taken, it is about equally parted between two proprietors—Sir Robert Burnett, Bart., of Leys, Crathes Castle, owning the upper, and Mr. Duncan Davidson, of Inchmarlo, the lower length. From Mr. Hay's side the sport is sometimes good; from the other it is usually much better. Both opposite the detached birch tree and from the large stones out in the water there is always in spring, summer, and autumn, at the right time and when fish are plentiful, a very good chance of the angler experiencing the gratification of getting on a fish, provided the river is nothing above its seasonal average volume. This is on the Inchmarlo "water," where a little lower down, close to the "march" paling and dyke, there is from a huge boulder-stone, another tip-top cast. The Roe's Pot, however, is close fishing throughout, as within easy casting reach of the left bank fish lie all over it, during the best times of the best seasons, which without a doubt are spring and autumn. Till within twenty yards of the lower end of it, where Crathes comes in, the Inchmarlo part of the pool is best for sport in a fairly small state of the river; the remainder when the height is the average for the season; while the Crathes part undoubtedly does best with a good round water, the bay and lower slower portion in a biggish water.

THE ROE'S POT (from Inchmarlo Side).

From where in the view the water first comes into sight (in a direct line beyond the birch tree), it tears down when in strong volume at unslackened speed over a rocky bouldery bed, first south then east, for a distance of three hundred yards, till it gets somewhat beyond the large stones (seen in the water) which would then be covered.

Taken for the whole fishing year round, the Roe's Pot is one of the most productive pools of Dee. It is nearly twenty-two miles from the sea by the windings of the river, yet in spring and summer not very many of the fish rest long or take well till they have pushed up thus far. Unlike the autumn fish, the springers and grilse are unencumbered (the former wholly), and so hold on till here they encounter the first regular series of rushing dashing bouldery rapids. In the "back end," however, it is different, more seaward reaches at the first being best, in consequence of the fish being heavy, and not seeking, save when delayed, to make the run quickly through the generally easy swimming water. Several times the Roe's Pot has been known to yield to the rod in one day nine to twelve autumn fish, averaging little short of 20lb., but those takes were all obtained in years prior to the terrible ice flood of March, 1880. Since that memorable "breaking up," when, like many other famous pools, the Roe's Pot was not a little damaged, a good deal of silting or running down of sand and shingle from above has now and again taken place, with the result that some of the best rough bottom has become quite level, affording now no lie for the fish. Eight autumns ago I one afternoon had a desperate fight with a 30lb. cock fish on the Crathes part of the pool. A wilder large fish I never hooked, and it really was hot work the while he was played. He didn't seek a moment's rest—and in twenty minutes I had him out. But did I not feel it? and did I not sweat? Sweat! and was I not properly warmed up for once? I must have been, for a brother angler who came the way just as I was dragging the fish up the bank told me my face was "red as a north-east moon!" I've killed lots of good fish on the Roe's Pot, among them one July evening, eight summers since, on a very wee Jock Scott, and during a half flood, the largest grilse of the year to the rod on the whole of Dee.

Of the Invercannie or 'Cannie streams, the view is up stream for a distance of fully a quarter of mile, from underneath the boughs of one of the fine old beeches on the high bank above the river. The whole length seen is lively rushing water, with many a break, and many an eddy caused by many a boulder. The same character of water continues downward for a couple of hundred yards farther, where commences the long swift, dashing, surging, sounding descent of the stream, known as the Mill Rush. Than the whole length in question. there is not a better of such dimensions in Dee for fresh run grilse. From opposite where the view was taken, down to the very commencement of the "rush"—the grilse fishing, when the water suits, is splendid in a good year. Upward from the Roe's Pot the distance is quite a mile; and the whole fishing from the right bank, and for two miles still farther on is connected with Blackhall. The Cairnton water, the property of Sir Robert Burnett, Bart, and let to Mr. Turner Farley, begins at the Mill Rush, and extends upward about a mile-and-a-half, the whole way opposito Black-hall. For the entire angling year these two fisheries (because in good years they give excellent angling in the three seasons of spring, summer, and autumn) are the most productive of all on Dee for their extent. Some may excel them in spring and some in autumn, but none for all the fishing year throughout. They have the pull, because they have the best of the grilse fishing, which in wet summers is rather superior. Then again they afford very good spring and autumn fishing—so good as not to be equalled for both seasons by any other section of Dee.

In the good catches of the 'Cannie streams the fish almost always rise freely, "grip siccar," dash right off and play splendidly. When Kilmartin was the laird, many an exciting run did I have with them. Well do I remember, though it is ten years since, losing a splendid, wild, large fish, through a piece of bungling—not holding above him in the swift water. He turned of a sudden—dashed away like lightning to the other side, got the loose line round a boulder sixty yards or so out as he tore down stream; and snap went the cast, and away he was, with gut, "Gordon," and all. The keeper laughed, and had good reason to ask me, as he did, "Fat did ye dee yon for?" He was the best-natured keeper I ever saw—took things most philosophically. Suppose he lost a fine fish after playing it a long long time, he was not the least upset. He was not—No. He seemed to enjoy it. He just stood straight up and laughed heartily, frequently rubbing his "een" and remarking the while: "The beastie focht weel for its liberty and it's got it: it deserved it." Good-natured, feeling, most humane fellow!

The Mill Rush undoubtedly "tries" the fish hard—pretty well tires them out—when ascending, and this is probably the reason why they lio so well in the 'Cannie streams immediately above. Just at the overflow—the very head of the rush—there is a little cast on the Blackhall side, where twice I have caught a fish under precisely the same conditions. On both occasions the rush must have only but a moment before been ascended. I had fished the cast without seeing anything, and had gone up a little bit to fish down again. Whilst doing so, I observed a fish leap at the bottom of the little cast, a quite common thing for fish to do when they get out of swift into easy water. I fished down, and a little above where it leaped I hooked it. It had scarcely a "kick" of strength left in it. Right off it made a rush, for about ten yards, across stream, and then I drew it in like a log. The tremendously swift water and the buffeting it had got amongst the boulders of the long rush had clean taken the fighting power out of it. On the opposite side, a little higher up, I once had a comical experience with an 8lb. grilse, which I hooked on a light trout rod. This fish, soon after coming on, got into an eddy, and fifty times at least, I am safe to say, it went with the regularity of clockwork round and round the large boulder in the centre of the eddy. Finally, the performance became monotonous, beyond endurance on my part: then I waded in, though it was rather risky, and scared the fish away, after which I soon landed it.

The 'Cannie streams I have always found fish best in the early part of the day and the evening. The afternoon, especially of bright days, is not generally good, as then the sun is right in the head of the fish. The Blue Charm, I used to find (in summer) the best of all as a general killer, with the Silver Doctor for bright forenoons, and the Claret Jock for dull weather.

The illustrations are from photos very kindly (at my request and in my presence) taken specially for the *Fishing Gazette* by my friend, Mr. Charles M. Brown, banker, Aberdeen. Mr. Brown is not altogether satisfied, as, at the time of photographing, the conditions of lighting were unfavourable for obtaining fulness of detail. But this apart, the main object was to give an idea of the scenery and character of water of the middle reaches of Dee, which are those between Banchory and Aboyne. From the illustrations being small, coupled with the fact that the water was dead low when the photos were taken, the impression may be conveyed to some that the Dee is little better than a trout stream. Such indeed it was when Mr. Brown and I selected the views; but right, however, it is to state that the stretches of water in these same views are, when the river is in fair volume, not generally under fifty yards in width—in some places eighty. There is a deal of close landscape and lovely woodland connected with the fisheries named, and skirting the upper portion of Blackhall a profusion of heather on the hill-sides comes in to add still further variety to a scene of Nature's unstinted adorning.

W. MURDOCH.

THE INVERCANNIE STREAMS (FROM CAIRNTON SIDE).

AN ANGLER'S DIARY.—JUNE.

BY J. H. B.

THE Carnival is over, and one more May-fly season is numbered with its predecessors. For once the May-fly justified its name, here in the west at any rate, for so early as mid-May some were observed on the small streams of North Devon and North Cornwall, and a couple of anglers scored well with them. The first Green Drake of the season coming under my observation was on May 22; but there was not what would be called a good rise of the May-fly until the early days of June; they came from that time forward with the regularity of clock-work daily about noon. Here in the West—on the Tamar especially—it has been as good a May-fly season as I have known, and the Green Drake and the male and female Drakes have all been in great request. And how they set the big fish a-moving!

It should be remembered that in this part of the country trout are numerous, but small; a half-pounder is a good fish, and one three quarters of a pound very good. On the evening of June 3, I took a stroll as a constitutional, rod in hand. About two miles from home is a piece of water not worth looking at under ordinary circumstances. It is about a hundred and fifty yards of what is known here as "dead" water—that is, still water. It is backed by the head-weir of a small flour mill, but does move, though imperceptibly. At the lower end there are a few yards quite open, and this was rippled by a strong S.E. breeze. The higher part of the one hundred and fifty yards' stretch is bushy, but a fly may be got on here and there, and above again the stream—a very small one—is so very much wooded that it is fishable only with dapping gear. It certainly is not worth visiting as a fishing haunt, but as it afforded a chance of giving a pleasing variety to the incidents of a saunter, I took the route in which it lay, and carried a rod, a cast or two, and a few flies. On this particular evening there were two circumstances which strongly influenced me—the May-fly was on, and the little water there is was sure to be "cockled," as they say here—that is, rippled. I got by going over it four times eleven trout, weighing not quite 4lb. Of course, as fishing was only a secondary consideration, I had not burdened myself with any superfluities, so a landing-net had not joined in the expedition, and I was obliged to play the larger specimens until they were completely exhausted, draw them to the bank, and then land them by hand, placing a finger far down the mouth.

We do not "yank" fish here—it doesn't pay. I read sometimes in fishing sketches of trout something just under a pound having been pulled out immediately on rising. I confess I do not understand it. The risk of fish and tackle seems to me to be too great, to say nothing of the loss of sport. With casting line of decent fineness, such a feat would be simply fool-hardy and utterly unsportsmanlike. Fish considerably smaller should not be yanked. For my part, I scarcely know which to admire most, the man who throws well, or the one who strikes well, that is without lifting his fish, whatever its size. There can be no doubt that in small streams artistic striking is a more desirable object to be sought for than long distance throwing.

In my early days I had a fine lesson which was not lost upon me. I was fishing the salmon pool at Exeter, with small flies, angling for roach. A gentleman of the city, a well-known and clever angler, was interested in my proceedings, and took the rod, a new one, and essayed it. He soon had out what I should judge to be about twenty yards of line, and a small fish rose, which he struck and hooked, but not lift from the water in the doing of it. It turned out to be a roach, which judging from the estimate my memory brought away was about 1½oz. But you know the old adage about rules and exceptions, and you will see presently that my rule is not according to the laws of the Medes and Persians.

On the 5th I took my constitutional in another direction, visiting an old angling friend to compare notes. A third angler dropped in to show his take of that afternoon, of which he was justly proud. He had over two dozen trout in his basket, of good average size, and had replaced several; and had done it all with the May-fly in a couple of hours. Then the rise was off and he left.

On the 6th I had a good innings, scoring three dozen "not out," chiefly with the May-fly, but supplemented by others. I had a friend down from town to take the cream of the fishing season, but could not join him on the 8th. I despatched him to the same piece of water from which the two dozen mentioned above were taken, supplying him with two casts fitted up, one for the morning, and the other which he was to don immediately he saw the Drakes on the move, and telling him to keep a good look-out for them at twelve o'clock. The morning turned out poorly, because he took a high reach which is miserably wooded and unfishable, but the day resulted in his securing a very nice basket of three dozen, and practically all his sport was had in a couple of hours, during which the trout were doing a roaring trade with the Drakes and he with them, quite a reversal of

"Great fleas have little fleas
Upon their backs to bite 'em;
And little fleas have lesser fleas,
And so *ad infinitem*."

And so the record might go on; favourable days when the water was right and wind and sky as they should be, bringing good records; other days, when conditions were unfavourable, not adding so rapidly to the register, but each affording its modicum of sport. Of rain there was very little until the end of the month, and the streams, in consequence, dwindled down to next to nothing, and on a few days in the middle of the month brought an easterly wind and a cloudless sky, when even trouting was a labour.

Two other days deserve special mention. Four anglers met on the 13th, and fished two up and two down, those going upward having the best of the wind, and the others apparently the best of the water. The latter pair soon found, to their great disgust, that the miller was doing his annual clearing of the leat, and the water some little distance below the trysting-place was the colour and consistency of pea-soup. However, the Tamar is sluggish, and we shouldered our rods hoping to head the dirty water, and presently succeeded. About half-a-mile below we found the water fishable, and had very good sport for two or three hours. And now for the exception referred to above. The water was low, there was no ripple in the pools, and the best—almost the only—sport, was obtained from pools which are more or less overhung with bushes, and I never did so much yanking in any one day in all my experience. To play any but a large fish was almost as mad a thing to do as yanking under ordinary circumstances, and you would, ten chances to one, get hitched up in the bushes above. We stood as far back and below as possible, with a shortish line, of course, and when the rise came any ordinary trout (and as a rule they could be seen and gauged easily enough) was lifted out with the strike, not with a jerk, but with a steady pull. Hitching was thus avoided, and we sometimes got a second and even a third from the same pool. The score on that day was enough to satisfy the most exacting, even in the height of the season. But my best day was towards the end of the month, when I was fishing alone—partly, perhaps, because I was alone—and when the Alder had joined the Drakes and was in fact first favourite. I scored six dozen, the largest being over 17oz. but not 18oz., and had to leave to attend a meeting when the rise was at its best. Never did I so anathematise secretarial duties.

One of the quartet mentioned above had driven seven miles one morning in June, comfortably housed his nag, and presumably taken a drop of comfort himself—indeed, many confidently affirm that subsequent events proved he must have taken a pretty big drop, or continued the motion more frequently than wisely—and had taken his stand by the river to commence operations with who knows what visions of ravenous trout taking his dark and light Mays, when horror! he found he had left his winch behind. Basket and pockets were searched; but, no, he must have left it at home. He made a shift with some twine he got from the village shop, and an old reel without a handle he got turned out from somewhere; but, of course, his day's sport was spoilt. He relieved his feelings by penning me the following lines:—

> "A man went to fish at Trepool;
> There can be no doubt he's a fool;
> He forgot winch and line,
> And used draper's twine,
> Which astonished the trout at Trepool."

Other anglers in the neighbourhood were astonished to find they did so well in what they called thunder weather; but we know how to account for the sulphurous flavour of the atmosphere that day at Trepool. On returning to the inn the luckless wight found his reel in a pocket of his mackintosh, which he had left there.

Of course, the Mays have not done all the execution, and it is well always to have a second seasonable fly on. The early days of the month saw the Hawthorns dying out, but the Black Gnats were on in myriads, the memory being searched in vain for a season producing such a number of goodly-sized gnats—flies which made the trout as eager and thoughtless of guile as the most ardent fisherman could wish. The Alder has also been well to the front, also the Oak-fly and the Marlow Buzz; and in the evenings, after the larger flies had dropped, and before the moths came out, the Pale Evening Dun and the Yellow Sally came to the fore. As an item of information, it may be mentioned that a miller and gang cleaning out a leat bagged two hundred and twenty-five trout.

Waltoniana

Bishops often tell a good story. His Grace of Wakefield, speaking at the inevitable luncheon after the opening of a church at Great Yarmouth, said that a woman in Yorkshire told her clergyman quite seriously that her husband had become dissatisfied with the Baptists and Congregationalists, and had become a Yarmouth bloater. She meant a Plymouth Brother.

A few may have heard the following excellent story before. The crew of a Clyde yacht were in want of provisions, so the skipper sent Dugald ashore to buy bread and whisky. Dugald returned with seven bottles of whisky and one loaf. Seeing this, the skipper turned pale, and, nervously scratching his head, muttered, "Dear me, Dugald, what are we to do with a' this bread?"

Though so much has been written about trout, comparatively little is known for certain respecting their growth in rivers. Fish culturists of course know how old fish of a certain weight are in their ponds, but in rivers and lakes, where the fish are not fed, the conditions are altogether different. For practical purposes it would be very important to discover, with some degree of certainty, whether one variety of trout grows quicker than another if placed in the same river. Another question to be solved is whether Loch Leven trout, if put in a stream, rise as well or better than the local fish, and whether they stay or wander away. On these points I confess to a fairly strong opinion, but nothing can be said at present with absolute certainty, because in many cases, when strange fish are turned into a river, they soon resemble the local fish in appearance, and no one who catches a trout can say positively that it is a foreigner or a local fish. I have an instance in my mind, however, of artificially-bred trout being put into a river and preserving their characteristics, doing well and growing rapidly.

The only satisfactory way to test important questions of this kind is to mark the fish which are turned in, using, as on salmon rivers, a tiny tablet attached to the fatty fin with silver wire. On it anything can be inscribed, and when the fish comes to be caught he can be weighed, his weight and the date scratched on the tablet, and then be turned in again. I would myself, if the owner of a sufficient length of water, turn in trout of different varieties, marking every one of them, and I would from time to time mark undersized local fish which I caught and returned. At the end of a few years, supposing careful note had been taken of all marked fish caught, the results could be tabulated, and I have no hesitation in saying that most valuable information would be obtained.

Some three years ago the Marine Laboratory was started at Plymouth with a great flourish of trumpets. Various great names appeared on the prospectus as patrons, presidents, and vice-presidents. The Government actually promised a grant of £500 a year for a limited number of years, and every one said that at last something was going to be done for our sea fisheries. Three years have elapsed, or passed away, as novelists say, and behold our sea fisheries are much as they were, certainly no better. Are the members of the staff of the laboratory to blame? I venture to think not. A couple of thousand pounds is not sufficient to carry on investigations which if properly worked out require the use of steamers and fishing boats. The association has a steam launch, called the "Firefly," which I should imagine was bought cheap second-hand, for as the council in their report pathetically put it, "while very economical when in working order, she is a considerable source of expense for repairs, and great inconvenience was caused during the summer of 1890 by her breaking-down when the laboratory was full of workers. Ye noble patrons and presidents and vice-presidents, cannot among you all a steamer be presented to the association, such a one as will not suffer from a chronic breaking-down?

What has the association done to justify the aforesaid flourish of trumpets? The hatching of sea-fish eggs has been attempted, but not, I fear, with very great success; or I should say that the eggs were in most cases hatched, but that poor results attended the attempt to rear the fry to such a size as to make their future a safe one in the sea. Mr. Cunningham, the naturalist, has studied the sole, and written a book about him, and a large number of small marine organisms have been studied in the aquarium, which is now open to the public at a small charge. The great bait question has been looked into without any particular result; but I see from the report that a Mr. Hughes has been appointed to make further search for an artificial bait, the funds for the purpose being provided by Mr. Bayly, of Plymouth. Everyone, and salt-water anglers in particular, will wish Mr. Hughes success. Mr. Thomasson, M.P., has given £250 for investigations to be carried on as to the state of the North Sea fisheries, and if this and the bait question can be satisfactorily solved, the Marine Laboratory will have justified its existence. At the same time, it must be admitted that both these questions could have been examined into without the existence of the Laboratory. I owe an apology to my readers for intruding this subject into "Waltoniana," but I know that it is one which interests many persons, and I frequently hear people asking what has become of the laboratory of which so much was heard when it was founded. Some day, let us hope, the Government will devote as much to the improvement and preservation of our sea fisheries as does the Government of the United States. We give £500, the Americans give £50,000.

Templar.

AMATEUR SEA FISHING.[*]

Mr. Aflalo, the author of the latest addition to the literature of sea fishing, gives his readers, in the short compass of something under two hundred pages, a really useful and excellent manual. It is divided into three parts, the latter of which is decidedly the most valuable and novel, for it is the first attempt of any importance to give a descriptive guide to the sea fishing to be obtained at the principal English watering-places. At many of these the author has fished himself and has succeeded in finding good sport at places which have not hitherto been deemed particularly good for the amateur sea fisherman. Of these we may mention Hastings, to which eight pages are devoted. There is no better place for pout fishing than Hastings' pier, says Mr. Aflalo, who in thirty-six days' fishing took 748 of these little fish—little we say advisedly, for they averaged about seven to the pound. The fishing stations mentioned on the east coast are Scarborough, Filey, Lowestoft, and Southend. On the south-east coast Margate, Ramsgate, Deal, Dover, Hastings, Bexhill, and Eastbourne. On the south coast, Brighton, Shoreham, Littlehampton, Bognor, Selsea, Southampton, Southsea, Bournemouth, Poole, and Swanage. Some account is then given of the fishing to be obtained round the Isle of Wight, Ryde being described as the best place for the angler. On the south-west coast, Weymouth, Budleigh Salterton, Torquay, Plymouth, and Megavissy, are described, and there is a short account of the fishing to be obtained at Ilfracombe and Tenby on the west coast. Several pages are devoted to the Isle of Man, which is very rightly described as a capital resort for the holiday angler. This guide to the coasts of England is, as we have have said, far in advance of anything that has been done, and in future editions we hope to see it considerably enlarged. To most of the places a small sketch map is given and these in some cases bear the depths in fathoms besides showing the position of rocks, &c. The time involved in the railway journeys from London are also given as well as the cost of a third-class return ticket.

For the first part of the book, so far as it relates to tackle and baits, the author does not claim any considerable originality, the matter having, in his own words, "been handled by every writer on the subject." But the advice given is good and reliable, and a number of illustrations considerably assist the text. We observed, however, but little mention of eyed-hooks, which we consider most useful for the sea fisherman, being far neater than the hooks flattened at the top, which have the advantage of cheapness and nothing more.

Part II. consists of fifty pages, devoted to an account of the sort of fishing to be obtained at different seasons of the year, and should be diligently studied by those who wish to succeed in their sea-fishing endeavours. Ignorance of the right season to fish, and the most likely fish to be found in particular localities, are among the most common reasons of failure in both fresh and salt-water. It is, for instance, about as profitable to fish from a pier-head for bass in January as to angle for gudgeon on a Thames' shallow in that month. Mr. Aflalo's great difficulty has, of course, been that certain fish visit certain parts of the coast at different times, and that in some seasons they are later or earlier than usual, as the case may be. But so far as general rules can be laid down, the book will be found reliable, and, as we have said, this question of season should be considered most carefully. A place may be celebrated for the cod-fishing it affords close in-shore, but the simple angler, for whom that bare fact is sufficient, and who determines to spend his holiday at the place without first inquiring *when* the cod-fishing is likely to be at its best, may be sadly disappointed. There is not much in the book calling for criticism. We should not be inclined to say that there was fine fly fishing for bass off Filey brigg, almost the only fish the flyfisher gets there being billet (the young of the coal-fish) and an occasional codling. Fly-fishing for bass is something more than blow-line-fishing, as described, and we should like to see some account of Nottingham fishing, as adapted for the sea. It is a most useful method of getting out a bait from pier-heads, where the tide is not strong enough to take out the ordinary drift-line. But these are small matters which are easily remedied in future editions, and we have no hesitation in recommending Mr. Aflalo's book, and in congratulating the author in having produced a very useful addition to angling literature.

Mr. Afflalo acknowledges his indebtedness to the *F. G.* for many a wrinkle.

A Trout Swallowing an Adder.—On Saturday last Mr. Clay and Mr. Mead, two London gentlemen, angling at Altnacealgach Hotel, in Sutherland, fished Loch Veyatie in the same boat, and made a total basket of twenty-six trout, aggregating 10lb. The heaviest fish weighed 1½lb., and on being opened it was found to contain an adder, measuring 18in, in length.

---

[*] "Sea Fishing on the English Coast: A manual of practical instruction on the art of making and using sea-tackle, with a full account of the method in vogue during each month in the year, and a detailed guide for sea-fishermen to the most popular watering-places on the English coast." By Frederick G. Aflalo. Illustrated. London: L. Upcott Gill, 170, Strand, W.C., 1891.

NOTES FROM BIRMINGHAM AND DISTRICT.

By C. W.

The Tenby Piscatorial Society held their first contest on July 26, at Fernhill Heath. The members and friends, which numbered about forty, were conveyed from Birmingham to their destination by saloon carriages kindly placed at the club's disposal by the Midland Railway Company. Fernhill Heath was reached at ten o'clock, and luncheon was partaken of at the Bull Inn, when, after refreshing the inner man, a move was made to the water, which lay about a mile from the village. Arriving on the scene of action, and the draw for places being got over, the members proceeded to their places, and at ten minutes past twelve the referee gave the signal for the contest to commence, which proceeded until ten minutes past two o'clock, when the weighing in of the fish was commenced on the ground, the result of which was as follows: Mr. C. Wainwright, first; Mr. C. Bowler, second; Mr. Marshall, third; Mr. J. Smith, fourth; Mr. Bushell, fifth; Mr. Harris, sixth; Mr. A. G. Hall, seventh; Mr. Harding, eighth, &c. After the weighing in had been concluded, the whole of the competitors and their friends were grouped together in a shady nook on the banks of the river Salwarpe and photographed by Mr. J. A. Ashmore; the committee were also taken separately. After these operations had been successfully accomplished, the members spent the remainder of the afternoon in angling. At five o'clock the members began to pack up and make their way back to the Bull Inn, where the whole of them sat down to a splendid cold collation served up in first-class style by Host Hylton. A stroll through the fields was then suggested and acted upon, after which the members made their way to the railway station and awaited the arrival of the train, which conveyed them back to Birmingham. The arrangements of the contest gave the greatest satisfaction, and great praise is due to Messrs. King and Ashmore and the committee of the society for the business-like manner in which the whole of the arrangements were carried out. A word of praise is also due to the gentleman who acted as referee. The prizes, which consist of articles too numerous to mention, will be distributed at the annual dinner, the date of which has not yet been decided upon. The first prize is the gift of Messrs. Bevan and Hands, and consists of a large, specially designed, silver-plated cup.

I am pleased to inform those who are interested in the Marston Challenge Cup Competition that there will be no difficulty in bringing the contest off within easy distance of the Mythe Bridge. I have made inquiries and find that the Tewkesbury Regatta, which takes place on the same day, will be held on the water below the bridge, and the contest will in consequence be held up the river, where the Birmingham Association have in the past held their contests. The exact locality will be kept a secret until the morning of the contest. The ground will be defined by two flags, and the contest will be held between the flags. Any one going outside the boundary will be disqualified. A number of gentlemen will act as umpires, and any competitor doing anything dishonourable to secure a prize will meet with very severe punishment from the association. I hope the contestants will take notice of the last circular sent out, and be at the toll-house on Mythe Bridge at 10.30 prompt. I also hope that the best men may win, no matter what association or society they may represent, for whoever they may be they will hold a position which should command for them the respect and admiration of not only the members of the Provincial Angling Association, but all true sportsmen and lovers of the gentle craft.

The river Avon still continues in first-class condition for all kinds of angling. This is owing to the sharp showers that have fallen during the week, which has put the fish on their best behaviour, and those who have visited the river have no cause to complain of the lack of sport. The perch have been on the feed and some good baskets have been had, one angler taking about 16lb. in a very short time with the brandling worm, some of the fish weighing nearly 1lb. each. The roach are now in good condition, and are taking stewed wheat, malt, and paste freely, but the fish run rather small as yet. They are reported to be very plentiful. Chub are also in the pink of condition, and some good sport has been had with these fish in the neighbourhood of Bidford and Binton. Taking the Avon fishing on the whole, it will repay those who like to spend their holidays at the water-side. The river is well stocked, and there are all varieties of coarse fish, all of which are in first-class condition, and I should recommend my friends to give the Avon a trial during the holidays.

NOTES FROM LANCASHIRE.

Reports all round are of a much more encouraging nature. River fishers are having considerably better catches, but the canal fisher has had another week of disappointment. From some of the following reports a good idea may be formed of our doings during the past week. One party of Free Anglers have had a good catch on the Wye (ten trout, weighing 12lb.), and another party, on the same stream, also had a splendid day's sport. The Cheshire brooks have had a fair amount of visitors, and from their success it is a natural conclusion that fish are plentiful. Reports from the Dane at Middlewich and Northwich are, taken as a whole, good; the fish are in good condition and fairly numerous.

Llanymynech is still a favourite resort, and, if anything, gains in popularity with anglers from this district. A pike of 15lb., taken by an Oldham angler, is a very fine specimen. Speaking of specimens, we have one on view in Manchester, taken a short time since, that will be soon located at Openshaw, having been taken by a member of the club at Openshaw.

The Ingleton waters are receiving attention, and amply repaying the trouble and expense of a visit. The Ribble is affording good sport; 12½ brace of fine fish surely is sufficient reward, and there are many not far behind this result for a day's fishing. A visit to the Dee would amply repay the angler, at the end of this week, or on Bank Holiday, if reports to hand are reliable. One party is going, and intend camping out, for which purpose they have secured a boat. We wish them luck. The Bridgewater Club and the Islington Club have joined the N. A. A., still there are many who have not joined; but perhaps the appeals for membership now being made may have the desired effect. The Buckland Club has just fished their initial match. They did well, but this was only to be expected from such a combination of veterans. The Openshaw Club were out the same day, with a lot of their members, and satisfactorily fished their second competition. The Shakespeare Club fished one of their numerous matches a few days since, and had a really good day's sport.

The Pendleton Union Angling Society have a rather unpleasant item to deal with. For the convenience of their members unable to be present at a contest, a deputy is allowed to fish for them. This rule appears to have been taken advantage of by a member to engage an expert angler, who secured the first prize for his principal, who watched him from the bank. This conduct has caused a lot of trouble, but doubtless a rule will be made to stop the like abuse in the future. Great preparations are in hand for the approaching holidays. Tackle makers are at it early and late, and if plenty of fish do not find their way to the County Palatine from various remote districts, great will be the disappointment.

[What does "Free Anglers" mean? Are any anglers not free? We should be glad if our correspondents would not chronicle catches where neither names nor places are mentioned.—Ed.]

NOTES FROM SHROPSHIRE.

The sunny month of July is seldom a good period for piscatorial pursuits in this neighbourhood, but this year anglers have been even less successful than usual. The small number of trout taken lead one to suppose—even taking into consideration bright days and low clear streams—that there are fewer fish in the river than usual, and if this is so, the matter calls for increased activity on the part of the Severn Board of Conservators and anglers generally. The Shrewsbury Severn Angling Society has done much to improve the fishing in the neighbourhood of Shrewsbury by annually stocking the river with fry, but so extensive is the water to be supplied, and so numerous are the anglers to be provided for, that the results of their work must necessarily be small. The Board of Conservators, it is true, have assisted the society to a great extent, but when it is considered that a very large proportion of its revenue is derived from the licences of anglers in the upper waters, it is obviously only fair that every effort should be made to make sport worth having. At present anglers are allowed the privilege of trout fishing for the sum of one shilling per annum; but it is doubtful whether half their number catch sufficient trout to repay them for even this slight expenditure. Rough fish, it is true, may be captured in plenty, but trout undoubtedly are few and far between. This being so, the anglers of the upper waters are entitled to more consideration on the part of the board than they have received in the past. Few would object to pay twice or thrice the amount of the present trout licence, if the return were increased proportionately, and in the case of working-men anglers, rough fishing might be granted free or on payment of the same sum now charged for trout fishing. Whatever be the cause, it is certain that the genuine breed of Severn trout in this locality is becoming extinct, for nearly all the fish taken of late have been the Loch Levens or other imported breeds that have been turned in from time to time by the angling society.

It is not often that one hears of Mars being associated with Pisces, and himself turning piscator, but this will be the case next week at the camp of the 1st Vol. Batt. K.S.L.I., at Lythwood Hall, the seat of W. E. M. Hulton Harrop, Esq. A fishing contest has been arranged to take place on Wednesday between the soldiers in a well-stocked pool belonging to Mr. Harrop, and the event will doubtless be a very interesting one.

The Shrewsbury Severn Angling Society's trout in the breeding ponds in the Dingle are thriving remarkably well, and to all who know anything of the habits of this vivacious fish, it is a matter of surprise that with so small a supply of water running into the pools the fish live so well. The fish, of which many are considerably over 1lb. in weight, are becoming thoroughly domesticated, and will take food ravenously when thrown from the edge of the pools. The other day, Mr. Williams, the hon. sec. of the society, threw in a quantity of minnows for their benefit, and the gusto with which they swallowed them was surprising, and made one entertain fears for the welfare of their digestive organs. The weeds prove a great nuisance in these ponds, and the angling society, as well as the corporation of Shrewsbury, would doubtless be glad to receive a satisfactory answer to the letter in the *Fishing Gazette* of last week relative to their extermination.

NOTES FROM WORCESTER AND DISTRICT.

On Friday week, at the Bull's Head Inn, there was nearly a full attendance of delegates from all the Worcester clubs to make arrangements to fish for the fifteen guinea Challenge Cup, given by E. H. Bowen, Esq., the president of the District Association, that gentleman being present and occupying the chair. As the contest for the Marston Cup takes place on Bank Holiday, this contest was deferred until the second week in September, and will take place on the Teme at Tenbury, at which time grayling may be expected to go well. The president said he was very glad at the arrangement, and it would enable him to supplement the prize with five brace of partridges to the winning man. Mr. Hubert Holland, one of the vice-presidents, promised twelve couple of rabbits to be divided among the four clubs competing. These two gentlemen promised £50 each, to put the Worcester Angling Clubs on a good footing next season, their wish being that they should be second to none. For this they were most enthusiastically cheered, and a very hearty vote of thanks was passed to them for the past and present liberality and the interest taken in the angling societies of the district. Both gentlemen replied in a most felicitous manner, and Mr. Holland said he looked upon the executive as the hard-working machinery of the angling body, and he would ask them to meet himself and the president on the club-water on the Lower Teme on Monday afternoon, and he would give them £6 to fish for, to be divided into three prizes of £3, £2, and £1; which event duly took place, and a very pleasant competition it was, although the sport was but slow—Mr. Martin Perks taking first prize; Mr. T. Meredith, second, and Mr. A. Glover, third. The president weighed in a nice jack in very good condition, but did not compete for the prizes.

On Tuesday the same gentleman (Mr. H. Holland) gave the same amount of prize money to be competed for on the Severn at Holt, for members of the Izaak Walton Club, of which he is an hon. member, to which place the party journeyed by brake. At the Holt Fleet Hotel a splendid luncheon was awaiting them, at which the lordly Severn salmon was a most important and enjoyable part, which with the other good things was washed down with home-brewed and sparkling champagne perry. After fishing the water for a few hours, the party sat down to an excellent dinner, put on the table in Host Hundley's best style, after which sport was continued until 8.30, when weighing-in commenced. Sport was not good, and no heavy baskets were taken (not one single trout), the first prize being won by Mr. Holland himself with a pike, which he caught trolling with a small minnow; Mr. F. Moore taking second prize: and Mr. S. Webb, third prize. Mr. Holland received a very hearty vote of thanks for providing the party with such a grand day's outing and entertainment, in responding to which he expressed the pleasure it afforded him to meet them, and the great pleasure it gave him to beat the best of them. As he had won the £3, he would make it £10 and give them another outing in a week or a fortnight, as they might decide, to be fished for in three sections, the best man in each section to have a prize, which would separate the expert from the less skilful angler, and give the latter a better chance of obtaining a prize. He would leave it to the committee to make their arrangements. He would be with them and endeavour to bring the president with him, and he trusted they would have good sport, and a large gathering. The usual toasts followed and the return journey was much enjoyed.

On Thursday last the St. John's Club had their second outing of the season on the Teme. There was a good attendance of members, but there were but few good fish taken. Some of the members had plenty, as far as numbers went, but they were not up to the weight allowed to be weighed in, Mr. Gummery winning first prize; Mr. Gillham, second; and Mr. C. James, third.

I regret to say that a great many otters have been seen on the Teme and its tributaries, and many a good fish have fell victims to them, and I hope something will speedily be done to reduce their number, for they must injure sport considerably.

All the clubs are looking forward to the competition for the Marston Challenge Cup, at Tewkesbury, on Bank Holiday Monday next, and there will be a very large gathering there, to see the sport and know the result. There will be excursions by water and by railway.

R. Wingfield.

NOTES FROM YORK AND DISTRICT.

The water in the Yorkshire streams has, during the past week, been exceedingly favourable, but wind and weather have not been so agreeable. In the early part of the week fine freshets filled the rivers and gladdened the hearts of local piscators, but the high wind and unfavourable weather has somewhat militated against good fishing. The streams have not been patronised much in the daytime, though the cool of the evening has attracted a good sprinkling of fishermen. Salmon fishing in the Ouse I know has been very disappointing. The season opened well, and every prospect of a royal time was assured, but the fishers have been doomed to disappointment. Within the last week or two good catches have been like "angels' visits," and the unlucky fishermen can assign no reason for this paucity. It was thought that the recent floods would have brought up a quantity of fish, but they have failed to do so. In the lower reaches of the river the scarcity is even more apparent than it is higher up. The other day, at Cawood—where they usually have a better supply than at Naburn Lochs—they had to send to York for salmon. The supply of the lordly fish in the Derwent is fairly good, but not so plentiful as of late years.

One or two prosecutions have been undertaken by the Tees Fishery Board at South Stockton. On Monday a man named Samuel Coddick was charged before the local bench, under the Salmon Fisheries and Fresh Water Fisheries Acts, with having in his possession a net for the purpose of illegally taking salmon. Mr. W. B. Dodds, the Town Clerk of Stockton, prosecuted on behalf of the conservators. The case was proved by P.C. John Henderson, who stated that on the 17th of July he saw defendant and another man on Levan Bridge. When they saw him they ran off. He followed them, and caught defendant, who had the net in his possession. He was fined £2 and costs, or, in default, ordered to prison for one month. The other case was one of more importance, and is a vexed question to the salmon fishers in the district. John Davis was charged with doing damage to the amount of fifty shillings to the river Tees embankment, by removing sand on the Ingleby Barwich estate, the property of the trustees of the Kirkleatham Hospital. Mr. W. B. Dodds appeared for the prosecution in this case also, while defendant was represented by Mr. Fowler. The embankment in question had been constructed by the complainant, Mr. John Rowlands, at a cost of £200, for the purposes of his salmon fishing, the rights of which he held by lease. The case for the prosecution was that defendant, after being repeatedly warned, removed sand from the place mentioned, and so undermined the embankment and caused it to fall in, besides interfering with the fishing operations of Rowlands. Defendant pleaded that he was in the employment of a sand merchant named Cowell, who had got up sand from a gravel pit in the bed of the river for upwards of twenty years, and had never previously been interfered with by anyone until Rowlands took the place for fishing. As a salmon fisher, Cowell deposed that it could not interfere with Rowlands' fishing operations, because it was all rock at the place in question, and they could not fish where he got the sand from. The sand was from a gravel trench he had made himself in the bed of the river, and which four days in a fortnight was covered with water. The bench observed that the case was an important one, and deferred judgment till next Monday.

ANGLERS in the Swale and its contributing streams have experienced capital sport. During the early part of the week the water was in excellent condition, and this circumstance attracted a good number of fishermen. Trout fishers have turned out fairly well, while bottomers have been numerous. Some capital catches of scale fish have been notified, some of the fish exceeding 3lb. in weight, Mr. Isherwood, of Reeth, I hear has had splendid sport, and other Swaledale gentlemen have been equally fortunate. A barbel caught below the Castle turned the scale for over 3lb. The Derwent has been fairly well patronised, while the Wharfe has yielded some first-rate panniers. Mr. A. J. Kempley, a York angler, fishing in a pike-pond near Brough, captured several fine specimens.

THE members of the Fulford (York) Angling Society, to the number of about twenty, fished their second match of the season the other day at Cheesecake Farm, on the Derwent, the necessary permission having been given by Mr. Carr. Notwithstanding a drenching rain, fairly good sport was enjoyed. The winner of the first prize was Mr. C. Arminson, with 5½lb. of fish; the second was Mr. T. Laverack, with 4lb. 14oz.; and the third Mr. Walker, who caught 4lb. 11½oz. Many of the local clubs are now busy arranging their matches, the August race week being a favourite time. Amongst these, which are composed for the most part of working men, the York City Angling Association, hold their annual competition on Bank Holiday Monday, and the event is likely to raise considerable interest.

NOTES FROM TYRONE.

THE past fortnight has been a very unfavourable one on the majority of the Tyrone trout streams from many causes, but chiefly owing to the low water and bright sunshine—two important factors against the making of heavy baskets. The Ballinderry has yielded a few brace of trout, and an odd salmon now and then, and there the record stops. Such light waters as the Terrew (or Newmills), Kildress, Rock, Moneymore, and other small streams are reduced to mere threads, and even the Blackwater is far below the usual summer level. In the latter river trout are plentiful in the pools, but at present are inclined to sulk. From the more distant streams—the Mourne, Strule, Castlederg, &c.—a similar state of affairs is reported; the Mourne, however, is said to be doing better than the others. While the Assizes was sitting in Omagh, a large number of the grand jurors up from the country took the opportunity of trying the salmon waters of the Strule, but I hear that the greater part met but with indifferent success.

COARSE fishers are having a splendid turn of sport on the many lakes of the eastern section of Tyrone—Roan, Furlough, Eskeragh, Moy, and a dozen others. On the first-named for the past week, perch, two and three-pounders, are taking very greedily any kind of artificial or natural fly, and in no other lake that I have fished have I known perch to take a fly on the top of the water. The best time for perch fly fishing is just at sunrise, with a strong "curl" on the water from the west or south-west. Some anglers can make a bag of 70lb. of perch in a morning on the black fly. On the other lakes the ordinary bait fishing is resorted to, with good results; but for the best coarse fishing no place in Ulster can equal the Burmouth of the Ballinderry, where it enters Lough Neagh.

SALMON netting would appear to be improving in Lough Neagh, and also trout fishing, while the other industries—eel, pollen, pike, bream and perch fishing—continues fairly good.

THERE is one great bar against the rivers in East Tyrone rising into repute among "foreign" anglers, that is, their remoteness, and in a backward country, the want of proper hotel accommodation, and the want of proper protection in the close time. The chief river is the Ballinderry. Now the only village on it where hotel accommodation can be found is Coagh, Cookstown, Dungannon, and other towns are too distant, while the nearest point where good hotels can be found is Stewartstown, three miles distant from the Ballinderry, Blackwater, and Lough Neagh.

EAST TYRONE.

THE PULBOROUGH COMPETITION.

DISTRIBUTION OF PRIZES.

LAST Monday night there was a crowded assembly of disciples of Old Izaak at the Bedford Head Hotel, Covent-garden, on the occasion of the distribution of prizes won in the competition held on the Arun, at Pulborough, on July 12. The chair was occupied by Mr. C. A. Medcalf (president of the Central Association); and Mr. J. Kelly, the famous carp fisherman, filled the vice-chair. Supporting him were a number of well-known anglers, including Mr. J. A. Fitch, Mr. A. Conn (Bermondsey Bros.), Mr. C. Watling, Mr. G. Watling, Mr. Wright, Mr. W. J. Wade (secretary), Mr. Simms, Mr. Simpkins, Mr. Arthur Matthews (New Albion Piscatorials), &c. Mr. E. L. Nutt, of Pulborough, was also present and brought with him many fragrant bouquets, which in the course of the evening were handed to the principal prize-takers.

Prior to the presentation of prizes several excellent songs were sung by Messrs. W. Stretch, Harvey, Pettitt, Taylor, Butler, and others.

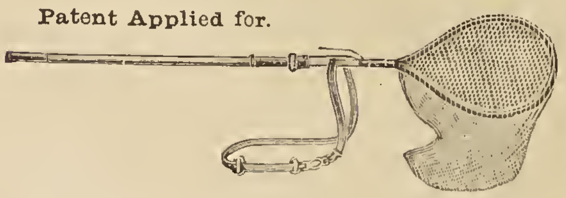
The Chairman then addressed the meeting and said it was a pleasing duty he had to perform that evening—viz., to distribute the prizes in connection with the late Pulborough Competition. He thought that the match was quite a success. (Hear, hear.) The committee had worked very hard to make it so, and he was glad to say that not one single complaint had been received from any of the competitors. (Hear, hear.) In respect to the prizes, one or two gentlemen had contributed very largely—he referred to Mr. Eldridgo who, he was sorry to say, could not be present owing to ill-health, who had given £2 2s.: and their old friend Mr. Nutt, who had given them £1 10s. 6d. (Cheers.) They had also received a very substantial prize list from the Great Northern Brothers' Club, including several donations from individual members—(cheers)—and on behalf of the Central Association he heartily thanked all for their kindness. (Renewed cheers.) He then proceeded to present the prizes. The names of the principal winners have already appeared in the *Fishing Gazette*. The prizes consisted of some sums of money, a silver watch, a gold pin, fly-rods, a landing-net, a hook-book fully fitted up, winches, ornamental vases, anglers' knives, &c.

Mr. Nutt also said a few words and concluding by proposing a vote of thanks to the press. More songs ensued, and a very pleasant evening was spent.

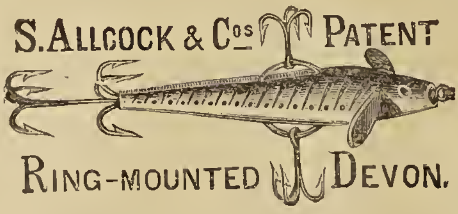
ANGLING EXTRAORDINARY.—PLUCKY RESCUE FROM DROWNING.—Young Robert Steele, son of Mr. Reginald Steele, a well-known and accomplished Border angler, rescued a drowning lad from the Esk by the aid of his fishing-rod in a very plucky manner. The young lad, whose name is Elliot, a pupil teacher at Limyclonch School, was bathing in the stream a little below Canonbie Bridge along with other boys, all younger than himself, when the current proved too strong for him, and he was washed down to a dangerous pool called Trimble's Hole, which is about 10ft. deep, within about 150yds. south of the bridge, and lies under the shadow of the churchyard, and within sight of the Cross Keys Hotel. Steele, who was busy in his shop at Bowholm, about 250yds. from the river, noticed that Elliot sank while he was endeavouring to swim the pool. With much presence of mind he ran for his fishing-rod, rushed down to the water-side, waded in up to his neck, and found Elliot lying quite still at the bottom. With the help of the fishing-rod, Steele managed to draw the boy near to him, and then he dived and brought him to the surface. Although life was nearly extinct, by vigorous rubbing and the application of other restoratives, Elliot was at length brought round a bit, and assistance having arrived, the lad was taken to his uncle's house close by, and attended by Dr. Anderson. He is still in a weak condition. I spent my boyhood at Canonbie School, at least that portion of it from 1844 till 1855, and know Trimble's Hole (or Trummel's Pool, as it is called) well. I have bathed in the Hush Knottyholm Pool, the Goats, Prior Pool, Long Pool, the Cauldron and Willow Pools, but I never ventured into Trimble's Hole or the Dead Nook. They are the most dangerous holes in the Esk; in fact, if any one had asked me when a boy to name the deepest pool in the world, I would have selected the Dead Nook, and most other lads then would have done the same. It is a fearful, black, treacherous-looking spot, and the other, although a good angling pitch, has something uncanny-looking about it, whether it is because both are in close proximity to the kirkyard or no, goodness knows; but I advise all strange anglers never to wade in either Trimble's Hole or the Dead Nook.—G.

Geo. CORDING'S
Ventilated Fishing Coats,
TROUSERS, STOCKINGS, BOOTS, BROGUES, BAGS, &c.
125, REGENT ST.; 231, STRAND

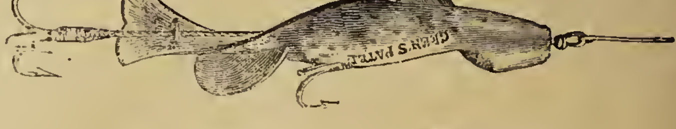
S. ALLCOCK & Co., Standard Works, REDDITCH.
Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.
Patent Applied for.



Col Clarke's Patent L. Handle & Net.
Perfectly secured to the Strap, and can be removed in an instant.
Platt's Patent Fishing Basket.
The New Aluminium Reel.



Patent Inimitable May Fly.
The nearest approach to nature ever yet attained. Bodies in various Patterns.



Geen's Patent Spiral Minnow.
The most Perfect Spinning Bait ever invented.
It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.
Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.
Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.
CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.
London Office: 60, QUEEN VICTORIA STREET, E.C.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, AUGUST 1, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The free competition on July 26 was duly fished for in the association waters, from Slough to Langley, when about one hundred and fifty competed, and duly won by the undermentioned: E. T. Blake, Campbell United, first; R. Onree, Jubilee, second; F. Spicer, Eclipse, third; F. Warner, Jubilee, fourth; F. Taylor, South Belgravia, fifth; Collins, Eclipse, sixth; J. Randall, Anglers' Pride, seventh; J. Fountain, Sundial, eighth; J. Tanner, Campbell United, ninth; E. Merritt, Allason United Brothers, tenth; L. Griffin, Walworth Waltonians, eleventh; J. Cheek, Acton Piscatorials, twelfth; W. Harris, Prince Arthur, thirteenth; Mr. Davy, Prince of Wales, fourteenth; W. Fountain, Sundial, fifteenth; E. Wood, Campbell United, sixteenth; J. Axworthy, Prince of Wales, seventeenth; united weight of fish, 21lb. 1½oz., and several other anglers weighed in fish. Mr. E. Baildhams, of the Globe Angling Society, photographed the anglers at the Brickmakers' Arms. A vote of thanks was given to the donor for his kind gift, and he hopes to give a much larger one, which I will announce shortly, open to all on the Anglers' Association, but no member will be allowed to compete, only those who arrive by the down morning trains on the day of the competition. The above prizes were distributed by B. Abrahams, the referee, and a vote of thanks was passed to that gentleman. A vote of thanks was also passed to the stewards for their good services rendered. Considering the hot day and the weed which the canal holds, there was a good show of bream, roach, perch, and tench. After the anglers partook of refreshments, they left by the 9.7 train, which had special carriages, for the anglers, and London was reached at 9.45 p.m. The reporter of the *Sportsman* and *Lloyd's* was chosen clerk of the scales.—B. ABRAHAMS.

Anglers' Association.—EASTERN DISTRICT No. 2.—A return visit on the above list was paid to the Crown and Buckland Angling Society, on Wednesday, the 29th inst., and I am sorry to have to report it a failure, as only six clubs put in an appearance; if this is returning a compliment to a well-known society the sooner return visits are done away with the better, so that the people that have the trouble to arrange them may find something better to do.—F. THORLING.

Anglers' Association (SOUTHERN DISTRICT) VISITING LIST.—A return visit on the above list, took place on Tuesday, the 28th inst., at the Original North Lambeth Angling Society, Wellington, South-street, Hercules-buildings, Westminster-bridge-road, when a most enjoyable evening was spent. On the roll being called the following nine clubs answered: Bermondsey Brothers, Blackfriars, North Lambeth, Peckham Brothers, Second Surrey, St. George's, United Brothers, St. Thomas's, Original North Lambeth. The next visit will take place at the Peckham Brothers on Monday, the 10th instant.—G. W. ARMSTRONG, district officer.

Aberdeen Amateur Rock Fishers.—The third competition was arranged for Saturday afternoon, and to be open to those who had failed to land 20lb. of fish at one fishing this season. The weather was fine, but the sea rather smooth and clear for good baskets all over. However, the first two who weighed in had splendid takes, and especially so the premier basket. First, William Cruickshank, 38lb. 1oz.; second, William Campbell, 18lb. 9oz.; third, George Garvie.—G. M.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—We are going to fish a match on August 2, at Slough. One of our new members was fortunate enough to take a prize in the competition on July 26.—B. ABRAHAMS, sec.

Alma Angling Society, Crown Distillery, Vere-street, Clare Market.—On Tuesday last we had a good number of members present, and I wish to remind those members that were absent that we fish our quarterly prizes in August. On July 19 only two members weighed in, namely: W. Hopping, roach, dace, and gudgeon; and Wal Gunuell, perch. This week several of our members went out, the following weighed in: W. Hopping, roach; W. Steward, perch; and J. Pailes, roach, dace, perch, and a grayling.—J. PAILES, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—Mr. Harding weighed in on July 26, he having some nice dace and one jack, weight 5lb. 11½oz. The four prizes standing over from July 12, will be fished for on August 2; members to go where they like, and all fish to weigh.—W. H. POTTER, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Our second match this season came off July 26, at Woking, when three prizes were taken as follows: Mr. J. Bell, first, roach and bream; Mr. J. James, second, roach and dace; Mr. A. Knowles, third, roach and dace. Mr. T. King had a very nice show of dace from Twickenham; Mr. W. Knowler weighed in roach, dace, and barbel. Members are requested to attend next week as quarterly night is near at hand.—J. RICH, sec.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—On July 26, we had a very nice show of fish, contributed by the following members, Mr. Embleton, sen., having a nice show of roach.; Mr. W. Hake some nice roach and dace; Mr. Lattimore, roach; Mr. Humphreys some good bream; and Mr. C. Irwin with a fine show of bream, winning the monthly prize for the heaviest weight during the month.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The usual weekly meeting was held on Wednesday, when it was decided that we should hold a sea fishing competition on August 30, for four prizes. The matter will be brought forward again next Wednesday, when I hope every member will attend, to fix the destination and conditions of the match.—A. G. SMITH, sec.

Battersea Friendly Angling Society, Queen's-road, Battersea.—The members of this club will fish a match on the 2nd and 3rd inst., both days to count, for six prizes, value three guineas, roving. Our show on July 26 was very poor, Messrs. C. and W. Wastell being the only two to arrive with fish. Members can weigh in on Monday until 11.45. Members are requested to attend on Tuesday next to arrange next outing.—G. MUMFORD, sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—Our trays were fairly well filled on 26th ult. by the following members: James Smith, J. Warman, G. Pocock, and H. Metcalf, total gross weight, 51lb. 7oz., mostly bream.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—On Wednesday Mr. Roezzler was elected a working member. Our match on the 26th ult. was very successful, all the prizes being taken: Mr. F. Barker, 1st, 10s. 6d.; Mr. Foster, 2nd, meerchaum pipe in case; Mr. Smith, 3rd, bottle of whisky. The first two gentlemen also divided a sweepstake between them. Let me remind gentlemen that fish caught on Bank Holiday and the day previous may be weighed in as one day on Monday evening.—F. ROBERTS, hon. sec.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—On the 26th ult. the following members weighed in: Mr. Aitchison, chub; Mr. E. Briggs, tench; and Mr. F. Briggs, tench. The competition, which was arranged to take place at Edenbridge on July 12 and was postponed, will now take place on August 9.—H. ROACH, sec.

Burdett Angling Society, 118, Hackney-road.—Our members were out on July 26, with the following results: Mr. J. Fleming, 3lb. 5oz.; Mr. D. Flint, 3lb. 2oz.; Mr. J. Green, 3lb. 1oz.; Mr. J. Pether, 2lb. 8oz.; Mr. W. Antill, 1lb. 8oz. Next week our meeting night will take place on Thursday instead of Wednesday, to fix date for next outing.—J. PETHER, sec.

Burton Piscatorials, Globe, Derby-street, King's-cross.—The following weighed in on the 26th ult.: Messrs. Sturman, Richards, Brierly, and Biggs, jun., with tench, roach, bream, and gudgeon. Mr. S. Porley, fishing the reservoirs at Tring on the 20th ult., in a few hours succeeded in capturing eleven fine tench, scaling 33lb.; also one very fine eel of 3lb., and one rudd of 10oz., making a total of 36lb. 10oz., and those who have the time and privilege of fishing there I should advise to go now, as the fish are feeding and heavy bags are being made.—C. ROBERTS, hon. sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 26th ult. the following members weighed in:—Mr. W. White, bream and roach; Mr. C. Chapman, jack and roach; Mr. Boxall, jack and roach; Mr. Fitter, roach; Mr. Sharp, roach; Mr. Critcher, roach. Our next brake outing will take place on Sept. 6, when we go to Weybridge. Members who have not already given in their names will oblige by doing so at once. Members are reminded that Wednesday next is quarterly night.—C. T. WHITE, sec.

Campbell United Angling Society, High-road, Kilburn.—Several members weighed in on July 26—viz., Mr. E. T. Lake, roach, tench, and perch; Mr. Hall, tench, roach, and bream; Mr. J. Tanner, roach; Mr. R. Smith, roach; Mr. J. Smith, tench; Mr. Pope, perch and roach; Mr. Hiscock, roach; and E. Wood, roach. A great number of our members competed for the prizes kindly given by Mr. Cook, of Brickmakers' Arms, Slough, and I am pleased to report that one of our members, Mr. E. T. Lake, succeeded in winning first prize, field-glass; Mr. J. Tanner, eighth, knives and forks; and E. Wood, sixteenth, spoons. All the members that fished for the prizes journeyed to Slough on July 26. The competition was a great success, and passed off satisfactorily. I wish to inform members that they can weigh in on Monday night.—E. W. WOOD, hon. sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—The announcement that Mr. J. Deplidge would read a paper—"An Account of the River Wey"—drew a large and appreciative audience on Monday last. Mr. Deplidge thoroughly exhausted his subject, and clearly revealed the beauties of the river Wey. According to the usual custom of this society, a musical entertainment followed, which was an unqualified success. Mr. H. J. Tibbatts (of the Citizen), Houndsditch, Mr. J. Willson, treasurer of the Blackfriars Angling Society, Mr. J. E. Gold, of the Fishing Rod and Tackle Stores, 17, Oakley-street, S.E., were elected honorary members, and another gentleman a working member. In consequence of Monday next being Bank Holiday, the weekly meeting will be held on the following Wednesday.—JOHN SMITH, hon. sec.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—Five of our members took part in the Clerkenwell competition at Yalding, on July 26, Mr. H. Gates winning first prize; Messrs. Chambers, Castell, and McDonnell also having fish, but not sufficient to take a prize.—CAS.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—On the 26th ult., twenty-four members of this society fished a pegged-down punt match, at Staines, for six prizes, but owing to low and bright state of the river the takes were rather small. The following were the successful competitors: Mr. Wilson, first, 9lb. 6¾oz., barbel; Mr. Robinson, second, barbel; Mr. Turner, third, dace; Mr. Chapman, fourth, roach; Mr. Tringham, senr., fifth, barbel; Mr. Edwards, sixth, dace. The following also had fish: Messrs. T. Bowater, Painter, A. Bowater, Ellis, Aplin, and Lee.

Clapton Angling Society, Wayland Hotel, Dalston-lane.—At last Monday's meeting, Mr. J. P. Connellan in the chair, Mr. J. Day, Upper Clapton, was elected a full member. The proposed new departure was considered, but in the absence of our secretary, Mr. H. Howes, no decision was arrived at. Next Monday, being Bank Holiday, there will be no meeting, as we trust that most of our members will be on the war-path. Lists of the slain sent in to Mr. Wheeldon by Tuesday evening will be duly noted in next week's *Gazette*. Our next meeting will be on Monday, August 10.

Clarence Angling Club, Red Lion Hotel, Harrow-road, Paddington, W.—At a special meeting held on July 29, some very important business was done, the first being the rental of a stretch of one and a-half miles of first-class water, about eighteen miles from London; after which another new member was enrolled. Mr. J. F. Dawson has had some good sport amongst the perch, roach and dace, our worthy treasurer being well in with the minnows. The sec. had a fortnight of good fishing in Essex, with full bags each day of rudd, roach, dace and eels. The meeting closed with a vote of thanks to the chairman.—ALF. E. EVANS, secretary.

Clerkenwell and District United.—The competition in connection with the above took place on July 26 in the Medway, with the following result: Mr. H. Gates, (City of London), 1lb. 12oz.; Mr. Rapley (St. John's), 1lb. 11½oz.; Mr. H. Long (Crown and Buckland), 13¾oz.; Mr. Glover (Crown and Buckland), 11¼oz.; Mr. Webster (Lincoln), 8¼oz.; and Mr. W. Clark (Crown and Buckland), 7½oz. We had our usual fine weather, and all of us enjoyed our pleasant journey through the hop country. Our list is now full, the Camden Angling Society having joined us.—F. CASTELL, hon. sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—We fished for remainder of prizes on July 26th; the winners were: A. Smith, W. Parbury, G. Perkhams. We also had a nice show of fish weighed in by F. Hannabus, with tench and bream; F. Stone, with tench.—A. SMITH, secretary.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—A few nice chub have been taken from our water in the Colne. Mr. R. B. Brown had a handsome fish of 4½lb. from the Wey.

Crewe No. 1 Angling Society.—The annual tradesman's match in connection with the above-named society took place on Saturday last, in the Shropshire Union Railway and Canal Company's Canal at Audlem, when some ninety members took part in the competition. The tradesmen of Crewe kindly presented the society with some very handsome prizes, one of which deserves special mention—viz., the one given by Mr. Summerfield, an oil painting, subject, "A Brace of Trout." This picture was painted by Mr. West, of Sydney, near Crewe, a very old and respected inhabitant of Crewe, and reflects great credit on his ability as an artist; and was taken by the first prize winner, Mr. C. Mitchell, chairman of the society. Other chief prize winners may be mentioned: Mr. S. Clewes, J. Bate, H. Thomas, H. Plevin, R. Seddon, N. Dean, &c. £7 10s. was granted from the funds of the club in addition to the tradesmen's gift, making forty-eight prizes in all, valued at something like £18.—F. A. WILLIAMS.

Crown and Buckland Angling Society.—This club held their return visit on July 29. Mr. Norris was in the chair, and Mr. Franklin vice-chairman. Among those present were Messrs. Chambers (City of London), Catnach and Thorling (St. John's), A. Greeling and Baker (Rising Sun), Burwash, Clark, &c. Mr. A. Greeley presided at the piano.—E. ROGERS, sec.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On July 26 several of our members were out and met with very fair sport. Messrs. Wild, Parram, T. Midson, Cogswell, W. Midson, J. Edwards, and Killick, having a fine show of roach, perch, and bream, one gentleman having 10lb. of roach from the new association water at Ponder's End. Members will be able to weigh in on Bank Holiday as usual, honorary members on Tuesdays.—S. MALBY, sec.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road, E.—At the meeting held July 23, a new member was elected and another proposed who will be balloted for next meeting.—FRANK WOODS, secretary.

Edmonton and Tottenham Angling Society, Old Bell, Edmonton.—This very old-established society made its *debût* for the season on July 26, by its members going out for a fishing competition to the river Stort to fish where they liked as far as Harlow. The outing was rewarded with most successful results, every member who competed bringing to the trays a splendid show of fish. The following were the successful members: Mr. Hadtkis, first: Mr. Litch, second; and Mr. Hopton, third.

Eustonian Angling Society, King's Head, Swinton-street, King's-cross.—During Bank Holiday the above society will fish the association waters, at Enfield, for the remainder of club prizes not taken last season. On July 26 very few fish were weighed in. Mr. Bailey takes Mr. Neall's prize for the largest roach for the month of July.—R. NEALL, sec.

Funny Folks Angling Society, Rose and Crown, 21, Goswell-road.—On July 26th, the following weighed in: Messrs. S. Hill, bream and roach; F. Vanhegan, roach and dace; and Biggs, roach and dace. Mr. Biggs wins Mr. Vanhegan's prize for gross weight in July. At our last meeting we made one member, and have two more on the book for election this week. We have still room for a few more working members, as our prize list is still increasing.—J. W. BIGGS, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We were saved from a blank on July 26, by Mr. Stebbings with 9lb. of bream, and Mr. Riggs, with a few roach. A friend of mine tells me that on Wednesday, last week, the banks of the Thames between Hammersmith and Kew were covered with dead fish, roach and dace.—A. P., sec.

Good Intent Angling Society.—We have had some good shows of fish at our club this last three weeks. Our nineteenth annual dinner will take place on August 17, at the Rye House Hotel. Mr. H. J. Tibbatts will preside. A four-horse brake will start from the club-house on the morning at nine o'clock; so members give in your names at once.—R. M.

Highbury Angling Society, Hornsey Wood Tavern, Seven Sisters-road, Finsbury Park.—We had a good show of dace, barbel, and chub from the Thames, by Mr. Monty, on July 26. I take this opportunity of calling the attention of those gentlemen who intend giving prizes and have not yet done so, that the committee meet on Thursday, the 6th of August, the latest, to arrange them for the season, and that the sweepstake at Amberley is arranged for the 16th. There is still a chance of a few more entrances.—J. T. G., secretary.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street, W.—On July 25 Messrs. Davis weighed in perch and gudgeon; Farrell, gudgeon; and T. Morris, dace. Last meeting night Messrs. Pryer, Richards, and Pocock were duly elected members of this club. Wednesday, August 19, is the day fixed for our visit on the Clerkenwell List, and I hope next week to be able to report that I have secured the services of Mr. Harding to read us his paper on the occasion, which will ensure a fine evening's amusement. All anglers and friends are invited, and we can stow away very comfortably over one hundred persons.—SNAP.

Islington Brothers Angling Society, Myddelton Arms, Canonbury-road.—We met on the 23rd ult., Mr. G. Holder in the chair, when it was arranged to call a meeting for Thursday, August 13, for special business. Several of our members fished in the match at Yalding, but were not successful. The following showed fish: Messrs. G. Holder, roach and bream, 4lb. 7¼oz.; H. Herbert, dace; J. Herbert, roach and dace. We had a very good muster of visitors and friends. We have room for a few more members.—J. HERBERT.

Izaak Walton Angling Society.—The members competed for four special prizes on the 26th ult. at Pangbourne, only two (Messrs. C. Layton and A. Furlong) succeeded in taking the required weight. There are five special prizes to be fished for on August 9; particulars and conditions can be had at the club-house, Messrs. T. Harris and J.

Poole weighed in roach and dace on the 26th ult. There was a long discussion on "Eel Fishing During the Fence Months," on Wednesday evening last; it was proposed and unanimously carried that our delegate (Mr. G. Manning) bring the question forward at the next meeting of delegates.

Jolly Anglers, Cambridge.—The above club had its first outing last week, which for the first time since the formation of the club, this match was called a Special Day. £8 was offered in money prizes. There were fifty-three entries, and fifty members fished a pegged-down match at Upware. Logan's boat conveyed the members down stream, about nine miles to the above place. There would have been a much larger entry, but business just at this time prevented many. The day as to the weather was not all that an angler would like, as it was very windy, great catches were not the order of the day. For just as the ground was pegged-out, the weed-cutter went through all the swims; hence the consequences, to the said annoyance of the anglers. Another hindrance was the travelling of great barges through the swims; however, just upon £7 in prizes were won—and the money paid last Monday, at the club room, to the successful competitors. On next Monday (by-day), match will take place. Hoping for better luck.—JOHN O. GEORGE, auditor.

Jubilee Angling Society, Portobello, Kensal-road.—The only members weighing in fish on July 26 were: Messrs. Onree, Warner, and Dunham, who had roach from the Slough Canal, the first two gentlemen winning second and fourth prizes in the competition.—A. IDE, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—The dinner to inaugurate the new headquarters, the Queen of England Hotel, Goldhawk-road, took place on Friday, 24th ult., and was a great success, being well attended by members and friends. The repast was of an exceptional character, and all credit is due to Mr. C. Downes. In the unavoidable absence of the president, the vice-president took the chair, and ably carried out the duties, supported by the treasurer and secretary. The musical programme which followed was most successful. Several new prizes were promised, and members proposed to join.—T. SALTER.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 26th ult., a few members were out, three of thom fishing in the Clerkenwell District Competition, Mr. Webster winning fifth prize. The following members also weighed in: Messrs. Porter, Belton, and Ellingham, some nice dace; Mr. Holmes having a pretty show of rudd. Members can weigh their fish from Saturday till Monday night for specimens and gross weight only.—W. E. WATLING, sec.

Liverpool Angling Association. — Only fourteen members attended our last week's meeting. Why this apathy, gentlemen? Many things may happen behind your backs, and then of course some of you will grumble and want this and that reopened. Two non-members were duly elected, and three more nominated for membership. We have now decisively passed the ceutury, and it is proposed to celebrate this by a special outing—say to Windermere. The details, arrangements, and prizes were settled for the conpetition in the river Vyrnwy at Llanymynech on August Bank Holiday, and several minor matters got through.—R. WOOLFALL.

Liverpool East End Friendly Angling Association, 150, West Derby-road, Liverpool.—We had a good attendance of members on the 21st ult. It was proposed that a match take place at the Vyrnwy, Llanymynech, for three prizes, no fish to be weighed in under 4oz.; one rod only to be used by each competitor. To leave Liverpool landing stage by the six o'clock boat, on the day of match. Bank Holiday.—T. C. SEGAR, sec.

Lord Palmerston Angling Society, Earl Russell, Isledon-road, Holloway, N.—The members of this society met on the 27th ult., when Mr. Wooderham and Mr. J. King were made members. We fish a match on August 2 and 3, the two days' fish to weigh, all fish included, and to be taken from public waters.—R. SHARPLESS, sec.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On July 26, our members were at various waters, when we had some good shows of bream, roach, tench, chub, and perch, by Messrs. Penfold, Weller, Samson, A. Clark, Grey and Barnard. On the 9th inst. we fish our first outing this season at Boxmoor, when we hope to have a good muster.—W. F. PEARCE.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—Tuesday being our usual meeting-night, we did not have a very large attendance, as most of our members are out holiday making. Mr. Garratt weighed in dace on the 26th ult.; and Mr. H. K. Applin was out on same day with Mr. Smith, of the Dalston, and several of the Great Northern members, and succeeded in bringing home a dozen very nice roach.—J. COOMBER, sec.

New Albion Piscatorials. Duke of Kent, Old Kent-road.—Since my last report, Mr. R. Turnham has weighed in a finely-formed jack of 11¼lb., and at to-night's meeting (Thursday, July 30) Mr. Grimmett, our chairman, just to make our mouths water, as he said, reported that a friend of his had recently caught twenty tench weighing 73lb., one rudd of 2¾lb., and a roach of 2¼lb.! Our own Benevolent box produced a guinea. Next outing fixed for Bank Holiday Monday, an open competition. The Norfolk Broads question was brought before the meeting, and the chairman said the club ought to feel proud of the position the London anglers had taken in the matter, considering that the New Albion Piscatorials were the first to contribute to the Defence Fund.—A. E. BALDWIN, sec.

North Eastern Angling Society, City Arms, 9, Blomfield-street, London-wall, E.C. — On July 23 tho balance-sheet for the past year was read and confirmed, showing everything to be in a highly satisfactory condition. We have two or three vacancies for activo members should any gentlemen be disposed to join.—G. T. FLETCHER, hon. sec.

North Lambeth Angling Society, 106 and 108, Westminster Bridge-road, S.E.—On 26th ult. no very great success was met with, only two members weighing in dace. I may mention that a rather large catch was made early in the morning, in the person of one of our members, who had a tumble in about 20ft. of water, but was luckily hooked and landed, not much the worse for the drenching. —F. WALLIS, sec.

North London Angling Club, Tap House, Holloway-road, Highbury.—We met as usual on Wednesday, when another member was admitted. It was decided that we fish a roving match at Harlow for three club and two private prizes, on August 16; all members to go down by the 8.10 train from Hackney Downs.—H. STRETCH, hon. sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park, N.W.—Mr. Schultz, senr., saved us from a blank on July 26, with perch. August 13 is quarterly night, when I hope to see a good muster, as there is some interesting business to be brought forward. —G. SCHULTZ.

Odds and Evens Angling Society, King of Prussia, Bevenden-street, Hoxton.—On July 19, Messrs. Bygrave, sen., Bygrave, jun., and Harrison weighed in roach, dace, and perch, making a first show for the season of our club-house. On 26th ult. Messrs. Bygrave, sen., roach and dace, 2lb. 5½oz.; Bygrave, jun., and Neville, roach; heaviest fish, 10oz.—J. CUTHBERT, sec.

Original North Lambeth Angling Society, the Wellington, South-street, Hercules Buildings, Lambeth, S.E.—On Tuesday last we received a visit from A. A. L. Although only nine clubs answered to the roll, we passed a very pleasant evening. On August 2 we have a competition at Twickenham, from punts; members to go by first train from Waterloo.—J. MANN, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—Au open match took place on July 26, when there was a nice show of fish, and all the prizes were taken: Mr. Stidolph being first, Mr. Kemp second, Mr. Gardham third, Mr. Daniels fourth, and Mr. Tozer fifth, several other gentlemen having fish.—A. G. DUKE, sec.

Phœnix Angling Society, the Crown, Pancras-road, N.W.—We had a fine show of fish on July 26 and 28, Mr. Elbourne weighing in 35lb. of bream, largest fish 3lb. 13oz.; Messrs. Mares, Dove, Carr, also a nice show of fish. All members please note that on Aug. 2 and Bank Holiday, We fish for five prizes; all fish to weigh; all members are requested to weigh in not later than 11.30 on Monday night. W. ELBOURNE.

Prince Albert Angling Society, Prince Albert, Lincoln-street, Bow-road.—Our members were out on the 26th ult. Mr. F. Pignatelli was first to weigh in with 5lb. 10oz. roach; Mr. C. Mead, 4lb. 5oz.; Mr. Gandy, roach and dace. We have a silver cup to be fished for, also two other prizes, on the 9th; pegged-down fishing. Place will be decided on the 6th inst. Any gentlemen wishing to join will be heartily received.—F. PIGNATELLI, hon. sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—Several members where out on July 26, at Slough and the Thames, when the following weighed in: Mr. W. Rodber, three fine chub; Mr. Buck, one barbel; Mr. Harris, tench, which won a prize in the competition at Slough. From report of our members great praise is due to Mr. Abrahams for the able manner in which the arrangements were carried out. No meeting will be held on Wednesday next, August 5.—J. W. HARRIS, sec.

Prince of Wales Angling Society, the Globe, Lisson-grove.—The following weighed in on July 26: Messrs. Scott, Knight, Ivermee, Robbins, Brett, Crawley, Axworthy and Davy. The two latter being successful in the competition at Slough. Mr. William Chambers was elected a fishing member of the above.—W. BOWYER.

Queen's Angling Society, the Latimer Arms, Walmer-road, Notting-hill. — We had a good show of roach and bream on July 26, by Messrs. Pearce, Fathers, Drake, Pratt, Cook, T. W. Morgan. I hope members will show up to arrange for the annual September outing and dinner and arrange prize list.—F. G. PEARCE.

Rising Sun Angling Society, The George, Brook-street, Holborn.—On Monday, the 20th ult., a smoking concert was held to celebrate the removal of the club to these premises. Mr. Bradley occupied the chair, and was faced by Mr. Baber in the vice-chair, when, considering tho fact that there were unfortunately three other concerts fixed for that night, a very fair muster was present. On the 26th ult. Mr. Comley saved the society from a blank by a show of roach. On Monday last, Messrs. Henry Taylor and Thomas Grantham, the worthy proprietors, together with a friend, Mr. Ernest Bedford, were unanimously elected working members, and gave some very interesting fishing experiences; Mr. Fred Roser and Mr. Fred Robinson were proposed as working members, and Mr. Edward Hawkins was duly proposed as an honorary member. There are several other names to be brought forward next week.—J. SKINNER, sec.

Rodney Piscatorials, Rising Sun, Harper-street, New Kent-road.—About twenty members of the above society took part in the match at Amberley, on the 26th ult.; and I am very pleased to say all the prizes were taken as follows: Messrs. J. Winley, first; J. Utting, second; T. Hill, third; F. Lamberton, sen., fourth. On Wednesday, 29th ult., Mr. J. Davis weighed in some dace.—F. T. LAMBERTON, sec.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—Several of our members were out on July 26, but only three weighed in, Messrs. Webber, roach, 9lb. 10oz., Upper Thames; Harris, junior, roach, 2lb. 12oz.; Chart, 3lb. 8oz.; tho rest fished the Lower Thames, but were too late to weigh in. In the report of the week previous, Mr. Wood, two prizes, should read £1 10s. for last fishing in September; 10s. 6d. for last fishing in October. It was proposed and seconded that Mr. Galloway and Mr. Phillips become members of this society. They will be balloted for next Wednesday.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On July 26 we had a very fair show of fish, consisting of roach, dace, perch, chub, rudd, by the following members: F. Barclay, I. Yeo (one of this gentleman's roach scaling 1lb. 2oz.), G. Yeo, Parsley, F. Barrow, E. Perry, J. Stanley, A. Barclay, J. Holden, Cox, and Henson; total 36lb. 2¾oz. Last week's report should read "heaviest roach, 1lb. 3¾oz." instead of "3lb. 4¾oz." We are still open for a few good working members.—A. BARCLAY, secretary.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—We have had some very good fish weighed in during the week: Mr. Stone, a nice carp of 6lb., from the Thames; Mr. Wood, a 4lb. 2oz. bream; Mr. Brocken, perch; Mr. G. Ballinger, barbel; and Mr. George, bream and roach. On Wednesday, at the special meeting, some very good prizes were given by the members to be fished for on the 16th August, at Amberley, roving between Houghton and Timberley Bridges—viz., by Mr. Howard and Son, F. C. Ballinger, G. George, J. Wright, and club prizes. All members must go down by the first train on the morning of the match, or they will be disqualified. I trust all members will compete for the prizes.—J. WRIGHT, secretary.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On July 26 the following members weighed in some nice fish: Messrs. J. Petrie, roach and dace, 7lb., 5¼oz.; W. North, barbel, roach, and dace, 6lb. 11oz.; T. Lovibond, jun., roach, 2lb. 4oz.; G. Giles, roach and perch; J. Barnes, roach and dace. On Tuesday last we had a very fair muster, when a matter of great importance was brought before the members. Mr. Robert Alston was unanimously elected a working member of this society. The balance-sheet was also read and passed. Members wishing to fish can go out on the 2nd and 3rd of August and weigh in as one day take; members will also be able to weigh in till twelve o'clock on Monday night. Mr. H. Lancaster (fish preserver) brought two fish, club and rudd, another addition to our collection. We have a very handsome marble inkstand to be drawn for, tickets sixpence, further information to be had from S. CANE, secretary.

Shepherds' Bush Angling Association, Bush Hotel, Shepherds' Bush-green, W.—Several of our members have been out during the past week, and the following amongst others have weighed in—viz.: Messrs. C. Bennett, W. A. Bennett and friend, a nice show of roach and dace; A. Jones, barbel, dace, and chub; L. S. Fountaine, 12lb. chub (largest, 2½lb.); C. J. Benwell, a handsome tray of perch (largest, 2lb.). Several trips have been arranged for the Bank Holiday, when it is hoped the members will render a good account of themselves. The following is our standard size for all gross weight prizes—viz.: Barbel, 16in.: bream, 12in.; carp, 10in.; chub, 12in.; dace, 7in.; gudgeon, 5in.; perch, 9in.; pike, 24in.; roach, 8in.; rudd, 8in.; tench, 10in.; and trout, according to the various fishery bye-laws. The standard for specimen fish is proportionately high. We shall shortly be in a position to fix the date for the meeting of the Norfolk Broads Defence Association at our club-room, when we trust to see a good muster of anglers interested in the matter, and especially hope for support from West End clubs.—CRYSTAL HOOK.

Silver Trout Anglers' Association, Darlington.—The members held their annual picnic on the 22nd ult., at Wynyard Park, the seat of the Marquis of Londonderry. They were kindly allowed to visit the splendid gardens, and to fish in the lake in the grounds. It proved the wettest of wet days this year, but nothing daunted, they were not to be debarred by the weather; they were granted the use of the schoolroom for lunch and tea, and made themselves as jolly as possible under the circumstances. A number of them held a contest, the results being as follows: First prize, a silver cup (presented by the president, Mr. C. H. Sharp), being won by Mr. Swainston, with 3lb. 15¾oz.; second, Mr. Wright, 2lb. 12¼oz.; third, Mr. Elgie, 1lb. 6½oz.; others as follows: J. Martin, C. Gilham, T. N. Lloyd; pike and perch being abundant. The musicians under Mr. T. N. Lloyd made it pleasant for the ladies and their friends. Previous to departing they assembled, and drank to the health of the noble marquis, and altogether spent a very pleasant day, notwithstanding the adverso weather.—J. F. SMYTHE, sec.

Silver Trout Angling Society, Bedford Head, Maiden-lane, Covent-garden.—On July 26th, Mr. Williams weighed in 14½lb. of bream and dace. Mr. Smales, 10lb. of bream and roach from the Ouse (largest roach, 1lb. 6oz.). Several other members were out, but did not weigh in. Tuesday, 28th, Mr. Clark had a small basket, and some dace from the Thames, We made another new member. Members are informed that the final arrangements for the outing at Little Baddow, on August 9th, will be made next Tuesday. Any member wishing for a seat in the conveyance from the station to the water, will please let me know on or before that evening.—PELICAN.

South Belgravia Angling Society, Duke of Clarence, Horseferry-road. Westminster, S.W.—We had a nice show of fish on July 26th: Mr. Phillips weighed in 4lb. of roach; and Mr. Mandry, 1lb. 12½oz.; Mr. F. Taylor took the fifth prize (a clock) at the Slough. Competition, with one bream weighing 1lb. 6¾oz. Our worthy host, Mr. J. Evans, was elected a working member last Thursday. We have room for more new members, and have plenty of prizes to be fished for.—F. TAYLOR.

Stepney Angling Society, Beehive, Rhodeswell-road, Stepney.—Since my last report, we have had some very good takes on the 19th nlt., eight members turned up with a good show of bream, filling all our trays. On July 26th, the following came to the scales: Messrs. Ruston and Jolly, with roach and bream; Woodford and Willsher with bream.—E. N. P., hon. sec.

St. George's Angling Society, Prince of Wales, St. George's - road, Peckham. — The next visit on the S.L.U.A.V.L., goes to this society on Monday, August 10, when we hope to be well supported. Mr. Regardsoe fishing at Ripley on July 26, had some nice chub.—G. ETHERINGTON, sec.

Stoke Newington Angling Society, the Dun Horse, Kingsland-road, E.—The eleventh annual dinner of the above society took place at the club house on the 22nd ult., our host and hostess deserving all praise for the excellent manner it was placed upon the table, Thirty-three members and friends attended and thoroughly enjoyed themselves until the extension of timo was reached at two o'clock. Mr. George Manning advocated the claims of the Anglers' Benevolent Society in his usual earnest manner, and some valuable prizes were offered for competition during the season. On the 29th ult., we had a nice show of fish, about 36lb. weight. Mr. P. T. Godfrey having eight tench, scaling 19lb. 13½oz.; Mr. Collier, twelve roach, 9lb. 2½oz.; and Mr. Moore, three tench, 7lb. 1oz.—G. GRETTON.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—Several members attended the Bedford Head, Maiden-lane, last Monday night, at the presentation of the prizes for the Pulborough Competition, and two of our members had tho pleasure of taking a prize each (Mr. C. Fisher, a fly rod; and Mr. J. White, a sportsman's knife). It was decided by the members that tho club prizes remain in abeyance until the next meeting night, owing to it being Bank Holiday time.—G. MORTON, sec.

Sundial Angling Society, Plough and Harrow, King-street, Hammersmith.—Seven of our members took part in the competition at Slough on July 26, two of whom were successful in winning prizes—namely, Messrs. Fountain and Son, and they did not tako the advantage of baiting their swim overnight, did not start fishing before ten o'clock and weighed in before eight o'clock. Members will be allowed to weigh in on August 2 and 3 for gross weight. An outing is arranged for August 23, members to go where they please, punt or bank; amount of prizes to be arranged the Tuesday previous.—H.R.

United Brothers, Deptford.—Several members were out on the 26th ult., with the following result: W. Windred, roach; J. Payne, roach and bream; W. Bennett, bream. Tho members will fish thoir next match in the Medway on the 16th of August for several money prizes.—H. TYLER, secretary.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—Our members were out in full force on 26th ult., the following had some good shows, Mr. Ilsley, roach and dace, and an eel, 1lb. 9oz.; Mr. Clugg, roach; Mr. Bird, junr., roach and jack; Mr. Petty, perch. I wish to remind members that the match that was to have taken place on August 2 is postponed till tho 28th. Mr. Denyer was elected a member.—H. C., hon. sec.

Waltonian Angling Society, the Cape of Good Hopo, Albany-street, Regent's Park.—On July 19, we had a nice show of fish from one of our members, Mr. Jukes, 4lb. 12½oz. roach and chub. On the 26th ult., Mr. Waltham perch, &c., 3lb. 4½oz.; H. Putnam, roach and dace, 1lb. 12oz.; Muller, roach, 3lb. 6½oz. On the 29th ult., Mr. Waltham, 7lb. 6oz. roach; H. Putnam, roach and dace, 2lb. 3oz., one roach turning the scale at 1lb. 8oz.—J. Packman, sec.

Walworth Waltonian Angling Society, St. Paul's Tavern, Walworth, S.E.—On July 29, the result of the competition was declared as follows: Bailey, first, with splendid show of bream, the largest, one fish of 3lb. 11½oz.; Mr. Griffin, second prize, with good show of roach; Mr. W. H. Crisp, also a good show of roach, third.—C. Hebble, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—At the meeting on Wednesday last it was decided to postpone the August match until the 9th inst., the place to be decided on Wednesday next. On the 22nd ult. Mr. Cooper showed bream 8lb. 12oz.; Dartnall, bream, 7lb. 12oz.; Barnes, roach, 3lb. 12oz.; Gordon, roach and dace, 3lb. 2oz. On the 29th, Dartnall, roach 8lb. 12oz.; Pinder, dace, 4lb. 12oz.; Bryant, roach, 3lb. 4oz.; Barnes, dace, 2lb. 1oz.; and Gordon, roach, 2lb. 1oz.—R. J. Dartnall, sec.

Western Piscatorials, Bear and Rummer Tavern, Mortimer-street, Cavendish-square.—On July 19 Mr. Parry weighed in over 8lb. bream and perch, and 3lb. on July 26. Mr. Moon made a very fine show on Wednesday, July 22, weighing in 26lb. of tench and rudd, one tench being a fine four-pounder.—D. W. Evans, sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Our members were out on July 26, but only the following members weighed in fish: Mr. J. Newton, roach, one fish weighed 1lb. 2oz.; Mr. R. Lowther, roach; Mr. J. Evens, dace.—R. Lowther, sec.

Woolwich Brothers Angling Society, Green Man, High-street, Plumstead.—Our members have met with very little sport lately. We intend fishing a roving match in the Medway on the 16th August. We shall be pleased to enrol a few more members in our ranks. I omitted to mention in the last report that, whilst W. Hart was fishing at Dagenham on the 11th ult. he succeeded in hooking and landing a jack, 2½lb., with tight line, fine drawn gut, and gentils for bait.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

REPORTS FROM RIVERS, LOCHS, &c.

☞ *River Reporters who want forms and envelopes should send a post card to the Manager of the* Fishing Gazette, *St. Dunstan's House, Fetter-lane, London.*

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add 30 min. for Chelsea.
Add 40 " " Putney.
Add 45 " " Hammersmith.
Add 50 " " Barnes.
Add 55 min. for Kew.
Add 75 " " Richmond.
Add 80 " " Twickenham.
Add 85 " " Teddington.

Example:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

English and Welsh Reports.

The Lower Thames.—General Remarks.—There has been no season which has occasioned greater anxiety than the present one in regard to reported destructions of fish. It is only about a month ago there were quantities of barbel and other fish seen floating on the surface of the river in considerable numbers, which it was supposed to have been occasioned by some poisonous fluid from the dye or gas works; but this was negatived, and the cause assigned to the storms and hot weather, when the barbel were weak from spawning. After this came the report to the committee of the T.A.P.S. There had been a destruction of fish near the draw-dock on the Strand-on-the-Green side of Kew bridge, occasioned as it was said, by the spilling of what is termed "Blue Billie," in unloading, and which is used by agriculturalists in the neighbourhood. This was reported to the proper quarter, and with the following reply from the Conservancy head river-keeper, Mr. G. J. Rough:—"I beg to state there has only been two small freights of "Bluo Billie" unloaded at Kew Bridge draw-dock this year, which was carted away by Mr. Jeffries, market gardener, of Gunnersbury, and I am quite sure every caro was taken in the unloading. I saw the barges myself every day during the time they were being unloaded, and there was not any spilling. This man had mats from the barge into his carts, to prevent any falling on to the foreshore." This reply was considered satisfactory by Mr. W. H. Jackson, the member of the committee who brought the matter under consideration. The greatest calamity is now under consideration by the Conservancy officials, in whose hands the matter rests, as specially belonging to their jurisdiction. On the day of the river trip—last Thursday—the head river-keeper, William Douglas, reported the destruction of a large quantity of fish, and produced a bottle of brown coloured water that had been taken out of the river; and this report was supplemented by Mr. W. H. Jackson, confirming the great destruction of fish. It could not have happened at a better time, as Mr. H. Little, the inspector of the Thames Conservancy, joined the launch at Sunbury, and afterwards Mr. J. H. Gough, the secretary, in the evening; and I am soon expecting to hear the result. Mr. W. H. Jackson, whose business premises are at Brentford, has kindly offered to become a honorary river-keeper, and his practical knowledge of the river will render the position valuablo to the society.—B.

Richmond.—Henry Mansell, in three days, 12lb. of roach and dace, and a bream of 3lb.; Henry Howard, in three days, seven barbel, and six dozen of roach and dace.

Twickenham.—C. Annesey, in two days, 20lb. of roach and dace, and one bream; Samuel Cole, in two days, fourteen dozen of roach and dace, and three barbel; John Coxen, in three days, 30lb. of roach and dace, and three barbel; Richard Coxen, in two days, ten dozen of roach and dace, and a fine perch of 1¼lb.; George Coxen, in one day, two dozen of roach and dace, and a couple of barbel: John Frost, in three and a-half days, 46lb. of roach and dace, and seven barbel; John Spong, in four days, 46lb. of roach and dace, and five barbel.

Kingston.—N. Bolton, in three days, twenty-nine dozen of roach and dace; J. Wilkes, in three days, twenty-three dozen of roach and dace, a barbel of 5lb., three jack, and six dozen of gudgeon; John Johnson, during the week, seventeen barbel, twenty-two dozen of roach and dace, and two chub; J. Knight, during the week, ten dozen of roach and dace, and twelve barbel.

Hampton Court.—William Milbourne writes:—"The water is very low and brighter than I have seen it for years, but we are getting a few good roach. The punts are bringing in from five to six dozen each per day. Some of tho roach are very large. There has been, this week, some fine chub taken under the weir. Mr. Parkes, of Moulsey, got one of 4¾lb.; Mr. Rogerson, of Moulsey, also got three fine ones, and a barbel of 4lb. There has been some good takes of roach from the banks at Tagg's Island fishery. I know one man who caught seven dozen in one day, and five dozen the next day, all good roach.

Sunbury.—Messrs. T. and A. Stroud, during the week, have taken forty jack, and some roach and dace; and one of the anglers got one of 5½lb. Mr. Chitty has captured a trout of 5lb.

Chertsey.—John Poulter, one day, with Mr. May, in four hours, over four dozen of roach and dace; and another day, with two gentlemen, eight dozen; L. Hackett, one day, three barbel, two chub, and some good roach, and another day seven and a-half dozen of roach and dace.

Staines.—John Keene, jun., in one day, with Mr. Dunn, five barbel, and six dozen of roach and dace: another day, with Mr. Waterer, ten chub, three barbel, and four dozen of dace; another day, with Mr. Taylor, 18lb. of roach, dace, and barbel; another day, with Mr. Angarde, six dozen of roach and dace, and one barbel; another day, with Mr. Graham Bennett, seven dozen of roach and dace, and one barbel.

Upper Thames.—During the past week the upper portions of the Thames have been visited by daily downpours of rain, which have seemingly kept the disciples of Izaak from following their gentle occupation. Angling, therefore, has been more honoured in the breach than the observance, or if observed, the breeches have had the worst of it. On the 26th it was so hot that it was almost dangerous to be on the water, and in a ramble in the Hurley and Marlow district by the side of the river, I did not observe a single punt at work, and even if there had been, the crowd of pleasure boats was so great as to preclude any chance of sport in mid-channel, or even in generally secluded nooks and corners. Since Monday morning it has done little else but pour, and the only few reports of success are amid roach. I hear, however, of good hauls of lob worms, and if the elements will but become propitious, these alluring baits should induce good business amid barbel, roach, and chub, in the near future, in the already colouring water.—Marlow Buzz.

Thames (Datchet).—Thero is a little more water in tho river now than at the end of last week. The weather seems too unsettled to get sport. I have only been out once this week, they didn't bite in the least. Caught one barbel, and another broke both the rod and line. All last week the barbel fed very well, 30lb. and 40lb. per day up to date. Fishing is far better than it was this time last year.—G. Lumsden.

Thames (Windsor).—The recent cool, showery weather has been greatly in favour of angling, and as a result, baskets have been numerous and of good quality. Tho largest fish of the week was a perfect specimen barbel, which I weighed, and found to go just 7¾lb. It was caught by a Mr. Marsham, of Eastbourne. Another of 5lb. 6oz. was taken from the same spot by Mr. S. Wilson, of Eton. The veteran enthusiast, Mr. Herd, of Egham, has had splendid sport amongst his favourite fish, the roach, taking many dozens. His best basket was seven dozen after four p.m., a fine show. He has also recently had a trout of 4lb., another trout of 3lb. being taken at Boveney Weir. Mr. Oades, of Egham, and Mr. Herd on another occasion had a basket of four dozen roach, a barbel of 3lb. (taken on roach tackle by the former gentleman), and a perch of 1lb. Several barbel have been taken, but are very backward, owing to the cold season, the milt running freely from a fish which R. Gray, of Windsor, caught on July 26. Gudgeon are feeding, but not well, two punts on July 24 taking just over twenty dozen. Chub are very numerous, and good baskets are had, the heaviest being one of a 17lb. basket, caught by Mr. Coomber, of Eton. It weighed just over 3lb. Mr. Howlett, of Eton, before eight a.m. on July 27, had a good basket of four dozen roach and a jack of 2½lb. Water could not be in better condition for time of year.—B. R. Bambridge.

Ancholme District.—There has not been much trout fishing during the week. Mr. A. Ford, of London, two-and-a-half brace one day, and three-and-a-half brace another; all being good fish. The angling on the Ancholme has much improved, the bream getting well on the feed. In addition to a lot of minor takes Mr. J. Simpson had four fine bream up to 4lb.; Mr. F. Ford, two bream, 3½lb. each; Mr. Brown, of Gainsborough, one bream, 4lb. and one of 3½lb., and two jack; Mr. Helton six bream up to 3½lb; J. Neal, six bream, the largest 4lb.; J. Rotheray, two bream, about 4lb. each. Since Monday Messrs. A. White and Smith had 18lb. of bream and roach between them. Two or three matches have been fished. On Tuesday Captain Jardine, of Cape Town, Mr. A. Ford, of London, and your correspondent had a most enjoyable day at Crosby Lake. They got no trout but bagged a fine dish of thirty perch and two large eels.—Thomas Ford.

Arun (Pulborough).—The much-wanted rain has come at last, this neighbourhood being the scene of quite a torrential deluge on Monday morning, and at the time of penning these lines the river is in much better condition for angling than it has been since the opening of the season. This will be especially good news to those fond of bream fishing; and providing we don't have too much wet between now and Sunday, some respectable baskets of these fish look like being made by the London visitors to the Central Association's water, and other reaches of the river. The succulent gudgeon have commenced to bite well, and an angler made a catch of two dozen on Wednesday last, which, if I mistake not, were duly served up and considerably relished at the breakfast table of mino host at the Swan, the principal rendezvous for anglers in this locality On Thursday, one of the Metropolitan anglers, staying in the village, accounted for a pretty dish of thirteen roach, all good-sized fish, landed from the waters of the Central Fishery. Concerning my report of the capture, in a farmer's net, of the 16lb. salmon, one of the local people assured me that several salmon had been shot from the Swan Bridge, but, of course, I took this on with a very large pinch of salt, Mr. Editor. That the river holds salmon is well known, and some of these days it may fall to the lot of one of the Central men to do battle with the lordly fish. I hope it won't be with his roach-pole, that's all! I am glad Mr. E. L. Nutt met with such a cordial reception at the prize distribution held in connection with the recent great fishing competitions here, which came off on Monday night at the head-quarters of the Central Association, the Bedford Head Hotel, Covent Garden. He very kindly brought up to town with him some pretty bouquets of flowers for the prize-takers.—Goosequill.

Barle (Dulverton).—The water has run down, and fish can only be taken after 7.30. p.m. The glass is rapidly falling, so we may expect a rise of water. There are plenty of salmon below Tiverton, and if the weirs have proper passways or ladders, we on the higher waters might share the sport of killing an occasional fresh run fish; but Tiverton is a hungry place, and select for fish.—Iron Blue.

Brighton.—Sea Fishing.—Boat anglers have again been having good sport with bream, but the rough weather of to-day (29th) has put a temporary stop to it.—H.

Cambridgeshire and Suffolk Rivers (Newmarket).—Fishing in all our rivers and broads have been much better during the last week. I had a try myself at Barton Mills and Icklingham on Wednesday last, in the river Lark, and took a splendid lot of dace, chub, and some good roach, they are coming on well now in this river, and the Little Ouse at Brandon. In the Ouse, below Ely and Littleport, roach are not feeding so well, the bream are gone off a little, perch are well on. There was an angling match at Upmarl on the Cam, last week, nothing much was taken, the recent rains have made the water a very good colour and nicely high. I still advise anglers to try the sharper streams, as the Lark, Little Ouse, Yhet, in preference to the deeper waters of the Ouse.—William Howlett.

Derwent (Ambergate).—Although the Derwent and Amber have been rendered in good condition for either fly or bottom fishing by the recent showers little is doing on either stream, consequent, upon the prevailing cold northerly winds which have checked the hatching of aquatic flies, and trout are rising badly. There appears little prospect of a change at present, consequently prospects of sport for bank holiday anglers are not encouraging.—Amber Dun.

Douglas (Isle of Man).—The rivers for the time of year still remain in good order, but rain would be welcome. The Isle of Man Angling Association have at length succeeded in renting the new reservoir from the Douglas Commissioners on very advantageous terms, and they hope to make it into another Lake Vyrnwy on a small scale. It has already a fair stock of fish, and we hope judicious replenishing will make it the best water in the island. Fly alone is to be used and no boats permitted. This latter I cannot help thinking to be a mistake, as it will be well nigh impossible to get at the ancient cannibles that we know the water contains, however, as it is a clause of the lease, there is no help for it. Sea fishing is still excellent, mackerel are all round the coast, and all other varieties are taking well.—Stormy Petrel.

Dove and Tributaries.—Weather showery, sport fair on the whole: a dish of ten brace was made on the Norbury water, on the 24th, and several decent takes are reported from the Bird's Grove length, there are very few fishermen out. If we get a good fall of rain, as the outlook promises, sport prospects will look bright enough for the most fastidious.—D. & W. H. Foster, Ashbourne.

Eden (Amathwaite).—Water much coloured with heavy rain. Some good baskets have been made with the worm, Mr. Barnes, Chesterfield, staying at the Red Lion, having done fairly well, his biggest take being fifteen fine trout, on Saturday. The club members also have been pretty successful. Prospects good if not too much rain. The otter hounds met at Amathwaite on Tuesday, having stayed all night, meeting at five in the morning. The river been too high, nothing was done, but were very unfortunate in losing a valuablo hound, (Eden) who must have taken a fit and been drowned in the strong water. It cast rather a damper on the followers of the hunt. They meet at Longwater on Friday.

Eden (Carlisle).—Herling fishing is now in full swing, and heavy baskets are being made, especially in the Esk, where the fish are very numerous. Some anglers have had forty, fifty, and, in one case, over seventy in a day with the fly. It has been remarked for some years that these game little fish do not run up the Eden in the same numbers that they used to, and there is a general feeling that the serious pollution of the stream by the Carlisle sewage has a good deal to do with it. Now that the Eden Fishery Board have taken the matter up, it is hoped that the corporation will take steps to lessen the evil, at all events, To entirely do away with it would be rather a "big order" and heavy on the ratepayers. The late run of salmon and grilse is said to be the heaviest for fifty years, though sea trout have been exceptionally scarce.—Silver Grey.

Esk (Whitby, Yorkshire).—The river continues to be very low, and all attempts at sport result in disappointment. Besides there is almost a daily recurrence of thunder, and the atmosphere is yet unsettled. Very few salmon have got up the river from the sea, and it will be impossible for there to be a good run until there is a regular fresh. Anglers at a distance will be glad to learn that the Esk Fishery Conservators have nearly completed two new passes, one Ruswarf Dam, and the other at Sleights Dam. These will materially facilitate, it is expected, the passage of salmon and salmon trout from the river into the upper streams which has long been much needed. I believe the improvement is being carried out at the suggestion of Mr. Berrington, the Chief Inspector of Fisheries.—J. J. Jackson.

Fen Waters (South Lincolnshire).—Since last writing the weather has been showery and unsettled, and angling has proceeded under rather worse conditions, so far as pleasure is concerned, but the showers will improve the colour of the water. Rain has been wanted to bring roach better within the angler's prowess, and no doubt bream fishing will be benefited. Very fair results have followed operations, but hitherto perch have been best to catch. Some good specimen fish have been landed, and odd ones have been spoken of up to nearly 2lb. Gentles and creed wheat will probably be useful with roach, and possibly bream. "Roding" or weed-cutting proceeds slowly.—Limpet.

Idle (North Notts).—The few showers wo have had during the past few days have improved the angling, and as I write, we are having what looks like a heavy rain which may have its effect on the streams. They were wanting a freshening up, not only to sweep down a lot of bottom weed, but to give a better colour to the water. Angling for coarse fish has been fairly remunerative, some very nice baskets having been got early in the week, and mainly in the lower reaches. I do not think much has been done with trout in the upper district, but after a few days sport may be renewed. Bottom fishing for grayling should succeed now, though I have heard of little luck in that line as yet.—L.

Itchen (Winchester).—Some good fish has been taken during the evening rise, the best bag being four brace, largest fish, 2lb. 4oz.; best killing fly, Red Quill; wind, south-west.—Ginger Quill.

Kingston.—Fishing with Josh Wilkes on July 26, Mrs. and Mr. John R. Richardson, of High-street, Kingston, caught in Town End Hole fourteen and a-half dozen of roach and dace and one turtle, 5lb. On Monday, Mr. H. Ogden Smith and Mr. J. Richardson fishing in the same river, four dozen of roach and dace, and two bream, 4lb. and 4½lb.

Lea and Stort.—Many people would naturally consider that the heavy rains of this week would have brought down a flush of water; unfortunately, such is not the case; rivers still remain at the low level, whibh has been continued for the last few weeks. It may be a matter of interest to anglers to know that the waters of the Navigation Canal, will be drawn off from the 10th August, until the following Saturday, to protect the long stretch of water brought down to a very low level, will tax the resources of such a well organised society as that of the Angler's Association, let us hope they will be equal to the occasion. Sport has been fairly good at most fishing stations; but it makes one almost hold his breath when we hear of a capture of a carp of unprecedented dimensions, yet this has occurred, for on the 24th inst., Mr. H. T. Haslewood, a member of the Eagle Angling Society, captured, after a very hard fight, a carp which scaled no less than 13lb. 13oz.; this is indeed a piscatorial trophy for the Lea. Roach have not been well on the feed; let us hope they are waiting for the Bank Holiday anglers. Friday.—Water in fair condition, and weather promising.—Spliced Joint.

Leicester.—Anglers are doing well at Leicester, especially at the Leicester Angling Society's five miles' stretch of waters, where roach are being taken in large quantities. Perch and chub have also afforded rare sport; one specimen of the former was taken from the West Bridge Pond, 1lb. 8oz. The rains have done the waters a lot of good, as not only close to Leicester, but throughout the district, reports show that roach, pike, perch, chub, and dace have been freely landed. Mr. A. J Lee captured one brace of chub from the Aylestone Brook, weighing 7½lb., fish generally on these waters being well on the feed. Among the most successful anglers, the lots taken by Messrs. A. Bachus, W. Pinnock, J. W. Smith, C. Lings, W. Dewick, H. Painter, T. Condon, T. Kitson, J. Billson, J. Parsons, W. Mansty, A. Wragg, W. Thomas, J. Potter, and L. Tyler are worthy of mention, most of those mentioned having fine takes of roach. Anglers are sure to be busy, and I would recommend as best baits for next week, creeded wheat for roach, well-scoured lobs for chub and perch. White Moths evening fishing for chub, and spinning with either artificial or dead bait for pike.

Loddon (Earley).—The weather has been very stormy this week, which has improved fishing, and fish are well on the feed. Several good baskets of roach have been taken, some scaling up to 1lb. 5oz. Good takes of chub have also been had with fly; jack have not been tried for yet, but occasionally a brace have been taken, improving in condition every week. River in good condition.—J. R.

Lugg and Arrow (Leominster).—These streams are now running low and clear, and scarcely any fishing done in them during the middle of the day. Grayling have taken the grasshopper in the morning. The Pinsley is low and clear, and fishing in it has been very quiet.—Gwynne.

Lugg, Arrow, and Pinsley (Kingsland).—Rivers are low and bright, with their beds very foul, to clear which and bring the trout on the feed, a good fresh is much wanted; angling is quiet. Next week we begin with the grayling, and hope to have the pleasure of sending a more cheerful report. Flies are very numerous. Some of the best are July and August Duns, Silver Blue, Black Palmer, Red Ant, July Gnat, Owls and Spinners. Wasp grubs are particularly scarce this year, much to the annoyance of many pot-hunters.—R. T. Williams.

Medway (Maidstone).—Since my last report some of the experts have got on good terms with the roach. I saw one basket of roach of 10lb., taken at Farleigh weir, by the secretary of the Maidstone Angling Society, taken with wheat, from Farleigh to Yalding. The anglers were not having mueb much sport. The fish have not yet left the runs and shallows. The late rains have quite thickened the water, but it will soon tone down, and in a few days the prospects for the anglers will be good.—W. Shrubsole.

Medway (Tonbridge).—The season, though somewhat late, has opened very well: but the storms of the present week have stirred up the water to such an extent that all fishing for a few days is out of the question, unless the water fines down quicker than anticipated. As soon as this takes place, no doubt bream, roach, chub (the last named with a fly, wasp, grub, or a bunch of gentles), and perch will be well on the feed.—Ye Medway Water Rat.

Nene (Northamptonshire).—Mr. Tom Burdett, a Peterborough angler, caught a tench of 3lb. on Saturday, at Castor; he also, among other fish, landed a fine eel of 2½lb. Some very good roach and bream have, I hear, been hooked in the river at Whittlesey, some of the former running to about ½lb. A willow tree, between Tuzzy Meadow and the Common, in Hunts, was recently struck by lightning, all the bark being stripped off. About forty fish were afterwards found dead at the roots of the tree—presumably killed by the lightning.—Nenebank.

Ouse (Brandon, Norfolk).—We are still grumbling as to the unsettled weather and the floating weeds just at present are a nuisance to the angler. However, the fish are there, and I am happy to state as numerous as ever, and there is no mistake to mention this, for it is a sight to take a boat and look at them. My advice to anglers is, especially to those who intend to visit this place for next week, write or telegraph to Host Ralph, Ram Hotel, as to what is required, and for further state of affairs, and he will gladly reply, but I am certain should the weather be favourable, a great many anglers will be down, but at the present time of writing I shall not be responsible for two or three days further as to future annoyance. Therefore, for one week anglers must take their own opinion as to a visit, but I believe the fish will be on if the elements of nature allow. Time of writing very showery and cold, wind changeable. A look at the G. E. R. time table will show a long day's fishing here. Station close on the spot.—John O. George.

Ouse (Huntingdon).—Both roach and bream have been feeding well this last week, and some very good fish have been taken, and at present sport is good. One local fisherman was out on the 25th ult., and had some good sport with the bream, landing nineteen good fish, and lost several more, owing to the hooks being too small, about 30lb. weight. The Angling Association had a tournament on the 22nd ult. Fourteen entered, but twelve fished, and every member had fish. The number caught was three hundred and seventy-five, weighing 63lb., including a fine roach of 1½lb., showing that they were well on the feed, and are at present, for the water is in prime order for all-round work. Prospects good.—H. Rout.

Ouse, &c., (York).—Weather fine and cooler, and to-day (Wednesday), the main river is running—that slightly peaty brown colour so characteristic of the Ouse at this time of the year; but is in first-class order for certain kinds of bottom fishing. This is the time of year when the barbel anglers turn out in force, and men may be seen just now with rod and line, who never wet their tackle except during "barbel time" as they term it The baits generally used are various kinds of paste and worms, which are sunk in the trough of the river by heavy leads, but the tackle generally, oh! Mr. Alfred Jardine, you should see it. Still by the rudest rods and lines some of these men manage now and again some fair sport, and I hear of some very fine fish being taken near to Lendal Bridge this week. The trout streams are in capital order just now, and I hear of some good kills in the neighbourhood of Sinnington and Pickering. I understand there will be a "gathering of the clans," on Monday at Pocklington Canal, which is in grand order, and some heavy kills are expected.—Ronald.

Plymouth.—Sea Fishing.—Bass are still about here, and are being taken with the throw-line from off the rocks, or with the india-rubber sand-eel and plano-convex minnow-spinning with a rod. The former class of fishing is practised very much here, and it is productive of a great amount of sport by the youthful population, whose purses are limited. The mode of fitting the line is as follows: Twenty fathoms of fine Whitney line, with 1lb. plummet lead at the bottom, and four or five hooks attached at intervals of about 1ft. up the line from the lead. Size of hooks, No. 2/0, either on the short-twisted gut or flax snooding, baited with a piece of pilchard, squid, or mackerel. These lines are thrown out just like a life-line, and the biggest fish are taken. I have seen sometimes as many as a dozen or twenty of these lines in as many yards round a pier. Pollack are still to be taken whiffing with the Black or Red Sand-eel and mackerel on the spinner. On Friday evening, Mr. Goodwin had a nice basket in about an hour, fishing with the Black Sand-eel. He had one fish 5¼lb., one, 4lb., one, 3lb., and several smaller. He was using a 3oz. lead, and pulling very slowly round the East Winter Buoy. I hear some good reports from the Scilly Isles, where a friend is fishing with pollack, and he says it takes the very strongest-twisted gut that I can make to hold them. Pollack from 15lb. to 20lb. require some handling and care before you can capture them. A friend of mine has told me of a curious capture he had some time ago whilst whiffing for mackerel with several baits on. He passed through a school, and took six mackerel at one haul, and on making a sweep to keep the lines clear, and on pulling back again over the same spot, he took six pollack at a haul. This was most extraordinary, and proved that there must have been two schools of fish travelling together.—William Hearder.

Severn and Lower Teme (Worcester).—Both streams low and clear. The weather has been very bright and warm, and the fish rising fairly well at the fly, the Red Spinner, Blue Dun, Whirling Blue, and Red Tag, going best, but very few game fish have been taken during the week, and the bottom fisher has had the best of it. Mr.. Page caught a few brace of nice trout and some very large eels with the worm; and Messrs. F. and W. Smith took a few grayling with the maggot; but the take of coarse fish by members of the various clubs has been much below the average.—Wingfield.

Severn (Shrewsbury).—Dull, oppressive heat, low and clear water, and no rain have hardly been conditions under which one would be led to expect good trouting, and, indeed a more unproductive period than the last few weeks has seldom been experienced. Not a trout of any weight has been taken, and anglers are patiently awaiting a rise in the river. Wednesday's rain gave promise of better sport. Rough fish are very plentiful, and many have been taken during the past few weeks. The brooks are very low, and fishing in them is almost useless.—Piscator.

Stour (Grove Ferry).—The weather generally has been much against fishing, still some "in the know" have taken splendid fish, although not many of them. Dr. Morris and Mr. Stedman together took 28lb., all good fish. The roach were in splendid condition, but a bream, weighing 2¼lb., was ill-fed, lean, and out of condition. Mr. Chapman has usually taken home at least half-a-dozen fish, averaging 1lb. each, Mr. Morgan also doing the same. He was fortunate as well in taking a very pretty rudd, weighing 1¼lb. Mr. Robinson has again been among the trout, one scaling over 3lb.; and Mr. Colyer has been dead on the jack. A rabid and not-to-be-daunted fisherman (who shall be nameless) caused much mirth one evening last week, as after accidentally falling over head and ears in the river, took off nearly all his garments, which his friends took to be dried, while he with his shirt, cap, and waistcoat seized his rod, and quite unconcernedly went on fishing in the most eager style—H. King.

Sussex Rivers.—The long needed rain has fallen heavily in the south during the past few days to the discomfort of visitors to glorious Goodwood. The canal at Chichester in the upper reaches is somewhat discoloured, but in excellent order in the Donnington district. The water has been well patronised by turf *habitués* who find quiet recreation after the excitement of the day. Bream and roach have been feeding well, and a few tench and perch have been taken. The Ouse here yielded some good roach up to 1lb. 2oz. and chub of 3lb. The Rother has its supporters, and a few good roach and trout have rewarded the visitors. Dace and roach, with flat fish, have been secured from the Adur. Mullet are making their way up the Arun, and a few fish up to 2lb. have fallen to anglers at the harbour mouth. The weather has latterly been too treacherous for sea fishing.—George F. Salter.

Taw (North Devon).—Rivers have risen through the heavy rain on Wednesday, and the glass says much rain. Good fishing next week. I heard of twelve dozen fish taken last week on Exmore and four dozen on the Bray, also two dozen on one of the little brooks. Salmon and peal are not so plentiful as years gone by. The dishes of trout taken were with the Gammon and March Brown.—Rusty Game.

Teme (Ludlow).—The Teme is running low and clear and a flush of water is wanting to stir the fishing up. The weather is changeable and rain has fallen, but the water keeps low. Angling has been brisk but the sport has been dull. Fishing during the day is quiet, but at evening time the fish have been rising well. The Ony, Cluny, Corve, and Ledwyche, are all low and clear. Bottom fishing in the Corve has been very successful this week and good trout landed.—S. Ludlow.

Trent (Newark).—The Trent is running low, and fine, and in glorious condition for barbel fishing, but cold atmospheric influence prevent much success, though a few have been secured below the gulley at Averham weirs, and at the bridge at Newark. Roach and dace are taking gentles freely in the top length of the Rolleston fishery, Mr. D. Slater having a capital bag of the latter, and Mr. T. Lees has daily been taking some grand specimens of the former up to 1¼lb. Bream have a coming appearance in the "dead" waters at Muskham, a lot of good fish having been taken, including one of 3lb. 7oz., and prospects never appeared better for sport in this direction: Chub fishing is quiet, but wasp grubs should prove a killing bait during the next few weeks, and with these worms and gentles anglers should have no difficulty in securing any of the coarse fishes of the Trent.—Trentsider.

Trent (Nottingham).—The river keeps remarkably low and clear, and the recent hot weather has caused the bottom weed to grow very rapidly. Previously it had been a great drawback to the angler. Now, however, it is a complete nuisance. In the King's Mills district, Messrs. Pogson and Weaker have again been among the chub with the worm, but so far the adjoining water of Sbardlow has turned out very few barbel. The fish seem to be unusually late this year. At Barton, Mr. H. Stafford has caught four or five bream, averaging about 4lb. each, and of late numbers of these fish have been taken out of "Trent Pool," which is an inlet from the river. Sport seems to be very quiet on all the lower reaches, and it is only by great perseverance that a few barbel are being brought in from Clifton and Wilford. One of these weighed 7¼lb. Fly fishing has fallen off and scanty bags are the rule.—The Man-at-the-Clubs.

Wear (Co. Durham).—An abominable case of fish poisoning has taken place in this river near Lumley. On Sunday the surface of the water was literally covered with fish swimming about in a dying condition, and dozens of men and boys were busy gathering them in. The appearance of the water would lead one to think gas tar or something of the sort had been used, but whatever it was, no doubt could be entertained that a wanton and wicked destruction of fish life was the result. It is to be hoped the perpetrators will be caught.—J. H. R.

Witham, &c. (Mid-Lincoln).—A portion of the Witham has lately been run off, so as to allow the repair of the banks of the Barlings river bank, and this has put anglers to some inconvenience for a few miles below Lincoln, but below the locks they have done well. A good many visitors have patronised the waters towards Boston and the drains about that place. Roach and bream have been the chief fish taken. On the low water of the river dace have afforded sport with the fly. They are also taking paste when float fishing. Some good miscellaneous baskets have been obtained on Brayford Pool, near Lincoln, and along the Fossdyke, which is full of water. At Saxilby there have been some fine roach taken —Luce.

Wye and Derwent (Derbyshire). — Sport remains about the same as last week—moderate—and some heavy trout are being taken in the evenings. Not much good is being done in the day time. Baskets of from two to four brace have been the general rule on the Wye. Messrs. Hodson, Buxton, and Lymn, have had some nice baskets of fish on the Derwent. Prospects are good for the next week and best flies are Ash Dun, Little Chap, Stone Midge, and Sand-fly.—Dotterel.

Yare (Norwich).—Since my last report some good catches of bream have been had at most of the stations on this river. The heavy rains have greatly interfered with the angler's pleasure, but fortunately its been a series of one day fine and next wet in this district, sometimes one part favoured next another, but truly St. Swithin is keeping his name up in the Eastern Counties. At Cantley some catches of 3 stone and upwards are reported, also from Buckenham Ferry and Brundall reports of fairly good takes of both bream and roach are to hand, whilst at Tritton Decoy two friends of mine caught a skep full of bream during the afternoon. A large number of visitors on angling bent are now staying at our watering places, and those at Lowestoft cannot do better than pay host Mason, Wherry Hotel, Oulton Broad, a visit, as I heard at Lowestoft to day that immense number of bream are waiting to be caught.—Robert Moll.

Yore, Wharfe, Swale, Nidd, &c.—The fish are at present very disinclined to feed, and even after dusk very little has been done. Brown Owl, Stone Midge, and Fog Black best flies at present.—Francis M. Walbran.

East and West Cleddau (Pembrokeshire).—Trout continue to rise freely, although the rivers are lower than last week; but the colour is good, and good sport is to be had towards evening. More sewin are showing up, and waiting for a fresh to enable them to reach the upper waters.—H.

Lake Coron (Bodorgan, Anglesey).—Very fair sport has been obtained, fly-fishing late in the evenings the last two weeks. The fish feed freely between eight and nine, and two or three couples of well-conditioned trout can be picked up. One evening I caught five with a Quill Gnat, weighing 4½lb., and several times got four, averaging ¾lb. each. Mr. Coles, Bodorgan Arms, had two beauties, 1lb. each, caught with a female March Brown. The best flies, Sedge, Cinnamon, Quill Gnat, March Brown. I noticed a gentleman (stranger) fished the other evening with other flies, and never got a rise. Plenty of rain and fresh water in the lake.—W. H.

Lake Vyrnwy (North Wales, via Oswestry).—Anglers on this water during the close of last week had some good sport, Friday and Saturday being the best days, when fifty-four trout, 44lb., and forty trout, 32lb. 5oz., were taken respectively. On Thursday Mr. Ward headed the list with eleven lovely fish, 10lb. 3oz., caught after 3.30 p.m.; Capt. Stevenson, in two days, got twenty-two, weighing 16¾lb.; Capt. Stavert and W. Stavert, twenty-eight, weighing 23lb.; and Messrs. A. and E. Price, eighteen, weighing 13½lb. Messrs. Williams and Davies on Friday had a very nice basket of twelve, scaling 9¾lb. On Monday and Tuesday a gale from the north-west blew, and anglers could scarcely keep their flies on the water. In spite of this, however, some very nice fish were brought in. The heaviest trout for the week was taken by Mr. W. Rees Roberts, fishing from the bank; weight, 1¾lb. Best flies—Golden Dropper, Alder, Black and Teal, Heckham Peckham. Later.—Rain is now falling, which generally increases the scores on this lake.—Long Drift.

Towy (Llandilo, Carmarthenshire).—Sport has only been moderate during the past week. The Hon. Hugh Capel took a couple of sewin (2½lb. and 3lb.), and a few trout on the Golden Grove water. Mr. Jones, one salmou, 7lb. and Mr. John Morgan, a few good baskets of trout. Miss Croxen, of Tregib, continues as successful as usual, and made a heavy basket a few days ago, including a trout of 4lb. Some good takes have been made on tho Cothio (tributary), Mr. Percy Lloyd, several nice trout, with the artificial minnow. Sir James Drummond, and Sir John Llewelyn, several sewin, ono salmon; and the latter small baskets of trout daily.—H.

Scotch Reports.

Aberdeenshire Rivers.—Lately floods so heavy as to be almost phenomenal for the time of year have been experienced. For instance the Deveron has not flooded so high at any season for many a year—some say thirty—as it did last week. The spates are bound to have brought up some fish, but sport will not be greatly improved in consequence. These rivers do not fish well for grilse or salmon after the tone season for the summer's run until the middle of September, when the first of the autumn fish come. The summer's run fishing is practically all past by July 20. Trouting on the rivers is over for a season; on the hill burns it may continue fair for a little while longer now that there has come water to freshen these streams.—Mackay.

Altnaharra Hotel Waters (via Lairg, N.B).—Since last reported the baskets have been as follows:—On Tuesday Mr. Beitb, Glasgow, fished Loch Urigill, and got twenty-eight trout, 10lb.; Messrs. Coull and Coutts, Fife, on Loch Cama, sixty trout, 15lb.: and Major W. Broadfoot, R.E., along With Major A. Broadfoot, R.H.A., on Loch Veyatie, sixteen trout, 7¾lb. On Wednesday, which was very stormy; Mr. Beith, Glasgow, and Mr. Millar, on Loch Cama, forty-eight trout, 16lb.; General Rankin, London, on same loch, thirty-three trout, 13lb.; Major W. Broadfoot, R.E., and Major A. Broadfoot, R.H.A., on Loch Veyatie, twenty-three trout, 8½lb.; Messrs. Wilson, Coull, and Coutts, on Loch Urigill, one hundred and sixty-three trout, 42½lb.; and Messrs. F. and H. O. Ritchie, Stonehaven, on Loch Boarlan (two hours only) twenty-three trout, 7lb. On Friday, Mr. Millar, on Loch Veyatie, forty-eight trout, 16lb.; Messrs. Wilson, Coull, and Coutts, on Loch Cama, eighty trout, 20lb.; Major W. Broadfoot, R.E., and Major A. Broadfoot, R.H.A., on same loch, thirty-two trout, 13½lb.; and Messrs. Ritchie on Loch Urigill, fifty-two trout, 14½lb. Saturday was so stormy that sport was not so good. Messrs. Beith and Millar, on Loch Urigill, (blown off) twenty-four trout, 8lb.: Messrs. Wilson, Coull, and Coutts, on Loch Veyatie, fifty-three trout, 16½lb.; Messrs. Ritchie, on Loch Cama, forty-five trout, 15lb.; Majors W. and A. Broadfoot, on Ledmore Stream, fourteen trout 4½lb.; and Messrs. Sprout (two), Liverpool, on Loch Boarlan (a short time only), twelve trout, 4lb. On Monday the weather was exceeding boisterous and wet.—McB.

Awe (Taynuilt Hotel).—During the past week visitors at Taynuilt Hotel had some very nice sport, which is chronicled as follows:—Rev. Mr. Upsher, Holt, Norfolk, a salmon, 21lb., and a grilse, 8lb.; Mr. Movement, Norfolk, grilse, 8lb., and 6½lb.; Mr. Brian Coleby, London, salmon, 15½lb.; Mr. McWhinnie, Kesyth, salmon, 11lb.; Rev. Mr. Mackay, Donne, grilse 5½lb.; Rev. Mr. Harper, Alloa, grilse, 5lb. and 6lb.; Mr. King, Chard, Somerset, Captain Bullen, Marshwood, Dorset; Lieutenant Arnold 1st Madras Lancers, and others have had very good baskets of sea trout, running from ½lb. to 3½lb. per fish. Rev. G. Mackay and Mr. Handyside on Loch Nant, have done some very good work among the brown trout.—Donald Macdonald.

Border Esk.—The rain has come and the border rivers have been duly flooded according to ancient custom during the last week in July. Tbe best sport has been had in the lower portion of tbe Liddle, which is very prolific when the water is in flood. One hundred and nineteen whiting and several sea trout fell to the rod of Mr. Leslie, Glendenning Rigg. Mr. R. Calvert had sixty-five whiting and eight sea trout; Mr. J. Graham, twenty-tbree whiting and eight sea trout; Mr. A. Irving, sixty whiting and five sea trout; Mr. W. Murray, forty-three whiting and several grilse and sea trout; Mr. Graham, thirty whiting, three sea trout, and a grilse of 5lb. In the upper reaches near Newcastleton Mr. W. Murray caught a salmon of 10lb.; Mr. A. Nichol, three sea trout: Mr. M. Inglis, five sea trout; Messrs. J. Beattie and G. Elliot, two each; Mr. R. Cook, four; and Mr. H. Anderson, one of 3lb,; and fifty whiting were taken by Mr. Broatch, of Highgate. The Esk, although scarcely so productive as the Liddle, has afforded good sport. Mr. I. Ballantine, Woodhouse, had twenty-eight whiting, two sea trout, and a dozen yellow trout, in a night's fishing; Mr. G. Goodfellow had eleven whiting and eleven sea trout; Mr. W. Irving bad a salmon, 6½lb.; and a basket of whiting, 12½lb.; other anglers have also been fairly successful in the Canonbie water, while in the Langholm district, Mr. John Reed had fourteen whiting five sea trout; Mr. W. A. Connell, two sea trout and three whiting, and some yellow trout; Mr. T. Irvine, nineteen whiting and eight sea trout, at two fishings; Master W. Saunders, two sea trout, three whiting, and a dozen yellow trout; Mr. J. Elliot, six sea trout; Mr. W. Keir, Commercial Hotel, six sea trout; Messrs. James Anderson, Morrison, C. Elliot, J. Telford, Andrew Johnstone, and others have also made good hauls, but why prolong the list. I am satisfied. The water is in rare fettle and fair hotebin wi' fish, but aboon a' my prediction in last week's issue has come to pass.—G.

Carron (Easter Ross, Ardgay, N.B.).—The weather has been very unsettled, and altogether adverse to angling. On Tuesday last week, Mr. George Ross, Brailongwell, on Mr. Hasting's rod, landed a salmon weiging 9lb., and a sea trout, of 2lb. On Wednesday, Mr. John Matherson, on Mr. Crewdson's rod, caught one grilse, on the Gruinards water. The first to try trout fishing this year (so far as known), was Mr. A. Rixton, Glasgow, wbo, on Wednesday, fished the water in connection with the Balnagown Arms Hotel, and caught three dozen trout, the two heaviest of which weighed 2lb. and 1¾lb. On Thursday, Mr. R. Crewdson, Balnagown Arms Hotel, caught a grilse, of 7lb. and a sea trout weighing 1½lb. On Friday, the same angler grassed a fine salmon of 16lb. On Monday this week, Mr. F. H. Woodroffe and party, Skibo Castle, fished the Hotel waters, and landed one fine salmon and a grilse; Mr. Crewdson, on the Gruinards water, five grilse ranging from 5lb. to 8lb.; and Mr. J. MacLeod, on tbe Hotel waters, a 16lb. salmon and a grilse of 6lb.—McB.

Dee (Aberdeenshire).—The rivers were again in high flood last week and entirely out of order for salmon angling, althougb worming for trout could not have been prosecuted under more favourable auspices, and some splendid baskets were got. Although the season is advanced yet trout have been late all through, and are meantime in the pink of condition as far as the Dee is concerned. Grilse have been running freely and a good few have been landed on the middle and lower reacbes. On the Ballogie water on Monday, Mr. Nicol's guests landed a nice salmon of 9lb. On the Aboyne reaches and Kincardine O'Neil waters few anglers have been out. On tbe Glen Tana pools Sir William C. Brooks, Bart., M.P., and friends have had a fairly good grilse season with an occasional salmon. On the Invercauld Arms water the river has not been so enticing of late and few rods were out. However last week Captain Cook landed two fish of 8lb. and 9lb.; while D. Morgan, gillie, had one of 13lb.: and on Saturday Mr. Yarrow had two of 7lb. and 9lb. respectively. On the Morven water Cameron, keeper, landed one of 9lb. On the Balmoral and Braemar stretches little has been done of late, although the recent rains have greatly aided the ascent of fish on the higber reaches of the river which have been virtually congested with fish since the early summer waters set in. However such waters as the Invercauld have fished well before now in the early day of August, and the chances in a season like the present are not to be dispised.—Deesider.

Deveron (Banffshire).—This river is now in high spate, in the lower sections overflowing the banks, and doing considerable damage. Only a few grilse were killed by the rod during the past week, and fishing will be at a discount until the water falls. The run of fish on the river is not so heavy as was expected, tbere being, to all appearance, an abundance of fish on the coast. Consequently the river net-fishermen are not getting very large hauls. In the nets along the coast up to Tuesday of this week good fishing has been got. Although salmon, as a rule have not been of large size, one was landed last week weighing 34½lb. If it had been a full fish, it would have weighed over 40lb. On Saturday last the number of boxes cousigned from all the stations in this district was fifteen, and on Monday twenty, weighing in all about four tons, about double the quantity of that sent the corresponding week last year. A gale prevailed on Tuesday from the north-east, with a rough sea. None of the cobbles ventured out, and the nets were moro or less destroyed by the heavy seas. On the Gardenstown coast for the week ending Saturday last, the nets yielded one hundred fish, a larger number than that of any week of last season. Fifteen boxes were sent south for the week.—H. W.

Don.—The trouting season on the Don is now on the wane, and, with the exception of the past few weeks, it has been a failure. Owing to the protracted cold, unfavourable weather in April and May, fish were late in coming into condition. There was little or no fly visible, and the best of the season was past before anything could be done. However, very good baskets have been got on some reaches "remote from towns," for near the villages the waters are all too much fisbed and poached. A close-time for trout is sorely needed on the Don at least, and, till this is obtained, the big baskets and big fish will remain memories of the past.—Don.

Helmsdale (Helmsdale).—Since my last, spates have been the order of the day. Last week the river was partly in flood, while this week on Monday and yesterday it was literally a downpour all day and night. The consequence is of course that the water is in high flood, impossiblo to fish either with net or rod. To-day (Wednesday) is dry however, and if this contiuues tbe river will fall rapidly. As it is, hundreds of grilse, salmon, and trout, have gone up during the last few days, and it is not too much to say that possibly in living memory, has this river been so beavily stocked with fish as it is at present. Mr. Ross, Suisgill (son of the late Horatio Ross, Esq.), has, along with the party there, had good sport with grilse and also got some sea trout. Mr. Bince and party have also had fair sport, but have now left for the south. Mr. Muir, the new tenant of Edenloch shootings and fishings have had good sport on the lochs. The weather being now much cooler, grand sport is sure to be got on the upper reaches of the river. The netsmen, who have done exceptionally well this season, are not likely to do much more, as the fish aro now almost all gone up, besides the large number of boats engaged at the herring fishing, going daily out and in, disturbs the ground, and keeps the fish off-shore. Stormy weather has been against the herring fishing, no boats being out this week. The lochs this season have not been so productive in sport as was expected, and I have heard of very few large trout being got. Sea trout, too, have been remarkably scarce, even the netsmen only securing less than one-fourth of the usual number and weight. Sea fishing could be got here of the first-class order, but few are trying it. Time will come, however, when this kind of fishing will become more appreciated. Here, at present, lythe, pollack, haddocks, flounders, cod abounds, while herrings, too, can be caught in any quantity. To-day is still showery, but looks as if it may clear.—S. C.

Kyle of Sutherland.—Capt. Holder, London, and party, and others have been out, but sport with the rod has not been good. A number of grilse have been hooked, but the most of them broke away, owing to trouting taekle being used. Quite recently, however, an angler from Invershin landed a beauty of 10lb. The net salmon fishers are still doing fairly. During the past week tbe takes on Mr. Anderson's Scalp, South Bonar, and Rivermouth fisbings were fully up to those of the previous week; the same may be said of Mr. Smith's, Invercharron and Craggandubh fishings; but on Messrs. Powie and Pitcaithley's Skibo fishings, at the head of the Dornoch Firth, a slight falling off was experienced. From all these fishings put togetber it is estimated that fully 3½tons of salmon and grilse have been despatched to Billingsgate in the course of the week.

Lairg, N.B.—On Monday of last week, Mr. Milne, fishing the Sluice Pool, lower end of Loch Shin, landed a salmon of 13½lb., and afterwards made a basket of twelve trout, 4½lb.; Messrs. Copeland and Cumming, on same loch, got six, 4lb.; Col. Butler had thirty-one; Mr. Jowers, five, 4lb., on Loch Cracail. Tuesday was excessively wet at intervals from mid-day, the total fall being 1·31in., and as much as ·47in. falling in less than ten minutes. Messrs. Copeland and Cummins, fishing Loch Shin, killed a *Salmo ferox* of 6lb., and sixteen trout, his total basket weighing 16½lb.; Col. Butler got five, 2lb., on Loch Nam-fuar-leachd. Wednesday was unfavourable, the various lochs being too full, and heavy rain in the forenoon. On Loch Shin, Mr. Wordsworth got seventeen, 5lb.; "X. Y.," nine; and another angler six. On Thursday, on Loch Shin, Messrs. Copeland and Cumming killed twenty-five, 11lb.; Col. Butler, fourteen, 6¾lb.; and "X. Y.," ten, 5½lb.; on Loch Cracail, Mr. Wordsworth, eight, 5lb.: Major-General Stafford and Surgeon-General Smith made a nice basket on Loch Beannoch. Friday and Saturday were so stormy that angling could only be prosecuted with the greatest difficulty, it being impossible to launch a boat on many of the lochs. Mr. Wordsworth made a fine basket of nineteen trout, 10lb.; on Loch Laur-fuar-leachd on Friday, and on Shinness Bay on Saturday, the same angler got five, 4lb.: Col. Butler killed twenty-fivo, 6¼lb.; Surgeon-General Smith, fifteen, 4lb.; and another angler, fifteen, 3¼lb., on Lower Loch Shin.—J. Y.

Loch Cracail (Sutherland).—Mr. Walter Scott-Brock, Achinduich House, Invershin, and Mr. A. Duncan, Brighton, were out on Thursday, and made a fine basket of trout, weighing 11½lb. in all.—McB.

Loch Leven (Kinross).—During the week angling has been at a great discount, owing to the protracted drought, which has reduced the loch to a considerable extent, the water being barely sufficient to float boats into the pier. Parties having 5lb. of trout, under the unfavourable circumstances of bright sunshine and variable winds, have, on the whole, been deemed fairly successful, and little better results can be expected until we have some more moisture.—Robert. B Laing.

Loch Migdale (Bonarbridge, N.B.).—On Thursday last, Mr. A. Ruxton, Glasgow, landed nineteen trout, averaging close on ½lb. each. On Friday (which was most unfavourable) he got six trout, 2½lb. Other anglers have also been out, but particulars not known.—McB.

Loch Stack.—On Monday Professor Drummond and Mr. Wilson had five sea trout. On Tuesday, four sea trout. Wedneday, unfishable day; only Mr Wilson went out after Wednesday. His takes were ten sea trout and one salmon, 8lb. Friday, one sea trout and one salmon. Saturday, six sea trout and one salmon, 10lb.; sea trout have averaged nearly 2lb. They seem to be unusually scarce. Salmon and grilse more plentiful than last year; but latterly lots of lean fish amongst them. On Laysford some good fisbing has been got by Lord Leicester and others. His Grace the Duke of Westminster is to arrive at Locb More Lodge soon for the season.—Neil Canon.

Naver.—The river kept so flooded, owing to continuous rain, that good sport could not be looked for. In the course of the week, Mr. Darwin, Skilpick Lodge, landed eight fish in all between salmon and grilse. Good sport anticipated.—McB.

North Esk.—The season is about over, and last week the Brechin anglers marked their sense of its approaching close by having their third and last competition for the season. There was a good turn-out of members, and fair baskets weighed in. (1) Wm. Bennett, 26lb. 4oz.; (2) J. Clark, 24lb. 13oz.; (3) J. Dures, 19lb. 6oz.; (4) D. Smart, 18lb. 8oz.; (5) J. Burnett, 12lb. 2oz.; (6) J. Strachan, 8lb. 8oz. Heaviest trout, J. Strachan, 12oz.; three heaviest, J. Kerr, 1lb. 3oz.; six heaviest, William Ferrier, 1lb. 14oz. The average weight of the fish is decidedly of a very low standard; but they are otherwise plentiful, and in good condition.—G. M.

Overscaig Hotel Waters (via Lairg, N.B.).—On Monday last week Mr. Thunder, Dundee, fished Fiag beat, and got twenty-two trout, weighing 10lb.; Messrs. Hills and Murray, on Fiag, twenty-nine trout, 11lb.; Captain Murchison, London, on Loch Merkland, twenty-four trout, 7lb.; and Mr. Sturrock, on Loch Shin, eighteen trout, 6lb. On Tuesday Fiag beat was fished by Captain Murchison, twenty-four trout, 12lb.: and by Mr. Liddle, seventeen trout, 8lb. Miss Macintosh and Miss Mackay, in a few hours' fishing, had twenty-four trout, 8lb. Wednesday was unfavourable, and none were out; but on Thursday Mr. Thunder, on Fiag beat, twenty-five trout, 9½lb.; and Mr. Sturrock, thirteen trout, 5lb. Captain Murchison fished river Merkland for salmon for the first time this season, and caught a fine fish of 7lb.; Mr. David Ross landed a 7lb. salmon, and Mr. E. Ross a grilse of 4½lb. Friday was very boisterous, and most of the boats which ventured out were blown off tbe lochs. Captain Murchison, fishing the sheltered bays on Fiag beat, made the excellent basket of forty-four trout, 19lb.; and Mr. Sturrock, on Loch Griam, had thirteen trout, 6lb. On the Merkland river, which is at present yielding good sport, a local angler caught a nice salmon of 11lb. The rivers it should be mentioned are yielding capital sport, though all the fish caught are not reported. On Tuesday this week a local angler took a 7lb. salmon on the Merkland; and Mr. Mackay two salmon, 6lb. and 12lb., besides hooking a very heavy one, which after considerable play broke off, carrying all the tackle with it.—McB.

Oykel (Benmore Waters).—Last month, Mr. C. A. Smith Rylands, Benmore Lodge, spent a fortnight on these waters, and as the river was all the time too low for salmon or grilse, he took to trout angling, and was very successful, bis total basket amounting to close on sixty-one dozen trout, aggregating upwards of 240lb. General Ranken, London, fished Loch Ailsh on Tuesday last week, and caught one grilse of 4½lb., two sea trout, weighing 1½lb. each, and forty-six loch trout, averaging three to the pound. On Thursday, Mr. Hugh MacLeod, on Mr. Smith Rylands rod, landed an 8lb. salmon and a grilse weighing 5½lb. On Friday he got two grilse, weighing 6lb. and 7lb., and a salmon of 10lb.; and on Saturday, two grilse, 5lb. and 4½lb.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.)—On Monday week Mr. and Mrs. Young, London, on Loch Inchard, three sea trout, averaging 1½lb. each; Captain Levett and Mr. Bagot, Oxford, on Loch Uidh-na-Tuim, forty trout, 14lb. Mr. Scrivener and Mr. Levett, Oxford, on Loch Tigh-Sheilg, fifty trout, 17lb.; and Rev. M. McConnell, Dorset, on Loch Sheiva, 9lb. On Tuesday, Mr. W. Levett, Oxford, on Loch Garbet-Beag, one salmon weighing 8lb.; and Mr. Scrivener, a grilse of 5lb. On Wednesday, Mr. Maitland, Dover, on Loch Garbet-Beag, a 4lb. grilse and a salmon of 6½lb.: Messrs. Hassel and Scrivener, Oxford, on Loch Tigh-Sheilg, twenty-four trout, 13¾lb.; and Messrs. Aitken and Harper, Aberdeen, forty-two trout, 16lb. On Thursday, Mr. Hassel, on Loch Mathir-a-Gharbhuilt, twelve trout, 4lb.; Rev. M. McConnell, on Loch Inchard, two sea trout, 3lb., and 45lb. lythe; Mrs. Young, London, on same loch, a sea trout of 1lb. and 5lb. lythe; Mr. Atkins, on Loch Tarvie, four trout, 3lb.; and Mr. Harper, on Loch Inchard, 9lb. lythe. On Friday, Mr. and Mrs. Young, on Loch Bervie, twenty-one trout, 7lb.; Mr. Levett, on Loch Garbet-Beag, a salmon of 7lb.; on the same loch a seven-pounder was grassed by Mr. Hassel, Oxford; and one of 9¾lb., by Mr. Young, London. On Saturday, Mr. Atkins, on Loch Tigh-Sheilg (two hours only), eighteen trout, 8lb.; Mr. Maitland, on Loch Garbet-Beag, one grilse, 4lb.; and Mr. Wilson, Edinburgh, a 4lb. sea trout, and a salmon of 8lb. All the waters were in heavy flood on Sunday and Monday, but after settling good sport in sea trout angling may be looked for on the fresh-water lochs.—McB.

Salen Hotel Waters (Loch Shiel).—Mr. Ellis caught a salmon of 10lb. on Loch Shiel, on Wednesday, 15th, and other gentlemen caught baskets of sea trout, some weighing over 3lb. Mr. Hix caught a salmon of 8lb., on Thursday, tho 23rd. Mr. Ashdown caught soveral baskets of sea trout for the last ten days. Loch in good order for fishing.—D. Cameron.

Shin.—Major Berkeley fished the Upper Shin on Monday, Wednesday, Thursday, and Saturday, of last week, his catches being—one salmon of 14½lb., and a grilse of 6½lb.; two salmon of 18lb., and 11lb.: three salmon of 14½lb., 13½lb. and 11lb.; and one salmon of 15½lb. Major-General Hafford killed a grilse of 4¼lb. on Friday, and lost a very fine fish. Mr. Milne, fishing Loch Shin at the Sluice Pool, landed a salmon of 13½lb. on Monday morning. "X. Y."

hooked a fine fish the other evening on the narrows between the upper and lower divisions of Loch Shin, but after giving fine play, the fly—a small trout fly, the light Heather Moth—failed.—J. Y

Shin (Inveran Hotel Waters).—The sport obtained by anglers from Sutherland Arms Hotel, Inveran, during the past week has been as follows: On Monday, Captain Greenwood, a 9lb. salmon, on Meadow Pool; and Lord Braybrooke, a thirteen-pounder, on Cromarty, and one of 10lb. on Clarag. On Tuesday, Captain Greenwood grassed two, 13lb. and 8lb., on the upper waters. On Wednesday, Lord Braybrooke got a salmon of 8¾lb., and a grilse of 6½lb., on Clarag. On Thursday, a 5lb. grilse on Angus, and one of 7lb. on Clarag. On Friday, one of 5½lb. on Angus; and on Saturday, a 6lb. grilse on Angus, a seven-pounder on Clarag, and one of 7½lb. on Fir Dam. Monday was very wet and stormy, but as it cleared up on Tuesday, a good record may be expected for this week.—McB.

South of Scotland.—There has been some really fine sport in the South of Scotland rivers since my last report. On Wednesday rain fell in Annandale, and a few of the rivers were placed in one of the small spates that have been rather characteristic of the South of Scotland rivers this year. This appeared to cause the run of herling to come on in better numbers, more especially to the Annan; but up till to-day there is a poor show of herling in the other Solway rivers. Although the Esk has been very low for weeks past, some excellent sport has been obtained. One of the most successful anglers has been Mr. Craig, who is staying at the Cross Keys Hotel, Canonbie. This angler landed two salmon on Thursday afternoon out of the Caldron pool, which weighed 14lb. and 10lb. respectively. Mr. Craig killed besides three fine sea trout of 3½lb., 2½lb., aud 2lb. each. In the same pool Mr. Shand, also out from the Cross Keys, had four sea trout, one a very fine fish of 5lb., while the others weighed 3lb. and 2¾lb. Messrs. Kerr, out from the Temperance Hotel, had four sea trout for two rods, besides two herling and eight yellow trout, in the reserved water at Langholm Lodge. The same party had a 3½lb. sea trout at another fishing. Mr. Thomas Irving killed four sea trout in the town water. In the lower section some capital sport has been had by the Longtown anglers. The river is abundantly stocked with salmon and grilse. The Nith has been angling wretchedly of late, and the sport may be said to be at a standstill. The higher streams are exceedingly low, and nothing can be done until after a flood. The Dee (Kirkcudbrightshire) is also very low. The long spell of dry weather has told very severely on the sport this season in this river. There are plenty of salmon, grilse, and sea trout in the lower pools waiting for a flood to allow them to ascend to the middle and higher waters. The Gatehouse Fleet is angling fairly well. On Monday, Mr. Harcomb caught three herling and one yellow trout; Mr. Bendall had four herling; Mr. Murdoch, Glasgow, two herling. Capital sport has been had on the Annan. Friday night, ex-Dean of Guild London, Annan, caught with fly in the Fish House Pool, eight herling and one sea trout; Mr. John Pool, Birmingham, killed niue herling and a sea trout of 1¾lb., in the same pool. On the provious day this gentleman had a fine basket of twenty herling.; Mr. John Lawrie, Annan, killed eleven herling with fly on Saturday morning, and six herling in the evening; three Glasgow anglers had very fair sport in the lower waters; the Rev. Mr. Coleby, Annan, and others, had a few herling each. In the Mount Annan portion, the keeper has been killing a good few sea trout and some odd herling; Mr. David Beattie and Mr. J. Halliday, of Brydekirke, caught one sea trout each. On Friday, Mr. Andrew Bell caught one sea trout and six herling; Mr. Bell has been successful in landing heavy sea trout. Mr. Dirom, of Mount Annan, has been killing some beautiful baskets of sea trout and herling with fly. In the Castle Milk water, belonging to Sir Robert Jardine, Bart., M.P., Mr. J. Rae, Ecclefechan, had six herling, two sea trout, and one dozen yellow trout, with Stewart tackle and worm. In Hoddom Castle section, belonging to Mr. Brook, Mr. Shennan had six herling and two sea trout; Mr. Wardrope, Ecclefechan, four herling and two sea trout; Mr. Tweodie, clothier, Ecclefechan, three herling and a basket of yellow trout; Mr. Bell, a nice creel of yellow trout and herling; Mr. Rae, six herling, and one dozen yellow trout. In the Brewery water, Mr. Henry Boyd, Annan, had with worm bait twenty-four herling, Mr. J. Dixon, baker, seventeen herling; the Rev. Mr. Duncan and friend had a few herling each; Mr. William Wright, Ednam, Annan, killed in the section below the Brewery pool, twenty-five herling and three sea trout. On Wednesday a large number of anglers were out, and some good baskets were made with worm. Mr. J. Dixon caught twenty herling at Violetbank stream; Mr. J. Iveson, Wigton, unfortunately lost a fine salmon, after playing it for some time; Mr. Iveson had a basket of herling; Mr. Wallas, Wigton, had a very fine catch of herling the other day. A slight rise of water in the Annan on Saturday morning induced an additional run of herling to come on. Mr. Dirom made a fine basket in Mount Annan water; Mr. Wallas had a basket of 12lb on the previous day, and he killed over eighty herling in four days with brandling worm; Mr. Dixon had nearly thirty herling with the same lure, Mr. Marshall twenty-seven; Mr. T. White, fourteen; Mr. W. Wright, Ednam Annan, twenty-three; Mr. Peel, Wigton, killed thirteen herling and a sea trout on Friday forenoon, and he had ten in the evening. On Saturday the catches were still better, Mr. James Thomson landing nine herling; Mr. Henry Boyd, draper, killed twenty-seven herling nearly ½lb. each, in the Browery water. Mr. Murray, Silverwalk (a lad), killed five and seven on Monday, at Newbie Mill Wheel. Mr. Johnstone, at Moffat, thirteen herling and one small sea trout. Mr. James London caught a brown trout of over 3lb. by angling after dark with fly, besides a few herling. In the higher water, on the same day, Mr. Lockerbie had a sea trout of 2lb.; Mr. Anderson, one of 1¾lb.; Mr. J. Varrie, Lockerbie, killed a basket of five dozen yellow trout and a sea trout of 1½lb.; Mr. Halliday had four dozen; Mr. T. Wilson, Glasgow, caught nine herling in the Milk water, and Mr. Lattimer a sea trout. On Monday and Tuesday Mr. W. Dickson, Edinburgh, filled his creel, on both days with herling, near to Annan Bridge, by fishing with the brandling. On Wednesday he had a sea trout and half a dozen herling in the forenoon. Mr. Henry Boyd, Annan, with the same lure, had a basket of thirty-eight herling, weighing close on 16lb. Mr. Thomas Gibson, Bridge-place, twenty-one herling; Mr. James Dixon, eight. In Mount Annan water, Mr. Dirom caught fourteen herling and eight yellow trout during three hours. On the same private water the Rev. Mr. Colcby, and Mr. W. Wright had nice baskets, the former caught half a dozen herling, and the latter had eighteen big ones. Above Brydekirk Bridge, Mr. A. Wilson killed one sea trout and half a dozen herling. The sport on Wednesday was very poor, as the fish would not rise to fly and refused the worm lure. Within the past few days good sport is reported to me from the Esk, and herling are now making a better show especially in the lower waters. A few grilse have been landed, and a fair quantity of sea trout.—HEATHERBELL.

Spey.—The salmon fishing has improved since the rise in the Spey with the late rains, and some good sport has been got, but the river has been very unsettled, rising and falling. On the Pitcroy Lodge waters on Tuesday, Mr. Burn landed two salmon, on Wednesday, one grilse, and on the same day Mrs. Burn landed a grilse. On Thursday, Mr. Burn caught two grilse; on Friday, two; and on Saturday, three. On the Easter Elchies lower water on Tuesday, Mr. Hanney killed two grilse, and on the same stretch on Wednesday, Mr. Teacher had two grilse. On the Craigellachie section, Major Grant Glen Grant had two grilse. On the Arndilly section, Mr. Sheach killed three grilse and one salmon. On the Aberlour House water during the week, five grilse, weighing 4lb., 5lb., 5lb., 6½lb., and 6½lb., and a salmon of 17lb. On the Duke of Richmond's net fishing at Fochabers, the fishing closed with a total of about two hundred grilse. Owing to the heavy rains, the river is not in very good order for net fishing. At this time of year the fishing ought to be at its best. The catch of the first two days of this week amounted to one hundred and fifty grilse and twenty-seven salmon. There has been good baskets of trout got by worm fished in the flooded waters. —HENRY LOGIE.

Tay (Perth).—The streams which have been in capital ply lately are again getting low, and up-stream worm fishing, which has been so successful this season, will again become general. On the May, Sergeant Tweedlie had thirty-two trout one day and forty-two another, the largest of which weighed 2lb.; Mr. Curl, twenty-seven; Mr. Muirhead, thirty-three. On the Tay, at Logierait, Mr. A. M. Meldrum and Mr. H. White had 12lb. pike, the largest weighed 5lb., and six trout. On the Tummel Mr. Findlay killed nineteen trout.—ALDER.

Thurso (Caithness).—The amount of salmon and grilse ascending the river must be enormous, as the river has been twice in flood during the past week, and no nets in the river mouth. The autumn anglers have not arrived, so the river is having a rest. The prospects for the remainder of the season are excellent. But what is good for fishing is not always good for the country, so that a good many people would now like a change.—A. H.

Tongue Hotel.—July 20, Mr. Rigden, on Loch Loyal, 6lb. trout; Mr. Bolton, on Loch Craggie, 8lb. trout; Dr. Phillips, on Loch Slamm, one grilse, 2½lb., also fifteen trout, weighing 6¾lb.; Mr. Rathbone, on Loch Loyal, one salmon, 7½lb. July 21, Mr. Rigden, on the Kyle, eight sea trout, 16lb.; Mr. Bolton, on the Kyle, eight sea trout, 12lb.; Mr. Rathbone, on the Kyle, four sea trout, 8lb. July 23, Dr. Phillips; on Loch Loyal, 11lb. trout; Mr. Rigden, on Loch Loyal, 9lb. trout. July 24, Dr. Phillips, on Loch Slamm, one salmon, 7½lb., and 4lb. trout; Mr. Anderson, on Loch Na Hakel, six trout, 3lb. July 25, Dr. Phillips, on Loch Craggie, one salmon, 7½lb.; Mr. Muir, on Loch Na Hakel, 9lb. trout; Mr. Rathbone, on Loch Slamm, 7lb. trout.—A. CAMPBELL.

Tweed, Teviot, &c.—Waltonians have, since my last notes, been in better humour, the flood which occurred last week having to some extent bettered the prospects of the partizans of the rod and line, and during the past week some grand sport has been had by anglers who delight in bottom fishing. The impetus thus given the gentle art has fully been taken advantage of, but strange to say, those who only use the fly have had little better success than before the rise in the rivers. One material good has, however, been done by the flood, small as it was, as it has enabled a good many fish of the salmon kind to ascend to the higher and middle reaches of the main river, and a few captures have thus been made. On one of the waters below Kelso, two grilse and one salmon were got on Tuesday, while on Wednesday one piscator rose six or seven fish, which, however, all came short, and he was not successful in hooking any. The weather seems now fairly broken, rain having fallen more or less all day (Wednesday), while since last week we have also had a considerable amount of wet. On the whole, however, the rivers have not been cleared to any extent of the dirt and refuse which have accumulated in them for months, and it will take a flood of some 5ft. or 6ft. to do this properly. On the Bowmont, near Yetholm, on Friday, Mr. Shiel Laidlaw, merchant, Yetholm, had 19lb. of grand trout. On the Jed, in the Jedburgh district, baskets of from 4lb. up to 17lb. have been killed; while one basket of eels was killed, which weighed 16lb. Several large trout, from 1½lb. up to 2lb. and 2½lb., have been got in some of the smaller waters in the same district. One trout hooked on a previous night with worm on Stewart tackle, but which broke the gut line, was caught the next day with the lost hooks still attached to it. On the Leader, baskets of from 4lb. up to 8lb. and 10lb. have also been killed. On the Gala and other streams in the Galashiels district, the sport got has been something unprecedented. It is said that a father and son had a take of 113lb. between them, while other baskets ranged from 10lb., 15lb., up to 20lb.; the lure said to have been used was worm. On the Blackadder, in the Greenlaw district, baskets of various weights have been killed, the two best reported being got by Mr. Leitch, chemist, which weighed 8lb. and 10lb. respectively. In the Kelso district of the Tweed and Teviot, takes of from 4lb. up to 6lb. and 8lb. are reported. The Tweed net salmon fishings in the Tweed and on the sea coast showed a very marked decrease last week, the yield for the month being several thousands below the total of last year at the same period, while the total catch was also far behind that of 1890, which was one of the worst on record. There is a very great scarcity of salmon, and trout are far below the average, but grilse are pretty numerous. Prices are: salmon, 11d. per lb.; grilse, 9d.; trout, 1s. 1d. At the same period last season they were: salmon, 1s. 1d.; grilse and trout, 10d.—MAXWHEEL.

Upper Shin.—The following are the details of the sport obtained by Major Berkeley, on the Upper Shin, during the past fortnight:—July 13, two, 14½lb., 6½lb.; 15, two, 18lb., 11lb.; 16, three, 13¾lb., 11½lb., 11lb.; 18, one, 15½lb.; 20, a grilse of 6lb.; 22, a salmon of 15½lb.; 23, one fish of 18lb.; 25, a salmon of 11½lb., and a grilse of 4½lb. Major General Stafford got a salmon of 10lb., on Tuesday last.—J. Y.

Whitadder (Ellemford).—The wind changed to-day, the 22nd, into the north, and since five p.m. it has rained very steadily, so that a good flood is a sure thing. 23rd, a good flood this morning, and everyone in such a hurry to be off. Dr. C. Martin, of Chelmsford, had the heaviest trout, one over 1lb. Mr. Sandy and Mr. Jack Martin had 8½lb. between them five of the trout over ¾lb., their joint catch was a good one. Mr. Fairbairn, of York, had 3½lb.; Mr. Bryars, of Edinburgh, 4½lb. I heard most of the gentlemen say the large trout rose freely, but took short. Yesterday, the 28th, Mr. Jack Martin had twelve trout, they weighed 5½lb. With worm in clear water. Wind, north-east, and prospect of more rain.—R. J. FENTON.

Ythan (Tidal Reach, Aberdeenshire).—Sport continues highly satisfactory on this famous sea trout reach, and baskets of 13lb. and upwards being quite common. Trout are improving in size. Among others fishing from the Udny Arms may be mentioned Dr. Arthur Cults, Mr. F. Holl, London, Mr. H. Holl Cults, Colonel Hunter, of Tillery, Rev. N. K. McLeod Ellon, Mr. Barclay, &c. August and September promise well, as far as prospects can be gauged. Meantime, the accommodation at the Udny Arms is being taxed to the fullest while the greater part of it is being rapidly booked for the next two months. —G. N.

Irish Reports.

Ballinderry (East Tyrone).—Trouting on the free reaches is but indifferent, and the few baskets made are small. On the Coagh section Mr. C. B. Irwin has been the most successful, his basket holding about two dozen trout during the week. On the Ardtren reaches, Mr. William McCord, Mr. C. R. Stevenson, Mr. Jardine Cooke, and Mr. William Ferguson have each had a few brace. A number of heavy salmon are reported to be lying in Ballygoney dam, in Green's Reck, and some other deep pools. The next heavy flood, with a strong west wind, will bring up a fresh supply, but the real good runs never commence till about the middle of August, and at that period trouting is also in its prime. The preserves of Mr. Moutray, Mr. Charles H. Linnon, and Mr. Hassard are yielding good sport to their owner and visitors. The Claggan reaches were fished on Monday by Mr. C. R. Stevenson, Mr. Geo. Molone, and Mr. William Stevenson, all of whom had half-a-dozen brace each of brown trout. A pike, said to be over 4ft. in length, is lying in the Ardtren reach, and so far has resisted all allurements for its capture. Such a brute must create awful havoc among young salmon and trout. Along the entire course of the Ballinderry—some fifteen miles—coarse fishing is splendid, while the Burmouth is the paradise for the devotee of the cork and quill.—EAST TYRONE.

Erne and Lough Melvin.—The weather improved a good deal during the past week, and some capital sport was obtained on the Erne. Mr. J. Hone had the biggest bag—nineteen salmon, ranging in weight from 8lb. to 24lb. General Dickens, Mr. Jameson, and Capt. Barry had fair sport also. Trout fishing on Melvin at present is very poor. —M. ROGAN AND SONS.

Lough Currane, Waterville (County Kerry).—Sport has not been as good as usual at this season. The wind has not been very favourable, however, and the water needs a little refreshing. The baskets for the week varied from sixteen white trout to four white trout. The average weight has been about 1lb., but several trout were had which weighed from 3lb. to 4½lb. Brown trout fishing has been moderate, and the fish small. Only two salmon have been caught. Mr. Brook, Leeds (on river), got one, 9lb.; and John Sullivan, one (on lake), 7lb. The following gentlemen had baskets of a dozen white trout on different days:—Major Hegan, Mr. G. Eades, and Major Cresswell; Colonel Rogers, Mr. Judd, Captain Reynolds, Mr. Brook, Leeds, Major Ffrench, Mr. Caldecott, Mr. R. Jones, and a few others, have also done well on odd days.—T. J. DENNEHY.

Shannon and Lough Derg (Killaloe).—Another most welcome change to rain and every appearance of its continuing. During the week the river has been running down rather fast, yet we have had very fair water for the grilse fishing. Should the rain keep on there is no doubt but that sport will be good for some time longer. The size of the grilse taken so far is most satisfactory. This very week some have been brought to bank and boat up to 9lb. and 10lb. each. Indeed, at all of the Shannon stations, Killaloe and Castle Connell in particular, many fine bags of large-sized grilse have been made since the end of May. July 21, Wm. Barry and W. Malone, fishing for Dr. Gorst, two grilse, 7lb., 5lb.; 22nd, P. Ryan and W. Fogarty, two, 10lb., 7lb.; Wm. Barry and W. Malone, two, 5lb. each; 23rd, P. Ryan and W. Fogarty, one, 5½lb.; 24th, one, 5½lb.; Wm. Barry and W. Malone, one, 9lb.; 25th, one, 8lb.; 27th, one, 9lb.; 28th, Major Traherne, one, 8lb. During the week W. Barry and W. Malone have, after fishing for salmon all day, killed each evening fine baskets of trout on the water rented by Dr. Gorst and party, Liverpool. On Wednesday evening they killed 7lb., amongst which were some pounders and three-quarter pounders. Walking down the river bank one evening, I saw more trout rising on Mr. Young's preserves (the Killaloe side) than one would see at all the other stations on the Shannon put together. It was a sight never to be forgotten. More English fishermen coming to enjoy the grand sport this week.—S. J. HURLEY.

Moy and Lakes (Ballina).—This river is down to a very low level, consequently sport has not been so good on the tidal portion this week. Anglers who fished early and late were rewarded with a fish or two—say, with a couple of sea trout. The upper water was fished splendidly all through the week, owing to having very many deep pools, where fish lie and rise well. Major Saunders and Mr. E. G. Perry, on July 25, killed twelve salmon and grilse between them, and since then are getting from four to eight grilse a day. Rain has been falling constantly during the last few days, and a good spate is sure to be the result, which will improve sport on the whole river. Trout fishers are not doing very well on the loughs, still some nice baskets are got daily.—FRANK HEARNS.

Westmeath Lakes (Mullingar).—Fishing on Westmeath Lakes has been of a rather disappointing character during the past fortnight. Even the perch and pike are slow to take the most tempting bait, and the only satisfactory baskets made are those which have been obtained by worm fishing for perch anchored beside a good bed of weeds. The second rise of Green Drake has commenced on Lough Enwell, and anglers are arriving. The two best trout which came under my notice this season was one of 9lb. taken on Lough Derravaragh with the Green Drake, and one of 9lb. on Lough Enwoll with Gudgeon.—T. J. W.

⁂ **Club and River Reporters will oblige by sending in their Reports early in the week.**

Holloway's Pills and Ointment.—Dyspepsia, Jaundice.—These complaints are the results of a disordered liver, which secretes bile in quality or quantity incapable of digesting food. Digestion requires a free flow of healthy bile, to insure which Holloway's Pills and Ointment have long been famous for eclipsing every other medicine. Food, irregularity of living, climates, and other causes are constantly throwing the liver into disorder, but that important organ can, under all circumstances, soon be regulated and healthily adjusted by Holloway's Pills and Ointment, which act directly upon its vital secretion. The Ointment rubbed on the skin penetrates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed; a cure will soon follow.

THE NORFOLK BROADS QUESTION.

ANOTHER MEETING OF LONDON ANGLERS.

A LARGE number of London anglers assembled on Tuesday night at the club house of the Gresham Angling Society, Basinghall-street, City, for the purpose of "discussing what steps are to be taken to defend the public right to sail and fish on the Norfolk Broads, which from time immemorial have been recognised free to the Crown and its loyal subjects." Mr. Bartley, M.P. (President of the Islington Angling Society), presided, and amongst those present were Mr. J. Salmon, C.C., Mr. H. H. Thompson, C.C.. Mr. H. C. Richards, Mr. Walter Rye, Mr. Woodrow, C.C. (hon. sec. Norfolk Broads Protection Society), Dr. Bruiton, Mr. A. W. Parker, Mr. La Feuillade, Mr. Cross, Mr. Norman, Mr. J. Tayler (sec. Gresham Angling Society), Mr. Ghurney (sec. London Anglers' Association), Mr. Tibbatts, Mr. Feakes, Mr. Fay (Mildmay Angling Society), Mr. M. Davies, Mr. F. Fletcher, Mr. G. E. Simms (Gresham and Blackfriars Angling Societies), Mr. Arthur Matthew (New Albion Piscatorials), Mr. Chambers, Mr. J. Taylor ("Red Palmer"), &c., &c.

In opening the proceedings, the chairman said he knew the Norfolk Broads, and they did form a most excellent playground for Londoners. (Hear, hear.) He asserted that they must maintain those rights which were now threatened. On the other hand, where the riparian owners had their rights the public must respect them, and he should be sorry to interfere with anybody's rights. He was of opinion that where private interests clashed with the public, it seemed reasonable that the public should buy them up to prevent any difficulties. When the railway companies wanted certain rights and powers they paid for them, and if the public had rights in the Norfolk Broads, he thought they might pursue a similar plan. (Hear, hear.)

Mr. Woodrow, C.C., then delivered an address on the question, and pointed out the localities of the different Broads by the aid of a large map. He maintained that they had a distinct right to fish and sail in those Norfolk waters which were navigable. (Hear, hear.) He could assure them that they intended to do their utmost to secure that end, and he pledged himself that their work would not terminate with the winning of the Hickling Broad case. (Cheers.) He proceeded to complain of the conduct of some of the cockney sportsmen who went shooting over the Broads, and said that the action of the riparian owners was in some measure due to this. They wanted to see an Act of Parliament passed which would enable the anglers to join with the riparian owners to keep order on the waters, so that every one could fish and sail in peace and quiet. (Cheers.)

Mr. J. Salmon (C.C.) proposed the following resolution: "That this meeting cordially supports the efforts of the Norfolk Broads Defence Association in its attempts to secure the public rights which have been enjoyed from time immemorial." He argued in favour of the establishment of a Broads Conservancy to protect the riparian owners and anglers from the mischief of the cockney sportsman. (Hear, hear.)

Mr. H. H. Thompson, C.C., seconded the resolution. There were, he remarked, places on land for public enjoyment, but there were comparatively few rivers and waters easily accessible to Londoners; therefore he maintained that the Norfolk Broads, which afforded attraction for anglers, yachting men, and others, should be preserved to the public.

Mr. Chambers moved: "That all interested in the rights of the public on the Norfolk Broads are by this meeting invited to co-operate with the Norfolk Broads Protection Society in obtaining help and evidence on the subject."

Mr. H. C. Richards, in seconding, observed in the course of an interesting speech, that the rights of the public would have to be settled by an Act of Parliament.

Mr. Cross supported the resolution and declared that the riparian owners had manufactured their claims for the purpose of pecuniary profit.

Both resolutions were carried unanimously, after which a hearty vote of thanks was passed to Mr. Bartley, M.P., for presiding.

In reply, the hon. member said the right of the fishermen and yachtsmen was a matter of enormous importance to the country, and he felt that the movement which they had inaugurated should not end merely with the Hickling case, even if they won it. He would strongly urge them to obtain some legal opinion so as to draft a Bill and get it into the House of Commons. (Cheers.) He felt sure a great number of hon. members would come to their assistance and as for himself he would undertake to introduce the Bill back it, or support it. (Hear, hear.)

In the course of proceedings a subscription was set on foot on behalf of the Defence Fund, and £10 was collected.

PROSPECTS OF THE TWELFTH IN SCOTLAND.

ACCORDING to reports from the various districts of Scotland the prospects of the Twelfth would seem to vary considerably; although on the whole a good season may be confidently anticipated and especially so in the more important grouse districts. The tendency all over has been for the birds to leave the higher moors for the low grounds during the prevalence of the late protracted cold wintry spring, and consequently birds will be somewhat scarce and decidedly late on the high grounds, but quite the opposite and quite plentiful healthy and strong on the low grounds. Disease is reported from some districts, while in others there is not only no disease but the prospects are brighter than they have been for years.

The following are extracts from reports to hand from the various districts:—

Aberdeenshire.—On the Deeside side of the Grampians matters are not so bright as was anticipated a few weeks back, and the prospects are not much beyond those of last year, which was only about half an average. A good few barren birds have been met with, and some very meagre coveys. The severe frost on 17th May has, no doubt, much to answer for. On the Forest of Birse Moors and Finzean Moors, which suffered considerably from disease two years back, coveys number from five to six, and are strong and healthy, and fairly plentiful. On Clochnaben the hatchings were good, and birds are now well on the wing. On Upper Deeside birds will be quite ready on Balmoral, Invercauld, Mar, and adjoining moors, on the low grounds, but late on the uplands, where they have just recently been hatched.

Argyleshire.—In the Lorn district the prospects are good. Coveys are, however, smaller than the average, owing to the unfavourable weather during the nesting season, and little or no disease has been seen either here or on contiguous sections of the West Highlands.

Banffshire.—Owing to the late nesting, birds are not likely to pack so early nor be so wild on the wing by the Twelfth, and, with genial weather, sportsmen may confidently anticipate fairly heavy bags. Hares are scarce.

Berwickshire.—Reports vary as to the prospects on the Lammer Moors. Some birds will be late enough for the Twelfth, while others will be strong on the wing. No disease. Partridges have had a good nesting season, and pheasants have also done well.

Caithness.—Prospects, on the whole, are of a favourable character. The young broods, if somewhat late, are healthy and numerous, and only but slight reports as to disease. The past wet weather has not been favourable.

Dumfriesshire Moors.—Including also those of Lanark, Peebles, and Selkirk, prospects are the most discouraging for some years back. Disease has been prevalent and the stock has been greatly reduced in numbers. Only about half the average nests were observed, and altogether the early record of the season is a bad one indeed. During the past three weeks, however, young birds have made rapid progress, and there should be considerable sport by the Twelfth, although sportsmen are advised to shoot sparingly this season at least.

On the Eskdale Moors a good nesting season was enjoyed and good prospects were being entertained, when suddenly disease broke out, and the bags on many moors will be much below the average.

Forfarshire.—Reports of late nestings, barren birds and disease in some quarters are what we hear from this country.

In the *western* and *northern districts* the prospects are on the whole of a fairly encouraging description. Barren cocks are more prolific on the high grounds than breeding birds, but the low grounds have otherwise benefited the forced migration of early spring.

In *Inverness-shire* there are no signs of disease, and good sport may be confidently anticipated. On the high grounds second nestings were quite common,

In *Kincardineshire* grouse prospects are better than during the past two seasons.

In the *Lothians* the Pentlands show a clean bill of health as far as grouse are concerned, and none of the drawbacks have been experienced here so common almost everywhere else.

From *Perthshire* somewhat similar reports are to hand as prevail in general. The higher grounds suffered considerably during the May storm. But altogether the prospects are more encouraging than for two years back. On the extensive moors of Lochearnside the prospects are excellent, while equally flattering reports are to hand from Glenalmond, Glenquaich, Amulree, and Dunkeld districts. All the moors in the Pittochry district promise well. The reports from Ross, Sutherlandshire, &c., are, on the whole, highly satisfactory and promise good average sport, disease being absent; and what may be wanting in grouse will be more than compensated for by the fine head of pheasants, partridge, and other kinds of game, which go to swell the bag as the season advances.

THAMES ANGLING PRESERVATION SOCIETY.

THE annual summer river trip of the committee and friends of the Thames Angling Preservation Society took place on Thursday, July 23. The steam launch chartered for the occasion was appointed to start from the garden steps of Mr. Alfred Nuthall, J.P., at Kingston, at ten o'clock in the morning, and then to proceed to Staines, and afterwards to return back again to the Castle Hotel, Hampton Court Station, which was all most successfully carried out. On the arrival of the launch at the Town Hall steps at Staines, the company made their way to the Angel Hotel, where an excellent luncheon was provided by Mr. J. N. Flood, the new proprietor, which gave general satisfaction, and was served up under his personal superintendence. In the course of the luncheon, Mr. Flood intimated his willingness to become a member of the Thames Angling Preservation Society, which was heartily applauded. The return journey was made at 3.30, and being Staines Regatta, the visitors were able to see something of the races. There were no calls made, as there used to be, at Chertsey, when Mr. James Forbes was alive, and at the Swan Hotel, Walton, when Mr. J. P. Wheeldon was the piscatorial proprietor. Whilst the launch was passing through Sunbury Lock, the company made an inspection of the rearing pond, by arrangement, and saw some of the young perch fry.

The arrival at Hampton Court was practically effected at 6.30, and very little time was lost in getting to the spacious banquetting hall of the Castle Hotel, as the visitors, in spite of a substantial luncheon, were anxious to partake of one of Mr. Mayo's splendid dinners, which is one of the great attractions of the trip, and he did not fail on this occasion to receive an expression of their continued satisfaction. Mr. Alfred Nuthall, J.P., occupied the chair, the vice-chairs being occupied by Mr. C. W. Elsden and Mr. George Evans. Amongst those present were Mr. J. H. Gough (Thames Conservancy), Mr. Alderman Philip Jones, J.P., Mr. G. H. Harrison, J.P., Messrs. H. Mapplebeck, V. N. Donetil, W. H. Jackson, W. H. Brougham (sec.), John Elsden, Berristead, Thomas Crumplen, George Evans, M. R. Lawes, A. E. Armstrong (Chertsey), S. Peet (Friendly Anglers), &c., &c.

It is not intended on these occasions to have any special list of toasts, and only those which are suggested during the evening, whilst the guests are enjoying the dessert and choice old wines for which the hostelry is noted, and with any harmony the visitors might introduce.

The loyal toasts having been drank with much enthusiasm, including that of "The Royal Patrons," "The Prince of Wales and the Duke of Edinburgh," the chairman gave that of "The Thames Conservancy," coupled with the name of Mr. J. H. Gough, and in the course of his remarks referred to the kind assistance the board on all occasions gave them when receiving a deputation, and to the courtesy and kindness they always met with from Mr. Gough.

Mr. Gough, in his reply, thanked them for the hearty reception he always received from them, and he was sure the conservators were at all times ready to assist them as far as they possibly could. He had enjoyed the pleasure of their secretary's friendship for a period of twenty-eight years, and he was at all times glad when he paid them a visit in Trinity-square.

Mr. Alderman Jones, J.P., proposed "The Chairman" in most complimentary terms, and in acknowledgment Mr. Nuthall said nothing gave him greater pleasure than to work for the grand old river, and to labour in connection with the T.A.P.S.

The Chairman gave "The Health of Mr. C. W. Elsden and Mr. George Evans," as they were always indebted to them for the success of the trips.

Both these gentlemen having replied, Mr. C. W. Elsden gave the toast of "The Secretary," who he highly complimented on his excellent manner in calling for subscriptions, thus making it really a pleasure for them to pay their guineas.

Mr. W. H. Brougham, in responding to the toast, remarked the great secret of getting subscriptions in was not to make too much of a business of it, but after some little conversation on angling or other topics, just to slip in the remark, "By the way, your subscription is due," which always brought out the guineas, and then quietly slip it into the pocket like the physicians do, and continue the conversation; by that means he always succeeded.

The concluding toast was that of "Mr. John Mayo," which the chairman gave in most flattering terms, and which the worthy host appropriately acknowledged.

The party broke up at nine o'clock to catch the 9.15 train.

THE CARLISLE OTTER HOUNDS. — An Otter Hound Drowned.—At five a.m. on Tuesday last, the inhabitants of the picturesque village of Armathwaite were roused from their slumbers by the deep-mouthed baying of the Carlisle otter hounds. It was a thrilling chorus, and as the music rang through the magnificent woods and died away in the distance, most of the hunters resident in the charming little hamlet were on the spot. There was Tom Parker, the sturdy little huntsman; there were the hounds panting for their prey; there were the brawny Cumbrians—aye, and the ladies, too—determined to follow the hounds "Over bank, bush, and scaur," and to be in at the death by hook or by crook. The river was very full after the recent heavy rains, but although almost too heavy for hunting purposes, the huntsman was anxious for a run, and the hounds were thrown off at Armathwaite Bay. At the outset, the veteran hound, Eden, took up a drag, and led the pack at a merry pace up to the rocks at Wanna Burgh, where he marked the game. Soon the varmint was bolted by the terrier Piper, and the exciting chase commenced up the rocky channel for nearly a mile, when the otter was lost for a brief period, but was again dislodged from a huge rock. Retracing his steps, he steered down stream towards Wanna Burgh with Eden, Bugleman, Rufus, Tester, and Thunder, in hot pursuit. Across the Coolon stream dashed the hounds—all but poor old Eden, who was seen to struggle for a few moments and then turn over as if seized with cramp. The hound was then swept down by the current into about fifteen feet of water, where he sank to rise no more. Both the deputy-master, Mr. R. Hind, and the huntsman were so cut up at the loss of probably the best hound that was ever produced in Cumberland, that they at once called off the pack and returned to Carlisle by the midday train. Eden was eight years old, and was bred by the master, Mr. J. C. Carrick. The hound had hunted regularly with the pack for six seasons and a-half, and was a worthy successor to such noted champions as Corbic, Ringwood, and Belfry. Tom Parker asserts that Eden was in at the death of fifty-nine otters. Whenever the old hound "marked," the game was never far off. It was a frequent saying of the huntsmen that "Eden never lies." It was true, too, he was the most unerring hound I ever came across. I had numerous opportunities of witnessing his performances during sundry hunting expeditions on the Border.—GILNOCKIE.

THE DUMFRIESSHIRE OTTER HOUNDS.—These hounds met at Black Esk Bridge, on 22nd ult., at 7 p.m., and hunted down the river. Below the junction of the Black and the White Esk, a drag was struck, and carefully followed for over a mile. Then the music pealed forth as the otter was marked among some willows on a small island. A lively hunt now ensued, but ere the huntsman could get up, the varmint had bolted and taken refuge in a wet drain, with a terrier in close pursuit. The hounds were at once withdrawn, in order to give the game a clear field on emerging from the drain. This soon took place in view of the whole pack, the otter and terrier both making for the river, biting and snapping at each other during their passage down the bank. Soon the animal was in deep water, and although several of the hounds closed with the game, none of them could hold on for long. Down stream went the otter with the pack in full cry, into the pool below, where a merry hunt was carried on for half-an-hour Then there was a lull for a few minutes, until two couples of hounds, led on by Hector, routed the varmint from some rocks, giving it a good shaking meanwhile The river was now getting too hot for further residence, and the animal steered for the adjoining wood, but was run into in the open and killed—a bitch otter, 15lb. There was a large attendance at the Kennels on Tuesday, July 28, and a grand day's sport was confidently anticipated, as some knowing hands had spotted the game on the previous day, and taken the necessary steps to secure a good hunt. The most sanguine expectations were fully realised as the run which followed was far away the best that has taken place in the district for many years. At the word of command the hounds rushed into the water, but never a whimper till passing Bridekirk they began to feather at the island alongside the mill dam. Then a glorious burst of music gladdened the hearts of the field. Across the dam flew the excited hounds, and into the wood, but in a moment almost they were back in the river. Now they began to "speak" in popular language, and at Meinfoot there was a general chorus like the sound of a mighty organ in some far-off cathedral. "Hie for him, Brusher," cries Mr. Davidson the honorary huntsman, and Brusher "marks" in a rabbit burrow, and in went the terriers, but the varmint refused to budge. Digging was then resorted to, and after several stalwart spadesmen had accomplished some prodigious telling feats, the terrier "Tors" was sent in, with the result that the other bolted in view of the whole field, into a deep pool, when there was some grand swimming for nigh half-an-hour, then the hounds were again at fault, as the varmint had evidently slipped past unseen. From the top of the pool, however, comes a loud halloo from the huntsman, Ho "Laurie." "Whipman good hounds, that's the genuine melody," shouts Mr. Davidson. Every hound was now dashing up the stream, in and out of the water in full cry. 'Twas a glorious sight, and the splendid harmony of their deep-toned notes thrilled the souls of many a well-seasoned votary of the chase as the otter was viewed in the river nearly two miles from where it was first put off. "I am not surprised," remarks a rustic, "at his pedestrian feats in the night if the animal travels at such a fearful bat in high daylight." Once more there is silence, but "Brusher" takes up the running on the land towards Hoddam Castle, casting about in the shallow water. The game is again sighted, evidently almost used up, as it shows now more frequently. Several encounters with the hounds take place, the otter always with the best of the deal, until at last the creature is driven into some loose roots and run into a well-developed bitch, 16lb. Mr. Wilsen Davidson deserves the greatest credit for the manner in which he handled the hounds. He is a most enthusiastic sportsman, and has proved himself many a time and oft a born otter hunter.—G.

THE

CARBOLIC SMOKE BALL

WILL POSITIVELY CURE AND PREVENT

✣ HAY FEVER ✣

And also the most Severe Forms of the following ailments:

COLD IN THE HEAD
COLD ON THE CHEST
CATARRH
ASTHMA
BRONCHITIS

HOARSENESS
LOSS OF VOICE
SORE THROAT
SNORING
THROAT DEAFNESS

NEURALGIA
HEADACHE
INFLUENZA
CROUP
WHOOPING COUGH

One **CARBOLIC SMOKE BALL** will last a family several months, making it the cheapest remedy in the world at the price—**10s.** post free.

CARBOLIC SMOKE BALL CO., 27, Princes Street, Hanover Square, London, W.

James Ogden,

28, Winchcomb Street, Cheltenham,

Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.

Maker of High-class Salmon, Grilse, and Trout Rods.

JAMES OGDEN'S CELEBRATED MULTUM IN PARVO FLY RODS, £1 1s.

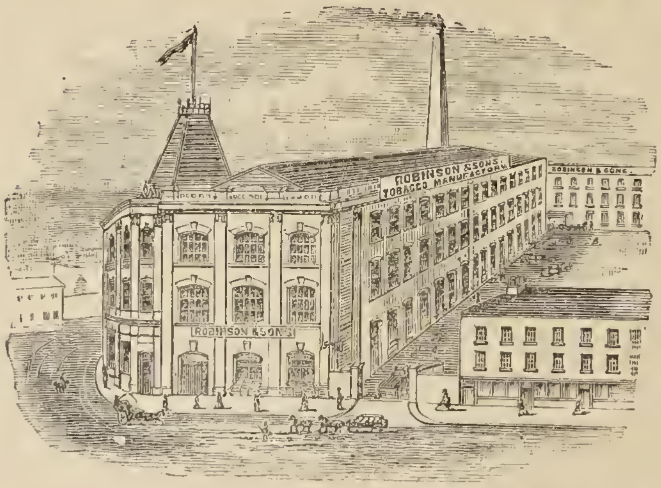
Every description of Salmon and Trout Flies Dressed on the Premises and despatched per return of post.

N.B.—NO CONNECTION WITH ANY OTHER PERSONS ASSUMING THE SAME NAME.

SMOKE "ORIEL" NAVY CUT.

THE HIGH CLASS TOBACCO,

MADE FROM PICKED LEAVES OF THE FINEST QUALITY.



Extract from the "FISHING GAZETTE" of February 21st, 1891:—

A GOOD SMOKE.

DEAR SIR,—Knowing how much you enjoy your pipe when out a-fishing, may I ask if you, or any of your friends, have ever tried "The Oriel" navy cut, manufactured by Robinson's, of Stockport? If you have not, do so at once, and I venture to say that you will be well pleased with it, being very cool and lasting, with an exquisite flavour. I have no interest in the matter whatever, but simply recommend it as my *beau ideal* of what a fisherman's tobacco should be.—Yours truly, SMOKER.

Sold at 5d. per ounce, in 1 and 2 oz. Packets, and 4oz. Tins. Any Smoker having difficulty in obtaining it from his usual Tobacconist can obtain it direct from the Manufactory

POST FREE. 2oz., 10d., ¼lb., 1s. 8d.; ½lb., 3s. 4d.; 1lb., 6s. 8d. **POST FREE.**

Sole MANUFACTURERS: ROBINSON & SONS, TOBACCO & SNUFF MILLS, STOCKPORT

JOHN COOPER & SONS,

NATURALISTS TO H.R.H. THE DUKE OF EDINBURGH

SILVER MEDALS, 1887, '80, & '82.

SPECIALISTS IN FISH MOUNTING.

Proprietor, - - - - - - - - C. SIMMONDS.

A HINT to FISHERMEN.

MR. THOMAS KIMBERLEY, well known in Birmingham and the Midlands as an expert Angler of over thirty years' experience, writes as follows:—

1, KEY HILL, BIRMINGHAM,
November 2, 1890.

Mr. WALTER SCOTT,

Dear Sir,—I have much pleasure in letting you know that I have succeeded in winning First Prize in the West Birmingham Fishing Club, and the Special Prize offered for the largest Roach taken in the same contest. These Fish were caught with your "AQUARIUM" BAIT, in Harborne Reservoir, on September 13th. I have also won First Prize in the Brothers Well Met Annual Contest, fished at Fernhill Heath, near Worcester, on the 20th—also with the "AQUARIUM" BAIT—together with many other Prizes during the season.—Yours truly,

THOMAS KIMBERLEY.

Anglers may obtain the "AQUARIUM" BAIT of any Fishing Tackle dealer in the United Kingdom, in packets, price 1d., 2d., 3d., 6d., and 1s.

Sixpenny Packet Free for Seven Stamps.

SOLE PROPRIETOR:

Walter Scott, 156, Warstone Lane, Birmingham.

GOOD MORNING, FRIEND

Have you got the new

GROUND BAIT? THE ANGLER'S DELIGHT.

If not get it at once. Do not lose a good day s Fishing through being without it. It is only 6d. per Patent Box. Post free to any address in United Kingdom nine stamps.

To be had from all Fishing Tackle Dealers.

Proprietors: Messrs. THURGOOD & Co.,

EDMONTON, LONDON.

Manufacturers to H.M.G. Majesty the Queen, H.R.H. Prince of Wales, since 1872.

STOCKING HIGHLAND WATERS.

By Mac.

The frequent announcements in the dailies and the sporting press of hotel-keepers and others receiving from fish culture establishments consignments of trout and fry, wherewith to stock their lochs and streams for the intended purpose of improving the fishing, induce us to offer a few remarks pertinent to the subject. To the question broadly put, Is it a good thing to stock? we take it for granted that almost everyone will give an affirmative answer. But to the question narrowed in its scope, Is it a good thing to stock all waters, whether they contain few or many trout? the answer that will be given by most parties who have given careful attention to the subject will be, we assume, an emphatic negative.

In popular favour the trout of Loch Leven stand high for their sporting and edible qualities, their symmetry and colour; indeed in these respects with the majority of anglers in Scotland they are held to be second to none. Nor is this any wonder. For long they have been fished for by anglers from all parts in their native waters, and spoken of in highest praise in almost every angling circle. Thus through their world-wide fame their cultivation by artificial means to the present tremendously great extent has been brought about. Metaphorically speaking, they may be said to have been in every one's mouth of recent years. They have been so loudly praised by tourist anglers, who have spoken with such positive certainty of their doing splendidly in the well-thrashed lochs of the Highlands, that every year for several years past an increased number of hotel-keepers, with a most laudable desire to please their patrons and secure for them gratifying sport, have been ordering consignments of fry and yearlings—in some cases two-year-olds—from the better known fish culture establishments; thereby creating a constantly growing demand, to meet which the owners of these establishments, with commendable foresight, have had reared and ready an adequate supply.

We desire to encourage by every means in our power the stocking of all suitable waters—waters whether public, private, or attached to hotels. Such waters are neither those which are polluted to any great extent, nor those in which from the scarcity or the poor quality of the food the native fish when full-grown are mostly but of small size. What waters we most desire to see attention given to would naturally be those in which most anglers are interested—public or hotel waters which anyone inclined to fish may fish—waters which through over-fishing have had their stock of fish, which were uniformly of a good size when the adult stage was reached, very much reduced.

To obtain the best possible results is what is aimed at by stocking. This, it is clear, must follow experiment, and those who succeed at the first ought to consider themselves remarkably fortunate. It cannot, of course, be expected that in very many cases great success will be manifest for some years. Few, especially hotel-keepers, like to risk spending a great deal of money to get a large stock of fish or fry introduced at the start. On the contrary, it is seen that many go about the matter over cautiously, putting, as a rule, too few into their waters, considering the scope of the waters. The result is that the fish practically are lost in the magnitude of water-space, and between this and the water perhaps not suiting them, the number lost by means of natural causes, and such as are destroyed by their enemies of earth, air, and water, the experiment proves so unsatisfactory that it is not repeated; and thus, without being fairly tried, the waters are condemned as unsuitable for the introduced fish, and thenceforward are left to be stocked as they may by their own native fish. Three or four cases in point, identically on all fours with what we have here set forth, have been known to us within a few years past. Doubtless there have been a good many cases of a pretty similar nature.

While we freely acknowledge the merits of Loch Levens as beautiful game trout, we should like to ask, Are they known to be hardy fish, well adapted for the purpose of stocking exposed Highland waters? Will they do well in very peaty water? They will, we are afraid, not do so well in such waters as loch *fario* of a good strain. Of course, where food is plentiful and nutritious, it is natural to suppose that any variety of fresh-water trout will thrive and grow to a good size, provided the water suit them and the stock of fish peopling it is not too great. But what concerns us most is to know the best trout for stocking different waters, and in this connection we would advise hotel-keepers to consider well all the probabilities before taking steps to stock. We picture, from our knowledge of it, a loch whose stock of fish, through severe angling and a little poaching on the sly in the spawning time, has got very low. For years this loch, very handy for hotel anglers, has been greatly run on, on account as well of its splendid large trout as of its easy access. Eight to ten years ago, a basket of trout weighing 20lb.—each trout little short of a pound —was the average take on it by an angler on a good fishing day, in the best of the season. Nowadays, under the best of conditions, and during the choicest time of the year, the average take would not exceed seven or eight pounds. The trout have neither fallen off nor increased in average size, but they have got greatly fewer. They are lovely trout—not silvery, as the water is peat-stained a good deal—splendid risers, game to a degree, and very firm and red-fleshed. Nothing, we have every reason to believe, has interfered with this loch to lessen the quantity or detract from the quality of its fish food, *ergo*, why should it not now contain and sustain to grow to a large size as many trout as ever it did? So far as can be seen there is nothing to prevent it. This, therefore, is a loch which reasoning from analogy it would not be a useless experiment—a throwing away of money—to stock. Being only a comparatively small loch, a few hundred yearlings would not be lost in it. It is in a well-sheltered and comparatively low-lying locality, has a long season of fly on it—the May-fly comes out for its short time—and, further, stickleback and fresh-water mollusca are known to be in it in any quantity. It is this most certainly that accounts for its fine trout and their large size.

Our knowledge of the facts is that Loch Levens have proved an immense success in many an artificial lake, but of their doing so well in Highland lochs as the common *fario* we have not often heard. In the latter waters, which are peat-stained to a greater or less degree, one thing is certain, the Loch Levens lose the beautiful natural silvering, which in artificial lakes they in some cases retain. The habitat—colour of the water and general surroundings—will affect and account for the outward colour and appearance of the fish, and the quantity and quality of the food for the nature and colour of their flesh. Where always all the trout except a few predatory ones have been very small, it is utterly useless, we think, to stock either with Loch Levens or the fry or yearlings of large trout from other waters. A new race of trout may to some extent for a year or two bring about a bettering of the average size, but we have no faith that such a state of matters will long continue in waters in which through their poverty of food the native trout have all along been of a small size. We believe that in many Highland waters—high-lying in bare rocky regions—the poverty of food is so great that even were the trout but half as numerous they would not be of decent size. On the other hand, there are many waters in well-sheltered highland localities in which, were the trout much fewer than they are, they would no doubt be of a better size—in fact, a good average. In our opinion it would be economical to have many of these trout removed and put into well-fed waters in which the native trout have become scarce. This would benefit both the waters thinned and the waters plenished. In the one case the trout left would have more good food and in the other there would still be sufficient food for the extra number. It stands, of course, to reason that if spared the mass of the trout will grow to a size and be of a quality in keeping with the quantity and nature of their food. To over-populate even well-fed waters would bring about, in course of time, a smaller average size of fish, while to introduce Loch Levens or the young of large fish from other lochs to waters in bleak, exposed rocky districts, where there is little fry or other good food, and in which hunger-stricken little black things of fish swarm in countless numbers, would be an experiment which we would seriously warn everyone against.

ANGLER OR POACHER—WHICH IS IT TO BE?

— By E. M. Tod. —

A short time back Dr. Brunton, who had been fishing the Deveron at Huntly, wrote about the poaching which has been going on in that district, and I during that same month was making similar notes, some fifteen to twenty miles farther up the river, finding trout marked with the net, &c.

Now Mr. C. E. Hale writes in *Fishing Gazette* on "Poaching on the Tweed," and his letter fills me with dismay.

I am now an old fisherman and have marked the downward progress of many a good Scotch river and streamlet in my day.

The Tweed and its tributaries suffer enormously the Teviot in an especial manner, where, as a Nisbet and elsewhere, it flows over a pebbly and a sandy bottom—the very best of bottoms for th net.

The Don and the Deveron and most of the Aberdeenshire rivers are now in the hands of lawless gangs of poachers, as witness Mr. Murdoch's statements from time to time; and few can know better that he, seeing that he knows so many brethren of the angle in and around Aberdeen.

The wail is getting stale, and the poacher apparently sweeps the fish into his nets, everywhere, without let or hindrance. Anglers go out daily, and curse their bad luck, their flies, their everything—but the real cause.

For some years I had the privilege of fishing a stretch of water on the Lower Deveron. The fishing was excellent, and if the kind-hearted proprietor should happen to read this, he will be able to follow me when I say that one of the very best streams was that between the ferry-boat pool and the pool by the wood, into which it flows. I used to fill my creel here, and, when I was there last, the trout were so few and far between that I soon came to sad conclusions.

When the clear-water worm came in, I could read the river like an open book, and I noted that some places in particular were apparently *nearly* tenantless. These were invariably streams and shallow pools, well suited for the rascally netsman, whereas in deep, rocky places I usually found my friends "at home." That spring just before my arrival a gang of poachers had gone over to "Plaidy" Station, and had successfully sent into Aberdeen *and disposed of to the fish salesmen* two and a-half hundredweight of fish, the produce of a *single night*. It was *then* that the police found it out, and that the hue and cry was raised; but the gang escaped—and the fish were eaten!

All kinds of remedies have been proposed, and the one which seems to have found most favour on the whole has been staking the rivers. For many a year I have known that some daring men used to go down the rivers with a crowbar, and, passing a rope around certain stakes which were most in the way, lever them up.

Mr. Hale, writing from the head waters of the Tweed, tells us that, when the river is low, this is the *modus operandi*:—

"The river has been staked by private subscriptions," he says; "but one or two men wade down in front of the net, and lift it over when they come to a stake, and so they can *net*, however well staked the river may be." Moreover, he was an eye-witness of this wholesale destruction "when he was fly-fishing the night before" he wrote this letter to the *F. G.*

I consider his information so valuable that I record my gratitude, and I am sure that angling societies who go to their beds trusting in their stakes, must *now* feel that the money thus laid out has been thrown away in a large measure. Besides all this, stakes get clogged by straws and weeds, and not unfrequently get "sanded up;" so that a net can be drawn over them, I should imagine, with comparative ease, after they have been in the river for a few years. If, then, staking a river is a costly process, and apparently as useless as it is costly, what is to be done? Are *we* to fold our hands and fall asleep whilst the poacher has "the swing of it?" It will be too late to lock the stable once the steed is stolen. This question, which should be of the greatest interest to landed proprietors, lessees of fishings, and anglers of all classes, not to speak of the proprietors of fishing hotels, cannot surely remain much longer as it is. Every man seems to say, "It's nae affair o' mine," and goes on his way; and so the question drifts helplessly down the stream of Time!

Will no man try to arrest its progress, and say, "Thus far—but no farther?" If no other will, I shall raise my feeble voice, and do my very best to stir the whole trout angling fraternity into something like the beginning of action. But oh, it is a ponderous machine to set agoing and I can do nothing ALONE—*absolutely nothing*.

Well, I am going to try to arouse interest; and I hope that angling societies will take the matter up all over the kingdom, and where there are no angling societies that they may be formed in every good *trout* fishing centre in Scotland, and indeed wherever trout fishing is to be found. So much for the disease, and the remedies which have proved inoperative—to effect a cure.

In view of Mr. Hale's letter we may point to "stake-holders," and say what Beau Brummell's valet said: but what did *he* say? A friend called, and found this confidential valet of the leader of fashion emerging from Beau Brummell's dressing-room bearing over his arm a perfect shopful of ties, all new, but all more or less crushed.

"What on earth are all these?" asks the Beau's visitor, and the stately, self-important, gentleman's gentleman answers, protentously, "Sir, these are *our* failures"! Pass that on to angling societies and others who stake rivers—and let them say—"These *were* our *mis-stakes!*"

Since we must search farther afield for the cure, or render at once our submission to the poachers, I shall offer a few suggestions. No doubt the putting on of night watchers would do a great deal, but the expense would be enormous. Besides, men could be occasionally bribed; and it is within my knowledge that men have been well plied with liquor, whilst the band in safety swept the river! And in one single night (with a low water), the damage wrought to a private fishery must be quite astounding.

I therefore can see but one method whereby

> "To spoil the spoiler as we may,
> And from the robber rend his prey."
> *Sir W. Scott.*

It is simply to make the sale of trout in certain areas defined well-nigh impossible, by rendering their purchase penal, save under certain circumstances. This has been a very old remedy with me, for "it does not go fooling around," but strikes *home*.

I will possibly be met with all kinds of objections; but the day is coming when that will *have* to be the cure, or fishing for trout will no longer be worth while, save in places where the wealth and energy of the owners or lessees of fisheries enables them to have an efficient staff of water-bailiffs.

Where, then, will the large and increasing army of anglers go for an angling holiday? Where will the weary brain-worker find that angling paradise for which so many sigh in vain even now? *Then* who would continue going to *Scotland* for a month's fishing?

Is this all a dream—all fancy? No; the dreamers are the men who go about with their hands in their pockets, quite content to say that fishing is falling off, and that there is no help for it. I say, "Collar the evil *now*, not to-morrow, or next day." Of course, I know that Acts of Parliament are not made in a moment, or passed in an hour. But will anyone point out a more *thorough* cure? Let it once find favour in the light of corporate bodies like our angling societies, and the first sod has been laid on the grave of the *poacher*—the first sod laid on that new "line" which will, one of these days, whirl the happy and contented *angler* away to his favourite stream.

But how can the sale of trout be made penal?

(1) By getting rid of a radical and utterly unjustifiable sentiment very prevalent in Scotland—namely, that the fish are common property. I have often heard this, and of course only in the mouths of those who neither own nor farm an acre of land, and who therefore have a direct and *selfish* interest in the matter. This sentiment would form a real barrier, I fear, to the passing of any such Act, as applied to "free water," till you were able to show that the poachers *alone* would be interfered with—and even the humblest of anglers would discover that it was his interest to aid the law in its efforts to suppress poaching for trout.

That it can, nay, that it will eventually be *forced* upon anglers, I have not the shadow of a doubt. Who wants to sell trout? The proprietors of *northern* rivers seldom or never do. Loch Leven trout alone command a market of any importance, and for such cases a special clause could be inserted. It might even be advisable to compel fishmongers and other buyers to make an entry of all purchases of *trout*, obtaining the signature and address of the consignee in every case, and binding them under a *heavy* penalty never to purchase from even a doubtful source.

This would still give the owners of fisheries the right of selling their fish if they chose. Of course the Act would not apply to living trout used for stocking purposes, but only to fish used as food.

Now, imagine how such an Act would dismay Mr. Poacher! Take the very case I have alluded to, where the Deveron was robbed of 2½cwts. of fish in one night. With such an Act how could they get rid of the spoil?

Well, for argument's sake, and to show how the Act would work in practice, suppose that they had sold the fish in Aberdeen, as indeed they did, to Mr. Slyfox, fish dealer. The police get wind of the transaction, and a smart inspector is sent to the fish dealer's.

"Well, Mr. Slyfox, I understand that you have purchased a consignment of trout. Show me your official books at once, as I have reason to think that you have brought yourself within the Act."

Not only would the consignee's signature and address (*even if false*) lead probably to the apprehension of *some* of the gang, but the conviction of a few fish dealers would strike such a blow at river poaching for trout, that it would very soon be on the wane—if it did not die out. It is only what is done every day in other departments of law.

So I say, direct your attention to the re-setter, if you want to stop the thief. Hamper the fish dealer by an Act of Parliament, and the poacher will find "Othello's manly occupation *gone!*"

I appeal to more influential members of the Flyfishers' Club, to which I have the honour to belong, and through it, I appeal to every fishing club in the United Kingdom, which has the interest of trout fishermen at heart, not to throw cold water upon this scheme until they can suggest a better.

I shall most gladly stand aside MYSELF, to make room for those who alone can bring about any such far-reaching reform—viz., a convocation, composed of all those whose interests are assailed from every corner of the land.

I have only thrown the stone into the calm pool, and I shall watch the ring widening and widening as it circles towards the shore. If it is to be a case of "the survival of the fittest," say, shall it be the angler—or the poacher?

PRESERVATION OF THE MEDWAY
AND THE
MEETING OF ANGLERS AT MAIDSTONE.

By EDGAR S. SHRUBSOLE.

THE Medway is a delightful river for an angling holiday. Even in its present poached and neglected state below Hartlake Bridge, it holds an abundance of coarse fish; it is wonderfully prolific, and, if properly looked after, its silent swims and weedy depths would provide magnificent sport for hundreds of anglers, and its many weirs and streams would not only continue to sing sweet songs of freedom to weary men, but would thrill their being and quicken the action of their hearts as a well-conditioned trout showed above the surface of the stream, and then made for its home with a rush that would severely test the angler's skill and tackle, or a big barbel with dogged determination fought its battle for life.

What wonder, then, that a few local anglers, grieved to know the river is so neglected, are anxious to do what they can to properly preserve it!

For many years past I have praised the Medway from an angler's point of view, and advocated its claims upon the fishing public. My experiences of English rivers are not limited to those that flow through the hop county, and when I assure anglers who do not at present know "Mother" Medway, that her sylvan shades, quiet swims, and picturesque surroundings will not only compare favourably with others of a like nature, but that they have a silent sweetness of their own, I trust they will believe it is a *bona-fide* conviction on my part; and the attractions of the river upon whose banks I was born will probably prove the truth of my assertion to ninety-nine out of a hundred who pay it a visit. When, therefore, the secretary of the Maidstone Angling Society communicated with the Editor of the *Fishing Gazette*, asking him to make public through his columns an appeal for funds they had addressed to anglers who fish the river, and if possible send a representative to a meeting they intended to hold, and the Editor asked me to attend, I without hesitation said "Yes!" Thursday, July 30, therefore, saw me at a well-attended and thoroughly business-like assembly of Maidstone anglers, who met at the Anchor and Hope, to deliberate upon what steps should be taken to more effectually preserve the Medway. Several well-known local anglers were present, and although Messrs. R. T. Tatham and D. W. Piue (who had promised to attend) did not put in an appearance, the two hours devoted to talking over the matter—in my way of thinking—were very profitably utilised. Some Maidstone anglers at last can see that if something is not very soon done, very little will remain to them of the old nces of 70lb. of roach and bream in a day. A more sensible tone pervaded the meeting than usual years back, and altogether I have t hopes of something substantial resulting n it. For several reasons I shall not touch n matters that cropped up that evening in an ial manner; it is far better that I should give own opinion and experience of what should and what has been done, especially as an eal has lately been made to the Anglers' ociation and Central Association of London lers for financial assistance, and so brought the ter within range of discussion in these columns. irst, then, let it be distinctly understood I ider the Medway, *like several such rivers*, well thy the attention of associations that have a culty in finding fresh fields and pastures new the thousands included in their membership. at is to prevent the Anglers' Association, the tral Association, and the Maidstone Associa- joining hands and forming a Medway ervation Society? Share the expense and c the sport. Appoint a proper keeper, and honorary bailiffs, same as are appointed for Lea, poaching to any extent would be simply ossible. Taking into consideration the fact many hundreds of London anglers frequent river, it is only fair they should assist ncially in preserving it. It would be quite rd to think that London anglers would pay preserving a river if a local society also fished d did not pay their share; and it's a rum rule does not work both ways, isn't it? It used ke from £70 to £80 per annum, in the days D. W. Pine had got the matter all ripe for *lete* preservation (why I say, "all ripe," and hasise *complete*, will be seen presently), to d the interests of anglers on the Medway, and could manage it now thoroughly. Surely ls should not be wanted? Then again rail- facilities are favourably extended to anglers: ilege tickets issued by either London associa- enable the holders to travel to any station he banks at greatly reduced fares.

o much for what could be done under existing umstances, *always supposing the local riparian ers continued to permit anglers to fish.* That's staggerer," isn't it? But it may be depended n that the greater part of the Medway could losed if the local riparian owners chose to w the example of the proprietors of Bray cb and exert their rights. In this connection mportant matter crops up. Some few years the Medway Preservation Society, which then in existence, obtained a power of attor- from the local riparian owners (principally ugh the influence and indefatigable exertions Ir. D. W. Pine). The whole of the owners the river had signed it, and also the Upper lway Navigation Company, on the condition the game on either bank was to be watched the society's keepers, and owners' interests rally looked after. In return, the society had absolute and entire right and control of the and fishing in the river offered them. In r words, the riparian owners (many of whom members of the society) would have handed to a *responsible* society, their rights of the ng. Now mark what happened! At a meet- called for the purpose of announcing that ters were ripe for the *complete preservation* of river, the general body of members delibe- ly refused to allow the document to be signed behalf of the society! The argument held that the general public would be debarred right of fishing in the Medway until they paid r subscription and became members of the ety!

ow, I maintain they have no right (as the law ts) to fish the river if the riparian owners se to stop them. They might have had a *legal* t, and they refused it. Moreover, I unhesita- ly assert that no angler has a *moral* right to *preserved* water unless he pays his mite towards ervation. The complete absurdity of the n of the general body of the Medway Preser- on Society will be more plainly known when orm my readers that the subscription to the ety at that time was (if my memory serves me) about five shillings per year. The promoters e scheme bound themselves to supply fishing ets *free* to any working men who could not y afford to pay; and the riparian owners nselves found a large proportion of the funds ssary to carry on the society.

Of course, the result was the influential members retired from the society in disgust; those left, who had thrown mud upon the action of men who really had their interests and the preservation of the river *at heart*, were quite incapable of carrying on the society upon its old lines, so it collapsed, and the river was—and is—unwatched and uncared for, except by the few faithful ones who still stick together and still hope for better times, and who called the meeting I lately attended. But what can they do with their £10 a year income? True, they do all they can; last year out of an income of less than £10 they spent £4 in prosecuting two poachers, *and gained their cases*. Good luck to them! and may they soon have the substantial help they are appealing for.

Now perhaps it can be seen what I am driving at. Could not the present Maidstone Society (which would soon become considerably swelled in numbers, and their income largely increased, if matters were once more started with vigour), with the Anglers' Association and the Central Association, form another Medway Preservation Society, and once more try to get that power of attorney? I don't think it would be refused by the anglers this time! especially as the following would be a great inducement for local anglers to combine with their metropolitan brethren. Any one fishing the river would have to hold a ticket from one or the other association, which would cost them not more than two shillings per year. This ticket, as we all know, entitles them to travel *from* London to many stations on the various lines at greatly reduced fares. If the South-Eastern Railway were approached they would probably see their way clear to allow local anglers on the Medway to travel *to* London at reduced fares if they held these association tickets. Thus would be opened up a splendid scheme, which could be worked upon principles I have advocated at Leeds, Nottingham, and elsewhere—*i.e.*, that anglers' tickets, available for any and every part of the United Kingdom, should be obtainable at all large central associations; and in this way an angler could go from Leeds waters to Nottingham waters, and *vice versâ*, either to London or any other waters, and so on, and any and everybody on angling bent could travel at reduced fares. I have had more than one angler fairly gasp for breath when I have mentioned this matter, and asserted that it is not only possible and probable, but is sure to be arranged some day. At any rate, it could be very simply worked in connection with the Medway.

Well, we shall see what will be done. I strongly impressed upon the meeting at the Anchor and Hope that they should depute two or three of their number to go to London, and lay their case before delegate meetings of the associations. I sincerely hope their appeal will be answered favourably, and that if matters cannot be arranged upon the broad and complete lines as laid down in this article by me, at any rate substantial help will be given them in some direction, so that the good old Medway will not go to the dogs for want of a few pounds. Should the matter be taken up in the earnest manner I trust it will be, I would advise any committee that may be formed to direct their attention to the vile manner in which poor miserable little fish are ruthlessly slaughtered in the Medway, and devise means to immediately stop such unsportsmanlike proceedings—stop it with a firm hand at once. I am not going to deliver another curtain lecture upon the increase in the standard of weighable fish here—club anglers in all parts are quite aware what my ideas on the subject are—I merely wish to draw attention to the fact that this is another river that is cruelly depleted of small fish, by anglers who know better, or at any rate should do so.

In an earlier part of this article I mentioned that trout and barbel would provide good sport at the weirs and in the streams. The latter fish could be introduced into the Medway at a very small cost, and they would be bound to thrive well and provide grand sport. Trout there are, but very few. Their number, however, could be increased, and steps should be taken to stock the river with them. The late Frank Buckland asserted that the Medway could be made a salmon river, but I can hardly agree with the assertion, great as was (aye, and is) the authority from which it emanated. But the river could and should be made to provide excellent sport with barbel and trout. Other coarse fish there are in plenty, they only want looking after, and then the Medway would be one of the best coarse fishing rivers in the country—as it used to be.

I have purposely refrained from dealing with the question of the pollution of the Medway between Tovil and Allington. There is plenty of water above. Still it is a crying shame that the river as it flows through the county town should be allowed to degenerate into nothing less than a large open sewer.

THE RIGHTS OF FISHING, SHOOTING, AND SAILING ON THE NORFOLK BROADS, CONSIDERED BY WALTER RYE.*

THE Norfolk Broads have now become such a recognised place for an outing, that what the outside holiday maker may or may not legally do is of very considerable interest, and this, with other matter, may be learned from a study of the above-named carefully-written little volume.

Mr. Rye divides the broads into three classes:—

"(1) Those which are rightly so-called, where the broad is an obvious broadening out of a navigable river which runs through it. Of this class are Barton, Salhouse, Hoveton, Wroxham, Surlingham.

"(2) Those through which—at present, at all events—no navigable river runs, though they communicate with one, as Sutton or Stalham, Hickling, Weigham Sounds, Horsey Mere, Martham, Ramworth, Rockland.

"(3) Those which are now entirely surrounded by land, and have no communication with any river, as Rollesby, Ormesby, Fibby."

The term "broads" does not, Mr. Rye considers, properly apply to the third of these classes, they "being nothing more than" private ponds, except as far as they may be crossed from staithe to staithe by a water highway. There seems no chance of establishing a right to shoot or fish over these except possibly by copyholders or "free tenants" of manors, of which they may have been waste. The author's opinions, therefore, apply "certainly to the first class of these broads only, less certainly to the second, and hardly at all to the third."

He cites many authorities, and the results of several law-suits in support of his contentions and opinion, but the results generally arrived at are "that all the visiting outsider may do is to sail to and fro from village to village, staithe to staithe, but that he may not shoot at all, and can only fish 'as he go.' As to the right of mooring, I think all, whether on pleasure or business, may make fast and lay alongside anywhere for one tide; but the bare idea that there is any right to land or light a fire on the road is, legally speaking, absurd."

To the important query as to "whether the public generally has an unlimited right of access to all portions of the broads actually covered by water?" Mr. Rye replies: "On this point it seems to me that wherever, on broads of the first and second classes, the water is sufficiently deep to float any sort of boat in the course of lawful business, and, possibly, of pleasure, there everyone has a right to go, especially where the river leads to public staithes or landing-places."

The conclusion he arrives at as to "what rights *(a)* the public and *(b)* the copyholders, &c., have to fish or shoot over the broads," he gives in the following words: "As to this, I should say the public certainly have no right to shoot, but just as certainly have a right to fish on navigable tidal rivers, although I very much doubt whether they have any right to moor fishing-boats out of which to angle. I know that a local judge held differently in a well-known running-down case; but I must own, I cannot see how anyone can justify the mooring of a pleasure-boat in a place which may impede a wherryman tackling across a river on a business journey, any more than an artist would be justified in squatting on a camp-stool in the middle of Cheapside. The river is the king's roadway—a wet one—but none the less a roadway, and originally was nothing but one as far as the public was concerned. The fish in it are the king's, unless he has granted a fishery, or appropriated it as free to his subjects. That the king did so appropriate the river to the public, at all events from Wroxham Bridge and from Potter Heigham Bridge downwards, is abundantly proved by the following extracts from the 'Hundred Rolls' for Norfolk, taken in the reign of Edward I."

Then follow the extracts referred to, and very nteresting some of these relating to the fisheries are, as showing "how persistently the juries presented and objected to the Lords' encroachments."

---

* Jarrold and Sons, London and Norwich.

In an appendix the judgment in the well-known Thames case of Smith *v.* Andrews is reprinted, as "being an excellent *resumé* of the law of fishing on non-tidal rivers."

In view of the action about to be taken by certain riparian owners of the Broads, this book appears at an opportune moment. "The Norfolk Broads Protection Society" is appealing to the public for help to resist the action of these owners, and, as the question is one of very general interest, it will probably not do so in vain. Moreover, the rumoured action of these owners is similar in kind to the disposition shown in other quarters, the wish to close to the public lands and waters over which they have been able to expatiate within the memory of living man.

One of those owners has begun proceedings to prevent sailing over, fishing in, or shooting on the Hickling Broad; and the other, it is believed, desires to close Wroxham Broad to the public. We can sympathise with Mr. Rye in his detestation of "the rowdy class of visitor who shoot at everything that he sees, from a little grebe to a bullock, and who makes himself a nuisance wherever he goes," but it has become absolutely necessary that the rights of the private owners and of the public in those parts should be decided by a proper tribunal; and this would appear likely to be the case at no distant date.

THE LUCK (?) OF EDENHALL.*

OH, the rod was heavy, the rod was long,
The reel was gorgeous, the line was strong;
And down the stream flowing
A fresh breeze was blowing
When we set out fishing at Edenhall.

Oh, the salmon were leaping in every pool,
So the doctor he shouldered his ponderous tool,
And vowed he would slaughter
A fish from that water
Ere he finished fishing at Edenhall.

So the mighty rod he lustily swung,
As over the Eden his line he flung,
Till his arms were aching,
And his limbs were quaking,
And he puffed like a grampus at Edenhall.

But not a fish in the river would look
At the splendid tints of his salmon-hook;
They jumped about grinning,
And winked at the spinning
Of the doctor's minnow at Edenhall.

No matter! no matter! still on he goes,
The rod he swings and the line he throws;
The gambolling fishes
Still baffle his wishes,
And luckless he wanders at Edenhall.

Now wearied and worn the doctor sits down,
And the moisture mops from his reeking crown,
He vows 'tis provoking
To bear his friends' joking,
As thus he sits panting at Edenhall.

But short is his rest, for a mighty fish jumps
Just under his nose, as he sits in the dumps;
So quickly up-springing,
His rod he sets swinging,
In hopes he may hook it at Edenhall.

Oh, vain and delusive the hopes in his breast!
This salmon just laughs and swims off with the rest.
Still on he goes jogging,
The stream vainly flogging,
As he toils on undaunted at Edenhall.

He plies each rapid, he tries each pool,
But fish he gets none, though the stream be full;
So, greatly disgusted
To find his hopes "busted,"
He sighs, and he says at Edenhall:

"If my grand new rod, and my great big 'flee,'
Just make the fishes all laugh at me,
Then fishing for salmon
Is verily gammon,
And gone is my 'Luck of Edenhall!'"

A. MERCER-ADAM.

Notes and Queries

THE heaviest salmon which has been taken from any river this year was netted on August 5, on the Tay, at Linnie Heugh, below Perth. The fish weighed 63lb.

ON August 5 a live seal was captured in Mr. Beattie's stake-nets at Newbie, Annan, and in the evening it was despatched to London.

GRAY VERSUS BLACK.—The late weather drove a sea-gull up the Thames, and when near the Crabtree some of the crew and passengers of one of the Kew boats, belonging to the Victoria Steamboat Company, saw the gull dive into the Thames and bring up a fish—a dace or a bleak. A rook noticed the capture, and would have disputed the prize, only that the gull, spreading all "sail," left the gentleman-in-black as though in a "hack canter." —GRAY WINGS.

"A SCOTCH FISHING MATCH.—Scotchmen who are wont to sneer at the size of the fish caught by Englishmen in 'angling competitions' have got themselves slightly into disgrace. Two sportsmen of Perth, reputed to be the best anglers there, had a match to decide who should be the champion of the Fair City. They began on the Blackwater at three o'clock in the morning and ended at half-past five on the subsequent afternoon. One of them caught three hundred and five trout, weighing 29¾lb.; the other, one hundred and thirty-eight trout, weighing 11¾lb. This gives an ounce and a-half on the average. But the case is not so bad as it looks. If there had been any big trout in the Blackwater some of them would have been caught, but there are none. All the fish are about the size of sprats; and, as they never grow large, there is no harm in taking them at that size. It is not to Highland streams you should go for large trout. There are very heavy fish in the Highland lochs; but the trout in the neighbouring streams which the Hampshire angler would consider 'takable' are very few indeed."

THREE MONTHS' SPORT ON LOCH LEVEN.—Seldom has a more unfavourable season opened to the angler than the present. Week after week the wind blew from the north or east, bringing with it chilling temperatures, either from the Arctic regions or Russia, where the winter held with great severity, with an almost total lack of moisture, until towards the end of May; since then, however, some capital sport has been enjoyed. The following is the total number of trout captured during April, May, and June for the past eleven years:—

	April.	May.	June.	Total.
1881	1,594	3,554	5,638	10,786
1882	1,494	3,064	2,619	7,177
1883	335	3,838	5,301	9,474
1884	2,319	3,320	5,292	10,931
1885	1,204	3,676	5,540	10,420
1886	706	2,465	3,282	6,453
1887	1,559	3,175	3,285	8,019
1888	1,025	4,456	7,811	13,292
1889	434	2,413	2,449	5,296
1890	1,174	4,649	2,630	8,453
1891	553	4,762	5,196	10,511

The most successful private anglers were Messrs. J. H. and M. Ridley, Northumberland, who, fishing from one boat, landed in ten days four hundred and forty-two trout, 334lb. 4oz.; their best day's sport being got on 26th May, when they secured fifty-five trout, 40lb., which is the best fished boat this season. The total number of private parties who were successful in securing 20lb. of trout and upwards was thirty-five, as against twenty-two during the whole course of last season. The heaviest trout weighed 2lb. 12½oz. Fifty-eight club competitions have been held, in which eight hundred and seventy competitors engaged, and who killed four thousand and seven trout, weighing 2,750lb., or an average of 3lb. per rod. The most successful of these was the Glasgow Western Club, when eleven competitors landed one hundred and thirty-seven trout, 82¾lb. The heaviest prize basket was got by Mr. P. D. Malloch, of the Perth Club, with twenty-five trout, 16lb. 9½oz. The best prize basket secured up to June last season fell to the rod of Mr. R. T. Annan, of the Bridge of Allan Club, with nineteen trout, 15lb. 9oz.—ROBT. B. LAING.

THE CRAYFISH.—Whatever might have been tl cause of the disappearance or death of the cra fish in portions of the Upper Thames, the Ke net, &c., it must have been local. In the mid of the fatal pest, crayfish were found in the fol of the dress of an unfortunate woman four drowned just above Oxford. Crayfish brood ha been seen, it is said, during the weed-cutting i the Lamborne, and fresh stock has been turne into the Newbury borough portion of the Kenne If these interesting crustaceans can live an thrive in water east of Newbury bridge, which now sewage-laden, the crayfish have got ver strong stomachs, as strong as the coarse fis which it has been proved can thrive in "sewaged water. Daniel was hardly correct in saying tha crayfish would live in no stream that does n run towards the South. The Kennet, whic runs from the West to the Eastward, i an exception to the statement. Crayfis must almost of necessity be vegetarians du ing at least a certain portion of the year but I have found them to "run" best abou harvest into round-hoop nets, baited wit the soundest ox-liver or fresh horse flesh; an with the baits mentioned—and also with spli coarse fish—I have taken hundreds of an evening and they sometimes "come" like mad things t their hasty "feed." Crayfish should be let alon for a season or two at Windsor, and in other part which suffered depletion. They are far too easil caught "groping"; but this should be discourage yet awhile. If, however, the Editor of th *Fishing Gazette* should introduce to our inlan streams (on the quiet) the "edel crebs," or nobl crayfish, he would in course of time be inundate with questions concerning "specimens" of th alleged *lusus naturæ*, and wanting to know if th strangers came from Elephanta, and if a slice o constrictor, or a quarter of a horseshoe ba could be recommended as "bait." Dishes ar garnished with crayfish, while the crayfish forn the best relish.—W. F.

THE JURISDICTION OVER LAKE VYRNWY.—"Th question of jurisdiction over the Vyrnwy lake ha been locally settled in favour of Liverpool, an against the Severn Fishery Board, but the judgment may possibly be reversed on appeal. Meanwhile there are reports of the progress whic has been made in forming a valuable fisher Apparently there is great success of fish cultur The lake—which is four and three-quarter mile long, and has an extreme depth of eighty-fou feet—was stocked a little more than two year ago with fry, and now anglers are filling thei baskets with trout averaging nearly a pound. writer, who has recently visited the lake, say that on a particular day the show of fish in th hall of the hotel, after the baskets had bee weighed, was a sight worth seeing. The tota was sixty-eight splendid trout, weighing ove 61lb., the biggest fish being 1lb. 13oz. and 1lb. 10oz respectively, and many went over 1lb. apiece Fish have been captured, the writer understands up to about 3lb. in weight, and upwards of thre thousand magnificent fish have been taken fron the lake since March 26 this year. Everyone ha been caught with the fly, no other lure being permitted, and no fish is allowed to be retained whic measures less than 12in. in length. The rules ar excellent, and are strictly adhered to, and th place promises to be one of the finest fishin grounds which this country possesses."—*Worceste Journal.*

POISONING FISH IN IRELAND.—"The recent poisoning of some of the upper reaches of the Sullane and Lee, and the destruction of a number of salmon fry has been followed up by prompt and effective action on the part of the Fishery Conservators. Alderman Dale wrote a letter to the Inspector-General of Constabulary, calling his attention to the very mischievous and wicked practice of poisoning fish, and requesting the assistance of the constabulary in putting it down. On Saturday, at the meeting of the Fishery Conservators, a reply was read from the Inspector-General promising that the local constabulary would be put in motion on the subject. This had already been done, as shown by a communication from County Inspector Heard to Alderman Dale, and a vote of thanks was passed to the Inspector-General of Constabulary for his promptitude in dealing with the complaint of the Board.—*Cork Daily Herald.*

WATLING
A WELL-KNOWN ANGLER
SHAWREY
PALMER
CARPENTER.
THE RACE FOR PLACES.
WEIGHING IN FOR THE COMPETITION.

NOTES AT AN ANGLING TOURNAMENT AT PULBOROUGH, SUSSEX (by kind permission of the Editor of the "Daily Graphic").

AN ANGLERS' TOURNAMENT.

"The art of angling, long since described, and perhaps justly so (in a double sense), as the contemplative man's recreation, is continually adding to the number of its votaries, and notably so among the working classes of the metropolis. One of the most important organizations is that known as the Central Association of London Angling Clubs, to which a considerable number of the leading angling clubs of London are affiliated, and by means of which special railway facilities are secured for the members.

"The association rents a splendid stretch of water, a portion of the Arun, in the neighbourhood of

Pulborough, Sussex, where a great fishing match has just been held. The whole proceedings, from first to last, were conducted with a business-like air, which fully betokened the serious interest attaching to it in the minds of the competitors. Mr. C. A. Medcalf (president of the association) was busy scrutinising and issuing tickets in the most solemn manner as the anglers passed the barrier, a duty in which he was aided by Messrs. W. J. Wade and J. A. Fitch, upon the former of whom, as secretary of the association, most of the arrangements devolved. The start from Pulborough Bridge, where all the competitors had to assemble, and the 'weighing in' and display at the Corn Exchange, adjoining the Swan Hotel, were the features of the day. A large number of valuable prizes were fished for, and the first was taken by Mr J. W. Biggs, of the Funny Folks Angling Society, who had a beautiful dish of fish, weighing 9lb. 13oz. in all. Mr. W. Simpkins, of the Anchor and Hope, took the second place; and Mr. J. Farmer, of the Blackfriars, made a good third."—*Daily Graphic.*

Waltoniana

A week or two ago there was published in various sporting papers the report of a take of jack at Slapton Ley which was said to "break the record." I forget the exact figures, but it was something like twenty fish in two hours. A friend who knows the Ley well, writes me, saying that there are anglers who fish that water with as many as six rods, and suggesting it was not improbable the take in question was made in that way. Perhaps the fortunate angler, or others who were at the Slapton Ley when the fish were taken, will give us some information on the subject. The history of angling is to a large extent made up of reports of fine takes of fish, and it is not desirable that some future angling author should state that the largest bag of pike ever made by one rod was so many fish, when in truth six rods were used with live bait tackle, which under those circumstances would be little better than trimmering. I am not in a position to assert anything, but the letter I have received is certainly sufficient ground for suggesting that in the interests of truth we should know a little more about the "record" take.

Anglers are advised when they buy a new line to measure it. A friend of mine recently bought a fly-line at a cost of twopence a yard, and on getting home, thinking that it looked rather smaller than a line of the length it ought to look, took the trouble to measure it, and found that the 40yds. he had paid for were non-existent, and were represented by something under 30yds. I have no doubt the retail dealers would shift the blame on to the makers, but it is certainly the duty of the retail men to occasionally take the trouble to measure a line or two. They should do this in their own interests and those of their customers. It is not necessary to undo a line to estimate its length. Simply measure round the coil, and multiply the result by the number of coils. The result will be sufficiently accurate.

I am tempted to say a word respecting the coming competition between experts in the Thames or Lea and Nottingham styles of roach fishing. Can such a competition ever be a fair one? To my mind, one style is eminently adapted for one sort of swim, while the other is by far the best for the opposite kind of swim. For a slow, deep swim close to the bank, where the angler can sit fairly far back and out of sight, I would say the Lea method is far superior to any other. With roach, which are much fished for, and which bite shyly in consequence, it is important to strike at the slightest movement, and it is beyond argument that with a tight line, and the point of the rod kept within a foot or so of the float, striking can be accomplished quicker than by any other method. But come to the shallower and faster swims which are found on the Trent. Try sitting there, immediately opposite the swim, with the rod extended over it, and what will be the result? Owing to the brightness and shallowness of the water, the roach in the swim will see the rod, and, even if not driven away, will quickly become aware that they are being fished for, and will refuse to feed. Those same roach, with the angler and rod 15yds. away from them, would very likely bite eagerly, and not require such quick striking as they would in a Lea swim, where, though they could see but little through such a depth, or rather height, of water, would have a hazy idea that they were being fished for, and bite shyly in consequence. I am speaking, of course, generally, well knowing that there are many instances when roach bite voraciously in a fairly shallow swim close to the angler, and that there are times when not a fish is to be caught in deep swims unless the angler stands at a distance and uses Nottingham tackle. Fishing from a punt on the Thames, I have often succeeded in catching roach by means of Nottingham tackle when not a fish could be caught near the punt, and that in deep water, too.

I have always vigorously preached against fishing by rule of thumb, holding that the best fishermen are those who are ever-watchful, and ready to adapt themselves to circumstances. One who acted thus succeeded in consequence in catching an 8½lb Kennet trout last week. The Kennet flows right through the centre of the town of Newbury, and the refuse which goes into the river attracts fish of all sorts. Right under the windows of the houses, and at the tails of back gardens, trout, perch, roach, chub, and very fine dace are to be caught. It is, in fact, the place for a specimen fish—that is, a specimen as to size and shape, but by no means one for the table. Larger trout are to be found here than, perhaps, in any part of the Kennet, and now and again a monster gets quite a reputation, being for years angled for in vain. Usually these large fish meet their death at the hands of a wicked miller; when he requires a fish for supper, he puts in a net and takes one out, quite regardless of the effect a sewage-fed fish may have on his health. Mr. John Dillon, who was fly-fishing one day last week right in the town, in the hope of catching some of these big trout, had his eye upon a magnificent fish, which resisted all his attempts to lure him with the fly. A little above Mr. Dillon a man was fishing for roach with paste, and Mr. Dillon noticed that now and again the trout would seize a piece of the paste which the man threw in as ground-bait. Most men would have tried that trout with a minnow and a worm, would have live-baited over him, and spun over him until all was blue; but Mr. Dillon was wiser than the majority, and begging a morsel of bait from the roach fisher, changed his fly for a small hook, which he baited with the paste. The bait was lightly cast in front of the trout, which took it boldly; and Mr. Dillon, at the end of a tremendous battle, for he was only fishing with a light fly rod, succeeded in landing the fish, which I need hardly say he is having set up. Templar.

ANSWERS TO CORRESPONDENTS.

Northwich Victoria Angling Society: The minnow has scales, and is one of the most beautiful of fish.

Attercliffe: We believe the address of Messrs. Willis and Sons, who make the patent double-eyed hooks, is Redditch.

A. Jeffreys: Yes, it is a fine minnow, probably put into the pond some time ago by some one using live minnows as bait for perch.

Correspondence

"*One of the charms of angling is that it presents an endless field for argument, speculation, and experiment.*"—T. E. Pritt.

THE DERBYSHIRE WYE.

Sir,—I think about two years ago you were kind enough to publish in your paper a report I sent to you of the damage done to the fishing in the Wye by water-mills. I am sorry to say since then matters have gone from bad to worse, and comparing the fishing with what it used to be, it is simply ruined. It amuses me to read the reports sent to papers, doubtless by persons interested in bringing anglers to the rivers. I smile sadly when I read of "the rule of the day" and "the order of the day" being from two to four brace of fish. I will venture to say that for every angler who leaves the river with four brace there shall be ten with not one brace, even if they have one fish; and considering that trout may be taken 10in. long, and grayling any size, this is not saying much.

The true state of affairs is this: there are a few good fish left not worked out of the pools, and a first-rate dry-fly fisherman *may*, by working hard all day, kill a couple of brace, and think himself fortunate in doing so; but on the streams and in those parts where most of the sport used to be had in old "wet-fly" times there is scarcely a fish to be seen.

You may go to the river in the morning and find it in fair fishing order, and half-an-hour afterwards down comes a flood of muddy grey-coloured water, making the river near bank full and fishing impossible, and this has now been the daily occurrence for years. The bed of the river is washed out, fish spawn and fish food washed away; and it seems to me that if the fish continue to decrease as they have done of late years the river will be scarcely worth visiting very shortly. Every man should have a right to do what he likes with his own as a rule; but it is marvellous to me that the chief owners of this historical trout stream should appear to care so little for its destruction.

Old Izaak Walton loved the Dove best, and wrote most about it; but he also knew the Wye; and could he come back again and see the muddy stream which too often flows down lovely Monsal Dale and under the stately walls of Haddon, I think he would have agreed with a worthy old trout-killing divine, a canon of the church too, whom I once heard say, "All millers should be drowned in their own dams."—Yours faithfully,

Old Otter.

FEATHERS FOR FLY-TYING.

Sir,—Replying to your correspondent in last week's *F. G.*, I beg to say that I hold a large and varied stock of all kinds of feathers, including natural dun, &c., hackles, as also materials of every sort for fly-dressing, and should be happy to take his commands.—Yours truly,

R. T. Williams.

Lugg Cottage, Kingsland, Herefordshire.

TROUT TAKING AN ADDER: A CORRECTION.

Dear Sir,—Will you allow me to correct a statement in your issue of August 1? The snake-eating trout at Altnacealgach was not caught by myself, but by Mr. Peter Mann, of Shrowsbury.

Is it not probable that the "adder" was a grass snake? It was, in the words of the ghillie, "partly dissolved," and was not brought up to the house. It was decided to be an adder because it was "an awful black beast." Grass snakes constantly take to the water in hot weather. The next day my boatman killed one on the shore of the same loch. It was an awful black beast, and he called it an adder. In fact, the ghillie states, as the major premiss of his syllogism: all snakes are adders.—Yours faithfully, C. F. Clay.

38, Great Ormond-street, W.C.

[Yes, we rather incline to the opinion that all snakes are adders (in the highlands).—Ed.]

DRESSING OF THE BADGER SEA TROUT FLY WANTED.

Dear Sir,—A fly for sea trout, under the name of the Badger-fly, has several times been named in the *Gazette*. I have a pretty strong collection of works on angling, but cannot find the fly in any of them. Wade and Halford give a Badger-fly, but I cannot think either of them refer to the Badger-fly of Scotland. Could you or any of the readers of the *Gazette* kindly furnish me with the dressings of the Badger-fly, or tell where they are to be got?—Yours, &c., D. W. Brearley.

Sherrington, Newport Pagnel.

FISHING NEAR SOUTHEND.

Dear Sir,—Would you kindly inform me through your valuable journal of the best place within fifteen miles from Southend where I could get some good fresh-water fishing?—I am, Sir, yours truly, A. George.

RE CAMM FUND.—APPEAL TO CLUB ANGLERS AND FRIENDS.

Sir,—I beg leave to acknowledge receipt of cheque value £1 2s. from the Bermondsey Brothers Angling Society, with many thanks. The sum I wish to raise for the above sad case is £20, and out of that I have in hand £18 6s. 3d., leaving only £1 13s. 9d. to collect. I hope those clubs will each send a mite who have not yet contributed, as I want to have a list of the clubs printed who have subscribed.

Cheques and Postal Orders can be crossed "Alliance Bank and Co."—Yours truly,

B. Abrahams.

25, Silver-street, Notting Hill Gate, London, W.

THE PROPOSED ROACH FISHING CONTEST.

Sir,—Ever since the memorable contest betwixt Woodard and Bailley there has from time to time cropped up questions as to the supremacy of London anglers in that particular "fine art" known as "roaching," Northern anglers, more especially Sheffielders, who fish with light running tackle, contending that though the late W. Bailley was undoubtedly one of the best "all-round" fishermen of his day, he was *not* by any means the best exponent of the Nottingham style when exclusively confined to roach.

Though a member of the Sheffield Association, I have not, I trust, the slightest bias in this matter; but I confess to sharing the opinion so generally entertained by my fellow members, feeling assured that if a contest could be arranged betwixt either Mr. Woodard, or any other clever "tight-liner," and one of our best men, such a contest would not only settle the question of personal skill, but would assist in forming an opinion on the respective merits of two entirely different styles of angling. I know the Editor of the *F. G.*, and I dare say a good many readers of the paper, don't favour the idea of these "money matches." Sheffielders, whose love of sport has reduced speculating on even fishing contests to a science, see no objection to them so long as a match be fairly made and properly carried out. Claiming to be a true angler myself, and no gambler, I still hope to see the Sheffield challenge taken up by the best representative "long-pole" performer the Middlesex village can produce.—Yours truly,

Rotherwood.

LINE FISHING ON THE HOLY LOCH.

Sir,—Can any of your readers interested in fishing enlighten me as to the following?—Fishing with the Phantom minnow is practised every suitable evening in the Holy Loch with success, and this is a fact which, if generally known, as it deserves to be, would very materially help the villages situate on the shores of that loch. The riparian proprietor, who has but recently come into possession, not content with trawling the river Echaig with nets, to the injury of proprietors and lessees of fishings on Loch Eck, threatens through his servants, I understand, to stop the line fishing on the Holy Loch as I have described. What I wish to know is—Does the law support such despotism? If it does, then I say it is time that such an abominable law be altered. The very idea of a mortal, not content with selfishly trawling a river, but trying to stop such an innocent amusement as rod fishing in the sea, is despicable.—I am, &c.,

Corrigenda (in *North British Daily Mail*).

HARD TO CATCH.

Dear Sir,—I should be very much obliged for your opinion on the following:—Adjacent to this town is a small lake in the hills about 500ft. above the level of the sea. It is well stocked—literally swarming—with Loch Leven trout in excellent condition. The bottom is stony and of a darkish brown colour, with moderately clear water. The fish are extremely difficult to catch. The oldest and most experienced fishermen of the district fail to catch more than an average of a couple of small ones in a visit of from six to eight hours' duration. The fish rise readily to the natural fly; but although the artificial fly as closely as possible resembles the natural one indigenous to this lake, still the catch is only as above stated. The lake has been fished at all times and in all weathers, but with the same disheartening results. Again, no more prolific is the sport with worm or minnow.—Yours truly,

Red Palmer.

[Hard-fished well-fed trout are always difficult to catch, especially in still water. Has "Red Palmer" tried dry-fly fishing when the trout are taking flies on the surface?—Ed.]

SALMON LADDER: QUERY.

Sir,—Kindly inform me if it is not imperative that salmon ladders or passes are placed at weirs? Here we strictly preserve samlets, and I think all loyal fishermen return them when hooked; at the same time we are only providing sport for the Tivertonians and the other associations below. Yet, sir, if we Dulvertonians apply for a ticket for the Tiverton water we cannot obtain it, it is such a close borough.—Yours, &c.,

Iron Blue.

Dulverton.

[It is a question of expense, and perhaps the conservators think that enough fish get up as it is. We have seen the river full of salmon miles above Hawkridge, but that is only in very wet seasons.—Ed.]

IS THERE GOOD ROACH FISHING AT RINGWOOD?

Sir,—Would any of your readers be kind enough to tell me whether there be any roach fishing obtainable at Ringwood, Hants, and how to set about it? Trout or salmon not required.—Yours truly,

Gentle.

[Ringwood is one of the best spots in the kingdom for roach fishing. Write to landlord of the White Hart for his tariff and charges for fishing.—Ed.]

GOOD TROUT AND COARSE FISHING WANTED.

Dear Sir,—I shall be much obliged if you will ask in your correspondence column if any of your readers can recommend myself and friend to any place in North Wales or north of England where we can obtain good trout and coarse fishing for a fortnight from the 20th August till the end of the first week in September.—Yours truly,

Arthur E. Hodgson.

7, Clifton-avenue, Nottingham.

REPORTS OF SPORT.

Dear Sir,—Referring to your remark at the end of "Notes from Lancashire," I have been forced to adopt that style of note from absolute necessity. In our local papers we have weekly notes, written by men who have never fished at all, and who know nothing of the sport whatever; the consequence is that, owing to the publication of particulars relating to private fisheries, the owners have been so pestered for permits that place after place has been closed to all. This is a great loss, as we are cruelly situated with regard to public fisheries or rivers. I will supply the fullest information wherever I can safely do so.

Your Reporter.

[What we object to is the very vague nature of some of the reports sent. What earthly interest or value is there in the statement that "a party of anglers caught 20lb. of trout," or similar statements, which may mean anything or nothing? At any rate the names of the anglers can be given. In the interest of our reporters themselves, as well as of our readers, we must ask them to send no report at all, rather than vague generalities which fill up space to no purpose.—Ed.]

FEATHERS WANTED.

Dear Sir,—Can any angler procure for me half-a-dozen eyed-feathers from the tail of a *white* peacock?—Yours, &c.,

H. A. Simonds.

Red Rice, Andover.

[We hope some reader may be able to supply these to our friend Mr. Simonds, who is a member of the Flyfishers' Club.—Ed.]

BOXES FOR GAME AND FISH.—RECIPES WANTED.

Sir,—A long time ago an angler asked a question in the *F. G.* as to getting *folding boxes*, of which he wanted to take a number with him, with the intention of sending his captures to friends. I was sorry to see that he did not succeed in his truly benevolent and exemplary intention—for no answer appeared.

The enclosed cutting from the *Field* may, even now, be useful to him and to other anglers also.

May I suggest an idea about *whisky*—surely an important part of an angler's outfit? Some while ago you gave letters regarding the kippering of salmon, and a "Cambrian Essence" was recommended. From the context I presume this was an essence of wood smoke.

Now, thirty years ago, tramping Scotland with a knapsack, I used to come across samples of *really* peaty whisky which were, to me, delicious. A hot tumbler would almost make the room smell like a Highland bothie.

But in London I find it impossible, hard as I have tried, to get this sort, and I see one kind is advertised to be *free* from smoke.

If essence of *wood smoke* can be made, why not of *peat smoke?* With a vial of this, one could flavour the ordinary, almost flavourless, whisky to any desired degree. I do think there must be many who share my taste in this matter, so the speculation might *pay*. A good name for the liquid would be "*Scotian* Essence."

Would any kindly Scot give me a recipe for "Athole Brose"? I know there are whisky, honey, and perhaps other things in it, but am ignorant of the proportions.

Thanking you for the pleasure and profit derived from the *F. G.*, yours truly,

W. P. H.

Here is the extract from the *Field*:—

"Folding Game Boxes.—I observe in the *Field* of August 1, a reference to grouse boxes, in which you state that you do not remember the maker of any boxes made to fold. I have for the last two years used grouse boxes of stout cardboard, made by Mr. Thomas Bishop, of 44, Deritend, Birmingham, which are made to fold. When sent out they are open, and lie one upon another, and go in a very little space. I had sixty of the one-brace boxes made up in a package of the following dimensions: 14in. long, 10in. wide, and 14in. deep. This is a great convenience for sending the boxes to remote parts, as compared with the boxes that do not fold up.—T. S. (Worcester)."

TWICKENHAM FISHERMEN'S REGATTA.

Dear Sir,—It being the intention of the fishermen of Twickenham to hold a regatta on Monday, August 31, and knowing the interest you have taken in the past in anything promoting their welfare and enjoyment, they venture to ask your kind co-operation and influence in obtaining subscriptions towards the same.—I am, dear Sir, your humble servant,

R. Coxen, Fisherman.

Swan Cottage, Ferry-road, Twickenham.

[Copy of Circular.]

"Twickenham Fishermen's Regatta, Monday, August 31, 1891 (under the patronage of the Right Hon. the Earl of Dysart, Alfred Nuthall, Esq., J.P., M. H. Blamey, Esq., A. J. Little, Esq., G H. Wright, Esq.).—The committee have pleasure in announcing that the fishermen of Twickenham will this year hold a separate Regatta from that of the annual Town Regatta, and they trust they may be assisted in their endeavour to make the same a success by the gentry and inhabitants of Twickenham. Subscriptions may be forwarded to the collector, Mr. J. Coxen, jun., or the hon. treasurer, Mr. P. Brown, Swan Inn, Waterside, Twickenham.

IS DAPING LAZY WORK?

Sir,—Mr. Walbran, in his interesting and instructive article on "Summer Angling," which appeared in the *Fishing Gazette* of the 20th June, writes: "One more style of summer fishing, and I have done. I allude to dibbing, or daping, with the natural fly; it is a lazy kind of sport," &c.

On my word! If Mr. Walbran had been sitting with me at lunch time, one day last week, on the bank of a certain Staffordshire trout stream, and watched my brother do a bit of daping, he would have changed his opinion about the laziness of the sport.

While my brother and I were eating our lunch, in the shade of a fine tree a few yards from the water, a trout rose several times a little distance up-stream. During the forenoon we had both tried to put a fly over the place, but unsuccessfully, owing to a tree, some bushes, and an adverse wind.

"I must have that fellow somehow," my brother said. "I'll see if I can rig up a natural, and put it through the bushes."

He found a dilapidated old fly in his book, cut away all the feathers, and put it on his cast. There was a slight rise of May-flies at the time, so he went away into the next meadow to get one. A strong wind was blowing across the brook, and as the flies left the water they came on to our bank and started across the meadow, but flying high. It was amusing to see my brother—a man getting on towards middle age and of a stoutish build—not walking fast or trotting, but running, with arm outstretched, and chasing May-flies hither and thither. At last he secured a fly, and returned to me. He put the fly on the hook, and crouching low, with rod in hand, crept up to the bushes, and tried to get his rod and line through them. We had no small shot or bullets, or weights of any kind. He could not get his line clear of the bushes, and soon lost his fly. Still crouching, he crept back to me, laid down the rod, and started away for another fly. Another attempt, and again was the fly lost in trying to get it through the bushes. Another career over the meadow, and capture of a natural.

"I can't manage to get through those bushes," says my brother; "I will see if I can reach him from below them."

But below the bushes there was open country, and even kneeling he would have been seen; so down he went on his stomach, and got along with his elbows and knees until he reached the edge of the water. Failure again! He lost his natural, and had to retire. Another bit of exercise over the meadow, and back to me with his prize.

"I will try him from above the bushes this time," says he, and down he went full length, and worked himself through the grass. Now he was partially successful, for he got his fly in the proper place, and there was a swirl and a splash as the trout took it. But the strike was a thought late, and the fish was not touched by the hook.

After this we decided to give the fish a little time to recover himself, and my brother went off to lay in a small stock of naturals. In ten minutes or so he came back with some, and placing one on his hook had another try. He rose the fish, and missed him again. Lying motionless for a few seconds, he stirred, and pushed himself backwards away from the water.

A rest of some minutes, during which he found that some whisky was absolutely necessary as a sedative, and again he worked down to the water's edge and *caught his fish*, and a good fish it was too, for the stream—over half-a-pound.

Now, there was nothing lazy about this bit of fishing. Three-quarters of an hour of persistent effort crowned with success. To me, sitting in the shade with my pipe, it seemed very hard work, but very good sport.

As my brother stood with the rod in one hand, and the landing-net with the fish in it in the other, he cut a caper, and with unmelodious voice he trolled out—

> "If this is vanity—hip, hurrah!—
> Then vanity let it be.

—Yours, &c., Charalah.

LAKE TRAFWLL, ANGLESEY.

"No Eels Need Apply!"

Sir,—This sheet of water, one hundred acres in extent, has been lately stocked with fish by Mr. Pierce, the Hotel, Valley. Eight years ago four hundred perch were put in, and they have thriven so well that the lake is a perfect paradise for perch. Often and often forty have been taken in an afternoon, running from a ¼lb to 2lb. Last year Mr. Edwards, Holyhead, and a friend took one hundred and thirty between them. My visit there lately was under very unfavourable thundery weather, but we got some dozens of real good-sized perch, ill-prepared as we were for that mode of fishing; for at Mr. Pierce's invitation we went fly-fishing for trout, he having put in ten thousand Loch Leven fry four years ago. Under the atmospheric disturbance the trout would not rise, much as we had wished to get hold of the two-pounders and two and a-half pounders frequently caught; so we changed for worming, and between the pretty-wooded island and the north-east end of the lake, the perch took fast and furious, and we soon got as much as we cared to carry home. But what really put an end to the sport was a beastly eel of about 5lb.—more like a conger than a fresh-water eel—which took my bait.

It tugged and wriggled for a long time; and offering it to my friend, Mr. Owen, or to the boatmen—who like myself would have nothing to do with it—the gut was snapped with a scissor a foot from its snout, and the unsightly thing sank heavily to the bottom to bear the penalty of taking what was not offered it. Whoever will get hold of that eel with the protruding gut will find its weight more likely to be over 5lb. than under.

The lake is on the verge of a common, three miles from Valley; and if a man wants to realise the meaning of the word "solitude," let him go to Trafwll. It has been stocked this year with eight hundred Loch Leven yearlings; and as Mr. Pierce is preparing artificial spawning beds, there ought to be good trout fishing. Adjoining it is Lake Penrhyn, which was stocked with three thousand fry some years ago, and has not been yet fished.—Yours, &c, W. H.

Aberffraw.

[We fear the perch have been fishing for those trout fry, and if there are many eels they would not let the perch eat them all. Why the Scotch, and apparently the Welsh also, have such a prejudice against the eel we cannot imagine; and to cut adrift a five-pounder!—it makes one hungry to think of say 2½lb. of fried and 2½lb of stewed eels being wasted in this way. We might say, as Walton says of the strawberry, that though doubtless God might have made a better fish (to eat) than the eel, doubtless God never did.—Ed.]

ANGLING FOR BARBEL.

Sir,—(1) I am afraid Mr. Jardine will fail convince me, because I have frequently had worms *sucked* off when legering without the least indication of a bite. (2) A *small* maiden lob, baited as stated, would enable eels, dace, and barbel to easily take off the long ends without being caught. (3) If he will send his address to "Angler," 70a, Peckham Rye, S E, I will send him what I call a medium-sized ragged bait—seen at its worst, of course.—I am, &c., Streatham.

Geo. CORDING'S

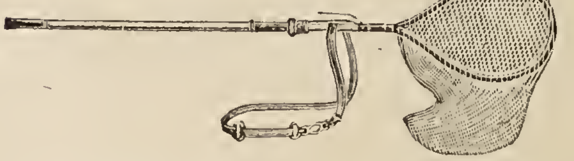
125, REGENT ST.; 231, STRAND

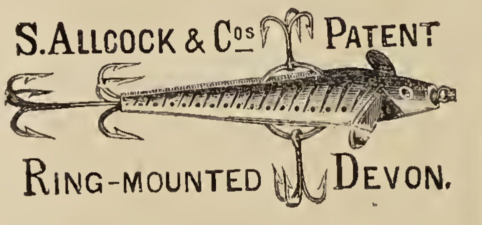
S. ALLCOCK & Co., Standard Works, REDDITCH.
Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

Patent Applied for.

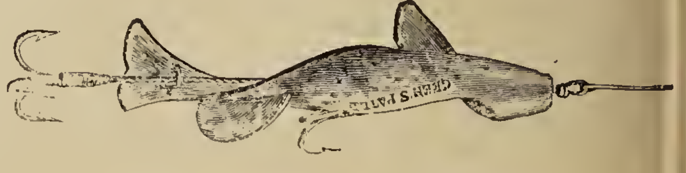


Col Clarke's Patent L. Handle & Net.
Perfectly secured to the Strap, and can be removed in an instant.

Platt's Patent Fishing Basket.
The New Aluminium Reel.



Patent Inimitable May Fly.
The nearest approach to nature ever yet attained. Bodies in various Patterns.



Geen's Patent Spiral Minnow.
The most Perfect Spinning Bait ever invented.
It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.
CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.
London Office: 60, QUEEN VICTORIA STREET, E.C.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, AUGUST 8, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The monthly meeting of the general committee will take place on Monday evening next, August 10, at 8.30; and the renting and preservation committee at 9.30.—R. GHURNEY, sec.

Anglers' Association.—EASTERN DISTRICT No. 2.—The next return visit on this List will take place at the Eustonian Angling Society, on Monday, August 17. I hope this date won't clash with any other visit.—F. THORLING.

Anglers' Association (SOUTHERN DISTRICT) VISITING LIST.—The next visit on the above list took place at the Peckham Bros. A.S., Prince Albert, East Surrey-grove, Peckham. For date see their club report.—G. W. ARMSTRONG, District Officer.

Anglers' Benevolent Society, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The next meeting of the committee will take place on Friday evening, Aug. 14, at 8.30, when a sub-committee will be formed for carrying out the Annual Angling Competition, in aid of the funds.—R. GHURNEY, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—On the 2nd inst. the following members weighed in: Mr. Blyth, roach and dace; Mr. King, roach; Mr. Cooper, roach; Mr. W. Knowles, roach; Mr. J. Bell, roach, dace and gudgeon. Our next match this season will take place at Egham, from the Bell Weir to Old Windsor Lock, on August 16; all to meet at Clapham Junction at 8.15 a.m.; tow-path only; jack barred.—J. RICH, secretary.

Amicable Waltonian Angling Society, the Sun, Gt. Sutton-street, Goswell-road.—On the 2nd inst. several of our members were out; but Mr. G. Merry only weighed in, roach, and Mr. Lambarth, bream. Members are requested to attend next Thursday evening on special business.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—A well-attended meeting of members was held on Wednesday last. Mr. Mitchell was duly elected a working member; also Messrs. W. and C. Clerke were proposed as new members, to be balloted for next meeting. On the 9th inst. a match will take place for monthly prizes (four in all) in the central fishery at Pulborough. The prize for specimen carp, 4lb. 13oz., taken from the central fishery by Bro. Bedford, was handed to him by the chairman amidst the congratulations of the members. The discussion was again renewed in reference to the sea fishing competition, which is to take place on the 30th inst. On the 2nd inst. Bro. Palmer produced a capital show of fish from the central fishery, Pulborough, bream, 17½lb.; one fish, 3¼lb., and five fish over 2¼lb.—A. G. SMITH.

Anglers' Pride Angling Society, the City Arms, Great Dover-street, Old Kent-road.—We had our trays well filled with bream and roach on the 2nd inst. Members please note we fish our monthly prizes, at Woking, on Aug. 16th, all to start by first train. Messrs. Rowling and Bowman were elected working members; also, Mr. Baxter, of the Mitre, Fish-street Hill, where he will be pleased to see all brother anglers at any time.—J. TUCKER, hon. sec.

Battersea Friendly Angling Society, Queen's Hotel, Battersea.—The members of this club fished a match on the 2nd and 3rd inst., with the following result: C. Wastell, first; G. Mumford, second; J. W. Hopkins, third; H. Higginbotham, fourth; W. Wastell, fifth; G. Searle, sixth. The six prize winners weighed in 32lb. 5oz. of fish under the new standard. The next match for four prizes will take place August 16, roving, when a special prize will be given for honorary members.—G. MUMFORD, secretary.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—Several members were out on the 2nd and 3rd inst., some of them returning with fair shows of fish, the most fortunate being Mr. Warman, 23lb. 9½oz., bream and roach; Mr. Allum, roach; J. Smith, roach and dace; Mr. Pocock, bream and roach; A. Conn, chub and roach; C. Sullivan, chub and roach. The competition for the August series of prizes will take place on the 16th inst., place and conditions to be decided at the weekly meeting on the 14th.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—Those who attended the club-house on Monday evening, expecting to see a good show, were not disappointed, as all the trays were full. The following gentlemen weighed in: Mr. Hacker, roach, perch, and bream; Mr. Wheelhouse, bream and dace; Mr. J. Barker, carp; Mr. F. Barker, carp and perch; and Mr. F. Roberts, bream and roach. We discussed the annual dinner on Wednesday, and agreed that it should take place at Pulborough, on Sept. 6.—F. ROBERTS, hon sec.

Bostonian Angling Society.—The following members have had fish during the past week: Mr. Rundell, perch, roach, and dace; Mr. Jennings, roach; Mr. Hoare, roach and dace, heaviest roach 1lb. 4½oz.; Mr. West, roach and dace; Mr. Chapman, tench. Members will oblige by attending the meeting next week.—J. H.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—We fished for five prizes at Dagenham on the 26th ult., but only three were won. Mr. Wilson, first; Mr. Mearring, second; Mr. Howell, third. The two remaining prizes will be fished for under the same conditions and at the same place on the 9th inst. The following gentlemen have weighed in: Messrs. Wilson, Mearring, Howell, Foster, Bissell, Harley, and Whatcott, bream; Wilson, Mearring, Foster, Hawkes, Watkins, and Lee, roach; Wilson and Watkins, rudd; Wilson, jack; and Hawkes, perch. Will our members kindly attend to organise a smoker in aid of our prize fund?—T. HAWKES, secretary.

Burton Piscatorials, Globe, Derby-street, King's-cross.—We were fairly represented at the distribution of prizes at the Central Association, when Mr. C. Roberts took a minor prize. On July 29, Mr. Law weighed in perch, and Mr. C. Roberts, roach, one roach tipping the beam at 1lb. 9oz. On the 2nd inst., Messrs. Sturman, Biggs, jun., Brierly, Garcker, and Richards weighed in bream, jack, roach, and gudgeon.—C. ROBERTS, hon. sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town,—Most of our members were out on the 2nd inst., but owing to the stormy weather only the following members weighed in: Mr. King, roach; Mr. W. White, bream and roach; Mr. Fitter, Mr. Sharp, Mr. Leslie, and Mr. Critcher, roach and dace. Our next brake outing to Weybridge, on Sept. 6. Members who have not got their names down must let me know as soon as possible as we are nearly full.—E. T. WHITE, sec.

Canning Town Angling Society, Marquis of Salisbury Hermit-road, Canning Town, E.—Our members were out in full force during the holidays and had capital sport, Messrs. P. Heester, G. Hatton, and J. Heester, having some very fine bream; Mr. P. Heester weighing in several over 2lb. each, other members having nice shows but too late to weigh in. I wish to remind our members that we finally arrange on next meeting night, the 12th inst., where to compete for the prizes already announced.—O. JONES, sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—With regard to Bank Holiday sport, our trays were well filled, and the fish on view at the club house brought forth expressions of surprise and admiration from almost every person who saw them. The best show was that made by Mr. Tom Keoble and Mr. J. Deplidge, who conjointly had 50lb. of magnificent roach. the former having forty fish and the latter thirty-four. The catch included three fish of 1lb. each, and a dozen ¾lb. each. Mr. Deplidge's best fish weighed 1lb. 4oz. and has gone to the taxidermist.—JOHN SMITH, hon. sec.

Central Association.—The usual monthly meeting of delegates, will take place on Monday next, 10th inst., at half-past eight p.m., at the Bedford Head Hotel, Maiden-lane, Covent Garden.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—The members of this club fish a roving match at Woking Broad Meads on the 9th inst. for four prizes. All to go by first train from Clapham Junction. Since my last the following have weighed in: Mr. Wilson, 17lb., barbel and dace; Mr. Edwards, 22lb. 14oz., barbel, roach, and dace, from Staines. Mr. Painter, 3lb. 4oz., bream; Mr. A. Bowater, 2lb. 7oz., barbel; and Mr. Tringham, junior, roach.—A. BOWATER, sec., pro. tem.

Clapton Angling Society, Wayland Hotel, Dalston-lane.—Members will please take notice that the question of a new departure will be considered and probably decided at our meeting next Monday, and it is hoped that all who possibly can will attend.

Clarence Angling Club, Red Lion Hotel, Harrow-road, Paddington, W.—Members will be pleased to hear that the committee have successfully arranged matters respecting the one and a-half mile stretch of water, where first-class all-round fishing is to be had; full particulars can be had of the secretary. Messrs. J. Shapcott; and G. A. Boughton had a very fair bag of chub, roach, and dace; and Mr. J. F. Dawson (president) showed a full bag at the club-house, weighing 32lb., of pike, roach, dace, and grayling, amongst which were thirteen dace, weighing 10lb.; and one roach, 1¼lb. Another new member was duly elected.—ALF. E. EVANS, sec.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 2nd and 3rd inst. Messrs. Parram, Hills, Wild, Towndrow, W. Richardson, Webber, Wright, Killick, W. Midson, Cogswell, and T. Midson had a very fine show of roach, perch, and dace. Members please attend on Tuesday next, as some important business will be brought forward.—S. MALBY, sec.

Duke of York Angling Society, Snow-hill, Dudley.—The annual contest took place on August 1, at Pershore, when thirty members sat down to fish, and the contest was of the usual two hours' duration. At the termination it was found that only nineteen had been successful in taking fish for weighing in. The first prize-taker came from quite an unexpected quarter, as it was thought that the first prize was at the mercy of the old veterans, Messrs. James Nicklin and Shaw; but they were doomed to disappointment, as the winner turned up in Mr. Harry Lane, the junior member, who never before had taken a rod in hand until the present occasion. Mr. James Nicklin was second, Mr. James Smith third, Mr. R. Ainsbury, fourth, Mr. J. Shaw fifth, Mr. W. Cannon, jun., sixth and last. The prizes are of a valuable kind, being composed of a marble timepiece, china tea service, fishing tackle, and other useful and ornamental articles. Mr. James Allen, of Birmingham, acted as referee. The weather was all that could be desired, and the whole of the members were greatly pleased with their outing. The prizes will be distributed on Monday, August 17.—W. KEIGHTLEY, hon. sec.

Earlsfield Angling Society, Half-way House, Earlsfield, S.W.—The two days' roving match fished on the 2nd and 3rd inst. was brought off successfully; every member who was out had fish. The winners are: Mr. Waterman, first, with 4lb. roach; Mr. Nazer, 2½lb., second (one perch, 1½lb.); and Mr. Fowler, 2¼lb.; Messrs. Bicknell, Thompson, Bird, Biederman and Rowsell also had fish. I am pleased to say that we have just received three additions to our prize list: Mr. Winkworth gives 10s. 6d. for the heaviest chub during the season; and Mr. Garlick, of Wimbledon Lake, gives 10s. 6d. for the gross weight during the season, jack barred; and 10s. 6d. for the heaviest jack over 6lb., both from his waters.—R. W. BIRD, hon. sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We had a poor show of fish for Bank Holiday, owing to the weather being so rough; about 18lb. of roach and dace and a nice tench, taken by Messrs. Lawrence, Hall, Ellis, Riggs, Ballard, &c.—A. PAYNE, sec.

Grange Angling Society. — The majority of the members have been away fishing during the holidays to various noted fishing resorts. Among the most successful were Messrs. J. H. Rich, Tagg, Ryder, Green, W. Rich, and F. W. Croker.—W. K.

Great Eastern Angling Society, Castle Inn, Leyton-road, Stratford New Town.—Since my last report, the following gentlemen weighed in fish: On July 26, Mr. F. Bates, 9½lb. roach, 14oz. perch and bream; Mr. Grande, roach. On August 3, Mr. W. Burling. 1lb. 2½oz. roach; Mr. F. Bates, 5lb. 15oz. roach and 1lb. 11oz. bream. Members please to note that our match on the 16th will take place at Hatfield Peveril, and not at Cheshunt, as stated.—G. WEAVER, sec.

Great Yarmouth Piscatorials.—The fourth match was fished at Fritton on the 30th July. Twenty-two competed for the four prizes offered, with the following result: First, Mr. A. E. Bond, 21lb. 3oz.; second, Mr. W. Lowne, 19lb. 10oz.; third, Mr. W. E. Sacret, 13lb. 2oz.; and fourth, Mr. Harrison, 11lb. 11oz. The gross weight taken by thirteen competitors who weighed in amounted to 112lb. 11oz. The above is very creditable, the more so as it rained in torrents for about four hours during the day. Mr. H. R. Atkins, the umpire appointed, carried out his duties in a most satisfactory manner. The next match takes place at Acle, on the 13th inst.—WILLIAM KIRBY, hon. sec.

Gresham Angling Society.—There was no meeting last Tuesday. Next Tuesday, the 11th, there will be a paper on "Sea Fishing," by Mr. A. W. Parker, the hon. treasurer, and on Tuesday, the 18th, a sea fishing competition for prizes.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 2nd inst., a number of our members were out, nearly the whole of them being rewarded for their trouble and sport, the following bringing up their shows: Russell, roach; Ford, bream and roach; A. Fish, bream and roach; Walford, bream and roach; Pleydell, roach; Braham, jun., roach and rudd; C. Levoir, roach; Wells, roach; Bagshaw, jun., perch; Bastick, roach; and Bagshaw, sen., roach.—W. FENNER, sec.

Hoxton Brothers Angling Society.—The annual dinner at the Rye House on July 26 was a great success, and gave general satisfaction. A few members were out on the 2nd inst. G. H. Wood weighed in perch and roach; F. Gardner, roach; and J. Row had a nice show of jack, one scaling over 7lb. The annual distribution of prizes will take place on Tuesday evening, August 11. Members will oblige by sending in not later than Monday.—R. GHURNEY, sec.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street, W.—Several members took advantage of the holidays to go a-fishing, and the following weighed in: Messrs. Pope, bream; Pocock, roach; F. Pain, roach; Liversage, jack and rudd. Our visit on the C. D. V. L. takes place on Wednesday, the 19th inst., and I am pleased to say that Mr. Harding, who will be accompanied by "Old Izaak," will give us a reading on that occasion. I trust that anglers will rally round us in our new quarters, and show the two gentlemen how we appreciate their kindness in trying to amuse us. Mr. Sykes has to be made a member this week.—SNAP.

Islington Brothers Angling Society, Myddelton Arms, Canonbury-road.—The following weighed in on the 2nd and 3rd inst: W. Stretch, 5lb. 13oz. of bream, roach, dace, and one very nice perch. Mr. Holder also had some very nice roach. Other members were out, but had no sport.—J. H. HERBERT, sec.

Izaak Walton Angling Society.—There are five special prizes to be competed for on the 9th inst. Competitors may choose their own fishing waters. No competitor to leave London before five a.m. on the day of the competition. The next return visit (No. 1 Eastern District) will be to this society on Monday, the 17th inst.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—On the 2nd inst. we had a fair show of fish, consisting of bream and roach, by the Brothers Challen; perch by Mr. Onree; roach and tench, by Messrs. Beales and Ide; tench by Mr. Warner; jack and roach, by Mr. Wheeler; and roach by Mr. Tomkins. One of our members unfortunately left his overcoat and black leather bag in the train at Slough Station. As there were other anglers in the train who went farther on, perhaps they might know something about it; if so, will they kindly communicate to me at the club-house.—A. IDE, sec.

Junior Piscatorial Society, New Cross Inn, New Cross-road, S.E.—Since the opening of our season, which commenced July 1, the most notable take has been that by Mr. A. Dandridge, who fishing at Tring, had over 70lb. of roach, rudd, perch, and tench in one day, nearly all of which were returned, among those brought home were six specimens—viz.: Four tench, the heaviest weighing over 4lb.; one rudd, 2lb.; and one roach, 2lb. On Bank Holiday, Messrs. J. W. Freeman, and A. J. Slatter, had some good roach from Rudgwich; and Mr. W. W. Connerford, perch and chub, from Godalming; the heaviest chub weighing 2lb. 15oz.—W. W. C.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—At the committee meeting held on Friday, the 31st ult., three new members were elected, bringing our total numbers up to a hundred and twelve. Some grand shows of bream, barbel, roach, dace, and gudgeon have been weighed in by Messrs. Mason, Newcombe, Carter and Master.—T. SALTER.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pontonville-road.—On the 2nd inst., a good many members were out, the following showing some nice fish; Messrs. Arnell and Holmes, carp; Messrs. Nelson, Johnson, More, and White, some good roach and dace. On August 23 we fish for four half-guineas in the Central water at Pulborough, when I hope to see a good muster of members turn out.—W. WATLING, sec.

Liverpool Angling Association. — Our outing on Bank Holiday to the Vyrnwy was again spoiled by the clerk of the weather. In the morning it rained persistently for hours, and those who journeyed to Llanymynech the same morning had a thorough soaking by the time the landing stage was reached—a nice start! During the day heavy showers of rain were pretty frequent, and it was almost certain thunder was in the air. However, the day was got through somehow, and at 6.30 the weighing in was brought off. Some fair takes considering all things were shown, though blanks were much too numerous. In the trout class Mr. Jeffreys was again first, having taken seven very good trout with the artificial spiral minnow, the largest weighing 1lb. 3oz. In the coarse fish class Mr. Baker was once more first; Mr. Houghton, second; and Mr. Bennett, third. The day was brought to a close with a good dinner at the Lion, Mrs. Roberts catering well. The return journey will, I should think, never be forgotten, the G.W. Railway apparently had made no effort to keep time, and landed their passengers at one a.m. instead of 10.25 p.m. What price this?—RD. WOOLFALL.

Liverpool East End Friendly Angling Association, 150, West Derby-road, Liverpool.—We had a fair muster of members at our match, which took place at the Vyrnwy, Llanymynech, on August 4, for three prizes. First prize, won by Mr. J. Hitchcock, with 4l¼b. of fish, consisting of perch, roach, and chub; one perch was weighed in for specimen prize, which weighed 1lb. 7½oz.; second prize, won by Mr. T. C. Segar, with 1lb. 12oz.; one fish weighed in for specimen prize, a chub, 1lb. 7½oz.; third prize was won by Mr. J. Nolan, with perch. No fish in this match weighed in for prizes under 4oz. The general cry of all anglers was, too much rain, which continued almost all day. I hope members will turn up at our next meeting, as we have some particular business to go through.—T. C. SEGAR, sec.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On the 2nd and 3rd inst. there were some good shows of bream, roach, chub, and dace, by

Messrs. Penfold, Taylor, W. Pearce, Milburn, Gray, A. Clark, Sansom, and J. Clark, one of the bream by Mr. Taylor weighing 4lb. 4oz. I wish to remind brother anglers that our chairman, Mr. E. Clark, has received the photos of the Langley Competition, which can be seen at the above house every Sunday and Wednesday.—W. F. PEARCE.

New Albion Piscatorials, Duke of Kent, Old Kent-road.—The Bank Holiday fishing competition produced a fine show of fish, notwithstanding that several of the members who were known to have "gone a-fishing" did not turn up to weigh through being delayed on the railway. Mr. Newbury took the first prize (£1 1s.) with 22lb. 15oz. of barbel from the Thames; Mr. Mudd, being second, and taking 10s. 6d. with some fine roach and dace; Mr. Grimmett sent up a beautiful basket of jack, trout, roach, and dace from the pine country; whilst Messrs. Baldwin and Watts exhibited a really splendid show of eastern county dace and roach. Quite 60lb. of fish were to be seen on the trays, amongst them roach of 1¼lb. and dace of 9oz. On Wednesday Mr. Grimmett weighed in 25lb. of roach and dace, two best roach going 2¾lb. They came from the "old spot."—A. E. BALDWIN, sec.

North Lambeth Angling Society, 108, Westminster Bridge-road, S.E.—Several of our members were out on the 2nd and 3rd inst., but little was weighed in. Mr. E. Rowles was the fortunate winner of the dace prize for the month of July.—F. WALLIS, sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park, N.W.—July 30, Mr. Schultz, junior, roach and dace. August 2, Messrs. Baganot, dace; Goodman, a fine perch and roach; Plumpton, tench. 3rd inst., Messrs. Schultz, senior, perch: Schultz, junior, dace; Grindley, roach and bream; and Plumptons, senior and junior, also had fish but did not weigh in. Next Thursday, the 13th, is quarterly night.—G. SCHULTZ.

Odds and Evens Angling Society, King of Prussia, Bevenden-street, Hoxton.—Several of our members were out on the 2nd inst., and the following weighed in: Mr. T. Forster, bream, roach, dace and gudgeon; Mr. Bygrave, senr., roach; Mr. Bygrave, junr., perch. Messrs. Neville and Harrison arrived back too late to weigh in.—J. CUTHBERT, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—The next series of prizes will be fished for on August 16, open match. Members can leave town on Saturday. Mr. Luft has been duly elected a working member of this society. The Anglers' Association Southern District visit will take place on the 24th inst., when I hope we shall have a good muster of angling friends. Mr. Bonsall was elected as chairman for the remainder of the quarter in place of Mr. Parsons.

Phœnix Angling Society, the Crown, Old St., Pancras-road, N.W.—On Monday last we had a very nice show of fish. The five prizes were won, Mr. Elbourn taking first honours with 15lb. of bream; Mr. Frank Dove, second; Mr. Charles, third; Mr. Brown, fourth; Mr. Haman, fifth; all with good trays of fish. Messrs. Marcs, Reed, Heelas, Foster, and Raymond, also weighing in.—W. ELBOURN, sec.

Prince of Wales Angling Society, the Globe, Lisson-grove.—Sport was very tame through the holidays. Only the following weighed in: Messrs. Crowley, F. Reed, Brett, Scott, Gibson, Hutchins, Axworthy, and Robbins. Mr. Bungey was elected a honorary member of the above. There is still a prize left to be fished for in the Slough Canal; one rod only, jack barred.—W. B.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—Since our last report we have to regret the death of one of our members, Mr. Henry Hewitt, after a long and painful illness, leaving a wife and children to deplore his loss. On the 2nd inst. several members were out, but owing to the holidays only Mr. Webber weighed in, with a handsome show of roach from the Upper Thames of 14lb. 6oz., and all fine fish. Mr. Galloway and Mr. Joseph Phillips were duly elected fishing members of the society. It was proposed and seconded that we have an outing on August 16th, at Cookham, from Cookham Bridge to Bourne End Bridge; tow-path, and one rod only.—F. C. LANGLAND, sec.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On August 2 we had some nice shows of fish by the following members: Messrs. F. Barclay, F. Barrow, J. Yeo, A. Barclay, Denyer, E. Perry, Parsley, G. Barclay, J. Holden, J. Stanley, Henson, and Sallnow; total, 44lb. 1oz. On the 3rd inst., the following members also weighed fish: Messrs. Stanley, Cox, Henson, Parsley, J. Holden, Wells, A. Barclay, Sallnow, F. Barclay, J. Yeo, G. Yeo, and Perry; total, 35lb. 8¼oz. On August 4, Messrs. Barrow, 9lb. 6oz. roach; and Bloomfield, 2lb. 10oz., roach. Members, please note that the prize for gross weight of dace, given by Mr. F. Barclay, will be fished for on August 9; any water.—A. BARCLAY, sec.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—On Bank Holiday, Messrs. G. Brocken and G. Ballinger had some trays of very good roach; others were out, but did not weigh in. J. Wright had some good eels, largest 1lb. 11½oz.—J. WRIGHT, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—Several members have been out during the holidays with the following result: On the 2nd Messrs. C. Holmes had four crucian carp, weighing 3lb. 5¾oz., one fish 14½oz.; E. Wright, roach and gudgeon. On the 3rd, Messrs. E. Bacon, perch; J. Petrie, roach and dace, 4lb, 12½oz. (one roach 1lb.); Mr. W. North had a very nice tray of roach, chub, and dace, 17lb. 6oz. (one roach 1lb. ¼oz.). On Tuesday last we had a very poor muster of members present. I hope members will turn up better next Tuesday for some urgent business. We have still a few vacancies for working or honorary members.—S. E. CANE, sec.

Shepherds' Bush Angling Association, Bush Hotel, Shepherds' Bush-green, W.—Many of our members were out during the holidays the most noteworthy take being 39½lb. of fine chub, caught by Mr. W. C. Parkhurst. Several of the fish were over 3lb., the largest going 3lb. 8oz.; good weight.—CRYSTAL HOOK.

Silver Trout Angling Society, Bedford Head, Maiden-lane, Covent-garden.—On the 2nd instant, Mr. O'Callaghan weighed in between 40lb. and 50lb. of bream; Mr. Massey also had bream. On Bank Holiday, a great many of our members were out, but only one weighed in, Mr. Smales, having between 30lb. and 40lb. of bream. On Tuesday, Mr. Phillips brought up about 10lb. of fish, one tench over 2lb., one perch just on 2lb., and the remainder bream. For our outing on the 9th instant, at Hatfield Peveril (for Little Baddox), the members go down by the train leaving Liverpool-street Station at twelve o'clock Saturday night, but members can go down on the following morning. The committee will please to meet on Tuesday evening next, at eight p.m.—PELICAN.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—The members weighing in fish, on July 26, were Mr. Jones, with a nice show of bream and roach; Mr. Brown, rudd; Mr. Taylor, rudd; Mr. McQuinn, bream; H. Spenceley, roach and dace; R. Spenceley, chub and dace. We had a fine show of fish on August 2nd, by the following members:—Mr. Hooper, bream and roach, one splendid roach scaling 2lb. 1½oz.; Mr. Barbet, bream; Mr. D. Marks, roach; Mr. Polykett, roach; Mr. Brown, rudd; Mr. Taylor, rudd; Mr. Wells, roach.—R. SPENCELEY, sec.

South Belgravia Angling Society, Duke of Clarence, Horseferry-road, Westminster, S.W.—We had a nice show of fish on Monday night, Mr. Phillips weighing in some nice roach from Reading. Gentlemen wishing to join should hurry up to be in time to fish in this month's competition.—F. TAYLOR.

South London Angling Society, George and Dragon, 235, Camberwell-road.—Since last report Mr. Marsh weighed in a fine roach of 1lb. 7oz.: Mr. Frei, one day, 11lb. of good roach, and a further 6lb., largest fish 17oz. Next Wednesday we fish for three prizes, on which day subscriptions must be paid up.

South London United Anglers' Visiting List.—The next visit on the above list will be paid to the St. George's Angling Society, held at the Prince of Wales', St. George's-road, Peckham, on the 10th inst. As this society is always represented at every visit in the south of London, I trust the other societies will return the compliment and give them a bumper. On the occasion of this visit the two prizes won in the late competition at Amberley, but not presented, will be handed over to the fortunate winners—viz., a marble timepiece, given by Mr. Renvoize, of the St. Thomas's A.S., and won by G. Mumford: and a prize, value half guinea, by Mr. G. George, of the Second Surrey, for the largest roach, won by A. Gordon.—A. CONN, sec.

Stepney Angling Society, Beehive, Rhodeswell-road, Stepney.—On the 2nd inst. only three of our people turned up to weigh in; they were most of them stopping out for the holiday. Messrs. Ruston, roach and bream; West and Hornblower, bream.—E. N. P., hon. sec.

St. George's Angling Society, Prince of Wales, St. George's-road, Peckham.—The next visit on the S.L.U.A.V.L. takes place at the above address on Monday, August 10, when the prizes won in the late tournament at Amberley will be presented by the donors. We have a very large room and we hope to see it full on this occasion. Mr. Lang will take the chair, and Mr. Tozer, of the Peckham Brothers, the vice-chair.—G. ETHERINGTON, sec.

St. Helen's Angling Association.—A strong contingent of the members of the St. Helen's Angling Association went on August 3 to Rosset, which is seven miles beyond Chester, to hold a fishing contest at the river Allyn, close to the river Dee. The excursion train arrived at Chester at 8.15 a.m., and the members were conveyed in three waggonettes to Rosset, where, soon after 9.30, they were busily engaged in landing trout, dace, roach, &c., and when the contest closed at seven p.m., the fish were weighed in at the Red Lion Hotel, the first prize being claimed by Mr. Chatterton, with a nice basket of fish; second, Mr. W. Burrows; third, Mr. Jas. Eden, being closely followed by Mr. H. M. Greer and Mr. P. Ball. The ride back to Chester was scarcely enjoyable, rain coming down in torrents all the way; but it was a consolation to think that all the members caught fish, not one going home water-beaten. The prizes were—first prize, a splendid set of carvers, given by Mr. J. P. Morris, and 7s. 6d. added by Mr. Durie; second, a copper kettle, given by Mr. Ormandy, and 5s. added by Mr. Sturgiess; third, a splendid silk muffler, given by Mr. Jesse Saxon, and 2s. 6d. added.—JNO. WOODS, hon. sec.

United Brothers, Deptford.—Several members of the above has been out during the holidays, and have had some very fair sport. On Saturday Mr. G. Fordham, chub, and H. Fordham, roach and dace. On the 2nd inst. W. Tyler, roach and bream; B. Champion, bream; H. Richards and F. Penton, roach. On Monday, F. Beak, roach and bream; B. Champion, roach and bream; F. Penton, roach; H. Richards, roach. The members of the above will fish their next match on the 16th in the Medway for several money prizes.—H. TYLER.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—The match that was postponed will take place on the 16th, same place and conditions. Our trays were well filled on the 2nd instant, the following weighed in:—Messrs. Russ, dace; Morring, bream and roach; Skinner, dace and gudgeon; Clegg, roach. On the 4th inst., Messrs. A. Fry and Petty, jack; Ilsley, roach and dace.—H. C., hon sec.

Walworth Waltonians.—On August 5, Mr. W. J. Crisp and Mr. Combes weighed two fine shows of tench, the largest fish being 3lb. 12oz. I should be glad to see all brother members in their places at the important meeting to take place on the 12th inst.—C. HIBBLE, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—On the 2nd inst. one of our honorary members, Mr. C. Newbury, showed 23½lb. of barbel, and Mr. W. Gordon weighed in 4lb. 15oz. of roach, R. J. Dartnall, 4lb. 12oz. roach and dace. The August competition will take place on the 9th inst., from Twickenham Ferry to Teddington Lock, towing-path only; all fish to weigh; all members to go down by eight o'clock Waterloo, 8.5 Vauxhall; show fish at the White Swan at 8.15 p.m.—R. J. DARTNALL, sec.

Wenlock Angling Society, Clothworkers' Arms, Arlington-street, New North-road.—We had a fine show of fish on the 2nd inst. Messrs. C. Deccert, roach and dace, largest fish, 1lb. 8¾oz.; Parslow, roach; Casey, bream. We have a competition on the 9th at Amberley; all to go by morning train. The next return visit on the Central Association will take place at the above society on Wednesday, August 12. This being our first visit on the Central, I hope we shall have a good muster.—W. M., sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Our members were out on the 2nd and 3rd inst., and the following members weighed in: Mr. J. Newton, 4lb. 3oz. of rudd; Mr. C. Brekell, 6lb. 12½oz. rudd; Mr. C. W. Maxted, one rudd, 1lb. 4½oz., being a very pretty specimen.—R. LOWTHER, sec.

West London Angling Club, Dartmouth Castle, Hammersmith.—Mr. Gooch, one of our new members has had the fortunate capture of an extraordinary specimen dace, weighing 1lb. 4oz., measuring extreme length, 11¾in. This grand fish is now being set up for exhibition, and was taken in the Thames at Sunbury. Elsmore weighed in 54lb. bream, being one day's catch, from the river Ant navigation, Norfolk, also several rudd, roach, and perch. We have a new member for election at our next meeting.

Woolwich Brothers Angling Society, Green Man, High-street, Plumstead.—On the 1st inst. Mr. Brinbon weighed in 7lb. 12oz. of roach from private water; W. Stevenson, J. Hicks, G. Starling, and J. Howcroft also weighed in bream, roach, and dace. I beg to remind members that a meeting takes place on the 12th inst. for the purpose of making final arrangements for the general outing on 16th inst.—J. R. HOWCROFT, sec.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly meeting of this society was held on Wednesday, 5th inst. Another new member was proposed for election at the next meeting. Messrs. Hayward and Richardson had good sport among the gudgeon, at Sunbury, on Bank Holiday.—H. RICHARDSON, hon. sec.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

REPORTS FROM RIVERS, LOCHS, &c.

☞ *River Reporters who want forms and envelopes should send a post card to the Manager of the* FISHING GAZETTE, *St. Dunstan's House, Fetter-lane, London.*

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add	30 min. for Chelsea.		Add	55 min. for Kew.	
	40 ,, ,, Putney.			75 ,, ,, Richmond.	
	45 ,, ,, Hammersmith.			80 ,, ,, Twickenham.	
	50 ,, ,, Barnes.			85 ,, ,, Teddington.	

EXAMPLE:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

TIME OF HIGH WATER AT LONDON BRIDGE.

English and Welsh Reports.

The Lower Thames.—GENERAL REMARKS.—It appears from the official reply of the head river-keeper of the Thames Conservancy, who is both intelligent and practical, the destruction of fish in the tideway does not arise from local causes, and is best explained in his own words: "In reply to your letter relative to the destruction of fish, I have myself made inquiry of the fishermen, and it is their opinion, as well as my own, that the water is so bad below that when the spring tides are running the fish cannot get up out of the bad water. If the storms continue, and the tides run heavy about the middle of this week, I fear we shall see the same thing again. I have been through the district every day this week at low water on the neap tides, and have not seen any dead fish. Anyone who could make it convenient to be near Charing Cross at that time, they would see the state of the water, the tide will then be flowing fast." If these sickly fish are brought up from below and die in the neighbourhood of Kew and Richmond, then the stock in the latter district would not be affected by the impurity lower down, as the filth of the water would become reduced and more free from anything like a poisonous agent. The late heavy rains should make some alteration in the river, as it has been very low and the water bright for some time, but previous to any change there has been some capital takes of barbel at Sunbury and Staines, as will be seen from the reports. Those fish came on very well at the commencement of the season at Hampton Court, and but little has been heard of them since. They are always peculiar in this respect, and I have known them to lay at the bed of the river like a parcel of stones, and nothing would move them. That excellent angler and friend of the river, Mr. A. J. Little, was always to the front in the matter of barbel catching, and I should like to hear of him amongst them again, but I am afraid he has given fishing up. There is another good name connected with piscatorial triumphs with the barbel and bream, I mean Mr. M. H. Blamey, whose name is now seldom or ever heard in connection with angling exploits.—B.

RICHMOND.—H. Mansell, in three and a-half days, 42lb. of fine roach and dace; H. Howard, in four days, twenty-eight dozen; and Job Brain, 40lb.

TWICKENHAM.—C. Annesey, in two days, 30lb. of roach and dace and one barbel; C. Brown, in one day, twelve dozen; S. Cole, in three days, thirty dozen; J. Coxen, in three and a-half days, 40lb.; R. Coxen, in two days, 16lb.; George Coxen, in two and a-half days, 33lb., and three barbel; J. Dunn, in two days, five dozen and two barbel; J. Frost, in four and a-half days, 47lb. and three bream; R. Moffatt, in four days, thirty-two dozen and two bream; J. Spong, in four days, 40lb.; F. Wiggins, in two days, 24lb.

TEDDINGTON.—Joseph Baldwin, in three days, twelve dozen of roach and dace, one jack, and three barbel; B. Stevens, during the week, twenty dozen of fine roach and dace, sixteen barbel, largest 10½lb., and three jack.

KINGSTON.—N. Bolton, in two and a-half days, fifteen dozen of roach and dace and two bream; J. Wilkes, during the week, twenty-five dozen of roach and dace, five dozen of gudgeon, two bream, three jack, and a couple of barbel; J. Knight, in three and a-half days, twenty-one dozen of roach and dace and five barbel; John Johnson, during the week, twenty-eight dozen of roach and dace and twelve barbel.

SUNBURY.—Mr. Bolt, during the week, has taken seventy barbel and a fine lot of roach and dace; E. Milbourne has landed five brace of jack and a perch of 1¾lb.; Mr. Lukyn has caught thirty barbel, the largest 6½lb.; J. Lock, in two days, has taken seventeen dozen of roach and dace and a barbel of 3½lb.; Mr. Sanders got a bream of 4½lb. The punts of Messrs. T. and A. Stroud have been doing well with barbel, roach, dace and chub. A fine trout of 5¼lb. has been caught in the back water at Hampton Court.

WEYBRIDGE.—Herbert Curr, one day with Mr. Noel, 60lb. weight of bream, the largest 5½lb., and another day six dozen of roach; with Mr. Leaf, one day, nine dozen of gudgeon, and another day three jack, which were returned, and a perch of 1¼lb.; and with Mr. Bowers, one day, nine dozen of roach and three perch, the latter together weighing 4lb.

CHERTSEY.—Mr. C. Wastell, fishing with John Poulter, has taken fifty-six dozen of roach and dace, the greater portion being put back again; and another day, with Mr. Benford, six jack and one brace of perch, five of the jack were returned.

LALEHAM.—Alfred Harris writes: "I have not been doing much fishing this season. I had two days with Mr. Birt. the first day he got twenty barbel, and the second day twenty-two; another day, with Mr. Mitchell, who caught ten barbel; and another day with Mr. Miller, who caught twenty-nine barbel."

STAINES.—John Keene, jun., has been well employed during the week; one day with Mr. Edwards and his son, who together caught 40lb. weight of roach and barbel; two days with Mr. Newbury, who on the first day secured twenty-three barbel, and on the second day nineteen, the largest 3½lb.; and another day with Mr. Forman, of Hammersmith, who got twenty barbel, the largest 3lb.

Upper Thames.—The recent rains have put a lot of go in the upper reaches of the Thames, but the water is very little heightened or coloured. Excellent sport is now being had amid roach, chub, gudgeon, and jack, and anglers fond of Thames work could not do better than take advantage of the present exceptionable condition of the river.—MARLOW BUZZ.

Thames (Windsor).—The recent terrific rain storms here have had not the slightest effect on the river as regards colouring the water, which is still bright, but, of course, not stagnated as is usually the case this time of year. Sport has been good amongst all fish; even the trout have suffered, and a very handsome one of 9lb. fell a victim to the seductive lob-worm. Mr. G. Rowles, of Egham, was the captor. Many baskets of roach, chub, and barbel have been had; of the former, the veteran expert, Mr. G. Herd, of Egham, has thinned them out in the Clewer district, having had during his short stay two hundred and twenty-six, fishing only after four p.m. I am told it was a sight to see him play and eventually land a barbel of 2¼lb. which a friend with him had fouled in the dorsal fin, the hook being a fine drawn-gut "Mackenzie." Mr. Howlett, of Eton, has kept up his early morning score, having had during the week about sixteen dozen roach and dace before eight a.m. Mr. G. Smith and son, of Park-street, Windsor, on the 4th inst., after four p.m. till 7.30 p.m., had five dozen roach and dace. Barbel have fed well. I watched the veteran, Joseph Butler, of Eton, land five in a very short time before breakfast. Messrs. Sellars and Sparrow, of London, with James Gray, on 3rd inst., had 25lb. Mr. Woodall, of the Friendly Anglers, London, in three hours had eleven barbel and one chub. Many other catches have been made amongst barbel. Chub have also fed well. Mr. T. Skelton, of Datchet, has had the best amongst these, having four weighing 9lb., largest, 4lb. Mr. Thomas, of the Christopher, Eton, also had a nice basket going 12lb. A few jack have been caught, but not very large, Mr. A. Walker, of Windsor, having a pretty fish of 3¾lb., but Mr. S. Rider, of The Limes, Church-end, Willesden, the largest, which weighed 7lb.; in addition, he had a basket of chub and gudgeon. This latter fish are to be caught now by raking, and will be found very amusing to ladies and children, though a salmon angler not long ago made the remark to me, "After salmon fishing, give me gudgeon." James Gray has brought in the handsomest barbel I have seen this season for colour and shape; it weighed 7½lb., and was caught whilst dace fishing with James Gray by Master H. Waterman, of Thames-street, Windsor, who must have displayed exceptional coolness and skill, considering the fineness and smallness of the hook used; in addition, a fine basket of some six dozen dace was secured. Cooper, of London, has the fish for preservation.—B. R. BAMBRIDGE.

Thames (Wraysbury).—Always a favourite resort of the Thames angler, Wraysbury and district were well patronised during the holidays, and, in spite of the bad weather, fair sport was encountered, especially in the case of punt anglers, several of whom made decent hauls of barbel. Heavy storms of thunder and lightning have prevailed here, and on Sunday rain fell in sheets. Prior to the storm, Mr. Newbury, of the New Albion Piscatorial Club, made, punt fishing, a basket of eighteen barbel and one and a-half brace of chub, the latter going about a pound and a-half each. Fishing again on Bank Holiday, he took 23lb. weight of barbel. In the mouth of one of these fish was a hook and gut. Nearest the hook the gut was of double strength, and had attached to it, crossways, a piece of match, designed, no doubt, to hold on the balls of groundbait. The tackle was evidently of local make, and, as it has been presented to me, I have relegated it to my museum of things fishy, from whence it shall be forthcoming should the rightful claimant come upon the scene. In the vicinity of the Bells of Ousely, on the 2nd, a fine jack of 10lb. was captured, and I am informed that no fewer than five different flights of hooks were found in its mouth. At the time of writing, the river was in good condition for all-round angling.—GOOSEQUILL.

Ancholme District.—A goodly number of anglers have been out both on the trout streams and Ancholme, but the holidays were marred by rain. On the trout becks, Messrs. John and Albert Ford, of London, had ten fish on Saturday, and Messrs. John and T. Ford, ten and thirteen respectively, on Tuesday. Croxby Lake has been well patronised of late, but the lakes have not as a rule been heavy. Messrs. R. Strout, of Cornwall, and T. Ford, had thirty-three perch, on Saturday, fishing from the boat. The lake is now fairly free from weeds, and yields a nice day's pleasure. The sport on the Ancholme owing to thunderstorms, has fallen off a little. The takes of the past week were mainly bream, running from 1lb. to 3½lb The best catches were as follows: Messrs. F. North, 9½lb.; J. Nene, 18lb.; T. Jacks, 5½lb.; T. White, 9½lb.; and another angler, 8lb. Mr. Hawkins had also 11lb. of roach and dace. The above were taken on single occasions.—THOMAS FORD.

Ant (Stalham, Norfolk).—Anglers sojourning in the Land of the Broads should not forget to pay a visit to the river Ant, which, in the neighbourhood of Stalham, holds any quantity of good fish. As an instance of some of the baskets which are likely to be made there, I may say that on Bank Holiday, Dr. Lavell and Mr. W. H. Ellsmore, who both hail from London, landed between them thirty-four bream, weighing 76lb., besides a few decent roach, rudd, and perch. The doctor also captured a splendid tench, weighing 3lb. 1oz.—GOOSEQUILL.

Arun (Pulborough).—The holiday anglers have been pretty busy on this river, but I am sorry to have to report that, owing to the extremely changeable weather, the anticipated good sport which seemed likely when I last wrote was denied them. At different periods rain has fallen heavily, and the river has been in flood, but the water has quickly run off again, and on the 2nd inst. when I visited the river it was looking in fairly good trim. In addition to the rainy weather very high winds have been experienced, whilst the nights have been exceedingly cold. Fish have fed very badly indeed; and anglers on the Central Association's water have experienced little or no sport. This is probably one of the best spots about here, although I have been somewhat struck lately in not seeing many fish "priming" or even swimming in the weed runs. Several other anglers have been similarly mystified, and everyone seems at a loss to account for this absence of fish life. Are there poachers about? There is one thing, they would not stand much chance on the week-days and Sundays, for the Association's river keepers, honorary and otherwise, are most vigilant, I myself being twice challenged on one day for my passport which I duly produced. On the 2nd inst.. an angler near the Swan Bridge lost a bream of about 3lb. through attempting to lift it bodily out of the water, the gut giving way about an inch from the hook. During the day one or two nice roach and dace were caught, but the weedy condition of the river is still a source of much annoyance to the disciples of Old Izaak. In September we look for better times.—GOOSEQUILL.

Barle (Dulverton).—The river is still in decent order, and the Quill and small Devon minnows kill well. The glass is rising. More salmon are running up, but the fishing associations below us give fish little chance of running up to the higher waters.—IRON BLUE.

Brighton.—SEA FISHING.—Boat angling is again to the fore, with the sea as calm as a mill-pond and a gentle breeze off-shore. Anglers prefer fishing off Black Rock, where you can either fish over the rocks for bream and pout, or over the sands for plaice; which, by the way, will soon be caught close in-shore, so near indeed that I intend trying a "throw-out line," as they do off the shingle at Portsmouth.—H.

Cambridgeshire, Norfolk, and Suffolk Rivers.—Notwithstanding the heavy rains and thunder and lightning, our anglers in the eastern counties have been hard at it, and from most all the rivers fairly good takes of roach have been made; up to Monday over fifty trout have been taken from the Lark, near Mildenhall, some of them over 6lb. each. The roach are feeding very well there now, also chub and perch. Plenty of good roach, perch and dace continue to be taken from the Little Ouse at Brandon, and I intend trying there myself. My friend, Mr. Rolph, tells me anglers are well satisfied with their sport there. Several of my angling friends have been having a try at Cantley, Buckenham, and Brundall, on the river Yare, and had capital sport amongst the bream, four stone per rod. Roach are a little better on now, and if we get any sort of weather anglers should have good sport from the Ely, Littleport, and Hilgay waters. Roach are not "well on" much better at Brand Creek, three miles from Littleport Station; there are some capital good bream and perch swims there, as well as big chub. As I have always said, the Littleport water is strictly autumn and winter fishing. I saw a nice lot of perch on the 5th from Upware, on the Cam. Were it not for the pollution, this would be a famous place for good fish. I still advise anglers to try the sharper waters, as the Ouse at Brandon, or the Lark at Mildenhall; bait with boiled wheat or gentles. Weather dull, and like rain. Wind north-west and cold.—WILLIAM HOWLETT.

Chichester and Sussex Rivers.—Notwithstanding the quantity of rain that has fallen the canal at Chichester is low and bright, and sport not equal to the record of a month since. A few good bream have been taken, none exceeding 2½lb., and roach up to 12oz. A few small tench, and perch, and eels, taken with dead bait, weighing 2½lb., are among the list of captures. Visitors to the Rother have met with fair success among the roach and gudgeon. Reports from the Arun are not so favourable. A few bream, roach, and dace, have been taken. The lower reaches of the Ouse in East Sussex, seem deserted by the large roach this season, and it is only from the upper portions of the river that good takes have been notified, one a basket of roach and chub, taken principally with gentles weighing 12½lb., contained roach up to 1lb. 1oz., and chub 2¾lb. Dace and roach have given sport in the tidal waters of the Adur; and at Littlehampton Harbour, mullet are feeding with rag worm as bait. At Southampton Waters and in the docks, good takes of mullet have been made, some fish weighing 2¾lb. The weather has been too treacherous for coast fishing.—GEORGE F. SALTER.

Douglas (Isle of Man).—The rivers for this time of year have been in better order and in worse—generally the latter. There are no sea trout up as yet, but the first spate is sure to fetch them, as they are jumping all round the bay; but they have not water to bring them up. Mr. Hindley, the hon. treasurer of the association, had a good eel last week of 3½lb.; length, 2ft. 3in.; girth, 7½in. How it was killed I will reserve for a fishing story. In any case, it was better out of our best trout water. Sea fishing could not be better with Brooks's (of Plymouth) Little Pet and Brown's (of Aberdeen) india-rubber bait; they will kill when the professional baits are at fault; of course, I mean fishing under way.—STORMY PETREL.

Dove and Tributaries.—Water is now in good condition, but there are very few anglers on the river. Weather also is all that could be wished, cloudy and not sultry. Two good takes are reported on the Henmore brook with the Fiery Bumble and March Brown.—D. and W. H. FOSTER.

Esk (Whitby, Yorkshire).—We have had some very heavy rains during the past few days, and as a consequence the river is considerably swollen. This has enabled very large numbers of salmon and salmon trout to get up into the smaller streams from the sea. The run of fish has indeed been very great, and, on the subsidence of the water, I anticipate excellent sport. The other day Mr. R. B. Johnston landed a fine salmon of 5lb. to 6lb., and Mr. J. H. Keighley, Mr. Jackson, and a few others were equally successful. On Tuesday and Wednesday the stream got into fair trim for fishing, and the following anglers had some good sport: Mr. D. Green landed two salmon trout, weighing 3lb. and 4lb. respectively; Mr. W. Jackson, three, of 2lb., 3lb., and 3lb.; Mr. J. Mann, one of 5lb.; Mr. George Tonkiss, one of 6lb.; Mr. J. Keighley, one of 11lb.; Mr. R. B. L. Johnston, one of 10¾lb.; Mr. C. J. Keighley, two of 10lb. and 4lb.; and Mr. Ward, one of 13lb.—J. J. JACKSON.

Fen Waters (South Lincolnshire).—The visitors have only had but a showery time of it for the holidays, but, on the whole, anglers are said to have done fairly well. Many of the drains are now being freed from weeds, the cutting operations having of late made good progress. Roach are not yet biting satisfactorily, but they are improving. The best sport has been among perch, some good fish having been killed about the Billingborough district. A nice lot of bream have been caught on the border waters and are said to be in good condition.—LIMPET.

Idle (North Notts).—Angling in the upper portion of the Idle has been somewhat neglected this week, the Worksop Club and others having visited distant waters to fish an annual contest. There have been a few visitors, but the weather has been stormy and unsettled, and they have had only moderate luck. On the lower lengths and the Byearrs and other dykes there have been visitors, but some of these want the weeds cutting badly. Roach, dace, perch, and odd pike have come to hand.—L.

Lea and Stort.—The late rains have not caused anything in the shape of a flood, but have had a good effect in freshening up the rivers and making the water a much better colour than it has been for some time, consequently fishing all round has shown a marked improvement. On the Bank Holiday a great number of anglers were out, and most of them seemed to be satisfied with the sport. As I expected, many jack have been taken since the opening, but they have, as a rule, run small. On August 2 I saw some nice perch and jack that had been taken at Waltham Abbey. Mr. Summers, of the Eagle Angling Society, has had some nice perch from the Cheshunt district, his best one scaling 2lb. 3oz. At Enfield Lock, a gentleman had amongst others a nice perch of 1½lb. Ponder's End.—Chub have been fairly on the feed here. Mr. George Hollingbery, junior, of the Railway Tavern, has had some good specimens; he is always pleased to give brother anglers any information and assistance. Cook's Ferry.—Fair sport amongst the roach and dace has been had. Games's Fishery.—Some nice perch have again been taken. Ferry Boat, Tottenham.—An immense quantity of anglers have paid this fishery a visit, and sport has been fairly good. Next week when the water from the Navigation Canal is drawn off, the old river is certain to produce good sport. The most important piece of news I have to communicate is the capture of a net of about 15yds. in length. On Saturday morning, August 1, Mr. Games, of the Higham Hill Fishery, surprised two poachers very busy. The men managed to escape, but he secured the net, which to all appearance is a very likely instrument to clear out every fish, big or little, from any part of the Lea. This occurred on the unprotected length at Cook's Ferry. It appears a pity that this should be the case, as the fishery rights can be rented at a very small cost. Mr. Hadtkiss, of the Edmonton and Tottenham Angling Society, had some nice fish from the Harlow district of the river Stort. Friday, weather still unsettled, but water in good condition.—SPLICED JOINT.

Leicester.—The Bank Holiday anglers at Leicester were rather disappointed by the showers which commenced falling very early on Monday. Fortunately by midday a welcome change came o'er the scene, and one and all were thankful for small mercies. The waters near the town belonging to the local society, received a very large share of attention, some hundreds of anglers lining the banks from the north end of the town up to Aylerstone village, whilst the Abbey Park river was simply crowded. The best known resorts, reached by means of the Midland and Great Northern Railways, have this week proved very attractive, the bookings of holiday anglers being this year larger than ever. Sport has not been of a very encouraging kind. Capital baskets of roach have, however, been landed from the canal and back waters at Aylestone, a few of the more fortunate anglers being Messrs. A. Bachus, Machin, Rabbit, Manship, Tinsley, Thompson, Iliff, and J. Hobbs. The best specimens that came under my notice were a roach 1lb. 4oz., and a perch 1lb. 8oz. The weather throughout the week was very changeable.

Lugg and Arrow (Leominster).—Both these streams are now improved since the heavy fall of rain at the beginning of the week, and are in order for either fly or wasp grub fishing. There are plenty of flies on the water, but the fish come shy at them until evening, when they sport better. A good few anglers have been out, and good sport has been had with the wasp grub. The Pinsley is in fishing order. Sport quiet in it at present.—GWYNNE.

Lugg, Arrow, and Pinsley (Kingsland).—Rivers remain low and clear. On Saturday some fair sport was had. Since, the changeable, stormy weather, with more or less tempest each day, has marred all chances of making good baskets. Flies remain same as named last week. A few good grayling have been taken with the Grasshopper (sink and draw). Till the weather settles there will not be much sport.—R. T. WILLIAMS.

Medway (Maidstone).—In spite of the enormous quantity of rain that has fallen during the last ten days, the water is in good fishing condition, but the unsettled weather has prevented many fish being taken. Some few anglers have been taking a few roach and bream. I tried them myself at Yalding and Wateringbury, but the attempt with me was in vain—I could not get the roach on. Unless we have more settled weather, the prospects are not good for the angler. The succession of thunderstorms, in my opinion, prevent sport. Trust in my next to report a more satisfactory state of things.—W. SHRUBSOLE.

Medway (Tonbridge).—Water good and fish well on the feed, especially bream and roach. Chub rise well at a fly, and altogether prospects are very favourable.—YE MEDWAY WATER RAT.

Nene (Northamptonshire).—We have had rain every day since my last report, and the river has swollen a little in consequence. Many anglers have been out along the river between Peterborough and Oundle, and some good takes are reported. An unusually fine pike was recently caught in water called the lake at Crowland. Mr. Thos. Ullyat was the lucky angler. The hook, a small one, was baited with roach, and the line was a very light one; consequently great care and judgment had to be used in landing the prize, which turned out to be a well-conditioned specimen, measuring over 3ft. in length and weighed 10lb. It is seldom I have an opportunity of recording a capture like this from the Wash waters. At Peterborough town bridge some fine bream were taken by Mr. C. Wright, several scaling 3lb. On Bank Holiday some good takes were obtained. Mr. J. Rowell got about thirty roach, largest ¾lb.; Mr. McKerrow, twenty-five eels and perch. This is the first catch of perch in the neighbourhood and were good specimens. Mr. J. Anker, a few miscellaneous fish; and a party of three obtained thirty roach and dace. Roach, as a rule, seem small, not many reaching ½lb. At Elton sport has not been up to the average this season, Mr. Head Constable Lawson, Mr. Woolfe, &c., having had rather disappointing "catches."—NENEBANK.

Ouse (Brandon, Norfolk).—Writing from Brandon, farmers are still grumbling as to the weather. I am myself waiting a full week in this neighbourhood for sport; but at time of writing no hay carting, and that means no great catches of fish. Just seen the stationmaster, lower down-stream. Two gentlemen weighed in 92lb. weight of roach, &c., the landlord of Ram Hotel has just told me. We have the swims, the fish; but he does not want to see an angler on speculation as to weather. —JOHN GEORGE.

Ouse (Huntingdon).—Both roach and bream are feeding well, and sport is good. A great quantity has been taken during the week with wheat and brandlings; and there is prospects of sport being good for some time, for the water is in the pink of condition. Bream are feeding best in the day-time, which has not been known for some years and taking a very small bait on fine tackle. Some are trying morning and evening with bad results, they not feeding very free.—H. Rout.

Ouse (St. Neots).—Fish have been feeding lately, and some capital perch, roach, chub, and bream have been taken. A short time ago two local gentlemen, in three consecutive evenings, landed over five hundred fish, principally roach and bream.—N.

Ouse, &c. (York).—We are now having rather too much of a good thing. The heavy rains are quite putting rivers and streams much out of angling tune about here. The Bank Holiday bottom fishermen have done fairly well, but up to to-day (Wednesday) heavy rains and thunder have sadly interfered with sport. In my last report I inadvertently used the word "barbel," which should have appeared "bream," in my reference to angling in the Ouse. —Ronald.

Penzance (Cornwall).—Sea fishing.—Sport in the bay is excellent just now, and boat anglers are making good catches of mackerel (chiefly by "whiffing"). The weather is all that could be desired, and there are many visitors here enjoying the sea fishing. Mr. Richard Pollard, of Church-street, Newlyn, is a first-rate man to go with, and he thoroughly understands the best fishing grounds, &c.—H.

Scarborough.—(Sea Fishing).—Excellent sport is now being had by boat anglers in the bay with whiting and garnard, which are now very abundant. Small plaice and sand-dabs are also very plentiful. Mackerel have not come in yet, but are expected daily. Pier anglers are having good sport with billet, and par continue very plentiful.—H.

Severn and Lower Teme (Worcester).—The water in both rivers low and clear, and very few fish to be seen on he top of the water, therefore but few fish have been taken with the fly. Best killing flies have been Blue Dun, Whirling Blue, Red Palmer, and Zulu. There has been some good takes of trout and grayling made with the maggot, also chub and dace, but the roach are very shy, and but few taken. Eels are taking the Wasp Grub freely.

Severn (Shrewsbury).—The rainfalls which we have experienced almost daily of late, and which have been accompanied by heavy thunder, have made anglers rejoice, for the river and brooks are now in far better condition than they have been for months. A few trout have been caught, but none of any great weight; but rough fishing continues good, both with the fly and on the bottom. Eels have been running pretty freely, and the absence of trout from the fords has been accounted for in a great measure by their presence.—Piscator.

Tees (Barnard Castle).—With the flood water of last week more salmon have got up here. On Friday evening Mr. Robert Wandless caught two, one weighing 8½lb., the other 6¾lb.; and on Saturday Mr. Dent had a 4½lb. fish, and the writer one weighing 4¾lb. In the estuary the boats have been doing remarkably well during the week; whilst Mr. Hogg, of Wycliffe, has had excellent sport with the rod. There has been nothing done in the trout way. Eels are plentiful but run small in size. Chub are also in fair quantities. In the Greta, Mr. Austin Graham got a good dish of trout with fly. Rain has fallen plenteously and the rivers are in splendid order for fish.—J. H. R.

Teme (Ludlow).—The Teme is still running in good order for angling being a nice level. Heavy rain fell on Tuesday, but made little difference to the state of the water. The fish have been well on the feed, and have rose well at the August Duns, Silver Twist, Sky Blue, Red Ant, Palmer's and Red Spinner, Wasp Grub fishing is brisk, and the fish are taking it freely. Minnow fishing has accounted for some good trout. On Tuesday, in the Ludford water, Mr. Baker landed some fine trout, one scaling 1¾lb. In the Burway water, thirteen trout and grayling were caught with the Blue. In the Oakley-park water, a gentleman tried the fly and caught forty good fish. The Ony Corve and Ledwyde are all in order for fishing. On Tuesday, two gentlemen with the Wasp Grub landed ten trout, averaging ½lb. each. In the Corve, Mr. R. G. Brookes took some good trout, one scaling 1¼lb.—S. Ludlow.

Teme (Tenbury).—In this district the weather has been stormy. A heavy thunderstorm passed over this this part on Tuesday, but did not alter the water much, it being low. The rain has improved the fishing, and the fish are now feeding well, and some good sport has been had with the wasp grub and fly. The Red Glyre and Ledwyche are all in fishing order.—Worcester.

Trent (Newark).—Bank Holiday barbel fishermen generally met with but slight success in the Newark district, the exception being when a subscriber to the Muskham water, Mr. Hammond, secured eight good fish with worm, heaviest over 8lb., and three others drawing the scale at 20lb., the bag also containing a chub of 4lb., and being by far the best take of the season up to the present. The dead waters of the same fishery were fairly besieged early on Monday morning by bream fishermen, and here the best records of the day resulted, takes running from 14lb. to about double that weight, and specimens being good; Messrs. Corner and Croom having best fish, respectively weighing 4lb. 3oz. and 3lb. 5oz., and 2lb. to 3lb. fish were common. Roach anglers have fared badly, the only catch of the week being Mr. T. Lee's twenty-seven, with creed malt, from the top portion of the Rolleston water. The Piscatorial Club-room was well patronised on Monday evening, all classes open for competition, roach, dace, chub, bleak, barbel and bream being placed upon the trays, the latter species by far predominating. At time of writing (Wednesday evening), weather dull, with storms at intervals; wind south, and Trent in good order; and worms, gentles and creed malt, or wheat, should ensure success.—Trentsider.

Whitby. — Sea Fishing. — Generally speaking the weather has been a little too boisterous, and the sea too unsettled to allow of small boats leaving the harbour for the roads, so that sport has been interfered with. On the few occasions, however, when the sea has been smooth, a goodly number of pleasure parties have rowed into the roads, and invariably returned with good catches of whiting, billets, and dabs. Some excellent sport has been had off the piers and quays in the inner harbour, the fish being abundant. There was, however, one exception to the run of good sport, and that was in the case of a gentleman who sat more or less patiently for several hours without being rewarded with a single bite. On inquiring what kind of bait he was using, he was good enough to give the information that he had baited his hooks with kippered herring! He was soon put into the right way of catching a few fish.—J. J. Jackson.

Witham, &c. (Mid-Lincoln).—Bank Holiday is a great day for visitors to the Witham and waters in connection with it, particularly from Torksey on the Trent, to Boston in the estuary. Literally thousands have been located at the different stations since Saturday last, some coming for a single day; others for three days. Club matches have been the rage, and when these are very numerous the water gets so disturbed that few can accomplish much by independent angling. I hear of a few odd pike being caught since last writing, the best one of 6½lb. Roach and bream have been mostly sought for, and a few nice specimen fish have been weighed in in matches, and by independent angling.—Luci.

Wye and Derwent (Derbyshire).—Both rivers are in good order for all-round angling. The heavy rain storms of the past week has kept the water nicely discoloured, but not too much to stop the fish from rising occasionally in the shallows. The Bank Holiday was not very enjoyable at the river-side, but there were plenty of rods on both rivers. The Wye yielded fair sport, and several baskets of from two to five and a-half brace were taken here. I was afraid the Derwent about Matlock would be too thick on the above day for fly, but in the early part of the day some good sport was had. Mr. I. J. Hodson had a nice basket of five brace of trout and grayling, weighing close on 9lb. Best flies now are Ash Dun, Rod Quill, Sand-fly, and Little Chap.—Dotterel.

Yare (Norwich).—On the day I sent my last report an excellent catch was had at Buckenham Ferry, one gentleman taking one hundred and ten fish to his single rod in a few hours, and some were very fine roach. Of course the awful weather which has been experienced during the holidays has very much upset the angling chances on this river. Still at Cantley and also at Brundall they have both experienced good luck. Some good roach fishing has been reported from nearly all the stations on this stream. From some of the Broads I have heard of several good catches of bream, the best recorded being about 4st., captured during the intervals between ten or twelve thunderstorms, and the largest fish nearly 4lb. We may now reasonably expect the angling to improve from week to week, and I trust that the latter part of August and September may meet the expectations of the knowing local fishermen. An extraordinary bream of about 1½lb. was caught at Cantley on Wednesday, and I dare say your readers will like to hear particulars when I have ascertained them from Mr. Game, who has possession of the fish.—Robert Moll.

Yore, Wharfe, Swale, Nidd, &c.—Heavy rains westward had the effect of bringing down the first named of these rivers in flood on Monday last, towards the end of the day. Two Halifax anglers had fairly good baskets at Tanfield, and on a preserved length of the Yore I killed nineteen trout and grayling. Fog Black, August Brown, Poult Bloa, and Cinnamon Fly is the best cast that can be used at present. Weather very unsettled.—Francis M. Walbran.

Lake Coron (Bodorgan, Anglesey).—Very good bottom-fishing was obtained the end of last week and the beginning of this by three gentlemen from Bolton, staying at the Bodorgan Arms. Mr. Newton got seventeen one morning, eight in the evening, and ten the following morning. Mr. Southworth nineteen one day, and the same number the next. Mr. Whittle, fifteen on Saturday, twelve on Monday, and eleven on Tuesday. Bait used, dock grub. The fish are in better condition this time of the year than any angler remembers, and take more freely than they have hitherto.—W. H.

Lake Vyrnwy (North Wales, via Oswestry).—Although during the past week we have had gales of wind followed by flat calms and thunder, yet there has been a good show of fish on the weighing table nearly every night. Monday being the best. On the whole Mr. F. W. T. Round has been the most successful with twenty-seven trout, 26½lb. Mr. Lewis Lloyd in two days, twenty-two weighing 16lb. 14oz. Mr. J. Evans has also had some good sport, taking twenty scaling 15lb. On Monday, Mr. Menzies brought in nine lovely fish 6½lb., and Mr. G. Ward in the afternoon of same day, five weighing 4½lb., one of which was a perfect picture 2lb. weight. Yesterday, Mr. Round also got a two pounder. Best flies—golden dropper, Zulu, Claret and Grouse. The recent heavy rainfall has put the water in good order.—Long Drift.

Usk (at Usk).—The heavy storms of Monday last rose the river a foot by Wednesday morning, and greatly revived angling, although on the lower reaches some excellent sport has been obtained during the past fortnight. Colonel Rooke succeeded in killing thirteen salmon and grilse last week, and he now tops the list of anglers on the association waters. Wednesday, Mr. H. E. Cole caught four, and Mr. H. W. Pride, three salmon and grilse. Thursday, Mr. Brown had three, and Mr. T. Rees three. Most anglers have had one or two every day. An enormous number of salmon have been taken out of the river by the water bailiffs. Near Newbridge, in one day's netting, one hundred and eleven salmon and grilse were had.—T.

Scotch Reports.

Altnacealgach Hotel Waters.—In last issue the sport by anglers at this hotel was erroneously headed "Altnaharra." On Monday, last week, the gale was such that no boat could face it, and on Tuesday only two ventured out —viz., Mr. Beith, Glasgow, and Mr. Millar, Musselburgh, who fished together on Loch Cama, and got twenty-seven troul, aggregating 10lb. On Wednesday, Messrs. Beith and Millar, on Loch Boarlan, thirty-seven trout, 14lb.; Mr. Ogilvy, Dollar, on Loch Cama, a basket of 14½lb.; and Messrs. F. and H. O. Ritchie, Stonehaven, on Loch Veyatie, thirty-five trout, 11lb. On Thursday, Mr. Sproat and Mr. W. Sproat, Liverpool, on Loch Veyatie, twenty-four trout, 8lb.; Mr. Ogilvy, on Loch Cama, thirty-seven trout, 12lb.; Rev. P. Whyte and Dr. Russell, London, on Loch Cama, eighteen trout, 6lb.; Messrs. Ritchie, on Loch Urigill, seventy-seven trout, 20lb.; Rev. W. Chapman and Mr. Clarke, London, on Loch Boarlan (a short time only), fourteen trout, 5lb.; and Messrs. Beith and Millar, forty-nine trout, 20lb. On Friday, Messrs. Beith and Millar, on Loch Urigill, sixty-seven trout, 20lb.; Messrs. Sproat, on Loch Cama, forty-eight trout, 14lb.; Rev. P. Whyte and Dr. Russell, on Loch Urigill, sixty-six trout, 16lb.; Rev. W. Chapman and Mr. Clarke, on Loch Cama, thirty-six trout, 10½lb.; and Mrs. Russell, on Ledbey stream, a nice basket of thirty-six trout. On Saturday, Messrs. Sproat, on Loch Boarlan, thirteen trout, 7½lb., and two *Salmo ferox*, 2lb. and 4¾lb.; Rev. W. Chapman and Mr. Clarke, on Loch Urigill, sixty trout, 18lb.; Rev. P. Whyte and Dr. Russell, on Loch Cama, twenty-five trout, 8lb.; Mr. Willie Macdonald, on same loch, forty-two trout, 16lb.; Mr. Ogilvy, on Loch Veyatie, thirty-two trout, 10½lb.; and Mr. Stewart, Liverpool, on Loch Boarlan (two hours), eight trout, 3lb.—McB.

Berriedale (Duke of Portland's).—There is at this moment only the keeper taking an occasional cast on this water; but this is a pity, as it is actually swarming with grilse, and unlike most rivers in this district they take splendidly, especially a few miles from the sea. His Grace with a large party is shortly expected, and I have no doubt they will good sport. The prospects for the 12th are not particularly bright, as it is said the birds are not very numerous or strong; but this may prove to be a fallacy, as it has often done before. The lessee of the net fishings, Mrs. Dunbar, has never had such a successful season as this one, and I am glad of it, as for some years the fishing was poor.—S.

Border Esk.—The Esk is again running a trifle low, but the recent rains have had the desired effect of clearing out the bed of the river from the filth which so long vexed the hearts of anglers, and spoiled their best efforts. The water is now in fair order, and good sport may be safely predicted. The whiting season is in full blast, and salmon promise well for September and October. Few catches worth recording are reported, probably the annual carnival (the common riding) may have diverted anglers from their favourite pastime. In the Liddle, however, Mr. J. Crozier had two salmon, 10lb. each; and Mr. J. Murray, two of 6lb.; next week I hope for a better record. The vale of the Esk has donned its most charming garb, and there is loveliness everywhere in this delightful corner of the "land of the mountain and the flood," where the air is pure, the waters unpolluted, and the woods silent, excepting the delicious murmuring of the mountain streams. There are a great many English visitors both in Canonbie and the "muckle toon" o' the Langholm, many of whom were to be seen at the tournament on the Castleholm last week, gazing in wonder on the barley bannock, the saut herrin', and the strong bearded Scotch thistle, which wagged its pow so heartily in the market place on the interesting occasion, as a welcome to the numerous strangers who found themselves in the midst of such novel surroundings. P.S.—Better reports have been received from the lower waters, between Longtown and the Metal Bridge. Last week Col. Wybergh landed one hundred and ten whiting; Mr. Atkinson had one hundred and five, and subsequently sixty-three; Mr. Mason, forty, and two sea trout; Mr. Rudd, twenty; Mr. Redmayne, twenty; whilst Messrs. Walton, Twiddle, Bell, Lamb, Graham and Storey have had fair baskets during the past week. All the largest catches were made in the vicinity of the Metal Bridge. The run of whiting is almost unprecedented.—G.

Brora (Sutherland).—Major Berkeley, driving from Lairg Hotel to Dalnessie, fished the upper reaches of the Brora and killed eight sea trout, weighing 8lb.—J. Y.

Bunessan Hotel, Mull.—On Lochaspol waters, on the 28th July, Colonel Duncaster had three sea trout and thirty-one brown trout. 30th, the same gentleman had five sea trout and twenty-seven brown; Dr. J. Macdonald, Tobermory, had thirteen sea trout, the heaviest one, 3lbs., and thirty-three brown trout; H. Vernon had five sea trout and fifteen brown trout; 31st., Colonel Duncaster had eight sea trout, the heaviest one 2½lb., and fifty-eight brown; H. Penman had seven sea trout, the heaviest one 2lb., and forty brown trout. On the 1st inst., Colonel Duncaster had one sea trout and forty-six brown; Mr. Penman and Mr. Taylor had six sea trout and thirty-two brown; Mr. Cunningham, of Glasgow, had two fine sea trout and thirty-eight brown trout. We have fine heavy showers of rain, and the weather is very suitable for angling.—John Campbell.

Carron (Easter Ross, Ardgay, N.B.).—On Monday, Mr. Woodroffe and party, Skibo Castle, had two fish on Invercharron water. On Tuesday, Mr. Crewdson, Balnagown Arms Hotel, caught a 7lb. grilse on the Gruinards water, and Mr. J. MacLeod one of similar weight on the hotel water. On Wednesday, Mr. Woodroffe, and Mr. Palmer and party, Skibo Castle, fished the hotel water and grassed a 9lb. salmon and a grilse of 6lb., and on the Craigs water a salmon of 8lb. Mr. Crewdson hooked two fish but lost them. On Thursday, Mr. Crewdson tried both Gruinards and hotel waters and landed two grilse, 8½lb. and 8lb., and a sea trout of 1¼lb.; Lieutenant-Colonel Cantlon, Strathkyle Lodge, hooked two fish on the hotel water, but they broke off. Mr. W. Allis Smith, of Glencalvie, fished the upper waters and caught a 9lb. salmon on Thursday, and a grilse of 4lb. on Saturday.—McB.

Dee (Aberdeenshire).—For the most part the past week has been fraught with cold, ungenial, weather, accompanied by a superabundance of rain. The rivers have again been in roaring flood, and have been thoroughly scoured out. This is all the better for the autumn prospects, and from the unusual show of fish on the coast and other causes, there is every appearance of an early and prolific back-end. Autumn anglers are already putting in appearance, and in the interim between this and the Twelfth, when "King Grouse" will call them to the Moors, they are having a chance shy at the rivers. On the Clanney Lodge water, Mr. Alexander Haldame Farquharson, of the 10th Hussars, the young laird of Invercauld, accompanied by Sir Richard Edmonstone, are having some good sport. On the Kincardine O'Neil section on Tuesday, Mr. James Davidson, of Charlestown, Fife, made one of the best, if not the best basket of the season, consisting of one grilse, 3lb., six sea trout, scaling from 1½lb. to 2¼lb., and twenty-eight yellow trout, from 2¼lb. downwards. Such a magnificent record has not fallen to the lot of any one rod on this section for many a day. On the Balmoral the water, although not in splendid order, has yielded some plump grilse with an occasional salmon. On the Ballater section the river has been too unsteady for good sport. However, Captain Cook landed two fish, of 8lb. and 9lb.; Mr. Yarrow, two, of 7lb. and 9lb., and D. Morgan, gillie, three fish, one 13lb., while some sea trout and grilse were also grassed. On the Glentana waters Sir William Brooks, Bart., M.P., and friends, are having a fair share af the sport that is agoing and not unfrequently good baskets are made. On the Aboyne reaches a few grilse, with an occasional red fish, has been got lately. On the Lower Dess water, John Harper, keeper, landed a grilse of 3½lb., while Mr. W. E. Nicol and party had a salmon of 9lb., and a grilse of 4lb on the Ballogie water. On the Blackhall Castle waters Mr. G. T. Hay landed a grilse and several sea trout last week, but the sections hereabout are having but a very indifferent time of it just now. On the Inchmarlo water, however, the proprietor, Mr. Duncan Davidson has had some very good sport lately. The other week he landed nine fish, scalidg from 4½lb. to 9lb., and last week he landed a grilse of 4lb., and a salmon of 11lb., the latter on fine trout tackle, after an exciting run. On the Feugh the other day Colonel Farrel and Mr. George Blacklaws made two good baskets of trout. Sea trout are quite plentiful all over the middle reaches of the main stream, and have been affording capital sport with the worm during the recent floods. On the coast good average results continue to be got, and last week some heavy fish of 17lb. and 19lb. were netted.—Deesider.

Deveron (Banffshire).—Although the swollen condition of this river somewhat subsided during the past week, fishing did not greatly improve. To all appearance a good many fish have run since the spate commenced. One fine sea trout weighing close on 3lb. was killed on the upper water of Turriff, and several grilse averaging 4½lb. The keeper on the Mayne water had a large salmon of 13lb., and two grilse of 4lb. each. Fair baskets of trout were also got on the tributaries of the river, which were in splendid ply for fishing. The net fishing on the river improved considerably this week. The hauls of salmon and grilse were larger, and the fish were on the whole of larger size. On the coast all the stations yielded well. Grilse containing a fine crop, and not the least tincture of disease has as yet been observable. On Saturday last, there were consigned to the markets from the river and sea stations eleven boxes. On Monday of this week twenty-one boxes, and on Wednesday, fifteen boxes. At the corresponding date last season for the week only nine boxes were sent South. The Gardenstown fishings, situated on the coast, about eight miles east from here were very productive for the week also. No less than a score of boxes were despatched against four for the same week last year.

Esk (Langholm, Dumfrieshire).—St. Swithin's Day kept up its reputation by giving us a copious shower of half an inch, much to the joy of anglers, and there is every appearance as if the six weeks were to follow suit. We are now having nice dropping weather, keeping the river "juist in gran' fettle." Last week, Messrs. A. H. and F. W. Kerr of York, staying at Eskdale Hotel, finished up their stay by killing 32lb. of sea trout and whiting on one day, besides two sea trout and two herling on the previous day. Mr. T. Irving has had several baskets of sea trout and whiting, as well as Mr. A. McMillan and S. Ballantyne. We had a good wet night on Sunday, and anglers were on the alert on Monday morning and evening, and they were not disappointed. The following are a few of the catches: Mr. Molyneux, Eskdale Hotel, fourteen sea trout and whiting; Mr. F. Martin, six whiting and two sea trout; A. Knox, two sea trout, one herling; J. McLellan, one sea trout, 2½lb.; Mr. J. Archibald, two sea trout; Mr. H. St. George Tucker, Eskdale Hotel, one sea trout and two yellow trout. On Tuesday morning there was a further rise, when there was better sport: Mr. Molyneux, Eskdale Hotel, had nine sea trout and whiting; Mr. Joe Anderson, fishing tackle manufacturer, had one sea trout, one herling, and twenty-seven yellow trout before breakfast; Rev. J. Smith, Eskdale Hotel, had one sea trout on Yarrat water, with the fly, 2lb.; Mr. H. St. George Tucker, one sea trout and eighteen yellow trout; Mr. A. Irving, six whiting; Mr. J. McLellan, one sea trout, 2½lb.; Mr. Connell, Eskdale Hotel, two whiting; Mr. T. Irving, four sea trout and two whiting, all within two miles of Langholm. The river is now getting into "guid fettle," and anglers should lose no time in securing quarters, as there is now likely to be a scarcity of accommodation, owing to the increasing popularity of the district. not only for the angling, but for the beautiful scenery and surroundings of the district.—W. D.

Helmsdale (Helmsdale).—Writing last week, I mentioned that floods were the order of the day here, and that was literally true, but my prediction that with dry weather the river would fall rapidly has not been verified. We have dry weather, but the water is still high; indeed, for years past I have never seen the river keep high so long, and salmon, grilse, and trout have had exceptional opportunity of taking the river, and they have indeed taken full advantage of it. The other day I walked three miles along the bank of the section next the sea, and never before did I see as many fish leap and tumble about as on that occasion. Every stream and pool seemed alive, and, although the majority was grilse, there was also numbers of salmon, all fresh run. Of course I had my rod, and fished pool and stream, but all to no purpose; although leaping all around me, look at fly they would not. I was terribly disappointed, but the reason was plain. The atmosphere was heavily charged with the electric fluid, as later in the evening it showed in vivid flashes of lightning. On the upper reaches of the river fish are taking better, and the Suirgill party are doing fair. getting a few grilse daily and an occasional salmon. Few anglers are out unless a local, and on the lower reaches fish take badly at this season in any weather. The netsmen have almost nothing during the week, and report that not a fish is to be seen in the sea, they having all taken the river. This, however, is not the case, as there is still a later run of fish to come on late in August or early in September. Strange to say, the lochs at the head of this river are not up to much this season, and none can give even a guess at the cause, the weather being all an angler could wish; but the mild winter may have something to do with it. The herring fishing here for the last few days has done well, upwards of three thousand barrels being landed; but while that is so here, there is a very large shortcoming in this important industry over the east coast of Scotland, amounting to one hundred and seventy-five thousand barrels compared with the fishing at same date in 1890.—S. C.

Lairg, N.B.—On Monday, of last week, a gale with boisterous showers made angling almost impossible. Mr. Wordsworth killed seventeen trout, 8lb.; on on Loch Cracail; and Dr. Mathews, six, 3½lb. on Loch Nam-fuar-leachd. Tuesday was very stormy, the only parties out being Major-General Stafford (see "Shin") and Surgeon-General Colvin Smith, C.B., who fished Cracail, killed a dozen averaging ½lb. On Wednesday, Mr. John Macleod killed a grilse of 6lb. on the Sluice Pool. lower end of Loch Shin; Major.General Stafford killed a 10lb. salmon with a trout fly on Lower Loch Shin; Dr. Mathers got fourteen trout, 9lb., on Loch Cracail; Mr. Wordsworth, seventeen, 11lb.; on Loch Nam-fuar-leachd. On Thursday, Dr. Mathews fished Loch Beamroch, ten, 7lb.; Colonel Butler, Loch Shin, six, 2lb.; Major-General Stafford, and Surgeon-Genaral Colvin Smith, C.B., Loch Nam-fuar-leachd, twelve, 6lb. On Friday, on Loch Shin, Messrs. Copeland and Cumming made a basket of fourteen trout, 7½lb.; Mr. Laing (two hours' fishing), six, 3lb.; Mr. George Atkins (three hours), twelve, 4lb. On Loch Beamroch, Mr. J. Stewart killed twelve, 9lb.; and on Loch Cracail, Surgeon-General Colvin Smith, C.B., nine, 5½lb. On Saturday, Major-General Stafford fished Loch Nam-fuar-leachd, six, 3lb.; Surgeon-General Colvin Smith, C.B., Loch Beamroch, seven, 6½lb.; two local anglers, in a couple of hours, thirteen, 7lb.; and Messrs. Copeland and Cumming, a fine basket.—J. Y.

Loch Leven (Kinross).—Heavy thunderstorms at long intervals during the week, with thunder, has not improved angling here and anglers have almost invariably returned with light creels. Five clubs competed, in which thirty competitors engaged who captured a combined total of eighty-one trout, 79lb. 12½oz. The heaviest prize basket was secured by Mr. T. Wilson, of the Coatbridge Club, who had seven trout of 8lb. 2oz. The most successful of private parties was Mr. McKenzie and Mr. Lennox, Kilsyth, nineteen trout, 13lb. 8oz., while the best average was got by Mr. Hannay, from Glasgow, who had six trout, 10lb. During July the total number of trout captured was seven hundred and twenty-four weighing 707½lb. This is the lowest record since 1887, which however, can be accounted for from the "shallows" being rendered almost unfishable from the exceptional dryness of the season and consequent very low and clear water.—Robert B. Laing.

Loch Migdale (Bonarbridge, N.B.).—Mr. John MacPherson, Bridge Hotel, was out for a few hours on Thursday evening and caught eight yellow trout, which averaged ½lb. Fair baskets have been made by other anglers. —McB.

Loch Rannoch (Kinloch Rannoch).—The following is the angling report and list of takes by gentlemen from the Dimalastair Hotel, during the past few days: On Wednesday, the 29th ult., Mr. Bell, of Dundee, succeeded in capturing a very good fish; Mr. Reid, of Wigton, obtained a basket of fully 6lb.; Mr. Johnson, of Glasgow, secured a take of 5lb.; and Mr. Nash, of Liverpool, killed eight pretty heavy fish. On the following day, Mr. Bell, of Dundee, had a basket of 30lb., including a trout weighing fully 12lb.; Mr. Nash, of Liverpool, captured eighteen trout; Mr. Reid, of Wigton, had a basket of 6½lb.; and Mr. Johnson, of Glasgow, secured a take of 7lb. On the 31st ult., Mr. Bell, of Dundee, killed eighteen trout; Mr. Johnson, of Glasgow, obtained a basket of 6¾lb.: Mr. Nash, of Liverpool, captured eighteen trout; and Mr. Reid, of Wigton, had a take of 6½lb. On Saturday, Mr. Bell, of Dundee, had a basket of 7½lb.; Mr. Johnson, of Glasgow, one of 8lb.; Mr. Reid, of Wigton, secured a basket of fully 6¾lb.; and Mr. Nash, of Liverpool, one of 6½lb. On Monday, the 3rd instant, on the Loch, Mr. Nash, of Liverpool, obtained a basket of fully 10lb., including a beautiful specimen of 5½lb.; the Messrs. Hodgsons, of London, killed eighteen trout; Mr. Higson, of Oban, killed ten pretty heavy trout; and Dr. Hughes and son, of Ashton-under-Lyne, captured eight trout.—George Gow.

Loch Shiel (Salen Hotel, Ardgour, N.B.).—Mr. Stevenson caught a salmon of 8lb. on the Shiel on Monday, three grilse the following days, along with many sea trout. Mr. Stevenson killed three peal on Lochsunart on Friday, July 31; Mr. Swinton caught a salmon, 9lb., on Loch Shiel. on Friday, July 31.; Mr. Leverton caught, on Loch Shiel, four sea trout on Monday, August 3, one weighing 4lb.; Mr. Lymington, four sea trout, on Monday, August 3. Loch Shiel in good fishing order.

Loch Shin, (Lairg, N.B.)—Mr. East, London, has had the following sport:—July 9th, nine trout, 2½lb.; 11th, twenty-three, 6lb.; 13th, twenty, 5lb.; 14th, six, 2lb.; 15th, ten, 4lb.; 16th, two *Salmo ferox* of 6lb. and 2lb., and a trout of ½lb.; 17th, ten trout, 3½lb.; 18th, two, ½lb.; 23rd, three, 1½lb.—J. U.

Naver (Sutherland).—At the beginning of this week this river was in splendid ply, and good sport anticipated. On Monday last week, Mr. Darwin, Skelpick Lodge, Strathnaver, caught three salmon, weighing 16lb., 12lb., and 9lb. The same angler was out on Thursday, and got seven, the heaviest of which weighed 22lb. On Friday, Mr. Darwin grassed one salmon, and P. H. Wormald another. Several salmon and grilse have also been landed by Sir J. Edwardes-Moss, Borgia House.—McB.

Ness (Inverness).—This water is now in splendid order for fishing, and grilse and salmon are plentiful, and the sport obtained during the past fortnight has been very good. On the Ness Castle Water, Mr. F. Walker, landed twenty-three grilse, average 6½lb., and five salmon 13lb. On the Holm water, Mr. Godman landed twenty-nine grilse and salmon. On the Dochfour water, General Godman landed, since Aug. 1., six grilse. Very large takes of salmon and grilse are being daily got at the netting stations on the lower portion of the Ness.—D. Watson.

Orchy (Inveroran Hotel).—Mr. Havers, London, fishing from Inveroran Hotel on 27th July, had two salmon, 12lb.; same day, Captain Paterson and Mr. Richmond, junior, had a dozen trout, 15lb. On 28th, Captain Paterson and Mr. Richmond, junior. eight dozen trout, 20½lbs. On 29th, Captain Paterson and Mr. Richmond, junior, had twelve dozen trout, 26lb.; Mr. Havers, London, had four dozen trout, 6lb. On 30th, Baile Richmond and Captain Paterson had ten dozen trout, 23lb.: Mr. James Richmond, junior, ten dozen, 27lb. On 31st, Bailo Richmond and Captain Paterson, thirteen and a-half dozen, 34lb.; Mr. Richmond, junior, ten dozen trout. 30lb. August 1, Baile Richmond, Captain Paterson, and Mr. Richmond, junior, thirteen and a-half dozen trout, 28lb.; His Royal Highness, Comte de Paris, same day had five and a-half dozen trout, 15½lb. On Monday, August 3, the Comte de Paris had three dozen and four trout, 14lb.; Mr. Havers, London, had six trout, 2½lb.—Duncan A. Forbes.

Overscaig Hotel Waters (via Lairg, N.B.).—On Tuesday Mr. Raikes and Mr. Playfair, London, fished Loch Griam and hooked a salmon, but lost it after ten minutes' play; General Murray also hooked one but lost it; another gentleman, however, landed one of 10½lb. On Wednesday, Mr. Mackay, in one hour's fishing on Loch More landed six sea trout, averaging 2lb. each, the heaviest being 3½lb. Mr. Raikes and Mr. Playfair, on Fiag Beat, seventeen trout, 6lb.; General Murray, Worthing, and Mr. Beale. Bucknell, on Loch Shin, twenty-five trout, 8lb.; and Miss Mackay, on Upper Shin, four hours, seventeen trout, 8lb., the heaviest 1½lb. On Friday, Mr. Sturrock. on Loch Shin, nineteen trout, 7lb.; General Murray, and Mr. Beale, on Loch More, three sea trout 5½lb.; Dr. Matthews, Liverpool, and Captain Butler, on Loch Griam (a few hours only), fourteen trout, 6lb.; and Messrs. Raikes and Playfair, on Loch Shin, twenty trout, 7lb. At the beginning of this week heavy rain prevailed.—McB.

Oykel Bridge (Hotel Waters, via Lairg, N.B.).—During the month of July, Mr. Ross, Leicester, killed to his own rod, ten salmon, ranging from 7lb. to 17lb. each; fifty grilse, weighing from 4lb. to 7lb.; and forty-nine sea trout, running from 1lb. to 4lb. each. Mr. Hugh MacLeod, Benmore Lodge (on Mr. Smith Ryland's rod), fished the upper waters on Tuesday last week and caught two salmon, of 9lb. and 10lb. On Wednesday he grassed four salmon, which weighed 14lb., 9lb., 6½lb., and 6lb. On Friday he landed one grilse of 5½lb, and four salmon, weighing 12lb., 8lb., 7½lb., and 7lb. His total basket for the three days' fishing thus amounted to ten salmon and one grilse, weighing 94½lb.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.)—On Monday, last week, Mrs. Stewart Young, London, on Loch Inchard, one grilse, weighing 5lb.; Mr. Maitland, Dover, on Loch Garbet-beg, a sea trout of 1lb., and two salmon, weighing 8½lb. and 9lb.; and Mr. Atkins, Aberdeen, on river Achriskill, one grilse of 4½lb. On Tuesday, Mrs. Hassell, Oxford, on Loch Garbet-beg, one salmon, 10½lb.; Mr. Hassell, Oxford (same loch), three salmon, 6½lb., 6¼lb., 5¼lb.; Mrs. Stewart Young, also on same loch, one salmon of 6lb.; Mr. Atkins, on Achriskill river, one grilse of 6½lb.; and Rev. C. McConnell, Dorset, on Loch Garbet-more, two sea trout, 2lb. On Wednesday, Mr. Maitland, Dover, fished Loch Garbet-more and landed two salmon of 7½lb. and 7lb. On Thursday, Mr. Young, London, on Loch Garbet-beg, one sea trout, 2lb.; Mr. Wallace on river Shinary, one sea trout, 3lb.; Mr. Atkins on same water, one sea trout, 2½lb.; and Mr. Hassell, Oxford, on Loch Garbet-more, one salmon, 9lb., and a sea trout of 3½lb. On Friday, Rev. C. McConnell, Dorset, fished Loch Garbet-more and got a 7lb. salmon, and a sea trout of 1lb.—McB.

Shin.—Fishing the upper reaches from Lairg Hotel on Tuesday of last week. Major-General Stafford killed two fine salmon, weighing respectively 20lb., and 17lb. On Friday, the same angler landed a fish of 20lb. Weather much improved: excellent prospects.—J. Y.

Shin (Inveran Hotel Waters).—During the past week the sport obtained by Lord Braybrooke, Sutherland Arms Hotel, was as follows: On Monday, a 9lb. salmon on Clarag Pool; on Tuesday, two grilse, 6½lb. and 5lb., and two salmon, 13lb. and 9½lb., on Fir Dam, besides a 9lb. salmon and a 5lb. grilse on Clarag; on Wednesday, one grilse, 9lb., on Angus Pool; on Thursday, on the lower waters, three, 8lb., 6½lb., and 7lb.: and on Saturday, three grilse, 6lb., 5½lb., and 7lb. Total for the week, ten grilse, aggregating 6½lb., and four salmon, 39½lb.—McB.

South of Scotland.—Good sport has been had in the district rivers since last week. On Friday, Mr. Joseph Pollock, Cockermouth, caught twelve herling, while about a dozen others had catches ranging from two to eight herling each. On Saturday, Mr. P. A. Pasley-Dirom, of Mount Annan, killed two sea trout and twelve herling with fly (a Brown Turkey). Mr. William Wilson, Brydekirk, had one sea trout; Mr. Andrew Bell, thirteen herling and one sea trout, 1½lb. Mr. Bell has been killing a good number of herling all this week, and I hear of Mr. Dirom having good sport. On Monday the river was again in part flood with the rainfall of the early morning. Mr. James Murray, Silver Walk-road, Annan, caught seventeen herling; Mr. Henry Boyd had over two dozen herling at Newbie Mill and the Brewery water; Mr. Thomas Gibson, Bridge-place, twelve herling; Mr. Joseph Pollock, two dozen herling; Mr. James Dixon, baker, half-a-dozen; Mr. W. Dickson, Edinburgh, filled his basket at the Brewery water; Mr. Alexander, London, a small boy of eight years, killed one sea trout, 1½lb., and two herling, and got broken with a very large sea trout; Mr. Harry Hudson, Oldham, caught twelve herling, and he has had several nice baskets every day; Mr. James Scott, Lodge Cottage, landed six herling; Major Gregory, R.A., had a brace of herling, and Mrs. Gregory caught one or two herling with her own rod; Lieut. Paget, R.A., had a couple of herling; Mr. Halliday, Blackburn, had a beautiful grilse of 5lb., one sea trout, and several herling; Mr. John Irving, Bruce-street, seven herling; the Rev. Mr. Kennedy, Newington Lodge, Annan, twenty-five herling; Mr. W. Wallas, Wigton, caught eighteen herling and one sea trout, 2¼lb., on Wednesday morning with brandling worm, and to-day (Thursday) he had a like basket; Mr. W. Wright, Ednam, Annan, killed with Greenwell's Glory and a Quill and Light Snipe twenty-five herling and a trout, weight 15lb. On Thursday the same angler caught with the same fly twelve herling and one trout. In Castlo Milk water, Mr. John Rae, The Firs, Ecclefechan, killed six herling and two sea trout. In Hoddom Castle water, Mr. Hore, Kinmount House, landed twenty herling; Mr. D. Tweedie, clothier, Ecclefechan, six herling; Mr. Wardrope, ten herling and one sea trout: Mr. Stewart, Ecclefechan, six herling; Mr. Sandy Henderson had six herling in the Luce portion of Mount Annan; Mr. Charles Inglis, over a dozen herling; and the Rev. Mr. Monilaws, Middlebie Manse, a good basket. In the lower water, Mr. Frank Stoddart, Glasgow, had about a dozen herling and a sea trout; Mr. Thomas, Mr. Ormerod, Oldham, and others have been fishing the lower waters with a fair amount of sport.. A host of visitors have been having from four to eight herling each at an outing. The Kirkcudbrightshire Dee is very low and clear. In the tidal waters the herling and sea trout swarm in the pools, but there is little angling to be had in the day-time. Night fishers have been getting a few herling by fishing up to ten o'clock at night. There is little to report from the Nith, as the river is remarkably low and clear. In the immediate neighbourhood of the town of Dumfries the pools are pretty well stocked with herling and trout, but little or no angling is being had. The bailiffs are kept pretty busy watching the pools to prevent them being netted by bands of poachers which swarm in the town. In the Esk, fair sport is being had, more especially in the lower waters near Longtown and below Canonbie. The Longtown portion was in capital order last week-end. Mr. Atkinson made a remarkable basket of herling in this part of the river with small fly, killing no less than one hundred and five, and on another day he had sixty-three. Mr. Mason caught forty herling and two sea trout, and, at another outing, thirty herling and three sea trout. Mr. Wright and Mr. Reid had also good sport. Mr. Rudd caught twenty herling and three sea trout; Mr. Redmayne, twenty herling. A host of other anglers have all made splendid catches in the neighbourhood of the Metal Bridge. In the Langholm portion, Mr. W. Davidson caught a grilse of 6lb., two sea trout, and a few herling; Mr. E. Connell, two sea trout and two herling; Mr. J. Harkness, three sea trout; Mr. J. T. Preston, two sea trout; and Mr. F. Story, a brace of sea trout. A large number of fishing cases have been before the sheriff at Dumfries, and in most of the cases heavy fines were imposed.—Heatherbell.

Spey (Elgin).—The fishing on the Spey for the past week has been very good on the middle sections. On Tuesday the river was in flood, and it will be several days before anything can be done with the fly. On the Aberlour House water, five grilse were killed, weighing 5½lb., 6lb., 6lb., 6½lb., and 8lb.. On the Pitcroy Lodge waters, Mr. Burns killed a grilse; on Wednesday, Mr. Tylecote landed a splendid salmon, 16lb.; Mr. Burns, one, 8lb. On Friday, Mr. Burns, one grilse, 7lb.; and Mr. Tylecote, one, 3½lb. On the Knockando waters, Mr. Lithbridge has had splendid sport, killing a total of twenty fish for the week.—H. Logie.

Tay (Perth).—The river rose about a foot yesterday. Grilse are now beginning to make their appearance, and a good few are being got. On the Benchill water Captain Ortrechan had two on Monday, 6lb. and 6½lb. Another gentleman has had eight during the past ten days. May.—Dr. Farquharson, Newcastle, had twenty-nine trout on Monday, and twelve on Tuesday; Mr. Muirbend had twelve on Monday, and twenty-one on Tuesday; and Mr. W. Farquharson had twenty-four.—Alder.

Thurso and Lochmore (Caithness).—Mr. Part and his son arrived at Brawl Castle on Friday, 31st July, and on Saturday they fished No. 3 beat, when soon after lunch Mr. Part had two newly run salmon, one on Covner Pool, weighing 9lb., and one on Red-brae Pool, weighing 10½lb.; both fish were in prime condition and had sea lice on. More sportsmen are expected soon, and as there are ten miles of good water of which they have the exclusive right, and the whole stretch being now well stocked with newly run salmon and grilse, the prospects for the autumn are most encouraging. The weather continues very rainy so that the river is always in good fishing order. Lochmore has not been yielding good sport lately, owing to it being too high for this time of year.—A. H.

Tongue Hotel.—On July 29, Mr. Mills, on Loch Slaw, two grilse, 4lb. each; also sixteen trout, 7½lb.; Mr. Rathbone, on Loch-na-Hakel, 7lb. trout; Mr. Bolton, on Kinloch river, one salmon, 6lb.; Mr. Rathbone, on Loch Slaw, two grilse, 6lb. and 5lb. July 30, Mr. Barlow, on Loch Craggie, eight trout, 4¾lb.; Mr. Muir, on the Kyle, three sea trout, 9¼lb.; Mr. Anderson, on the Kyle, four sea trout; Mr. Muir, on he Kyle, two sea trout, 7¼lb.—A. CAMPBELL.

Tweed.—Since last week, pluvial descents have been frequent, but not to such an extent as to cause the much needed heavy rise in the river, so as to clean away the dirt and refuse in it. Nevertheless these small freshets have been of some service, as they have enabled a good many grilse and a few salmon to ascend to the upper reaches of the streams; and consequently a few captures have been recorded since my last notes on the Tweed. Mr. Collingwood, Cornhill House, angling at Coldstream Bridge, killed a very fine salmon in the Slap cast, which scaled 12lb.. The fish was beautifully proportioned, and was newly run from the sea. On one of the waters in the Kelso district, one salmon and a couple of grilse were caught, and on Monday one angler had about 15lb. trout (with worm) in the early morning, and late in the day, when the river was rather clearer, he killed a very nice grilse with fly. On the Tweed, in the Birgham district, a number of grilse have also been got, while in the Coldstream district anglers there have had a few fish of the salmon kind. Trout fishers in the Kelso district have not had very great sport, if we except the above basket, but in the Jed and Teviot, in the Jedburgh district, baskets of from 10lb. downwards have been killed, mostly with worm, one fish of about 10lb. or 12lb. was hooked with fly near to Nisbet on the Teviot, but after a good run, it broke the angler and got away. On the Tweed in the Inverleathen district, a trout of 5½lb. was killed by Mr. Robert Todd, Woodend. In the district of St. Mary's Loch some capital takes have been had, mostly from the smaller streams in the locality, the baskets ranging from 2lb. to 4lb. per day. On the loch itself, however, Mr. A. Stevenson had a trout of 2lb. (with fly), one of 1lb., and several others running to ½lb. apiece. The same gentleman on another fishing had 7lb. of good trout, all got on the loch, and with fly. The Messrs. Hall have also had more nice trout, as well as Mr. Lawrence Pilkington and others. On the Esk and Liddle some grand sport has also been had among the berling and trout. The weather is again very fine, and the rivers are getting lower once more, which is against angling prospects.—MAXWHEEL.

Ythan (Tidal, Aberdeenshire).—Satisfactory sport continues to be got daily, and average baskets are the general order of the day. Sea trout are quite plentiful, and in the pink of condition. Among others who have been fishing from the Newburgh Arms and doing good work may be mentioned Sir Algernon Borthwick, Bart., M.P., and Miss Borthwick, Invercauld, Deeside; Mr. Andrew Murray, Inverdon; Mr. W. C. H. Jopp and Mr. William McKinnon, Aberdeen; Dr. Arthur Cults, Mr. W. H. Holl, &c. The last two gentlemen bagged eight brace duck on Saturday last.—G. N.

Irish Reports.

Ballinderry (East Tyrone).—I regret to have to record a very bad week on this river. The weather is very good. The water is at a nice level and colour, but the trout are sulking, or as the natives put it more truly, perhaps, than grammatically "they won't ketch," and that exactly explains how matters stand. This loss of time is the more to be deplored, as the infernal flax water will be on the annual rampage next week or so, and then farewell to angling for a while. Mr. Kempton, a professional, occasionally secures a good fish in the early morning or late at night. I have remarked that almost invariably the fish taken in the semi-darkness of the summer nights are larger than the average. A few half-pounders have been killed on the Claggon and Ardtrea reaches. Mr. C. B. Irwin persistently has whipped the Coagh sections, but his baskets are light. Better reports came from the Burmouth reaches, and trouting is reported to be very good on the Moneymore or Littlebridge streams, and also on the Kildross tributary, its small brown trout being good risers and full of fight. Sport is bad on the Blackwater, Tenew, and rod-fishing on the Tyrone shores of Lough, Neagh, is not worth recording. Next week will see a portion of our best anglers on the moors, and for the sake and encouragement of amateur anglers, we hope they may remain there for a lengthened period.—EAST TYRONE.

Blackadder.—Ballynahinch fishery, since my last reply we had a slight fall of rain, but sport still very poor for this season of the year. This morning (Friday) the wind has gone more west, also a heavy mist coming off the sea which may improve the rise in trout, but nothing really good will be done till we have a fall of rain.—TOOMBEOLA.

Lough Currane (Waterville, Co. Kerry).—Sport has been very unsatisfactory. Though the fish must be numerous, they are either daily rising badly, or "rising short." Thirteen white and five brown trout (by Mr. J. T. Judd) was the best basket for the week. Lord Bandon, Mr. Pike, and Mr. G. Eades had baskets of a dozen white and four brown trout in a day or two. Other anglers who had fair baskets on odd days were Major Cresswell, Major Hegan, Colonel Rogers, Surgeon-Major Rahilly and a few others. The white trout averaged about 1lb., and the heaviest that I heard of for the week was one of 3lb., taken by Major Hegan. Weather unsettled with prospects of rain.—THOMAS J. DEMEHY.

Moy and Lakes (Ballina).—Since last report sport on the river has only been of a moderate kind, owing to low water and absence of wind. Still a few nice fresh run grilse has been caught daily by the anglers out: Mr. W. Brougham on Monday accounting for three nice fish to his own rod, 6lb., 7½lb., 8lb. The nets on the non-tidal portion of the river, and the weirs are now done for the season since the 1st inst., and the nets on the tidal portion will be off for the season. On the 12th, salmon, grilse, and sea trout will then have a free run, and anglers will stand a splendid chance. Trout fishing in Lough Conn has improved very much this last week. Some nice baskets of trout averaging about 1lb. apiece has been got by the Messrs. Grey, Mr. G. Yeo, Mr. Meyer, the Rev. John Thornton and his two sons, and Mr. H. C. Robinson. I will be pleased to give any information respecting the fishing in this neighbourhood to any readers of the *Fishing Gazette*.—FRANK HEARNS, Ballina, Co. Mayo.

Shannon and Lough Derg (Killaloe).—The old river has got a great knocking about this past week. We have had storms, thunder and lightning, followed by a perfect deluge of rain. The latter we do not object to in the least; indeed, it was just the very thing we wanted for the autumn fishing. Sport has already improved, and I expect before the week is out to see a fresh supply of salmon, grilse, and sea trout, waltzing round the different beats. As it is, there is any quantity of fish in the pools and rapids. This morning they were rising in all directions. For all the wild weather and all the atmospheric influences Mr. F. S. Jackson (Trinity College, Cambridge), who with his brother, Mr. G. H. Jackson, Allerton Hall, Leeds, arrived here on Friday last, has been very successful. Considering that until Friday, the first day he went out on the river, he had never before handled a salmon or rod. Well, he has already accounted for one salmon 10½lb., and two grilse, 7lb., and 6¾lb. I congratulate the dashing young captain of the Cambridge Cricket Eleven on his success. In addition to his sport among the salmon, he has also killed a splendid lot of brown trout on Mr. Young's preserves, several up to 1½lb. and 1lb. Mr. G. H. Jackson has likewise killed some good baskets of trout. I fully expect that the fishing, both salmon and trout, will be good during August. Pike fishers may also expect upon this ground to have very average sport in Lough Derg. It is a glorious sheet of water, and holds vast quantities of huge trout, pike, and perch.—S. J. HURLEY.

West Kerry.—Sport for the last fortnight has been poor in all parts of West Kerry. The weather has been favourable enough, but the rivers are reduced to a very low ebb. In fact some of them hardly could afford as much water that would turn a mill race. On Waterville lake several boats are out daily, with English gentlemen principally. The baskets obtained were varying, and none could be designated as good when the advanced state of the season is taken into account. All the hotels at Waterville are full and other anglers have to wait until some of the gentlemen here at present take their departure. On the Inny nothing has been doing as the water is too low. Salmon are numerous in the tidal waters and come up with every tide as far as the first bridge, but they go back with the retreating tide not being able to ascend higher from want of water. Poaching is very prevalent on this river. Last week a net—evidently a fixed or standing one—was taken by a water bailiff on the middle reaches. The owners escaped. On the mountain lakes, of Cummeravaning Loughnabricdarrig and Coomavoher sport at brown trout has been first class. As many as eight dozen have been had on one day by one angler, but the average weight of the fish was small—few of them reaching 1lb. Sea fishing is also very good at present, and in Portmagee the fishermen are reaping a good harvest. Herrings are being caught in large numbers and, pollack, ling and cod are also very numerous. Trawlers have done well at Ballinskellings at plaice, turbot and soles.—T. J. D.

Westmeath Lakes (Mullingar).—A great improvement has taken place in the fishing upon these Lakes, and a very nice second rise of Green Drake has appeared, but these are nearly all eaten by the myriads of swallows about, before they can reach the land, and, anglers are obliged to content themselves with dapping Harries and other flies. Amongst those who have arrived at Lough Ennell I noticed Mr. William Armstrong, Mr. Malcolmson, Mr. Quain and party (four), Mr. Walker, &c., and with each your correspondent has seen very nice baskets of fish, averaging four trout per rod, and 2¼lb. per fish per day. The Berne Brothers are also having excellent sport. Strong expectations are formed of sport during the ensuing fortnight, which is generally the best time of the year. The fish are now in excellent condition, and play gamely.—T. J. W.

NOTES FROM BIRMINGHAM AND DISTRICT.

THE MARSTON CHALLENGE CUP COMPETITION.—The above competition, which has excited a great amount of interest not only in the Birmingham District, but throughout the whole of the associations connected with the Provincial Angling Association, came to an exceedingly satisfactory termination, on Monday, Aug. 3, at Tewkesbury. The Provincial Association, in order to make the competition a success, decided at their last committee meeting at Bristol, to add three prizes in the form of medals, to be competed for with the cup. This was done in order to give a zest to the contest, and also to give some compensation to the first three successful competitors, as, according to the rules framed for the governing of the contest, the cup goes to the club sending the representative, and not to the individual who should meet with the good fortune of winning it. With this in view, the Provincial Association, with their usual generosity, decided upon purchasing a gold medal for the winner; a silver medal with a gold centre for the second; and a silver medal for the third. The medals were of a very artistic design, and bore the monogram of the association in the centre, with the word Tewkesbury on the top, and the date on the relief work at the bottom.

At half-past ten the competitors began to assemble on Mythe Bridge, where the following gentlemen answered to their names, and represented their respective associations: Bristol: Mr. King, Spotted Trout; Mr. R. Frost, Clifton; Mr. Harris, Bristol United; and Mr. Lloyd, West End. Gloucester: Mr. Marriot, Malvern; Mr. Hailstone, Cardiff; Mr. Johnson, Kidderminster Excelsior; Mr. A. Curtiss, Good Intent: Mr. W. Mounds Royal Oak; Mr. T. Birch, United Brothers; Mr. G. Robinson, Willis Bund Society. Birmingham: Mr. Peatman, Aston Britannia; Mr. Lambert, Good Intent; Mr. Saunders, Hillyfields; Mr. Goode, Vine Unity; Mr. Kirk, Sparkbrook; Mr. Hiley, Bordesley Waltonians; Mr. Strasmore, Brookfields; Mr. Barlow, Manor; Mr. Aldhouse, Oak; Mr. G. Swain, Anglers' Pride; Mr. Bodycote, Severn-street; Hearts of Oak, Mr. J. Attwood; Garrison, Mr. Trevor; Belmont, Mr. Chambers; Highgate Park, Mr. J. Billington; Ashted, Mr. J. Turner; Birmingham Heath, Mr. C. Kirby; Deritend, Mr. Johnson; Prospect, Mr. W. Garrett; City, W. Bird; Beehive, Mr. Rollason; Balsall Heath Britannia, Mr. Froggatt; Leopold, Mr. H. Clarke; Bird-in-Hand, Mr. J. Hobbs; St. Paul's, Mr. Hughes; Ladywood, Mr. Peters; St. John's, Mr. Jukes; Ring of Bells, Mr. Elkington; Plume, Mr. Pears; Brothers Well Met, Mr. T. Kimberley; Highgate, Mr. W. Waite; Queen's Arms, Mr. F. Jolly; Rose and Crown, Mr. Mann; Convivial, Mr. Brian; Victoria, Mr. Shuttleworth; Bellbarn, Mr. H. Garner; St. George's, Mr. Moore; Highland Laddie, Mr. H. Chambers; West End, Mr. Wainwright; Tenby, Mr. C. Cottrell; Camden, Mr. A. Howe; Spring Hill, Mr. Beeston; St. Thomas's, Mr. Jackson; Dudderstone, Mr. Douglas; and Small Heath, Mr. Hollings. Worcester: United Anglers, Mr. Gardner; City Club, Mr. Warner; Izaac Walton, Mr. Wall; St. John's, Mr. Stanton. The work of taking the names and making out the tickets was soon got over, when a move was made up the river in the direction of Bushley Bay. After going up the river for about two and a-half miles, the referees called a halt, when the conditions of the contest were read and explained, after which the whole of the baskets were searched and the contestants were allowed to put their tackle together and proceed to the river. All being ready, the signal was given at 11.40, to commence the contest, when the picked members of the Provincial Association tried all they knew to obtain the great honour of winning the first contest held under the auspices of the association. The water was in splendid condition as far as colour and height was concerned, but the wind considerably interfered with the sport. One or two heavy showers fell during the contest, the worst coming on at about 12.30, which lasted for about twenty minutes. This helped to make matters very uncomfortable for a time, but the sun came forth again and made things more pleasant. At last the whistles sounded, at ten minutes to three o'clock, to cease fishing; a few minutes later the weighing in commenced. This was done on the ground before the competitors, who expressed great satisfaction with the fair and impartial way in which this important duty was fulfilled by Mr. T. Coles. This important business was soon transacted, as only thirteen of the competitors had fish over the stipulated quarter of a pound to weigh. The result of the weighing in was as follows: Mr. J. Jukes, St. John's Society, Birmingham, who had two perch which weighed 10½oz.; second, Mr. J. Turner, junr., of the Ashted Society, Birmingham, 8½oz.; third, Mr. T. Billington, Highgate Park Society, Birmingham, 8¼oz. The largest fish caught was a perch of 8oz.; this was caught by Mr. Hailstone, of Malvern. After the completion of the weighing in, Mr. T. Coles, the President of the Provincial Angling Association, presented the cup and medals to the winners, after which he proposed a vote of thanks to the Editor of the *Fishing Gazette* for his kindness in presenting the cup for competition and bringing the various anglers of the different associations more closely together. This was seconded by Mr. T. W. Cundalo, and supported Mr. R. Wingfield, and the vote put to the competitors and friends was carried with great acclamation. The competitors and their friends were arranged in a group after the business was concluded, and photographed by Mr. Flamank, after which the members separated, one and all speaking in high terms of the way in which the contest had been carried out.

THE Small Heath Society held their contest on Monday last, at Wyre, near Pershore, on the River Avon. Nearly the whole of the members took part in the contest, which ended in Mr. G. Kemp securing first honours; Mr. J. Tolladay, second; and Mr. H. Hunt, third. The weight of fish taken by the winner was 1lb. 9oz.

THE Deritend Society fished their annual contest on Monday last at Wyre Piddle, Pershore, sixty-eight members competing. The contest was of three hours duration. The fish taken in this contest were a little above the average, as the winner, Mr. J. Munday, succeeded in capturing 2lb. 9oz.; Mr. G. Jukes was second; and Mr. J. Pratt and Mr. J. Simson tie for third honours.

THE Highgate Park Society held their contest also at Pershore, on Tuesday last, Aug. 4, in which Mr. C. Hall proved the winner; Mr. C. Osborne, second; and Mr. J. Hatton, third. The weights of fish caught were very low, which may be accounted for by the changeable weather, a severe hailstorm having passed over the district on the Monday previous to the contest.

A GENERAL meeting of the Birmingham Angling Association will be held on Thursday evening next, August 13, at the Birmingham Arms Hotel, Smithfield. The work transacted by the committee for the annual excursion and contest will be brought forward for confirmation.

WESTMEATH LAKES AND RIVERS INNY AND BROSNA FISH PRESERVATION SOCIETY.—A general meeting of this society, summoned by special circular, was held at the Greville Arms Hotel, Mullingar, on Thursday, 30th ult., Colonel J. R. Malone (chairman) presiding. Amongst those present were Charles Tottenham J.P. (vice-chairman), R. Macbeth (manager of Bank of Ireland), treasurer; Major Grant, and W. J. Thomas, hon. secretary; H. W. Lloyd, R.L., W. B. Gordon, James Doyne, J.P., &c., &c. The hon. assistant secretary, Mr. W. J. Thomas, read his report for the season of 1890 and '91, and also laid before the meeting an abstract of the receipts and expenditure of the society for the season, with list of subscribers, &c. On the motion of Mr. Doyne, seconded by Mr. Tottenham, a very hearty vote of thanks was accorded to the hon. secretaries, for their exertions on behalf of fish preservation in the Westmeath lakes and rivers. Major Grant replied, and said that all the credit was due to Mr. Thomas. The assistant secretary apprised the meeting that he had caught two men otter fishing upon Lough Owel at nine o'clock on the previous Wednesday, and had seized one of the illegal implements. The parties were ordered to be prosecuted. After the transaction of the ordinary routine business, the meeting adjourned.

FISHING EXCURSIONS.—The cheap Pulborough and Amberley railway trips for anglers and their friends are now being well recognised and appreciated. Some hundreds of people went down on the 2nd inst.; many more, judging from the tickets sold, are likely to go down to-morrow. Mr. Eldridge (late Clouts), of the Rose and Crown, gives them every facility by the fishing privilege tickets, which cost only sixpence through an angler to any person who wants them. There is a ride of one hundred and ten miles for half-a-crown to a lovely country, giving nine and a-half hours' stay in beautiful scenery.—RAMBLER.

"ILLUSTRATIONS," still under the editorship of Mr. Francis George Heath, will commence an entirely new series as a sixpenny monthly, on August 15, and continue thereafter as a mid-monthly; comprehending recreation, art, biography, literature, invention, science, economy, and fiction, profusely illustrated.

Holloway's Ointment and Pills.—For bad legs, bad breasts, scorbutic and scrofulous sores this is a genuine specific. The grateful and earnest gratitude of thousands who have experienced its unrivalled power over these complaints, and who have been raised from prostrate helplessness and a condition loathsome to themselves and others, renders it quite unnecessary to enlarge in this place upon its extraordinary virtues. The parts affected should be bathed with lukewarm water, and when the pores are thereby opened the Ointment should be well rubbed in, at least twice a day. It is always advisable to take Holloway's Pills in these disorders, as this much assists the Ointment action. The Pills check the fever, purify the blood, and eject all morbid matter engendered by these diseases.

NOTES FROM THE LAKE DISTRICT.

BANK Holiday has come and gone, with its expectations and disappointments, mainly the latter, and to many it has proved a blank holiday. Visitors have abounded in the Lake District, but the weather on Monday was wretched—cold and dull, with hail and rain showers. Considering the lowness of many rivers, the latter might have been welcome to anglers, but came in quantity only sufficient to make matters uncomfortable, without adding much to the volume of water. Sport has been poor as a rule. During the past month Mr. J. B. Wright has taken in the Sprutt some nice panniers, numbering together one hundred and nine fish; this in the evenings only and with the Red Ant. Another angler in the same stream had one night last week fifty-nine trout. The drought has afforded tempting opportunities to lads and others, who don't stick to legal methods, to take large numbers of trout from the rivers. I heard of a lad on the Mint who caught by hand over seventy good trout in his spare time in two days. Netting for salmon began on the Kent at Nether Levens on Monday. Between thirty and forty fine morts were drawn out of the deeps at Low Levens, but no grilse or salmon were captured.

POLLUTION and its effects on fish life, &c., continues to occupy the public mind. At a meeting of the Kendal Rural Sanitary Authority on Saturday, the condition of Lake Windermere was under discussion. The Medical Officer of Health (Dr. Craven) had done a bit of detective work as an ordinary passenger on one of the steamers, and reported what he had seen as to the throwing overboard of ashes, &c., into the lake, which it is alleged has continued for some time. This and the house-boat question was gone into, and eventually the inspector was ordered to keep a watch and report further to the board. The General Purposes Committee of the Cumberland County Council also reported that they had held an inquiry with regard to the alleged pollution of the Greta and the Derwent at Keswick. They found that the sewage of the town of Keswick was discharged by a close sewer into the river Greta, about a quarter of a mile below the town of Keswick, and that the water was thereby very seriously polluted; that the Greta flowed into the river Derwent, from which the water used for both drinking and all other purposes by the inhabitants of the town of Maryport was drawn. They also found that fish were destroyed by deleterious matter discharged into the Greta from the Threlkeld lead mines, and were unanimously of opinion that the pollution of the river Greta, and also of the Derwent, both by the sewage of the town of Keswick and by the Threlkeld lead mines had been conclusively proved, and recommended that steps be at once taken by the council, either by arrangement with the Lead Mining Company and the Keswick Local Board, that they will forthwith abate the nuisance, or else by proceedings under the powers given by the Rivers Pollution Act, 1876, and the Local Government Act, 1888, to compel those bodies to do so.

SALMON are now showing in some of the pools of the Derwent, though there is hardly sufficient water to fish these places properly and no salmon have yet been taken, although Mr. J. Pollock hooked one in the Cradles on Wednesday, and lost it after playing it for ten minutes. The most successful anglers have been Mr. S. Benson, grilse, 5lb.; Mr. W. Rook, three sea trout; Mr. J. Pollock, two; Mr. J. Troughear, one; Messrs. J. Douglas, T. J. Graham, Papcastle, one each.

NOTES FROM LANCASHIRE.

SATISFACTORY reports are still coming to hand of the sport in this district. The recent holidays have been taken advantage of to the fullest extent by local anglers, who have distributed themselves over every available fishing resort. Club contests are in full swing, but the results show no improvement on those already noticed. The securing of a prize appears of vastly more importance than the capture of the fish, and until this kind of fishing is relegated to a back seat, no elevation of the sport amongst minor clubs can be expected. In looking over the minute-book of a Lancashire club, we find the account of an excursion to a well-known lake, concluding in these words: "The members participating derived much benefit from the exercise obtained in rowing on the lake." What can this mean? We also hear that another club has changed its quarters owing to the quality of the beer not being to the taste of the members. What next? Amongst the local reports from Manchester, is that of the capture of a trout in private water, at Birch Vale, weighing 4lb. 2oz., 22in. long, and 12in. in girth, this fish was taken by Mr. Branthwaite, solicitor, of Manchester, and is probably one of the original stock put in by the late Mr. Bennett. Mr. Sam Brooks, of Ardwick, took 7lb. of fish in the Dane a few days since. Mr. Hodson has lately taken in two days' on the Wye and Derwent seven brace of fine trout. Fishing in preserved water, a local rod captured about seventy perch, weighing from just under 1lb. downwards.

MESSRS. WHITTAKER AND HARWOOD, of Blackley, who possess some very good coarse fishing, are now granting a limited number of season passes, no doubt they will be freely applied for, although the price of ten shillings is rather high. Still good fish are in the waters and are frequently taken. Wasp bait is a scarce commodity, and small quantities are fetching high prices.

THE following is the report of two members of the Bisketto Club, who have paid a visit to Ireland. River fishing generally very disappointing, except the Erne, where two days' splendid sport was obtained. Loch Rath produced two good days fishing, ten trout averaging three quarters of a pound. There are about twelve lochs simply full of fish, and entirely free. About the end of August there will be a good run of white trout and salmon up the rivers east of Donegal. In the vicinity of Donegal there is any quantity of brown and white trout, salmon and grilse, and permission to fish is freely given to Englishmen. The excursion, taken as a whole, has been most satisfactory.

SOME very good minnows have lately been taken in the Weaver and Dane. They were exceedingly fine, and in a few cases measured 6in. in length. The Dane gudgeon has long been noted for its size, and those captured during the past week have maintained the reputation of this river for this kind of fish. The Bollin is reported to be getting freer of pollution, and the fishing is much improved.

Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—EAST LONDON RUBBER Co., 8, Shoreditch, E.

NOTES FROM SHROPSHIRE.

HEAVY thunderstorms and constant rainfalls have made the hearts of Shropshire anglers glad during the past fortnight, for the river and brooks, which have been low for some time past have therefrom become swollen and turbid, giving ample promise of better sport when they clear. Anglers will do well to take advantage of the first suitable opportunity of fishing the river, as after this fresh some good fish should be on the move.

A CORRESPONDENT to the *Fishing Gazette* in "Notes from Lancashire" last week chronicles the capture at Llanymynech of a 15lb. pike, by an Oldham angler. The Severn and Vyrnwy are, unfortunately for trout and trout anglers, too well stocked with these voracious fish and the more of them that Lancashire and other county anglers can succeed in capturing in the Severn, the better will Shrophire anglers be pleased. Pike seem to be on the increase in the river, in the neighbourhood of Shrewsbury, and now that the local angling society is annually turning in thousands of trout fry, it would be well if they could obtain the permission of the Severn Board of Conservators to exterminate these fish. Pike anglers would scarcely complain, as the increased number of trout would more than compensate "the brotherhood" for the loss of piking, more especially as splendid pike fishing may be obtained in the many lakes and pools in the neighbourhood in which permission to fish is readily given by the county gentry, the more readily if obtained through the Angling Society.

"TEMPLAR," in his interesting and practical notes in last week's *Fishing Gazette*, in regard to the growth of Loch Leven and other breeds of trout in foreign waters, calls attention to the importance of ascertaining whether one variety of trout grows quicker than another if placed in the same river; whether Loch Leven trout, if put into a stream, thrive and rise as well or better than the local fish; and whether they stay or wander away. He says nothing can be said with certainty on these points, because in many cases, when strange fish are turned into a river, they soon resemble the local fish in appearance, so that it is almost impossible to identify them; but he mentions a case at the same time where they preserve their characteristics. Now, thousands of fry have been turned into the Severn in the neighbourhood of Shrewsbury for some years by the Shrewsbury Severn Angling Society, and their experience is that the Loch Levens, crossed with the common brown trout—which, by-the-by, are getting few and far between in this locality—thrive remarkably well. It has not been ascertained to what extent they "wander," although they almost entirely preserve their characteristics. Ample evidence is forthcoming of this, for many unmistakable Loch Leven trout have been captured in the river near the town, weighing up to 5lb. It is surmised that the fish do wander to some extent, or get destroyed by the more voracious fish, for the returns do not show anything like a proportionate increase in the number of fish to the number imported. That those which do domesticate themselves in the locality and escape their many enemies, thrive and grow fat, there is abundant evidence; never in the old days did such fine fellows as have been recently captured fall victims to the angler's skill. Still the imported fish have not thriven and increased and multiplied in anything like the same manner as those which have been turned into Lake Vyrnwy, although the water is practically the same. To account for this, however, it is only necessary to reflect for a moment on the superior advantages of Lake Vyrnwy as a "nursery." This large lake having only just been constructed, contains none of the monstrous trout and pike which inhabit the depths of old lakes and meres, no rough fish, plenty of natural food, and no pollution—verily, a trout's paradise.

NOTES FROM WORCESTER AND DISTRICT.

SPORT in this district during the week has been much below the average, particularly among the game fish. The water everywhere low and fine, yet the fly-fisherman's sport has been almost *nil*. With the maggot, anglers have been more successful, one sportsman, Mr. Martin Perks, taking seven brace of trout, weighing 10¼lb.; others, a few good fish; and at Martley, on the Teme, baskets of grayling of from six to ten brace have also been taken with the maggot, and a good few dace and chub have been caught with the same bait.

THE great event of the week has been the competition between the Worcester clubs for the Works on Angling, presented by the Editor of the *Fishing Gazette* (R. B. Marston, Esq.). There were five members from each club selected to compete, and all were present with one exception. The contest took place at Lulsley, on the Teme, on Mr. Greswolde Williams's water. Time, from three to eight p.m. The weather was most unfavourable, there being a thunderstorm during the early part of the contest and a drizzling cold rain afterwards, therefore, the take was but small. Weighing in took place after the contest, at Knightwick Station, the St. John's Club winning the prize with 6lb. 10½oz. of fish, beating the Izaak Walton Club by 9½oz., their catch being 6lb. 1oz., the other clubs being over 3½lb. behind. There were a great many fish caught that could not be weighed in, no coarse fish under 3oz., and no game fish under 4oz. being weighable; the majority rejected being within a ¼oz. of the requisite weight. Altogether the competition was much enjoyed, and the books much admired, and with a very hearty vote of thanks to R. B. Marston for his valuable gift, and success to the *Fishing Gazette*, the party dispersed.

NOTES FROM YORK AND DISTRICT.

A MISERABLE morn was Monday, Bank Holiday, for the angler. Rain poured down intermittingly throughout the day, and it was only the hardier few who braved the elements. The day had been looked forward to with no little interest, and many angling matches and parties had been arranged, several having to be postponed. Nevertheless, the more ardent few faced the discouraging situation, many being well repaid. Principal amongst the fixtures was the annual match of the York Angling Association, which, by the kind permission of Capt. Knight, took place in the Derwent, at Buttercrambe, on the Bank Farm, tenanted by Mr. Dale. The weather was not only unfavourable, but the river was also in flood, its surface being covered with floating grass. The water, too, was very muddy, and against successful angling. Some twenty-nine competitors, however, journeyed by omnibus and engaged in the match, and, indeed, considering the conditions, the catch was by no means a bad one. Mr. R. Broadley took the lead with 4lb. 13oz.; and Mr. J. Wood came second with 2lb. 7¼oz. Mr. H. Dacre had 1lb. 14¾oz.; and Mr. T. Laverach, 1lb. 10¼oz. There were also several smaller takes. Subsequently refreshments were partaken of in the farm buildings of Mr. Dale, who received the cordial thanks of the company for his kindness. Messrs. J. Ankers and E. A. Robinson carried out the arrangements with commendable promptness.

ANOTHER important and very popular fixture also came off in the river Swale, at Skipton Bridge, near Thirsk, on Monday. This was the Leeds and North Yorkshire's Twenty-fourth Annual All-England Angling Match. This competition, as will be seen when I say that no less than 266 competed, is yearly growing more popular in the angling world. Substantial awards, amounting in all to £25 were given, doubtless having much to answer for in the assemblage of so large a company. The water was favourable, and a large quantity of fish was taken, although individually the catch was not exceptionally large. Amongst the numerous prize-winners, the following were the chief: Messrs. L. Adams, Holbeck, first, 3lb. 1oz.; J. Hardy, Bramley, second, 3lb. ¾oz.; W. Neale, York, third, 2lb. 11oz.; T. Crowther, Leeds, fourth, 2lb. 10oz.; W. Henderson, York, fifth, 2lb. 10oz.; T. Singleton, Sheffield, sixth, 2lb. 10oz.; C. Hebden, Hunslet, seven, 2lb. 8oz.; A. Allen, Bobwith, eighth, 2lb. 7oz.; J. Wright, Stockton, ninth, 2lb. 5½oz.; W. Wright, Kelvington, tenth, 2lb. 4½oz.; J. W. Mason, Knaresboro', eleventh, 2lb. 4oz.; R. Cartman, Thirsk, twelfth, 2lb. 4oz., and others. It should be added that the required permission to fish was granted by the Viscountess Downe, Major I'Anson, Messrs. J. T. Rob, J. Hall, H. Smith, and J. Durham.

THE present season in the Codbeck, so far at least, is considered to have been one of the greatest success, more especially since the fall of recent showers. It is many years since so many nice trout have been secured, especially with the worm and brandling. Some good panniers were taken the other day north of Thirsk, and down-stream towards Sowerby, while near the North Eastern Railway Codbeck water tank some fine catches of grayling have been made, although this useful winter fish is scarcely in season as yet. Some fair specimens of the eel have been had south of the town, more particularly while the recent thunderstorms were in vogue, several captures ranging up to 1½lb. in weight. With the water being preserved, the quantity of fish of all kinds has vastly increased, and angling materially improved during the past two years.

NORFOLK BROADS PROTECTION SOCIETY.

LIST OF SUBSCRIPTIONS.—Walter Rye, Esq., £100; C. H. Parkes, Esq., £100; London Anglers' Association, £21; Sir Reginald Hanson, Bart., M.P., £10 10s.; A. J. Baker, Esq., L.A.C., £10 10s.; Gresham Angling Society Meeting (collection), £10 10s.; W. Y. Winthrop, Esq., C.U.A.C., £5 5s.; P. H. Stenning, Esq., L.A.C., £5 5s.; J. Butcher, Esq., £5 5s.; A. Fasola, Esq., £5 5s.; C. F. Howell, Esq., Stock Exchange, £5; Dr. J. A. Voelcker, £5; J. W. Clayton, Esq., £3 3s.; R. Symonds Butcher, Esq., £2 2s.; J. W. Trist, Esq., £2 2s.; E. R. Burtt, Esq., £2 2s.; W. N. Bennett, Stock Exchange, £2 2s.; W. M. Chinnery, Esq., L.A.C., £2 2s.; C. H. Mason, Esq., L.A.C., £2 2s.; E. M. Beloe, Esq., Norfolk, C.C., £2 2s.; Dr. Emerson, Cambridge, £2 2s.; T. J. Woodrow, Esq., £2 2s.; J. C. Chubb, Esq., C.C., £2 2s.; G. C. T. Bartley, Esq., M.P., £2; J. Roberts, Esq., 5s.; C. J. Layton, Esq., 5s.; Wm. Rule, Esq., 5s.; J. Green, Esq., 2s. 6d.

In addition the following amounts have been contributed locally to the Hickling Broad Defence Fund:—Public Meeting on February 19, 1891, in Robert Harvey's Barn, £5 6s.; Small amounts and Postal Orders, £2 3s. 6d.; Rev. A. A. T. Cross, Hickling, £2 2s.; Mr. J. Prickett, 10s.; Dr. Gordon, Ludham, 10s.; Mr. Hudson Barber, Palling, 10s.; Mr. Rawlinson, London, £2; Mr. Bell, Birmingham, 5s.; Mr. E. F. Shreeve, 5s.; Mr. W. Sacrett, 5s.; Mr. H. J. Waters, 5s.; Mr. W. Price, 5s.; Dr. Emerson, £1 1s.; T. A. Cotton, Esq., London, £5; Mr. Martin, London, 6s.; Mr. Benwill, London, 5s.; Collected by H. Palmer, Esq., £32 15s.; Sir J. Ramsden, £2; Collected by Mr. A. Nichols, of Stalham, £7; Collected by Mr. G. Beales, 15s.; Collected by Mr. Leonard Whittleton, £3 3s. 6d.; Collected by Mr. W. Trory, £1; Mr. Welden, 2s. 6d.; Mr. E. T. Gill, London, 19s.; Mr. H. Hacon, 5s.; Mr. Welsh, £1 1s.; Mr. B. Redwin, £2 2s.; H. Wilmer, Esq., £3 3s.; Mr. Robinson, £1 1s.; N. U. Norwich, £1 13s.; Robert J. Price, Sloane-street, London, £10; E. P. Livock, Esq., Norwich, 10s.; Smudge, 2s. 6d.; A. Slipper, Esq., Braydston Hall, 10s.

Cheques should be made payable to the Norfolk Broads Protection Society, and crossed "Lloyd's Bank."

NOTE.—The Norfolk Broads Protection Society specially desires to acknowledge also the kind assistance afforded by J. J. Colman, Esq., M.P., in allowing access to his most valuable library. Thanks are also due to Dr. Emerson, Mr. Lucas Hunt, and Mr. Hubert Palmer for the active help they have been so good as to give.

THE

CARBOLIC SMOKE BALL

WILL POSITIVELY CURE AND PREVENT

HAY FEVER

And also the most Severe Forms of the following ailments :

COLD IN THE HEAD	HOARSENESS	NEURALGIA
COLD ON THE CHEST	LOSS OF VOICE	HEADACHE
CATARRH	SORE THROAT	INFLUENZA
ASTHMA	SNORING	CROUP
BRONCHITIS	THROAT DEAFNESS	WHOOPING COUGH

One CARBOLIC SMOKE BALL will last a family several months, making it the cheapest remedy in the world at the price—10s. post free.

CARBOLIC SMOKE BALL CO., 27, Princes Street, Hanover Square, London, W.

James Ogden,

28, Winchcomb Street, Cheltenham,

Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.

Maker of High-class Salmon, Grilse, and Trout Rods.

JAMES OGDEN'S CELEBRATED MULTUM IN PARVO FLY RODS, £1 1s,

Every description of Salmon and Trout Flies Dressed on the Premises and despatched per return of post.

N.B.—NO CONNECTION WITH ANY OTHER PERSONS ASSUMING THE SAME NAME.

THE "STANDARD" MEAT BISCUIT COMPANY.

"STANDARD" MEAT BSICUIT FOR PETS AND PUPPIES

TESTIMONIALS.

St. Bernard Kennels, Gorgie, Edinburgh.

Sirs,

I have pleasure in testifying to the excellence of your Puppy Dog Biscuits. They seem to be made of the best materials. Puppies, soon as weaned, eat them with avidity, improve rapidly in size and strength, and are maintained in perfect health.

I think the "Standard" Puppy Biscuits supplies a want, and only requires a trial to be appreciated by breeders.

W. R. REID.

Scotland's Premier Kennel of Pugs.

I have pleasure in certifying that the Puppy Biscuits manufactured by the "Standard" Meat Biscuit Company are of a very superior quality, and are far the best and cheapest I have ever used; they are eaten readily by puppies as soon as they leave the dam.

I think the "Standard" Meat Biscuit Company have no equal as to their Puppy Biscuits. They seem as near perfect as need be. R. TAIT LINTON,
Pharmaceutical Chemist, Edinburgh.

The above Biscuits are specially adapted for House Dogs and Pets, and may also be given to Puppies immediately after weaning.

PRICES—24s. per cwt., 13s. per ½ cwt., 3s. 6d. per 14 lbs., not carriage paid. Or, paid to any part of the United Kingdom, 26s. per cwt., 14s. 6d. per ½ cwt., 4s. 6d. per 14 lbs.

THE "STANDARD" MEAT BISCUIT COMPANY, EDINBURGH.

PARKER'S SELF-STRIKING FLOAT.

By Her Majesty's Royal Letters Patent.

A BOON TO ANGLERS.

Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.

Price 2/6 Post Free.

ON THE BEAULY.

By Devonia.

"Here we are again!"—favourite words of that celebrated clown, Joe Grimaldi, and of every later day clown worthy of the title—were the words that occurred to me on finding myself once again "on the water," though for the first time this season. Tired of the scenes of former holiday-fishing and of water flogged and flailed to excess, I had gone to Inverness-shire to fish *new* water, and recruit exhausted energies with that most potent and pleasant of all medicines—a thorough change of scene and air. I knocked about enjoying the freedom and romance of not having anything fixed, and as chance would have it, I dropped for my first day on the Beauly. For the benefit of the stranger to this part of the country, I may preface my fishy remarks with a few facts relative to the geography of this noble river. The Beauly is formed by the junction of two considerable streams—the Glass and Farrar which, fed by other streams, drain their cognominal straths or glens (Strath Glass and Glen Farrar) and unite near Struy, where used to be an inn, with good river fishing attached. Lovat and the Chisholm (the chieftains respectively of the Frasers and the Chisholms) are the proprietors. From the junction the river, now the Beauly proper, has a course of ten miles to the Beauly Firth, a sort of small inland sea, which is an offshoot from the oray Firth.

The Beauly is a spacious highland river, *naturally* first-class for salmon, grilse, and sea trout, and to many of my readers it will be known, if only by the great achievements accomplished on it years ago by the late Lord Lovat and the now-venerable Colonel Duff. It is useless to recapitulate these "doings," suffice it to say that ten salmon to fall to a single rod in a day was then not uncommon. But what will better please and prove more interesting to sportsmen will be to learn that, notwithstanding the harassing netting, the river still, in good years, maintains its reputation as one of the "first-classers" of the North, as is evident from the information communicated to me by a local gentleman, that in recent years a score of thirty-four fish in a day was obtained by a man, under conditions same as those that existed when Lovat and Colonel Duff did so famously. But such a score I firmly believe was "just a mere chance," and I have no hesitation in saying that the Beauly, like most severely net-punished rivers, *is not what it was.*

The best angling for large fish is in June and the earlier part of July, *but water is needed.* A year when, at the time mentioned, the river is kept well up by heavy falls of rain once or so a week, is always—when fish are plentiful—a good fishing year. Constant "jumpings" of the river, from frequent plashes of rain or thunder showers on the hills, bring not with them such sport as the falling waters after a great saturation. They keep the fish moving upward or unsettled, and so not in the mood to take readily. The best chance for a strong head of fish pushing on past the netters arises with a clearing or but middling flood, during the weekly close time. At other times there is scarcely a chance at all, save during a tremendously heavy flood; but here as elsewhere grilse (for we speak of summer) are not very keen on facing the tumult, rushing, and force of "mighty waters." Although the period named is undoubtedly the choicest time for salmon and grilse fishing, being the grilse season, when these fish are usually plentiful, yet both earlier and later, indeed, from the commencement of April, all through the season, till near its close, sport of some kind may be depended on when there is water enough, and the weather is anywise favourable. A very favourite fact for the local authorities to impress upon the angler—one which they have always handy when sport is not forthcoming—is that on their river you cannot catch fish on account of the weather, albeit there are plenty of fish up. From personal experience I can testify to the truth of this, and I am afraid many other rivers may with truth have the same said about them. Still the inhabitants of this part of the country have especial reason to be aware of the fact, since cold easterly winds are notoriously prevalent with them during the spring months, greatly interfering both with the sport and the comfort of the angler.

The reach of river that I fished is just above the rather pretty and "tiny" town of Beauly, or in the *river* phrase of the "locals" from wast a bit of Beauly Bridge down to below the railway bridge—a fair length of water. It is rented by two gentlemen, each of whom has the fishing right for three days in the week, and it was through the courtesy of one of them (Mr. James Fraser, of the Priory Hotel) that I had permission to fish. Mr. Fraser is himself a keen and veteran angler, and leases the water more for his own pleasure than for other motives, such as the delectation of tourists or stray anglers. He is, however, I understand, intending to give up the hotel and the fishing; and should an enterprising man who is himself a sportsman, and knows how to cater to sportsmen—to their taste, comfort, and convenience—succeed him as landlord and secure exclusive right to the fishing, I have every reason to believe that the "Priory" would be well patronised during the seasons good for fishing. As anglers are increasing rapidly and vastly in numbers while free or nominally free fishing is in most parts getting curtailed, or becoming worse from year to year, I personally say that any addition such as this which those who cannot rent fishings or have more than a short holiday annually to fish could avail themselves of ought by all parties so circumstanced to be gladly welcomed. Anyhow should the present tenancy end, I trust that the water, by whomsoever secured or for what purpose, may fall into the hands of as good a sportsman as Mr. Fraser, whose record of sport for last year of five hundred fish, mostly sea trout, I should minimise if I did not call it splendid. One day he was almost up to breaking the record, having in just under two hours the good fortune to secure no fewer than forty-six sea trout. Often he does particularly well with a fly designed by himself, which consists of a small-sized salmon hook, having dark body and wings, with, underneath from the head, a piece of ribbed silver tinsel, which hangs loosely down. In the water this looks like a very bright needle extending along below the fly, and I fancy the fish take it for a small sand-eel, of which, in tideways more particularly, they are known to be especially fond. Mr. Fraser discovered his "patent deception" by accident. One day, some years ago, he had very good sport with a much-worn fly which had little left of it save the body; the tinsel was unwound and hanging down. "After filling his basket he went home and thought nothing about it," as he puts it himself, but the very next time he was out he found that the trout, although rising to the most approved flies, were yet not hooking at all well. Having tried everything without much avail, he at last put on the old worn bare broken-tinsel fly; when, lo and behold! at the very second cast it was greedily taken. Fishing on with it success continued to attend him until, when he had well-nigh filled his basket, up came a grilse and carried it away triumphantly! He had then "no ho" but to march home without further additions to his basket.

As the whole of this fishery is under tidal influence, not a single bit of it is any good when the tide is full. The angler consequently has to time his fishing to circumstances. The approved method of fishing such water is to advance fishing the water close behind the outgoing tide, and to retire fishing the water close in front of the incoming tide. But as often as not it may be found necessary to reverse the order—to fish "up" and fish "down"—for the purpose of taking full advantage, *whilst daylight lasts*, of both "settings" of the tide.

TWO DAYS' FLY FISHING ON THE TEST.

As we were contented with our morning's sport, and had a short time to spare, we seated ourselves on the bank of the river to enjoy the animated scene before us. As the day advanced the flies became more numerous, until at last the space about us was thickened with them to a degree which I had never witnessed before, except on the banks of the Colne, at Denham. The history of this beautiful insect is not yet sufficiently known, nor am I sure that I can throw much light upon it. The May-fly—or, as they are sometimes called, the day-fly—take their name from the shortness of their life. Some live several days; others do not take flight till the setting of the sun, and seldom live till morning, some exist an hour, others half that time. Mr. Barbut observes, with respect to those that live some days, that they have to cast off one slough more—an operation which sometimes takes twenty-four hours to complete. The ephemera before they fly have been decidedly aquatic insects up to that time; they remain in the states of larva and chrysalis for one, two, or three years. The chrysalis differs from the larva by having on its back cases containing the rudimentary wings. Both have on their sides small fringes of hair, which, when put into motion, serve them as fins. It is very curious to see them plying their little oars in the water. These larvæ scoop themselves dwellings in the banks of rivers, and they are small tubes made like syphons, the one serving for an entrance, the other for an outlet. The banks of rivers are often perforated with them. When the waters decrease they dig fresh holes in order to enjoy the water. The season and hour when the chrysalides of the different species of the ephemera turn into flies maintain a kind of regularity, being accelerated or postponed by the temperature, or the rise and fall of the waters.

The ephemeræ of the Rhine appear in the air two hours before sunset; these flies are hatched at the same instant in such numbers as to darken the air.

The females, by the help of the threads of their tail and the flapping of their wings, support themselves on the surface of the water, and drop their eggs into it.

Perhaps the most curious circumstance in the history of these ephemeræ is the fact that, after they have quitted the water and taken flight, often to some distance, they have to disengage themselves from a thin skin which covers every part of them. The exuviæ are generally found on bushes, so that some support seems necessary to enable the insect to detach itself from this skin. When the beautiful and delicate formation of the fly is examined, it is difficult to conjecture how the slough can be cast off from such fragile textures.

After having amused ourselves a short time in watching the movements of these interesting insects we returned towards our inn. On our way there I will give my reader a short account of my companion, Henry Warner. He was one of the friends of my early youth, and our friendship had remained unimpaired. His good-natured, cheerful, and social manners rendered him a delightful companion, and these were habitual to him. He resided at a small rectory in Suffolk, and there he was perfectly adored by his parishioners, whose welfare he studied, and whose wants he relieved to the utmost extent of his power. His feeling for distress amounted almost to a degree of weakness; for, to his money and his personal exertions, his tears were often added, when a case of misery presented itself to him. His moral character was pure, and his information various and extensive, to which was added a taste for poetry, in which he now and then indulged himself. It was in his own village, however, that he was always seen to the greatest advantage: here he seemed the friend and guardian of his parishioners, partaking with them in their innocent country amusements, instructing the ignorant, endeavouring to reclaim the vicious, and relieving the wants of all. His house was fitted up with comfort, and even elegance; and his library particularly was a proof of his classic taste. He took great delight in his flower garden, which sloped down gently to a pretty stream, which watered the roots of some magnificent tulip trees that flourished on the lawn. Here he had what Horace wished for—

> Hortus ubi et tecto vicinus fugis aquæ fons
> Et paulum sylvæ super his foret.—*Sat. 6, Lib. II.*

Warner was, like myself, fond of fishing, or rather, as I said before, of the enjoyment to be derived from strolling along the banks of a beautiful trout stream. It was in one of our annual excursions that he composed the following song. We were then, as at present, by the side of our favourite river "old Test."

MAY MORN; OR, THE ANGLER'S REVELRY.

'Tis the birthday of May! Up, brothers, I say;
Your tackle out-look, and let us away.
There's a cloudy sky, and a breeze from the west;
Oh! we shall have "killing" to-day in old Test.
CHORUS.
Sing trollillee, sing trollilloe!
Where the trout streams flow,
And the breezes blow,
A fishing, a fishing, a fishing we go.

What son of the angle would bear to lie sleeping,
While grayling and trout are all wagging and leaping?
With our flies and our skill our panniers we'll fill,
And friendship shall feast on the spoil that we kill.
Sing, &c.

March Brown, and oak-fly, and green grannam we'll try,
With the Caperer, Coachman, and Cowlady fly,
The red hackled Palmer, and gnats dun and blue.
Art and Nature shall smile as our sports we pursue.
Sing, &c.

Look, Hal! There's a thumper! He's mine for a bumper!
Look, Jack! Here's another! Good luck, what a jumper!
Our panniers are filling, and still we are killing.
Oh! we are the lads that are able and willing!
Sing, &c.

Hold! let us give o'er. See! we've killed a good store;
Not Izaak or Charley could ever do more.
Give the tribes of old Test a day or two's rest,
And give us a good song and a cup of the best.
Sing, &c.

Fill high to the joys of the rod, line, and hook!
Good luck to each brother, by river or brook!
May he fish all his life without trouble or strife,
And ne'er want a bottle, a friend, or a wife.
Sing, &c.

The two first of these wishes we enjoyed together at our snug little inn, in addition to the fish we had caught and our landlady's roasted chickens. We talked over our morning's amusement, and adjourned towards the evening to the banks of the river, accompanied by our attendant, who had been regaling himself in his usual situation in the chimney corner. I delight in the tranquillity of a walk by the side of a beautiful stream in the stillness of an evening. The song of birds has ceased, with the exception only of the sedge-bird, one of the prettiest of our warblers; the corn-crake also now and then interrupts the silence, and the chattering of starlings is heard as they settle for the night amid some neighbouring alders. Something disturbs a bittern from the sedges, and his *boom* seems to sound from afar as he takes his sullen flight. The beetle hums as it rapidly passes; and little white moths hover about the willows in every direction (trout appear to *suck* them in as they fall upon the gently-moving water, while others are caught by the bats as they leave their haunts in some old tree, and hawk about with a movement as silent as it is rapid and various). A bright star appears in the "ample sky"—

> "Eve's first star thro' fleecy cloudlet peeping";

and the moon, soon after the glowing red streaks of the setting sun have disappeared, emerges from a passing cloud, and adds to the beauty of the scene. Not a breath of air rustles among the reeds, but all is calm and tranquil.

"It was an evening bright and still
As ever blush'd on wave or bower,
Smiling from heaven, as if nought ill
Could happen in so sweet an hour."—*Moore.*

Although our success in fishing was tolerably good, it did not afford us so much gratification as the enjoyment of the beautiful evening I have attempted to describe. Having landed between us two brace of good trout, and returned some smaller ones to their native stream, we were proceeding to put up our tackle, when we were joined by Mr. Peebles, the proprietor of the water where we had been fishing and of a small landed estate in the neighbourhood. I had known Mr. Peebles in London, and had obtained his permission to fish in his part of the river whenever I pleased. He had been duly informed of our arrival, and now came to see what success we had had. He was one of those unfortunate men who, having sufficient to live upon, have nothing to do. He had been some years seeking for happiness in the metropolis, and not having been able to find it had purchased an estate in the country in the hope of finding it there. He was a good-natured man, fond of talking of himself, and never so happy as when he could get anyone to listen to his prosings. His great amusement—perhaps his only one—was fishing; and he might be seen almost daily sauntering along the banks of the river with his rod in his hand, and attended by a country lad. He could hardly, however, be called a fisherman, as he made more use of a worm than a fly in taking trout. He was, in short, anything but a disciple of Izaak Walton. Mr. Peebles had one great disadvantage—that of extreme ugliness. His eyes were large and far between, and almost seemed as if they were placed in his temples; his nose was wide and flat; and he had a multitudinous assortment of teeth; so many, indeed, to appearance, that he might be thought to have double the number which falls to the lot of most people; whether this was owing to his total want of a chin, or to some peculiar formation of his jaws, I know not. His figure was short and dumpy, but he tried to improve it by a smart waistcoat and a knowing sort of jacket.—*From Jessie's "Angler's Rambles."*

SOME SEA-FISHING STATIONS IN CORNWALL.

THE best time for the amateur is from the middle of July to the end of September, and this applies throughout the county, so that nothing more need be said as to the time. Fishermen from a distance visiting Cornwall would have to pass through Plymouth, and should make time to call on Mr. Hearder, or Messrs. Brooks, Plymouth, who would I am sure be pleased to give them information, and supply them with the necessary tackle and appliances as well as the best of advice. Plymouth itself is a capital centre for sea-fishing, and a little guide published by Mr. Hearder gives full information as to the sport. Generations of Hearders have made the subject a speciality, so there is a reputation to maintain.

The fishing in Mount's Bay was fully described in an article, "Where and How to Fish in Cornwall," which appeared in the *Fishing Gazette* of June 6 last. The information as to Mount's Bay fishing contained in that paper was given by an amateur, who has made sea-fishing a particular study for over twenty years; and gentlemen who require any further information could not do better than write to Mr. Kinsman, bookseller, Penzance, and I am quite sure he would courteously, promptly, and fully reply. The methods described in the paper referred to above will, of course, apply to all the stations with little variation. The whiffing for pollack and mackerel is very good with both natural and artificial baits—the former including the rock lug and strips of mackerel and pilchards, and the latter the various spinners and artificial sand-eel supplied by Mr. Hearder. Good sport may be obtained from Penzance and Newlyn piers, angling with rod and line for small pollack. The ground fishing is also very good with the usual baits, those chiefly used here being pilchard and mackerel. Large pollack, bream, chad, pouting, cod, ling, John Dory (only occasionally), gurnards are taken; and, by night, in addition, conger and hake. The charges for man and boat would be about five shillings a day, or sixpence an hour without a man; and hotel and private lodging charges at Penzance and Newlyn West—about a mile from Penzance—are moderate. The police-constable at Newlyn can recommend a steady and trustworthy boatman.

For the fishing in and about Falmouth Harbour the visitor might put up at Falmouth itself, or better, perhaps, at St. Mawes, three miles distant by steamer. And there is the pretty little village of Portscatho, five and a-half miles from Falmouth. The charges for hotel accommodation and for private apartments are moderate, and a boat and man may be secured at from £1 a week. Whiffing may be had with natural and artificial baits, and ground fishing with the usual lures—pilchard, cuttle, &c; and bass may be taken from the shore, at three hours' flood up to high water, and are also taken with the fly. The seine fishing is very interesting.

Sennen or St. Just might be taken as a station for the fishing in Whitesand Bay, quite close to the Land's End. Private lodgings can be had, and the charges are moderate as to boat hire. The most usual course appears to be to take fishing with the professionals and tip them.

At Mevagissey the accommodation for visitors is limited, and is all taken up to the end of August; Mr. Blight, Alma-terrace, will then have an opening. Whiffing for pollack and mackerel is practised, and fly-fishing for bass. Edwin Mills, Meadow-street, Mevagissey, St. Austell, fisherman, might be written to for information, and he supplies patent worms for pollack. The charges for man and boat are six shillings per day, or thirty-five shillings per week. Mevagissey is six miles from St. Austell (G.W.R.), and public conveyances run at nine a.m. and five p.m.

Some fishing may be had by the amateur in Par Bay, by staying at Par or Tywardreath. The cost of boat and man is about six shillings per day, and charges for board and lodging are moderate.

Polperro is eleven miles from the nearest railway stations—Liskeard or Menheniot—and is a quaint village, a capital station for one fond of quiet (there are only about eleven hundred inhabitants), and the fishing is capital. Whiffing and ground-fishing are indulged in by visitors with the customary baits, and boat and man may be engaged for from six shillings a day to thirty shillings a week. Hotel charges are moderate (there are four licenced houses), being thirty shillings a week for a single gentleman, and twenty-five shillings each for two or more. In private apartments the charge for a single person for sitting and bedrooms and attendance is fourteen shillings a week.

The population of Looe (East and West) on the banks of the river Looe, where it enters the English Channel, are supported almost entirely by fishing and by shipping granite and ore from the Caradon district, but in the season (now) it has a fair number of visitors. Amateurs can and do fish for mackerel, pollack, bass, &c., with lance and lug-worms, and other baits, natural and artificial; but fly-fishing is not attempted. The cost for boat and man is about five shillings per day, and hotel charges range from £2 to £2 10s. a week, whilst in private lodgings they range from twenty-five shillings a week upwards. The scenery is very interesting, the rivers being richly wooded, and the coast-view commanding several miles of the English Channel, including Rame Head, Eddystone, Downderry (also a capital station), &c. East and West Looe are connected by a handsome, but narrow, old bridge, 384ft. long, of fourteen arches; date 1,400. Tregellas says: "The narrow, irregularly-built, steep streets, and hanging gardens of East Looe, where myrtles and fuchsias luxuriate in the open air, give a foreign aspect to the place." At the mouth of the harbour is St. George's Island (called also S. Nicholas's and St. Michael's). There are two trains to Liskeard, and 'buses run to Menheniot, distant four miles.

St. Ives is beautifully situated, is an improving town, and is the principal place for the pilchard fishing, half the pilchards exported being from St. Ives. Whiffing and ground fishing are both practised with the usual baits. The charge for boat is sixpence per hour, and for boat and man from £1 to £1 5s. per week. The cost of living (bed and board) varies from £1 5s. per week at the Temperance Hotel, to from two guineas at the Queen's Hotel, and private lodgings can be had by arrangement.

Few amateurs visit St. Agnes on the north coast, four miles from Chacewater station, and the fishing station cannot be called a good one, the drawback being the same as at Bude—namely, the prevalence of ground-sea. Mackerel, bass, pollack, whiting, &c., are taken both by whiffing and ground fishing. Charges are moderate all round. Perran Porth, in Perran Bay, with a fine extent of beach, is four miles distant.

At the charming resort of Newquay, sea-fishing is very little affected by the visitors, though the usual pollack, bass, and mackerel may be had. Boat and man cost five shillings a day, and James Clemens, George-terrace, is an old fisherman, a steady man and well recommended. At the hotel the cost is about six shillings and sixpence a day. Private apartments are now nearly all full, and all are engaged for August. Besides the train service, the North Cornwall coach arrives from Launceston, at a quarter-past ten p.m., on Mondays, Wednesdays and Fridays, returning alternate days.

Not much fishing is done by amateurs at Padstow and Port Isaac. Bass and plaice may be got in Padstow Harbour, and whiffing for pollack and mackerel outside the harbour. The charges for boat and man are strictly moderate—one shilling per hour, four shillings per day, or eighteen shillings a week. Mr. Hickey, a naval pensioner, of North Quay, Padstow, might be applied to for the supply of boat, &c. Hotel charges and private lodgings are also moderate. The nearest station is at Wadebridge, eight miles distant, and public conveyances meet the trains.

At Bude, fishing for bass may be had, with ground-bait from the rocks; and from the breakwater up to the loch gates with the fly when the tide is flowing. Boating is found next to impracticable, and it is very rare that a boating party ventures off. Prawning may be had in the weedy pools at Widemouth (within walking distance of Bude), and affords capital amusement. There are coaches twice a day from Holsworthy on the L. and S.W.R., ten miles distant, and on alternate days from Launceston (G.W.R.). Mr. Brendon, who probably does more miles of coaching than any other man in England, also sends a coach daily to Clovelly, and another to meet the North Cornwall coach at Tintagal, passing through Boscastle.

DEATH OF DONALD GUNN.—We regret to hear from Mr. Murdoch that our old correspondent, Donald Gunn, who used to send us such quaint epistles now and then, is dead. Mr. Murdoch has promised to send us his photograph and a brief biographical notice, which will interest many of our readers who knew Old Donald, and many who did not also.

A GOOD EXAMPLE.—If all town councils, county councils, local authorities, &c., were as exact in demanding their full rights with regard to river pollution as the town council of the city of Aberdeen is in regard to the Dee, and would back up their demands with the same force of will and persistency till they attain their ends, the results to anglers in the first place—and with which class we are wholly concerned—would be incalculable, and so far reaching as to be almost incredible. Disease would vanish, and the stock of the trout and salmon increase with such prodigious strides that the wail of the empty creel would be heard in the land no more.

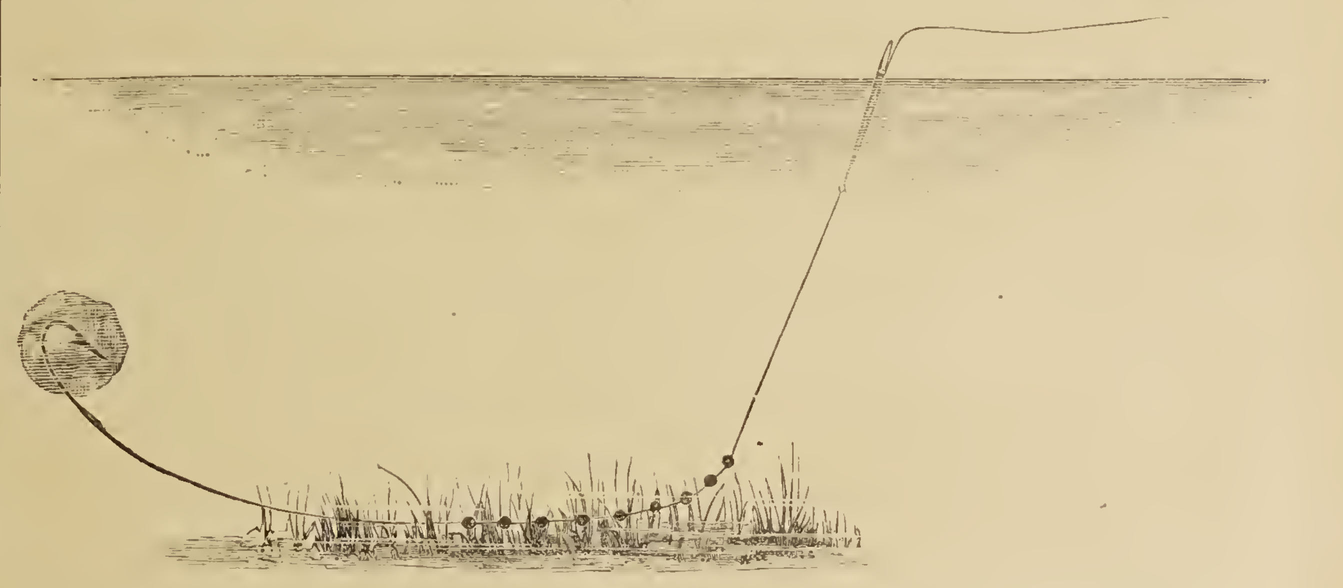
Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—EAST LONDON RUBBER Co., 8, Shoreditch, E.

ANGLING FOR ROACH WITH AND WITHOUT A CHAIN OF SHOTS, &c.

BY THE O. O. D.

I WONDER how many times I have seen anglers (especially tyros) legering for roach with a float in *very gentle streams*, with a chain of shots, averaging five or six to the inch, attached to the gut some twelve or fifteen inches from the hook. I should be very sorry to say how many, and it would take too long to state the different reasons advanced for using these (to me) obnoxious chains. Of course the idea is to keep the bait well on the bottom, but I am perfectly certain that a similar chain of shots would keep the bait well on the bottom in much stronger and swifter streams than those to which I allude. It very often happens that a roach will rise after taking the bait, and when I say rise, I mean rise to a considerable distance, and in this case the entire chain must be displaced to communicate a movement to the float. For instance, if a fish only raised, say, five out of ten shots, the remaining five shots would rest motionless on the bottom, and the probability is that with such a resistance the bait would be ejected.

A tench, for instance, cannot very well open its mouth and take (say a worm) off the soft bottom of an old pond, &c., without taking a portion of mud in with the bait any more than I could, and this must be got rid of before placing and finally swallowing the bait. At all events, I have every reason to believe that it *is* got rid of. A fish rising thus with the lure may enable him to perform this operation with greater ease and comfort to himself—I say *may*, for I have no positive proof; but I have frequently seen several species of fish gently rise and blow all sorts of things out of their mouths, including silt, sand, tiny stones, dead insects, and other material. When a fish is thus rising, after taking the bait with a chain of shots resting on the bottom, the result is likely to be disappointing, for the angler only strikes at the chain, and I should think he would miss three fish out of four. It appears to me that no matter what shape the chain of shots assumes or change it undergoes, from the moment the fish attacks the bait until the angler finally strikes, everything is in favour of the fish, and the sharper and quicker the stroke the better for the quarry. Again, there would necessarily be considerable resistance before the whole of the chain was lifted, and the probability is the roach, &c., would become alarmed, and eject the lure without the angler being a bit the wiser; fish are caught sometimes by pure accident without the angler perceiving the slightest indication of a bite—I have seen it done repeatedly; but even in the act of a roach blowing out the bait, a slight movement was communicated to the tell-tale, and if the angler struck he would be too late and strike in vain, for the heavier the weight (dead in this case) the heavier, of course, the resistance, and not a single shot more than is necessary should be used to suit the force or run of the stream.



On the other hand, when light legering with a float in a gentle stream, with all the shots resting on the ground (say four moderate-sized shots) I place them wide apart for the simple reason that it is so much easier for a fish to lift one or two shots, than if he had to lift a chain of eight or ten shots. When thus fishing with the shots placed wide apart, the first shot being moved on the light tackle, the angler quickly receives notice that a fish is there, and the moment this occurs he should lift his rod gently, and if the fish has got it or means business, the float is soon sneaked under, and during this operation several of the shots are being lifted off the bottom, and consequently the stroke is directly on the roach, and not, as in the former case, directly on the chain; for when a roach raises the first shot nearest the hook there is such a slight resistance with the shots placed wide apart, the stream naturally affects the remaining shots; but in case of a number placed close together, the resistance in a gentle stream must be very considerable.

This to the Novice.—The moment a bite is perceived, and the float displays an uneasy motion—twitch, twitch, twitching—raise the rod-top gently as the float is disappearing, which will instantly bring the tackle in a line with the fish; or, in other words, always endeavour to strike with the run of the line, and not in the least against it, the rod-top going with it as it were. If possible, to be more explicit, at the first onset there is a sort of uneasy, jerking motion of the float (very similar to the bites obtained when floating with the bait off the bottom): this erratic behaviour on the part of the "tell-tale" gives the angler warning; then, after waiting until the float is being sneaked under, he should lift his rod-top before striking, and this action prevents the angler striking the shots, but the whole thing is almost done as quickly as striking when following the float down with the point of the rod in the ordinary way; yet an angler striking in the ordinary way would most certainly hit the shots and consequently miss his fish if the shots were placed close together, as previously explained. On the other hand, I should say that using a bullet would be fatal to success in legering for roach in the quiet gentle swims to be found on many portions of both the Thames and Lea; for unless the fish were mad on, many a bite would never be detected in the comparatively streamless water, and thus it is that light legering with a float, when using three or four shots, has gradually grown into what may be termed a perfect science. This method may be adopted when fishing either with paste, a pellet of *bread and bran*, or a small bunch of gentles, &c., and the very best fish in the swim are often captured by this method when every other fails.*

(To be continued.)

"DANESFORD."†

THE plot of "Danesford" can hardly be described as very original, but Mr. Carter Harrison has succeeded in making a sufficiently interesting story out of it. There is the rustic beauty inevitable to such a tale, gifted with surpassing personal attractions and extremely provincial English, her decidedly jealous and hot-tempered Yorkshire lover, and the wicked admirer, who, of course, hails from London, and whose club would seem to be the Isthmian. Apparently they are dreadful gamblers at that establishment, as well as enthusiastic admirers of rustic beauty. Then there is, of course, the race meeting, where the wicked Londoner, thinking to get back some of the coin he has dropped in Piccadilly at whist, backs a "dark 'un" at a long price, which loses by a long nose or some such nominal distance. The young lady aforesaid has even a third admirer (also a Londoner), on whom the rural and legitimate one is about to execute summary vengeance, when the former, fortunately for himself, tumbles gracefully (see the cover) into the Kelpie's Hole.

---

* The fish is supposed to be rising with the bait.

† "Danesford: A Novel," by Carter Harrison. Messrs. Ward and Downey, London.

Mr. Harrison's angling incidents are pleasanter than those of the race-course, and a very delightful trout stream must that Yorkshire one have been, by whose banks the *dramatis personæ* of "Danesford" fished and flirted and quarrelled. Fancy a piece of water where a couple of rods can kill eighteen brace of fine fish in a short day; it makes one's mouth water to read about.

One of the Londoners elicits the approval of the old local expert by the capture of a trout at a distance of more than twenty yards. The performance is thus described :—

"'Noo, sur ; noo's yur time to prove yourself,' he said to Sinclair, with a touch of derision in his voice. 'Catch that theer fish, and I'll haud yo' a good fisherman.'

"'All very well, Thompson ; but it is a long throw, and the fish will dash into the weeds as soon as he is pricked. I should have no control over his first rush at that distance.'

"But he determined to try, nevertheless. At the worst, it could only mean a loss of tackle. So he removed the top fly from the cast, lest that should catch in the weeds, and destroy from the first any chance of success ; and then, carefully letting out line with experimental throws, he at last cast directly to the fish. The line fell short and rested on the weeds ; but with a dexterous touch he freed it, and then, drawing more from the winch, he essayed again. It fell right over the trout, almost on his nose. Sinclair feared that it was too near, that he had frightened it. But no ; with a sudden plunge, as if he were anxious not to miss this dainty morsel, which seemed to alight so unsuspiciously near him, the trout gulped down the fly. A sharp stroke from the wrist, harder than he would have ventured upon in an ordinary way, which put the tackle to a severe test, and the trout, in sheer amaze, leaped fairly out of the water and on to the weeds.

"Sinclair at once put a strong, steady pressure upon the line, and so prevented the fish from getting his head down. Flopping, floundering on the weeds, out of his element, unable to put in force his instincts of safety, which prompted him to dive, the trout, helplessly rolling, was drawn over the weeds, and fell into the swift deep water on the near side. And then he dashed to the bottom—here, there, up-stream, and down, now making a determined effort to reach the weeds again, and now in despair throwing himself into the air, only to fall upon the water more spent than before. A gallant struggle he made for life, but too late ; the strength which would have saved him on the far side of the weeds was of no avail here. His struggles and rushes grew weaker, and yet more weak ; and at last, with a gasp—one could imagine a gasp of despair—he turned upon his side, and, drawn gently yet firmly, to the bank, the landing-net encircled him, and in triumph he was borne to the bank."

An hour or two may be very pleasantly spent either by the angler or the novel reader among the pages of "Danesford."

Notes and Queries

A friend who is fishing in Ireland writes: "Dear Mr. Marston,—Your correspondent, 'Old Otter,' quotes the saying, 'All millers should be drowned in their own dams.' I quite agree with your correspondent. Had the prayers of dry-fly fishers been of any use, not a miller now would be in existence. Talking of strong language, you should just see those Moy grilse—splashing everywhere, and not a fish will take. They beat Hampshire dry-fly trout 'hands down.' You probably are fishing somewhere, and I wish you better luck than has fallen to the lot of yours ever, Red Gauntlet." Millers are very aggravating at times, no doubt, but we confess we have, as a rule, found them very civil and obliging. Anglers cannot expect millers to regulate the river just to suit them. Of course, there are curmudgeons—perhaps stirmudgeon would be a more appropriate name for them !—in every business. We should be as sorry to see the last of our jolly millers as we should be to hear the teetotallers had succeeded in shutting up all the country inns, and anglers had to lodge at their temperance hotels.

Mr. Charles Lowe, New-street, Birmingham, advertises "a magnificent copy" of the 1836 Edition of Walton, for £21 10s. and another copy of the same edition for £19 10s. Both editions are "Pickering's."

Mr. W. Garden, 122½, Union-street, Aberdeen, is advertising some salmon fishing to let, in our columns this week.

Whales Captured in the Thames.—On Thursday last week a whale was caught in the Thames, within a few yards of the lower Powder Magazine at Creeksmouth, Barking. The monster got stranded on the mud about 50yds. from the shore, and, although the tide was up, it was not able to extricate itself. It struggled violently upon the captain and mate of a barge piercing it with a boathook, but its struggles were soon over, and it was hauled up some distance on to the shore and fastened to the bridge head of the magazine. It appears to be a sperm whale, a Physeter, from which spermaceti is obtained. It is of a very light colour, and measures 25ft. from the tip of its nose to the centre of the back fin. It is 18ft. in girth, and 6ft. 6in. across the tail. On Friday evening, as a number of Leigh men were fishing off the Nore Lightship, they saw a large whale disporting itself in shallow water. Messrs. John Johnson, E. Johnson, J. Harvey, N. Partridge, F. Rand, J. Noakes, E. Druse, Jack Johnson, J. Cotgrove, and S. Cotgrove immediately made for the fish in small boats. It was seen to be stranded, and, to effect its capture, a kedge anchor, attached to which were twenty fathoms of rope, was thrown overboard. A running noose was then skilfully thrown over the tail of the whale, and the kedge was taken to its extreme length. John Johnson, armed with two knives, jumped into the water and hacked a hole under the whale's left fin. A boathook was then inserted and pushed by five men about 3ft. into the whale's head, after which the leviathan gave up the ghost. The tide soon floated the whale off, and it was towed by five fishing smacks to Leigh swatch. On Saturday morning it was conveyed to Mr. Tomlin's wharf, where it has since been exhibited. About twelve hundred people paid to see it. Dr. J. Murie, of Leigh, who is an authority on whales, says that the creature is a male adult of the bottle-nosed species. He says that the whale at Barking is of the same species, and is almost identical in size and dimensions. The length of the whale under notice is 26ft., girth, 16ft., and breadth from tip to tip of the tail, 7ft.

The Fly-rod adn Line.—"This is a subject on which much might be written with advantage to the angler and a corresponding disadvantage to the fish, but at the moment it is only proposed to offer some suggestions on the importance of a proper proportion between the rod and line. Every angler is supposed to know that the reel should be of such a weight as to properly balance the rod, but not one in ten is aware how still more important it is to have a line of proportionate weight or thickness and strength. With regard to strength, the weakest part of the line is usually the gut cast, and it is in trout fishing especially that care should be taken to avoid using a very stiff rod with a fine cast. If the rod is stiff, the cast must be fairly strong, or when a trout seizes the fly and dashes off suddenly, as trout often do, especially in swift waters, there is as likely as not to be a break. In the slow-flowing streams of the south, where the trout are corpulent, and a trifle more stately in their behaviour, a short, stiff rod is sometimes used in skilful hands in combination with a fine cast, but it is a dangerous practice. It may be stated as a general rule that the stronger the stream, the more limber within certain limits must be the rod. The whippy Castleconnell rods used on the Shannon above Limerick are the result of the experience of ages. In those rapid waters where, in trout fishing, at any rate, it is not the custom to play the fish down-stream, but to bring him up to the boat against the current, and that, too, on fairly fine tackle, a rod which is whippy and at the same time fairly powerful is an absolute necessity. The Castleconnell rods have these two merits, and on them is based, to a great extent, the modern greenheart fly-rod. The English fly-rod of Francis Francis's early days was tapered gradually and evenly from the butt, which was in consequence exceedingly thick. The rod of to-day, a modified Castleconnell, is fined down considerably immediately above the handle, while a good weight of wood is left not far from the top, so as to give what is termed lifting power. It is probably as good a weapon for fly-fishing as will ever be made, combining, as it does, a number of good qualities which were not found in the hickory poles used by our ancestors. The value of a heavy line for accurate casting is better understood down south than in the north, where to cast a fly to the fraction of a foot is of less importance than in the chalk streams. In considering this matter, it should be understood at the outset that every rod has a weight of line which suits it best, and that, practically, the rod is more or less whippy according to the weight of line it is given to cast. Thus, if a man has to fish principally in narrow streams where long casting is unnecessary, he may safely use a stout line, even if his rod is inclined to be whippy, for such a short length of line will be used that the rod will not be overweighted. But should he, with that same rod and line, go to wider streams, where casts of 15yds. to 20yds. are necessary, he will find on getting out that length of line that the rod will be overweighted. Fly-fishers cannot, of course, always fish casts of the same length, so they have to find the line which is generally most suitable to their rods. If a rod is inclined to be too stiff, the fault can almost invariably be cured by means of a heavy line. Some north-country and Scottish anglers may object to stout casting lines on the ground that they scare the fish, but we refer, of course, to lines which are tapered at the end next the cast (but for not more than 5yds.), so that the stouter portions are never visible to the fish unless the water is flogged over in the most careless manner. Generally speaking, we would say abjure weak, whippy rods which will only carry light lines, and are therefore useless for casting against the wind; but rather choose a modified Castleconnell, which will carry a heavy-tapered line, and with which, in anything short of half a gale, the fly can be placed with considerable accuracy. English built cane-rods, it may be mentioned, will carry heavier lines than rods made of wood."—*The Field.*

The Colouring of Fishes.—Various explanations have been suggested for the fact that most flat fish have the dorsal or upper surface coloured, and the ventral or lower surface white. It has been said that the white ventral surface protects the fish, for the surrounding water with the light shining through it has about the same tint, and so an enemy floating below and looking up could not distinguish him. Recent interesting experiments to discover the influence of sunlight on the colour of flat fish are noted in the *Revue Scientifique*. Having placed a few young fish in a glass vessel, the experimenter covered the sides and top of the vessel, placed it on a support, and beneath it so arranged a mirror that the sunlight was reflected into the water, and illuminated the ventral faces of the fish, while the dorsal faces were in darkness. The natural conditions were thus reversed. The water was frequently changed, and the fish were well fed. At the same time similar fish were placed in a glass vessel, and exposed to the light in the usual way. The result was that out of thirty fish exposed to the sunlight from below, only three remained like those in the ordinary glass vessel, and the others developed greater or less quantities of pigment cells on the ventral face. This indicates that light has an important influence on the colour of animals, but it evidently is not the only influence to be considered, since some animals whose habitat is dark have colour.

⁂ **Club and River Reporters will oblige by sending in their Reports early in the week.**

ANSWERS TO CORRESPONDENTS.

A. H. W., Leeds: Mr. Walbran, New Station-street, Leeds, could doubtless procure the glass minnow trap, which is made, we believe, by Messrs. Alfred and Son, Moorgate-street, London.

G. H., Harwich: The copy you have of "Walton's Angler" is worth about 10s. 6d., if it is in good condition. It is not a scarce edition.

F. R. Windsor: Write to Mr. King, station-master, Grove Ferry; he will be able to inform you about the fishing there.

Correspondence

[We do not hold ourselves responsible for opinions expressed by our Correspondents.]

A DACE WEIGHING 1LB. 4OZ.

Dear Sir,—Mr. Mark Gooch, of Hammersmith, a member of our club, has been fortunate enough to capture a dace weighing 1lb. 4oz., taken from the Thames at Sunbury, measuring the extreme length of $11\frac{3}{4}$in. We shall be pleased to hear your opinion as regards this extraordinary specimen. Not having heard of a larger dace being taken from tidal water, I believe this to be the champion. I may mention that the specimen is now being set up for exhibition.—Yours faithfully,

J. J. Hunter,
Hon. Sec. West London Angling Club.

[We should have liked to have seen this big dace—certainly a most unusual size.—Ed.]

ANOTHER "RED PALMER" IN THE FIELD.

Dear Sir,—In last week's *Fishing Gazette* some angler writes under this *nom de plume*, asking how to catch trout, and you, with your usual courtesy, recommend a dry fly. Having been a dry-fly fisher for about fifty years, twenty years of which I have written frequently to the sporting papers as "Red Palmer," and having published a book on fly fishing with that title, I can imagine some of my angling friends opening their eyes with astonishment that I should want to be told how to catch trout. I presume your last week's correspondent was not aware of the above facts.—Yours truly,

James Tayler,
Sec. Gresham Angling Society.

[It is impossible for any Editor—year in, year out—to keep a constant look-out to see a *nom de plume* is not appropriated by some other writer; but we have constantly changed a *nom de plume* when we have noticed it was one already in use.—Ed.]

SULKY TROUT.

Sir,—Would "Red Palmer" mind trying on that hill lake of his, when he gets a nice breeze, a cast of the very smallest flies, as *unlike* the natural insect on the spot as possible?—Yours, &c.,

Mona.

FISHING NEAR SOUTHEND.

Dear Sir,—If your correspondent, A. George, will communicate with me, I may be able to give him information as to above.—Yours, &c.,

Herbert Frost.
24, Stanley-road, Balls Pond.

THE DUKE HAS SHUT HIS GATES.

Sir,—Arundel Park is to be opened no longer to London anglers to see and admire, and any tenant on the Duke's estate caught taking in London anglers *will be dismissed.* So I hear. What a dreadful lot these London anglers must be!

I recollect on one occasion I wanted to make a narrow cut across a field—it was my first visit—and a dozen or two of these dreadful fellows bawled out, "Come out of that!" "Hi, hi! you have no business there, sir!" I wonder if a *native* would have taken the trouble. Not he. Hundreds of pounds are annually spent by London anglers in the town of Arundel and the surrounding villages in the season; and if these excursions are stopped, many a widow will go short of her rent money, and many a poor man of a good meal. I don't know how many dozens of eggs were consumed by London anglers only last Sunday. This means food to the cottagers, &c.; and money spent like this is a better investment than that spent in London pubs. on bad gin and worse beer.

Yes! the Duke has shut his gates. But the Duke, thank goodness! cannot shut up the noble river or the lovely scenery to be found in this part of the country, nor prevent pent-up, jaded, and hard-working London anglers from breathing the pure fresh air of heaven once in a way.—I am, &c.,

M. A.

MARKING FISH.

Sir,—In your issue of the 1st instant I notice that your correspondent "Templar" suggests the marking of fresh-water fish with a tablet, as is usually done with respect to salmon and other salt-water fish. I quite agree with him as to the importance of the course he suggests, but I think he will find many objections to scratching the weight of the fish and other particulars on the tablet before returning it to the water. A far more convenient course, in my opinion, is to have merely a number on the tablet, and for all particulars to be entered in a register book kept for that purpose. By this means all particulars respecting any tablet can be at all times ascertained, whether the tablet itself is recovered or not. Of the importance of this I will give you a short instance.

In a local paper, dated April 20 of the present year, a notice appeared of a "pike" having been shot in the river Itchen on the Saturday preceding, to one of the fins of which was attached a label bearing the No. 132.

My attention was shortly afterwards called to the paragraph by a gentleman who thought it might refer to a salmon marked by me, as the supposed pike was shot in salt-water, where a fish of that description would not be found. As, however, I had no labels with numbers exceeding one hundred for any river, I thought at first that it could not relate to any fish so marked; but it afterwards occurred to me that the number might be "32," and the initial letter "I," for Itchen, might be mistaken for a figure, and thus make the number "132."

I accordingly referred to my register of facts, and found that No. 32 had with other labels been sent to a gentleman who resided on the Itchen a short distance below Bishopstoke, and who had kindly promised to mark certain kelts for me. I therefore wrote to him to know what he had done with the labels sent to him, and in reply he informed me that label No. 32 had on the 11th of April been affixed to a salmon in the river Itchen, not far below Bishopstoke. I then made inquiries from a gentleman who had seen the label attached to the supposed pike, and showed him a label precisely similar with the exception of the number, and he at once stated that the two were identical. I afterwards caused the man who had shot the fish to be seen, and he promised to send me the label; but he failed to do so, probably knowing that the shooting of a kelt salmon was illegal.

There can, however, be no doubt that, by means of the label and register I, was enabled to prove to absolute certainty that the fish marked below Bishopstoke on the 11th of April, and the one shot near Northam in the salt-water on the 18th of April, were one and the same.

In case "Templar" should like to see one of the labels and a sheet of the register of facts used by me, I enclose them for his inspection.—I am, Sir, your obedient servant,

Henry G. Green.
Laverton House, Hill, Southampton.

[We have sent the label on to "Templar." Mr. Green's letter is interesting and useful.—Ed.]

BADGER FLY FOR SEA TROUT.

Sir,—In reply to D. W. Brearley, for dressing of Badger Fly, I have enclosed pattern of a good one. He can get them from Hardy Bros., of Alnwick, made sea trout size, with yellow tag, or three turns of flat gold tinsel at tail.—Yours truly,

44, Liberia-road, Highbury, N.
Liberia.

Dear Sir,—In answer to Mr. D. W. Brearley, in last week's issue, this fly is tied in the following various manners. Hook, from 4 to 8 Adlington sneck-bend size; a small *tail*, tuft of crimson or red wool; body, yellow tying silk (waxed) and closely ribbed with gold wire, like Greenwell's Glory; legs, a badger hackle—that is, a hackle with black centre and tips, and creamy yellow the other portion of feather; and the wings from either the quill of the woodcock or jay. This body in the other patterns is altered for either a bronze peacock, or a party-coloured body of yellow or red, and blue and black. These are of course for sea trout in streams or rivers, and the Badger fly for lochs should be tied, as a large Palmer, that is without wings, with peacock body, silver tinsel and red tail tuft. If Mr. Brearley or others require these flies, or any other trout, sea trout, or grayling flies, the best dresser of them for the north country that I have ever seen is "The Old Angler," 13, East Register-street, Edinburgh, N.B.

I do not know his name, but that is his sign, and will find him.—Yours faithfully,

Badger.

BUSH-FISHING IN WEST CORNWALL.

Dear Sir,—Finding myself emancipated from London smoke for a brief period, the inevitable rod has come to the front. Sunday was my first clear day in the west, but that, of course, to any true Cornishman, as a fishing day, is a *dies non.*

On Sunday morning the rain poured in torrents, but, the weather subsequently clearing, the day was most enjoyable. Monday morning, after a fisherman's breakfast, found your servant on the way to what, under ordinary circumstances, is a considerable stream. I expected to find a very fair volume of water, but, to my astonishment, I found scarcely any at all. I had stupidly made no inquiries, and was basing my calculations on the rainfall we have had in and around London, but here it appears there has been almost a drought for the last two or three months.

I commenced operations at an old favourite spot—a stone bridge—that in times gone by always yielded a brace, and heartened me for my work, but I waited in vain for the welcome tug, and was already beginning to augur a very poor result to my first day's fishing. However, I knew there were plenty of trout somewhere, and the first duty was to locate them.

I fished another usually good stretch of water, and then only a single, and, I must confess, rather diminutive trout, rewarded my exertions. But, jumping a hedge, I came on a stretch of water I shall always gratefully remember, and before I had left this single field my basket was the heavier for twenty trout—the good specimens averaging the size of a fat pilchard—about six to the pound, and being extremely edible fish. I got three especially fine ones in succession under the shade of some tall trees. I then proceeded farther a-field, as I wished to test a good portion of the stream, but with little or any result, as at the close of the day the spoils only numbered twelve brace. Had I remained on the really good piece of water I could easily have filled my basket.

I find the "Angler's Diary" a great boon, and hope to add considerably to the number of the slain by the aid of its pages.—Yours truly,

F. S. L.

THIRTEEN DACE WEIGHING TEN POUNDS.

Sir,—In reading the *F. G.* of 8th inst. I notice that the president of the Clarence Angling Club (in their report) had thirteen dace, total weight 10lb. I would be glad to know the size they measured, as it really wants a good dace to scale even $\frac{3}{4}$lb., and it is over that weight.—I am, dear Sir, faithfully yours,

B. Abrahams

[It was certainly an extraordinary take.—Ed.]

A WATERPROOFING QUERY.

Dear Sir,—I should be much obliged if any of your readers could advise me how to make a pair of porpoise hide wading boots waterproof. I have tried most of the advertised materials, but without effect—the boots are not even rain-proof. It should be something which will not make the leather hard. At present they are quite useless; but as they cost me eight guineas, I don't care to throw them away without further trial.—Yours truly,

Glenfintaig.

[It looks a hopeless case, at least as far as dressing the boots with any outside preparation goes. We imagine the best plan would be to get a good waterproof house, like Messrs. Anderson or Messrs. Cording, to line the boots with a waterproof lining. Anyway, we are sure Messrs. Anderson would advise our correspondent.—Ed.]

PEAT-FLAVOURED WHISKY AND ATHOLE BROSE.

Dear Sir,—It is more than likely that the peat-flavoured whisky "W. H. P." refers to was an entire whisky—that is, unblended—which, thirty years ago, it was more the fashion to drink. High-flavoured whiskies are still to be had, and if "W. H. P." will try any of the following, he will get what he wants. First, Old Jura; second, Cambleton; third, Burntisland. Old Jura is, perhaps, the highest-flavoured, and is used only for blending with and flavouring other fine whiskies. He will get what he wants in that way to perfection from Messrs. William Shiels and Co., Constitution-street, Leith, at prices varying from seventeen shillings to twenty-five shillings per gallon, according to age; but none of them will be less than five years old.

Athole Brose: Two large tablespoonsful heather honey, a good half gill of whisky put into a tumbler and stirred till the honey is dissolved. Then drink.—Yours, &c., Badger.

THE HOLY LOCH, LOCH LEVEN, ATHOLE BROSE, &c.

Sir,—A letter signed "Corrigenda," extracted from the *North British Daily Mail*, appears in your issue of the 8th inst. I am quite aware that trolling with phantom for salmon is regularly practised in the Holy Loch (one of the Clyde lochs), into which the river Echaig from Loch Eck flows, as I know several anglers who have at different times killed fish therein the way "Corrigenda" describes. If the proprietor in the right of the salmon fishing towards the mouth of the Echaig chooses to exercise his right to the full, he is at liberty to do so, so long as he uses legal means, and the question in any case is one between the upper and lower proprietors in the right and one with which the public has nothing to do. "Corrigenda" overlooks a very simple point in the law relating to salmon fishing. The right to fish salmon is vested in the Crown, and must be the subject of an express grant, &c., or must be obtained by some of those various means well-known to all lawyers, and which need not be here stated, as outside the question. In a case like the present, three points arise:—

(1) If the grant of salmon fishing in the Echaig be a grant of fishings in the river merely, the holder of that grant has no right to interfere *quâ* holder with anyone fishing in the adjacent sea with rod and line.

(2) If it be a grant of the salmon fishing in the Echaig "*et in ostio fluminis*," the question as between the holder of the right, or his lessee and the public, becomes simply a question of interpretation; and according to the House of Lords the boundary is fixed—namely, the right extends over the whole space between the lowest ebb and the highest flood-mark (Duke of Gordon *v.* Earl of Moray and Paton's App. p. 78). In the Holy Loch the tide goes *very* "*far out.*"

(3) Even if the grant ceases and determines at the mouth of the river, the public have no right to angle for salmon, or to take salmon in any kind of way in the adjacent sea. The Crown's right extends for three miles seaward, and is limited to prohibiting "such modes of fishing as are carried on in connection with the land." The meaning of the latter phrase, of course, being that if by any chance anyone fishing for herring with a net, or trolling for saithe caught a salmon, such a person must return it to the sea. It is curious but trite law that though a salmon is *resmullins* until *occupatio* has occurred, the *occupatio*, however temporary, is that of the Crown, not of the captor. The reason for this—the original principle being kept in mind—will at once strike any person who gives the question a moment's consideration: the salmon is not the Crown's fish, not a royal fish, but the right to take it is the Crown's. The salmon is *resmullins*, but *occupatio* can only be by the Crown, or someone with a grant from the Crown. Such a question could only be asked by a very ignorant Radical. To put it concisely, the salmon fishing belongs either to the Crown or a grantee, and either can prevent the public from fishing. (*Vide* the important case—a justiciary one—cf Anderson *v.* Anderson, S. L. R, vol. 5, p. 58). If the fishing be still in the hands of the Crown it is foolish on the part of a member of the public to draw the attention of the Crown to this invasion of its rights.

Loch Leven Fishing.—In an editorial note there is some reference to the most successful anglers this season, and I would call your attention and that of the angling community generally to the curious difference that always exists between the most successful *private* anglers and those fishing in competitions confined to the fly. The reason for this difference is not extra skill on the part of the most successful private anglers, but the different methods adopted. One regular Loch Leven angler, whose baskets were always good *per se*, and much better than others, fishing like the famous Smith, of Perth, "for their own hand," by legitimate casting, always had his two boatmen working hard casting, while when rowing up to windward as many rods as the stern would hold were put out. Yet Mr. ——, of —— was one of the successful men of the year. Another absurd custom prevailing on Loch Leven is that of allowing in certain cases competitors to troll with the minnow. What could be more absurd? What test of skill is trolling a minnow through a loch full of fish? The answer is obvious. The sooner the Loch Leven authorities adopt the Vyrnwy* plan, the better will it be for the loch, apart from the question of the absurdity of its use in competitions.

Athole Brose.—The following is the veritable mixture given by the landlady of the Athol Arms to the Queen on the occasion of her first visit to Dunkeld, and if it pleased (as it did) Her Most Gracious Majesty, it ought to satisfy any loyal subject. The ingredients are *dripped honey*, whisky (good), and fine rich cream. Of honey, take three tablespoonfuls; of whisky, one glass; and of cream, one medium-sized teacupful. Put the honey in first and the whisky on top, and stir *gradually* until the two are thoroughly mixed, then add the cream slowly, and stir well until the whole is homogenous; then invite your friend. It can be made in any quantity; but, like a "cocktail," each dose is best made separately, and should (though this goes without saying) be drunk at once.—Yours truly, Duine Môr.

FISHING IN THE MURRAY RIVER, AUSTRALIA.

Dear Sir,—I should be greatly obliged if you or any of your readers could inform me what fishing is to be had on the Murray river, Australia? I start for Australia on the 28th of this month.—Yours truly, F. Eaton.

Bingham.

[We advise F. Eaton to buy a copy of the "Anglers' Diary" (post free for 1s. 8d. from our office), from page 181 of which we take the following information, which will be found correct we believe.—Ed.]

"General Information.—There are plenty of various kinds of fish in all the rivers and water holes. The Murray cod is a large fish, running up to 100lb. They are very good eating. The bream are something like the English bream, but much better eating. They afford capital sport. At Seymour, five hundred miles above the junction of the Goulburn with the Murray, the fishing is very good. Large-sized Limerick hooks are the best to take out, which answer well for yellow perch, bream, cod, and large eels. In the upper part of the Hunter, dapping for perch with a grasshopper is good. Quantities of little fish, the size of bleak, may be taken with an artificial fly. In almost every one of the rivers on the Australasian continent, which flow southward and eastward from the great chain of hills which run more or less parallel to the coast, very good sport may be had with the artificial fly from October to April. The fish is the Australasian grayling (*Noto-thymallus Australis*, M'Coy), which swarms in all the running streams wherever there are rocks and gravel—certainly from the Glenelg, on the borders of South Australia, around the coast as far east and north as the Hunter in New South Wales. It breeds in the winter months on the long flat banks of sand and gravel, and in summer is found in shallow broken water, in localities precisely similar to those in which one would look for a grayling in an English river. In weight the Australian grayling averages from ½lb. to 1lb. when in season. They will take almost any fly that kills grayling in England, showing a preference for the Duns, the Black and Red Ant, and the Midge. The hooks should be of the Nos. 12 or 13, and the tackle of the finest description. At Anderson's Creek, on the Yarra, about thirty miles above Melbourne, is a good spot. In the Gippsland rivers the sport is better, and the fish larger. The upper waters of the Mitchell, the Macalister, the Dargo, &c., swarm with grayling. In the pools a fish called here the "perch" (a species of the genus *Lastes*), going up to 8lb. or 10lb. in weight, with golden scales, and is found excellent eating. A small frog, trolled as if for pike, is a good bait for him. The English salmon and trout are now fully established in the colony. In a few years Tasmania promises to afford the finest angling in the world, if the colonists will only take care of the fish."

FISHING IN CANADA.

Dear Sir,—I notice in your issue of July 11, a letter from "Rux," in which he says that I "called him over the coals" for saying there were plenty of fish in Canada. If he will take the trouble to read my letter again he will find that I never said there were no fish, or even that the fishing was poor; but that I simply corrected some of the glaring errors in his letter, which would lead the unwary to believe that the very best of salmon and trout fishing could be got by any stranger in any part of New Brunswick. I suppose "Rux" considered it opportune to throw a doubt on my statements, for I thought the subject was done with long since. In his last letter of the series "Rux" so completely took my breath away with the statements about weight of mountain trout that I forbore from criticising, hoping that the end had come. Apologising for troubling you with such a small affair,—I am, dear Sir, yours truly,

Montreal. Canadian Silver Doctor.

GOOD SPORT AMONG THE BREAM.

Sir,—On the morning of Tuesday, the 4th inst., myself and Dr. Ladell had a turn on the river Ant navigation, near Stalham, Norfolk, when we made a show of over 7st. weight of fish, nearly all bream; curiously enough no fish was under 1lb., yet the heaviest did not exceed 2½lb. We had a rare job with the tackle, as the morning being quite dark we were continually coming to grief, getting entangled, and losing the gut bottoms and floats.

Our attendant was A. Nichols, of Stalham, and no doubt he earned his money this time. I can strongly recommend him. At his house can be obtained good apartments, good cooking and civility. He is also a real practical angler, up to every little move likely to circumvent the fish.

I may as well say that Dr. Ladell caught a splendid tench, weight 3lb. 1oz., just as we were leaving off.—I am, yours faithfully,

Castelnau, Barnes, S.W. W. H. Elsmore.

A QUERY FOR FISHCULTURISTS.

Sir,—I have a lake on my property covering about twenty-two acres; depth in a good many places about 30ft.; bottom mostly gravel, with some large stones; water clear, with few weeds in any part of it, and two small streams coming into it. There are a fair number of trout, some, I believe, of large size; but it has been poached for a number of years by persons fishing with otter boards, which I have put a stop to lately.

I have heard from old residents that formerly it used to be a celebrated lake to fish, but about forty years ago there was a stream opened out of it to supply a mill which is still working; and now in the spawning season numbers of trout go down the stream and never return, as they are poached. Could you give me any information as to the kind of wire grating I would require to fix permanently at the mouth of the stream, the size of the mesh and where to obtain it, so as not to keep back any of the water from the mill, as the latter does not belong to me? Also to keep small trout from leaving the lake. Would it be worth while to stock with Loch Leven or other trout? Please give me all information as to number of fry I would require; also would the vessel with automatic bellows to hold them be charged for, or would it be allowed for on returning? What would the price of yearlings per hundred be, and what would carriage to Ireland cost? Address Dunmanway, co. Cork, Ireland.—Yours truly,

Ardgroom, Ireland. W. H. Fitzmaurice.

---

* Pronounce *Verenuic.* I believe only fly-fishing, as most people know, is allowed in Loch Vyrnwy.

RE DERBYSHIRE WYE.

Sir,—I am delighted to see in the columns of your paper of August 8 the very able letter by "Old Otter" in reference to the above river. As a fisherman of some experience on that once delightful stream, I beg to say that he has in no manner whatsoever overrated the true aspect of affairs.

This spring I had about nine days' fishing between Fulliford and Bakewell, and although in that time I managed to capture forty-six sizeable fish, I found that which two or three years ago was a pleasure pure and simple turned into downright hard work. I generally contrived to get down to the water about eleven a.m.; from this time until close on one o'clock the water was everything to be desired, the fish coming on well between twelve and one. I take say three nice fish, just enough to make a man feel that by dint of a little exertion he will be able to show a good creel in the evening. I chuckle to myself at the idea, and take another cast on the strength of it. The flies alight on the opposite bank, when, with an almost imperceptible movement of the top joint, the duns fall lightly on the water. Something stops the line—it is no fish, for I can feel a grating sensation. I wind up to find a large piece of stick, weed, bramble, or some other abomination of iniquity at the end of it. I clear it off and make another cast, with precisely the same result, and so *ad infinitum.* The colour of the water too changes; instead of the lovely clear stream of a few minutes before, the water has been transmogrified into a muddy rushing torrent, carrying with it branches of trees and large portions of the bank, which have become detached. This means all up for about four hours. I spike my rod, use parliamentary language, pull out a certain small flask, and drown my sorrows in ham sandwich and tobacco smoke. Some of my brother fishers (who I notice are always of a gregarious disposition about lunch time) join me. We talk it over, and agree unanimously that some kind friend higher up has, as usual, charitably opened a dam. This sort of thing occurs at least four times per week. Some of us are of opinion that the riparian owners should be consulted; others say, tell Mr. Marston all about it. I have taken the latter method of expressing my feeling in the matter, as it really goes to my heart to see the dear old Wye so harshly dealt with, wherefore I know not.

I will conclude by saying that at about five o'clock in the evening, when the flood has subsided, a careful man may kill his brace and a-half; but, of course, in the earlier months of the season the evenings are cold: in that case the only thing to do is to go home. What I have here stated can be confirmed by several of my friends, members of the Flyfishers' Club, who have fished the old river many years, and are as sorry as myself to see so palpable a falling-off.—I am, dear Sir, yours faithfully, Saracen.

TRAILING FOR PIKE, &c.

Sir,—Recognising the great estimation in which the *F. G.* is held by its large circle of supporters, who are true sportsmen, I shall feel favoured if you will, through the medium of your correspondence, allow me to bring before their notice the fact that the method of fishing for pike, &c., sometimes called "spinning" by those who practise it, but which is properly designated by sportsmen, "trailing," and is but few points above "poaching," is greatly on the increase on many reaches of the Thames. Cannot some means be taken by those in authority to entirely prevent this unsportsmanlike practice being continued?

It is well known that Thames pike are slowly but surely decreasing in number, and also in size, for the capture of a pike of 15lb. or upwards is a most rare occurrence in many portions of the river.

These conditions cannot be materially improved until (1) steps are taken to prevent trailing, and (2) to raise the standard of takeable fish from 18in. to 20in. or 22in. Hundreds of small pike are taken and retained during the summer and autumn months by "trailers," who, if they attempted to practise any method requiring skill and patience, would invariably return home minus fish. This subject being of great interest to a large number of Thames pike anglers, they would, I feel sure, heartily support any measure which would bring about the entire eradication of trailing, and tend to raise the standard of takeable fish, and ultimately result in the general improvement of pike fishing in our grand old river.—I am, yours faithfully, Esox Lucius.

[This question of trailing for pike in the Thames has very often been referred to in our columns, and has also frequently received consideration from the committee of the Thames Angling Preservation Society; but the difficulty is that it is not illegal, and there would be great opposition to its being illegal. We have heard anglers who declaim against trailing a spinning bait behind a boat in the Thames praise to the skies the "glorious sport" they have had when trailing a spinning bait for salmon behind a boat on the river Tay or Loch Tay or Loch Naver, or other Scotch or Irish rivers and lochs. What is "glorious sport" in Scotland becomes "rank poaching" on the Thames. Why? We confess we are at a loss to reply. If it is said salmon and *ferox* are more sporting fish, then it would seem more unsportsmanlike still to take them by a poaching method. It seems to be a case of straining at the small pike and swallowing the big salmon. As it appears to be true that pike are decreasing in the Thames, if their increase is desired, the only practical plan we can suggest is to raise the standard of size. It would be most difficult to obtain convictions for trailing, and as it generally happens that only small jack are taken in this way, if the size were increased the harm done would be very much reduced. For our part, we confess we do not think the young lady who holds a rod in the stern of the boat while her sweetheart rows her up the river is a person we want to prosecute; or that if she takes the oars and her lover the rod that he is much worse. They probably do not know how to fish in any other way, and may be encouraged by a little success to become anglers. —Ed.]

PERCH CAUGHT WITH FLY IN THE THAMES.

Dear Sir,—I read in last week's *Field* that several fine perch had been caught with a fly above Sunbury. I suppose the fly would be a large Red Palmer, used under water; but should be very much obliged if you could let me know.—Yours truly, J. S

[We read the *Field* religiously, but missed the note referred to. Perhaps someone who knows how the perch were taken with the fly will reply. Perch will at times dash at anything which has the least appearance of life. A small, tough, well-scoured red-worm on a Red Palmer, cast with a light fly-rod lightly among perch, when they are hunting on the shallows, is often irresistible, but it requires more skill than casting without the worm.—Ed.]

FIRST-RATE DRY-FLY FISHING WANTED.

Sir,—I am a subscriber now for some years past to your paper, living on the continent, where my leisure has been devoted to fly-fishing, and being about to return and settle down in England, with a view to indulging in the same pursuit, should be glad if you would suggest to me some locality where I should be likely to find a small house in a pretty situation near to some subscription water, where really *first-rate dry fly fishing* could be obtained, for which I should be willing to subscribe handsomely. I have an idea that if I only knew the precise spot I could find what I required in Derbyshire; but perhaps you will be good enough to advise me in the matter, and oblige, faithfully yours, Enthusiast.

Berne.

["Enthusiast" has omitted to send us his address, but as his letter is evidently genuine we insert it. If he will send his address we shall be happy to advise him; in the meantime we should like to have particulars *(not for publication)* of any waters answering the description of what he requires. "First-rate dry-fly fishing" is rather sought after.—Ed.]

FISHING IN THE TOWEY.

Sir,—Your correspondent "Greenheart" can get fair salmon and sewin fishing on the river Towey, at Llandilo by paying a guinea subscription to the local fishing association. Mr. Hopkins, proprietor of the Cawdor Arms, would give him every information. Leave can be got for a few places on the Coshi, but at very out-of-the way places, difficult to get at. Dr. Lloyd, at Llandilo, a very good sportsman, knows all the fishings in the neighbourhood, and is at all times happy to extend his knowledge to strangers visiting the neighbourhood.—Yours, &c.,

Flyfishers' Club. J. Allison.

RE CAMM FUND.—APPEAL TO CLUB ANGLERS AND FRIENDS.

Dear Sir,—Since my last report, I beg to acknowledge receipt of half guinea from the Hoxton Brothers Angling Society. Total amount in hand, £18 16s. 9d.—I am, yours truly, B. Abrahams.

25, Silver-street, Notting Hill Gate, W.

Cheques and Postal Orders can be crossed "Alliance Bank."

The Carrier Pigeon as a Fish Messenger.—The West Highland fishermen have adopted a capital plan for communicating with the fish merchants of the City in reference to their daily "hauls." The homing pigeon has been pressed into the service of this useful industry, and after every day's fishing a pigeon is despatched with a message relating to the "catch," and thus the merchants know in advance what they will have at their disposal.

Salmon and Trout Fishing in the Bundrowes River, Donegal, Ireland.—All those who have fished the Bundrowes river will be interested in some excellent illustrations by Mr. James Temple, the well-known artistic angler, which appear in the *Illustrated Sporting and Dramatic News* of August 8. The following short account of the fishery is given:—"The Bundrowes river (Donegal), for the most part a slow-flowing, canal-like stream, comes out of Lough Melvin. It is only about three miles in length. The part nearest the sea is tame-looking for a salmon river, but is nevertheless a very good salmon water; and since it was staked, about a year ago, the sport has sometimes been first-rate. For a considerable portion of its course the Bundrowes flows through bogs, and the angler who cannot jump well to clear the many dykes, which are cut at right angles to the stream, will often have to walk a long distance before he can get round. The scenery is very beautiful. The mountains form the background, the curves of which retire in waves of bog and pasture, with here and there a cottage picturesquely peeping out, while at one's back over a ridge of sand the grand Atlantic roars everlastingly. A good breeze from the sea straight up the river making big waves on it is the time to fish for salmon on Bundrowes. It is tiresome casting, however, as it is all in the teeth of the wind. When the wind does not favour, the boiled shrimp is the bait most used. Large lake trout, gillaroe, and brown trout are very plentiful in the river, and splendid sport may generally be had with them. Angling on this river opens on January 1, and May and June are good months; in the middle of June the grilse fishing is often very good. Mr. Dickson is the owner of this fishery. He is a very genial man, and generally grants a stranger a few days' salmon fishing. Bundoran, one of the healthiest seaside towns in the three kingdoms, is within half-a-mile of the river, and a drive from Sligo to Bundoran, about sixteen miles, cannot be surpassed for loveliness. There is good accommodation in the town. Hamilton's Hotel is an excellent place, and Mr. Ball has comfortable apartments."

Le Page's Liquid Glue.—The Best Glue we Know.—It is unnecessary to dilate on the manifest advantages of having in the house always ready for use a liquid glue which will stick anything together, from a scrap in an album to joints which will endure a testing strain of over 1,600lb. to the square inch. Le Page's Liquid Glue has been used by us for many years, and it gives us much pleasure to recommend such a really useful and valuable article.

Holloway's Pills and Ointment.—Dyspepsia, Jaundice.—These complaints are the results of a disordered liver, which secretes bile in quality or quantity incapable of digesting food. Digestion requires a free flow of healthy bile, to insure which Holloway's Pills and Ointment have long been famous, far eclipsing every other medicine. Food, irregularity of living, climates, and other causes, are constantly throwing the liver into disorder, but that important organ can, under all circumstances, soon be regulated and healthily adjusted by Holloway's Pills and Ointment, which act directly upon its vital secretion. The Ointment rubbed on the skin penetates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed; a cure will soon follow.

Waltoniana

Considerable changes are taking place in the constitution of the Henley and District Fishery Preservation Association. Mr. Knight, the hon. sec., has resigned, and, at any rate for the present, his place has been taken by Mr. C. H. Cook, the founder of the society and first hon. sec. The private water on the Loddon and St. Patrick's stream will be carried on as hitherto, and Mr. A. Breakspeare, the hon. treasurer, Henley-on-Thames, will no doubt be glad to receive the subscriptions of those interested in Thames fishery preservation.

August is "soolky," or the reverse, according to the rainfall. With scorching hot weather and low water, fish of almost all sorts appear to lose their appetites, and if they feed at all do so about sunrise and during the night. But what a difference a few rain-storms make to the angler. How those merry sea trout dance up the rivers with not a few salmon in seasonable streams! How well the barbel take, and what nice dishes of perch may be artfully caught by judicious fishing among the weeds. But, assuming that these rain-storms, which bring joy to the angler and sorrow to the farmer, are absent, even then there are left gudgeon and chub for those who have the chance of fishing for them, at once the most delicate and most coarse of the fish which are found in our more gently-flowing rivers. No day is too hot for the gudgeon to feed, and the very sunshine which sends other fish into the shade among impregnable masses of weeds, brings the chub to the surface, to bask with mouth open, ready for the angler's Marlow Buzz, Black Frog, slug, frog, piece of greaves, or other tempting bait to drop into it.

In August, salmon are apt to rise shyly and short, so it is the time of times to try the long-shanked, small-bend, double hooks which were brought out last year by Warners, of Redditch, for the express purpose of hooking short rising salmon. So far as I was able to try them last season I found them answer admirably, especially in the small sizes. Ordinary double hooks I do not like, but these are made with small bends and long shanks, the two desiderata of easy penetration. The scale of sizes has been worked out very carefully, and instead of enlarging the bend with the lengthened shank, the bend is kept almost the same size after a sufficient size has been attained to hold a fish. When one comes to think of it, there is really no necessity to go on enlarging the size of the bend; all that is wanted being a longer shank to carry the larger sizes of flies. The smaller the bend, the less there is to frighten the fish, and, as I said before, the greater the penetration. We are so used to see a large bend on a large fly, that these new double hooks look awkward and ugly, but a little consideration will show that in principle they are right, and from my own experience they both hook and hold fish. Any one who thinks of trying them should get the makers to dress a fly or two on them, as a dresser who had no instructions on the subject would probably make the body too long. But of course the fly can be dressed with the body, covering as much of the shank as is usual. The idea of the inventor of the hooks was, however, to let the bend of the hook project well beyond the body, so as to lay hold of short rising fish. I have caught lake trout on these hooks as well as salmon.

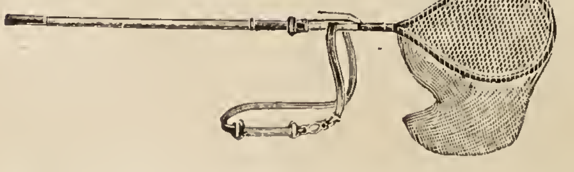
The recent wet weather has kept the roach on the feed in many waters, but large roach are not easy to catch at this time of year. I am inclined to think that we often use too small a bait for large roach. Ask a London bank angler the best bait for roach, and he is as likely as not to say, "a large dollop of paste." Certainly I have caught fine roach with a fragment of paste no larger than a No. 1 shot, placed on the point of a hook, when they would look at nothing larger; but generally speaking the large bait is the thing, that is, of course, presuming there are any large roach to be caught. But, my roach-fishing friends, let me warn you against a large "dollop of paste" on a small hook. If you act contrary to that advice you may have many bites, but you will hook few fish, for the paste will simply act as a guard to the hook, and allow the latter to be drawn out of the fish's mouth.

A large bait for roach is particularly necessary where there is a mixed company of fish scrambling over the ground-bait. By "mixed" I mean mixed as to sizes. In the swim are perhaps a hundred or two small fish, varying from three to five ounces in weight. With these are, perhaps, a couple of dozen fathers of the flock, whom it should be your especial aim and object to catch. Well, put on a small bait and see the result. A little fish has it at once, and is hauled up kicking right in the face of the aforesaid fathers. Then another little fish is caught, and another and another, and perhaps one or two more are pricked. "Oh, hang it," say the fathers, "we'll take a swim round and leave the youngsters to enjoy themselves," and off they go fin-in-fin. You catch a few more small fish, and go home and say the poachers have netted all the large ones. Suppose, now, you had put on a "dollop of paste," might not the result have been different? Those little fish might have rubbed their noses against it, but would not have attempted to swallow this much-too-large morsel for their mouths. Then, slowly might swim up one of the fathers, and with deliberation and after duly inspecting the bait, suck it into his mouth and then stay still a moment while he studied the flavour. You, may be, have so far seen no sign on the float, but the large roach, which has been drifting down with the stream, makes a gentle movement with his tail which carries him a little towards the ground-bait. Your float stops, and would have been depressed a little, but you are too good a fisherman to wait for the depression, and having struck at the stoppage find yourself in a good fish. You may ask how I know all about it, and my reply is that I have many a time fished where I could see the fish take the bait, and so have had many opportunities of seeing the way they bite. What I have ascertained without doubt is, that roach can time after time take the bait in their mouths and hold it there a second, and then send it out again without the slightest movement being seen on the float. Possibly the reason of this is that when a fish takes a bait he often ceases to swim for a second or two, and is carried down by the stream; he thus keeps his position under the float, which is not in consequence moved. Templar.

Geo. CORDING'S
Ventilated Fishing Coats,
TROUSERS, STOCKINGS, BOOTS, BROGUES, BAGS, &c.
125, REGENT ST.; 231, STRAND

S. ALLCOCK & Co., Standard Works, REDDITCH.
Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

Patent Applied for.



Col Clarke's Patent L. Handle & Net.
Perfectly secured to the Strap, and can be removed in an instant.

Platt's Patent Fishing Basket.
The New Aluminium Reel.

S. ALLCOCK & Co's PATENT
RING-MOUNTED DEVON.

Patent Inimitable May Fly.
The nearest approach to nature ever yet attained. Bodies in various Patterns.

GEEN'S PATENT

Geen's Patent Spiral Minnow.
The most Perfect Spinning Bait ever invented.
It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.
CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.
London Office: 60, QUEEN VICTORIA STREET, E.C.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, AUGUST 15, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The General Committee met on Monday evening, Mr. R. Murphy in the chair. An application from the Maidstone Angling Society for a grant of money was considered, and it was unanimously agreed to advise the delegates to award it the sum of five five guineas, as it was shown that many London anglers availed themselves of the opportunity of fishing the long stretch of water preserved by this society. Several other matters of interest to the association were then discussed, and it was resolved to take active measures with regard to various stretches of the Lea next week. The meeting closed with the usual vote of thanks to the chairman. —HON. REPORTER.

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The monthly delegate meeting will take place on Monday evening next, August 17, at 8.30. —R. GHURNEY, sec.

Anglers' Association.—EASTERN DISTRICT No. 1.—The next return visit will be to the Izaak Walton Angling Society, Old King John's Head, Mansfield-street, Kingsland-road, on Monday next, August 17.—G. MANNING.

Anglers' Association.—EASTERN DISTRICT No. 2.—The next return visit on this list will take place at the Eustonian Angling Society on Monday next, August 17, when I hope to see all the clubs on the list represented.—F. THORLING.

Anglers' Benevolent Society, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—Since my last report I beg to acknowledge, with thanks, the receipt of half-a-crown donation from Dr. Leapingwell, Hoxton Brothers Angling Society.—R. GHURNEY, sec.

Allason United Brothers Angling Society, Allason Arms, Uxbridge-street, Notting-hill Gate, W.—We fish for three prizes at the Langley association water, one rod only. All to start fishing on the morning only, not Saturday. Messrs. J. and E. Gibbs weighed in gudgeon, dace, and bream. Members are requested to attend next Wednesday at 9.15. The photos of the competition at Slough on the 26th ult., can be seen at the Marylebone Angling Club, Pineapple, Carlisle-street, Edgware-road, W. —B. ABRAHAMS, sec.

Alma Angling Society, Crown Distillery, Vere-street, Clare Market.—On the 9th, Messrs. W. Hopping and J. Scott weighed in roach, dace, and gudgeon. On Tuesday we had a good muster of members present, when it was settled that we fish our quarterly prizes on August 30, at Monkey Island, Taplow; pegged-down; jack barred; all to go down on the morning of competition; one rod only.—J. PAILES, sec.

Amicable Brothers Angling Society, Bald-Faced Stag, Worship-square, Finsbury.—The following members weighed in on the 9th: Messrs. Medcalf, Moir and Harding showing roach, bream and dace. We have decided to fish a batch of prizes off on September 13.—W. H. POTTER, sec.

Amicable Excelsior Angling Society, the Greyhound Hotel, High-street, Battersea.—Several of our members were out on the 9th inst., and the following weighed in: Mr. King, chub and roach; Mr. Lovett, roach and dace; Mr. J. Bell, roach, dace, and a very nice show of gudgeon; Mr. Cooper, roach and dace; Mr. Bond, roach and dace; Mr. J. Rich, roach. Intending competitors for our Egham outing, on the 16th, are requested to all meet at Clapham Junction not later than 8.15 a.m.—J. RICH, sec.

Amicable Waltonian Angling Society, the Sun, Great Sutton-street, Goswell-road.—On the 9th inst. our members were out in good force, and a very fine show of fish was put on the trays, contributed by the following members: Mr. Embleton, jun., having a very nice show of bream and roach; Mr. Whitebread having a fine show of roach, dace, bream, and perch; Mr. Nunn, sen., some good roach, dace, and bream; Mr. W. Hake, roach, dace, and gudgeon; Mr. G. Merry, some good roach and bream; and Mr. C. Irwin having a fine show of roach and bream. On the 23rd, our annual dinner takes place at the Black Dog and Duck Inn, Bury, near Pulborough. All members are requested to attend next Thursday, the 20th, on important business. We enrolled two new working members last meeting night, and are still open for a few more.—E. R. EMBLETON, sec.

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—Mr. Palmer had a good tray of fish from the Central Association's waters at Pulborough on the 9th—bream, 14lb. 10oz. The members were out also for the August series of prizes, but they were not taken, so they are still open for the 16th inst.—A. G. SMITH, sec.

Battersea Friendly Angling Society, Queen's Hotel, Battersea.—The members of this club will fish a match on the 16th for four prizes. Roving; all fish to weigh; bank or punt. A special prize of half-a-guinea will also be given for an honorary members' match, same day and conditions. Members are requested to attend next Tuesday, to arrange next outing.—GEORGE MUMFORD, sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—Only three members weighed in on the 9th, being the smallest show of fish this season. Mr. Reynard, perch, one fish 1lb. 9oz.; Mr. J. Smith, roach; Mr. Warman, perch, one fish 1lb. 3oz. The competition for the August series of prizes will take place on the 16th. Place and conditions to be decided at the meeting on the 14th.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—On Wednesday evening Mr. G. Howard was unanimously elected an honorary member. During the evening a warm discussion arose on the subject of a fish preservation fund, which was finally adjourned till next week. On the 9th the following gentlemen weighed in: Mr. Farmer, perch, amongst which was a nice fish of 1lb. 9oz.; Mr. F. Barker, carp; whilst Messrs. Hooker, Foster, and Wheelhouse contributed to a good show.—F. ROBERTS, hon. sec.

Bloomsbury Brothers Angling Society, the Rose and Crown, Broad-street, Bloomsbury, W.C.—On the 9th, Mr. Rich was the only member to weigh in, he having a good show of jack, perch, roach, and dace. On the 29th of July, Mr. C. Davis was proposed and seconded as a working member of this society, which was carried. Our quarterly pegged-down match will take place at Ware, from the cottage up to the engine-house. The prize list for the season will be forwarded and finished and printed by Wednesday, August 19.—D. WARREN, sec.

Bomore Angling Society, the Britannia, Clarendon-road, Notting-hill, W.—Our general outing will take place on September 13, to King's Langley, by brake. Friends of members are invited. Fare three shillings. A general meeting will be held next Monday, August 17, to decide on prizes to be fished for. All members are requested to attend.—F. STEVENS, sec.

Bostonian Angling Society.—The following members have taken fish during the past week: Mr. Ward, bream and roach; Mr. Rundle, bream and roach; Mr. Jennings, roach and dace; heaviest dace, 9oz. Mr. West, bream from the tidal waters Twickenham, heaviest bream 2lb. 5¼oz.; Mr. Brown, perch and dace; heaviest perch, 1lb. 4oz.—J. H.

Brompton Angling Society, Grove Tavern, Beauchamp-place, S.W.—On the 9th Mr. Aitchison saved us a blank with a show of chub. On Wednesday Mr. Avis brought up a very nice lot of bream and roach.—H. ROACH, sec.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—We fished for two prizes on the 9th, and notwithstanding the skill shown by the two gentlemen who pegged out the swims, no one took the required weight of fish to win. The following have weighed in: Messrs. Whatcott, Wilson, and Bissell, bream; Mr. Wilson, roach. The two prizes will be fished for on the 23rd of August, at Dagenham, pegged-down, one rod.—T. HAWKES, sec.

Burdett Angling Society, 118, Hackney-road. — A few of our members went out on the 9th inst. and brought home some good fish. Mr. D. Flint had 3lb. ¼oz. of roach and dace; Mr. Green, bream, 2lb. 6¾oz.; Mr. Sparks, roach, 1lb. 7½oz.; and Mr. Antill, roach and dace, 2lb. 4oz. We go out for prizes on August 30, from Burnt Mill Loch down to Royon. Members to sign at club house on Saturday, August 29.—J. PETHER, sec.

Buxton Brothers' Angling Society, Walthamstow, Liberal and Radical Club, 4 and 6, Buxton-road.—On the 9th we fished our first competition, with the following result; Mr. C. James, finest specimen fish, a perch; Mr. Davis, first prize, roach; Mr. James, second prize, perch; Mr. Goullee, third prize, roach. On Wednesday, the 12th, there was a large attendance of members, when a second competition was arranged for prizes, to take place on the 30th. Members are particularly requested to be present at the next meeting, on August 26, as we have some important business to transact.—A. SHUKER, sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 9th only three members weighed in, Mr. W. White, bream and roach; Mr. Sharp, roach; and Mr. Fitter, roach and dace. Members are reminded that Wednesday next is clearing night, per Rule 4. —E. T. WHITE, sec.

Campbell United Angling Society, Sir Colin Campbell, High-road, Kilburn.—We have had some good shows during the holidays, members weighing in as follows: Mr. Hall, perch, tench, roach and bream; Mr. Hiscock, jack and roach; Mr. J. Tanner, jack and roach; Messrs. J. Smith, Pope, R. Smith, Farnie and C. Lake, bream, tench and roach; Messrs. Wood, E. T. Lake, Neall, Huntly, Pickett and others, roach. We have had the pleasure of making two more new members this week.—E. W. WOOD, hon. sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—On Monday last, three honorary members were enrolled. The chairman opened up an interesting discussion on "Dace Fishing," which was supplemented by excellent singing, and we spent, as usual, a very enjoyable evening. Mr. H. W. Sharp was the accompanist. We have had a few good fish from the Thames and elsewhere during the week. Mr. Tom Keeble has been busy among the rudd; Mr. J. Deplidge with the bream—his largest, 3¼lb.; Mr. Harry Dunn, roach; while Messrs. C. E. Williams, A. Sowerbutts, Guest, Pulsford, Smith, Eliston, Coleman, and Spanswick were "well up." Professor Chris. Green will read a paper on "Roach Fishing" here on Monday, August 24.—JOHN SMITH, hon. sec.

City of London Angling Society, White Bear, Bride-lane, Ludgate-circus.—Very few of our members were out in the holidays, Mr. H. Gates was successful among the bream in the Chelmer, and Mr. Macdonnell weighed roach and bream from Amberley. On the 9th, Mr. Castell weighed a few fish from the Roding.—CAS.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—On the 9th inst., the members of the above fished a roving match at Broad Mead, Woking, with the following result: First, Mr. T. Jameson; second, F. T. Tringham, jun.; third, A. Heyman; fourth, Mr. Willgoss.—A. TROWBRIDGE, sec.

Clapton Angling Society, Wayland Hotel, Dalston-lane.—An ordinary weekly meeting of this society was held on Monday last, Mr. H. Affleck in the chair; but in the unavoidable absence of the secretary (Mr. Howse), the principal business of the evening was postponed until the next meeting. A very nice catch of roach was exhibited by Mr. Affleck, from the society's water at Rammey Marsh, the largest of which scaled 1¾lb.—A. W. OLIVER, assistant secretary.

Clarence Angling Club, Red Lion Hotel, Harrow-road, Paddington, W.—Several members have been out, Messrs. G. A. Boughton and G. Holloway taking some very handsome roach from our new water. —ALF. E. EVANS, sec.

Clerkenwell and District United.—The next visit on the above will be to the Independent Brothers, held at the Three Doves, Berwick-street, Oxford-street, on Wednesday evening next, August 19.—F. CASTLE.

Cobden Angling Society, Cobden Club, Kensal-road, W.—We had a fair show of fish on the 9th, weighed in by the following members: Mr. E. Baxter, roach and dace; Mr. W. Hutchings, roach and tench; Mr. H. Underwood, jack; Mr. F. Stone, tench and jack; Mr. F. Hannabur, jack. A match for private prizes was proposed on our last meeting, conditions to be made on August 18, when I hope all members will attend.—A. SMITH, sec.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—Fair bags of roach, dace, &c., have been had by our members during the past week, Mr. P. Brown having, amongst other fish, a grand roach, weighing 2lb. 4oz., and one tench, 3¼lb.; Mr. E. J. Sidney, from Thames, baiting with greaves for barbel, a few nice roach.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 9th inst. several of our members were out, but owing to the unsettled weather the only gentlemen who had any sport were Messrs. Wild, Parram, Cogswell, Killick, Legge, and Barrat, who had a fine show of roach, perch, and jack. Next Tuesday two new members will be elected.—S. MALBY, sec.

East London Piscatorial Society, London Hospital Tavern, Whitechapel-road, E.—At the committee meeting held August 6, Mr. Myers in the chair, Messrs. Pringle, Stammers and Foggio were elected on the committee, and another new member was proposed. It was decided to have a fishing outing on Thursday, August 20, at Nayland; seven o'clock train from Liverpool-street to Colchester, thence by trap; we go at special fares. The prizes to be fished for are: 1st, £1 11s. 6d.; 2nd, £1 1s.; 3rd, 10s. 6d.; and 5s. for the largest fish of any kind, bar jack, caught during the day; not less than 3lb. of fish to take a prize. During the holidays, our president and treasurer were at Staines, and had C. Hone for their pilot. Although the water was gin bright, they weighed between them 40lb. of roach, chub and dace; amongst them were some very good specimen fish, as they returned all roach under 8in., and dace under 7in., they being our club sizes.—FRANK WOODS, secretary.

Eustonian Angling Society, King's Head, Swinton-street, King's-cross.—The next return visit on the Clerkenwell Visiting List, will take place at the above club, on Monday, August 24, when we hope to see as many anglers and friends as can make it convenient to attend. During Bank Holiday our members fished at Enfield for the club prizes left from last season, when two were taken, Mr. Barrett being first, and Mr. Bayley second. On the 9th inst., we had a very good show, several members weighing in jack, perch, bream and roach; on the 2nd inst., one of our members, Mr. Laybur, in mistake, took the wrong tackle from the rack of the railway carriage. He will be very pleased to exchange them for his own on any night during the week.

Funny Folks Angling Society, Rose and Crown, 21, Goswell-road.—Since my last the following have weighed in: On the 2nd, Mr. S. Hill, bream and dace; and Mr. Vanhegan, roach. On the 9th, Messrs. Vanhegan, roach; Biggs, bream; and S. Hill, roach. Our worthy host and treasurer, Mr. A. A. Eldridge, with the assistance of a few friends, intends organising angling competitions on the following dates: Pulborough, September 6; Amberley, October 4; Pulborough, October 25. All further particulars in due course.—J. W. BIGGS, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We had a moderate show of fish on the 9th inst. (16lb. 8oz. of roach, dace, and bream), taken by Messrs. F. Lawrence, W. Lawrence, Hall, Ellis, Ballard, and Riggs. Other members out, but not successful.—A. P., sec.

Golden Barbel Angling Society, York Minster, Foley-street, Portland-road.—On the 9th the following members weighed in: Messrs. Crow and Bowring, bream; Green, roach and dace: Bailey, roach and gudgeon. Mr. Bishop made an excellent show of roach and bream on Tuesday. Members are requested to take notice that Tuesday, 5th inst., was quarterly night, and they will oblige by clearing the books as early as possible.—A. STOKES.

Good Intent Angling Society.—Our annual dinner will take place on Monday next, at the Rye House. I expect a large attendance of members and friends. Mr. H. J. Tibbatts will preside. A four-horse brake will start from the club-house at 9.30 on the morning. The members will fish for ten prizes at Cheshunt on the 23rd inst.; start by first train.—R. MURPHY.

Grantham Angling Association. — The eighteenth annual match was held on Monday last, when seventy-one members journeyed down the Canal in two boats, as far as Casthorpe Bridge, where the ground was already staked out by three of the committee, who had gone down a few hours previously, the draw for places taking place in the boats on the journey. During the afternoon a very severe thunderstorm came on. When time was called and the catches weighed, it was found that Mr. J. Welbourn had the heaviest, his fish (bream), weighing 4lb. ½oz., thus securing the first prize of £2 given by the president of the association, Earl Brownlow. There were only five competitors failed to catch a fish. The prizes were distributed on the following night at the Blue Man, by Mr. T. Scothern.

Great Eastern Angling Society, Castle Inn, Leyton-road, Stratford New Town.—The members of the above club were out on the 9th inst., when Mr. G. F. Weaver weighed in jack, perch and roach, 6lb.; J. Grande and G. Johnson also weighed fish. I wish to remind members that the pegged-down match at Hatfield-Peverel takes place on the 16th, when five prizes will be fished for.—G. F. WEAVER.

Great Northern Brothers Angling Society, Robin Hood, Southampton-street, Pentonville, N.—Since my last report the following takes have been shown: July 26th, J. Hewitt, bream and tench, 12lb. 6oz.; W. Barnes, tench, 5lb. 10oz.; C. Watling, jun., 1lb. 12oz., and F. Watling, 2lb. 13oz. of roach from Thames; J. Birch, roach, 5lb. 11lb.; Messrs. J. K. Fitch, J. A. Fitch, W. Parkin, G. Snell, and C. Large had smaller takes, total 35lb. 10oz. Aug. 2, Messrs. F. and C. Watling, C. Large, and J. A. Fitch had roach from the Thames. Aug. 3rd, Bank Holiday, F. Watling, a few roach from the Thames, heaviest 1lb. 1½oz.: A. Hambridge, 12lb. 10oz.; W. Barnes, 7lb. 5oz.; and J. Hewitt, 7lb. 1oz., consisting of bream, roach and tench, total 29lb. 7oz. Aug. 9th, J. Hewett, 2lb. 3oz.; and W. Barnes, 3lb. 14oz. of rudd; H. Brooke, one nice bream, 2lb. 12oz. The following members weighed in roach: C. Watling, 4lb. 14oz.; J. Birch, 8lb.; C. Large and H. Watling—total 22lb. 4oz.—J. A. FITCH, sec.

Gresham Angling Society.—The usual weekly meeting was held last Tuesday, Mr. F. R. Ohlson in the chair. Several members had been fishing and reported as follows: Mr. Rasen, fishing at Potter Heigham, five days, caught two hundred and thirty-two roach, fifty-five bream, seventeen perch, and twenty-three rudd. Mr. Braumley had been having good sport in Fritton Broads; Mr. Mason from the society's water, one roach over 1lb., two of three-quarters of a pound, and five of half-pound. Mr. Parker, flounders, from Southend: and the secretary three good trout, with a Wickham's Fancy fly. Mr. A. W. Parker, hon. treasurer, read a paper on sea fishing, which contained a large amount of valuable information, on what is now becoming a very important branch of angling, and a unanimous vote of thanks was accorded him. Members will kindly note that the sea competition will take place on Monday next instead of Tuesday, as previously announced. Train leaves Holborn Viaduct for Sheerness at 7 a.m., and returns same day at 7.22 p.m., arriving at Holborn Viaduct at 10.5 p.m. The train will be met at Sheerness by P.—A. W. PARKER.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 9th inst. several of our members were again fortunate, Mr. Muller bringing dace and gudgeon; Mr. Brink, dace, perch, roach, and gudgeon; Mr. Saalfield, perch; Mr. Braham, jun., roach and bream; Mr. A. Fish, roach and bream; Mr. Ford, bream. I am asked to state that Mr. A. Fish for the last three weeks has been fishing the waters at Dagenham Gulf: his average takings being 15lb. roach and bream.—W. Fenner, sec.

Highbury Angling Society, Hornsey Wood Tavern, Seven Sisters-road, Finsbury Park.—Since the commencement of the present month a goodly number of our members have had capital sport among the fish. The most successful were as follows: Mr. Frank Temple, a splendid tray of dace, barbel, and chub from the Thames; Mr. Rutherford and friend, a grand assortment of tench (several over 3lb. each), bream, roach (two scaling 1lb. 15oz., and 1lb. 13½oz.), perch, trout, and a handsome grayling of 1lb. 8½lb., from the Hampshire Avon; and Mr. J. K. Devonshire, with tench, weighing nearly 10lb. gross. We have enrolled several new members lately, and others are in course of nomination and for election.—J. T. Griffiths, secretary.

Independent Brothers Angling Society, Three Doves, 21, Berwick-street, Oxford-street, W.—On the 9th inst. Mr. Pope saved us from a blank, weighing in dace and gudgeon. We fish a match on the 16th inst. for four prizes, from Rye House to St. Margaret's; all to go by the first train from Liverpool-street, at eight o'clock; usual conditions. Our return visit on the C.D.U.V. List takes place next Wednesday, the 19th inst., when Mr. Harding, assisted by "Old Izaak," will read us a paper. I hope all our friends will not forsake us on this occasion, but give us a good visit, and I am sure they will be amply repaid.—Snap.

Islington Brothers Angling Society, Myddelton Arms, Canonbury-road.—The following weighed in on the 9th inst.: Mr. Willsher, roach, 1lb. 2oz.; W. Stretch, dace and gudgeon, 1lb. 3oz.; Mr. Croker, dace, 3lb. 3¼oz. We have room for a few more members.—J. H. Herbert, sec.

Izaak Walton Angling Society.—The members competed for five special prizes on the 9th inst. Mr. H. Butt secured first honour; Mr. T. Harris, second; Mr. G. Washington, third; and Mr. J. R. Charters, fourth. Messrs. J. McDermott and J. Elliott had equal weights. The fifth prize will no doubt be fished for again by these gentlemen. There are a series of prizes to be fished for on the 23rd inst., particulars to be had at the club-house. Mr. H. C. Wheatley had a tray of nice roach on Wednesday, the 12th inst., which scaled 8lb. 15oz. The next return visit (No. 1, Eastern District) will be to this society, on Monday evening next, 17th inst., on which occasion the members would be glad to welcome as many of their angling friends as can possibly attend.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—On the 9th inst., Messrs. Beales and Tomkins had tench and roach; other members were out, but did not weigh in. Two new members were proposed at our last meeting, and a match arranged for on the 23rd inst., particulars of which will appear next week.—A. Ide, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—At the committee meeting on the 2nd inst., two punt competitions were arranged to be held, the first on the 23rd, and the second on 27th. Prizes of £1 1s. and 10s. 6d. for each competition. Members are at liberty to go to any part of the Thames. The following members weighed in during the week: Messrs. Wilmot, Master, Newcombe, Carter, and Mason.—T. Salter, hon. secretary.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 9th inst., a good many members were out, but did not have much sport, the following weighing in fish: Mr. White, barbel, dace, and roach; Mr. Holmes, carp; and Mr. Watling, roach and dace. I hope to see a good muster of members on Wednesday next, for important business.—W. Watling, sec.

Liverpool Angling Association.—At our meeting last week two more nominations for membership were made. Arrangements were completed for the outing on the 13th inst., cards of which members will duly receive. The St. Helen's Angling Association wrote asking us to join them in a friendly contest. This was agreed to on the condition that it be a home and home affair, we naming for our side the Knowsley water, and the St. Helens' people to name theirs, which must be a water which they rent or over which they have control.—R. Woolfall.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On the 9th our members fished their first match at Boxmoor, when only three prizes were won. Mr. W. Fisher, first; Mr. A. Fisher, second; Mr. W. Pearce, third. From other waters we had some good shows by Messrs. Mellish, A. Clark, and J. Sansom.—W. F. Pearce.

Newark Piscatorial Association.—The half-yearly dinner in connection with this association was held at the club-room, Horse and Gears Inn, Portland-street, Newark, on Thursday evening, the 6th inst., the chair being taken by Mr. James Neal, a member of the Trent Conservancy Board, and the vice-chair by Mr. J. Longdon, president of the association. About forty members and friends sat down to an excellent repast provided by Host Wilson, in his well-known happy style. The usual loyal and other toasts having been duly honoured, Mr. Edgar Hall, secretary, read the balance-sheet and prize list for the past half year, which were considered very satisfactory, the permanent fund account showing that a step in the right direction was taken when it was first initiated.—The chairman, in proposing "success to the Newark Piscatorials," congratulated the members on the position their society had attained. He claimed for fishing societies that they embraced the most industrious class of people; they went long journeys and laboured hard at their swims, and were very contented and cheerful, and satisfied if they only got the benefit of the fresh air and exercise. People talked of teetotal societies, but he thought that societies like this did a great deal to spread temperance. He had no doubt that his position there that night was due in a great measure to his being a Trent Conservator, and he felt extremely gratified when the Piscatorials sent a deputation to ask him to bring certain points before the Board. For a long time anglers had thought they had not received the assistance they would like from the Board in reference to coarse fish. Anglers, on the other hand, had done very little for the Board, but he hoped the day was not far distant when they would be more closely connected. One of the points laid before him by the deputation was that they should try to get coarse fish protected, but the difficulty of providing funds for such a purpose arose, and it was suggested a small sum be levied on each rod, for if it was left to voluntary subscriptions, some would contribute but others would not. The deputation told him that they were quite prepared to pay a small sum, and he believed no gentleman or true angler would hesitate to give a shilling a year in return for the protection of coarse fish—and perhaps sixpence would suffice. Some had questioned the action he took, but he was glad he had the approval of the Piscatorials. All real anglers were generous and he thought the investment would be a good one; and when the day came that they might need a petition from Newark on the question he believed the Piscatorials would stand to the front and get up a memorial for the Act to be altered. He asked them to drink "Success to the Newark Piscatorial Association." Might it ever flourish.—Mr. Longdon (president), in responding, said, with regard to the proposed rod-tax, when the deputation waited on Mr. Neal the idea in the first instance was to stop netting, that great bug-bear to fishermen. They advocated the entire abolition of netting of all kinds of coarse fish. He did not know whether the Conservators could legally stop salmon netting—salmon draws he meant—or if they could, whether they would do it without some recompense. It was not likely. Where were the funds to come from? Would fishermen be willing to subscribe? He thought they would, if they could see a sufficient return, but that needed thoroughly ventilating before anything could be done. It had been asked if they consented to a rod licence, would the charge stop at a shilling? That must be definitely decided. Again, with respect to boys, they should be exempt until a certain age, say fourteen, for if they stopped boys, where were our future fishermen to come from? It had been computed that a shilling rod-tax would realise throughout the Trent Fishery District something like £2,000 per year, if that were so, coarse fishermen should be represented on the Conservancy, or at least have a voice in the election of the representatives. With these funds the Conservators could build a hatchery, and systematically re-stock all the reaches of the Trent, and it would be to their interest to do so. Before the law was altered, he thought the Conservators should invite representatives of fishing clubs in the district to meet and discuss these questions in an amicable way. No true angler, he thought, would grumble at a rod-tax of a shilling if he saw the way to a proper return for it.—Other toasts followed, and some excellent songs contributed greatly to a most harmonious evening. W. M. Ball.

North Lambeth Angling Society, 108, Westminster Bridge-road, S.E.—Several of our members were out on the 9th inst., but nothing was weighed in, the scarcity of fish being easily accounted for in consequence of our increased standard. Members are informed that the following prizes will be fished for until the end of September. Two perch prizes, one dace, one jack, one rudd, one tench. All specimens. Full particulars of—F. Wallis, sec.

North London Angling Club, Tap House, Holloway-road, Highbury.—We met as usual on Wednesday, when Mr. Hoyle gave a tackle-book and winder as a prize. On the 9th several members were out, but returned too late to weigh in. On the 16th we fish for five prizes at Harlow. All members to go down by the 8.10 train from Hackney Downs.—H. Stretch, hon. sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park, N.W.—We had a nice show of roach by Mr. Raganot on the 6th inst. I wish to remind members that last Thursday, the 13th, was quarterly night.—G. S.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—The next visit on the Anglers' Association List will be to the above club, on the 24th inst., when we hope to see a good muster of anglers and friends. The next series of prizes will be fished for on the 16th inst.; open match. Members can leave town on Saturday. Members are requested to attend next Wednesday next to settle important business.—A. G. Duke, secretary.

Phœnix Angling Society, the Crown, Old St. Pancras-road, N.W.—On the 9th, Messrs. Carr, Brown, Heelas, Homan, Elbourn, and Mares, managed to capture a few roach, perch, and bream. All members please attend on Tuesday next.—W. Elbourn, sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—During the holidays several members weighed in some nice fish. Mr. Rodber, two barbel, one 3lb. 11oz., gross, 6lb. 10½oz.; Mr. J. Isaacs, tench and roach, 5lb. 8½oz.; Mr. Morris, tench and roach, 2lb. 5oz. A match has been arranged to take place on Sept. 6, from the Swan and Bottle Bridge to Denham Lock, all fish to weigh according to club rules; one rod; no live bait. To meet at Westbourne Park, at 8.30, on the morning of the match; yet members can come down by later trains, but must report themselves before fishing; and all must cease fishing at seven o'clock. I hope members will attend on Wednesday next to make themselves eligible to compete. We had the pleasure of making another new member on Wednesday. J. W. Harris, sec.

Queen's Angling Society, the Latimer Arms, Walmer-road, Notting-hill.—During the holidays we had several good trays roach and dace, by Messrs. Bradshaw, Pearce, Drake, Pratt, Wrench, T. Morgan, Cook and Messenger, sen. On the 9th inst., roach, dace and bream, by Messrs. Sellars; Fathers, Pearce, Waterfield, and Drake. Members please note September outing takes place at Harefield, on the 6th September.—F. S. Pearce.

Rising Sun Angling Society, The George, Brook-street, Holborn.—The usual weekly meeting of this society was held on Monday last when Mr. T. Byworth was proposed as an honorary member and Mr. Cope as a working member. Mr. Cornley saved the club from a blank on the 9th with a show of roach.—J. Skinner, sec.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—On the 9th, only two members weighed in, Mr. Webber with 11lb. of roach from the Upper Thames; and Mr. Gibbons with dace and barbel. Our outing to Cookham will take place on the 16th inst., for several prizes. Bank only; one rod.—F. C. Longland.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—On August 9 we had a fair show of fish, the following members weighing in: Messrs. Barrow, A. Barclay, F. Barclay, Bloomfield, G. Barclay, J. Holden, J. Stanley, J. Yeo, E. Perry, Parsley, and G. Yeo. Mr. G. Barclay was the fortunate winner of the dace prize. Mr. Barrow showed a nice roach from the Lea on Friday last, which turned the scale at 1lb. 8oz., and now is being preserved.—A. Barclay, s. c.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—On the 9th we had the trays fairly well filled with fish. Mr. J. Wright, 11lb. ½oz., roach and dace; Mr. Stone, chub and dace; Mr. Forrester, bream, largest 3lb. 11½oz. Mr. J. T. Wright, whilst tight line roach fishing, hooked and landed a nice-conditioned barbel of 3lb. 13oz. On Wednesday, two gentlemen were proposed as working members, and will be balloted for next meeting night. On the 16th inst. the members fish for eight good prizes at Amberley, roving, between Houghton and Timberley Bridges, when I hope to see all the members there. Go by first train from London Bridge, and return by the 6.10 p.m. train.—J. Wright, secretary.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—On the 9th we had some very nice fish weighed in by the following members: C. Smith, sen., roach and gudgeon; J. Arrigoni, carp; W. North, roach; 7lb. 2oz. (one fish 1lb. 1½oz.); G. Saunders, bream (4lb. 2oz.); C. Holmes, crucian carp; J. Petrie, roach and dace, 5lb. 10¾oz.; J. Barnes, roach and dace, 3lb. 15oz. (one dace 7½oz., one roach 1lb. 1¼oz.). On Tuesday we had a fair muster of members present, when some important business was gone through. On Sept. 6 an outing will take place at Pulborough, when six prizes will be fished for in the Central Association waters; only two rods allowed. All members wishing to take part in the same are requested to give in their names before the day to the secretary.—S. E. Cane.

Shepherd's Bush Angling Association, Bush Hotel, Shepherd's Bush-green, W.—We had again a good show on our trays last Wednesday, Mr. W. C. Parkhurst weighing in 20lb. of fine chub, two well-conditioned Thames trout, dace, and some nice roach, the largest 1lb. Mr. A. W. Jones has been successful in securing a handsome specimen of Thames dace 9¼oz.—Crystal Hook.

Silver Trout Angling Society, Bedford Head, Maiden-lane, Covent-garden.—A number of our members were out on the 9th inst., but only the following weighed in:—Mr. O'Callaghan, 15lb. of bream; Mr Smales won the third prize left from the last outing with bream; Mr. Cherry, two nice tench, between 4lb. and 5lb.; Mr. Massey, roach and dace (one dace 7¼oz.); and Mr. Pettit, dace. A special meeting will be held on Tuesday, August 25, for financial and other business, all members interested are requested to attend. Our next outing will take place on September 5, at our society water; all to start fishing on the arrival of the first train. Mr. G. Rutsen was unanimously elected a member of our society, and another gentleman was proposed. Mr. Crumplen has kindly promised to read another paper and the date will shortly be announced.—Pelican.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—We have had some nice trays of fish by the following members: Messrs. Jones, a splendid show of roach and bream; Hooper, bream (a fine fish weighing 3lb. 3oz.); D. Marks, roach; Taylor, rudd; Brown, rudd; R. Spenceley, roach. We fish for prizes on Aug. 15, the place being Dagenham Lake.—R. Spenceley, sec.

South Belgravia Angling Society, Duke of Clarence, Horseferry-road, Westminster, S.W.—We were saved from a blank on the 9th inst. by Messrs. Wheeler and Barrett weighing in some good roach from Enfield. We meet to arrange a match next Thursday for the 23rd. Gentlemen joining on the Thursday can fish in the match.—F. Taylor.

South London United Anglers' Visiting List.—The return visit to the St. Georges A.S. took place on the 10th inst., Mr. E. S. Sbrubsole occupying the chair, and who presented the marble time-piece won in the late competition to the fortunate winner, Mr. G. Mumford. Mr. Gordon, of the Wellington A.S. not being present to receive the ten shillings given by Mr. G. George for the largest roach, it was decided that it should be presented to him on the occasion of the visit on the Anglers Association list, to the Peckham Brothers A.S. as none of the officers of the list were present, Mr. James Smith kindly officiated by calling the roll, when twelve clubs responded. The next visit will be to the Clapham Junction A.S., held at the Clarence, Winstanley-road, Clapham Junction, on Tuesday, September 1, when I hope they will be well supported.—A. Conn, hon. sec.

St. Andrew's Piscatorial Society, Turk's Head, East-street, W.C.—On the 9th instant, Messrs. Harris and A. Long had good shows of bream on the trays; Mr. H. King, roach.—B. Chevalier, sec.

Stepney Angling Society, Beehive, Rhodeswell-road, Stepney.—On the 9th inst. our members again showed up well with roach and bream, although only eight of them weighed in—viz., Messrs. Nash, West, Woodford, Ruston, Jolly, Willsher, Hornblower, and Bounds. We fish a match on the 23rd inst., locality, &c., to be settled next meeting night. I trust all members will show up or write to secretary for information respecting same.—E. N. P., hon. secretary.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—A special meeting was held at the above club last Wednesday evening to rescind a previous minute—viz., from a pegged-down match to a roving match for the club prizes, and which was carried unanimously, and the members have decided to fish roving, from Houghton Bridge, Amberley, to Park Gates, on the 15th, for the said prizes.—George Morton, sec.

Sundial Angling Society, Plough and Harrow, King-street, Hammersmith.—Most of our members took advantage of the two days' fishing on the 2nd and 3rd inst.; the majority of them had good shows of fish, but no specimens. On the 9th, Mr. Carpenter weighed in a nice tench, besides other fish; Mr. Neal, roach; Mr. C. Boreham, perch; Messrs. Lewis, Taylor, G. Boreham, and Reeves, roach and dace. Members in arrears intending to compete in the match on the 23rd must bring themselves within limits by the Tuesday previous. New rule-books are now ready.—H. R.

United Brothers, Deptford.—Several members of the above club were out on the 9th inst., with the following result: Mr. W. Windred, bream and roach; H. Tyler, bream and roach. The members of the above club will fish a pegged-down match on the 16th inst. in the Medway, for several money prizes.—H. Tyler.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—We had some grand shows of roach and bream on the 9th, Mr. Bird, sen., being top weight with 16lb. of bream; the following also weighed in: Mr. Ilsley, Mr. Petty, Mr. Morring, Mr. Bird, jun. We had a good muster on the 11th, Mr. Morring in the chair, faced by Mr. Smith. Some very important business was got through. I hope to see a good muster on Saturday next; all to go by the last train.—H. C., hon. sec.

Walham Green and Fulham Angling Society, Stansford Arms, Fulham-road, S.W.—At the usual weekly meeting Mr. Maslin was duly elected a member, and Mr. Callow was proposed to become a member. Since my last several of our members have been out, with the following result: Mr. Warner, roach, dace, and bream; Mr. Simpleman, roach, dace, and barbel; and Mr. Achong, jack. The two prizes left over from last season will be fished for on September 6, on the same conditions and waters as heretofore.—E. Sutehall, sec.

Walworth Waltonians.—On Wednesday last, it was carried that the competition on the 16th, be open, punt or bank, public or private, three prizes:—(1) Mr. C. Beale, hat value, £1 1s.; (2), value 10s. 6d., given by Mr. R. Baily, (3), Lapzed prize from last competition given by Mr. Risdon, value 10s. 6d. Mr. J. Risdon and Mr. Brancher weighed in two fine shows of roach from the Thames.—C. HIBBLE, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—The competition on the 9th was a failure, only two prizes being taken—Mr. Barnes, first, with dace, 2lb. 4oz., and Mr. W. Gordon, second, with dace, 1lb. 1oz. The remaining prizes will be fished for on the 16th, go where you like outside the thirty-mile radius of London. On the 9th, Mr. Cooper weighed in three good bream, 4lb. 9oz., 3lb. 15oz., and 3lb. 12oz., and two chub, 2lb. 12oz. and 2lb. 6oz., and Mr. J. Dartnall, 5lb. 1oz. roach. There will be a special meeting held on September 2 regarding the alteration of a rule. As this concerns all members, I hope they will show up in force.—R. J. DARTNALL, sec.

Wenlock Angling Society, Clothworkers' Arms, Arlington-street, New North-road.—The competition at Amberley took place on 9th inst., when the following members weighed in: Parslow, first; Anderson, second; Smith, third; also, Sullivan, roach and dace; Dessert, roach and dace; Casey, dace; Maples, bream; Kertland, roach and dace from Lea. The return visit on Central Association took place at the above society on Wednesday, the 12th inst.; there were nineteen clubs represented. I beg to thank those gentlemen for kindly responding to my notice and making the visit a success.—W. M., sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford.—Our members were out on the 9th, and the following weighed in: Mr. F. Humfrys, 11lb. 10oz. of bream, one fish weighing 3lb. 7oz.; Mr. Hunt, 1lb. 10oz. of carp; and R. Lowther, 1lb. 10½oz. of roach. I hope our members will not forget our monthly meeting on Wednesday next, August 19, and attend well.—R. LOWTHER, secretary.

Woolwich Brothers Angling Society, Green Man, High-street, Plumstead.—Very few of our members booked out last week. Only two weighed in fish on the 8th inst., the majority of them resting after the holidays. J. Howcroft, roach, 10½lb., largest 1lb. 2½oz.; W. Brinton, roach, 6lb. 7oz. The last-named deserves honourable mention for the prompt manner in which he aided to rescue a child from drowning that had fallen into the water close to where he was fishing.—J. R. HOWCROFT, sec.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly meeting was held on the 12th inst., Mr. King in the chair, when routine business was transacted. One new member was elected, and another proposed for election at our next meeting. As the renting of some new water will be considered next week, all members are particularly asked to attend and discuss this important matter.—HY. RICHARDSON, hon. sec.

AFTER A DAY'S FISHING,

AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

THE DECREASE OF SEVERN SALMON.

AT a quarterly meeting of the Shropshire County Council, on Saturday, Mr. Jeffrey Poole moved the following resolution: "That a committee of this council be appointed to work with the committee of the Montgomeryshire County Council for the purpose of bringing about a different state of things as regards the supply of salmon in the river Severn and its tributaries in those counties, and that a communication be sent to the Board of Trade, calling attention to the disgraceful injustice under which we suffer in not being permitted to receive something like a fair proportion of fish on those waters." Mr. Poole was of opinion that the efforts of the Board of Conservators to increase the stock of salmon had been worse than useless, and said that this state of affairs had brought about continual bickerings between the upper and lower interests. From correspondence with some of the oldest fishermen in the county, he was persuaded that the supply of salmon in the upper waters could be easily increased, if only the weirs near the mouth of the river were by Act of Parliament or other means swept away, and the fish given a free passage. It was, he contended, a monstrous injustice that ninety-two per cent. of the salmon should be taken in the lower waters, and only eight per cent. in the middle and upper waters. A fisherman of fifty-five years' experience had stated to him that at one time lampreys, shad and flounders used to ascend to the upper waters, but now they were never seen in them. It appeared to be a matter that the county of Salop should consider and call the attention of Government to, through the Board of Trade, as it was a serious loss to the community to be deprived of the fishing.

The Rev. F. Burd seconded the resolution.

Sir C. H. Rouse-Boughton asked whether Mr. Poole—for the reasons that he would give—could not see his way to withdraw his resolution, or at any rate the latter portion of it. These reasons were that the Board of Conservators having received an application at their meeting at Birmingham on the 16th, from the representatives of the upper waters to extend the close time for salmon, were now giving considerable attention to the matter. The close time had been extended to April 1. The question of pollution was being considered and the inspector of fisheries was about to examine the weirs on the river with a view to providing more efficient passes; and under these circumstances he would ask Mr. Poole if he could not either modify or withdraw his resolution. The Board, he said, were under the difficulty of having to consider rival interests, and for years that had been the great difficulty under which they laboured. The Board, too, were anxious to secure the co-operation of Shropshire and other county councils with a view to preventing river pollution by exercising their joint legal powers. The weirs were difficult to deal with, for the reason that they were necessary for turning mills and other purposes, and being among the oldest property in the country, nothing short of Act of Parliament could remove them. Having referred to river pollution from lead works, flannel mills, and sewerage, as accounting, in his opinion, in a great measure, for the diminution in the number of salmon. Sir Charles said he saw no objection to the first part of Mr. Poole's resolution, seeking to co-operate with the Montgomeryshire County Council in the matter, but strongly deprecated any communication with the Board of Trade and the use of such strong language as the words "disgraceful injustice," contained in the resolution.

Mr. Southam said that the Corporation of Shrewsbury had been anxious for years to remove the sewage of the town from the river, but were awaiting the results of the experiments of other towns before proceeding with what would be a very difficult and expensive work. He maintained that very little harm was done to the river by the sewerage, for the reason that it was poured in small quantities in different parts of the river, and not in one volume; and raised a laugh by saying that the salmon captured near the town were of far better flavour than those taken elsewhere. He agreed that the words "disgraceful injustice" stretched the point rather too far, and thought that "great injustice" would suffice.

Mr. Poole was quite willing to substitute the word "great" for "disgraceful."

Ultimately, after some further discussion, Mr. Poole fell in with a suggestion of the chairman, to withdraw his resolution, and refer the matter to the Executive Committee, which has powers in connection with the fishing of the Severn, for consideration. He expressed a hope that the discussion which had taken place would have some effect, for people complained very much, and things had been going from bad to worse.

REPORTS FROM RIVERS, LOCHS, &c.

☞ *River Reporters who want forms and envelopes should send a post card to the Manager of the* FISHING GAZETTE, *St. Dunstan's House, Fetter-lane, London.*

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add 30 min. for Chelsea.
Add 40 " " Putney.
Add 45 " " Hammersmith.
Add 50 " " Barnes.
Add 55 min. for Kew.
Add 75 " " Richmond.
Add 80 " " Twickenham.
Add 85 " " Teddington.

EXAMPLE:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

English and Welsh Reports.

The Lower Thames.—GENERAL REMARKS.—There is one good thing to be found now amongst the anglers of the Thames, and increasing in extent, that is, after a day's fishing, to return either the whole or a portion of the fish taken back again into the river. If this was even more generally carried out—the sizes of the fish legally increased—and gross weights, unless for specimen fish only, abolished—then the stock of fish in the river would not only be substantially maintained, but considerably increased. It has been the custom for a long time amongst anglers who I could name at the end of each day, to select three or four of the largest fish, which for many reasons are best out of the water, and to return the remainder to their native element again, and have always felt well satisfied. I have noticed recently in the reports I have had from Staines, Chertsey, Weybridge, and Shepperton, that in numbers of instances the greater portion of the fish caught have been put back again, and it struck me forcibly from the fisherman putting a line underneath he was also satisfied with it as such a mark of pointing always denotes italics and emphasises the remark. I am sorry to notice one thing in connection with the river in the changes that have taken place in the river-side hostelries the new comers do not as a rule support the protection of the river, and the number of houses that used to subscribe have considerably diminished. I do not think this is wise on the part of the proprietors, as their absence from the List in the Society's "Blue Book" must tell against them especially in the case of anglers who must naturally feel where no symyathy is shown in that direction there can be no real pleasure in giving them their patronage. The only addition of recent date has been that of "The Cricketers," at Chertsey, and there is little doubt the proprietor who is an old and well known Thames angler is heart and soul in the welfare of the fishery of the Thames. The loss of Mr. Jones, "the only" at Staines, and Mr. I. P. Wheeldon, at Walton, is much to be regretted in two important portions of the river.—B.

RICHMOND.—Job Brain, sen., during the week 18lb. of roach and dace, one carp, and nine barbel, the largest 4½lb.; Henry Howard fifteen dozen of roach and dace; and H. Mansell, 40lb. of roach and dace.

TWICKENHAM.—C. Brown, fifteen dozen of roach and dace, two barbel, and on rudd of 1¼lb.; S. Cole, in three days, 30lb. of roach and dace; John Coxen, in two days, 20lb.; George Coxen, in four days, 38lb., two bream and five barbel; Richard Coxen, in one day, seventeen barbel, another day, in a couple of hours, twenty-five barbel, and another day with Mr. Tarrant, seven dozen of roach and dace. John Frost, one day, 20lb. of roach and dace, and one barbel, and another day with Mr. Smith, 11lb., and one bream. R. Moffatt, during the week, thirty-six dozen of roach and dace, and three barbel, the largest 4½lb. F. Wiggins, in four and a-half days, 75lb. of roach and dace and a couple of barbel; and John Spong, in six days, 70lb. of roach and dace, four bream and two barbel.

KINGSTON.—John Johnson, during the week, eleven barbel, and sixteen dozen of roach and dace; J. Wilkes, four bream, and twenty-six dozen of roach and dace; N. Bolton, in three days, twenty-three dozen of roach and dace, three of the largest roach weighing together 3lb., and one brace of jack.

SUNBURY.—Messrs. Edward Clarke and Son, 20lb. of roach and dace and ten barbel; I. and A. Stroud, during the week, fifty-two barbel, and some fine roach and dace. A gentleman in one of Stroud's boats caught six bream the largest 4½lb.; Snowball, during the week, eighteen jack.

WALTON.—Mr. T. V. Savage, sen., has taken a fine carp of 9lb., in the reach, on a No. 9 hook and light tackle.

CHERTSEY.—John Poulter, one day with Mr. C. Wastell, three dozen of roach, and a few dace, and in two other days, six dozen of roach. L. Hackett, seven and a-half dozen of roach and seven barbel.

HAMPTON COURT.—William Melbourne, in four days, twenty-five dozen of roach and eleven barbel; John Smith, during the week, fifty barbel, the largest, 7lb.; Mr. Monro, fishing at the back bay, has taken two trout, weighing respectively, 5lb. 14oz. and 3lb. 9oz.

Upper Thames.—From Bray, Cookham, Marlow, Hambleden, and other frequented stations on the Upper Thames I hear of good all-round work being done among barbel, roach, perch, and jack. The water is in prime fettle, and of late not too worried with pleasure-boats, the result telling in the angler's basket. At Marlow, Mr. Ashby, fishing in the Mill Pool, in two days accounted for 130lb. of barbel, and Mr. Sydney Wright, jun., has been busy among trout, barbel, and roach, one of the latter class scaling just a pound. In the Hurley waters Mr. Ford is credited with two jack, 15lb. of roach, and three perch, ½lb., ¾lb., and 1lb. respectively, and Mr. Sell, two perch, 1¼lb. and 1¾lb. each. Perch of quality and condition are certainly in the ascendant of late. Weather settled fine, with wind from south-west.—MARLOW BUZZ.

Thames (Windsor).—Sport in this district has not been quite so good as last week, but still many baskets have been made. A fine specimen of that now scarce fish in the Thames, the perch, was caught by Mr. E. Donner, of Priest-hill, Englefield-green, on the 10th instant, while spinning for jack off Magna Charta Island. It weighed just 1½lb. A trout of 4lb. has been taken near Monkey Island, and a fine barbel, on roach tackle, close to Windsor Bridge, by Mr. C. Clarke, of Windsor. It weighed 5lb. 3oz. The best roach this week was one of 15½oz., by Mr. Suttle, jun., of Windsor, and the best basket one of 25lb., before breakfast, by Mr. G. Harbard, of Windsor, his brother, Mr A. E. Harbard, before breakfast one morning having twelve, weighing 5¼lb. In showery weather a few members of the Royal Windsor and District Piscatorial Society and friends journeyed by the launch, *My Queen*, on the 10th instant, as far as Marlow. A most enjoyable day was spent, the lovely Thames Valley being just now at its best. With the worthy secretary's (Mr. Howlett's) wife at the piano, two violins, and several voices, not a dull minute was spent from start to finish, Windsor Bridge being reached about nine p.m, all on board having thoroughly enjoyed themselves. Water still in excellent order for all round angling.—B. R. BAMBRIDGE.

Ancholme District.—Owing to the generally disturbed state of the weather, fewer anglers than usual have been out. Two or three small catches of trout on the beck have taken place, and the second hatchings of some flies which appear in the spring are now rife. Amongst these may be mentioned the Freckled Dun (Moor Game and Red Hackle), the Dark Drake (Orange and Waterhen), and the Checkwing (Hare's Ear and Yellow). These flies may be used with advantage to the end of the season, as they are real leaders and favourites with the fish. Very little has been done on the Ancholme or Crosby Lake this week amongst the coarse fish. Trout are now at their very best. One young gentleman, who rises early, has caught about eighty on a small brook this season, weighing well on to an average of 1lb. each.—THOMAS FORD.

Barle (Dulverton).—The river is in good order after the rain. Salmon passing up. Warmer. Good baskets are being killed by fly and minnow. Useful flies, male and female Uprights.—IRON BLUE.

Brighton.—SEA FISHING.—We have had high winds from the west, and a rough sea this week, so that boat angling has been in abeyance. A few anglers have been trying for bass from the groins at the east end of the town. The sea is now calming down and a good prospect of more settled weather.—H.

Chichester Canal and Sussex Rivers.—We have had a quantity of rain in this district during the week, yet rivers are in many places low and bright, and in sluggish waters covered with scum and weed. A few good bream and roach are notified from the upper waters of the Arun, and from the lower reaches in the tidal water several good mullet have been taken with rag-worm. Mr. S. Young, one of, if not the best roach angler in this quarter, has taken some excellent roach from the Rother, near Midhurst, and at Chichester Canal, some of the finest bream of the season. Tench are increasing here; some fish up to 3lb. have been taken and a perch of 3¼lb. Dace and roach have given sport on the Adur in the Steyning district, and from the upper waters of the Ouse, roach of 1½lb., and chub weighing 3½lb. have been taken; blow line fishing with natural fly has been most successful among the chub. A fine pike was taken in July from the hammer ponds, Horsham, with a fly rod and spinning minnow; the fish weighed 30lb., was 4ft. in length, and in girth 22in. It has been well set up by Mr. Barnes, the naturalist, of Midhurst.—GEORGE F. SALTER

Douglas (Isle of Man).—The rivers continued in good order all last week; but not until Saturday was there enough water to bring up the sea trout, of which both Douglas and Ramsey bays have been full. Twenty-four hours' rain has, however, made a great difference, and as the sea trout have had sufficient water to surmount the weirs and dam-heads, sport with them is sure to be good. I think a small Alexandra, tied with jungle cock in the wings, or a Royal Charlie (always a good autumn fly here), ought to kill. Sea fishing all round our coasts is (and promises to be for the next month) at its best. With adequate tackle and a superficial knowledge of the locality an tides, an amateur can hardly go wrong afloat or ashore.—STORMY PETREL.

Dove and Tributaries.—Weather dull, and water in prime order. Sport good on the whole. Mr. W. Bullock has had two good baskets with the Golden Dun from the Birdsgrove water this last week—one of five and the other of six brace. Mr. T. Wilson has had good sport on the same water, taking five brace under the hour at twilight with the Turkey Brown. Messrs. Matthews (two brothers) bagged ten brace as a joint catch on the Upper Manifold one day last week, besides doing fairly well the rest of the week.—D. AND W. H. FOSTER, Ashbourne.

Eden (Carlisle).—The flood of last week-end brought out the worm fishers in strong force, but sport was poor. Some think that the sewage deposit, being stirred up from the bottom, has driven the herlings back to the sea to find their way up the Esk. There was another great run of salmon and grilse, and both the river proprietors and the Solway fishermen had good takes. Some of the latter gave way to temptation, and I hear that about a dozen of them have received invitations to come up to Carlisle, and explain to the magistrates why their nets happened to be in the sea instead of on dry land during the weekly close-time. It is a great pity that the Scotch and English close-time is not made simultaneous. The present state of things is a constant source of poaching. The Eden is now in fine order for fly-fishing, but the unsettled weather makes it uncertain from day to day.—SILVER GREY.

Eden (Kent).—The fishing on this pretty little Kentish river has not been at all bad lately as several of the

London anglers who have paid it a visit can testify. The river holds fine roach and perch. There is also a fair stock of chub, but they run rather small. Gudgeon are extraordinary prolific in the water, but not large. There are a few good jack roaming about, too, although when I tried to introduce myself to them a few days ago, they were not in the mood to receive callers. A friend of mine has, nevertheless, taken, a 12lb. fish from Edenbridge. Just now roach are feeding well at maggots and paste, and on 9th inst I encountered several anglers with good shows. A Mr. Godley had eleven roach and twenty-seven gudgeon —one of the former fish weighed 11oz.—and a friend who accompanied him had eighteen roach and twenty gudgeon Roach have been taken out of the river up to 1lb. and 1¼lb. this season by the local anglers.—GOOSEQUILL.

Esk (Whitby, Yorkshire).—ANGLING.—As I anticipated last week, there has been excellent sport in the river Esk during the last week. The water has been in good fishable order, and though in some respects the weather has not been so favourable as could be desired, some good catches have been made and most anglers have had decent sport. The river is yet in fair order, and there is good reason to believe that should the weather be favourable, some first class sport may be obtained. The following is a record of the past few days: Mr. John W. Nicholson, Whitby, five salmon, weighing respectively, 5lb., 5lb., 6lb., 10lb., and 4lb.; Mr. George W. Elliot, M.P., one of 6lb.; Mr. William Harland, Egton Bridge, eight, 5lb., 8lb., 4lb., 7lb., 5lb., 8b, 7lb., and 4lb.; Mr. J. R. Ansdell, Hull, one of 16lb.; Mr. J. W. Wheldon, Pickering, one of 5lb.; Mr. J. H. Keighley, Whitby, three, of 11lb. 2lb., and 5lb.; Mrs. Keighley, two, of 14lb. and 4lb.; Mr. C. J. Keighley, two, of 11lb. and 5lb.; Mr. R. B. L. Johnston, one, 14lb. Mr. J. H. Lang, Whitby, one, 4lb.; Mr. Linton, Sandsend, one, 6lb.; Mr. John Dixon, Glaisdale, one, 4lb.; Mr. J. Marsden, Scarboro', one, 2lb.; and Mr. D. Green, one, 6lb. Many of the salmon net fishermen have done well outside the harbour, but there are others who, so far, find the season a comparative failure. It is generally conceded, however, that the fish is plentiful, thanks to the culture and pains of the local conservators, whose efforts of the past are bearing good fruit despite the many difficulties with which they had to contend at the earlier periods of the establishment of the Esk as a salmon river.—J. J. JACKSON.

Fen Waters (South Lincolnshire).—Nothwithstanding the unsettled weather, there seems to have been a fair quantity of sport on the different drains, and there have been a number of visitors. Again the coming week has its "specials" arranged for, and doubtless a goodly number will be brought on Saturday and Monday. The waters are in good condition. Perch are affording in some places best sport; but now there is more colour roach are fairly well on. Some good takes are reported from the Welland and along the Fortyfoot. A splendid perch was caught last week in the Fortyfoot by Mr. Miller. The fish scaled 2lb., and was landed with a worm. Among the more fortunate local experts are Messrs. Fancourt, Johnson, and Nelson. Some few have tried spinning for pike, but as yet not much has been done with them.—LIMPET.

Idle (North Notts).—Anglers are now doing very well in the North Notts district, both on the river and the canal. The rains have freshened up the streams and cleared a good deal of the weeds away, so that the swims are more easily fished. They have also brought down some nice trout from the preserved waters. Last week an angler at Broom House, below Retford, caught two brace, which scaled 6½lb., they were in good condition, and were taken with gentles scoured in sand and bran. The same angler hooked another good fish, probably 3lb., and with spinning tackle caught a 4lb. jack. Roach and dace are also biting well below Retford, though evening is best time for the sport. Trolling is beginning on some of the dykes in the lower district, but fish met with have been only small.—L.

Lake District.—Heavy rain has fallen since Saturday last throughout the whole of Cumberland and Westmoreland. Most of the rivers were in flood on Sunday, and are now in the best fishing condition they have been during the present remarkable season. Reports of good takes and fine sport reach me from the Lune, the Esk, Kent, mint, and sprint, though only in few cases, mostly from the Esk, are sea fish mentioned. Trolling and angling for coarse fish has been successful with those endowed with courage to brave the elements on tarn or lake. Mr. F. Pollitt and friend in a basket of seven pike, had four of about 8lb. each from Killington Tarn on Monday. Messrs. Tucker, visitors from London to Eskdale, are reported to have done well amongst the herling and sea trout. Messrs. Armstrong, Irving, Macmillan, and others, in the same river, taking on an average three or four sea trout, and half a dozen herling at a fishing. Char fishing has been poor of late on Windermere, a fact to be regretted, when so many visitors are in the district. One of the water bailiffs last week seized an illegal mesh net, but could not find an owner. The net was confiscated.—WESTMERIA.

Lea and Stort.—Both rivers have been much improved in condition by the recent rains, it would only have required another downfall or two to have brought down a much-needed flush, as the low-lying grounds are pretty well saturated, and the ditches are partially filled again. However, fishing has in many places much improved, and some very decent baskets have been made; portions of the navigation water have been drawn off for necessary repairs to the lock gates. During a long walk to-day (Thursday), I was pleased to notice that the Anglers' Association have taken every possible precaution for protecting the river where it is necessary, employing both policemen and their own water-bailiffs. It is only a week since that I gave particulars of the capture of a net at Cook's Ferry. Now I hear from very good authority that the same men have got another net, but they are being looked out for, and it is to be hoped that the next capture will include the poachers themselves. Roach have commenced to feed better than they have done for some time. Jack and perch have been fairly well on, also chub and bream, and some very good specimens have been taken. Eels have not been running at all well. Waltham Abbey.—Some very nice takes of perch and a few small jack have been had. Ponders End.—A gentleman fishing in the mill stream on Wednesday, had two splendid bream, of 6½lb. and 1lb. respectively, besides some smaller fish; another gentleman had five chub, which scaled 9lb. Some good dace and roach have also been taken. At Flanders Weir some very nice baskets of roach and a bream or two have been taken. Cook's Ferry.—A few roach and dace have been caught. Games's Fishery, Higham Hill.—Perch have been biting and fair takes have been made. A gentleman fishing here for perch took a jack of about 3lb., but returned it, as the pike fishing does not commence until the first of September. Ferrie Boat, Tottenham.—On the 9th and 10th roach were biting well, and few, if any, anglers went away empty handed; a few perch were also caught. During my walk I saw vast quantities of small fish in the low water. It struck me that anglers might now spot many likely swims, as there are plenty of places almost devoid of weeds which might be noted. The water will be running in again on Saturday, and should be in good fishing order the next day. —SPLICED JOINT.

Leicester.—After the turmoil and excitement of the holiday week, angling has become comparatively slow. In the Leicester Society's preserves a decent amount of fishing has been done both at Leicester and Aylestone, but takes have been below the usual standard, a fact which may be easily accounted for owing to some of the best swims being very much overbaited last week. The best results were obtained from the Canal above the town and among the more fortunate anglers were, A. Bacchus, H. Barrows, H. Prime, L. Tyler, and E. King. Pike have been more generally sought after the last few days and plenty of specimens between 3lb. and 4lb. have been landed. Amongst a fine lot of fish, in a basket by Mr. E. King, were some perch up to 1lb. Fishing resorts a good distance from the town have not received quite so much attention. Rivers and brooks alike are bank full and clear, rendering it difficult to obtain good lots. From the Wreake encouraging takes of bream and roach have come to hand, and the doings at Blaby and Narboro' have not been amiss among the roach. Several Leicester anglers fishing the waters at Welford caught nice lots of roach and pike. Mr. H. Painter having about 12lb. of the former specie.

Loddon (Earley).—Since my last report we have had some very heavy storms, which has greatly improved the fishing of this water. Good takes roach and chub have been had; also jack, one very nice fish of 10lb. in good condition. Water in capital order.—J. R. GOULD.

Lugg and Arrow (Leominster).—Both these streams were refreshed after the rain, but quickly lowered. They are in order for either fly or bottom fishing; but the weather has been so unsettled that sport has been limited. The grayling have moved well in the evening, and some nice fish have been taken with the fly. Wasp grub fishing has been successful for those who have been able to get grubs. On Tuesday a nice lot of fish were taken in the Arrow. The Pinsley is running low and clear.—GWYNNE.

Lugg, Arrow, and Pinsley (Kingsland).—Rivers still low and bright—their beds very foul. Sport has been varied, on some stretches good; others, nothing scarcely doing. The best flies: August Dun, Silver Dun, Blue Gnat, Spinners, and Ginger Moth. Trout have taken the minnow more freely, whilst some fine grayling have been accounted for with the grasshopper (Silk and Dun). Wasp grubs are very scarce in this neighbourhood, and not much doing with it.—R. T. WILLIAMS.

Medway (Maidstone).—Water in good condition, but weather has been too unsettled, and only the experts have met with success. A gentleman from London was fishing last week; he had some good baskets of roach. I saw his catch on Saturday. He had then some fine roach, one of 1¼lb., all taken with the boiled wheat. There has been some good jack taken up to 12lb. Generally the anglers have not had good sport, the weather has been too unsettled, and, as I before said, only the experts have succeeded in obtaining sport by very fine angling. If present weather continues the angler is bound to get sport. This applies to Maidstone, Farleugh, Wateringbury, and Yalding.—W. SHRUBSOLE.

Medway (Tonbridge).—The water is settling down nicely, and the weather to-night (Thursday) looks better than for some weeks, yet still there are clouds about. The bream are well on the bite at a worm, if swims are judiciously baited, and roach are taking paste or boiled wheat, but are somewhat shy. Chub are rising well, but other fish will not bite freely till later on. We want some dull, hot weather, and then sport will be fast and furious.—YE MEDWAY WATER-RAT.

Norfolk, Suffolk, and Cambridgeshire Rivers.—In all our Norfolk waters roach are feeding well, and I have seen some excellent trays from the Yare and several of the broads. The baits mostly used are gentles, worms, and caddis; where you can get them on creed wheat is very good. Fishing at Brandon on Monday last I experienced the most terrific thunderstorm I ever remember in the eastern counties. Great trees were split into atoms, and no end of damage done to the crops. Up to the commencement of the storm, fish were feeding well, and I took a nice lot of roach and dace in a very short time. The river rose nearly a foot, and off went the fish. I must say I think the swims in this river might be, for the comfort of anglers, kept a little better cut out. I found the report of 92lb. of roach taken last week was made by two gentlemen from Thetford, and a splendid lot they were. I have also seen a lot of over 60lb., taken from the grand creek on the 13th. At Littleport, Ely, and the branch, some very good lots were taken on the 12th, and in prime order. Mr. Percy Holland and brother took from the river Lark, at Mildenhall and Barton Mills, on the 13th, twenty-five roach, that weighed 27lb., a most beautiful take. I am sure anglers may with safety now try any of our streams.—WILLIAM HOWLETT.

Ouse (Brandon, Norfolk).—During the week, since my last report, up to last Wednesday, the extreme wet weather put a stop to fishing as a general rule. Visited the headquarters, Ram Hotel, twice; found nothing doing; in fact, the elements of nature have put a damper on to everything, whether outdoor work or sport. There are plenty of good swims which Host Rolph has in readiness, with plenty of fish. I believe a visit will reward the angler. Although this is a quick stream and weedy in places, from what I have seen in other waters here there is no duckweed, and the fish are more lively and in better condition. I find anglers, from conversation with them as to many other places, are grumbling fearfully. Time of writing, a change for the better. Wind, south; windy.—JOHN O. GEORGE.

Ouse (Huntingdon).—Most anglers have been busy with roach and bream, and some good takes have been made, especially bream, they feeding well. One local fisherman had a good take of bream on the 10th, landing nineteen good fish with brandlings, and wheat is the bait used for roach. Some other local fishermen have had good sport. The water being in good condition, affords good sport for bottom fishing.—H. ROUT.

Ouse (St. Neots).—Fish are still feeding fairly well and good sport has been had. Mr. W. H. Ekins, one evening lately, caught thirty roach, averaging ¾lb. each. Several jack have been taken and also some good perch, bream, and rudd.—N.

Penzance (Cornwall).—SEA FISHING.—Sport in the bay continues excellent, for besides whiting, mackerel, &c., pollack are now becoming numerous. Pier anglers are also doing well.—H.

Plymouth.—On the Dart.—Princetown is a town that within the last few years has made considerable strides. From it you can fish several streams, namely, Blackabrook, Cowsick river, East and West Dart, and Wallabrook, therefore the Duchy Hotel, kept by host Rowe, a relic of the famous Rowe, who wrote the "Dartmoor" is a good centre, close to the railway station on the Launceston Branch of the G. W. R., you change at Yelverton for Princetown. On the 9th inst., three gentlemen were out and had some nice trout as the river is in very good order, they were taken with the Maxwell Red and Blue Upright. I hope to have a day this week below Dartment, where the secretary of the board tells me there are plenty of salmon. The Dart is one of our rivers that is well looked after.—W. HEARDER.

Scarborough.—(SEA FISHING).—Silver whiting, gurnet, and dabs, continue plentiful in the bay, and good sport with mackerel daily expected. When fishing from a boat at anchor by all means use strong single gut tackle and let your mackerel stripbait drift with the tide, and if you use a sinker, a small perforated bullet will suffice.—H

Severn and Lower Teme (Worcester).—Both rivers low, but in good order for fishing, and some good basket, of grayling, trout, and coarse fish have been taken with fly maggot and worm, one angler taking sixteen brace grayling with the fly, and another eight brace. The Red Palmer, Zulu, Red and Little Green Insect killing well. In the coming week the club members will be out in force, and will no doubt register some good catches.—R. WINGFIELD.

Severn (Shrewsbury).—There is a good deal of Vyrnwy water in the river, and as anglers in this locality well know, under these circumstances sport has not been of the best quality, but one or two good trout have been captured. One, I hear, weighing 4½lb., was taken at the Isle duy Fiast, and Perkins has also had a few fish, averaging 1lb. each. Thursday brought more rain, and anglers have been waiting for the river to clear before using the fly. Eels have been running pretty well, and one or two good ones have been taken near the quarry by Mr. Williams, the hon. sec. of the Shrewsbury Severn Angling Society.—PISCATOR.

Taw (North Devon).—Rivers have risen considerable, and some days trout take well, and others just touch the fly. I heard of one catch, seventy-two; another forty-five; but the majority is just six brace. Peal are up, but not taking. One gent on the Torridge tells me he has not heard of many being taken. Net-men catch a few, and I heard a estuary man say he has had the best season this for years. Salmon and peal, with the rod-men, are taken with the minnow; but the great raker has not yet taken as many as years before.—RUSTY GAME.

Tees (Barnard Castle).—Since my last the almost continuous rainfall has flooded this river to such an extent that fishing has been almost out of the question. The only salmon I have heard of being caught was by Mr. C. West, near Gainford. His fish weighed 10¾lb. On Monday night, the writer saw six fish go over the Lendings dam in a quarter of an hour, showing that they are running up. River now falling, and with a cessation of rain good sport may be looked for in the next few days.—J. H. R.

Teme (Ludlow).—The Teme is still running in capital order for angling, being clear and a nice level. At the beginning of the week heavy rain fell and the water was stained. The fish moved well and rose freely at the Green Insect, Blue Dun, Pale Blue, Black Gnat, and Red Spinner. Bottom fishing has been good. Wasp grub has been most successful. Minnow fishing has been good in the morning. In the Ashford water some good trout have been landed with the wasp grub. Under Whitcliffe a nice lot of grayling were landed with the Green Insect and Pale Blue. In the Castle pond a few good trout have been caught. Mr. Foster's otter hounds were at Leintwardine on Tuesday, and killed an otter, and hunted another for three hours and lost him. The Ony, Corve, Clun, and Ledwyche, are all in fishing order. Sport in the Corve good with wasp grub.—S. LUDLOW.

Teme (Tenbury).—The water in this district is now running in order for angling, being clear, but low, and a good flush of water is wanting before any good sport can be expected. The weather has been changeable, but the fish have rose in the evening, and have taken the wasp grub well, and one or two very nice lots of fish have been landed. The Rea, Kyre, and Ledwyche are all clear, and very low. Sport in them quiet.—WORCESTER.

Whitby.—AMATEUR SEA FISHING.—Some excellent sport is to be had in the roads off Whitby. The sea abounds with fish of all kinds—mackerel, whiting, codling, haddocks, dabs, and billets, and few who go off in the little pleasure boats or dingheys, for the purpose of fishing, return without having made a good account of themselves. Even novices manage to make good hauls. To the ordinary experts, the sport is most attractive and enjoyable.—J. J. JACKSON.

Witham, &c. (Mid-Lincoln).—The waters in this district are rather quieter this week, after the holidays; but still every week-end sees hundreds of fresh faces eager for sport. The streams are now of good height, and, as anglers put it, coloured to perfection; but takes have rather been noted for specimen fish than their number and weight in gross. About Lincoln there were some good takes. Mr. Jackson, a visitor, got nearly two stones of roach in the neighbourhood of Bardney, and there were other visitors who had picked up 20lb. to 25lb. of fish for their pains. A fine brace of tench were got at Southery, scaling 5lb., and at Tattershall, bream up to 4lb. were landed. On the Fossdyke there were some splendid roach taken. At the Lincoln end two anglers picked out from a fine lot taken, five roach, which scaled 6½lb. In a competion at Saxilby, a number of fish of this class were taken, which scaled over 1lb. each. Trout and chub of good size have been taken from the Barlings river.—LUCI.

Wye and Derwent (Derbyshire).—Anglers continue to have good sport here, and the condition of the streams is good. Sport on the Wye has averaged from two to six brace per rod, some very large fish being amongst the number. The Derwent during this week has been nicely flushed, owing to the heavy storms of rain we have had. This has given the bottom fishermen an opportunity of trying their hands, and some really good baskets of trout have been killed on both the Matlock and Darley club waters by the aid of wasp grub and maggots. Amongst the most successful are Messrs. Brooker, Buxton, Ogden, and Pearson. The Derwent is now running down nicely, and should be good for fly fishing by the week end. Best flies are Sand Fly, Ash Dun, Silver Dun, Throstle Wing, and Bumbles.—DOTTEREL.

Yare (Norwich).—The club matches are now in full swing, both on this river and also on the Bure, Horning Ferry, being the spot most often chosen, whilst on this stream, Brundall, Buckenham Ferry, and Cantley, are all coming in for a fair share, and as there are about seventy clubs in Norwich, the riverside inns of both rivers ought to benefit. It strikes me on reading the accounts published from time to time that the angling part of the business forms a very small portion of the day's annual outing with majority of clubs as the portrayal of the journey, the breakfast and splendid dinner so fully described testifies, still the like luckily does not apply to all cases. Sport has not been at all first-rate at any of these competitions, else we should have heard more about it. Several individual catches are reported from Cantley and Buckenham, but nothing up to what was to be expected, as the weather has very much improved, and with it ought to come first-rate sport. Professor Day has been very busy with the bream, and landed some good fish. I believe he is now disengaged, should any visitors to the Yare require his services. Letters addressed to him at the Champion Inn, Chapel Fields-road, Norwich, will receive attention. The Champion Club caught between 5st. and 6st. of roach, &c., on Tuesday last, at Buckenham Ferry. Particulars of match next week. The river clear as gin.—ROBERT MOLL.

Yore, Wharfe, Swale, Nidd, &c.—These rivers have been kept in a rising and falling condition during the past week, owing to frequent heavy thunder showers. Sport has consequently been very uncertain, and no good catches have been made to my knowledge. Mr. F. M. Halford and myself had a day together on Monday, but atmospheric influences prevented us from having much much sport. We got a few, however, and managed to enjoy ourselves, although the fates were against us. Brown Owl, Cinnamon Fly, Knotted Midge and Poult Bloa, best flies at present.—THOMAS M. WALBRAN.

East and West Cleddau (Pembrokeshire).—With the recent heavy rainfall the rivers remain in capital condition for fishing. Morning and evening fishing is the best just now. Trout are well on the rise and several sewin have been taken.—H.

Lake Vyrnwy (North Wales, via Oswestry).—Although we have had a continuance of strong W. and S.W. gales since my last report, yet several anglers have made good baskets, Wednesday being the best day, when Mr. F. W. T. Round got his "limit," fifteen lovely trout, 10lb. 2oz. Mr. A. Price also had a nice basket. On Monday, Captain Stevenson had capital sport with ten fish, weighing 8¾lb.; and again on Tuesday with eleven, weighing 7lb. 10oz. On the same day Mr. W. H. Flint brought in six very plump fish, scaling 6½lb., heaviest 1lb. 9oz. Best flies: Alder, for rough water; Golden Dropper, for heaviest fish; Zulu and March Brown. There is more fresh water in the lake at present than at any time since commencement of season.—LONG DRIFT.

Tenby (South Wales).—SEA FISHING.—Mackerel are now abundant in the bay and large numbers are being caught by "whiffing." Only a few bass taken as yet, and only small catches of gurnard, plaice, and conger, indeed until just now, the weather has been too rough for boat anglers to venture out.—H.

Towy (Llandilo, Carmarthenshire).—With the exception of a salmon and sewin, only small takes of trout have been made during the past fortnight, either on the Towy or its chief tributary, the Cothy. The Hon. Hugh Campbell and Miss Cronen, of Tregib, appear to have had the best of the otherwise indifferent sport. We have, however, just had a heavy rainfall, and on Sunday and Monday last the river overflowed its banks, so there is now a prospect of a renewal of good sport, more especially as there are a lot of salmon up.—H.

Usk (Abergavenny).—The river is now in first-class condition. It rose 4ft. on the 9th. Since then some fine salmon have been caught with the fly by Messrs. F. de vie Beamish, R. W. Bigg, J. Lumm, J. Lamont, J. Pritchard, and H. Clare. A great many trout have also been caught. A great many salmon in good condition are now in the river, and good sport may be expected for some time to come.—J. CLARE.

Usk (at Usk).—Sport continues most brilliant on the river Usk and large numbers of salmon are daily caught with the fly. On Saturday last, General Sir C. L. Barnard made a record day by catching seven salmon, averaging 11lb. each fish; Major-General Dunn, caught five; A. W. Brown, five, on Friday last; Mr. Barker, on Wednesday, caught four; and Mr. T. Rees, on Thursday caught four. The catches are abounding with salmon, and the water is in magnificent order for the fly.—T.

Scotch Reports.

Altnacealgach Hotel Waters (via Lairg, N.B.).—On Monday week, Rev. W. Chapman and Mr. Clark, London, fished Loch Veyatie, and got forty-seven trout, 12½lb.; Rev. P. Whyte and Dr. Russell, London, on Loch Urigill, thirty-five, 10lb.; Mr. Ogilvy, Dollar, on Loch Cama, twenty-six, 10lb.; and Mr. Stewart, Liverpool, on same loch, twenty, 6½lb. On Tuesday, Messrs. Sproat, Liverpool, on Loch Cama, twenty-seven, 10lb.; Rev. W. Chapman and Mr. Clark, on same loch, thirty-one, 10lb.; Rev. P. Whyte and Dr. Russell, on Loch Boarlan, forty, 12lb.; Mr. Ogilvy, on Loch Urigill, forty-two, 11½lb.; and Mr. Stewart, thirty-one, 9lb. On Wednesday, Messrs. Sproat, on Urigill, fifty, 13lb.; Rev. W. Chapman and Mr. Clark, same loch, seventy-seven, 18½lb.; Messrs. Sanderson and Roberts, Selkirk, on Cama, twenty-one, 7lb.; Rev. P. Whyte and Dr. Russell, on Cama, thirteen, 4½lb.; Mr. G. Clark, Bedford, on Boarlan, twenty, 7½lb.; Mr. Ogilvy, Dollar, on Boarlan, twenty-four, 7lb.; Mr. Stewart, Liverpool, on Veyatie, forty-three, 10lb.; and Mrs. Russell, on Ledmore stream, eight. On Thursday, Messrs. Sanderson and J. Roberts, on Veyatie, thirty-one, 8lb.; Mr. Stewart, on Cama, fifteen, 4½lb.; Mr. Ogilvy, on same loch, twenty-three, 6lb.; Rev. P. Whyte and Dr. Russell, on Urigill, thirty-six, 9lb.; Mr. A. Roberts, thirty-eight, 9lb.; Mr. Couper, Edinburgh, thirty-four, 7lb.; and Mr. G. Clark, on Boarlan, blown off, eleven, 4lb. On Friday, Mr. A. Roberts and Mr. Shannen, on Cama, forty-two, 11½lb.; Messrs. J. Roberts and Sanderson, on Urigill, thirty, 9lb.; Mr. Couper, on Veyatie, thirty-one, 7lb.; Rev. W. Chapman and Mr. Clark, on Cama, fifty-one, 11lb.; Mr. Ogilvy, on Urigill, thirty, 8lb.; and Mr. Stewart, on Mheallain, thirty-six, 9½lb. On Saturday, Messrs. Sproat, on Urigill, fifty-six, 15½lb.; Messrs. Roberts and Shannen, seventy, 20lb.; Rev. W. Chapman and Mr. Clark, forty, 10lb.; Mr. G. Clark, on Cama, forty-three, 10½lb.; Mr. Couper, on Cama, twenty-three, 7lb.; Mr. Ogilvy, on Veyatie, thirty-two, 9½lb.; Messrs. Roberts and Sanderson, on Boarlan, thirty-five, 10lb.; and Mr. Stewart, twelve, 4lb. —McB.

Ayrshire Lochs and Streams.—Some very fair sport has been had of late in the Ayrshire lochs. On Friday, Mr. Jenkins and friend, of Glasgow, out from the Eglington Hotel, Dalmellington, killed thirty beautiful yellow trout, averaging nearly ½lb. each. Mr. Burgess and son, Leeds, on the same day, had forty-two yellow trout on Loch Finlas. On the neighbouring loch (Doon) some capital angling is being had on suitable days. On the Ayr, Mr. John Auld and friend, of Catrine, Ayrshire, landed six dozen yellow trout with fly. The fish were in prime condition. On the Garnock, on Saturday, Mr. Robert Crawford, Kilbirnie, Ayrshire, had some very nice sport the other day, killing twenty-one yellow trout, and the same gentleman landed twenty-four on Monday on Rye water—beautiful little fish. Mr. James Crawford, of the High School, Glasgow, killed forty-eight yellow trout on the same day on Garnock water and neighbouring hill streams, all with fly. Rivers in Ayrshire have been very low of late, but a heavy rainfall on Sunday has now put the streams in better order.—HEATHERBELL.

Border Esk.—I have a batch of cheering news from several of the most prominent fishing resorts on the Esk, from Langholm, Canonbie, Longtown, and Metal Bridge. Rain has been sadly wanted since the commencement of the season. A small instalment, a kind of sample of the bulk, fell during the last week in July, and a bantle o' fish were taken principally by visitors to the district. On Sunday, however, there was fifteen hours continuous rain, and the river rushed down in flood between bank and brae until "Auld *Esk* was just one lengthened tumbling sea." There has not been anything like such a deluge for over six months, consequently the bed of the river is thoroughly well cleaned out, and in order to clench the matter and make assurance doubly sure, the tap was again turned on during the early part of Tuesday morning and a pouring wet day was the result. Mr. William Douglas, of the Temperance Hotel, Langholm, informs me that "the water is fairly "down" or "up," which everyone likes to call it, a good bit, and the ground is well soaked thereby ensuring a continuance of water." In the Langholm waters, Mr. T. Irving had seven sea trout; Mr. A. Irving had seven whiting, two sea trout, and 2lb. of yellow trout; Mr. Thos. Morison, had twelve whiting, one sea trout, and some yellow trout; Mr. J. I. E. Houram had a grand run with a good-sized sea trout, but lost it at an awkward landing place among the craigs, five sea trout, however, fell to Mr. Hourani's rod; Mr. W. Sauders had a 2½lb. sea trout, with several whiting at Skippers Bridge; Mr. J. Anderson had a sea trout, two whiting, and some yellow trout; Mr. A. Knox had two sea trout; Messrs. A. H. and F. W. Kerr, Eskdale, Temperance Hotel, had ten sea trout, four whiting, and twelve yellow trout at two fishings, and on a subsequent occasion 32lb. of sea trout and whiting; Mr. Molyneaux, Eskdale Temperance Hotel, had two sea trout, and four whiting, at another fishing fourteen sea trout and whiting, and at a third fishing nine sea trout, and some yellow trout: at night, Mr. A. McMillan had seven whiting, and three sea trout; Rev. E. Smith, Hexham, had a sea trout of 3lb., and several baskets of yellow trout in the Tarras, and a sea trout of 2lb. in the Todholes; Dr. Knowles, Eskdale Temperance Hotel, had four sea trout and three whiting; and Mr. St. George Tucker, staying at the same hotel had some good takes of yellow trout. In the Canonbie water, Mr. J. H. Park, Marchbank, had a salmon of 9lb. from the Cauldron pool, and Mr. Craig, Cross Keys Hotel, had a salmon 15lb. from the same pool, Mr. C. Johnstone, Maitland Cottage, had a grilse of 7lb.; Mr. Shand, Cross Keys Hotel, had a grilse and seven whiting; Mr. Todrig had seven sea trout and nineteen whiting; Mr. Craig, thirty-five whiting; Colonel Elliot, Hawick, had four sea trout and a good basket of whiting; Mr. Scott, Holmfoot, had four sea trout and four whiting; Mr. I. M. Little, Carlesgill, had a grilse of 5½lb., a sea trout, and six whiting from the Cauldron Pool, while numerous other anglers have had good takes of sea trout and whiting. Good sport has also been had in the Broomholm reserved water, by Mr. Connell, of St. Thorwalds, and the Rev. David Maxwell. I now come to the lower waters from Longton to the Metal Bridge. By the way, I have a characteristic letter Miss Cartner, the genial landlady of the Metal Brig Hotel. Miss Cartner, who is "guide, philosopher, and friend," to all the anglers who enter her hospitable abode, tells me that the fishing has been very good this season, but the water nearly up to the time of writing, had been low. However, fish were plentiful, and now that they had had a flood she anticipated the best back end on record. A letter also reaches me from Mr. Jos. Bell, of Longtown, who goes on to relate "how very successful he and Mr. Lamb had been during the spring salmon fishing, but owing to the many small rises in the river, which sent the sea trout up to the higher waters, fewer of these fish were taken than had been anticipated, after the numerous big runs they'd had. Whiting are in full swing, but the new moon is wanted for night fishing. Mr. Rosenviney, Newcastle, had a salmon of 10lb. with the worm; and Mr. Bell himself caught one of 7lb with a small trout-fly. When Colonel Whyburgh made his big haul of one hundred and eight whiting, he lost as many more on account of the very small flies he used. Both Mr. J. B. Slater, of Carlisle, and Mr. Mason, of Rockliffe, have done well in the Metal Bridge water, and Mr. Burke, of Croydon, filled his creel at the first go off, but failed at night on account of the darkness and the strong wind that was blowing." Mr. Bell says: "The Longtown anglers had a grand take a few days ago with the worm, when the river was flooded. Some as far as three baskets. Good salmon fishing is expected in September and October, one good reason is, that fishing used to take place up to the mouth of the river with nets. They are all cleared out now for fifteen miles back, therefore the salmon have a good play-ground before they take the fresh water.—GILNOCKIE.

Bunessan Hotel, Mull.—Anglers from Bunessan Hotel, fishing Loch Assapol and Loch Pottu, are meeting with very good sport. From 3rd to 8th of August there were two grilse, fifty-nine sea trout, and seven hundred and forty-six brown trout caught among those anglers staying at Bunessan Hotel. Pringle Taylor had one grilse, 3½lb.; Rev. Mr. Thomson had grilse, 4lb.; H. Penman, a sea trout, 4lb.; Mr. Brown, a sea trout, 3lb.; Mr. Cunningham, one sea trout, 3lb. August 8, Dr. Dugall, Glasgow, a sea trout, 4lb. The weather has taken a change in favour of anglers here. The 7th and 8th was pouring with rain, and causing speed in the river to Loch Assapol, and let up fresh-run sea trout and salmon.—JOHN CAMPBELL.

Carron (Easter Ross, Ardgay, N.B.).—On Wednesday last, Mr. Hartley, Braelangwell Lodge, caught an 8lb. salmon on Garden Pool. A few days previously, the same angler landed two salmon on Braelangwell Pool. Owing to frequent floods, the river is in anything but fishing order, and up to Wednesday this week the weather had no appearance of settling. On Tuesday, this week, Mr. John MacLeod landed a clean-run grilse, weighing 6lb., on the waters connected with the Balnagown Arms Hotel.—McB.

Dee (Aberdeenshire).—The past week has been one of floods. This will have its due effect shortly in bringing on an early and encouraging autumn run. Already autumn fish of 20lb. are being got in the nets on the coast, but it is yet too early to look for them in the river. The Dee has had a thorough scour out, and is now getting into fair fishing trim. On the Invercauld Arms' water, Morgan (keeper), Mr. Yarrow, Mr. McGregor, and others, had some good sport last week, chiefly with red fish. On the Glen Tana reaches the spring and summer fishing has been the most prolific enjoyed for many years back. On the Aboyne water Mr. Sandison landed a nice fish of 9lb. on Tuesday last, while several good baskets of trout have also been got, Scott (gillie to Mrs. Pickering) having one of 3lb. on the Huntly Lodge water. On the Upper Dess water, Mr. Harry Davidson (Harrow) landed two fine fish, scaling respectively 6lb. and 12lb. each; while Mr. Lamond had one of 9lb. on the Kincardine Lodge water. On the Lower reaches some nice baskets of grilse and sea trout were made, chiefly with the worm. The netting stations on the coast have been doing a "roaring trade" lately, and are now far above their average. The river stations have not done so well, and on many of those farther inland operations have closed for the season some time ago.—DEESIDER.

Deveron (Banffshire).—Sport with the rod continues almost at a standstill on this river. In most of the upper and lower waters fish are more in abundance than for several years back, but the water has never resumed its natural colour, owing to the continued rains, which take place more or less daily. Sportsmen are also bent on the 12th, and until the height of the grouse season is over there will be little done by the rod. Except a few grilse taken on the Huntly water, and a number of trout on the tidal water, there is nothing to report. There has been a splendid run of grilse and salmon on the river lately, and the net fishermen have had capital hauls daily. At the coast stations the catch has not been so heavy since the spate on the river commenced to fall, which allowed the fish to ascend. Notwithstanding, the nets nearest the river's mouth yielded well, and on Saturday last the number of boxes despatched to the markets from both the river and sea was sixteen, on Monday of this week nineteen, on Tuesday nine, and on Wednesday eleven. For the corresponding week last year, from all sources, only sixteen boxes were consigned for the week. On the Gardenstour coast the fishing was fairly remunerative this week; on Monday four boxes were sent to the markets, and on Tuesday seven. The fish are beginning to be of heavier weight, and the quality continues good. —H. W.

Helmsdale (Helmsdale).—Here, I am sorry to say, I have again to report great lack of sport, but certainly no lack of fish. Pool and stream are teeming with grilse, and not a few salmon, but they wont take. No matter what fly you try, they come—if they come at all—short. The other evening an angler hooked seven grilse, and failed to land one. This was no fault of the angler, who is a master of the art; the fish all came short, and the slight hold soon gave way. During the day, however, even this kind of sport is not obtainable, as they will not rise at all. The lessees of the shootings are now arriving daily, and grouse prospects are not particularly bright; there will be numbers of anglers out, and things may change. One thing is clear, the great number of fish on this river at this time must produce a grand spawning season, that is if the poacher does not come on the ground. But here there is little fear of that, as among the natives such a thing is almost unknown; but occasionally they do come from distant parts, and, in spite of faithful watchers, make a raid. The netsmen are again getting a few fish, indeed, more than they expected. The herring fishing since my last has also done fairly well, but the fishing is still considerably behind last season. At Wick, on Saturday and to-day, immense catches have been got, many thousand barrels having been landed. Cod are very numerous—so numerous, indeed, that fishermen say that they are destroying their nets, tearing them to pieces.

Inchnadamph Hotel Waters (via Lairg, N.B.).—July 28, General Ranken, London, fished Loch Assynt for a few hours, and caught one grilse, 6lb.; Mr. Fry also fished same loch for a few hours, and caught a *Salmo ferox*, 4lb. July 29, General Ranken, on Loch Assynt, one salmon, 8lb.; Mr. and Mrs. Leatham, on Mid Assynt, fifty-one trout, 20lb. August 4, General Ranken and General Smith fished Mid Assynt, and caught twenty-five trout, 9½lb.; Mr. Fry, on Loch Assynt, caught two salmon, each weighing 8lb., and two grilse, each weighing 6lb. Aug. 5, Mr. Tarver, Newcastle, on Loch Assynt, caught one salmon, 13lb., and another 8lb.; General Ranken, London, on the same loch, caught one grilse, 6lb.—JOHN SUTHERLAND.

Kyle of Sutherland (Station Hotel, Invershin, N.B).—On the 29th ult., General Shannesy landed two sea trout, which weighed 4lb.; and on Thursday last, Mr. Tracey, Wimbledon, caught one weighing 3lb., and two of 2lb. each. Other anglers have also been more or less successful with the rod. The net fishings are rapidly falling off in productiveness. As compared with the previous week the total catch of salmon and grilse on Mr. Anderson's, Scalp, Rivermouth, and South Bonar fishings during the past week was less by almost one-half. There was also a considerable decrease on Mr. Smith's, Inverchurron, and Craggandubh fishings; but on Messrs. Powrie and Pitcaithley's Skibo fishings at the head of the Dornoch Firth, the difference was hardly perceptible. From all the above nettings combined the estimated weight of salmon and grilse despatched to Billingsgate and other markets in the course of the week would hardly aggregate 25 cwt., being the poorest record of any week since beginning of June. —McB.

Lairg, N.B.—Monday, of last week, was most unfavourable for angling, being thundery with heavy rain at intervals. Messrs. Copeland and Cummings killed twelve trout, 6½lb. Another angler got four trout on the same loch, and on Loch Beannoch Major-General Stafford caught three fine trout, 2½lb. On Tuesday, Mr. Cummings caught six trout, 6lb., on Loch Beannoch; Mr. Copeland had fourteen trout, 5lb., on Loch Shin; and another angler, on the same loch, nineteen trout, 6¾lb. On Wednesday, Major-General Stafford killed one trout of 1½lb. on Loch Beannoch; and Mr. Cochrane, nineteen, 6¾lb., on Loch Shin. On Thursday, Mr. Cummings fished Loch Beannoch, and made a basket of eight fine trout, weighing 6lb. Friday was so excessively stormy that no anglers ventured out. Saturday the weather had improved somewhat. Mr. Copeland killed three trout on Loch Shin; Mr. Young, five trout, heaviest 1½lb.; Sergeant Ray, three trout, and another angler three.—J. Y.

Loch Cracail (Sutherland, N.B.).—On the 27th ult., Gen. Shannesy, Station Hotel, Invershin, landed thirty-two trout, aggregating 32lb. On Saturday last, Mr. Walter Scott-Brock, Achinduich House, and Mr. R. Cunningham, Edinburgh, made a basket of fourteen, which average 1½lb. each.—McB.

Loch Laro (Sutherland, N.B.).—On Wednesday last, Mr. R. Cunningham, Edinburgh, and Mr. W. Scott-Brock, Achinduich, Invershin, landed one dozen trout, weighing 5lb. in all. On Monday, this week, they made a basket of sixteen, aggregating 7½—McB.

Loch Leven (Kinross).—After a drought extending over five weeks, the weather has at last become very moist, and baskets are better filled than they have been for some time. A strong blustering wind from the south west has been a decided drawback to what might have othorwise been a full average week's sport for the season. The Stirling Club on Tuesday was the most successful of four clubs out during tho week, when ten rods captured with fly, fifty-seven trout, 51lb. 11oz.; prize-takers (1), Mr. Miller, ten trout, 10lb.; (2), Mr. Melvin, thirteen trout. 9lb. 2½oz.; (3). Mr. Mackie, six trout, 7lb. 6oz.; heaviest trout, Mr. Mackie, 2lb. 12½oz. Several of the most successful private parties wero Master John Taylor, Edinburgh, twenty trout, 17lb.: Mr. Martin and Mr. Young, Edinburgh, seventeen trout, 17lb.; Mr. Drysdale, Melbourne, Australia, thirteen trout, 14lb. 4oz.; Mr. Watson, Ayton House, soven trout, 9lb. 8oz.; Mr. Malcolm and Mr. Lamond, Glasgow, fifteen trout, 15lb. 4oz.—ROBERT B. LAING.

Naver (Strathnaver, N.B.).—In the course of last week, Mr. P. H. Wormald and friend, Skelpick Lodge, landed twelve fish in all, including salmon and grilse, and an angler from Syon Lodge caught five. On Monday, Mr. Tom Scott, Rhifail, landed two salmon, which weighed 15lb. and 19lb. respectively, and on Tuesday, one of 12lb. Major E. A. Burnett fished Loch Rumsdale on Saturday last, and made a basket of two dozen beautiful trout. Mr. John Stuart, Bettyhill Hotel, is out regularly on the tidal waters, and making pretty fair baskets of trout.—McB.

Ness (Inverness).—During the past week angling on this water has been very good. The following are the catches for the week: On Dochfour water, General Godman, five grilse; on the Ness Castle water, Mr. F. Walker landod twenty-one grilse; on the Holm water, Mr. Godman landed twenty-seven grilse; on the Lower Holm, Sir George Boswell killed five grilse. On the 6th inst., Mr. Jas. Scott killed three grilse; on the 7th (free day) local anglers out killed seven grilse and one salmon. The water continues in first-rate order. Very good takes are being daily got with the nets.—D. WATSON.

Orchy (Inveroran Hotel).—The Comte de Paris, fishing from Inveroran Hotel, on August 4, had six dozen and five trout, 18lb; Mr. Havers, London, one salmon, 17lb.; Mr. Lamond, Glasgow, one trout, 3lb. On the 6th, the Comte de Paris had five dozen and four trout, 14lb.; Mr. Lamond, Glasgow, two dozen trout. On the 7th, the Comte de Paris had three dozen and eight trout, 10lb.; Mr. McDonald, London, had one salmon, 16lb. On Saturday, August 8, Mr. Forbes, Glasgow, had one beautiful salmon, 19lb. River in splendid condition; plenty of fish.

Overscaig Hotel Waters (via Lairg, N.B.).—On Wednesday Mr. Raikes and Mr. Playfair, London, fished Fiag beat, and landed fourteen trout, averaging ½lb. each; General Murray, Worthington, and Mr. Beale, Bucknell, on same beat, twenty trout, 8lb.; Colonel and Mrs. Butler, London, on Loch Shin, twenty trout, 7½lb., and a *Salmo ferox*, weighing 4½lb.; Dr. and Mrs. Matthews, Liverpool, on Loch Shin, ten trout, 4½lb.; and Captain Ross, along with Mr. Ross, on Loch More, two sea trout, 4½lb. On Friday, Mr. A. Ross fished Loch Grium, and caught a fine *Salmoferox*, which weighed 6lb.; Messrs. Ross and Brown, on same loch, had fourteen trout, averaging ½lb. each: and Colonel Butler, on Loch Shin (a few hours only), nine trout, 4lb. On Monday this week Captain Ross and Mr. Ross, London, fished Loch More, and landed one dozen sea trout, the heaviest of which weighed 4lb.; and the whole 23lb. Dr. Matthews and Colonel Butler tried Loch Gorm, and got forty trout, aggregating 13lb.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.).—Although the lochs have been too flooded for successful angling, the following good baskets have been made, and still better sport is expected this week as the waters settle: On Monday, Mr. Liddle, London, fished Loch Garbetbeg, and landed two salmon, weighing 8lb. and 7lb.; Mr. and Mrs. S. Young, London, on Loch Inchard, six lythe, 36lb.; Mr. Sampson, Brighton, on Loch-na-Blarloch, thirty-seven trout, 10lb.; and Mr. F. Maitland, Dover, on mountain streams, thirty-four trout, 6¾lb. On Tuesday, Mr. Liddle, on Loch Garbetmore, two sea trout, 2lb.; and Mr. and Mrs. Young, on Loch Inchard, one sea trout, 1½lb., and twelve lythe, 53lb. On Wednesday, Mr. Green, Surrey, on Loch-na-Blarloch, twenty-four trout, 6lb.; and Mr. Sampson, on Loch-na-Caillich, twelve trout, 4½lb., and a sea trout of 1½lb. On Thursday Mr. Liddle fished Loch Garbetbeg, and landed a salmon, weighing 9lb.; and Mr. Sampson, on river Achriskill, a sea trout of 1lb. On Friday, Mr. Liddle, on Loch Garbetbeg, had a salmon, weighing 9½lb., and a grilse of 1½lb. On Saturday, Mr. Maitland, Dover, on Loch Garbetbeg, one salmon, 6½lb.; Mr. F. Maitland, on mountain streams, fourteen trout, 8lb.; and Mr. Green, on Loch Tarvie, four trout, 3lb.—McB.

Shin.—The upper reaches of the Shin, although well stocked, yielded poor sport last week, only one fish—an eleven-poundor—being captured by Captain Berkeley on Wednesday. Mr. Vernon Watney, Tressady Lodge, Rogart, fished the principal pools on Tuesday. Lord and Lady Fitzhardinge and party, Berkeley Castle, arrived at Lairg Lodge for the season on Wednesday, the 12th inst.—J. Y.

Shin (Inveran Hotel Waters).—During the past week the following sport was obtained by anglers from Sutherland Arms Hotel: Captain Miles fished tho lower beats on Monday, and landed two grilse, 6lb. and 7½lb., on Clarag Pool. On Tuesday, the same angler had a grilse of 6½lb., on Fir Dam; and one of 4lb., on Clarag. On Wednesday, Mr. Seller caught one of 6lb., on Cromarty. On Thursday, Captain Miles landed a salmon of 8½lb., and a grilse of 6½lb., both on Big Fall Pool. On Saturday, the same angler landed a grilse of 6½lb., on Big Fall Pool; and Mr. Seller, a yellow trout of 1½lb.—McB.

South of Scotland.—Rain fell heavily all over the South of Scotland, on Saturday, and only the very keenest of anglers faced the elements and were moderately successful. By the evening the rivers were rising, and, on Sunday morning, the waters were in roaring floods, which gladdened the hearts of every angler. At day light on Monday morning, a goodly number of anglers had taken up their positions on the best casts, and with worm as a lure heavy baskets were secured on the Annan. Ex-dean of Guild, London, an expert minnow fisher, has been making some capital kills with his favourite lure, in the lower waters near Annan. In three days of two hours each, he has killed the following. On Monday, forty-eight herling; Tuesday, twenty-four; Wednesday, thirteen; and he has had one or two sea trout as well. Mr. Joseph Pollock, Cockermouth, has also been one of the most successful of anglers on the Annan, and comes next on the list for numbers and weight. On Monday, he had thirty herling and about two dozen yellow trout; and on the following day, he had a heavy basket of herling with fly. Mr. Peter London, Annan, caught twenty herling, and a number of yellow trout, and Mr. James London, killed eighteen herling. Mr. Peet, Wigton, landed eighteen herling above Northfield, and the Brewery waters. Mr. Halliday, Blackburn, had a good basket of herling, and a few yellow trout above Northfield with worm. Mr. Wm. Millar, Glasgow, caught ten herling—fine ones—with the worm above the Fish House pool. Mr. Thomas Tweedie, Moat House, Annan, had thirty herling, besides a dozen yellow trout. Mr. George Carrick had over twenty in the water above Milnbie Caul. Mr. McGiverin, post-master, Annan, and Mr. Munro, photographer, filled their baskets with herling in two hours at the stream below Warmanbie. Mr. W. Wright, Annan, killed seventeen herling and one sea trout 1¾lb. Mr. James Henry had eight herling, and one sea trout at Galabank. Mr. John Lawrie, Bank-street, had a very fine basket of herling. Mr. John Irving, fish merchant, had six herling; Mr. Mackay, Brydekirk, caught sixteen herling, and one dozen yellow trout in Blacketlees water; Mr. Steel, eight herling; Mr. John Rae, Bridge-street, eleven herling, and one sea trout; Mr. John Iveson, Wigton, two sea trout; and five herling in two hours; Mr. Willie McLean, Port-street, three herling, and a number of brown trout, one of which weighed 1¼lb.; Mr. F. H. Wilson, Annan, landed four trout. Good catches were made in Hoddom Castle water, and also in Sir Robert Jardine's water, near Castle Milk. Mr. Lawson had eight herling; Mr. Rutherford, Hawick, one sea trout on Wednesday, and his friend had two fine herling with fly. In the Blackpool, Mr. William Wright; Ednam, Annan, killed ten herling, and one sea trout in two hours on Wednesday forenoon. Mr. Wright then hooked a large salmon over 20lb. with trout-fly and tackle and a 10ft. rod. As the fish was being landed at the end of the hour and ten minutes, the rod gave way under the strain, and the angler rushed to the side of the pool and landed his fish, which. however, struggled out of his hand, and the cast becoming entangled about his legs, broke. The fish rolled over the rock into the pool. Three Hawick anglers were on the opposite side of the river unable to render assistance, owing to the heaviness of the river, and Mr. Wright had to attempt to land his fish single-handed at the side of a steep bank and under trees. Mr. F. B. Johnston, Lord-street, Liverpool, killed two sea trout and fifteen herling in Hoddom Castle water, and his friend, Mr. Fletcher, Liverpool, caught two sea trout and ten herling, all with fly. To-day (Thursday), Mr. W. Wright killed sixteen herling and one sea trout, 1½lb., with small fly. The Annan is in splendid order to-day (Thursday), and is likely to remain so until the end of the week. Some good sport has been had in the Esk, which was in flood on Sunday. Although the flood had subsided, a good deal by the following morning bait fishers were out before daylight on Monday morning, and many splendid creels of sea trout and herling were obtained on all the different stretches of the river. The tributaries fished very well, more especially the Liddle and the Tarris waters. Towards the end of last week the river was exceedingly low, and little could be done by angling through the day. At a night's fishing, Mr. Alexander McMillan, Langholm, had three sea trout and seven herling in the water below the town of Langholm. Mr. Thomas Irving, Langholm, caught six herling and one sea trout; Mr. A. Irving grassed three sea trout. An angler out from the Temperance Hotel, had some nice sport. Messrs. Tucker, London, caught several sea trout, besides baskets of yellow trout; Mr. George Armstrong, Langholm, killed a sea trout of 2lb. and three herling at a night's fishing; Mr. Andrew Beattie, Langholm, two sea trout and a few herling; Mr. W. Davidson, St. Thorwald's, three sea trout, Broomholm water; Rev. E. J. Smith, Hexham, killed a sea trout, weighing 3lb.; and he had some nice catches of yellow trout in the Tarras water. In the Kirkcudbrightshire Dee some better sport has been had since the fall of rain, and the river is now in much better order for angling. In the Urr some good sport has been had at night, but little or nothing has fallen to the rods through the day. The Dee was 3ft. up on Monday; but it would require to have another 18in. to place it in good ply for salmon fishing. Anglers have been moderately successful on this river since my last notes. In the Fleet, capital angling has been had of late, despite the low waters. Three Dumfries anglers (Messrs. McKill, Brown, and Thomson) had a splennid combination catch on Saturday afternoon. In three hours they had on exhibition at the Murray Arms, fifty-one herling and sea trout, all of good size. On Monday the river was in flood, and anglers were out early and had good baskets. All the rivers are in the very best order now after the floods.—HEATHERBELL.

Thurso and Lochmore (Brawl Castle).—The river has been in good ply during the past week, a good deal of rain having fallen. I never remember so many newly-run fish in the river at this time of year, but the takes have not been up to the expectations. Two rods were out on the Brawl Castle water, with the following results: On the 3rd, Mr. Part's rod, on No. 3 beat, had two salmon; on the 4th, one of 8½lb.; on the 5th, on No. 3 beat, one of 7lb. On the 6th, Pipe-Major Grant, fishing No. 3 beat, got a fresh-run salmon of 7½lb.; Mr. Part, on the same beat, got one of 7¾lb.; on the 7th, on No. 3 beat, two, one a grilse of 4lb. and a salmon of 7¾lb.; Pipe-Major J. Grant got two, on No. 2 beat, 7½lb. and 9lb.; on the 8th, Pipe-Major Grant, on No. 2 beat, got two salmon, 7½lb. and 9lb.; on the 10th, on the same beat, one of 9½lb., and one on No. 3 beat, of 9lb. The prospects are excellent. The best flies are Jock Scott, Popham, and Childers.—A. H.

Tongue Hotel.—On August 4, Mr. Wordsworth, on Loch Loyal, 15lb. of trout; Mr. Muir, on Loch Slamm, 7lb. of trout. On August 5, Mr. Wordsworth, on Loch Loyal, 10lb. of trout; Mr. Muir, on the Kyle, six sea trout, 10lb.: Mr. Durrant, on the Kyle, three sea trout, 7lb. On August 6, Mr. Wordsworth, on Loch Loyal, 7lb. of trout; Mr. Muir, on Loch Craggie, ten trout, 4½lb.; Mr. Durrant, on Loch Craggie, fourteen trout, 5½lb. On August 7, Mr. Muir, on Loch Craggie, thirteen trout, 4lb.; Mr. Wordsworth, on Loch Slamm, one salmon, 8½lb., also ten trout, 5½lb. On August 8, Mr. Wordsworth and Miss Turing, on tho Kyle, four sea trout, 8½lb., heaviest fish 4lb.—A. CAMPBELL.

Whitadder (Ellemford).—The river is in better size for angling at this time than it has been during the whole fishing season. On Monday, tho 10th, Mr. Stobart, of Biddick Hall, had twenty-one trout, and Mr. Hugh Pattinson, twenty-five trout. There is every prospect of more rain.—R. J. F.

Ythan (Udny Arms, Newburgh, Aberdeenshire).—Sea trout are exceptionally plentiful, and baskets of 9lb., 13lb., and 16lb. per rod are quite common. The Devonshire tube and fly are proving equally successful lures, both from bank and boat. Among others fishing during the past week from the Undy Arms Hotel, which is meantime chock-full, may be mentioned Messrs. Hodkinson, Wolverhampton; Dr. Meston, Aberdeen; G. Davidson, Wellwood; J. C. Wordie, Banchory; Dr. Orton, Newcastle; and Captain Gauld, London, Kent.—K. O. N.

Irish Reports.

Ballinderry (East Tyrone).—There is another bad week for me to record in the Ballinderry. Trout continue to sulk, and still refuse to rise to the angler's lures, so that fishing is confined to perch, pike, and bream. The only basket I have to record is one of four trout made by Mr. C. B. Irwin, on Monday, on the Coagh reaches. I hear that plenty of trout and salmon are lying off the Burnmouth, waiting for a flood to ascend. If this comes, we shall have an improvement in sport much to be desired. Tho greater part of the "aristocrats" are off to do battle on tho moors.—EAST TYRONE.

Blackadder.—At Ballynahinch fishery, since my last report, angling has greatly improved, and we have a splendid flood. Can now advise anyone to try it, and am certain they won't be disappointed. The most successful rods these last three days were General Beresford, twelve salmon; Col. Garrett, thirteen; the Earl of Tyrone, nine; Mr. Pike, fourteen; Mr. Garnett, two; also a great quantity of sea trout by other rods.—TOOMBEOLA.

Erne and Lough Melvin.—All through the past week the weather was very much against angling, still some fair sport was obtained by the following anglers: Messrs. J. Hone, Jameson, General Dickens, Mr. S. F. Staples, Captain Greer, and General Beresford. Trout fishing on Melvin has also improved, and capital baskets are being made.—M. ROGAN AND SONS.

Lough Currane, Waterville (County Kerry).—Sport on favourable days has been fair. Colonel Rogers has had two salmon and a grilse, weighing respectively, 7lb. and 6½lb., and 6lb., in addition to, from three to nine white trout daily; Mr. Judd had one salmon, 6lb., and some good baskets of white trout. The other gentlemen who did pretty well at white and brown trout on odd days were Surgeon-Major Rahilly (who had a fine dish of large white trout on Friday), Major Cresswell, Mr. Eades, Mr. F. L. Gordon-Farrar, Colonel Kirkwood, Mr. Merriweather, Dr. Coats, Rev. Mr. Walters, Mr. Brock, Mr. Baker, and a few others. Surgeon-Major Rahilly caught two salmon, 5½lb. and 3½lb. (and lost a third when ready for the gaff. On the Inny, on the 9th, John Sullivan, a professional, got one 9lb. On Monday the latter angler caught two 15lb., and Dr. Coats and Mr. Fernell, three, 10lb., 5lb., and 4lb.—THOMAS J. DENNEHY.

Lough Mask.—The fishing for the past week has been much improved owing to the change of wind and a heavy fall of rain. Mr. Butler, of Bristol, and Mr. and Mrs. Allgood, of London, and Mr. Rothwell, of Navan, have had excellent fishing, from 10lb. to 20lb. of trout each, with some pike each day. Tho fishing on Lough Corrib is bad owing to the lowness of the water on the lake.—SCYMAN SUMMERLY.

Lough Neagh (Ulster).—At the mouths of the different rivers entering Lough Neagh on the Tyrone, Derry, and Armagh shores, salmon and trout netting is prime, as at this time of the year the fish are lying in these localities waiting for floods to ascend the rivers. Lake trout are not rising, the weather being calm and close. At this period of the season there is generally a great falling off in the takes of pollen intended for the Scotch and English markets, from a rather curious circumstance which, as far as I am aware, has escaped the notice of all writers on that mysterious and little known fish. In the latter week of July and the first week of August, a kind of black fly rises on the Lough in certain localities. These flies are in countless myriads on water and in air, and the pollen gorge themselves with them, the result being that the fish netted in those localities are worthless for exportation, as they turn green and decompose rapidly. I am informed that the flies move about according to the change of wind. This year it seems not to be so plentiful as other seasons. The eel, perch, pike, and bream fishing continue good.

Moy and Lakes (Ballina).—This river has risen over one foot within the last few days, and as I write rain is falling heavily, which will cause a further rise in the water. All nets are now off, and as soon as the water clears anglers should do very well with salmon, grilse, and sea trout. During the past week some nice fresh-run salmon and grilse were killed by Mr. W. Brougham and friend and Major Helly, the latter killing one day a salmon weighing 12½lb., and a grilse, 7lb. Trout fishing in the loughs is slowly improving, and nice baskets of fish are brought in by the Messrs Grey and the Rev. John Thornton and sons. The best creel that I have seen this week was one with Messrs. Meyer and Thornton, twenty-four fish, 21½lb., and tho largest trout for the week was one of 3½lb., and several two-pounders.—FRANK HEARNS.

Strule and Mourne (Newtoun Stewart, Co. Tyrone).—If the weather remains as at present we shall have good fishing here till the end of the season, October 10. The flax water will not do any harm I expect, as we apparently shall have enough fresh water to keep the river clean, and the keepers are exerting themselves much better than formerly in looking after and preventing the farmers from letting their flax dams go free. In less than two weeks it will all be away in any case.—JOHN J. MOORE.

Westmeath Lakes (Mullingar).—The fishing has improved wonderfully during the past fortnight, especially upon Lough Ennell, and with a little extra trouble, sufficient supplies of Green Drake can be obtained. "Harries" are very plentiful, and sometimes the fish rise as freely as in May and June. Nearly all the visitors had left when the sport became good. Tho brothers Berne (four) had some capital fishing during the week ending 11th August, getting on an average five trout per day, ranging from 1lb. to 3lb. each. Many others had similar success. Your correspondent tried for a couple of hours this evening (the early part of the day being very wet), and landed three trout, weighing respectively 5¼lb., 1¾lb., and 1lb. To-morrow I turn my steps towards the moors.—T. J. W.

DEATH OF THE OLDEST THAMES FISHERMAN. — The veteran Tom Davis, of East Moulsey, has been removed from the now limited list of Old Thames Fishermen—he has been ailing for a long time with no hope of his recovery, and on Thursday week he breathed his last. He had many good friends who cheered as far as they could his declining years and on Tuesday last his funeral was attended by the river keepers of the T.A.P.S., and the fishermen of the place.

A SOMEWHAT new though welcome innovation took place at the Tanfield Agricultural Show the other day. The exhibition was held in a field on the banks of the Swale, and Mrs. Hammond, tho owner, gave the visitors, who might so choose, permission to fish in the river, within a mile of the village. A large number of rod-holders took the opportunity offered, and somo fair sport resulted. The incident is well worthy of imitation.

NOTES FROM BIRMINGHAM AND DISTRICT.

A MEETING of the committee of the Birmingham Angling Association was held on August 6 at the head-quarters, when the chief business appertaining to the great forthcoming contest was brought forward. The selection of three gentlemen being required to visit Pershore to make the final arrangements, resulted in Messrs. Coles, White, and Gumbley being appointed. A committee being required to form the prize purchasing committee, eight gentlemen were nominated, but five only being required, independent of the ex-officio officers, the vote was taken on the nominations, and the following gentlemen were duly elected: Messrs. Allen, Hall, Hughes, Gumbley, and Attwood. Nothing will be wanting to make the excursion and contest one of the best on record.

THE Birmingham Anglers' Benevolent Society is making great progress. At the last meeting of the society some very favourable reports were given in by the visiting committees. Four societies had been visited, and at three of them nearly the whole of the members had consented to join the society. The reports were received with great satisfaction, and a hearty vote of thanks were accorded to the divisional committees for their services. Messrs. White and Fitter were elected as auditors for the ensuing year, after which the business was directed to the forthcoming contest on behalf of the funds of the society. The question of who should act as referees was decided by Messrs. Coles and White, being elected from Birmingham, and the secretary was instructed to write to Mr. R. Wingfield, of Worcester, and Mr. T. Wright, of Kidderminster, asking them if they would kindly officiate. Nearly the whole of the committee promised to give a prize or a donation to the prize fund.

THE city society, held at the Shire Vaults, Worcester-street, Birmingham, held their first annual contest on the 9th inst. at Wyre Piddle, near Pershore. A more miserable day for a contest could scarcely be imagined. The river was very low owing to the water being drawn off for the purpose of repairing the locks in the higher reaches. The contest was fished on the off side of the river, under great disadvantage to some of the contestants, as the water in places was quite 7ft. below the bank, and it was impossible to use the landing-net in some places; but the members made the best of the circumstances, and the contest commenced in a steady downpour of rain at thirteen minutes past one o'clock. Twenty-six members took part in the contest, and manfully braved the storm till thirteen minutes past three, when the fish bags were collected by the umpire and referee. The competitors were conveyed across the river again by the punt to the Anchor Inn, where the weighing of the fish commenced, the result of which was that Mr. W. Bird, sen., obtained first honours, Mr. Matthouse, second, Mr. Markley, third, &c. After the weighing in had been completed, the members sat down to dinner. The remainder of the afternoon turned out fine, and some good sport was had with the perch.

ON the Avon the anglers have had very little to complain of, as the fish have been biting freely. The bait that has done the most execution has been stewed wheat. The malt has also been successful in the neighbourhood of Binton. With the latter bait some very good bream have been taken, the largest being close on 6lb. The perch have been biting freely at the worm and minnow, but the fish have run rather small.

THE Trent in the neighbourhood of Alrewas is reported to be in grand trim for all kinds of angling. The roach are not on the feed, and those that have been taken have been taken with the small red worm. In the Birmingham Piscatorial waters at Barton and Walton the members have been having some good sport amongst the chub and dace.

ON the Anker, the St. George's members have been very active, and some decent roach have been secured from up the river, near to Amington, the largest weighing, 1lb. 9½oz. This was taken by Mr. T. Bayliss, who took several more fish over a pound each. The bream in the river have not commenced to bite yet, but the members are on the look-out for them, and I hope to report some decent catches again this year from this noted bream river.

NOTES FROM LANCASHIRE.

NOW that we know more of the doings of those anglers who have been away during the past holidays, a far better opinion of the results of their expeditions can be formed. Lancashire anglers are very reticent of their movements, but if they could only be induced to emerge from their shell, a great amount of interesting items could be given.

MR. ELLERBY, Manchester, has been having tight lines during the past week in Lincolnshire, when it comes to returning ¼lb. fish to the water sport must have been very good. Mr. Thorpe, fishing in Cheshire, landed a pike nearly 4lb.; Mr. Longe, one close on 3lb.; and Mr. Matthews, a perch, 1lb.; these being the heaviest fish amongst many others. The public sweepstakes promoted by the Pendleton clubs, promises to be a most successful affair. Mr. Matthews is the chief organiser. One prominent Manchester angler, whose extreme modesty prevents the publication of his name, fishing in private waters on the 8th inst., secured six trout weighing 8½lb.

IN Lancashire we have been smitten with the championship epidemic, and it is a matter of extreme congratulation that the interested parties cannot agree, and the craze is likely to die a welcome death.

AT Northwich, a splendid trout weighing 3lb. 4oz., has been captured by a local rod. Why this district is not liberally supported by Lancashire, and the waters well stocked from year to year, is amazing, as there is fishing enough for thousands of rods, for in addition to the trout, which are plentiful, coarse fish are to be had at any time, as they exist in the different waters there in large quantities.

MR. SAM BROOKS, Ardwick, has had two good days' fishing in the Churnell. One day he took five and a-half brace of trout, weighing 8lb., the heaviest 1lb. 9oz., and the second day he took seven brace of trout, weighing 12lb. These returns do not include the numerous coarse fish taken at the same time.

NOTES FROM NOTTINGHAM.

OF late there has not been much angling news of which to write. Anglers themselves have been numerous enough, but barbel—our chief sporting fish—cannot be persuaded to feed with any sort of freedom. At Colwick Weir-head Mr. H. Green has been taking five or six most nights, and at Wilford a fine specimen of 6¼lb. has fallen to the rod of Mr. H. Morley, who, in addition, has bagged some remarkably fine dace, including one of 9½oz. At King's Mills, Mr. J. Greaves has scored heavily amongst the roach with creed wheat, and at Shardlow, Mr. S. Pogson, of the Bowling Green Angling Society, has been landing a large quantity of remarkably fine chub. Bank Holiday was, of course, a "great day," but a most boisterous wind prevailed, and this naturally upset calculations. Swims innumerable had been baited, with a view to get amongst the barbel, but most of those who were out returned with comparatively light baskets. In fly-fishing the best takes have been made by Mr. Anthony Eaton, of Nottingham, on the Wilford Shallows.

AT the close of Bank Holiday week heavy rain set in, and on Monday and Tuesday last the river rose above eighteen inches. The rise was heartily welcomed, although for a time the loose weed poured downwards in almost unknown quantities. But the change of water set all fish, excepting barbel, freely on the feed, and on Tuesday evening many splendid bags of bream, roach, dace and perch were shown at the various local clubs.

AN interesting correspondence has recently been published in the *F. G.*, bearing on the question of roach fishing, and who may be regarded as its most clever exponents. Matches are talked of, and for my part I should much like to see one arranged between the champions of South and North. Anglers on the Trent do not profess to be *roachests* in the strict sense of the word. As a rule they are all-round fishermen, using the best of fine lines and tackle, and the leading lights are well able to hold their own against their kindred of the Thames. To mention names would be invidious. A general excellence prevails not only amongst professionals, but amongst amateurs, and in the clubs no such thing is known as gross weight competitions. Specimen fish are alone recognised, and it is to capture these that much strong rivalry exists on the banks of the river. When the late Mr. Wm. Bailey tried conclusions with Mr. Woodard, of the Hoxton Brothers (London) society, he was very sanguine of lowering the colours of the leading roach angler of the Lea. At the same time it was a well-known fact here that Mr. Bailey held very peculiar notions as to the London style of angling. As an all-round weilder of the rod he stood in his day, unrivalled, and his extraordinary takes of barbel, dace, bream, and the like cannot readily be forgotten by those who saw his baskets on his return from a piscatorial excursion. His first heat with Mr. Woodard took place in the Lea at Ponder's End, and as an eye-witness of it I must confess that I was greatly impressed with the two styles of angling adopted. Mr. Bailey triumphed over his redoubtable opponent, and there is, I think, little doubt he would have beaten him a second time on the Trent had the water been in anything like fishable condition. The contest took place at Weston-on-Trent, a place which Mr. Bailey had frequented for years, and one, which it is fair to presume, he possessed considerably more knowledge of the water and its swims than the Londoner. On the morning of fishing the river presented the appearance of a clay-pit, and Mr. Woodard, winning the toss for choice of stations, selected the inside of the celebrated "sand hole" swim. This he never deserted, and finally, by marked perseverance, pulled his backers triumphantly out of the ordeal. The thickness of the water prevented Mr. Bailey from following his favourite method of swimming the worm or maggot, and knowing this he never really seemed to exert himself. Of course, his indifference was eagerly discussed in fishing circles at the time, and when the last heat came on the *tapis*, many of his friends averred that he would be defeated; and defeated he was, though if I mistake not, he killed a greater weight of fish than Mr. Woodard. Some few days succeeding the match Mr. Bailey confessed to me that the Lea style of roaching was most deadly, and that, in respect of the use of the "long pole," Trent anglers knew absolutely nothing.

THE recently formed society at the Shoulder of Mutton Inn, Smithy-row, Nottingham, continues to make steady progress. On Thursday evening, Aug. 6, a special meeting of the executive was held, when there were present: Messrs. G. Beals, J. Truman, E. Derrick, J. Derrick, R. Higginson (host), C. F. Walker, G. Clarke, C. Jackson, and Coteald (secretary). Business of importance was brought forward, and after discussion it unanimously resolved to hold a pegged-down competition in the Trent on the 8th of next month. No water was agreed upon, but I have good reasons for believing that the competition will take place, either in the Rolleston fishery, or at Farndon. The members are anxious to secure a piece of water on the river for their own use, and with this view the secretary was requested to communicate with the Hon. G. N. Curzon, M.P., who owns the fishery on the south side of the Trent above Trent Lock. At present a portion of the water is in the hands of Mr. Price, of the Navigation Inn, Trent Loch, who lets out tickets at the low figure of threepence per rod, per day. The field above the fence to which the tickets extend is connected with the farm of Mr. J. Potter, and it is really this field that the executive of the society would like to secure. The river here contains any quantity of heavy bream, roach, dace, and chub, with a few barbel, and is regarded as one of the best meadows for autumn and winter fishing in the district. I trust the negotiations with the hon. member may succeed, but I must say that I have grave doubts upon the subject.

THE society connected with the Nottingham Pleasant Sunday Afternoon Services have just held their annual fishing competition in the waters of Sir Henry Bromley at Stoke-by-Newark. The society numbers upwards of a hundred members, and there is no doubt that it is doing an immense deal of good sociably amongst the artizan fishermen of Nottingham and the district. Unfortunately for all concerned this year's outing was, in a great measure spoilt by rainy weather. As a consequence the takes were of a poor description, and do not call for special comment.

THE doings of the Nottingham Wellington Angling Society, which takes the lead in piscatorial matters in the town and district, have of late been of a quiet character. So far not many specimen fish appear to have been weighed in. The other day, however, one of the members had booked to his credit a really magnificent dace weighing 15oz. The fish, which was seen and examined by a number of gentlemen, members of the society, was killed, I understand, in a private lake in Lincolnshire. Dace of even 1lb. weight were caught some few years ago in Oxton dam, in Nottinghamshire. One that I saw weighed exactly 1lb., whilst a second was only ½oz. less. This dam, at the time referred to, teemed with perch, weighing on an average about 7oz. each, and it was on very rare occasions that the dace could be persuaded to feed. I believe that Mr. David Slater, the well-known fishing-tackle manufacturer of Newark, has occasionally taken some extraordinary specimens of the same fish from the same dam with the artificial fly.

NOTES FROM SHROPSHIRE.

THE soldiers in camp at Lythwood, near Shrewsbury, the seat of W. E. M. Hulton Harrop, had a very enjoyable day on Wednesday, the 5th inst., and chief among the sports which took place in the afternoon was a fishing contest. The scene of action was a large but somewhat weedy pool in front of the hall, a sheet of water which contains a large number of perch and a quantity of bream. Some hundred and fifty trout were about six years ago turned in, and nothing has been seen of them since, but the probability is that they are "born to blush unseen," for the pool is seldom disturbed. At the time that the trout were turned in a large number of heavy bream and carp were given notice to quit, some of these being as we were informed by the old keeper—"as large as a hand-saw—never saw such fish." The competitors on Wednesday numbered ten, all soldiers and armed with bran balls, formidable tackle and bottom rods, they waged war on the fish from a small island at the end of the pool, each being pegged down to a station determined by ballot. Bushes and trees around the stations and weeds in plenty made angling no easy task, and there was a good deal of entanglement of lines, and consequently loss of practice time and reputation among the piscators. Mr. J. Williams, the hon. secretary of the Shrewsbury Severn Angling Society, acted as judge, and started the soldiers on the war-path on their hours fishing. A prize was given for the greatest number of fish, and one for the heaviest. Ten competitors took part in the contest, which was witnessed by a large number of soldiers as well as visitors to the camp. Hardly had the word "Go" been given when Walferd, the camp cook, who ultimately proved the winner of the prize for the greatest number caught—well not exactly a fish but a very fine green bough at the water's edge, a mishap which caused him to use a good many cursory remarks appropriate to the occasion. Then Sergeant Young amid great excitement and encouragement from the spectators—who were very liberal in their advice to "drown him," "take time," "play him," and with other phrases well-known to the angler's vocabulary—drew first blood and opened the ball with a small perch—such a poor little victim. Then it seemed as though small perch made a simultaneous attack on the baits, for they were taken prisoners in all directions by the soldier anglers. Business became somewhat more slack at the end of about a quarter-of-an-hour, and then in order to keep up the interest and excitement, one of the competitors who had been less fortunate than his fellows, whilst reaching a likely spot of water, suddenly lost his balance and with a splash that must have startled all the fish in the vicinity out of a weeks growth, ascertained the depth to be about three feet, at the side, a knowledge that might have been useful to him in his piscatorial pursuits, had he gained it at the expense of disturbing the water and getting a wetting above the knees. At the end of the hour it was found that Walferd had taken the largest number of fish—all small perch. Private Tudor came next with seven; Private Andrew Davies having five; Corporal E. Jones, five; Lance-Corporal Phillips, three; Corporal Ives, two; Sergeant Hilliam, two; Sergeant Young, two; Quartermaster Piper, one bite; Sergeant Gotobed, nothing. The heaviest fish was taken by Corporal Jones, and Private Walferd came next.

ALTHOUGH coming somewhat late in the day, and perhaps at a rather inopportune time, the action taken by the County Council of Shropshire, consequent upon a resolution brought forward by Mr. Jeffrey Poole, in reference to the decrease of salmon in the upper waters of the Severn, will probably have some good effect, and will strengthen the cause of those who are now endeavouring to obtain a fair proportion of the fish. Many will doubtless consider, and perhaps rightly so, that in desiring to take such sudden and energetic action by calling the attention of the Board of Trade to the "disgraceful injustice" under which those interested in the fishing in the upper waters, the mover of the resolution was hardly justified, or, at any rate, if justified, the means he proposed to adopt to secure the end in view was hardly calculated to bring about the desired improvement, or to conduce to good feeling and amicable co-operation among the representatives of the upper and lower interests. This was undoubtedly the view of the Council, who were quite content, after the very temperate and practical speech of Sir Charles Rouse Boughton, to leave the matter in the hands of their Executive Committee for consideration. Now, the Board has been aroused to action by the growing dissatisfaction of those interested in the fishing and by the energy of their representatives, and has, or is now, dealing with weir-passes, pollution, close-time, and other questions which it is urged must be at once taken in hand to effect the desired object. Therefore, at the present time, any such strong action as that proposed is uncalled for, and is only likely to irritate and hamper the movements of the Board, who, as a body, is, we are convinced, only desirous of acting fairly between the conflicting interests that they have to study. The aim of the Shropshire and neighbouring County Councils should be not to add fuel to the flames of dissent which have sprung up between the upper and lower water fishermen, but, on the other hand, to assist in their councils, and to co-operate and take joint legal action to cleanse the river from pollution, which, whatever other causes may be at work decreasing the supply of salmon, must obviously have a good deal to do with the question. The Board has shown an anxiety to settle the matter in the common good by lengthening the close-time and tackling the questions of pollution and the weirs, so that all that now can be done by the upper water proprietors and representatives is to give every assistance, and await the results of their experiments.

NOTES FROM YORK AND DISTRICT.

FISHING in the York district during the past few days, and up to the despatch of my weekly notes, has not been particularly brisk at all. The state of the Ouse has not been favourable to good angling, insomuch as it has been swollen and discoloured the greater part of the week. Strong winds, too, have latterly prevailed. A few bottom fishermen, however, have been out trying their luck, with but unfortunately only moderate remuneration for their trouble. Better things are, however, forthcoming from the Derwent, which last week was in flood, but towards the beginning of this week the water was running down nicely, and both at Malton and Hackness, sport has been good. At the former place some good baskets have been made by several Leeds anglers. The Yore and the Wharfe have afforded nice sport, the Brown Owl being reported as the best killing fly on the former river. The Foss, at York, has been tried by a goodly number of bottomers, and has yielded fair returns.

THE members of the Fulford Friendly Angling Society have arranged to hold their third angling contest of the present season in the river Derwent at Catton, on Wednesday next. With the water favourable and the elements friendly, the match should be both successful and enjoyable.

WHILE alluding to the subject of the Derwent, I may mention that it is at present the quarter from which rather unpleasant news has emanated. It appears that a new tenant has come into possession of the land through which the water flows, between Buttercrambe and Stamford Bridge, and, according to report, has determined to put a stop to angling. Every angler seen on the land, which by-the-by a towing-path runs through, is to be informed that fishing has been suspended, and, should he again persist in following his avocation on the same ground, proceedings will be instituted. This is anything but pleasing, and, considering that one or two others have previously withdrawn their permission to fish in the river, it is about high time that some remedying steps should be taken in the matter. Perhaps the York branch of the Northern Anglers' Association will take it in hand.

AT a meeting of the Tees Salmon Fishery Board, held at Darlington Police-court, on Monday, attention was called to the pollution of the river Skerne, and it was recommended to draw the attention of the County Council to the matter. The chairman, dealing with the expenditure of the board, said as there did not appear to be much chance of increasing the revenue, the committee had under consideration the reducing of the watching expenses, by doing away with some of the water bailiffs, if the riparian owners would help the board in guarding the interests of fishing. The committee thereby hoped to diminish the costs. Both the recommendations were adopted.

WITH the disposal of Inspector Mabon and his assistants, and in their places to appoint gamekeepers and servants of riparian owners, local anglers are naturally very much opposed. Just as they were about to congratulate themselves upon the slight improvement of the fishing, their hopes are on the verge of being wrecked. One correspondent goes so far as to darkly hint that in out-of-the-way places the gamekeepers fully licensed by the Board would "take any kind of fish they choose," and, further says the gentleman, "these poachers have a wholesale fear of Inspector Mabon; but when Monday's recommendation becomes law, who or what will restrain them from clearing the river?" Another important question also presents itself as to what will become of the hatcheries attended to by the inspector, which contributed not a little to keep up the supply of fish in the river. The proposition of the Board is certainly not in the best interests of the angler, and perhaps, after further consideration, the expenses might be more beneficially reduced, especially when it is taken into account that one thousand and eighty-five trout licences at one shilling each have been issued this year by the Board.

RICHMOND PISCATORIAL SOCIETY.

THE members of this society have been occupied during the last few meetings in revising the rules relating to prizes, and on Friday last the business was brought to a close.

In the regretted absence through illness of Mr. Montagu Davenport, Mr. E. V. Powell occupied the chair.

For some few years the society has offered no prizes for fishing except occasionally when a day competition was arranged; consequently, at the ordinary weekly meetings there were seldom any fish to be seen upon the table, and it was to induce the members to bring their sport into the room that Mr. Emery proposed, and, after discussion and amendment, the society approved, a series of resolutions, whereby gold and silver medals can be won by those members who take the largest number of specimens during the season.

In accordance with the best traditions of the society, the sizes of such specimens has been fixed very high, so that no fish smaller than named in the following standard will be eligible for these prizes: Pike, 6lb.; barbel, 4lb.; bream, 3lb.; chub, 3lb.; carp, 4lb.; perch, 1lb.; roach, 1lb.; dace, 6oz. For trout there is a handsome silver challenge cup.

At the conclusion of the business the members congratulated and wished good luck to Mr. Philip Geen and Mr. Emery, who leave next week for a spell of fishing in Ireland; also to Mr. Jeffery, just off to the Broads. The hon. sec., in looking through the old minutes of the society, came upon the following, which is worthy of being framed and hung up in every club-room in London and in every hotel on the river: "Resolved—That trailing a spinning-bait behind a boat or punt is not recognised by this society as fair fishing on the Thames."

James Ogden,
28, Winchcomb Street, Cheltenham,
Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.
Maker of High-class Salmon, Grilse, and Trout Rods.

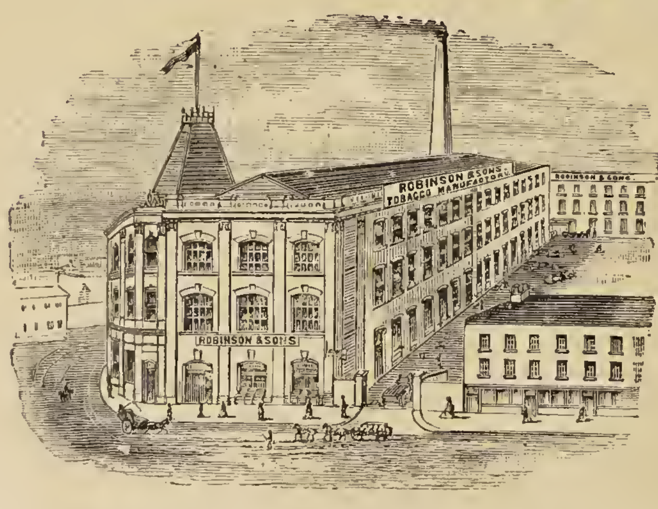
SMOKE **"ORIEL"** NAVY CUT.
THE HIGH CLASS TOBACCO,
MADE FROM PICKED LEAVES OF THE FINEST QUALITY.



Extract from the "FISHING GAZETTE" of February 21st, 1891:—

A GOOD SMOKE.

DEAR SIR,—Knowing how much you enjoy your pipe when out a-fishing, may I ask if you, or any of your friends, have ever tried "The Oriel" navy cut, manufactured by Robinson's, of Stockport? If you have not, do so at once, and I venture to say that you will be well pleased with it, being very cool and lasting, with an exquisite flavour. I have no interest in the matter whatever, but simply recommend it as my *beau ideal* of what a fisherman's tobacco should be.—Yours truly, SMOKER.

Sold at 5d. per ounce, in 1 and 2 oz. Packets, and 4oz. Tins. Any Smoker having difficulty in obtaining it from his usual Tobacconist can obtain it direct from the Manufactory
POST FREE. 2oz., 10d.; ¼lb., 1s. 8d.; ½lb, 3s. 4d.; 1lb., 6s. 8d. POST FREE.
Sole MANUFACTURERS: **ROBINSON & SONS,** TOBACCO & SNUFF MILLS, **STOCKPORT**

PARKER'S SELF-STRIKING FLOAT.
By Her Majesty's Royal Letters Patent.
A BOON TO ANGLERS.
Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.
Price 2/6 Post Free.
A. PARKER, 20, WALPOLE STREET, NEW CROSS, S.E.

Fourth Edition, 357 pages, crown 8vo., cloth. NOW READY, price post free. 12/6

THE SUMMER FISHING IN SCOTLAND.

By MAC.

WITH the heather in its purple glow, the mass well-to-do sportsmen on moor and mountain, d August far advanced, the time has arrived hich tells us, in the ever shortening day, that e glory of summer is past, and the summer gling season proper in Scotland once again has me to an end. But while this is so, hosts of llowers of the gentle art still continue to pour rthward to ply with zest the rod on river, loch, d tarn; and though doubtless many find that ort proves less good than they could wish, still eir favourite pastime with all its charms and ductive influences is none the less delightful at for a time it is overshadowed as a fashionable ort by that of the followers of Nimrod which companies the crack of the gun on the moors d of the rifle in the forest. Yes, even so. The e class of sportsmen do not grudge the other eir sport—their days of feats and of triumph. hey envy not, for their own recreation is satis- ing. Nay, if true sportsmen, they delight to ear the one of the other's success. "Every dog s his day," a trite and a true saying, and so has ery sportsman who inclines and can afford it. he present is the great season for the fashion- le "shootist," just as spring, summer, and later tumn are the primo seasons, in the districts hich suit, for a battle royal with the king o esh water fishes.

The "dead season"—that season of really little good salmon and grilse angling—in most districts being now upon us, and many almost constant wielders of the rod, having for a while forsaken fish for fur and feather, this we think is a most fitting time to take the opportunity of giving our seasonal review of the fishing. Well-nigh three months ago, when ended the spring angling season proper, than which, nearly everywhere, not a better we can safely say has been experienced for many a year, neither grilse nor sea trout (the former though seemingly very forward for the time of the year) had commenced to run in any number. Accordingly for a considerable time afterwards nearly all the sport that was had was with salmon which, in some of the long-run and later spring rivers, kept fairly well on the take until the second or beginning of the third week in June. But these being all spring fish the sport with them although obtained in the early summer would be mis-named if called real summer angling.

In consequence of the fishing during the spring proving so remarkably good on most early rivers many anglers were strongly of the belief, indeed pretty cock-sure that with water in abundance the summer season would follow on with fish in galore and results to the rod especially gratifying. Netsmen also owing to the notably early appearance of grilse (two or three of these fish well grown having even got at sea about the end of March), which by them is held to be an augury of an early if not a splendid crop were sanguine of a grand paying season, for early fish fetch good profits to the seller consequent on prices running much higher in proportion to the supply than later on. Now, however, when all is known, when results place matters wholly beyond a doubt, it is seen that nothing very special either in the way of angling or netting has been experienced for the summer season *as a whole*, although latterly immensely heavy hauls of fish, both salmon and grilse, have been obtained in many districts at sea. Generally—by which we mean pretty much all-round—salmon have been somewhat more plentiful than usual; grilse scarcer until very recently when they became more abundant than is usual for August; and sea trout all along, and even yet, so scarce comparatively as to be reckoned little better than a perfect failure. Those, whether anglers or netsmen, who can satisfactorily account either for this prevailing scarcity during the height of summer of the true summer season fish—grilse and adult sea trout; or for the sea trout crop (itself alone) being such a failure; or the run of grilse (since the first of the year's grilse appeared on the coast so remarkably early) not reaching its flush or greatest strength until a fortnight to three weeks after the usual time (in most waters) know, we frankly admit, much more about the *Salmonidæ*—their nature and habits, the influences operating upon them and the effects—than we do. Heat, aver the netsmen, quickly develops and matures the fish and when matured (for the season) they come to the coast desiring to ascend the rivers; but can this "notion" be proved in its entirety? The latter portion is admitted since constantly evident, but what proof, certain indisputable, can be given of the former?

Many rivers having a natural and pronounced run of salmon in spring have no such run in autumn, and *vice versa;* but all salmon rivers, whether "early" or "late," long or short-seasoned, have coming to their mouths, and ascending when practicable, a run of grilse in summer. This is the great run of the year (because everywhere, and including sea trout and *summer* salmon), and what brings down the prices for a supply of salmon keeps pouring into the market from all quarters. The greater bulk of the north-west coast, west coast, and western isles' rivers are particularly short-seasoned—summer rivers pure and simple, without in almost a single case any approach to a natural migration of salmon, either in spring or autumn. Accordingly the summer is their proper angling season—really the only season they are much worth "looking at"—and so it is that those intimately acquainted with them know perfectly well, to *then* resort to them for the cream of the year's angling, which, with weather and water both right, is undoubtedly obtained. Regarding such rivers, however, apart from the conditions indicated, there is a variability and difference in the best time or flush of the season; but this comes about in the case of each and everyone of them some time or other during the six weeks between the 20th of June and the early days of August. On the bulk of them, July is the prime angling month, as then the first really great "shows" of grilse, adult sea trout, and (probably) small salmon, fresh from the feeding grounds, reach the coast, and straightway, when they can, push on inland. No one needs to be told that the quality of the sport is to a very great extent regulated by the weather, the water and the quantity of fish. Still, a fact which ought by this time of day to be well known to salmon anglers, seems either to be not known, or but little regarded by many. This fact is the effect which, it is obvious, delayed ascent has upon the angling results. When fish come to the coast and at once head for the rivers, it is proof that they desire to ascend—that the natural time for their inland journey commencing has arrived. Should they succeed, they prove at once—be weather and water alike suitable—the freest of free takers. The proportion of them that falls to the rod is far greater than is the case when they have to hang in the bays and estuaries, coast about, or keep moving out to sea and back again, until the natural angling season for their rivers is past before their ascent is effected. Let them be thus delayed through want of sufficient water, and no matter how great a strength of them ascend afterwards, the sport obtained in proportion to the number fished over is at the best but very poor, comparatively, even with weather and water both as right apparently as could be. This fact has been only too apparent in the case of east-coast rivers, such as Spey, Dee, and Deveron, this summer. The very few fish that ascended early—in the natural angling season—took well, even though the water was low and the channel all algæ-coated; the great many that have ascended since have not taken well, proportionate to their number, even though the water has been ample and the channel thoroughly *scoured*.

(To be continued.)

KEEPERS AND MANNERS.

By COTSWOLD ISYS.

OUR art is very significantly styled "the gentle art," and it is but congruous that all those who are connected with it should be gentlemen. If this be not possible in the conventional sense—and in this sense it were a pity that it should be—there is no reason whatever why it should not be so as regards those good manners which usually distinguish the gentleman.

There is, however, one class intimately connected with the "gentle art," whose manners seem to be characterised too often by a roughness and a coarseness that is as inharmonious with it as anything can possibly be. I allude to those of the keepers employed by our fishing clubs. I should be very sorry to lay a general charge of this kind against a very useful and generally very respectable class of men, without admitting that there are among its members many exceptions. We found amongst them many very civil and obliging men, and whose manners, even in the discharge of their sterner duties, were respectful and even polite. But we must say, especially in regard to such duties, that such cases *are* the exception, and not, as they ought to be, the rule.

As respects their manners to the gentlemen who employ them and their friends, they are generally polite and respectful enough; and we must say, too, that they generally keep their place, and do not presume upon that democracy of fellowship, if I may so term it, to which they are naturally tempted by the confidential freedom with which gentlemen regard them by the river side. Yet, after all, there is no great virtue in this, since it is obviously directly to their interest to be civil and polite to such.

But I have now especially in view the character of their manners towards gentlemen who are not their employers, and who sometimes unwittingly play the *rôle* of trespassers on the rivers that the keepers watch. I have often most innocently performed in this character myself, and have suffered a rudeness at their hands—or to speak more correctly, their mouths—that has proved most trying to a gentleman to suffer, and that the members of their clubs would not only not sanction, but be extremely annoyed at, were they aware of it. I will cite in illustration a case which came under my cognizance during this May-fly season.

I know a clergyman who was recently called suddenly on a Saturday to go from London to assist a clerical brother in a distant county, who through sudden illness, was in a great emergency. Being a lover of angling, and knowing that a good trout stream or two were in the neighbourhood, he took his rod with him in the hope of being able to get permission for a day or two's fishing. He, immediately on his arrival, wrote to a lady who belonged to the congregation to which he ministered to ask her kindly to give him permission to fish the stream on her property. She politely replied saying that she had no power over the fishing, but she had obtained from a friend the card of permit she enclosed. It was, "Permit the Rev. —— to fish the Thrushwood water. J. Johnson." Now it so happened that, some two or three years before, this clergyman had had, one September, a transferable ticket from a member of the club to fish that very water for six days, so that he knew the length of the Thrushwood water well; and accordingly on the Monday evening betook himself to it, having previously called at the shop of the best tacklemaker, and obtained the necessary "Licence." He had not, however, made many casts when he beheld Master Keeper circumventing him; and he very soon came to his point.

"Has anyone given you permission to fish here, sir?"

"Yes; here is the card."

"Oh, this won't do! You've got no right here. This says 'Johnson's water.'"

"It says no such thing; it is signed Johnson, but it says 'Thrushwood water.'"

"Yes, but Johnson's got nothin' to do with this water; his water is a mile or two down, and you ought to know that."

"How could I, a stranger, possibly know that? I only came here Saturday evening. It says 'the Thrushwood water,' and I know *this* is the Thrushwood water, for I fished it two or three years ago by invitation of one of the club."

"Well, if y' did, y' ought to have knowed that this ain't Johnson's water, and y' have got no right here. No, this won't do at all. We shall have to summons yer."

"Summons me, then; here's my card—name and address. You have no right to be insolent! Do you think I should attempt to fish if I knew I was trespassing? Now, you tell me I am mistaken, although it is perfectly plain how easily anyone could be mistaken with a card giving me such directions. Of course I will put up my rod directly and go away."

I need not occupy space in giving all the dialogue, but this was the gist of it. But he kept on rudely clamouring, "Y' ought to have known; y' ought to have asked somebody as knowed." It was in vain that the angler reasoned with the man that he supposed Mr. Johnson ought to have known the proper description of his own water, and any stranger would naturally have fallen into such an error. The man went on blustering in the rudest manner, "Y' ought to have known, and you've got no right here," making the clergyman feel something like a detected poacher.

Now, this is really unbearable, for a gentleman to be so spoken to and treated by a man in that position, and I do think that members of clubs ought to give their keepers some little coaching in regard to manners in such cases. They might teach them to make their inquiries in a polite instead of a suspicious manner. They might teach them to use a little discrimination between a gentleman under a probable mistake, and one whom there was reason to suspect was a wilful trespasser; and in all cases, they might teach them, at least, not to be rude and offensive.

But it is very strange that such men do not see how greatly it is against their own interest to be so rude. Had this man only been civil, I have little doubt that this clergyman would have given him a little tip, and said, "Well, I like a man to do his duty. Yours has been an unpleasant one, but you, at least, have been civil and respectful."

But, foolish man, he lost by it in another way, for it so happened that when some of the gentlemen of the club heard his report, they next day expressed (as was to be expected of gentlemen) their regret at what had occurred; took the clergyman into their club room at the inn; explained rules and regulations thoroughly, and kindly offered, if he could stay, to have a special meeting of their club to rescind, in *his* case, one of their rules to the effect that in the May-fly season the tickets of the club were "not transferable."

It was very polite—just what might be expected of gentlemen anglers. However, though the clergyman could not stay to avail himself of such kindness, he appreciated it very highly.

Master Keeper got to hear of this somehow, and next morning, when the clergyman went to have a few hours on "Johnson's water with Limited Liability," he followed him, evidently desiring to be more civil, and said "Good morning, sir." The clergyman, however, thought he would teach him a lesson, and he said quietly, "Good morning," and passed on quickly, to show him that he had rather be without his company. Had he been civil he certainly would have had a tip; as it was, he did not get a sou.

Let any keeper that may read this be sure that it always *pays* best to be civil and polite to gentlemen. Let him be sure, too, that there is not the slightest necessity to be rude even when dealing with those who are found trespassing. Let him especially exercise common sense, and be sure that no gentleman would *willingly* trespass on any preserve, and that he would immediately desist from his angling upon his mistake being civilly pointed out. A rude keeper may greatly hurt the feelings of a gentleman, but he may be very sure that he inflicts a much more real injury upon himself.

ANGLING FOR ROACH WITH AND WITHOUT A CHAIN OF SHOTS, &c.*

BY THE O. O. D.

(Continued from page 101.)

A FAVOURITE style of angling for roach with the bait one or two inches off the bottom, is with a small piece of white paste on the hook, and a pellet of bread and bran on the lowest shot, which is usually attached to the gut 3in. or 3½in. from the hook. Supposing a crafty, careful experienced roacher was adopting this method and missed several fish, I have no doubt that he would know the reason and very quickly put the white paste upon the *shot*, and a pellet of bread and bran upon the hook. Whether he knew the cause or not, three times out of four when this occurs the roach are feeding upon the bread and bran, and not upon the hook bait. This fancy for appropriating the ground-bait may only last for a short time, and mainly during the hot summer months; but when it takes complete possession of aldermanic roach they prefer it to any other bait, and on no account should such golden opportunities be lost. Very early and very late are the best periods for this lure. On warm evenings, just as most other anglers are "lapping" up, is the time to begin. As darkness approaches, then one may dispense with a float and strike from the feel, using a light leger. Roach, bream, chub, &c., will feed much nearer the bank at this time than in broad daylight. Choose a swim that has been disturbed as little as possible. If a few fish are taken in the first hour or two, and they refuse to take the bread and bran, try paste and other baits. I cannot help thinking roach "egg" on one another to eat the stuff. If this is not the case, how is it that such capital takes are sometimes had in a comparatively short space of time? It is just possible that the fish may think that the supply is limited, and so go for it. On the other hand, these bran and bread eating roach may be heartily sick of the everlasting paste bait (I think it is quite possible) and prefer a nice clean sweet pellet of bread and bran. The aroma that pervades an old flour mill pervades the bait, and no doubt attracts the fish. What a contrast to fusty, musty and sour ground-bait. For this reason it should be made fresh every day, because if a roach has not the sense of taste, as some anglers assert, how comes it that they eject or blow so many things out after retaining them in their mouths for a short time? Simply because they dislike them, or if they do not dislike some of them, instinct teaches them that they are not good for *food*, and must be got rid of, and they are got rid of accordingly; and I think this habit of constantly ejecting so many things is a strong proof that their sense of taste is not only highly developed, but singularly FASTIDIOUS. "Your barbel," says dear old Izaak, "is also curious for his baits; that is to say, that they be clean and sweet, and not kept in sour and musty moss." What is more abominable than *sour* and musty moss? But the odour when sweet and clean is very pleasant—at least, so I think. Your roach is quite as *curious*, and when they are taking bread and bran, or in other words the *ground-bait*, it is quite possible for a novice or even an old hand not in the know to fish repeatedly without having the remotest idea of his non-success; for although I have actually seen anglers pull up after striking, with small portions of slime (tiny dabs) clinging to their gut, or scales on the points of their hooks, yet they never dreamt of the why or wherefore on these occasions. I say on these occasions in particular, because it is possible for a similar occurrence to take place from quite a different cause, and no doubt often does.

To resume. As a rule, most Lea men fish close upon the bottom, but if the swim is in the least foul then the float is allowed to travel down with the bait a little distance off and is not allowed to drag, in order to steer clear of any light obstruction on its downward course. This is one reason why you will often see a careful angler about to operate on a strange swim take such pains to test it, more especially in that portion where he intends his float to travel down.

In July, August, and the first part of September (especially in very warm weather) good roach may be taken in a clear water with bread and bran, with very light and fine tackle from 3in. to 12in. off the ground, and even in mid-water in *lively* swims (livelier than usual). But after the hot weather has passed, nights become chilly, and deeper swims are frequented, by far the better plan is to fish as close to the bottom as possible—in short, dead on—discarding the bread and bran bait for gentles, or paste, or worms, as the case may be. I do not mean to say that roach will not take bread and bran in the winter, but I do not recommend it. If one is using a float carrying four or five medium-sized shots, it must be a very small light pellet of bread and bran for the *hook* bait. For ground-bait some anglers use a piece of stuff lightly made, with plenty of bran or pollard, and shake it off by giving the rod a sharp tap, and this is often an admirable plan when fishing with a 20ft. or 22ft. rod, tight line and float in a dead still water; but if the pellet of bread and bran, or bread and pollard, is made up slightly squashy, and the angler lowers his line carefully, it should gradually break up and drop off by the time it reaches the bottom, or very shortly afterwards.

There is no occasion to make it so stiff that it must be jerked off, as insisted upon by some anglers, because the bran gradually flaking off, I fancy has more power to attract the fish; but after this operation should the float still keep under, then quietly raise the rod top once or twice, and this action should be sufficient to disperse the pellet and allow the float to rise, but the novice should not forget that ground-bait of this description is only intended for rivers such as the Lea, Cam, and Ouse, for the most part with very gentle lazy streams. In a river with a rather rapid, sharp, strong current, where one is compelled to make the pellet very stiff and adhesive, such a proceeding would only defeat the object the angler has in view—viz., to keep the fish together as much as possible.

I have repeatedly seen this occur, and in all such cases the more bread and bran, either thrown in or used on the shot to attract the fish, the less likely is the *paste* on the *hook* to be taken; for on certain occasions the fish eagerly gorge themselves on the ground-bait, and so either way the angler spoils his own game. The pellet of bread and bran, when about to be used on the hook, should be much smaller than when used on the shot as ground-bait. For instance, with a piece the size of a walnut on the shot, the float generally in use is bound to go under when first sneaked in; but if the pellet is made properly—

---

* NOTE.—In the illustration last week the bait is supposed to be in the position of being lifted off the bottom by a fish; this is made clear by the context.

.e., lightly, and not in the least stiff and adhesive t should easily break up and drop off as stated, ınd prove a most attractive ground-bait.

Striking.—When floating in the Lea style, the stroke should be instantaneous; but when using a single hair, it should be a delicate, light, yet quick stroke, or one risks a smash up; in short, it is an art that can only be acquired by constant prac- ice, and the angler should strike at the least hing, even a stoppage of the float, not waiting for t to go under generally the same as in legering, or loss of fish is almost certain to be the result. Very clever anglers will strike a fish at an almost mperceptible bob, or rather dip, of the float, at a lepression that anglers unaccustomed to this style f fishing would probably never notice, more specially in a slight ripple.

General.—Sometimes these dips are so subtle hey do not exceed the twelfth of an inch. This s caused by the singularly cautious manner in which good roach take the bait, being quite ifferent from dace, trout, gudgeon, &c. One great dvantage in using a pellet of lightly-made bread nd bran: the angler not only insures the ground-ait being in close proximity to his hook (and hat on occasions when throwing in the ground-ait often reaches the bottom two or three feet o much above, below, or out of the "wad" of is float), but he also keeps the fish well in the eart of his swim. If bites are few, and only odd sh are taken occasionally, ground-bait should be sed most judiciously, as it is a strong proof that e fish are not numerous. It is a great mistake, many anglers seem to imagine, that one has ly to throw enough ground-bait in to get all (or early all) the fish within a certain sphere into s swim, because it is as plain as daylight that, the ground-bait light or heavy, it does not llect large numbers of fish into one spot when ver fishing, unless the baiting is continued for ur or five days in succession; but, as previously ated, when using a small pellet of white paste the hook, and the fish for the time being are rging themselves on the ground-bait, as little of should be thrown in as possible; in short, oner none than too much.

[CONCLUDED.]

PROLIFIC SALMON FISHING.—The salmon fishing the Foyle this season is the most prolific expe- nced for a number of years. The lough and er are literally swarming with salmon, and ormous catches are being made by the employés the Foyle and Bann Fishery Company. The mon are in fine condition and of large size. A narkable feature of the presence of an usually large number of salmon has been the raordinary leaping of the fish in the river. ey are constantly seen rising over the surface l leaping to a considerable height. Evidently salmon do not observe the precept to look ore they leap, as numbers have fallen into ts and been captured. One of 7lbs. landed in of the steam ferry-boats on Saturday, much to astonishment of a passenger whom the fish on the head. Six salmon also landed in four Mr. M'Keever's pleasure-boats which were ed by parties for the regatta.

N connection with the recent decision of the preme Council of Hygiene in Austria, respect- the advantages of erect as compared with iting writing, it is interesting to note that ny of our leading educationists have long been ing the desirability of teaching the vertical e of writing—in fact, a system invented by a tleman, named Johnson, has long been adopted the London and other School Boards through- this kingdom.

PAWKY ABERDEEN TACKLE-MAKER.—One day dy entered the shop of Brown, the inventor of Phantom Minnow, in Aberdeen, and said, "I t a pair of waterproof leggings for wading." wn looked over his spectacles at her, rose from tackle-making seat, and produced several pairs inspection. "But," said the lady, "I don't w if any of these will fit me." "Weel, mem," Brown, "I have nae convenience for leddies ng on sic things here, so ye mon just tak' them e and try them on there!"—"*Sixty-Three s' Angling*," *by John MacVine.*

R. GODFREY CHARLES COOPER.—We regret to that Mr. Cooper's wife has died after a long painful illness.

Notes and Queries

MR. FRANK HEARNS, the well-known professional fisherman of Ballina, informs us that he is going to devote some time this autumn to the big pike of Loughs Conn and Cullen, and will be glad to have the address of any who would like to have a pike over 20lb. to set up.

WE regret much to hear that our correspondent, Mr. James Wilkie, of Dunedin, Otago, New Zealand, died after a short illness. Mr. Wilkie was a keen angler, and took the greatest interest in the Otago Acclimatisation Society, and its members keenly feel the loss of such a friend.

VISITORS to the Horse Show, Dublin, will have an opportunity of seeing a good collection of fishing tackle at Stand 5, where Messrs. John Enright and Son, of Castleconnell, intend to exhibit some of their far-famed Castleconnell rods, together with flies, lines, &c. Some of the rods to be exhibited are made from wood at least twenty years old.

THE first autumn salmon of the season was landed to the rod on the Park water on the Dee, on Friday last, by Mr. Hugh McDonald, and scaled 17lb. This speaks well for the coming back-end.

THE trouting season in the north of Scotland is now over. It has been a very poor one on such rivers as the Don and Deveron, where fish come early into condition, but an excellent one on the Dee and its numerous tributaries, which fish best during June and July. There was an almost total absence of fly on the water during April and May.

THE JOLLY MILLER.—The jolly miller is one of the happiest figures in country life; but what is this change which has come over him? Here is an enthusiastic angler laying down the maxim —"All millers should be drowned in their own dams." The fault laid against them is that they do not always regulate the river just to suit the flyfishers who may be whipping it, that sometimes they stir up the water and spoil all prospect of fishing, and that they are not always civil and obliging. On this last count the indictment might perhaps be preferred by the miller himself. Thus the *Fishing Gazette* speaks up for the class: "We should be as sorry to see the last of our jolly millers as we should be to hear the teetotallers had succeeded in shutting up all the country inns, and anglers had to lodge at their temperance hotels." —*Liverpool Mercury.*

UPPER THAMES FISHERY PRESERVATION.—Considerable changes are taking place in the constitution of the Henley-on-Thames and District Fishery Preservation Association. Mr. J. W. Knight, J.P., has been forced to resign the secretaryship by ill-health, and his place will probably be taken by Mr. C. H. Cook, who founded the society, and was its first honorary secretary. Dr. Jeston, of Henley, has also kindly promised to assist with the secretarial work, and with an energetic committee there is every probability of the society continuing its career of usefulness for many years to come. A meeting of the members will shortly be called to confirm these arrangements, and we are asked to say that in the meantime it would lessen the work of the officers of the association if subscriptions were sent as usual to the honorary secretary, Mr. A. Breakspear, Honley-on-Thames. The Henley Association, in conjunction with the Reading Angling Association, preserves several miles of the Loddon and St. Patrick's stream, and this excellent water, which it is believed will in time become well stocked with grayling, is open to the members of either association on payment of a small additional subscription to cover the rent and other expenses. —*Field.*

THE announcement in last week's issue that Donald Gunn had passed over to the great majority will have been read with unfeigned regret by all who have perused the amusing epistles which occasionally proceeded from his pen. I have one letter in front of me now, written about Christmas time, I think, as he wishes the Editor and readers of the *Fishing Gazette* "A Merry Christmas an' a Happy New Year." It is a perfect masterpiece. The old man winds up by saying "If Mr. Murdoch or anybody else thinks o' sendin' him a keg o' whuskey to hold the New Year wi', he'll hae nae scruple aboot takin' it if only tae show there's nae bad feelin'." Speaking, too, of the inn at Forsinard, he says: "The inn was perfectly crammed, and though it waz moderation in trinkin' at aw times the number o' barrells o' whuskey consumed waz quite astonishin'. There waz a tarrible lot o' thirsty throats, an' among the rest Donald Gunn's." His claim, too, to the chieftainship o' the clan Gunn is a bright thought, and how the martial spirit of his forefathers used to strike terror to the hearts o' the Dooks o' Sutherland, the Rosses an' the men o' Strathnaver! How red night-caps would like to weave ye a flashy checket tweet suit to gang throu Sutherland wi'. How he was offended that nane o' the shentlemans had ever asked him to don the Gunn tartan, an' in that picturesque garb accompany them to the lochs! How old Joe's swallow-tail wi' the brass buttons still hung on old Joe's back! These and other pleasantries of a similar kind are almost inimitable. Whether he was the undivided author of his own epistles matters not, his familiar and welcome auld fist will be missed in the pages of the *Fishing Gazette.* I did not know the old man personally, but, while I feel assured that Mr. Murdoch will do full justice to his many striking characteristics, I yet could not refrain from adding this poor mite of a stone to the cairn which is sure to be raised to the memory of Donald Gunn.—GILNOCKIE.

THE SPOILS OF POACHERS.—You cannot very well make a law—you cannot even bring about a sense of moral wrong in the minds of some fish dealers giving less than the wholesale market price for poached salmon or trout, or even coarse fish, because the most powerful of human motives—self-interest—bars the way. A fellow wires a hare, or nets a few rabbits. He goes to the back door of a probable purchaser who is no sportsman, and he buys poor puss for a couple of shillings and "a pot of ale," and the rabbits at a cheap rate of sixpence or eightpence each. It is not your practised fish-netters, or your sly wirers of hares who permit themselves to be met by the County Peeler, and be searched. Oh! no. It is your occasional offender—the jack wirer in spring, the trout "groper"—and some clodhopping sapient who goes to a rabbit "bury" with a ferret and net, and is collared by the keeper. Of course, old poachers sometimes get nabbed. In Hampshire one fellow openly boasted that he would very soon make up the money and costs he had paid, by "nailing" more hares. In one portion of that game-preserving county there was a poachers' club, out of the funds of which fines were paid. Another thing encourages trout netting and game poaching. Many people think it is really no offence—no crime. The Americans thought little, years ago, of their splendid "fur" and "feathers," wealth in the woods and on the prairies. Deer got shot for the mere pelt; the buffalo was almost exterminated. But now, the game laws of the States are stricter than our own! Besides, fish poachers especially are wholly animated by the coin the salmon or trout or other fish will bring them. They are utterly destitute of that love of sport which sometimes induces countrymen to cast a line in prohibited waters, or a young fellow having "marked" a covey of birds drop on common ground, fetches his gun, and bags a bird. Cannot however, some more effectual foils be placed in the salmon and trout rivers in Scotland which would render netting almost impossible? Big stones, with tenter-hooks cemented in them; old field-gates; an old punt well peppered with wire and nails, to hurdles sunk with weights—these foils coupled with thoroughly *honest* watchers, would save a portion of a river from being depleted of its fish. After harvest, the fields are "bushed," or "stubbed," to foil the trammellers from catching whole coveys of partridges. Taffy will, however, still spear the gravid salmon by torch or lantern-light. And self-interest renders some dealers oblivious to the fact that fish and game offered for sale by certain persons must have been poached, otherwise *stolen.*—RUSTICUS.

A BAD START, BUT A GOOD FINISH.

By Duine Môr.

A more hopelessly bad angling day could hardly be conceived. Grey, cold, cheerless skies, coupled with a rude and blustering south-east wind, that seemed in its cold indifference to delight in the disappointment it was inflicting, were hardly climatic conditions calculated to make one yearn for the storm-tossed waters of the loch, or the unyielding brackish tidal pools below it, which were far too full of salt-water for good sport. After hesitating for some time, I finally made up my mind to endure the long cold drive over the wind-swept moors, for it was my last day on this excellent little loch and river, and I have killed so many good fish in both that I could well afford to forgive them for one thoroughly bad day. As a matter of fact, on the twenty-four occasions on which I have fished this water—some *very bad* days included—I have killed (entirely with trout flies) four hundred and fifty-eight sea trout, weighing 573¾lb., and three hundred and sixty-nine brown trout (mere "chance-comers"), weighing 116lb.: or, in all, eight hundred and twenty-seven trout, 689¾lb.—an average of thirty-four fish, 28¾lb., speaking roughly. What twenty-four good days would have yielded to a *patient* angler like myself may be left to the imagination, for I am quite convinced that in fishing for sea trout in lochs the untiring angler who keeps always casting will invariably beat the more skilful angler if his efforts be merely spasmodic.

To resume, however, my tale.

Reaching our destination, I at once abandoned all idea of the river, and determined to risk the stormy loch. My single-handed rod being already up (I had left it in a house by the loch side), I put on a cast of flies one size larger than those I generally use under ordinary conditions for sea trout (a size larger than Loch Leven flies), and prepared to brave the yeasty waves. We had some difficulty in getting the little cockle-shell of a boat afloat (this was about half-past eleven o'clock), but at last we got clear from the shore and fairly out in the loch. It was all my gillie could do to keep her head to the waves, and fishing, therefore, was by no means an easy task; but luckily the loch is fishable all over, and there was more or less of a chance anywhere if favourite places could not be thoroughly searched. Not a rise or sign of a rise, however, rewarded my efforts; and after two hours of vain casting, I took pity on my gillie and on myself, and went ashore. It was now past half-past one o'clock, and, as we were nearly frozen with the cold, lunch and a little something to warm us were very welcome.

About twenty minutes past two, the wind having somewhat abated in its violence, one of those peculiar and inexplicable weather changes occurred, and all over (to use a colloquialism) "it felt more like fishing." Rowing as fast as the wind permitted to a favourite point, I almost immediately got one or two small, but bright, sea trout, fresh run and full of sport—quite beyond what one would expect from fish of their size. Drifting inside the point I saw a yellowish gleam in the water. I surmised it was a fish moving; and casting over the place, was at once fast in a game and strong fish, in apparently not very good condition (a surmise subsequently verified), but his first rush in half-gale was a splendid one. He was full of life, and I found it no easy task to land him in the big wind, especially after he was quite done, because, as it so happened, he had finished his fight between the oar and the bow. However, I got the net under him at last. He was an anomalous fish of 4¼lb. I say "anomalous," because, though I have him in my log as a sea trout, my own opinion is that he is a brown trout. He can be easily recognised in the accompanying photograph from his length of body and breadth of tail. "Anomalies" many be my lot to catch when fishing if they are all as game as this one of their kind!

Drifting across the loch, I picked up a few small fish; and when at the mouth of the bay, where the river goes out of the loch, I had a wonderful run of luck, considering the inauspicious start. I got a bright and game fish at once of 3½lb., whose chief characteristic seemed to be a desire to display his silvery charms by way of contrast to the peaty waters; but, like all wild fish, he was speedily done. Next cast I rose, hooked, and got broken by a 2lb. or so fish, without the slightest reason for the same, unless it be that the fly (being an old one) was worn at the neck. Mounting a new one, I rose a fine fish very wildly five times, hooking at the fifth attempt—a very unusual experience, not only because good sea trout (or, indeed, any sea trout) rarely rise so often, but also because the fish seemed quite incapable of taking the fly without, so to speak, four sighting shots—and away he went with a grand and dangerous burst to windward, ending with a leap and two or three somersaults. However, I had felt the fly go well home, and therefore had little or no fear as to the ultimate end of the fight. A game and strong sea trout of 5lb. or so in a strong breeze of wind, whether one fishes from a boat o from the shore, gives on trouting gear as goo sport as any salmon.

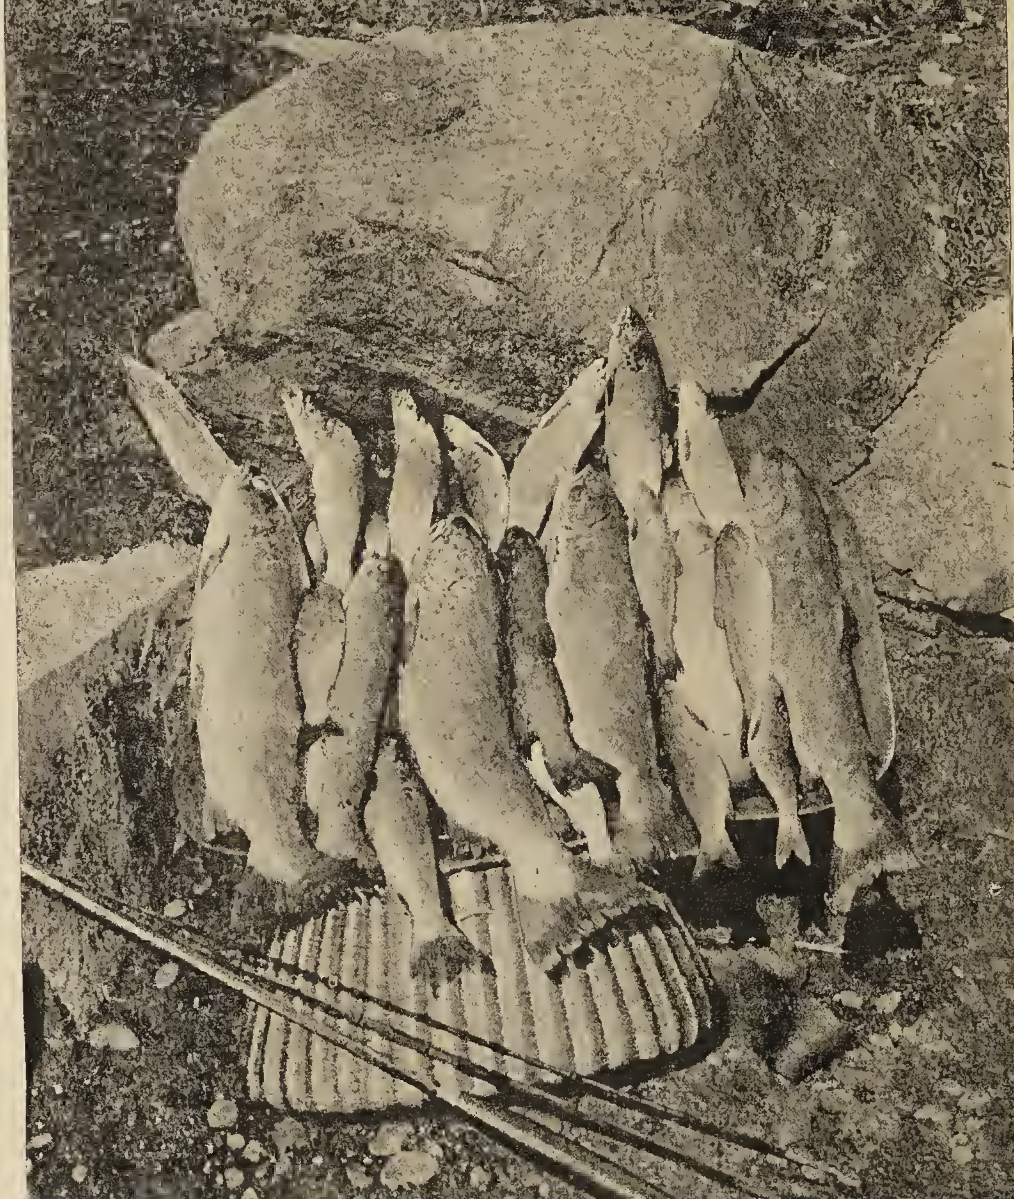
On a calm day one can easily follow a fish wit the boat; but on a wild, stormy day it is almos impossible to do so, especially in a small boat while the constant pitching of the little craft add considerably to the difficulties of the situation An ordinary deal board, running from gunwale t gunwale, will at all times be found most usefu when casting, and also when playing a fish, as th angler finds himself *on it*—if he has cut a partia "voluntary"—and not on his back on the top o his gillie should he lose his balance and fall backwards and "forrard" (to use an apparent contra diction in terms). How much this board (whic can, of course, be easily carried) adds to the con fort of the angler, only thos who have used one can sa Personally I never fish wit out one.

To resume, however.

This fish which I ha hooked soon exhausted hin self, as fish generally do in big wave, and 5¼lb. was adde to my basket. This fish is c the left of the photograp and is a fine specimen of h race. I got another nice fis of some 3lb. immediatel after, and some smaller one but as the wind died aw altogether about half-past fiv the fish went off the mov and we landed at ten minut to six o'clock, with a fair good spring basket, conside ing the inauspicious start viz., nineteen trout (25¼l and six brown trout (3lb.)

The lesson which this d taught me was the same that of many another day fish early, often, and lat fish until there is some chan in the weather; if a cal until there is a breeze; and a gale, until it moderat Then, fish your hardest; *any change* will bring sea tro or loch trout on the wave. believe that this is a ca gorial imperative in lo angling. A warm flush the heather; a gentler or fiercer blast; a pelting h shower; the first drops rain after the depression its impending fall; the n approach of high or low t —because sea trout being fish as much as fresh-wa fish have memories of sea in waters far distant fr it, and in tidal lochs are course directly influenced it—all these are predispos causes towards a change humour, and their occurre may at once change a bad into a good one, so that angler, instead of being un the feet of Fortune, may f himself the "very button on her cap."

Whether true universally or not that successful man is he who waits, in the spher angling the *dictum* is a veritable *cogito ergo su*



A HEBRIDEAN BASKET OF BROWN AND SEA TROUT.

BREAM, CARP, TENCH: AND ANGLING FOR THEM.

By Alfred Jardine.

(Continued from page 52.)

Before taking leave of *Abramis Brama*, commencing on carp, tench and other member the *Cyprinidæ* family, I may mention that bre thirty or forty years ago were somewhat sca in the Lea—*i.e.*, they were not plentiful excep the deeps below Edmonton and Totten About the year 1863, the first bream caught in "Pike and Anchor" water, at Ponder's End, a fine specimen of 5¼lb., and, as may be imagined, it caused quite a sensation at the time. The fortunate angler was my friend Mr. J. W. Gant, who on the same day, in the same water, caught a trout of 5½lb; and a little lower down stream, at the pool known as "Metcalfe's," finished up a splendid day's fishing by the capture of six barbel, weighing together 30lb. The bream and the trout were preserved by Mr. S. F. Sanders, of Essex-road, N., and by request of the then landlord of the Pike and Anchor, were left on show in his "anglers' parlour," but were subsequently seized by a firm of gin distillers to whom the landlord owed arrears of debt. The circumstances were explained at the time that these specimens were only on loan, but the distillers refused to give them up. Should they, however, read my remarks, I hope they will be courteous enough to return these two fish to Mr. Gant, whose address I can furnish them with through the *Fishing Gazette.*

Bream are sometimes to be caught in what are apparently unlikely places. I know a pond in a wood where, a century ago, clay was dug, to make the bricks with which the adjoining farmstead was built. The whole extent of water is less than half an acre, and varies from 6ft. to 10ft. in depth. It holds bream, tench, and carp. I have captured fine fish there—some of the bream over 4lb. in weight. How they got there nobody knows, unless vivified spawn was accidentally conveyed there, and left by night migrants—such as herons, ducks, and other water fowl. Spawn thus deposited, and fructifying, would naturally stock ponds, and thus account for fish where none had ever been put in by man. Many a small piece of water, often passed by as not worth trying, frequently contains a few—possibly very few—large fish. There is not sufficient food to sustain many, but occasionally a big inhabitant may be captured.

To give an instance. When my eldest brother lived at Winchmore Hill twenty years ago, before that pretty northern suburb was spoiled by shoddy builders, he had in his fields a very small pond, where his juvenile ducks strayed, and often returned in diminished numbers. A young friend, a mere tyro in angling, at my request put a live dace on snap tackle in the pond and caught a 13lb. pike, a thin spare beast, whose principal diet had apparently been frogs. The pond was soon afterwards drained and filled up, no other fish of any kind being found in it.

Last August, when I was spending a week near Leeds, a jolly Yorkshire squire invited me to angle in some small lakes, which add additional charms to much stately timber which adorns his picturesque estate. The country round about being of a limestone formation accounts for great diversity in depths of water. One corner of my friend's lower lake shows eighteen feet profundity in a wet season, while in a dry spring and summer twelve feet will prove its deepest; but in this corner the big bream congregated. Many good Leeds anglers had tried for them, but failed to catch any. They didn't quite understand "legering" with a small "pistol bullet," or two "swan shots;" and the betting was all in favour of the bream. Various shillings were backed *against the angler*, but he had judiciously baited with a few "chopped worms," and fished with small "maiden lobs," the result being six bream weighing 26lb., and four very fine perch, caught by the squire. I hope to be some day in these happy fishing quarters again, for enormous barbel are to be caught in the locality, and I wish to get among them, and make a record worth putting in the *Fishing Gazette.*

When fishing at the lower lake the Squire showed me the largest pike I have ever seen. We had a distinct view, and estimated the weight of this fine fellow at not less than 80lb.

Carp and Tench.

Both are soft finned fish, and like all other members of the *Cyprinidæ* family have no teeth in their jaws, but a powerful crushing apparatus in their throats instead. Of all fresh-water fish, none have such large scales as carp, those of a 10lb. fish equalling a florin in size. The scales of the *Speigel* (or "looking-glass" carp) are iridescent, exhibiting all the colours of an opal. In fecundity, carp exceed, weight for weight, all other fresh-water fish, one of four years old producing seven hundred thousand eggs, the roe weighing almost as much as the rest of the flesh. Some naturalists assert that carp spawn more than once in the twelve months; if this is so, then their great fertility and wonderful longevity—of which latter speciality I shall give some instances—makes the cultivation of these fish a profitable pursuit.

In Belgium, Prussia, Austria, &c., are numberless fish-farms—*i.e.*, large sheets of water—where they are bred in great quantities, then carefully fed and fattened till they attain remarkable dimensions, when, by the immense demand and sale of them, large incomes are realised.

It is generally supposed carp were introduced into this country during the fourteenth century. "There be but few in Englonde," says Dame Juliana Berners, in her treatise on angling.* But in the sixteenth century carp were abundant, and cultivated in "stews" all over the country, to supply diet for Lent and fast days. In "Izaak Walton," an old rhyme states that

"Hops and turkies, carps and beer,
Came into England all in a year."

But this is incorrect, inasmuch as beer was not only brewed and drank by the Britons, but it strengthened their brawny arms, when resisting their Saxon aggressors.

(To be continued.)

ANSWERS TO CORRESPONDENTS.

Inquirer: The plant arrived here very dry, broken, and crushed, but we believe it to be the autumnal starwort *(Callitricte Autumnalis)*.

T. M.: You say a prize was given for the member taking most roach over 1lb. weight during the season. You also say that your rules allow members who fish for prizes the choice of doing so on Wednesdays or Sundays, and that they must weigh in once in seven days, and that no special "weighing-in" night is mentioned. You ask under these circumstances if a member weighs in on Wednesday, is he entitled to compete for the prize mentioned above? It seems perfectly clear that you are entitled to compete and weigh in on Wednesday; it is not reasonable to suppose fish caught on a Wednesday in the summer time can be kept until Sunday to be weighed in.

Correspondence

[We do not hold ourselves responsible for opinion expressed by our Correspondents.]

"*One of the charms of angling is that it presents an endless field for argument, speculation, and experiment.*"—T. E. Pritt.

SALMON AND SEWIN FISHING IN WALES WANTED.

Dear Sir,—I should be greatly obliged if any of your readers could inform me through the medium of your valued paper, as to where I could obtain good salmon and sewin fishing, in either North or South Wales, during the months of September or October?—Yours truly,

Silver Tinsel.

A LEGAL QUESTION.

Sir,—Is it illegal for a protection association to stake waters leased to them by a corporate body and landowners on which boating is slightly practised? Also, is the miller or boatman justified in drawing such stakes, the right of fishing being vested in the mayor and commonalty by charter granted in the reign of Henry VIII.? The river in question was navigable some hundreds of years ago, but mills have been erected within this last century. Are there any means of preventing boating on such waters?—Yours, &c.,

A. Goodfellow.

[We do not think that any opinion worth much could be given unless all the documents could be examined. If there is any public or private right of boating or bathing, the party staking the river would have to take the risk of an action for damages caused by the stakes. If the miller can show his flow of water is interfered with by the stakes collecting weeds, &c., he would probably have a good case if he took action. Our advice to A. Goodfellow would be to remove such stakes as might damage or upset a boat or entangle a bather. Angling must be carried on with due regard for the rights of others. We may be wrong, but actions at law about fisheries pay no one but lawyers.—Ed.]

SEA FISHING AT HASTINGS.

Dear Sir,—The sad experiences of amateurs at Hastings are now affording a striking example of the migratory tendency of sea fish. Nor are the causes far to seek. Continuance of wind and cold weather, packs of dog-fish scouring the neighbourhood—these are enough to cause a scarcity of fish within ten miles of the coast. The sea is always rough, and its surface considerably colder than usual at this season; while on three successive mornings last week I saw opposite the market large pails simply filled with the tails of huge dog-fish.

The pier has several nuisances peculiar to itself. Up to last year pout simply swarmed there, and there are now none to be had. An angler assured me that on a calm day a fortnight ago he counted over thirty large bass "messing about" under the piles; but for all their "messing about" they were apparently too cunning for most of the assembled piscatorial talent, only one (about 6lb.) falling a victim to the seductive powers of a mackerel's head.

My own efforts were only rewarded with a few small congers and a great many small crabs.

The aforementioned peculiar nuisances are steamboats and small boys: the steamboats ply backwards and forwards every hour, and the small boys were apparently directing their misguided efforts to spinning for pout with a chopstick and a pound of lead.

With an improvement in weather and a migration of dog-fish, steamers and small boys, amateurs at the channel stations should soon enjoy good sport, as bass and conger are plentiful, as well as squid and all the other favourite baits.—Yours very sincerely,

Fredk. G. A. Hale.

"BADGER" AND "BUMBEE."

Sir,—I observe a correspondent last week inquired about the "Badger" sea trout fly. It is an Aberdeen pattern, I believe, the invention of Mr. William Murdoch, and is in great request as a sea trout killer and a splendid Sutherland loch fly. Another correspondent, some time ago, asked about the "Bumbee." This is another local fly, and has been celebrated longer than I can remember. Indeed, its reputation locally would quite equal that of the "Jock Scott." Dressed small, it is one of the most popular trout flies. Dressed sea trout or grilse size, there is no other pattern excels it, and until the almost universal rule of the fancy salmon fly, it was as necessary a pattern for salmon in Deo, Don, and the Esks, as either the Black or Grey Heron.

Both these patterns can be had, correctly dressed, from yours, &c.,

W. Brown.

64, George-street, Aberdeen.

POACHING, &c., ON THE MEDWAY.

Sir,—Your correspondent, Mr. Shrubsole, has not exaggerated even a little bit *re* the Medway, for a friend of mine residing at Tonbridge says, in a letter just received:—

"The article on the Medway is not half strong enough, for there are places on the upper portion of the river in which the pike have been systematically *shot* by the son of a tenant farmer. The otters are numerous and large, but nothing is done to stop their increase. If all rivers are managed like this, they deserve to be taken from the so-called 'Fishing Associations,' for a yokel may watch you bait your swim, and in the morning occupy it himself, and there is no remedy. Truly a pretty state of affairs!"—I am, &c.,

G. A. S.

NORFOLK BROADS PROTECTION SOCIETY.

Dear Sir,—Thanks for notices in last week's paper.

Since last week the Norfolk Broads Protection Society has either had or been promised the following sums:—J. J. Colmau, Esq., M.P., £10; Sir Henry Tyler, M.P., £6 6s.; W. Pierson, Esq., £1 1s.; Robert Read, Esq., £1 1s.; Norford Suffling, Esq., £1 1s.; Fred Smith, Esq., 10s.; J. Fisher, Esq., 5s.—Yours faithfully,

18, Colemau-street, Bank. T. J. Woodrow.

---

* The Book of St. Albans, published 1186.

A FISHERMAN'S CAP.

DEAR SIR,—Enclosed is a "Fisherman's Cap," which kindly accept. It is of the very best make and material. Will you kindly let us know your opinion of it through the *Fishing Gazette;* the price is four shillings. If the size is not right, kindly let us know and we will exchange it.—Yours faithfully, G. LITTLE & Co.

63, Haymarket, London, S.W.

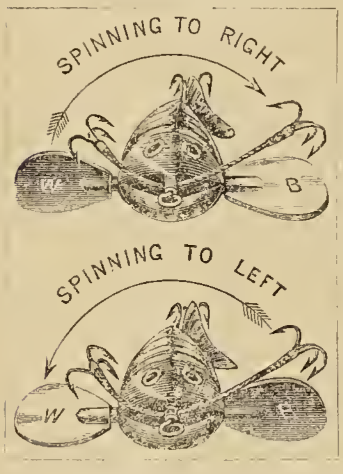
[We are not sure that Mr. H. M. Stanley would not consider this very good cap a "colourable imitation" of that one he has made so celebrated in Africa. Be that as it may, this is one of the best caps we have seen, and the price is very moderate. In ordering a cloth cap it is well to have it full large as the first thorough wetting makes it shrink so as to become unpleasantly tight. This cap will afford good protection in rough weather.—ED.]

A NEW INVENTION IN SPINNING BAITS.

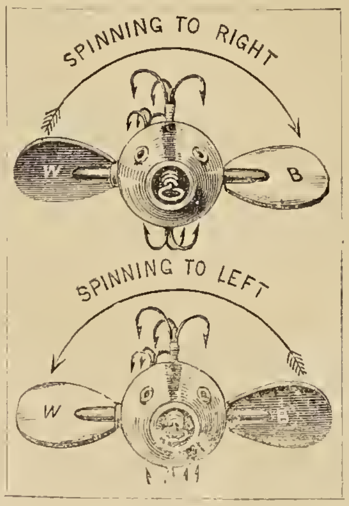
SIR,—I shall be very glad to be allowed, through the medium of your valuable paper, to bring a thoroughly new idea in spinning baits before the angling public. There are so many artificial baits already in the market, however, that the advent of a new one would scarcely be worth chronicling. I therefore hasten to say that what I refer to is not a new bait, but a new idea applied to baits already in existence—viz., the power of reversing their motion, or causing them to spin either way—to right or left—at will, so as to prevent the spinning-line being twisted into kinks.

This object is accomplished by substituting movable fins at the sides for the rigid ones hitherto universally used in all manner of artificial spinners. By a simple arrangement the angle of resistance of each fin to the water can be changed, and the revolution of the bait reversed.

The following diagrams of a Phantom minnow with riversible fins show more clearly what is meant than can be done by a written description. The first one exhibits the fins set at angles which will cause the bait to spin to the *right;* the second shows their angles reversed, and which, of course, will cause it to spin to the *left:*—

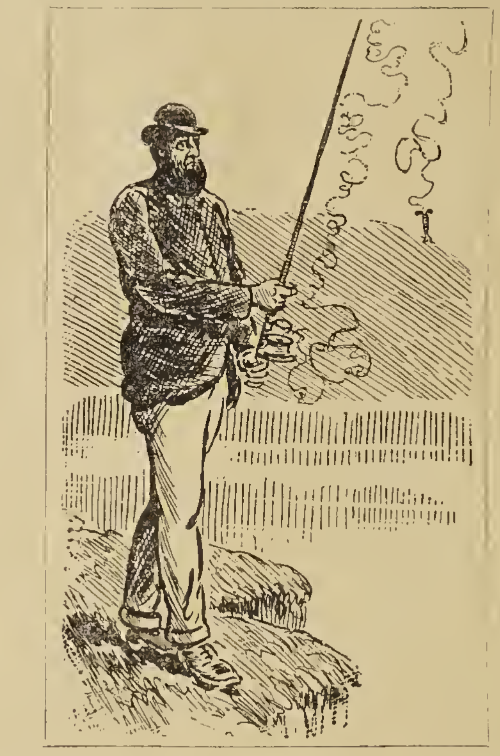


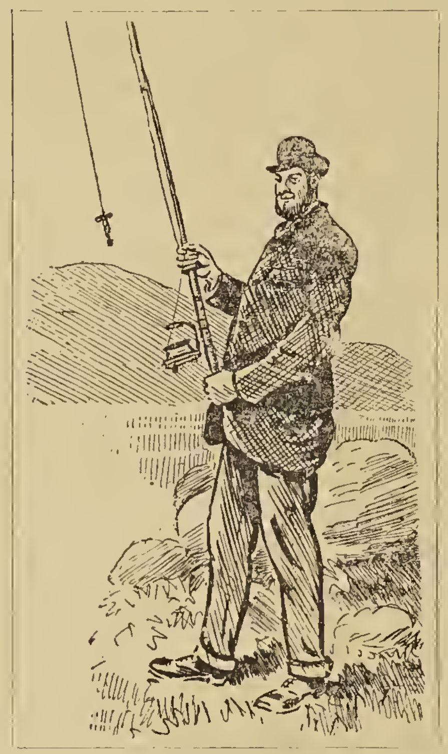
The same principle is applied to the Devon minnows, and by a similar contrivance their fins can be set so as to spin them either way, as shown below:—



The advantage of having a minnow which can be made to turn either way as desired needs only to be mentioned to be appreciated. All anglers who use a spinning bait have experienced the annoyance of a kinking line—twining and curling at every cast, through spinning with a rapidly revolving bait. But when the twist can be reversed this trouble is entirely done away with. All that is necessary—when the line shows the slightest signs of checking in the rings, by little kinks forming—is to turn the fins to the opposite angles, and the twist which has been run on to the line will at once begin to run off again. By repeating this process, when necessary, the angler will find his spinning line as straight and supple after a long day's work as when he took the first cast in the morning.

The first illustration below is very little exaggeration of the misery endured when a fine line is used with a rapid spinning bait—the most popular remedy for which is unshipping the line and careering through a grass field with it trailing at full length behind, by which means the angler renders himself a glorious spectacle for men—and cattle! Whereas, if his bait could be made to run off the twist as well as run it on, the cows might be deprived of their diversion, and time, temper, and silk line saved by everything working properly all day long, as shown below:—





It is almost unnecessary to add that this invention ought to double the ordinary lifetime of a spinning line, as twists and kinks do more damage than fair wear and tear.

The invention is patented in this country and America, by H. L. Inskip, Esq., of the city of London, and I have acquired the sole right of its application to baits in the United Kingdom and the Isle of Man. Very shortly it is intended to bring out a tackle on the same principle to spin natural baits, a patent for which has also been granted. Meantime Devon minnows can be had thus fitted, under the name of "Brown's *Inskip Devon*," and Phantom minnows under the name of "Brown's Phantom Minnow with Inskip Fins and Geen's Patent Swivel," through any tackle maker in London or the provinces—both baits being stamped "W.B." on the spinners—without which none are genuine.—Yours, &c.,

64, George-street, Aberdeen. WM. BROWN.

A DACE OF 1LB. 4OZ.

SIR,—A dace of the above weight, 11¾ inches *extreme length*, recorded in last week's *Fishing Gazette* as having been caught in the Thames at Sunbury, is a most unusual occurrence in any water, not that the river there is tidal, as (from his letter) Mr. J. J. Hunter appears to imagine.

But was it really a dace?

Some years ago a 1½lb. fish was weighed in at a West End fishing club as a dace, the captor knowing little of ichthyology—and less of angling. But some members suspected its genuineness, and when the taxidermist returned the specimen, it proved to be a *chub*.

I know of another instance where some baby-barbel, caught at Sunbury, were described by one of the oldest and most respected contributors of Thames angling news as "magnificent gudgeons—*nine inches in length*."

At the great International Fisheries, 1883, the largest and finest specimen dace were, one of 17oz. from Suffolk waters, exhibited by Mr. W. Howlett, of Newmarket, and another of 16oz., by Mr. A. C. Critchfield. The Piscatorial Society showed dace of 16oz. and 15oz. each; also the Friendly Anglers one of 14½oz.

I possess a fine specimen caught with artificial fly in the Kennet, June 5, 1884, measuring 12in. in length, 7¼in. in girth, weighing exactly 16oz.; therefore (if a *dace*) the fish recorded by Mr. Hunter would not have weighed 1lb. 4oz.

One of your correspondents, who writes under the *nom de plume* of "Giant," has kept a record of large fish, and is an authority whose opinion many of your readers would no doubt like to be favoured with.

Bream and roach "hybridise." Why not chub and dace? If they sometimes do, for they spawn in the same month, it would go far to account for abnormal weights. Chub, length for length, are heavier fish than dace.—Yours, &c.,

ALFRED JARDINE.

ARCHER SPINNER.

DEAR SIR,—We enclose a copy of a letter received this week, and shall feel much obliged by its insertion in the *Fishing Gazette*, as it proves conclusively of what our Archer Spinner is capable. We wish to call the attention of anglers to the fact that our Archer Spinner can now be obtained in five sizes—namely, pike, small pike, salmon, small salmon, and trout, which can be obtained from fishing tackle dealers only.—Yours truly,

WM. BARTLEET AND SONS.

Abbey Mills, Redditch.

[COPY.]

"ARCHER SPINNER PRIZE COMPETITION.

"GENTLEMEN,—I beg to state that fishing with your Archer Spinner on Loch Luichert on Tuesday, the 21st July, 1891, I hooked and killed a trout of 10¼lb. There being no fishing tackle maker in Garve, I append the signature of the landlord of the Garve Hotel, who saw the fish weighed, and of the boatman who was with me at the time.—Yours truly, "DAVID WOTHERSPOON.

"60, Cheapside, London.

"Attested by—
"FRANK RIVERS,
"The Hotel, Garve, N.B.
"SANDY STEWART,
"Boatman, Garve, N.B.

"P.S.—Mr. Jas. Moore, who was fishing with me, could also attest the fact, but I have not his address just now. On the previous Friday I killed a trout of 6½lb. with the same tackle."

RESMULLINS—QUID EST?—ATHOL BROSE.

DEAR SIR,—Perhaps my writing was not so clear as it might have been, but *resmullins* in my letter, in the *F. G.* of last week, for *res nullius* is rather hard on me, but perhaps the phrase was mistaken for some legal Scotch. "Homogeneous," not *homogenous*, was used as a good word by me to describe the thorough mixing which is a *sine quâ non* to the production or concoction of good "Athol Brose." It was a verse in one of the hymns of Veda (Dr. Muir's Metrical Translations from Sanskrit writers, p. 66) which suggested its use—

> "When Brama framed the world of men,
> He made it all Brahmanic then;
> By no distinction marked of class,
> *They formed one homogeneous mass.'*

This, one might, with reverence, "doggerelise" into—

> "When Bacchus made his 'Athol Brose,'
> The things that did the same compose,
> By no distinction marked of class,
> Were drunk one homogeneous mass."

"Athol Brose" is not an easy drink to mix, and it requires some special skill, but my prescription is the real "Simon Pure." My mother possessed, and perhaps yet possesses, tho art, but then she was taught it by a "past mistress" of the same—the landlady of the Athol Arms, Dunkeld, mentioned in my letter of last week. When we were temporarily resident in Dunkeld, the late Duke of Athol, and his brother (*eheu! fugaces anni!*) used often to drop into our house for their "meridian," of what I fancy must, or ought to be, the "Clan Athol" beverage. "Badger" hath not the secret, and may, therefore, be said "*quoad Athol Brose*" to have lived as yet in vain —Yours truly,

DUINE MÔR.

THE LATE DONALD GUNN, GILLIE.

SIR,—I have been asked by a few friends of the late Donald Gunn, my head gillie, to take charge of subscriptions towards defraying the funeral and other expenses of that "prince of gillies." I shall only be too glad to do so, and acknowledge each subscription on receipt, and publish the same in the *Fishing Gazette*. It has been suggested by one or two of Donald's admirers that a memorial stone be placed on his grave. But I think, Mr. Editor, that that should be left with subscribers to determine. I may add that Mr. Murdoch, of Aberdeen, who has himself already offered a handsome subscription, has also offered to take charge and acknowledge any sums forwarded to him.—Yours faithfully, GEORGE MURRAY.

The Hotel, Forsinard, Sutherlandshire.

[We shall willingly subscribe, and will take charge of any subscriptions those of our readers who knew Donald may care to send us.—ED.]

RED PALMER.

DEAR SIR,—Will you please allow me space in your interesting Correspondence column to make this apology to the original "Red Palmer" for making use of the *nom de plume*, which was appended to my letter that was inserted in your issue of the 8th inst. I can assure "Red Palmer" that the facts mentioned by him where wholly unknown by me.—Yours truly,

RED PALMER OF THE 8TH INST.

Waltoniana

A MEETING has been held this week in connection with the Henley-on-Thames and District Fishery Preservation Society. I must keep some account of it for next week, only saying for the present that important changes are to be made in the working of the society, which it is believed will considerably increase its usefulness and improve the anglers' chances of sport in the Henley district, and in the Loddon and St. Patrick's stream.

THIS year, August is being a far better month for fishing on many rivers than it usually is, and it is to be hoped that the snowstorms of the past winter, combined with the present rainfall, which is a little above the average, will do something to bring our rivers up to their proper level. For several seasons there has been a lamentable deficiency of water in many parts of the country, and there are not a few places where half-a-dozen years ago trout and other fishing were to be obtained where now grass and weeds are growing. Some years ago, I drove over to Hampstead Norris, a picturesque village in Berkshire, to negotiate the purchase ot trout for one of the Upper Thames Fishery Preservation Societies. I did not buy the trout, but saw many fine fish of a pound and upwards, in a stream (the upper waters of the Pang) which ran through the village. To-day the stream is absolutely dry and has been so for some years, and where trout formerly made their reds, sheep are now grazing. It would not be easy to find a more striking result of the series of dry seasons than that.

I HAVE to thank Mr. H. G. Green for sending me a page from his marked-fish register and a small metal label with wire attached for fastening to the adipose fin of fish. Mr. Green's plan is, as he explained last week, to have a number on each label and to enter all particulars relating to the fish bearing that number in a register. Each page of the register is divided into nine columns, headed as follows: "No. on label, description of fish, locality, weight, date of return to the water, date when retaken, weight, sex, remarks." There is only one objection to this otherwise excellent system of obtaining information respecting the habits and growth of fish. Only a limited number of people are aware that Mr. Green is marking fish and many of the marked fish must be caught by persons who wonder what the deuce the little label means. If the date when the fish was caught and its weight (or dimensions) could be conveniently marked on the label, any one catching the fish later on would at once understand the import of the label, and probably write to one of the sporting papers on the subject.

THERE are certainly practical difficulties in the way of marking a label at the river-side, while the fish is waiting to be put back. There is, however, no reason why when experiments on a large scale are being carried out by Fishery Boards or proprietors of fisheries, that a quantity of fish should not be netted and marked on a certain day, and labels prepared beforehand with the date and weight of the fish be used. It may be said how could the weight of a fish be engraved on a label before that fish was caught? As to that there is no difficulty. Have a number of labels ready, bearing the weights most common in any particular stream, omitting ounces. It would be very interesting to get some reliable records of the growth-rate of Thames trout. Those remarkable fish are probably the fastest growers in England, and if any of the professional fishermen could be interested in the subject, and would take the trouble to label some of the undersized fish that they take in the course of the season, we should soon have some reliable data on the subject.

WE also want some information concerning the growth-rate of perch. I have seen it asserted in these pages that the perch is a very slow grower; but should be inclined to think that, where not overcrowded by his own or other species, he grows rapidly for the first year or two of his existence, but slower afterwards. From what I saw of the dozen or so yearling perch which were taken out of tho Sunbury rearing-ponds, it was evident that for the first year perch, under favourable circumstances, grow quite as quickly as trout. But in this matter of growth-rate, we should not jump to hasty conclusions. We may with the greatest accuracy determine the growth-rate of fish in a particular river or lake, and then, on experimenting on other waters, find that the growth-rate is quite different under different conditions. For instance, a trout at Mr. Andrew's fish-ponds, at Crickmere, grows (roughly speaking) about double as fast as those reared at more northern fish nurseries. An Avon or Kennet perch would probably grow to a greater size, in three years, than would be attained by the perch in the horse-pond the other side of the village green, in twenty years.

THE various Thames Fishery Preservation Societies might take combined action in this matter of marking fish and in various other ways. It has always seemed an absurdity to me that those societies are not united into one large and powerful body. Mr. Butler, the vice-president of the Reading Association, has made the capital suggestion that two members of each committee should be elected honorary members on each of the other committees. Each society would then know what the others were doing, and endeavour to imitate their successes and avoid their failures. But a greater absurdity still is that the finest river in Great Britain should have no Fishery Board. Not that Fishery Boards as too often constituted are brilliant successes, for they are usually overweighted with persons who are absolutely ignorant of fishery preservation, but come on the board by reason of owning a fishery or having pecuniary interests involved. It is not so loug ago that a member of an Irish Fishery Board was fined for sending salmon to the English markets in the close season. TEMPLAR.

THE Carlisle otter hounds had a capital bit of sport last week, when the meet was at Longtown. They had a rattling good drag from opposite Scaur Bank, past Netherby Hall, Kirkandrews Church, up to the Red Scaur, where the animal was viewed by young Joe, the whip, and a grand hunt followed in the woods, which overlook the river at a considerable height. Finding there was no refuge in Carwinlay Burn, the otter took the deep water and steered for the Thistle pool, when the chase had to be abandoned in consequence of the flooded state of the river. Sir Richard and Lady Graham, of Netherby, were both present, and enjoyed the hunt.

THE SUSSEX PISCATORIAL SOCIETY.

HEADQUARTERS, ARCH NO. 104, KING'S ROAD, BRIGHTON.

THE Sussex Piscatorial Society, which was started at Brighton in February last, entered on Wednesday evening into the occupation of headquarters they have fitted up in No. 104, of the King's-road Arches, under circumstances giving every promise of a flourishing career. Not so very long ago, the arch consisted of but four bare walls. To-day it forms as bright and comfortable a home as any society of the kind could wish for. The walls have been covered in the lower storey with stained pitch-pine match-boarding, and in the upper storey with bamboo matting, and, as the outcome of gifts from numerous members, the place has not only been commodiously furnished, but the nucleus of a valuable library on the subject of fishing and angling has been formed, several of the books being of considerable value. A little aquarium of living fish appropriately graces what may be described as the entrance hall, and the walls are embellished with a variety of adornments, including photographs and engravings of fine fish, and preserved fish in glass cases. As the hon. secretary, Mr. W. F. Booth, mentioned during the inaugural ceremony, there is still room for many more specimens of the same class.

The opening ceremony was performed by the Mayor (Alderman S. H. Soper), who confessed to having a decided taste for the art that it is customary to describe as "gentle," although, perhaps, if the fish were consulted, they would be disposed to object to the use of the adjective. After expressing the pleasure he felt in attending to open the headquarters, his worship reminded the gathering that it was in February last that they met to establish the society, for the purpose of promoting in every way legitimate fresh water and sea angling, and kindred pursuits, such as natural history, fish culture, and aquarium keeping, and with that object in view to rent and stock suitable waters, and in time to establish fish hatcheries. The first thing necessary was to secure permanent headquarters in the place of those so kindly placed at their disposal by Mr. T. Billing, and in that they had been most successful. After alluding in detail to the equipment of the arch, and making special mention of the library—which he confidently believed would become the best reference library of the kind in Sussex—his worship laid stress upon the valuable assistance that the members, with their special information, would be able to give to the committee that would take over the control of sea fishing along the Sussex coast, under the Sea Fisheries Act. Since the association was started, the membership had increased from twenty to something like seventy, and they had enjoyed many a day's, or, in some instances, week's fishing. But the aim of the association was not so much to secure a large roll of members, as to attract those who were ardent lovers of the sport, and they offered no other inducement than that of giving information to each other with regard to the art, and as to localities where a good day's sport could be secured. The Mayor then went on to make a hearty acknowledgment of the labour expended by Mr. Booth and the assistant honorary secretary (Mr. C. F. Gillam), in superintending the fitting-up of the arch, and he also made reference to the great assistance the association had received from the chairman (Mr. Henry Griffith), whom he described as one of the most ardent fishermen in Brighton. Finally, he said he had the greatest pleasure in declaring the arch open, and he hoped that many pleasant hours would be spent there by the present members of the association, and by those who would in the future join its ranks. (Applause.)

In a genial speech, Mr. Booth cordially thanked the Mayor for attending to open their headquarters, and expressed the regret they felt at Alderman Cox and Alderman Brigden, who were both members, being unavoidably absent. The members of the association, he explained, came from various parts of the county, as well as from London and Hampton Court; and for their benefit they had rented two pieces of well-stocked water, in all about twenty acres, beyond which they had obtained permission to fish in Barcombe Mills, at Lindfield, and elsewhere. At present they had no president, thinking it better that the association should be further established before they invited a county gentleman to accept that position. Now, however, he thought there were few gentlemen interested in piscatorial matters who would not be proud to accept the office of president of such an association. To show how the members had occupied themselves during the season, he stated that two papers had been read, they had stocked a tank at the Brighton Aquarium, and they had caught in the aggregate about 600lb. of salmon (over 300lb. being taken by Mr. Griffith alone in Sutherlandshire), about 40lb. of grilse, 10lb. of trout, over 10lb. of pike, 8½lb. of perch, 13lb. of chub, 16lb. of tench, 8½lb. of roach, over 2lb. of dace, 3½lb. of bream, and from 90lb. to 100lb. of carp. Lastly, he gave the chief credit of supervising the fitting-up of the headquarters to Mr. Gillam, and acknowledged the kind assistance of Mr. T. Billing, and the gifts of numerous friends, which included a punt. But, like Oliver Twist, they wanted more, one of the things enumerated being a boat for sea fishing. (Laughter.)

A vote of thanks to the secretaries and to tho Mayor for presiding brought the proceedings to a close.

Although nothing was said with regard to that point during the inaugural proceedings, it is intended to make the association of considerable utility to visitors to Brighton by furnishing them with information with regard to sea fishing and as to reliable boatmen.

BRENTFORD PISCATORIAL SOCIETY.

THE members of this successful society on Monday last had one of the most enjoyable river trips it is possible to imagine, and that through the kindness of their liberal and hospitable supporter, Mr. Andrew Pears. It appears when that gentleman was invited to preside at the annual dinner in July last, he gave his opinion that summer time was not the most suitable for dinners, and with his truly liberal spirit offered to give an outing in his electric launches up and down the river, and to provide refreshments, which was at once accepted. It was left with him to fix the day, and accordingly, with his accustomed accuracy, he not only selected the seventeenth of August as the date, but timed all the arrangements with it. The hour of departure was nine o'clock a.m., at Brentford Great Western Station, and on the arrival of tho train at Southall, special carriages were ordered to convey the passengers to Taplow, so as to make the start from the Thames at Maidenhead Bridge at 10.30. On the arrival of the visitors some little before the time, Mr. A. Pears was there ready to receive them, having come down from his residence at Stonor Park, Henley-on-Thames, for that purpose. In addition to his recently built launch, *Glowworm*, which is considered the most costly and elegantly furnished boat on the Thames, tho cabin and its magnificent decorations being the well-executed work of

Mr. Praill, of Tottenham Court-road; and *The Pilot*, his smaller launch, he bad engaged *The Viscountess Bury*, which is a large and commodious electric launch, licensed to carry something like eighty passengers.

At the time appointed, Mr. Pears having got all seated, he started the larger vessel, with the members of the Brentford and District Piscatorial Society on board, under the charge of its most indefatigable secretary, Mr. E. J. Thomas. Then followed his private launch, *Glowworm*, having as his companions thereon, tho Rev. D. Stanley-Mansfield and Messrs. W. H. Ellis, C. Robinson, T. A. Frost Edwards, J. H. Saunders, W. H. Brougham, and Capt. F. H. Mahoney. Then followed, bringing up a party of about half-a-dozen, *The Pilot*.

Going through the most lovely portion of the Thames, which some admire in preference to the Rhine, especially where Cliefdon and the Quarry Woods are prominent objects. The launches were timed to be at the Compleat Angler at Marlow for luncheon at 12.30, and it need scarcely be added that all were seated by that time in the spacious out-door erection connected with that famous hostelry, of which Mr. Kilby is now the proprietor. Mr. Andrew Pears presided on the occasion, supported by the gentlemen whose names have been previously given, and in addition may be mentioned Messrs. F. Pears (who is at present camping out in that neighbourhood). E. J. Thomas, James Clapp, J. Taylor, T. W. Waight, J. Rowling, G. H. Parsons, E. Lock, F. J. Roper, C. H. Wilson, J. Reading, H. Harris, J. Allen, J. Ricket, E. Cox, J. Greenwood, jun., &c., the party altogether numbering fifty-five guests.

During the luncheon, at which champagne and hock were liberally supplied, thero were only three toasts, first the loyal one, then that of "Mr. Andrew Pears," given in graceful terms by Mr. E. J. Thomas; and then the "Brentford Piscatorial Society," by the chairman, in a few appropriate words. Mr. E. J. Thomas, whose name was associated with it, in his reply stated the society was formed on the 28th of May, 1889, in 1890 they had enrolled up to the same date one hundred and twenty-five members, and at the present time, up to date, ono hundred and thirty-two. The financial position was good, with a satisfactory balance in hand.

After a local photographer had taken a group on the lawn another start was made in the launches at the time fixed—1 30—up to Medmenham Abbey, where all disembarked to have a look at it, some few paying a visit to Mr. Fred. Johnson, the proprietor of the Abbey Hotel. This was the end of the trip, and the launches were timed to be at Marlow at four o'clock for tea, in the same place as the luncheon, and this was promptly effected. All appeared to enjoy "the cup which cheers, but does not inebriate," and the return and closing journey was to be made from there at 4.35, so as to reach Maidenhead Bridge at 6.30, in time to catch the train at Taplow at 7.13: and in all the places mentioned Mr. Pears was to be found with his watch in his hand, indicating complete punctuality in his movements, and there was in no instance the slightest confusion.

It should be mentioned that Mr. Pears had each launch well supplied with refreshments, and there was no stint in anything, and all was provided by Mr. Bennett, of the Star and Garter Hotel, Kew Bridge, whose personal attention to those on the *Glowworm* was all that could be desired, the champagne cup and some first-rate cigars being always on the move.

Amongst the incidents to be noted on tho river were a considerable number of electric launches on the move; here and there wero anglers in punts, but who did not appear to be doing much; there were two pleasure boats engaged in the unsportsmanlike practice of trailing, one of a gentleman being rowed by ladies, and the other a lady using the objectionable method. As a conclusion to this notice of a thoroughly pleasant day, all were enthusiastic on landing in expressing their full appreciation of the great treat Mr. Pears had given them, and no one was more delighted than Mr. Pears himself to find it had been enjoyed by them.

End of the Salmon Netting Season in the North of Scotland.—Wednesday next at noon will again see the death-knell of tho netters rung for another season. They have had a fino time of it on the east coast, and, although the net figures may not transpire for some short time yet, still a rough guess may be made. Their average is a big one, and double that of last year. Latterly the harvest has been chiefly to the in-shore nets, but all over, with the exception perhaps of the upland river stations, the fishing has been a prosperous one. We do not grudge the netters success, if everything was fair and square to the angler, but this is not the case. There are two thorns in our flesh, caused by them—netting under any conditions in the river, and the too short weekly close-time. Till the proprietors combine and buy up tho rights of netters, salmon angling will never attain its healthiest and best conditions. It is all very well when there is plenty of water running, but this cannot be depended upon. When there is water a few fish may get past, but at other times, which includes all the summer at least, the fisherman is on the look-out. When a fish is descried, and the wave ho makes is perfectly discernible to the practised eye at a good distance off, the cobble is run out, the net dragged, and the poor *Salmo salar's* life's journey is cut short! The net can be so dragged, too, that a pound sea trout will have difficulty in getting through. I had some lately, and every second one of a pound and over had run the gauntlet by a narrow shave, as was plainly to be seen by the markings on the thickest part of the body, where he had been stripped of his soft, silvery coat. It would not be a great matter to buy up the rights of the netters, were the proprietors heartily to combine for the purpose. The enhanced value of their fishings would more than recoup them and redeem the purchase money in a few years time, and might not the purchase price be borrowed from the State? The other thorn does not prick so painfully, yet its presence is severely felt. Thirty-six hours is all too short a weekly close-time. It ought to be forty-eight hours at least. When there is a volume of water on Saturday or Sunday, the fish get away in fairly large quantities, but this is not the case so often as it might be, even in the spring months, and still less frequently the case during the summer. An extended weekly close-time to at least forty-eight hours would in a measure compensate for the difficulty the fish have in getting over the shallows, and allow more of them into the river and farther up the river than what the chances do at present. Meanwhilo they only escape the bag-nets to be caught in tho river traps. Only the other Monday morning a shoal of salmon and grilse, estimated at close upon one thousand, were got in one of these traps belonging to the Aberdeen Harbour Commissioners. Had these fish got into the river, what a sport they would have afforded in this dull season.—Deesider.

THE THAMES ANGLING PRESERVATION SOCIETY.

Guinea Cup to be Fished for.

An open competition has been instituted by the members of the New Albion Piscatorials, in aid of the funds of tho Thames Angling Preservation Steiety, and it is hoped that members of all London angling societies will support the project. The prizes and conditions are subjoined:—

£5 5s. silver cup, presented by Mr. W. F. Grimmett (chairman of the club), for the six best weights from any *bona fide* club in a week-day or Sunday competition during this season, from bank or punt. Thames only.

For best individual gross weight from bank, £1s 1s., presented by Mrs. Hughes.

For best individual gross weight from punt, £1 1s., presented by Mrs. Hughes.

For best roach, from bank or punt, 10s. 6d., presented by Mr. A. E. Baldwin.

For best dace, from bank oi punt, 10s. 6d., presented by Mr. C. W. Hugman.

For hest pike, from bank or punt, 10s. 6d., presented by Mr. R. La Feuillade.

For best barbel, from bank or punt, 10s. 6d., presented by Mr. R. Shonfield.

For best chub, from bank or punt, 10s. 6d., presented by Mr. R. Turnham.

For best perch, from bank or punt, 10s. 6d., presented by Mr. J. Rump.

Entrance fee, 1s. each competitor, tho wholo amount to go to the T.A.P.S,

Any number from one club to be at liberty to compete on the same day (Thames only); but six (or less) best only to count; and all fish to be weighed at the headquarters of tho competing club, or at the Duke of Kent, on tho day of competition, according to the following scale—viz., Roach, 8in.; dace, 7in.; barbel, 16in.; chub, 12in.; perch, 10in.; and pike, 21in.

A club shall be at liberty to compete any number of times on payment of fresh entrance fees, but no competitor to take more than one prize.

Notice of competition to be sent and entrance fees paid to Mr. E. Baldwin, secretary, 75, Wells-street, Camberwell, by the day previous to the outing.

When possible a representative of tho N.A.P. will attend at the weighing in, but in his absence a certificate of the weights and size of fish, signed by the chairman and secretary of competing society, to be forwarded to the secretary of tho N.A.P.

Mr. W. F. Grimmett to be sole arbitrator of any dispute that may arise.

***** Club and River Reporters will oblige by sending in their Reports early in the week.**

Holloway's Pills.—In general debility, mental depression, and nervous irritability there is no medicine which operates so like a charm as these famous Pills. They purify the blood, soothe and strengthen the nerves and system, give tone to the stomach, elevate the spirits, and, in fact, make the patient sensible of a total and most delightful revolution in his whole system. They may be commended most unreservedly as the very best family medicine in existence. Though so powerfully efficacious, they are singularly mild in their operation, and might be given with perfect confidence to delicate women and young children. They contain not a grain of mercury, or any other noxious substance, and cannot do harm. Delicate females and all persons of sedentary habits will find these Pills a blessing.

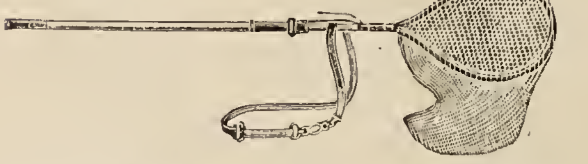
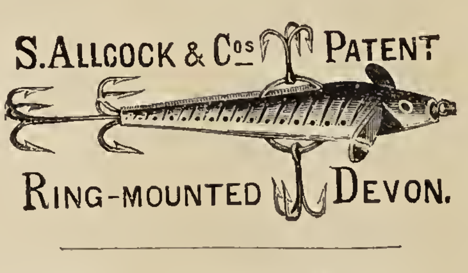
Highest Awards at Fifteen International Exhibitions for Fish Hooks, Fishing Rods, Salmon and Trout Flies, and all descriptions of Fishing Tackle.

Patent Applied for.

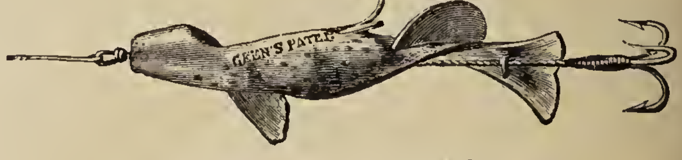


Col Clarke's Patent L. Handle & Net.
Perfectly secured to the Strap, and can be removed in an instant.

Platt's Patent Fishing Basket.
The New Aluminium Reel.



Patent Inimitable May Fly.
The nearest approach to nature ever yet attained. Bodies in vario us Patterns.



Geen's Patent Spiral Minnow.
The most Perfect Spinning Bait ever invented.
It can be drawn through the water so slowly that the laziest of fish can seize it, yet its spiral shape makes it appear to be in a terrible hurry to escape.

Makers of Pennell's pattern Up-turned Shank and Eyed Fish Hooks.

Wholesale only. Our Goods can be obtained from all respectable Tackle Dealers.
CAUTION TO SHOPKEEPERS. The Inimitable May and Trout Flies should not be exposed in the window or in the sun.
London Office: 60, QUEEN VICTORIA STREET, E.C.

SUPPLEMENT TO THE FISHING GAZETTE

SATURDAY, AUGUST 22, 1891.

Reports from Clubs

We beg to request Secretaries to post their Reports not later than **Wednesday Night,** *addressed "Editor* FISHING GAZETTE, *St. Dunstan's House, Fetter Lane, London," and marked* CLUB REPORT *outside envelope. Post Card Reports preferred unless for special meetings.*

Anglers' Association, Foresters' Hall, Clerkenwell-road, Clerkenwell, E.C.—The monthly delegate meeting took place on Monday evening last, W. R. Lawes in the chair. The report of the Renting and Preservation Committee was read. A resolution was passed that in future he General Committee shall have power to deal with minor club disputes, the abuse of privilege tickets, and the enrolment of new societies. The South Acton Angling Society was enrolled. A grant of £5 5s. was votod to the Maidstone Angling Preservation Society. Mr. M. Barrington, Hoxton Brothers, was appointed hon. bailiff, subject to the approval of the Lea Conservancy Board. M. Founain, senior, and G. Lewis, Sundial Angling Society, were appointed hon. fishery hailiffs to the waters rented by the Anglers' Association. The visiting officers, Messrs. Manning, Jennings, Thorling, and Armstrong, gave their eport. The secretary reported the capture of a net at Ware. The men, who are known to the police, will be ummoned. He also gave an account of the water being drawn down in several parts of the river Lea during the revious week, police being engaged during the whole of he time, day and night, to watch the river. The following ifty-one clubs were represented: Bermondsey Brothers, ity of London, Globe, Eastern Piscatorials, Hoxton Brothers, Izaak Walton, Duke of Norfolk, Mildmay, Original Alexandra, North Eastern, Prince of Wales, eckham Brothers, Prince Arthur, Royal Oak, South Hornsey, St. John's, South Belgravia, St. Andrews, Sunial, United Brothers, West Ham Brothers, Waltonians, Westbourne Park, Queen's, Waggoners, Walworth Walonians, Marylebone, Hertford, North London, Bostonians, Burton Piscatorials, Midland, Allason United, Campbell nited, Original North Lambeth, Clissold, Lady of the Lake, ntwerp, Islington Brothers, Bomore, East London, olden Barbel, Stepney, Crown and Buckland, Cobden, orth Lambeth, South Acton, North Western, Hearts of ak, Odds and Evens, and Cambridge Friendly.

Anglers' Association.—EASTERN DISTRICT No. 2.—he next return visit on this list will take place at the unny Folks Angling Society, held at Mr. A. Eldridge's, e Rose and Crown, Goswell-road. The date I will nnounce next week.—F. THORLING.

Anglers' Association (SOUTHERN DISTRICT) VISITING IST.—The next visit on the above list takes place on onday, the 24th inst., at the Peckham Brothers Angling ociety, Prince Albert, East Surrey Grove, Peckham, hen I hope to see a good muster of brother anglers.—G. V. ARMSTRONG, District Officer.

Anglers' Benevolent Society, Foresters' Hall, lerkenwell-road, Clerkenwell, E.C.—The next meeting of e committee will take place on Friday evening, August , 1891.—R. GHURNEY, sec.

Anglers' Pride Angling Society, the City Arms, reat Dover-street, Old Kent-road.—On the 16th inst., our embers fished for their monthly prizes at Woking eads, we all had fish, but most of the takes were small. r. Scutt, first prize, roach and dace; Mr. Gibbs, second, eam and roach; Mr. Bees, third, roach and dace; Mr. rner, fourth, roach. Mr. W. Brown was duly elected working member of this society.—J. TUCKER, hon. sec.

Allason United Brothers Angling Society, Allason rms, Uxbridge-street, Notting-hill Gate, W.—We had a od show of members on the 17th inst., when wo oposed to fish for the three prizes which were not won the 16th shall he continued at Staines on the 30th, two ds; roving. All fish, bar eels, to weigh in, and members go down on the morning of competition. We had e pleasure of making another working member, that ntleman being Mr. B. Skelt, who gave half a guinea for e largest barbel during the season. Members will please ow up on next meeting night, as we have important siness to transact. There will be a competition held in sociation water, from Langley Bridge to Iron Bridge, ndly given by Mr. David Pilhouse, of the North Star otel, Langley. For further information see next week's *shing Gazette.*—B. ABRAHAMS, sec.

lma Angling Society, Crown Distillery, Vere-street, re Market.—On the 16th, several of our members were t, when the following weighed in: Messrs. T. Smith, eam; H. Wilson, dace and gudgeon; and W. Cutbush, ch. One of our memhers on the 16th, at West Drayton, ked up in a dying condition, a specimen roach of 1½lb., th two holes in its side, as if it had been speared. On esday J. Drew was proposed as a working member and ll be elected in due course. I hope members will not get the 30th, as we fish for seven prizes, and I should e to see a good muster.—J. PAILES, sec.

micable Brothers Angling Society, Bald-Faced g, Worship-square, Finsbury.—The following members ighed in on the 16th—viz., Messrs. Medcalf, Moir, Hard-, and Potter, showing bream, roach, and dace. It is ided that we fish for a series of prizes at Fiddleworth, Sept. 13. We made two more honorary members, and l have a few vacancies for some working members as ll.—W. H. POTTER, sec.

micable Excelsior Angling Society, tho Greyhound tel, High-street, Battersea.—Our third outing this season ne off on the 16th, at Egham, when sixteen of our mems were out, but only two prizes were taken. The sucsful ones were Mr. J. Jones, first, with dace; Mr. G. h, second, with dace and gudgeon. Last week was rter night, and nineteen answered to the roll-call, and made two new members.—J. RICH, sec.

micable Waltonian Angling Society, the Sun, eat Sutton-street, Goswell-road.—On the 16th inst. our mbers were out in good force, with the result that a e show of fish was placed on the trays by the following tlemen: Mr. Whitebread, bream and roach, 17lb., gest bream, 2lb. 7oz.; W. Embleton, junior, 10½lb. of eam and roach, largest bream, 2lb. 6oz.; Mr. Lambarth, ior, 5lb. of bream and roach, largest hream, 2lb. 1oz.; . Nunn, with 3lb. of very fine roach; Mr. Irvin, 2½lb. of am; Mr. Loosely, 3lb. of roach and chub; Mr. Humies, bream, 2lb., and also an eel of 1½lb., takon whilst k fishing. Mr. Hazell and Mr. Turpin also had roach. al weight for August 16, 47lb. 5oz. On the 23rd inst. thirty-sixth annual dinner will take place at the Black g and Duck Inn, Bury, near Pulborough. Members are requested to be early in attondanee. We enrolled two new members last meoting night, and have two more to be ballotod for next meeting.—G. MERRY, sec. *pro tem.*

Anchor and Hope Angling Society, Canal Bridge, Old Kent-road.—The usual weekly meeting was held on Wednosday, with a fair attendance of members. The members were out on the 16th, to fish for the prizes left over from the 9th, with the result that Mr. Bodell took 1st prize, 3lb. 13¾oz.; Mr. Simpkins, 2lb. 13¼oz., 2nd; Mr. Scott, 1lb. 15¼oz., 3rd; Mr. Smith, 1lb. 7¾oz., 4th. Mr. Palmer had a show of fish, 3lb. 4oz., placed to his account; Mr. Martin also had fish. It was carried unanimously that we send a donation to the Maidstone Angling Preservation Society of 10s. 6d., to aid them in their efforts to preserve their water for the benefit oi anglers in general. I hope tho members will attend early on Wednesday next, as the sea fishing competition is on the agenda, and I hope to he able to impart some information on the subject.—A. G. SMITH, secretary.

Battersea Friendly Angling Society, Queen's Hotel, Battersea.—The members of this club fished a match on the 16th, roving, for four prizes, with the following result: Mr. F. Anstiss, first, 10lb. 1½oz., one harbel going 6lb. 2½oz.; Mr. J. W. Hopkins, second, 8lb. 6½oz.; Mr. G. Searle, third, 4lb. 1oz.; Mr. W. Wallis, fourth, 3lb. 5½oz. On Tuesday last two now members were elected, and three more proposed. Tho following also weighed fish on the 16th inst.:—Messrs. W. Chettle, perch; J. Ancliffe, bream; G. Mumford, roach; W. Himes, bream. The next outing will take place at Pangbourne, on August 30. Pegged-down for five prizes, presented by Messrs. Burgess, W. Edwards, G. Edwards, Hopkins, and A. Dodds. First prize, value 42s.; second, 38s.; third, 25s.; fourth, 25s.; fifth, 10s. Jack barred; one rod; to cease fishing at seven o'clock. A brake will start from club-house at 7.30 to Paddington. Under the same conditions a special prize of 10s. 6d. will be given to honorary members.—G. MUMFORD, sec.

Bermondsey Brothers Angling Society, Pitt's Head, Grange-road.—On the 16th, the members fished a competition for the August series of prizes, with the following result: H. Patman, 9lb. 7oz., first; D. Dodson, second; A. Conn, third. Several other members also weighed in. The concert and draw for the benefit of Mr. Reuhen Smith, took place at the club-house on the 18th, and, I am pleased to say, was a decided success in every way. The following are the winning numbers: First prize, a general rod, number of ticket, 914; second, landing-net and telescope stick, 94; third, mail cart, 599; fourth, opera glasses, 893; fifth, fretwork brackets, 1,043; sixth, copper kettle, 302; seventh, box of cigars, 321; eighth, tackle case, 154; ninth, creel and bait-can, 1,361; tenth, winch and line, 305; eleventh, bottle of whisky, 451; twelfth, bait-can, 144; thirteenth, 50yds. of line, 92; fourteenth, winch and rod-rest, 6. There are several prizes not yet claimed. If the owners of the tickets will produce them at the club-house, as above, any Friday or Sunday evening, we shall be pleased to hand over the prize. I take this opportunity to return the sincere thanks of the Bermondsey Brothers to their brother anglers, for the hearty support rendered them on this occasion; and I am also requested by Mr. Reuben Smith to say that he is most deeply grateful to one and all for the assistance rendered him in his present difficulties.—A. CONN, sec.

Blackfriars Angling Society, Winchester Arms, Southwark-street, Blackfriars, S.E.—A further discussion on the annual dinner took place on Wednesday, when exception was taken to the date, which will he finally settled next week. Two prizes were promised to be fished for in the competition on that day—Mr. Wilson, 10s. 6d., for the largest roach; and Mr. Farmer, 5s., for the largest bream. On the 16th, Mr. Wheelhouse had a good show of fish; Mr. J. Barker, roach and dace, 1¼lb.; Mr. F. Barker, carp and perch, 2¾lb.; and Mr. Hacker, bream and roach, 2lb.—F. ROBERTS, hon. sec.

Bloomsbury Brothers Angling Society, the Rose and Crown, Broad-street, Bloomshury, W.C.—On the 16th instant we had a good show of fish on the tables, Mr. Rich weighing perch, roach, and dace, heaviest dace, 9oz.; Mr. Young weighed in bream, heaviest bream, 2lb. 9oz.; Mr. Gill weighed in perch. No member is to go down before the first train on the 23rd, for our pegged-down match, and leave off fishing at six o'clock.—D. WARREN.

Brunswick Brothers Angling Society, Cherry Tree, Brunswick-road, Bromley, E.—Since last week the following gentlemen have weighed in: Messrs. Wilson, Watkins, and Mearring, bream, and Mr. J. P. West a nice tray of barbel and dace. We fish for two prizes at Dagenham, on the 23rd, same timo and conditions as before; all sizeable fish to weigh; one rod only. We are getting up a smoker; will members please attend.—T. HAWKES, sec.

Burdett Angling Society, 118, Hackney-road.—Our trays were very small on the 16th inst., owing to the water being so low and bright. The following members weighed in: Mr. D. Flint, roach, dace, and perch, 2lb. 10oz.; Mr. Gurney, 1lb. 7oz. of perch; Mr. Antill, 1lb. 14oz. of roach and dace; Mr. Sparks, 14oz. of roach. I hope members will not forget next Wednesday is roll-call night.—J. PETHER, sec.

Camden Angling Society, Royal Exchange, Hartland-road, Kentish Town.—On the 16th inst. the following members weighed in: Messrs. Marshall, hream and roach; C. Chapman, tench and roach; A. Chapman, jack; and Fitter, roach. Our break outing to Woybridge will take place on September 6. Start from the abovo at 6.30 sharp.—E. T. WHITE, sec.

Causton Angling Society, Coffee Pot Tavern, Warwick-lane, City.—On the 17th the meeting was a good one, hut, with regard to fishing during the current week, there has been nothing weighed in to boast about. Mr. T. Crumplen, of the Piscatorial Society, &c., will preside here on Monday next (24th inst.), when Professor Christopher Green, of the Grange Angling Society, will, at nine o'clock, read a paper on "Roach Fishing." A hearty welcome will be extended to all brothers of the angle who may favour us with a visit on that occasion.—JOHN SMITH, hon. sec.

Central Association.—The monthly delegate meeting was held as usual at the Bedford Head Hotel, Maiden-lane, Covent Garden, on Monday week. The chair was taken hy Mr. T. Crumplen, in the unavoidable absenco of the president, Mr. C. A. Medcalf. The minutes of the previous delegate meeting were duly confirmed, correspondence read, and routine business transacted. The Causton Angling Society, held at the Coffee Pot Tavern, Warwick-lane, E.C., was enrolled, as was also a new society, to he called the Great Western Angling Society, the members of which are exclusively employees of the Great Western Railway Company; their rules being in accordance with those required by tho association. Mr. Wade, in making some remarks on the success attending the Pulborough tournament, mentioned that Mr. Eldridge was making arrangements to hold three competitions, two to take place at Pulborough, and one at Amberley. Those at Pulborough are to come off on September 6 and October 25, and that at Amberley on October 4. Mr. Eldridge is being locally supported in the arrangement of his prize list, and although these competitions are not those of the association, thero is no doubt they will be largely patronised by the members, and he will receive every encourgement possible. The water is being well watched on hehalf of the association, and several members volunteered to act as bailiffs during the month. It must be understood that the water rented by the association can only be fished by members holding its privilege card, which must in all cases be shown when asked for. In reply to an inquiry, Mr. Wade mentioned that the number of members now exceeded that of any year in the history of the association, and during the past two months, more privilege tickets had been taken up than in the whole of the previous year. A hearty vote of thanks to the chairman and secretary brought the meeting to a close.

City of London Angling Society. White Bear, Bride-lane, Ludgate-circus.—Mr. Macdonnell weighed in bream and dace from Amberley on the 16th. No other member weighed in fish.—CAS.

Clapham Junction Angling Society, the Clarence, Winstanley-road, Clapham Junction, S.W.—The next visit on the South London United Visiting List will be to this society on Tuesday, September 1, when we hope to give a hearty welcome to all clubs on the list.—A. TROWBRIDGE, secretary.

Clapton Angling Society, Wayland Hotel, Dalston-lane.—An ordinary weekly meeting was held at the cluhhouse at the above, on Monday last, Mr. R. A. Chillingworth in the chair. Several members related the satisfactory results of pleasant days with rod and line, Mr. R. W. Murray, whilst away in Ireland, having had heavy takes of grilse, ranging from 3lh. to 10lb., all with the fly. This gentleman has also had some fine sport in Hampshire—roach up to 2lb. and five dace, which weighed 4¾lb. Good accounts still come as to the excellent sport at our private waters at Enfield Lock. We hope next Monday that there will be a good attendance of memhers, as last Monday the question of a club outing was brought forward, and on our next meeting this will specially claim our attention.—HENRY HOWSE, hon. sec.

Clarence Angling Club, Red Lion Hotel, Harrow-road, Paddington, W.—On Wednesday evening another new momber was elected. Messrs. Sparrow and Halso had good roach and dace from the Thames; and Mr. J. F. Dawson, roach and dace, from Thames, also jack, perch, roach, and grayling, from the Kennet in good condition.—ALF. E. EVANS, sec.

Clerkenwell and District United.—A successful visit on the above was paid to the Independent Brothers on Wednesday evening, Mr. Crumplen in the chair, faced by Mr. Herbert, of the Islington Brothers. The following seventeen clubs were well represented—viz.: Great Northern Brothers, Lincoln, City of London, Independent Brothers, Seymour Brothers, Eustonian, Amicable Waltonians, Islington Brothers, Bloomsbury Brothers, Alma, Burton Piscatorials, North London, Camden, Royal George, Bermondsey Brothers, Phœnix, and Athenæum. The next visit will take place at the Eustonian Angling Society, held at the King's Arms, Swinton-street, Gray's Inn-road, on Monday evening next, Aug. 24. The Seymour Brothers have kindly consented to that arrangement.—F. CASTELL, hon. sec.

Cobden Angling Society, Cobden Club, Kensal-road, W.—Several members were out on the 16th, but only three weighed in fish—namely Mr. F. Stone, bream and tench, 20lb.; Mr. F. Hannabas, bream and tench, 18lb.; W. Hutchings, tench. On Monday, the 17th, E. Baker weighed in a specimen tench. We fish a match for private prizes on September 13, at Denham Straights. Members to proceed how they like; start fishing at eleven a.m.; leave off at seven p.m. Draw for swims at Swan and Bottle. Fish to be registered at side of water. Weigh in at club-house by 10.30 p.m. A pegged-down match. Jack harred. No raking.—A. SMITH, sec.

Corinthian Angling Club, Prince of Wales Hotel, Eastbourne-terrace, W.—Several of our members have been out during the past week with indifferent success. Messrs. R. Brown and Stallibrass have had some fair roach from the Wey, and Mr. Sidney, a few barbel from the Thames at Windsor.

Dalston Angling Society, Brownlow Arms, Brownlow-street, Dalston.—On the 16th, Messrs. Cogswell, Wild, Legge, Parran, Kellick, and Freeman had a very good show of rooch, perch, dace, and tench. On Thursday, tho 13th, Mr. Grange had some very fine perch, some scaling 1lb. 9oz and 1lb. 7oz., and a honorary member showed a very fine jack. On the 30th inst. a series of prizes will be competed for in the Stort, at Harlow. Full particulars to be obtained at the club-house.—S. MALBY.

Eagle Angling Society, Chesnut-road, Tottenham.—Our members are not yet bringing in much fish. The exceptions are Mr. Summers, a few weeks ago, with a fine show of perch and eels, two of the largest weighed 2¾lb. and 1lb. 4oz., respectively; and our old champion, Mr Dwyer, in company with a friend, captured about 18lb. of barbel, roach, and dace, on 16th inst., at Staines. I am pleased to report that up to this date twelve new members have joined the society this year.—T. F. B.

Eastern Piscatorial Society, Spread Eagle, Gill-street, Limehouse, E.—At our weekly meeting on Wednesday we made another member, which makes three new members this season. Mr. Jones has shown a nice lot of bream, from Dagenham; Mr. Bartlett, bream, roach, dace, and perch; hut our members generally are not making any great attempts at present. We shall shortly fish a match for a marble timepiece, and members are requested to turn up in force to arrange tho same.—W. B., hon. sec.

Funny Folks Angling Society, Rose and Crown, 21, Goswell-road.—On the 16th inst. the following weighed in: Messrs. Biggs, roach and perch; Vanhegan, roach and perch; and S. Hill, roach. All members are requested to attend on the 27th inst., to arrange our annual dinner.—J. W. BIGGS, sec.

Globe Angling Society, Fonthill-road, Finsbury-park, N.—We had a first-class show of fish on the 16th inst. by the following members: C. Ellis, dace; A. Slade, fine show of hream and dace; H. Evans, some good roach and hream; C. Stehbings, a few splendid bream; Caborn, roach and dace; Riggs, roach and daco; and W. Lawrence, somo fine tench.—W. E. B.

Golden Barbel Angling Society, York Minster, Foley-street, Portland-road.—A few of our members took advantage of the fine weather on the 16th, and visited some of the favourite swims, and were well repaid, as we had a splendid show, Mr. Bailey being first with 20lb. of roach; Mr. Ellins likewise a fine show of roach, dace, and trout; Mr. Bowring, a capital tray of bream; our worthy vice-chairman, roach and dace from the Lea; and Mr. Marchant, also roach and dace. On Tuesday, Mr. Bishop weighed in 20lb. of bream; and our vice-chairman, a catch of roach. We elected two new members, one giving two prizes to be fished for.—A. Stokes.

Good Intent Angling Society.—Our annual dinner took place on Monday last, at the Ryo House Hotel, sixty-three members and friends sat down to a most excellent dinner served up in Mr. J. Teale and Co.'s best style, and gave entire satisfaction. A most hearty vote of thanks was passed to him for the capital manner he carried it out. Mr. H. J. Tibbatts presided, ably supported by Mr. S. Mead, Mr. J. Close, Mr. E. Mardell, and Mr. Smyth. Dinner over, and cloth removed, the chairman proposed the usual loyal toast and was heartily responded to; then came the Good Intent Society, coupled with the name of the secretary, who responded on behalf of the society and was most heartily received. The chairman then appealed to those members who did not give prizes on distribution night, and his appeal was well responded to; close on £20 was given. A most hearty vote of thanks with musical honours was given to the chairman for the excellent way he fulfilled his duties, then everyone dispersed to enjoy the beautiful fine day, and were sorry when the time came to depart for home.—R. Murphy.

Grange Angling Society.—During the last week the following members have weighed in: Messrs. Sandilands, bream and roach, 16lb. 15¾oz.; Wood, roach, 8lb. 13oz.; Green, 5lb. 8¼oz.; and J. H. Rich, perch and roach, 11lb. 12½oz.—W. K.

Great Eastern Angling Society, Castle Inn, Leyton-road, Stratford New Town.—On the 16th inst. the members of the above club were at Hatfield Peveril to fish a pegged-down match, but sport was very bad. Only two members got weighable fish, Mr. B. Edwards winning first prize, and F. Bates second, leaving two prizes to be fished for.—S. F. Weaver, sec.

Great Northern Brothers Angling Society, Robin Hood, Southampton-street, Pentonville, N.—On the 16th the following members weighed in: J. Hewett, bream, 8lb. 9oz., and a jack, 4lb. 11½oz. taken on a tight line, roach fishing; W. Barnes, bream, 10lb. 5oz.; Wade, roach, 3lb. 9oz.; Theobald, roach and dace, 3lb. 7oz.; and W. Parkin, dace and roach, 1lb. 8oz. On the 17th inst. 10s. was collected for Mr. Smith's benefit (Bermondsey Brothers).—J. A. Fitch.

Gresham Angling Society.—An ordinary meeting was held last Tuesday, with Mr. W. B. Dippie in the chair. Mr. Bentley reported having caught roach in the Lea; Messrs. Fosbrooke and Norman, sixty flounders at Southend; Mr. Allen, several trout; Mr. Norman, nearly three hundred flounders in several days; Mr. Dippie, a pike at St. Margaret's; and Messrs. Dippie, Davison and Parker, dabs at Sheerness. Several members having been disappointed at not taking part in the competition at Sheerness, it was determined that it should be fished over again at Leigh, Essex, on the 15th Sept. The prize which had been presented was handed back, and another member offered a prize of tackle of the value of half-a-guinea. It was also agreed to recommend the committee to arrange a competition for prizes from punts in the Thames during the current half year, and a prize of some article worth half-a-guinea was promised by a member. Next Tuesday there will be some "Angling Reminiscences."—James Tayler, sec.

Hearts of Oak Angling Society, Portobello, Turville-street, Church-street, E.—On the 16th inst. another fair show of fish was weighed in, the following being fortunate: Messrs. Muller, perch; Braham, jun., perch and roach; Wells, roach; Bagshaw, sen., roach; A. Fish, roach and bream; Callcutt, rudd; Rhoden, roach and bream; L. Walford, bream and perch; Russell, roach.—W. Fenner, sec.

Hertford Angling Preservation Society, (G. E. R.) Station Hotel, Hertford.—Mr. Herbert Johnson, one of the members of this society, fishing in the open water at Hertford, on Monday last, took seventy-four roach and dace and one trout, and on Tuesday fifty-eight roach and dace and two trout. Such a take has not been had for some past, and shows the good effect of the society's efforts to preserve the waters.—W. Waller, keeper H. A. P. S.

Hoxton Brothers Angling Society.—A few of our members were out on the 16th inst. Mr. G. H. Wood weighed a handsome jack 10lb.; Mr. J. Row, one jack, 3½lb.—R. Ghurney, sec.

Independent Brothers Angling Society, Three Doves, 24, Berwick-street, Oxford-street, W.—On the 16th we fished off our match at Rye House, twelve members competing, with the following results: Mr. A. Pope, first, ten shillings; Mr. T. Morris, second, 8s.; Mr. F. Pain, third, 6s.; Mr. Nicholls also weighed in, but his solitary perch did not go the requisite length, so was disqualified. The remaining prize we will decide what to do with at our next meeting. Our visit on the C.D.V. List, on Wednesday last was, I am pleased to say, a grand success, which was mainly brought about by Mr. Harding giving us his popular reading, the "World of Waters," and which was received with much appreciation by his audience. "Old Izaak" occupied the chair, and Mr. Herbert faced him, and the best thanks of the above society are tendered to these gentlemen for assisting in making the evening pass so pleasantly. Seventeen clubs were represented, and the harmony was of a very good description, especially the songs rendered by Messrs. Taylor and Houghton, and Mr. Butler's recitation.—Snap.

Islington Angling Society, Jubilee House, Hornsey Rise, N.—At the meeting on Monday evening last the chair was occupied by the hon. treasurer, Mr. James Tayler, who exhibition a collection of tackle for sea fishing, and a very pleasant evening was passed principally in discussing the methods of using the many ingenious contrivances for marine fishing, produced by Messrs. Hearder and other makers.—C. S. B.

Islington Brothers Angling Society, Myddelton Arms, Canonbury-road.—We met on Thursday last, when our worthy host was balloted in, and another friend proposed. The following weighed in on the 16th inst.: Mr. G. Holder, roach and bream, heaviest bream, 3lb. 6¾oz.; Mr. H. Herbert, roach, 2lb.; Mr. W. Streek, roach and gudgeon. We are having a smoking concert for the benefit of Mr. C. Leach, on September 14.—J. H. Herbert, sec.

Izaak Walton Angling Society.—The return visit (No. 1 Eastern District), took place on Monday evening last. Mr. C. Hayward occupied the chair, Mr. William Wilkinson, the vice-chair; the meeting was well attended, fourteen clubs being represented. I am requested by the members to tender their sincere thanks to all who kindly favoured us with their presence. The next visit of the (No. 1 Eastern District) clubs, will be to the Mildmay Angling Society, Radnor Arms, King Henry's Walk, Ball's Pond. There are two special prizes, and a long list of extra specials to be competed for on the 23rd inst., competitors may choose their own fishing waters. Mr. T. Harris was the only member who weighed in on the 16th; he had some pretty roach, thus saving a blank.—H. B.

Jubilee Angling Society, Portobello, Kensal-road.—On the 16th inst., Mr. Tomkins had a few nice roach, best fish 1lb. ¾oz.; and Mr. Dunham, gudgeon. We enrolled two new members at our last meeting and had another one proposed. On the 23rd we fish a match for five prizes in the canal between Langley and Slough, first train from Westbourne Park or any subsequent train; two rods; all fish to weigh; but members must catch their own live bait after arrival, cease fishing at seven p.m., and return together or be disqualified. No member is eligible to take a prize unless he weighs in 8oz. of fish.—A. Ide, sec.

Lady of the Lake Angling Association, Queen of England Hotel, Shepherd's Bush.—It will interest members to know that the balance in P.O. Savings Bank has been increased to £25. Angling and honorary members are reminded of the punt competition to be held on the 23rd and 27th inst., members being at liberty to go to any part of the Thames. During the past week Messrs. Wilmot, Mason, Carter, Evans, and Master, have weighed in barbel, roach, and dace.—F. Salter, hon. sec.

Lincoln Angling Society, the Metropolitan, Winchester-street, Pentonville-road.—On the 16th inst., the following members weighed in some good fish: Messrs. Gramlick and Bligh, bream; Messrs. Webster and Watling, roach and dace; Mr. Ellingham, tench; Mr. Porter, rudd; Mr. White, roach. On the 23rd inst., we fish our match at Pulborough. Any member will be allowed to go down on Saturday night, but not to start fishing till the morning. Mr. Morgan has been made a working member.—W. Watling, sec.

Liverpool Angling Association.—Our last week's meeting was largely attended. Three new members were elected. A day's fishing on the 27th was arranged. Sport at the outing on the 13th was spoiled in consequence of the water, where the fishing took place, being, as it is termed, "broken," for this seems to turn the fish sulky, at least they will not feed. This is the second time we have had this kind of thing this season when we have visited really good meres. Success in angling seems to be at a low ebb everywhere, at least our members who have been here, there, and everywhere almost have had very poor catches.—R. Woolfall.

Marylebone Angling Society, Pine Apple, Carlisle-street, Edgware-road, W.—On the 16th our members were at various waters, and we had some good shows of bream, roach, tench, by Messrs. Penfold, Pearce, Milburn, and A. Clark. I beg to remind members they can weigh in fish from four o'clock Saturday.—W. F. Pearce.

Mildmay Angling Society, Radnor Arms, King Henry's-walk, Ball's Pond-road.—Our usual weekly meeting, took place on Tuesday, and there was a fair attendance. One more new member was made during the evening, and we still have a few more vacancies for gentlemen wishing to join us. The next return visit on the No. 1 Eastern Visiting List, comes to this club. It was decided that the date shall be on Monday, August 31. Secretaries of clubs please note this. I hope the members will all attend on Tuesday next, as there is some urgent and important business to bring forward.—J. Comber, sec.

North Lambeth Angling Society, 108, Westminster Bridge-road, S.E.—Three of our members were out on the 16th inst. Messrs. Roe, Rowles, and Dawes weighed in roach and dace. Honorary members can have their cards on application to—F. Wallis, sec.

North-Western Angling Club, Lord Southampton, Southampton-road, Maitland Park, N.W.—On the 13th inst., Messrs. Goodman, Ward, Pritchard, Lambert, Schultz, sen., Schultz, jun., and Weaver were elected on the committee. Mr. Ward had a good show of roach, one fish scaling 1lb. 1¾oz.; Mr. Schultz, sen., a show of perch; and Schultz, jun., dace. On the 16th inst., Mr. Plumpton, jun., had a nice tench. Our outing to St. Margaret's on August 30 will be by rail, for several prizes; gross weight; all fish bar jack; one rod; roving.—G. S.

Odds and Evens Angling Society, King of Prussia, Bevenden-street, Hoxton.—On the 16th, the following members weighed in at our headquarters: Messrs. Harrison, perch; Neville, dace; Bygrave, roach; and T. Forster, roach. Messrs. H. Forster and Potter also had a nice show, but did not weigh them in, arriving late.—J. Cuthbert, sec.

Peckham Brothers Angling Society, Prince Albert, East Surrey-grove, Peckham.—A match took place on the 16th inst.; and resulted in a good show of fish, Mr. Stidolph being first with a good show of tench; Mr. Brancher, second; Mr. Kemp, third; Mr. Steedman, fourth; Mr. Holt, fifth; Messrs. Gardham, Duke, Daniels, and Parsons, also having fish. The next visit on the Anglers Association Visiting List, goes to this club on Monday, the 24th inst., when we hope to see a good muster of anglers and friends.—A. G. Duke, sec.

Phœnix Angling Society, the Crown, Old St. Pancras-road, N.—On the 16th, Messrs. Elbourn, Heelas, Brown, Carr, Raymond, Mares, Foster, and Morgan, weighed in a nice show of roach, dace, bream and perch. On August 30, three handsome prizes will be angled for at Windsor. Conditions next Tuesday; and several more on September 6, at Marlow. All members please attend on Tuesday next at nine o'clock.—W. Elbourn, sec.

Prince Arthur Piscatorials, Golborne-road, North Kensington.—On the 16th, the following members weighed in fish, Mr. Rodber, one barble, 3½lb.; Mr. Buck, one barble, nearly 2lb.; Mr. Isaacs, tench and roach. We also had the pleasure of making two new members, and one hon.-member.—J. Harris, sec.

Prince of Wales Angling Society, the Globe, Lisson-grove.—There was a fine show of fish on the 16th, contributed by the following: Mr. Neal, chub, 6lb. ¼oz.; Brett, roach, 1lb. 13½oz.; Scott, roach, 1lb. 6oz.; Buckland, 8lb. 6oz.; Robbins, 3lb. 11oz.; Axworthy, 3lb. 1oz.; Crawley, Ivernee, Matthews, and Hayden, making a very creditable show. On Wednesday, three new members were proposed, and will be balloted for next Wednesday.

Reading Angling Association.—"Gudgeon Day."—The annual gudgeon fishing excursion of the members of this association was held on Monday last, the river in the neighbourhood of Tilehurst being selected as the scene of operations. Fishing began at noon, and although the weather was very unpropitious for the purpose, the afternoon being cloudy and showery throughout, sport was not altogether bad, the numerous punts engaged counting in an average of six to seven dozen sizeable gudgeon, with here and there a good perch. At 6.30 the competitors sat down to dinner at the Roebuck Hotel, Tilehurst, the repast being provided by Mrs. Noyes in first-class style. Mr. W. W. Ridley ably filled the chair, and Mr. William Ferguson the vice-chair. In spite of the weather and the comparatively poor sport, the day was most pleasantly spent.

Royal George Angling Society, the Hope Tavern, Tottenham-street, Tottenham Court-road.—Our outing at Cookham took place on the 16th, when only four prizes were taken by the following members:—Messrs. Webber, first; Holder, second; Bacon, third; Harris, jun., fourth. The remaining prizes will be fished for by the unsuccessful members on the 23rd. Go where they like. I beg to inform members that next Wednesday, August 26, will be quarterly night, and trust all members will show up for election of officers, and to clear the books, &c. Our new members, Messrs. Galloway and Phillips, have given three prizes to be fished for, the former 10s. 6d., for heaviest jack from Elstree waters, and 10s. 6d. for heaviest roach weighed in; the latter 10s. 6d. for heaviest bream weighed in.—F. C. Longland.

Royal Oak Angling Society, Royal Oak, Roman-road, North Bow, E.—Most of our members were out on the 16th inst., but the only members able to weigh in were—Messrs. F. Barrow, F. Barclay, G. Barclay, A. Barclay, E. Perry, Parsley, J. Yeo, J. Stanley, Henson, Cox, and J. Holden, with a very fair show of roach, perch, chub, and bream. On Tuesday last, we made one new member, and nominated another. Members please note that Tuesday, Sept. 1, is quarterly night, when I hope we shall have a full meeting.—A. Barclay, sec.

Second Surrey Angling Society, Spread Eagle, Stangate-street, Lambeth.—The fishing for the prizes on the 16th, at Amberley, resulted in Mr. Wood, first; J. T. Wright, second; J. Wright, third; W. Wink, fourth; G. H. Howard, fifth. The sixth, seventh, and eighth not taken, but will be fished for in the same stretch of water on the 23rd, under the same conditions. The two gentlemen—viz., Mr. Chas. Ellis and Mr. F. Birch—proposed last meeting night, were balloted for and duly elected members. I am very pleased to state that this club is increasing in numbers; in fact, we have more now than at any previous time since the club was formed.—J. Wright, sec.

Seymour Brothers Angling Society, 32, Chalton-street, Euston-road.—It is with deep regret that I have to announce the death, after a long and painful illness, of our esteemed member, Mr. John Coates, sen. The late member was a very successful competitor in competitions held on behalf of the Anglers' Benevolent Society. On the 16th a few members were out, with the following result: Messrs. C. Smith, jun., chub; C. Smith, sen., bream and gudgeon; W. North, roach and dace, 6lb. 3½oz. (one dace, 8¾oz.); J. Petrie, roach and dace, 6lb. 6½oz.; J. Barnes, roach and dace. On Monday, August 31, we take a visit on the Central. Secretaries, please note that on September 6, at Pulborough, in the Central waters only, we fish for six prizes; two rods. All members going are requested to give their names to the secretary before the day. The prize list is now ready.—S. Cane.

Silver Trout Angling Society, Bedford Head, Maiden-lane, Covent-garden.—On the 16th, we had a good show of fish, about 60lb. weight, contributed by the following members: Mr. O'Callaghan, bream, 21lb.; Mr. Cherry and Curtis, about 20lb. of tench; Mr. Kelly, one barbel over 5lb., perch and chub; Mr. Massey, one nice little carp, (4lb.), bream, roach and dace; and Mr. Geale, two bream from our club water, the largest just on 4lb. On Tuesday, we elected and proposed several new members. Just before closing the business Mr. Phillips arrived with a splendid barbel, weighing 10lb., which he kindly offered to the society for preservation. On the return of this fish from the naturalist, we shall be pleased for any gentleman to come up and see it.—Pelican.

Sociable Brothers Angling Society, Hope, Pollard-row, E.—We fished at Dagenham on the 16th for prizes, when Mr. Machin came in first; Mr. McQuinn, second; Mr. D. Marks, third; Mr. Dean, fourth, leaving two prizes to be fished for. The following members also weighed in fish: Mr. T. Jones, with a handsome show of bream and roach; Mr. Wells, with a tray of nice roach.—R. Spenceley, sec.

South London United Anglers' Visiting List.—The next visit on the above list will be to the Clapham Junction A.S., held at the Clarence Tavern, Winstanley-road, Clapham Junction, on Tuesday, Sept. 1, when I hope to see every society on the list present, for although this society has some long journeys to perform, they are always represented at every visit on the list.—A. Conn, hon. sec.

Stepney Angling Society, Beehive, Rhodeswell-road, Stepney.—On the 16th inst. we had a very good sample of bream, and a few roach, brought to the scale by the following gentlemen: Messrs. West, Jolly, Ruston, Woodford, and Nash. We engage in a competition at Dagenham on the 23rd inst., for several valuable prizes. We shall go down by private van.—E. N. P., hon. sec.

St. George's Angling Society, Prince of Wales, St. George's-road, Peckham.—The members of this society had a handsome show of fish on the 16th, amongst them being a nice bream, 4lb. 5oz., taken by Mr. Lang. We have several vacancies for members. Any gentleman desirous of joining this society should attend on Wednesday evenings at 9.30.—G. Hetherington.

St. John's Angling Society.—The members of this society competed for three prizes, on the 16th instant, at Shepperton; all the competitors had fish, but only one got the required weight to take a prize—viz., Mr. P. Leacock. The fourteenth annual dinner of this society will take place at the Swan Hotel, Fittleworth, Sussex, on the 30th instant.—F. Thorling.

St. Thomas's Angling Society, Waterman's Arms, Paris-street, Lambeth, S.E.—The members of the above fished Amberley, between Houghton Bridge and the Park Gates, on the 16th, but only one member was fortunate enough to take a prize from the five prizes of the club—viz., Mr. J. Booth, with some nice roach and dace. Messrs. Reeves, C. Fisher, A. Renvoizei; and G. Morton also weighed in some roach and dace. At the meeting it was decided that the remaining prizes to be fished for should stand over until next meeting night.—G. Morton, secretary.

United Brothers, Deptford.—The members of the above fished a pegged-down match on the 16th inst., in the Medway, for several money prizes, with the following result: Mr. H. Tyler, first prize; Mr. F. Beak, second; Mr. W. Tyler, third; Mr. G. Marshall, fourth. Mr. H. Fennell also weighed in some roach.—H. Tyler, sec.

Waggoners Angling Society, George and Dragon, Vauxhall-cross.—We fished at Byfleet, on the 16th, for three valuable prizes, with the following result: Mr. Clegg, first; Mr. Ilsley, second; Mr. Smith, third. Mr. Bird, jun., also weighed in. We had a fair attendance on the 28th ult., Mr. Smith in the chair, faced by Mr. Petty, *pro tem.* I wish to remind members that our prize list is still increasing. During the evening we were honoured with the company of Mr. Ryan and Mr. Allen, of the Kenningtonians.—H. C., hon. sec.

Waltonian Angling Society, the Cape of Good Hope, Albany-street, Regent's Park.—Fishing this season proves anything but a success; a few of our members have been out, but the takes were small. August 9, Messrs. Wallham, roach and dace, 9lb. 13oz.; R. Dodge, roach, 2lb. 3oz.; H. Putnam, roach, 1lb. 5oz.; W. Dodge, roach, 2lb. 6oz. August 16, Morris, roach, 4lb. 6oz.; Roland, tench, 2lb. 4oz.; J. Dodge, roach, 2lb.; Dodge, sen., roach, 1lb. 14oz.; R. Dodge, roach, 4lb. 3oz.—J. Packman, sec.

Walworth Waltonians, St. Paul's Tavern, Walworth, S.E.—The result of the competition on the 16th inst.: Mr. Hibble, first, with good show of bream, two largest fish, 3½lb. each; Mr. H. Lees, with splendid show of roach, second; third prize not taken. For the competition on the 26th inst. it was carried that it be open, public and private, punt or bank, for two prizes. First, given by Mr. H. Bayley, hat, value £1 1s.; second, cash, 10s. 6d., given by Mr. Shenton.—C. Hibble, sec.

Wellington Angling Society, Prince George, Hill-street, Walworth.—On the 16th inst., Mr. Cooper weighed in two bream 5lb. 4¾oz., 4lb. ¾oz., and 2lb. 6½oz. roach; total 11lb. 11½oz.; and W. Gordon, 2lb. 6oz., roach. Our host, Mr. H. G. Hills, has been having some sea fishing at the (Calf of Man) Isle of Man, taking a lot of mackerel and sea carp. Mr. A. D. Kidd, of Ackerman-road, Brixton, was proposed as a member, ballot to take place on Wednesday next. There is one prize to fish for on the 23rd; go where you like.—R. J. Dartnall, sec.

Wenlock Angling Society, Clothworkers' Arms, Arlington-street, New North-road.—We had a nice show of fish on the 12th inst. by the following members: Messrs. Smith, Parslow, Casey, Francis, Maples, and Fullbrook. Our next daily outing will take place at St. Margaret's, on August 30; roving; one rod only.—W. M., sec.

West Ham Brothers Angling Society, Swan Hotel, Broadway, Stratford. — Our members were out on the 16th inst., and the following weighed in: Messrs. Goodrich, 6lb. 10oz., roach; Marder, 1lb. 3oz., roach; Homer, 1lb. 10oz., roach; and Mr. Stevens, 1lb. 11½oz., roach.—R. Lowther, sec.

West London Angling Club, Dartmouth Castle, Hammersmith.—Members are reminded that Thursday week is our quarterly night, and are requested to attend early as we have some important business matters to transact, and to elect a new trustee in consequence of the resignation of our trustee, Mr. C. R. Stock. Messrs. Hare, Leaf, and H. E. A. Digby, have weighed in fish during the week. Mr. S. W. Digby had a fine take of Dace, with the fly, scaling over 8lb.—J. J. Hunter, hon. sec.

Woolwich Brothers Angling Society, Green Man, High-street, Plumstead.—On the 16th inst., we fished our match for a series of prizes, in most enjoyable weather, at East Farleigh, with the following result: (1) G. Starling; (2) G. Grimwood; (3) H. Smith; (4) E. Morley; (5) F. Cresswell.—J. R. Howcroft, sec.

Ye Pluckie Perche Piscatorial Society, Earl Derby, King Edward-road, South Hackney.—The usual weekly meeting was held on Wednesday, the 19th, Mr. Monro in the chair. Another new member was elected. Mr. Hesse, fishing on Thursday, the 13th, at the Ordnance Fishery, Enfield, had 5½lb. of good roach.—Henry Richardson, hon. sec.

AFTER A DAY'S FISHING,
Call on TIBBATTS,
AT "THE CITIZEN," 70, HOUNDSDITCH
(OPPOSITE BISHOPSGATE CHURCH),
Two minutes walk from Liverpool-street and Broad-street Stations.

REPORTS FROM RIVERS, LOCHS, &c.

Time of High Water in the Thames.

To find the time of high water in the Thames at any of the following places, to the time of high water at London Bridge given below,

Add 30 min. for Chelsea.
Add 40 ,, ,, Putney.
Add 45 ,, ,, Hammersmith.
Add 50 ,, ,, Barnes.
Add 55 min. for Kew.
Add 75 ,, ,, Richmond.
Add 80 ,, ,, Twickenham.
Add 85 ,, ,, Teddington.

Example:—If it is high water at 2 o'clock at London Bridge, it will be high water at Teddington at 3.25 or 85 minutes later.

N.B.—A strong wind up-stream accelerates the tide very much, and one down-stream retards it.

English and Welsh Reports.

The Lower Thames.—General Remarks.—There is a great evil existing in all portions of the Thames at the present time which is very much on the increase, and that is the practice of young children with nurse-maids with a gauze net and a long handle catching the small fry in the river. I received a report on Saturday morning last from a gentleman complaining about it, and he said in one bottle alone there should not be less than two hundred small fry of roach and dace. I made it my business to go over at once to the head river-keeper at Kingston to request him to give his attention to the matter, and he informed me it was giving him much anxiety, and Mr. Alfred Nuthall had also spoken to him on the subject. He had taken the nets and bottles from the children, who wept bitterly at the interference, but that was no matter. It is not one of those things to take legal action on, though it is an illegal offence, as it would not do to bring such youngsters before a bench of magistrates for what some would say on a very trivial matter, and taking a lenient view put it down as only a piece of amusement. It is not so, however; if anyone wants to purchase even the fry of roach and dace let them inquire the price, and then again which is of the greater importance, these baby fish are to keep up the stock in the river and to grow up to a size to afford sport for the anglers, and in many instances as food for their families. In my opening remarks I said all portions of the river, and I did so because on going up the Thames to Wedmenham on Monday last I not only saw the same thing practised, but my attention was called to by my friends on the launch. I have given instructions to get the names of the parents, and it will become a question of having some small handbills printed setting forth the illegality of the practice, and the fines that can be inflicted for the violation of the bye-laws in respect to the sizes of the fish and that of using the net.—B.

Richmond.—Henry Howard, in the three days, 30lb. of roach and dace; Henry Mansell, 40lb.; J. Brain, in six days, 35lb.; a gentleman in a private boat, in two days, 30lb., and one perch.

Twickenham.—Samuel Cole, one day, 22lb. of roach and dace and one barbel; another day, 15lb., one bream and one perch; another day, 10lb.; and in two other days, 22lb.; J. Coxen, in two days, fourteen dozen of roach and dace; G. Coxen, in five days, twenty-six dozen and eleven barbel; R. Coxen, in two and a-half days, 24lb.; J. Frost, in four and a-half days, 70lb., two barbel, and one bream; Richard Moffatt, in the same time, forty-three dozen and a couple of bream; John Spong, in six days, 85lb., five bream, and three barbel; and F. Wiggins, in two days, twenty-one dozen.

Teddington. — Joseph Baldwin, in two days, seven dozen of roach and dace, one jack, and two barbel; B. Stevens, fourteen dozen of roach and dace. The bank anglers have been doing well with roach, dace, barbel, chub, bream, and a few perch.

Kingston.—John Johnson, in four days, eighteen dozen of roach and dace, five barbel, two jack, and a perch of 2lb.; J. Wilkes, during the week, seven dozen of roach and dace, twelve dozen of gudgeon, three bream, and one brace of jack; N. Bolton, in six days, forty-two dozen of roach and dace, and one barbel of 4½lb.; Mr. Sands, in one day, four barbel, the largest 6lb.

Sunbury.—Messrs. T. and A. Stroud, during the week, sixty barbel and thirty jack, the largest 6½lb.; E. Milbourne has been getting a nice quantity of roach and dace; Edward Clarke, in one day, nine bream; H. Pizzey, in three days, six dozen of roach and dace, and a barbel of 3lb.; Mr. Davis has taken a trout of 3¾lb.

Walton.—Mr. Darling and friend, fishing with A. Laney, in three hours, ten and a-half dozen of roach and dace.

Weybridge.—Mr. Leaf, during the week, fishing with Herbert Carr, has taken forty dozen of roach and dace, the largest roach 1lb. 2oz., two perch, the largest 2lb., and one brace of jack, all roach fishing.

Chertsey.—John Poulter, one day, with Mr. Watt, eight dozen of roach and dace, and in three other days some fine chub and barbel, and ten dozen of roach and dace. L. Hackett, in three days, fifteen dozen of roach and dace, and six barbel. Henry Purss, in two days, twelve dozen of roach and dace. A gentleman fishing with H. Little, four dozen of good roach, and a barbel of 4lb.

Staines.—John Keene, jun., one day with Mr. Harris, thirteen barbel and five dozen of roach and dace; another day with Mr. Richings, twelve barbel and two chub; another day with Mr. Edwards, of the Clapham Junction Angling Society, four barbel and five dozen of roach and dace; another day with Mr. Dyer and friend, nine barbel and three dozen of roach and dace, and another day with Messrs. Wilson, eleven barbel and six dozen of roach and dace, the largest barbel 4lb., and the largest roach 1lb. 6oz. All of these have been taken on roach tackle.

Upper Thames.—The rain, it raineth every day, but as yet makes little impression on the volume or colour of the Upper Thames. The river is in excellent fettle for any and all summer angling, but the execrable weather prevents visitors, angling or otherwise, from putting in an appearance. Barbel are well on the feed, and those who do not mind being ornamented with waterproofs and sou-westers, are having high jinks of it. Three takes this week at Maidenhead, Marlow, and Hambleden, going respectively, 36½lb., 54½lb., and 72lb. Lob-worms can now, I believe, be had from Nottingham, clean and bright, at two shillings and sixpence per thousand, and gentlemen wishing to get really good sport on the Upper Thames should devote a day or so in seeing that the swims selected are properly baited, otherwise thousands of worms are simply swallowed at the bars of public-houses, the selected swim as a rule, is not to be depended upon or unknown fishermen.—Marlow Buzz.

Thames (Windsor).—As might be expected, water keeps in good order, and the heavy showers which fell here on the 19th inst. must still further improve it. Some fine specimen fish have again been caught; but it is a pity the perch are not returned to the Thames, for at least this season, one lady angler had five weighing 4lb., and several smaller have been taken and detained. I weighed a handsome barbel, 7lb. 7oz., which was caught whilst roach fishing round one of the buttresses of Windsor Bridge, by Mr. A. E. Harhard, of Eton, which, if not beaten, will secure the local prize, value about three guineas. Mr. Bailey, of Eton, also had a good one of 6lb. 10oz.; and Mr. Smith, of Park-street, Windsor, out with James Gray, four, weighing 9¾lb.; Mr. Woodall, of the Friendly Anglers, London, has taken an extremely handsome roach of 1lb. 10oz., which should secure him first place in this class. Another fine specimen was one of 1lb. 1oz., caught by Mr. G. Harbard, of Eton. Mr. C. Taylor, of Windsor, whilst roach fishing one evening, had a brace of barbel, 6¼lb., the evening before, having a very large one on for an hour and a-half, eventually breaking away. Chub take gentles, slugs, frogs, and greaves well, but will not rise to flies so well. Mr. Thomas, of the "Christopher," Eton, with bunch of gentles, had a nice basket, weighing 13lb. A few jack have been caught, Mr. Herbert, of Windsor, a few nights back having his thirty-third fish this season. Gudgeon coming to rake, and well worth trying now. Messrs. Smith and son, of Park- street, Windsor, on the 19th inst., between three and seven p.m., six barbel (largest 3½lb.), all on roach tackle; also 6lb. of roach and dace—B. R. B.

Ancholme District.—The elements remain unsettled, but they have been a little more favourable to angling. Your correspondent had a nice catch of sixteen well-fed trout on a local stream one day, and Mr. A. Ford, of London, fishing another water, had six on the same day. Other small catches have been made on the Laceby and Barnoldby streams. The Grey Goose Dun is giving a good account of itself. It is made as follows: Body, lead-coloured silk; wings, starling's quill, varied in shade with yellow and straw-coloured bodies, and rather lighter hackles. Grayling anglers in other districts should note that this is one of the very best grayling flies up to the end of October. Some heavy catches of coarse fish have been made on the Ancholme. Messrs. Summerson and Clark had a basket of one hundred and eight roach one day, and Mr. Crossland, a fine lot on another, the largest weighing 1lb. 11oz. Two or three minor matches have been fished. I overlooked the reporting of one last week, the record of which is rather exceptional. I give it now. The Universal Angling Association, of Hull, fishing a match at Ferriby Sluice, took a total of 10st. 9lb. 10oz. of fish. The chief prizeman, Mr. Jevons, had 29lb., Mr. Phillipson, 16lb., and Mr. W. Hall, 15lb. 12oz. One Sheffield angler had 1½st. of good fish on Saturday last.—Thomas Ford.

Arun (Pulborough).—Notwithstanding the large quantity of rain which has been experienced in Sussex lately, the river still keeps in a bright state. Under such conditions, one would naturally think that anglers were doing nothing; but I am pleased to be able to report that the contrary is the case. Bream and roach have been fairly on the feed, and some nice catches of these fish are reported. Mr. Palmer, who did so well amongst the bream in the Central Fishery a short time ago, has been again very successful, having made a basket of the golden gentlemen scaling the respectable weight of 14lb. One of the fish was, I understand, 3½lb. On the 16th inst. the special anglers' train, run by Mr. Eldridge, was crowded with the fraternity, and although many fishermen drew comparative blanks, still a number managed to get hold of some decent fish. Several of the London clubs held matches on the river, with the result that the trays at their respective headquarters were well filled in the evening. More large fishing competitions are to be held here by the London club men, the dates of which, I think, I shall be able to give next week. I hear also that there is to be a match on the Arun, at Amberley. This will, probably, not take place till October, a very nice time for the red fins. What do you think, Mr. Roachpole?—Goosequill.

Barle (Dulverton).—The river remains in fine order for fly or minnow. Some salmon up. Cloudy, with heavy rain and cold. Uprights and Moor Palmer killing flies.—B. C. Marshall.

Chichester Canal and Sussex Rivers. — Storms have been prevalent during the week, and rivers are fast regaining their normal height. The members of the Brighton Anglers' Association competed on the Ouse for six special prizes on the 16th. Mr. Laurence secured first place with 8lb. of roach; the largest fish weighing 1lb. 7oz. The other prize takers were Messrs. Kempshall, Pain, Wingfield, Stapleton, and Sweetman. Thirty members competed. Mr. A. Stapleton fishing last week in the Adur, lost rod and tackle, evidently taken by a carp. Dace and roach have given sport in the Adur, and from the Rother, roach up to 1lb. 5oz. have been taken. Bream and roach have given sport at Chichester Canal, but the heaviest bream recorded was of 2¾lb. Some fine roach are notified me from the upper waters of the Ouse, three fish, weighing 3lb. 2oz.—George F. Salter.

Derwent (Ambergate).—There has been little doing on the Derwent during the past fortnight owing to the persistent rainy weather, which has kept the stream at too high a level for fly-fishing. The weather now fine and more settled, and prospects look favourable for the end of the week, best flies Cinnamon and Brown Spinner, and Yellow and Ash Duns. Coarse fishing fairly good, both in canal and stream.—Amber Dun.

Dove and Tributaries.—The Dove and the smaller streams hereabouts have all had a heavy colour on the earlier part of the week, and the fish have been gorged with bottom food in consequence. On Friday evening last, Mr. F. Wilson again met with first-rate sport, a bag of six brace being made in less than one hour, these with the Turkey Brown, used at twilight, on the Birdsgrove Club water. Mr. C. Closo has done well on the Upper Dove and Manifold, up near Hartington, with the Kill Devil Devon during the past ten days. As a proof of the stock of fish in the Dove, and in at least one of its unpreserved tributaries, the following is valuable. A keeper named Ward has been given a chance to test the Norbury waters' stock with the live minnow as an experiment only. The result proved a heavier catch than would be credited by the reader were it named. One fact alone will be sufficiently striking, and that is this: twelve grayling were brought to the net at one standing. "That's a real whacker!" exclaims the sceptical consulter of this column; but, Sir Sceptic, *it is true*, as is also the following astounding piece of information: The mill dams at Itwiston, on the Henmore, an unpreserved brook that runs through Ashbourne. The water was run off with a view to get out sundry pike and heavy trout suspected to be damaging the young stock; the result being sixteen trout, weighing in total 60lb., an average of 3¾lb. each; and only six smaller fish not included in the sum total of trout. The largest trout of the sixteen was 5½lb. A few grayling averaged 2¼lb. each. There were also a few pike, but not of great size. The average size for trout in this district is usually quoted at ¾lb. The Henmore Mill Dam average and the average shown on the Norbury water is much above this. It follows, therefore, that the average size of the river's stock is much higher than is usually credited. The average stock size and fly-killed fish sizes are a totally different thing.—D. and W. H. Foster, Ashbourne.

Esk (Whitby, Yorkshire).—Angling.—Since our last report the river has been rather too low for good sport, but on Wednesday the water was in better trim. Mr. C. J. Keighley landed two salmon, weighing respectively, 5lb. and 6lb.; Mr. William Readman (Brunswick-street, Whitby), one of 6lb.; Mr. William Harland, one of 14lb.; Mr. John W. Nicholson. one of 4lb.; Mr. J. R. Wallace, of Glaisdale, two, of 4lb. and 7lb.; Mr. E. R. Duffield, Wimbledon, four, of 2lb. 3lb., 2lb., and 4lb. Amateur Sea Fishing. — There continues to be splendid sport for amateurs in the roads about a mile from the shore, as ther is also from the piers and quays by the harbour side. Fish, such as gournard, whiting, dabs, and billets, are abundant, and, indeed, it is many years since fish of all kinds were so plentiful. A couple of anglers may easily catch from a boat some three or four score of fish of various descriptions in the course of an hour or so. It is capital fun, and somewhat exciting, at times, and appears to be immensely enjoyed, especially by the visitors sojourning at Whitby for the season. J. J. Jackson.

Fen Waters (South Lincolnshire).—The continued rains had brought the fen waters into a capital state for angling, and the weeds having been kept down pretty well by cutting, there has been a better chance of sport than before experienced. The finer weather has also been encouraging. Roach of a good size are now coming to hand more freely, gentles and paste being both good lures. Perch are also being taken mostly with small worms. Some good specimen fish of the latter class have lately been taken. Another perch of over 2lb. is reported as having been taken on the Aslackby Fen. Dace and bream are also on the feed. The latter are to be taken freely, I am told, on the Welland, and on some of the waters running into it. Not much trolling has yet been done, but pike will soon be a leading article.—LIMPET.

Idle (North Notts).—More settled weather has led to better sport in the district of the Idle. Numbers of fishermen have been patronising the river about Broom Hall, Bollam, Tilne, &c., whilst the canal at Hayton, Clayworth, Wiseton, has had many patrons. Fish are in good condition. The water is in good colour, and owing to the better flow there are less weeds floating through the swims than usual. Anglers still report trout in the semi-public waters, and certainly some good fish of this class have been met with, since the rainfall, a good way down the river, Some nice dishes have been lately taken in the upper water towards Eaton and Elkesley, but these are chiefly from preserved lengths. In the lower district trolling is being added to the bottom fishing.—L.

Lake District.—The rivers and tarns throughout the district are now in fine fishing order, the high waters of a week ago having been kept up by heavy showers daily. As a consequence of this, fishing has been generally good, with large quantities of fish. Sea fish have been running for some time, and the nets at Low Levens have been fairly successful. In the Bela, on Wednesday, Mr. Huddlestone (the oldest member of the Bela Fishing Association) had 10lb. of nice trout, and Mr. Titterington, a pannier not far short of that weight. Some nice fish have been taken in the Rothay—one of 2lb. and a few of 1lb. each.

Lea.—The water in the navigable river is now in full force again and some good sport should shortly be had, as the fish will soon recover from their enforced idleness during the time the water was drawn down; the weeds have in many places been settled and consequently there are plenty of clear swims now to be found. I spent an hour to-day (Thursday), watching Mr. Bennett casting the dry fly in the Ferrie Boat waters, both roach and dace were very plentiful, but appeared to be feeding on the duckweed which was being blown up stream; Mr. B., however, was not to be denied and took a dozen or two nice roach and dace; some few roach have been taken here by the bottom fishers. We hear good accounts lately of barbel being taken from the Thames; why they are not more fished for in the Lea I cannot understand, as I know they are plentiful enough in many places I could point out, but, of course, to be successful it would be necessary to bait up for them a day or two before fishing; lob-worms are now so easily to be had, that it would be worth any good fisherman's while to go to the trouble and expense. one of this species of over 3lb. was taken at the beginning of this week at Games's Fishery; plenty of perch and a few chub have also been caught here. In the open waters at Cook's Ferry, sport on the 16th and 17th was fairly good amongst the chub, roach, and dace, an eel of about 2lb. was also taken; but they have been running badly lately. As far as I can learn jack have been difficult. to catch and nothing of any weight has been taken, but this is generally the case at the beginning of the pike season in the Lea. Perhaps a flush of water which seems from a persistent downpour to-night (Thursday) to be imminent, will put all kinds of fish better on the feed.—SPLICED JOINT.

Leicester.—The approach of autumn is indicated by the closing of the days, which causes anglers to be more anxious to avail themselves of the best period of the year for all-round fishing. The weather has been everything in favour of anglers of late, the occasional showers keeping the waters in the best of condition. The preservers near Leicester and at Aylestone have been well and successfully fished, anglers rarely being out without getting fair baskets of spoil. Pike, perch, roach, and dace, have each been caught pretty freely, and the best baskets that were shown were those of Messrs. C. Lings, H. Prime, W. Dewick and A. Bacchus. Pike fishing has shown a more decided improvement, and all along the waters anglers are having sport. Mr. Bates took one specimen 4½lb., and Messrs. Prime, Moulding and others had a few brace each. Dace fell in good quantities this week to the share of W. Hobbs up to 10oz., and eels continue to give anglers plenty of sport and frequently trouble. One nice fish 2lb. 8oz. was taken by Mr. W. Smith. The waters in the pleasant rural districts are receiving ample attention from Leicester anglers, the Weake and Narborough coming in for the greater share. The Weake has yielded excellent roach and bream, and a good brace or two of pike.

Loddon (Earley).—Some very good sport has heen had during the past week. Whiffing for chub, some very nice fish have been taken, the heaviest scaling 4lb. Also several good baskets of roach. Fish feeding well, and water in splendid condition.—J. R. GOULD.

Lugg and Arrow (Leominster).—Both these streams have been improved a little by the rain which fell this week, but it has not altered the colour of the water. The rivers are getting very foul, and a good rush of water is wanted to clear them out. Since the rain the fish have moved better, and some very nice trout and grayling have been taken. Fly-fishing has been good. Wasp grub fishing has accounted for some good trout. Minnow fishing has been successful. The Pinsley is low and clear.—GWYNNE.

Lugg, Arrow, and Pinsley (Kingsland).—Heavy storms of rain on Monday caused a slight rise of less than 2in., but did not stain these rivers. Fish are very sulky, owing no doubt to the unsettled state of the weather. Few rods out. Nearly all the autumn flies have appeared. The best should be August Dun, Blue Gnat, Silver Dun, July Gnat, Red Tag, Ginger Moth, and Spinners. A fresh to cleanse the bed of the rivers would be welcomed.—R. T. WILLIAMS.

Medway (Tonbridge).—The river is still very low and in consequence of the uncertain weather fish are not so well on the feed as they should be. However, on well-baited swims roach and bream are on the feed, and chub rise well at the fly. What is wanted is a little settled weather and then all would be well.—YE MEDWAY WATER RAT.

Nene (Northamptonshire).—A good basket of roach was on Saturday obtained, near Castor, by Mr. Rowell, of Peterborough, the largest fish was a plump specimen of over 1½lb., and the total take forty, and few small ones. A tortoise nearly a foot long, was taken from the Nene, near Dog in a Doublet Bridge, Whittlesea, last week. It was observed crawling along the bed of the river, and was taken out by a boatman. A lad fishing from a lighter at Peterborough, fell into the river and had a narrow escape of drowning, and, instead of his fishing for roach, Mr. J. Hemmant had to fish him out. When rescued he was unconscious, but his hand firmly held a small clay pipe, which he had been smoking. A few perch have been taken this week, also several bream, but nothing very heavy.—NENEBANK.

Ouse, &c. (York).—The heavy rains in this part continue to interfere with angling in the Ouse, which is still running a thick brown muddy colour, and very little is being done with the rod. A little better sport is being had in the Derwent and Foss. As these heavy downfalls cease, and the rivers begin to clear a little, we are looking forward to the good results which must follow this "washing out" of the rivers and streams. The only sport now practised with any degree of success is the up-stream fishing with worm or minnow, chiefly in the Rye, Dove, Costa, Upper Derwent, and other streams of the North Riding. There will be very little fly-fishing until the streams clear themselves to allow of surface feeding. The rains of the past week have had a most disastrous result on the Ouse salmon fisheries, Large quantities of polluted water from the Aire have been forced into the Ouse, and there has been a great destruction of fine salmon. As this has occured just at the height of the salmon fishing season, which is rapidly drawing to a close, the loss to the licensed fishermen of the lower Ouse will be very great.—ROLAND.

Ouse (Huntingdon).—Anyone wishing for good bottom-fishing should not miss the present opportunity, for the bream are feeding well, and some good takes have been had during the week. Two local anglers landed 4st. of good fish in one take, including one of 3lb. 14oz., and two more landed 60lb. of good fish, the largest a fine one of 5lb. 4oz., and several others have had good sport. The water has not been in better condition for years, but good roach are not feeding well; plenty of small ones have been taken with wheat. Prospects very good. Perhaps it will be interesting to anglers to state that it is a grand sight to see the bream pryming in the evening. The river appears to be full of bream, they are continually rising the whole evening till dark.—H. ROUT.

Plymouth.—SEA FISHING.—The Sound is now full of mackerel, and the shoals can be seen daily disporting themselves on the surface of the water, feeding on the brit, of which there is an abundance. Railing for them is the best mode of capture, either sailing or rowing pretty fast, using a twenty-four line, and from ½lb. to 2lb. sinker, according to the speed of the boat. A long trace, of some three or four fathoms of gimp and gut below the lead, and a Silver Spinner, launce, brit, or other attractive lure. Some half-a-dozen lines can be used at a time from one boat, using different weight leads, and thirty or forty dozen are taken sometimes by a boat thus equipped. Now is the time for the bass fishing off the Breakwater and Penlee and Rame Heads, and several have been taken through the week with the "Plano-Convex" and spinning sand-eel. Mr. M'Bryde, who caters so liberally with his steamers, is running them now at intervals to Cawsand, calling at the Breakwater mornings and evenings, so that you can be landed at the Breakwater or Cawsand early in the morning, and can return by the steamers in the evening, for the modest sum of sixpence. This gives you the best part of the day for fishing at either of the points named above. The gear necessary for this kind of sport is an old salmon or pike rod, 60yds. or 80yds. of fine, but strong, line (the Japanese superfine flax is cheapest and best), some salmon traces and swivels, and the various baits, such as minnows and artificial sand-eels, or any old, gaudy salmon flies that may be gone too far for the "king of all fish." Some who are not *au fait* with the rod use the throw-line off the rocks, and the men at the Lighthouse often take some nice fish in this way. The pollack are still attracting the attention of the small boats in the Sound, and the fish taken are much larger than usual, some being as heavy as 7lb. or 8lb. The largest fish are taken on the artificial india-rubber sand-eel, either red or black mounted, on the double-curved hook, with swivel at the head to give them a spin as they are drawn through the water. Although more fish are taken on the worm, yet the largest are taken on the india-rubber sand-eel. The usual pouting and blain fishing is to be had at the slack tides, either at high or low water, in the pit of eighteen and a-half fathoms off the white patch at the ladies' bathing place, using a chopstick with two hooks, baited with mud-worm. Eight to twelve dozen a boat is an average catch in a few hours.—WILLIAM HEARDER.

Potter Heigham Sounds (Norfolk). — Angling that beautiful fish the rudd, is now in full swing here, and last week a great capture was effected by three members of the Friendly Anglers' Club, London. If my information is correct they caught over 60lb. weight, some of the fish being 1½lb. each. This week, however, has not turned out so successful for visitors to this renowned fishing resort. In addition to very unsettled weather, boisterous winds have prevailed, and the rudd have not fed at all well. Worms are the best bait to use, but on Monday Messrs. Dyer and Feaks (of the Mildmay Angling Society, London) did fair execution amongst the perch with gentles, which also accounted for several small rudd. Anglers visiting the sounds for the first time will think them an extraordinary place. In the first instance the water is only about two feet deep and the bottom is covered with weeds. There are no holes, so it is not advisable to spend half the day in rowing about to discover them. I should advise my friends to fish on the weeds—say a foot or a boat and a-half deep—with brandlings or very small lobs, and if they fail gentles, as there are some thumping roach roaming about. —GOOSEQUILL.

Severn and Lower Teme (Worcester).—Both streams in fine condition, and the fish rising well at the fly. The Red Spinner, Red Palmer, Blue Dun, Black Gnat, and Little Green insect killing well, and good baskets of trout and grayling have been taken. The bottom fishers have also had excellent sport with Wasp Grub, Maggot and Worm. Roach having been taken over 1½lb. weight, and chub from 2lb. to 3lb. each; there have also been some nice jack of from 4lb. to 5lb. weight, taken with the live minnow in the Severn.—WINGFIELD.

Severn (Shrewsbury).—We have had some very good fishing weather—south winds and light showers—and the river having been in fair condition, a goodly number of trout have been taken, though nothing very heavy. Messrs. Frost, Perkins, and Dutton have been pretty successful, and I hear that the former last week captured a heavy trout. Mr. A. Williams had a good day at the beginning of the week, capturing with the spinning minnow, eight trout, all between 1lb. and ½lb. each. As the river and brooks are running clear, and there is promise of good fishing weather, anglers should be pretty successful, especially as the trout are now beginning to move again after the long holiday that they are wont to take in June and July.—PISCATOR.

Taw (North Devon).—River higher than ever this year, and salmon and peal are up. Mr. Batson caught some this week. Rev. Mr. Wilson, Mr. Truscott, Mr. Reed, and the "Raker" all got some good sport. The rain does not cease, and it is feared the corn will considerably suffer. Shooting cannot commence for some time. One gentleman told me he took only forty-one on Wednesday. Two others caught some nice fish on Monday, in the Bray. Some good sport has also been had at Lynmouth. Should the rain cease, fishing will be very good, and it is hoped the snapping of the trout through the year will turn to their more readily hooking to the fly.—RUSTY GAME.

Teme (Ludlow).—The Teme in this district is still running in nice order for angling, being a nice level and clear. Heavy rain fell at the beginning of the week, but it made little difference to the water, and has improved it. The fish have been moving better, and have rose freely at the fly.—S. LUDLOW.

Thurne (Potter Heigham).—Many anglers have been out lately along this river, fishing for roach and bream. As regards the latter fish, few have been landed, but several fine shows of roach have been obtained, the water being in excellent condition. The weather, however, has been somewhat unsettled and windy, and as may be imagined bad luck has fallen to the lot of many a disciple of Old Izaak. I have seen several London club anglers out here this week. There have been Messrs. Feaks and Dyer, of the Mildmay; Mr. Arthur Matthews, of the New Albion Piscatorials; and Mr. B. Matthews, of the Marlborough; and on Monday these gentlemen accounted for some good baskets of roach and perch. There are some splendid fish in this river, and I should advise anglers visiting Great Yarmouth to give it a trial. The best baits just now are boiled wheat and worms. Gentles are also worth trying, but the best roach come for the boiled wheat. There is also a chance of taking bream with the bait.—GOOSEQUILL.

Trent (Newark).—Roach fishermen are meeting with most success in the Newark district, creed malt and gentles being the popular baits, and from the upper portion of the Rolleston fishery some capital sport has resulted. Pound fish are common, and on Tuesday evening Mr. T. Lees showed 22lb. at the club-room, several over the weight mentioned, Mr. D. Slater also having a nice sample up to 1¼lb. each; but it is from the Muskham water that the roach of the week, and perhaps of the season, has been secured, Mr. Croom showing one weighing 1lb. 10oz, a really good specimen, which has been sent to Messrs. Cooper and Sons for preservation. A slight rise of water on Wednesday brought down an immense amount of loose flannel-weed and rubbish, and the fluctuating water has a detrimental effect on barbel fishing, but few have been taken during the week. On Saturday last the Newark Piscatorials journyed to Collingham for their annual outing. Thirty-four took part in the match, eighteen of whom secured fish; but with a gale blowing, small takes were general, Mr. R. Dale securing premier prize with 3lb. 6¼oz., and thus becomes the holder of the silver challenge cup for the ensuing twelve months; Mr. David Slater, second, with 3lb. 1¼oz.; and Mr. J. Longdown, 2lb. 9oz., third. Trent in good order for either malt or maggots; but plenty of ground-bait is necessary to ensure sport. Wind west.—TRENTSIDER.

Witham, &c. (Mid-Lincoln).—Most of the leading station along the river and about the drains towards Boston have been patronised by what are known as club matches. The success of this class of fishermen is but small, and only by luck rather than intent are anything like decent takes obtainable. This largely arises from the undue quantity of bait of one sort or other that is being put into the water. No fish get more profusely fed than these during the club match season. Anyone will know the result. If these fishermen could by any means be induced to leave all bait behind save just a few gentles and a few well-scoured worms for hook-baiting only for a month capital baskets would be made. As it is, splendid roach are now and again landed, and so also bream, but quantity is wanting.—LUCI.

Witham (Dogdyke, Lincolnshire).—The angling at this place has been, on the whole, fairly good for the last few days, particularly for those who understand very light bottom-fishing. Mr. W. H. Robinson, of Sheffield, caught on Monday last about 4st. of very fine roach. He had fifty-six fish, and on the Tuesday following be had seventy-four fish, of a total weight of 4st. 10lb. All these were caught with creed wheat on very fine gut. Another gentleman from Leeds caught several pike, the largest fish weighing 14lb., with live-bait. All the above were caught in the waters opposite the Packet Hotel from a punt. Anglers cannot do better than try this place, as it is very quiet and not over-fished, and excellent accommodation can be obtained at the hotel mentioned above, kept by mine host Mr. Benjamin Watson. I may add that there are any quantity of good bream in these waters.—H. BENNETT.

Wye and Derwent (Derbyshire).—The quantity of rain we have had has kept the Derwent in a discoloured state, and only on Wednesday last was there any possibility of fly-fishing, and a few brace were killed on that day. The Wye has not been very good this week for sport, and only small baskets have been made. The Darley and Matlock waters have afforded good sport for the bottom fishermen. Mr. Gibson, of Manchester, had a basket of five brace on Wednesday, several heavy fish amongst them, the largest scaling 2¾lb. Mr. F. Ogden and Mr. H. Cooper have also had good sport in the evenings—two and three brace each. Flies now killing are Yellow and Apple Green Duns, Jenny Spinner, and Little Blacks.—DOTTEREL.

Yare (Norwich).—From Stalham, which is connected with Barton Broad and the Ant, comes excellent reports of visitors doing remarkably well, and catching fish in numbers, weight, and also size, that would do credit to local anglers; this is very pleasing news, as strangers sometimes think we are not exact in our tips about the sport obtainable on some of the Norfolk waters.—ROBERT MOLL.

East and West Cleddau (Pembrokeshire). — Although the rivers keep rather low, trout rise fairly well towards evening. A local angler took a very nice basket of trout a few evenings ago in the East Cleddau. The Hare's Ear and Rough Blue continues good killers. —H.

Lake Vyrnwy (North Wales, via Oswestry).—During the past week we have had an abundance of rain, which has put the lake in good order for the remainder of the season (Sept. 15). Every day some very nice baskets have been made, Friday being the best. Most successful anglers: Captain Stevenson, thirty-eight trout, 27lb.; Mr. A. Busk, thirty, weight, 24lb.; Messrs. Flint and Robinson, forty-seven, weight. 38lb.; and Rev. G. S. Rogers, in a day and a half's fishing, twenty trout, 13lb. 6oz.; Mr. Flint's basket of seven, weighing 7lb. 6oz., on Thursday was very much admired on the "weighing" table, heaviest fish, Mr. Bullock, 1lb. 9oz. Best flies: Heckhum-Peckhum, Golden Dropper, and Zulu.—LONG DRIFT.

Teifi (Lampeter, Cardiganshire).—The river continues in first rate fishing order. Two or three salmon were caught last week, from about 10lb. to 15lb. each. Trout fishing has been chiefly confined to worm or minnow fishing—but we are now anticipating a renewal of the fly, with the March Brown and other spring flies to the close of the season. Just at present, salmon are not taking the fly at all well, but merely appear to follow it, as if out of mere curiosity.—H.

Usk (at Usk).—Several slight freshets have taken place in the river during the past week, but angling for salmon have noways been checked, and capital sport has been obtained. To-day (Thursday) the water is at its strongest, but the rise being a clear one, anglers can go out. There is every prospect of a good fortnights' fishing in consequence of the ground being fairly well saturated from the heavy storms. On Friday last Colonel Waddilove caught a salmon of 13lb.; Colonel Rocke, one, 8lb.; Mr. Gardner, one, 6lb.; Mr. Cole, two, 7lb. each. On Saturday, Colonel Rocke, two, 4lb. and 8lb.; General Mignon, one; Mr. Brown, one, 7lb.; Mr. Gardner, one, 6½lb. On Monday, Mr. Roberts, one, 15lb.; General Mignon, three; Mr. Stone, one, 20lb.; Mr. Brown, two, 16lb. and 17lb.; General Sir C. L. Barnard, K.C.B., one, 14lb. On Tuesday, Mr. Brown, one; Mr. Smyth-Pigott, one; Mr. Cole, one; Col. Waddilove, one; General Dunn, two. Wednesday, Mr. Brown, two; Mr. Rickards, two, 16lb. and 5lb.; Col. Rocke, two; Mr. Barker, one; Mr. Hammond, two: Mr. Bruce, one; General Dunn, two; Col. Waddilove, one; General Mignon, one; General Sir C. L. Barnard, K.C.B., one.—T.

Scotch Reports.

Altnaccalgach Hotel Waters (via Lairg, N.B.).—On Monday last week, Mr. J. Roberts, Selkirk, on Loch Urigill, twenty-six trout, 6½lb.; Mr. Shannen, Selkirk, on same loch, fourteen trout, 3½lb.; Mr. G. Clark, Bedford, on Loch Cama, twenty-four trout, 8lb.; Rev. W. Chapman and Mr. Clark, London, on same loch, eighteen trout, 8lb.; Mr. A. Roberts, Selkirk, on Loch Veyatie, twenty-five trout, 6lb.; Mr. Sanderson, Selkirk, on same loch, twenty-seven trout, 7lb.; Mr. Couper, Edinburgh, on Loch Urigill, twenty-three trout, 5½lb.; Dr. Saundby, Birmingham, on Loch Boarlan, eighteen trout, 4lb.; Mr. Shepherd, Dundee, on same loch, twenty-six trout, 6lb.; and Mr. Ogilvy, Dollar, on Loch Urigill, forty-two trout, 11lb. On Tuesday, Mr. Shepherd, on Loch Veyatie, twenty-six trout, 7½lb.; Dr. Saundby, on Loch Urigill, eighteen trout, 4½lb.; and Mr. Ogilvy, on same loch, forty trout, 11lb. On Wednesday, Mr. G. Clark, on Loch Cama, thirty-six trout, 14lb.; Mr. Ogilvy, on same loch, seventeen trout, 5lb.; Dr. Saundby, on Loch Veyatie, thirty-six trout, 10lb.; Messrs Sproat, Liverpool, on Loch Urigill, seventy trout, 21lb.; and Mr. Shepherd, on same loch, forty trout, 11½lb. On Thursday, Messrs. Sproat, on Loch Boarlan, thirty-six trout, 13lb.; Mr. G. Clark, on same loch (half day only), twelve trout, 4lb.; Mr. Ogilvy, on Loch Veyatie, thirty-nine trout, 13lb.; Mr. Couper, on Loch Urigill, twenty-three trout, 5½lb.; Mr. Shepherd, on Loch Cama, forty-two trout, 8½lb.; and Dr. Saundby, on same loch, thirteen trout, 4lb. On Friday, Mr. G. Clark, on Loch Veyatie, fifty-eight trout, 18½lb.; Mr. Shepherd, on Loch Cama, forty-seven trout, 13lb.; Mr. Couper, on Loch Urigill, fifty-four trout, 10lb.; Mr. Ogilvy, on same loch, forty-two trout, 11lb.; and Dr. Saundby, on Loch Mheallain, a basket of 13lb. On Saturday, Mr. G. Clark, on Loch Cama, twenty-three trout, 7¼lb.; Mr. Couper, on same loch, nineteen trout, 6½lb.; Mr. Ogilvy, on Loch Veyatie, thirty-five trout, 10lb.; and Dr. Saundby, on Loch Urigill, sixty trout, 4lb. Total basket for the week, over eighty-six dozen trout, aggregating 301½lb. in weight.—McB.

Auchintaple Loch (Forfarshire).—Mr. Hammersley and party, from London, are having excellent sport on this loch. On Saturday, Captain Campbell landed four good trout; and on Monday, Mr. W. S. Campbell had two.—G. G.

Ayrshire Lochs and Streams.—Lochs Doon and Fuilas have been again affording good sport during the past week to a fair number of local and visiting anglers. Some have killed at an outing, on favourable days, four and a-half dozen yellow trout. On both lochs the trout are still in first-rate condition, and their gameness affords excellent sport. The trout caught run about four to the pound, or thereabouts. The neighbouring streams have been doing fairly well with the fly. On Rye water, Mr. Crawford, Kilbirnie, caught four dozen yellow trout on Monday, and on the following day two dozen. The minnow has been killing well, while a good percentage of the trout have fallen to the garden worm as a lure. Other streams have done fairly well in the neighbourhood of Glengarnock. On Wednesday all the streams were in good ply for fly.—Heatherbell.

Border Esk.—In the upper reaches (Langholm water), Mr. T. Irving had five sea trout and six whiting; Mr. J. Anderson had two whiting and twenty yellow trout; Master Walter Scott, Ashley Bank, one of the most promising young anglers on the river, had a sea trout, a whiting, and eighteen yellow trout; Mr. T. Hounam had three sea trout, fifteen whiting, and a number of yellow trout; Mr. William Morrison had a good basket of sea trout and whiting; Mr. G. Armstrong had five splendid sea trout at a morning fishing at Glenfira; Mr. William Keir, Commercial Hotel, Langholm, had two sea trout, a whiting, and some yellow trout at Skipper's Bridge; Mr. W. Urquhart, had two sea trout, one weighing 3lb., and some yellow trout, with the fly, at Glenfira; Mr. J. T. Burnett, Ewesbank, had a sea trout, two whiting, and a dozen yellow trout, with the fly, at Todholes; Mr. James Elliot had two sea trout, five whiting, and two dozen yellow trout in the same water. In the middle reaches, Mr. Richard Graham had a splendid sea trout and some whiting. Good sport has been had in the Broomholm water, which extends from Shippers Bridge to Tarras-foot, about two miles of charming scenery, and an excellent fishing stretch. Between the places mentioned, Mr. Connell, St. Thorwalds, had two sea trout, 3lb. each, and some whiting; Mr. W. Davidson had a basket of 9½lb.; Mr. E. J. Connell had six sea trout and six whiting; and the Rev. David Maxwell had also good sport. In the Canonbie water, Messrs. Craig and Shand, Cross Keys Hotel, have each had a salmon of 10lb. from the Cauldron Pool; and Mr. J. H. Park, of March Bank, a salmon of 9lb. from the same water. In the lower waters, between Longtown and the Metal Bridge, the following takes are recorded: Mr. Jos. Beck, three salmon and some whiting; Mr. Jonathan Beck, three sea trout and whiting; Mr. Stubbs, Carlisle, one salmon, after a good run, also some whiting; Messrs. Waters and Borwick, one salmon each; Colonel Whyhurgh, a basket of whiting, Mr. Mason, Rockliffe, creel of sea trout and whiting; Major Burky, also basket of whiting. So far as my experience teaches me, and I have known the district over forty-five years, there will be plenty of rain to keep the Esk going for another month at least. There are no roaring floods now like the one I recollect in 1846, when all the hill-streams came rushing and tearing down their rocky beds like foaming cataracts, when both Esk and Liddle, especially the former, rose to such an extraordinary height that you could wash your hands from the ledging of the bridges, many of which were swept away, and the fish were afterwards gathered high and dry from the hill-sides.—Gilnockie.

Carron (Easter Ross, Ardgay, N.B.).—On Tuesday last week, Mr. J. MacLeod caught a 6lb. grilse on Poll-a-Gharaidh. Rev. Mr. Brown fished the Balnagown Arms Hotel water on Friday, and grassed a six-pounder on Poll-'a-Chapnill. On Saturday, Mr. Montpierre, out from the hotel, caught a grilse of 5¾lb. Monday and Tuesday this week blank, so far as known. Weather most unfavourable.—McB.

Dee (Aberdeenshire).—The river has been very unsteady owing to the excessive rains, which threaten to ruin everything. All round grilse have been running freely and of very heavy weights for the Dee; the average weight in the nets is 8lb., and one 10½lb. was landed on Friday morning. The autumn fish have already made their appearance on the river. On Friday last, Mr. Hugh McDonald landed the first of the season on the Park water, a beauty turning the beam at 17lb. weight. He also landed two grilse on Thursday, 5½lb., and one on Tuesday of 7½lb. On the Ballogie water, Mr. W. E. Nicol landed a grilse last week of 8lb., while several of lesser weights have been got on the other sections. On the Glentana water, an excellent season has been enjoyed, and should the autumn prove as prolific of sport to Sir William Brook, and party, as the spring, the season all through will be a record one. On the Invercauld water, Mr. Robert Gibb, Aberdeen, landed a beauty of a 9lb. fish, while D. Morgan, keeper, had several others, chiefly red fish. On the coast the in-shore netting stations have been yielding well, and several fish of 20lb. and over, have been taken, while the average weight is about 14lb. The netting season closes on the 26th, so that a fresh impulse will now be given to angling. The nets have yielded a high average all round, and nearly a third more fish than were got last year.—Deesider.

Deveron (Banffshire).—There were a slight falling off in the salmon fishings on the river Deveron and along the coast for the past week. Fish have been running freely up the river for some time, and on Saturday night until Monday morning not a few passed through the sluices, which were open. Owing to the dark colour of the water it is difficult to observe the run of fish, but from what we hear and see, the numbers in the pools in the river was never so large on any former season for many years. Although the river fell on the end of last week, it was again in spate on Tuesday, and with the heavy volume of spate water, which, has been in that condition for more than a month, anglers have had poor sport. In fact, there will be little done now until the beginning of next month, when the nets will be off. Two salmon were killed by Mr. Fraser on the Nethordale water, of 4½lb. and 9lb., and fair baskets of trout were got on the tidal and upper waters. On Monday the net fishermen on the river had twenty grilse and twelve salmon, the shot was not so heavy on Tuesday. In the end of last week the hauls were very large, and as many as six boxes were got daily. On the coast stations the fish are not so numerous. On Saturday the total was fourteen boxes; on Monday eleven boxes, and on Wednesday fifteen. Last year for the present week, the yield was sixteen boxes. The daily yield from the fishings on the Gardenstown coast, averaged three boxes. A number of the grilse are small and thin, but free from disease.—H. W.

Helmsdale (Helmsdale).—On Monday of this week we had another tremendous flood in the river, and it still continues. Two days and nights of a perfect deluge of rain has swollen every burn and streamlet in the district, and the river highest of all. The netsmen could do nothing, not to speak of anglers, and it may be said of the former, that their season is now over, as fish are almost up stream. A few anglers were out during the week, and a few grilse fell to their share, but angling was not at all satisfactory, although fish were never so numerous. I have always pointed out that this river is only really good for anglers in spring, but why this is the case is a problem which the party who solves will gain everlasting praise. There are always plenty of autumn fish, grilse, salmon, and sea trout, and why do they not take? Surely there is some lure hitherto untried that might be found to tempt them; if there is, it is as yet undiscovered. On several of the larger burns, notably Luthbeg, four miles from here, both salmon and grilse have been going freely up this season, and one gentleman has had some good takes. I have no doubt towards the end of the month fish will take better if anglers care to try. The 12th turned out fairly successful in this parish this year, Kilderon, Suisgill, and Tonish sportsman having all got fair bags on the opening day. The herring fishing has been interrupted this week by stormy weather, and the catch all over Scotland is now over three hundred thousand barrels short of last season. This means a poor time for hundreds of fishermen.—S. C.

Inchnadamph Hotel Waters (via Lairg, N.B.).—During the past week, the weather has been so stormy, and otherwise unfavourable, that the record of sport is a poor one. Rev. Mr. Short, Salisbury, fished Traligill on Friday, and landed fifty-nine trout, weighing 13lb. On Saturday, General Smith, Salisbury, caught a 7lb. salmon on Maiden Loch; and Rev. Mr. Short, on Loch Awe, nineteen trout, 6½lb. On Monday, Mr. Tracey, London, fished Loch Awe, and landed eleven trout, 4lb.; Mr. Fry, London, on Loch Assynt, a sea trout of 2lb., and two salmon weighing 5lb. and 7lb.; Rev. Mr. Short on same loch had a salmon weighing 15lb.; and General Smith a sea trout of 2lb.—McB.

Kyle of Sutherland (Station Hotel, Invershin, N.B).—A few evenings ago Mr. W. Urquhart in three hours fishing landed sixteen trout, averaging ½lb. Other hotel anglers have also been doing well. One landed a grilse on Saturday.—McB.

Lairg (N.B.).—On Monday of last week, Mr. Mackay killed a *Salmo ferox* of 3lb. and ten trout, 8lb.; Mr. Copeland on this same loch had three; and another angler six trout. On Tuesday, a gale with heavy showers prevailed. Mr. Mackay fished Loch Beannoch and killed seven trout, 5lb.; Mr. Ivory, Invernauld House, made a basket of thirty trout on Loch Shin. On Wednesday, Captain Cotton got eight trout, 2½lb., on Loch Shin; Mr. Mackay, on same loch, nine trout, 5lb.; Messrs. Cooke, on Loch Cracail, ten trout, 4lb. On Thursday, on Loch Shin, Mr. Finlayson caught nine trout, 4lb.; Rev. Mr. Chapman and Mr. Clark, twenty-two trout, 9lb.; Captain Cotton, twenty-five, 9½lb.; Sergeant Ray, six, heaviest, ¾lb.; Mr. Neill, Dornoch, and Mr. Grant, four. On Friday, which was dull and wet, Messrs, Cooke, fishing Loch Shin, killed fifteen trout, 8½lb.; Messrs. Castle, on same loch, had sixteen trout, 7lb.; Mr. Neill, half-a-dozen in two hours' fishing; and in the evening, Mr. Young six nice trout; Mr. Finlayson got two trout, 1½lb., on Loch Beannoch. On Saturday a gale blew from the north-west and interfered with sport. Messrs. Castle made a basket of sixteen trout, 5lb., on Lower Loch Shin; Master William Butters, sixteen, 5lb., on same loch and Rev. Mr. Bull, five trout, 4lb., on Loch Beannoch.—J. Y.

Liddle.—This river is now in capital order, and the following takes are recorded: Dr. Knowles, Eskdale Temperance Hotel, four sea trout; Rev. E. I. Smith, same hotel, four sea trout and two whiting; Rev. W. R. Bell and friend, three sea trout, one 3lb., eight whiting, and one grilse of 4lb.; and Mr. Carruthers and friend, Rowan Cumfoot, landed twenty-eight sea trout, several whiting, and a salmon of 8lb., with the Devonshire Minnow. The train from Langholm—six miles distant—takes the visitor down to the water's edge in a few minutes. Next week I hope to say more about historic and romantic Liddle.—G.

Loch Leven (Kinross).—Anglers have been more successful here during the past week in consequence of the weather being moist, although baskets are still rather short of what should be got this month. On Tuesday Mr. R. M. Cairns gained the first prize in the St. Mungo Club from Glasgow, with a fine basket of nineteen trout, 17lb. 4oz., which is one of the best prize baskets got this season. At the same competition Mr. Allison had the heaviest trout which weighed 2lb. 9½oz. Private parties have been going out for only a few hours in the afternoon or evening and have had pretty fair sport. Captain Harding, from Stirling, and Mr. J. J. Harris, Kinross, were the most successful, their capture for a few hours in the afternoon being nineteen trout, 14lb. 4oz. Sir Graham Montgomery has this season, in compliance with a representation of the directors of the Loch Leven Angling Association kindly agreed to extend the present angling season to Saturday, the 5th September next, inclusive instead of Monday, 31st inst., which is the usual day for closing. The competitions for championship and the patron's prize will as usual take place on the first two days after the close of the season, viz., Monday, 7th September, and Tuesday, 8th September.—R. B. Laing.

Loch Rannoch—.The following is the angling report and list of takes during the past few days by gentlemen from the Dunalastair Hotel: On the 11th inst. Mr. Ward, of Lincoln, killed twenty-two trout on the lake, and the Messrs. Mills, of Louth, captured six. Mr. Hodgson and son, of London, on same day had a basket of fully 6lb., and Mr. Kirkby, of London, killed six trout. Mr. Higson, from Oban, also succeeded in making a basket of 6lb. On the following day, Mr, and Mrs. Gordon, of Edinburgh, captured twenty-four very nice trout, and the Messrs. Mills killed fourteen. Mr. Hodgson and son, obtained a basket of 5lb., and Mr. Marriage, of London, captured eight trout. On the 13th inst. Mr. Hodgson and son, killed thirty-four trout, and the Messrs, Higson and Kirkby secured twenty-two. The Messrs. Mills captured eighteen, and Mr. and Mrs. Williams, of Eton, had a basket of 5½lb. on the river. On the loch, Mr. Ward captured eleven trout, and Mr. Hare and son, of London, and Mr. Marriage, all obtained pretty fair baskets. On the following day, Mr. Hodgson and son captured twenty-four trout, and Mr. and Miss Marriage killed fifteen, and Mr. Kirkby had ten. During the last few days the weather has been exceptionally unfavourable for angling, cold winds being prevalent, with heavy showers of rain.—J. Kennedy.

Naver.—Owing to continuance of rainy weather very little has been done in salmon and grilse angling since last reported. The Dalvina anglers grassed two fish weighing 9½lb. and 6lb. Seven in all including salmon and grilse were landed by the Syre Lodge anglers; while the Skelpick Lodge party had three, two of which weighed 18lb. and 10lb.—McB.

Ness (Inverness).—During the past week anglers had excellent sport on the upper and lower reaches. On the Ness Castle water Mr. Fountaino Walker killed seventeen grilse. On the Holm water Mr. Godman killed twenty-seven grilse; on the Lower Holm, Sir George Boswall killed three grilse and General Mounsey Grant killed seven grilse on Monday, 17th, a few local anglers out killed ten grilse and one salmon. The best fishers are getting large catches of salmon and grilse daily.—D. Watson.

Overscaig Hotel Waters (via Lairg, N.B.).—The wet weather which has for some time prevailed over Sutherland has seriously affected angling on the Overscaig Lochs. Dr. Matthews, Liverpool, was out on Loch More on Friday last, and got three sea trout averaging 1¼lb. each. On the same day Masters Kenneth Mackay and John Butters fished Loch Shin and caught one and a-half dozen trout, aggregating 7lb. Up to Wednesday weather still unseasonable.—McB.

Rhiconich Hotel Waters (via Lairg, N.B.).—Pretty fair sport is still being got notwithstanding a succession of spates which keep the lochs too high and muddy. On Monday last week, Mr. Sampson, Brighton, on Loch Dionard, had one sea trout, 3½lb.; Mr. Young, London, on Loch Garbetmore, one of 3lb.; and Mr. Maitland, Dover, on Loch Garbetbeg, two salmon, weighing 7¼lb. and 6½lb. On Tuesday, the Rev. Mr. Green, Surrey, on Loch-na-Caillich, two sea trout, 4lb. and 1lb.; Mr. F. Maitland, Dover, on same loch, sixteen trout, 5½lb.; General Murray, Worthing, on Loch Garbet, three sea trout, 3lb.; and Mr. Young, two sea trout, 2lb. On Wednesday, Mr. Wallace, on Loch Inchard, two sea trout, 2½lb.; Rev. Mr. Green, on mountain streams, sixteen trout, 7½lb.; and Captain Sinclair, on Loch Garbotmore, twelve trout, 6¾lb. On Thursday, Mr. and Mrs. S. Young, London, on Loch Inchard, four lythe, 12lb.; and Rev. Mr. Green, on Loch Mathair-a-Gharbhuilt, thirty-six trout, 12lb. On Friday, Mr. Sampson, Brighton, on Loch Inchard, eight lythe, 30lb.; and Rev. Mr. Green, two lythe, 9lb. On Saturday, Mr. Beale, Shropshire, on Loch Garbetbeg, six sea trout, 8lb.; Mr. Sinclair, on river Acriskill, two sea trout, 2lb.; and Rev. Mr. Green, on Loch-na-Caillich, one sea trout, 1lb.—McB.

Shin (Inveran Hotel Waters).—The sport obtained by anglers from Sutherland Arms Hotel has deteriorated of late. Last week only three fish were landed—viz.: On Tuesday, an 8lb., caught by Mr. Hall, on Angus Pool. On Thursday, a grilse of 6lb., landed by Mr. Lewis Hall, on Poll Clarag; and on Friday, an 8lb. salmon, grassed by the same angler on Clarag. Since then the weather has been very boisterous, but on Wednesday it showed signs of settling.—McB.

South of Scotland.—In Hoddom Castle water, on Monday, Mr. T. B. Johnston, Lord-street, Liverpool, had several good sea trout and herling; he hooked a salmon in the Churchyard Pool, but with a small 10ft. rod the fish fouled him on the rocks, and unfortunately broke him; Mr. McKinnell killed several good sea trout up to 2lb. each; Mr. R. Graham, Glasgow, caught one dozen herling and a sea trout of 2½lb.; Mr. James Henry, chemist, Annan, had eight herling and one sea trout; Mr. J. Pollock had a few herling. On Tuesday the catches were exceptional in the lower waters. Mr. Thos. Tweedie, Moat House, fifteen herling; Mr. T. Gibson, Bridge-place, twenty-two herling, one good sea trout, and four yellow trout; the Rev. Mr. Kennedy, Newington Lodge, caught thirty herling and one sea trout; Mr. Thomas, of Manchester, had a splendid basket of bright fresh-run fish, viz., thirty-one herling; Mr. James Bonner, Hare's Den, caught twenty-nine good fish, some of which weighed close on 1lb. each; Mr. John Iveson, Wigton, a score of herling and a yellow trout or two; Mr. John Laurie, Bank-street, landed twenty-one herling; Mr. Munro, a basket of eighteen, and a few yellow trout; Mr. Wm. Atkins had a basket of herling, 16¾lb., viz., thirty-one herling and three sea trout; Mr. McGiverin, post-master, landed in the Luce portion of the river thirty-two herling and three sea trout of 2lb. each, besides a few yellow trout; Mr. James, London, Bruce-street, ten herling and a sea trout, 1¾lb.; one angler in the higher water had two salmon, 3½lb., and three large sea trout: Mr. Arthur Nicholson, St. Asaph, North Wales, caught a good basket; Mr. James Dixon, Annan, twenty-six herling; Mr. Joseph Pollock, thirty herling; Ex-Dean of Guild London, Annan, caught in one hour ten herling and one sea trout; Mr. James, London, had exactly the same number of fish; Mr. Adler. London, six herling at Galabank; Mr. McKay, Brydekirk, had a fine basket in the Blacketless portion of the Annan. In water above Brydekirk village many heavy baskets were made with worm on Tuesday. Mr. Wm. Miller, Glasgow, had a very fine lot of herling in the Everholm water. At Hoddom Castle, Mr. J. Tweedie killed one sea trout and six herling on Monday, and on Tuesday one dozen herling and one sea trout; Mr. Wilson, Ecclefechan, had over twenty herling; Mr. Milligan, sixteen herling; Mr. P. Murray, fifteen herling and two sea trout; Mr. Stewart, caught a fine basket of sea trout and herling, 12lb. In Castlemilk section, Mr. John Rae, the Firs, Ecclefechan, had twenty herling; Mr. D. Tweedie, clothier, fifteen herling, two sea trout and a yellow trout, 2½lb. In the inland water, near Warmanbie, on Wednesday, Mr. McGiverin, post-master, Annan, had ten herling with fly; and Mr. D. C., London, four, with the minnow; Mr. Thomas Jamieson, Westerhall, had two salmon, one out of the Cauldron Pool, and the other out of the famous Willow Pool; Messrs. A. E. Stephenson and C. Stephenson, out from the Crown Hotel, Langholm, have had good sport among sea trout and herling, and have succeeded in landing two salmon. In the Broonholm reserved water, Mr. Edward Connell had a small grilse and one or two sea trout; Messrs. Tetley, Leeds, have had a number of sea trout and herling in the same portion of the river. Dr. Knowles, from the Temperance Hotel, Langholm, had four sea trout in the Liddle; and Messrs. St. George Tucker, London, had four sea trout and a couple of dozen yellow trout in the Langholm part of the river. The Rev. J. W. Bell had six sea trout and herling, and the Rev. Edward Smith, Bradford, caught several herling in the Liddle. The Rev. E. J. Smith, Hexham, has had some fair sport. Mr. D. Temple West, out from the Buck Hotel, Langholm, has had nice sport in the town water; and Mr. W. Reid, Hawick, good catches in the Liddle. The Devon Minnow has been doing great execution on some of the stretches. Mr. Thomas Irving, Langholm, had a basket of 7lb. of sea trout and herling; and another day he landed a sea trout of 2½lb. Mr. J. Malcolm had two sea trout in the waters above the town, 1½lb. each. The Earl of Dalkieth, Mr. Forbes, and Mr. Devas, had fair sport the other day in the reserved portion of the river at Langholm Lodge. Mr. Thomas Hounam, Langholm, had four sea trout and half-a-dozen herling near the Skipper's Brig; Mr. Wm. Urquhart, Langholm, had a few sea trout; Mr. A. Glendinning, a sea trout and five herling; Mr. W. Irving, Canonbie, a salmon of 18lb. The river is in the finest order of the season. The Dee (Kirkcudbrightshire) is now doing fairly well, and the sport has much improved this week. A salmon was landed out of the Nith the other day by Mr. Morley, Dumfries. This is the first fish of the season.—HEATHERBELL.

Spey (Elgin).—The salmon fishing on the Spey has been more satisfactory. On the Piteroy water Mr. Burns landed five fish, and on Friday last Master P. Burns had a splendid fish. On the Ballindalloch water on Saturday Lord Garioch landed a salmon of 16½lb., and a grilse of 5lb. On the Aberleur waters on Friday a salmon of 9½lb., and on Saturday a grilse of 4lb. were landed. On the Wester Elchies water last week Sir Archibald L. Smith's party killed eleven splendid salmon. On the same water on Friday, Mr. A. F. F. Smith landed two grilse, weighing 6½lb. and 6lb. respectively. One of the gentlemen from Easter Elchies had a grilse of 4lb. on Sulcham water on Friday.—H. LOGI.

Tay (Perth).—The river, which has been running high for a few days past, has again got into good angling ply, and a good many fish should be caught within the next week, notwithstanding the excessive netting. On Wednesday, next week, the nets will be taken off, and the autumn rod-fishing will commence in full swing, and there is every prospect of the season being a good one, as fish are very numerous. On Tuesday, last week, his Serene Highness Prince de Wagram killed a fish on the Castle Mengies water. On the Taymount water, Mr. Murray killed a fish and two grilse; and Chas. Holland has had three on the Stanley Water. On the Benchill water, Mr. Kelsall killed a fish of 19lb., and two grilse on Wednesday; and on the same water on Friday, Capt. Ostrchan killed five grilse, running from 5lb. to 10lb. On Monday, Sir J. Millais, R.A., killed a fish of 14lb. and two grilse. On the Free water, Mr. Rutherford had two sea trout 2lb. and 2½lb.; and another gentleman had 14lb.—ALDER.

Tweed.—The weather since last week has been, on the whole, very good for anglers who delight in bottom-fishing. Rain has fallen in large quantities on various occasions, and both the main river and the tributaries have been flooded to some extent. The Tweed water at Kelso Bridge on Wednesday marked a rise of fully 3ft., and to-day (Thursday) it is running in good order. This opportune flood must have been of material benefit to allow of a run of fish to the upper reaches, and once the river gets into fishable order, we are sure to have successful salmon angling on the various fastnesses. A very severe thunderstorm passed over the immediate district of Kelso on Wednesday, when the pluvial descent was exceedingly heavy, as was to be expected under the circumstances, and Waltonians have been out in large numbers, and many baskets of trout have been killed in all the districts. On the Tweed, near Kelso, Mr. William Shiels, has had takes of from 6lb. up to 9lb.; Mr. Jas., Chisholm, 4lb. and 8lb.; Mr. James Oliver, 4lb. and 8lb.; Mr. D. Brown, 6lb. and 8lb.; Mr. James Mabon, 4lb. and 7lb.; Mr. Bond, 5lb. and 6lb.; the Misses Affleck, Heiton, on the Teviot, several takes of from 6lb. up to 8lb., 9lb. and 10lb. Many other takes have also been got on both rivers, ranging from 3lb. upwards, but the above are the best individual catches in the Kelso district, and all got with worm. On the Jed, baskets of from 3lb. up to 8lb. have been taken. On the Yarrow and St. Mary's Loch exceptionally good takes have also been got, including a goodly number of trout, weighing 2lb. to 3lb. each. In the Peebles district, capital baskets have also been had, Mr. Turnbull, 8lb. and 12lb., with fly; Mr. Scott, baker, 7lb., including one fine trout of 2½lb.; Mr. James Black had a good take, two of his trout being 1lb. each. Before the rivers became swollen a few salmon were got with fly on some of the waters. On the Craig Pool, on the Mertoun water (Lord Polwarth's), Mr. Goodfellow, the keeper, had a nice fish of 8½lb.; while on the Littledean water, two Edinburgh anglers had capital baskets. The various rises in the river, accompanied with a rough sea, has made the salmon net fishings in the river during the past week something really excellent, and the amount of fish got has not been equalled for many years back, both on the river and sea coast stations. The fish have been running very freely, owing to the flooded state of the river and the other conditions above-mentioned. Several excellent "shots" were secured on many stations last week, including one of twenty-five fish; and on Monday last, one of the nets on Spittal Beach had a haul of forty fish, nearly all large-sized salmon. On some of the stations over one hundred fish have been caught during one tide on several occasions. On Tuesday forenoon, however, an eye-witness informed me that all previous records were broken by a splendid haul got on the Hallowstill Fishery (a short distance up the river from Spittal Point), when the splendid "shot" of one hundred and eight salmon, one grilse, and one trout were landed at one shot. The total number of fish, salmon, grilse, and trout may have been exceeded once or so within the last twenty years, but there is no record of such an extraordinary haul of salmon being caught at once. The spectacle was one of the most remarkable ever witnessed, and great excitement prevailed among the crowd which soon gathered at the spot, and which included many of the visitors at Spittal. A salmon of over 40lb. weight was captured in the same neighbourhood, on Tuesday night. The weather seems much more settled, and the barometer is high, with the wind from south.—MAXWHEEL.

Thurso and Lochmore (Brawl Castle).—We are having too much rain and spates in the river, even for salmon fishing. No sooner is the river in good ply than another spate comes down so rapid and dirty that salmon fishing is done for the day, consequently anglers' baskets are much lighter for the past week than they would be in favourable weather, as the river is full of fish. Pipe-Major Grant, who is an excellent angler, did not meet with the success his skill and perseverance deserved. On the 11th he got one salmon, 12½lb., on No. 4 beat. The 12th was calm and rainy, and nothing was got. On the 13th, on No. 2 beat, Pipe-Major Grant got one; 9½lb., and another angler caught a grilse, 4½lb. The 14th was a blank day. On the 15th Pipe-Major Grant got one, 6½lb., on No. 2 beat. On the 17th Mr. Newett fished No. 3 beat, and got one salmon, 9½lb., and one grilse, 6½lb.; Pipe-Major Grant, on the same beat, got one salmon, weighing 10lb. On the 18th there was a high spate; some good yellow trout were caught in the river with worm, Pipe-Major Grant being the most successful.—A. H.

Tongue Hotel.—On August 10, Mr. Wordsworth, on Loch Slam, nine trout weighing 3½lb. On the 11th, Mr. Rawlinson, on Loch Loyal, twenty-two trout, weighing 8lb.; Mr. Wordsworth, on the Kyle, three sea trout, weighing 6lb. On the 12th, Mr. Rawlings, on the Kyle, ten sea trout, weighing 20lb.; Mr. Muir, on Loch Craggie, six trout, weighing 3lb.; Mr. Wordsworth, on Loch Slam, one salmon, weighing 4lb., and another weighing 8lb. On the 13th, Mr. Wordsworth, on Loch Loyal, six trout weighing 8lb. and two *ferox* 6lb. and 8lb. On the 15th, Mr. Wordsworth, on Loch Loyal, one trout weighing 2½lb. and one *ferox* weighing 6½lb.—A. CAMPBELL.

Whitadder (Ellemford).—Mr. Ayton, Edinburgh, had 4½lb. of trout yesterday (Tuesday); Mr. James Ayton, 2lb.; Mr. Roberts, Wakefield, had several good trout. A great many trout were rising, but mostly small ones. The Red and Black Spider seem to be the favourite flies at present. The river had not subsided after the flood on Monday, but to-day (the 19th) it is expected better baskets will be made.—R. J. FENTON.

Irish Reports.

Ballinderry (East Tyrone).—Previous to Saturday trouting was improving. Mr. C. B. Irwin, on the Coagh reaches, had two dozen fish in three days, and on Friday I myself creeled seven nice trout, but the next day we had the first instalment of that annual pest, flax water. The fish become sick by a small quantity of this vile fluid, and *will not take any lure whatever*, and a larger dose proves fatal to all fish life in the infected stream. Heavy floods would sweep away this pest, and in any case another couple of weeks will rid us of it altogether; but the effects remain for a considerable time afterwards.—EAST TYRONE.

Connemara Fishing Club.—The floods have come at last, and are not over yet, plenty of fresh white trout are running up every night to the club's lakes at Ballinhinch and Carna; there will be no lack of fish for the rest of the season. Write to H. Radman, Royal Hotel, Recess; or to Martin Morgan, Post Office, Carna (Co. Galway).—H. H.

Blackadder.—At Ballynahinch fishery, since my last report we have had a great flood, and water is rather too high for angling. Still a few fish have been got, and by end of month sport should be very good.—TOOMBEOLA.

Lough Currane, Waterville (County Kerry).—Sport has been poor. The baskets of white and brown trout obtained during the week ran from three or four up to a dozen. A dozen and a-half white and brown trout was the best basket, but it was had only on one day. On the Imry, on Thursday, Captain Wilson had a salmon 10½lb., and one on Monday 6½lb. On the latter day Mr. Merryweather, on the same water, caught one, 7½lb.; and Mr. Pernell, one, 6½lb. This river always affords good sport after a flood, but it is hardly in proper trim yet. On Coppal Lake some good baskets of white and brown trout were had by Surgeon-Major Rahilly, Mr. Gordon Farren, and a few others. All the hotels are crowded, and the rush of anglers is quite unprecedented. I understand some should return as no room could be got. Anglers would do well to write beforehand.—THOS. J. DENNEHY.

Lough Neagh.—Trout are rising much better. During last week Mr. Donaghey had over forty nice trout, and Mr. James Eccles, Glasgow, killed twelve on Monday evening; but, as a rule, rod fishing is at a discount. Salmon are reported scarce, and indeed they have been so since the opening of the season. With the prevailing westerly winds, enormous hauls of eels are being made on "night" lines, baited with pollen fry, worms, and small bog frogs. The eels, if possible, are kept alive in tanks till exported. Perch, bream, and eel fishing continues good, but the pollen fisheries show a slight decline. The demand for this fish is ever increasing in the London, Midland, and Scotch markets, and to meet this enormous quantities of under-sized fish are taken. Complaints have been made about this. Fortunately there is every chance of Mr. McCartney's bill, dealing with this, passing into law next session.

Moy and Lakes (Ballina).—Since my last report the water has been in a very disturbed state, owing to the heavy fall of rain. On Monday the river cleared a bit, and two were out. The Rev. Mr. Hawkins got one nice fish, 7½lb., and lost one; and Mr. Grieghy killed a fresh-run salmon, 12½lb. Tuesday, the Rev. Mr. Hawkins had two fish, 5½lb., 7½lb.; Mr. Griegby, two fish, 12lb., and three sea trout, 4½lb.; Mr. Willie Brown, three fish, 5½lb., 7lb., 6½lb., two sea trout, 3½lb. On Wednesday a fresh came down and spoiled sport. Trout fishing in the loughs has not improved. Only moderate baskets have been brought in of late. The Rev. John Thornton had a very nice basket of fish one day last week, and among the lot he had a beautiful trout, weighing a little over 6lb. As soon as the water fines down we expect good sport with salmon and sea trout.—FRANK HEARNS.

Westmeath Lakes (Mullingar).—The fishing upon these lakes, especially Lough Ennell or Belvedere has been making rapid progress, and as it is principally confined now to local professionals, the latter are having a good time.—T. J. W.

MR. J. SHAW PHILLIPS' OTTER HOUNDS.

MR. J. SHAW PHILLIPS' (late Hon. G. R. C. Hill's) otter hounds met on Thursday, July 30, at Three Cocks, and drew up the river Llynfi, almost as far as Llangorse Lake, but without success, an otter having unfortunately been worried by a sheep-dog a few days before. On Tuesday, August 4, the master took his hounds to the Swansea Valley, where he was put up and most hospitably entertained by Fleming Gough, Esq., of Yniscedwyn House. The meet on that day was at Penwyllt, and the master first drew Madame Patti's water, on the river Tawy, just below Craig-y-nos Castle, and drew down as far as Ystragynlais, without the sign of an otter. On Wednesday, the meet was at Yniscedwyn House, and both the river and canal were drawn as far as Pontardawe, without the slightest touch. The brook Cumddu was then tried, and a drag quickly hit on. The otter was soon put down in the midst of a very thick wood, and after a short hunt got in among the rocks, whence it was impossible to get him out. The master was determined not to be beaten, and was back next morning by the first train. A drag was soon hit on, and after pursuing it many miles up brooks and through woods, he was obliged to relinquish the chase at three o'clock, in order to catch the train for Brecon. On Saturday, August 8, the hounds met at Brecon to draw the Honddu. After some time the hounds marked at a strongholt, from which the otter could not be bolted. The master, therefore, determined to draw on and return again in the afternoon, on the chance of the otter having meanwhile bolted; and his conjecture proved to be only too true, for on returning to the bolt the drag was hit on, and after a very sharp hunt of fifteen minutes, partly in the brook and partly round a wood, the wily otter took refuge in the stonework of a bridge, from which it was dislodged by sundry pokes from otter poles. The master viewed it as it went up the bank, where it was pinned by the hound Gorgeous. The cry of the hounds was splendid, and it was with the greatest difficulty that the otter—a bitch of about 14lb.—was got away from them, so savage were they. During the afternoon the master and field were most sumptuously entertained by Miss Lloyd, of Llandefaelog, who is one of the most famous salmon fishers and otter hunters in Wales.

On Friday, July 31, an otter hunt dinner was held at the Assembly Rooms, Builth, at which over one hundred landowners and tenant farmers were present. The master, who took the chair, was received with the greatest enthusiasm, and he was very kindly promised their support by all present, and that they would do all in their power to preserve otters for him, and that no other pack should hunt their country. The chairman proposed "The memory of the late Hon. G. R. C. Hill," saying that wherever Major Hill's hounds had been, his name had been honoured by all. He had been taken from them, and how they were to replace him he did not know. Major Hill was a thorough sportsman, of whom Britain should be proud. They had lost one whom they had known for many years, and who was beloved by all. The chairman also mentioned his obligations to the Hon. Mrs. Hill for the picture of the late Major, which she had so kindly given him, and which stood on the platform behind him. On Monday, August 10, the hounds were to have hunted the Usk down to the Yisbin, but on account of the heavy rains on Sunday they were washed out, so the master drew down the Tarall Brook instead, and very soon hit upon a drag, which he followed till close under Bolgoed, where the otter was found to be in a holt, and after using spades and pick-axes, the animal was got out, and after a hunt of three-quarters of an hour the otter—a bitch of 15lb.—took to a dry brook, where the hounds soon bowled her over.

CATCHING HERRINGS WITH A BARE HOOK.—This mode of fishing for herrings has long been known in the north of Scotland, where it has been practised by fishermen, not for sport, but for the purpose of obtaining those fish for bait for cod, haddocks, &c., for which they are famous. But this mode of fishing is also an excellent sport, for there are no more beautiful or better eating fish than the herring when fresh from the sea. Now as to the *modus operandi* of this kind of fishing. Only hooks are required; those hooks are the white common tinned haddock hooks. First of all, a line of fine whip-cord, of, say, 40yds., is got, then five or six stacking wires; those are securely fastened horizontally to the end of the line about a yard apart, and to each end of the wire is firmly tied a hook on about a foot of good gut. Those are tied in a way that the hooks hang down from each end of the wire, which if you have six wires, gives you six *bare hooks*; no bait or fly is wanted here. To the end of the line is fixed a lead of 8oz. to 10oz., and you are then ready to try. One has seldom to go more than a mile to two miles off shore, and putting the boat stationary, you drop your line to such a depth as you think necessary, and then begin to pull gently up a yard, and then down again. If herrings are there, you soon feel them on the line, and it is not uncommon to get one on each hook. They do not show much fight, but the sport is so clean and the fish so beautiful that it is a real pleasure to fish in this way. This season, for example, in one hour with one line, seventy herrings—plump and good—was got in this way. Our local fishermen call this kind of line a "sprool."—W.

NOTES FROM BIRMINGHAM AND DISTRICT.

THE Rose and Crown Society, Brearley-street Birmingham, held their annual contest on August 9, at Droitwich. This club is the second largest club connected with the Birmingham Association, and their annual contest is always looked forward to as a very important event. This society has always been noted for the valuable prizes put up to be contested for, and the value of the prizes I saw on view on Monday evening must not be far short of £30, and I am informed that there are about a dozen more valuable prizes to be added. The worthy host and treasurer, Mr. Harry Hodgetts, has this year again behaved most handsomely, and has given a marble clock of the latest design, two eight day Vienna clocks, and a handsome barometer, the other prizes are given by the members of the club, and great praise is due to them for their selection, and considering that the funds of the society have not been drawn upon for any of the prizes, I must congratulate the club upon the liberality of the members in getting such a fine collection of prizes together, the number of prizes in all being over forty. With the object of securing one of these valuable prizes, it was not to be wondered at that a goodly number of members would turn out and about one hundred and twenty-five members left by the Midland Railway for the scene of action by the 8.20 a.m. train. Droitwich was reached at about 9.30, when the referee, with the assistance of the committee, proceeded to mark out the ground, and one hundred and twenty competitors answered to their names to take part in the contest, which was of one and a-half hours' duration, the rule being in this society for one half the contestants to fish at a time, and the other half to act as umpires. The takes of fish were extraordinarily small, the cause of which was not found out until the conclusion of the contest, when it was made known that one of the large brine tanks at the salt works had, during the past week, burst and destroyed a great quantity of all kinds of fish. The number of members who took fish in the contest was twenty-nine. This will show the state of things at Droitwich, and I should advise the clubs not to forget the circumstances mentioned, as it will take a long time for the water to recover itself again. I have been informed that the stench from the dead fish which lay floating on the top of the water was abominable, especially below Droitwich. It is not to be wondered at that only so small a number of persons succeeded in taking fish under the difficulties they had to contend against. The following is a result of the contest: First, Mr. W. A. Phelps: second, Mr. A. Hipkiss: third, Mr. C. Bevan; fourth, Mr. J. Oliver; fifth, Mr. T. Mole; sixth, Mr. T. Smith; seventh, Mr. J. Shale; eighth, Mr. C. Hartwright; ninth, Mr. H. Medlicot; tenth, Mr. J. Hubble, &c. The prizes will be distributed at the next general meeting of the society, when a place will be chosen for the second contest for the remainder of the prizes left. The arrangements of the contest were carried out by Messrs. Coles, Dance, Goode, and the committee, who, had they have known of the state of the water, would have brought off the contest elsewhere. Still, great credit is due to the gentlemen mentioned for the way they conducted the contest under the disagreeable surroundings.

THE Highgate Angling Society, held at the Queen's Arms Inn, Conybeare-street, Birmingham, fished their annual contest at Binton, in the river Avon, on Saturday last. The weather was all that could be desired, and the water was in first-class condition. The prizes competed for were of a valuable and useful description, and consisted of marble timepiece, eight-day clocks, dinner and tea services, vases, table lamps, electro-plated articles, fishing tackle, &c. In the selection of prizes great praise is due to the purchasing committee; and a word of praise is also due to Mr. E. Slim, the worthy host, who contributed the sum of seven guineas to the prize fund. The contest was of the ordinary pegged-down kind, and was of three hours' duration. Fifty-four members answered their names, and at twelve o'clock the referee gave the signal to commence fishing, and the contest continued without any interruption until three o'clock, when the signal was given to cease fishing. The bags were collected, and the weighing of the fish commenced, the result being that Mr. R. Robinson was first; Mr. H. Garner, second; Mr. T. Vincent, third: Mr. Nash, fourth; Mr. G. Perkins, fifth, &c. Twenty-five members succeeded in taking fish and securing a prize, and as the prizes number about thirty-three, a consolation contest will be held later on in the season for the remainder of the prizes. Mr. Kingerlee acted as referee, and with the assistance of the president, Mr. R. Gumbling, and the worthy secretary, Mr. T. King, the arrangements were all that could be desired.

THE annual dinner and distribution of prizes took place at the Camden Society on Tuesday evening, when about forty of our members availed themselves of the opportunity of partaking of the good things provided for the occasion by Host Walker. After the dinner had been dispensed with, Mr. Lee was voted to the chair, Mr. J. Maisden, the president, being unavoidably absent through a serious illness. The toast list was quickly got through, when the distribution of prizes won in the late contest at Droitwich took place. After this important item in the programme was finished, the remainder of the evening was devoted to harmony. Owing to the whole of the prizes not having been won in the late contest the club has decided to hold another contest on Saturday afternoon, September 5, at Kingswood.

MR. C. WHITE, general secretary to the Birmingham Angling Association, will attend at the Birmingham Arms Hotel, Snathfield, every Saturday evening until further notice, 7.30 till nine o'clock, for the purpose of issuing railway and contest tickets to the branch secretaries of clubs affiliated with the Birmingham Association. All tickets to be paid for on or before September 10 next, or charged for.

NOTES FROM LANCASHIRE.

LANCASHIRE anglers are still grumbling at the weather. The running waters have been more or less in a flooded state, and altogether unreliable for sport; while lakes and meres, and also reservoirs and pools, are reported as being what is generally known as broken up. Still, however, fair sport has been obtained.

A FEW weeks ago we referred to the fine gudgeon often obtained in the Dane. Since then, Mr. Geo. Yates, Manchester, has captured some good specimens. Fishing on the 14th, in this river, he caught ten of these fish, weighing 1lb. 2¼oz., the heaviest weighing 2¾oz., and will probably receive the careful attention of the taxidermist; it certainly deserves that honour, being a beautiful specimen. This season so far has teemed with good sport amongst this particular class of fish. On the 15th, Mr. Smith and a friend from Bolton, visited a private water, noted for its grand trout, but to such an extent did the gudgeon abound that the wasp bait was never allowed to remain unmolested for many minutes; and at the close of the day only two trout had been killed, and numerous gudgeon weighing ten to the pound. The river Weaver seems to be in good fishing condition just at present, and the Dane and Bollin are fast getting back the reputation which in times past gained them their present popularity. We hear that the Smoker has been at last fished; but for the future only fly-fishing is to be allowed. What is to become of the bottom-fisher should this policy be extended to other waters, is a problem difficult of solution, and disagreeable to anticipate.

SPLENDID sport is reported from the preserved portion of the Wye between Miller's Dale and Monsall Dale. That portion of Cressbrook appears to have entirely recovered from the dose of lime gratuitously administered by the railway company a few years since. From Buxton comes good reports of the sport obtained there by Lancashire fishermen. The Crannage Brook is affording good sport, and a visit will repay anyone who cares to go for trout and other fish. Mr. O. Jones has secured a fine pike of 35lb. in a private water with a minnow; a small pike, 2lb., was also taken by his friend, Mr. J. Westfield, with maggots, while perch fishing with fine gut. Good fishing is now of daily occurrence at Ingleton, and Lancashire rods will do well to pay this locality a visit. Mr. Griffiths and a friend have been amongst the trout in the Lake District, and splendid sport has resulted. The streams hereabouts are very prolific, but it requires an expert to overcome the difficulties of the waters. A good many fish have found their way from Bakewell to Manchester during the past fortnight, and judging from those we have seen, the club in authority are to be complimented for the excellent condition of the waters and fish. Mr. S. Allsop secured some nice perch in private waters on the 17th, and Mr. Walmsley a nice pike of 4lb. with a worm on the 15th. On the 18th the Free Anglers held their annual picnic. The usual sweepstake produced a keen contest, and is in fact the only competition indulged in by this club. Prizes are never offered for competition.

THE Middlewich anglers have just finished their contest, with the following result: 1, Mr. H. Wilkinson; 2, Mr. Sharman; 3, Mr. A. Sweatman; 4, Mr. P. Higginson; 5, Mr. J. Lant; 6, Mr. J. Roberts; 7, Mr. H. Luker; 8, Mr. J. Allcock; Mr. Denlith secured a special prize. The Stopford Anglers fished the initial contest since the inauguration of the club last Saturday, and finished in the following order of merit: Messrs. Hyde, Ashworth, R. Janson, Hodgson, Barker, Hargreaves. The Bedford fished a match on the 16th; the winners of the first three prizes were R. Buchanan, T. Hampson, and H. Eaton. Negotiations are pending for a friendly match between the two clubs meeting at the same house—viz., the Bedford and the Ellesmere, and should the event come off a close finish may be expected.

MR. SAM BROOKS, Ardwick, secured ten brace of trout in the Dane on the 17th.

NOTES FROM NOTTINGHAM.

BARBEL anglers are on better terms with themselves so far as improved sport is concerned. At one period the season seemed doomed in a matter of killing any great quantity of fish. Unsettled weather prevailed to an alarming extent, and even at the time of writing on Wednesday night, ominous clouds overhead were not of a thoroughly re-assuring character. Still, of late a few fine days have been enjoyed, and some of our most experienced throwers of the barbel line have made the most of them. On Monday night a grand lot of fish were brought into the lower room of the Nottingham Wellington Hotel, which, as is well-known, is the headquarters of the leading angling society of the town and district. On enquiry I found that the fish, twenty-two in number, had been killed below Carlton ferry boat by Mr. W. Lantley and Mr. I. Lantley, of Beeston, who were assisted by Mr. "Harry" Hudson, of Lenton. Mr. Hudson is a "shining light" in the local piscatorial world and has generally brought off a big catch every summer in the district mentioned. On the occasion under notice he had ground-baited the swim, and as proving that the fish revelled in the food, the worm, they were all taken in less than three hours. They did not, however, run very large, although such a catch very rarely happens on any public water. I believe that Mr. Hudson fished the same swim on the following day and bagged a large quantity of bigger fish.

AT King's Mills of late very few of the subscribers appear to have patronised the water, and so far as roach and bream fishing is concerned the takes have not been large. Attention has been paid to the barbel swims below the weirs, and on Monday Mr. J. Greaves, of the Wellington Society, showed up with a number of remarkably good fish. Other gentlemen had been amongst them at Shardlow and Sawley, and one of 8¼lb. was killed below the Red Bank in Clifton Grove. Years ago the swim here turned out enormous quantities of aldermanic chub, and just at present the wasp grub is doing marked execution amongst the fish at Wilford and Stoke. Spent salmon may still occasionally be seen, not only at King's Mills, but at Willington, where a few days ago Mr. Noel Johnson and friends had brilliant sport amongst roach, with creed wheat. Mr. Johnson informed me that the catch exceeded 60lb., and that many of the fish averaged 1lb. each. I have always held that the dace and roach landed in the Willington length are the finest taken on the whole course of the river. The fishery is a favourite resort of the Derby contingent, one of whom once killed, to his own rod, in a few hours' fishing, 30lb. of dace.

AT Shardlow, Mr. John Bailey, of Lenton, who is the second son of the late distinguished Mr. W. Bailey, has played sad havoc amongst the bream near host Taylor's old-fashioned inn. Getting well amongst the fish he placed 40lb. to his credit in double quick time, and supplemented the take with a second of 27lb. In the same waters, Mr. H. Leek, Lenton, had five or six barbel, besides other fish, and takes of less note have come to hand from most of the reaches in the neighbourhood.

MR. H. SPRAY, hon. sec. of the Wellington Society, has just been sending out to the members the revised rules, and it is evident the committee have been at immense pains over them. They have been well and carefully considered, and will doubtless be cordially endorsed by all those that have the honour of being connected with the society.

ON Tuesday, an unexpected rise of the river occurred. Very little rain fell in our own immediate district, but there must have been a heavy downpour either in Derbyshire or Staffordshire. At all events, an extra foot of water came down, and with it long masses of dead and dying weed. The influx set the roach and dace fishermen freely on the move, and at Welford, on Wednesday, the punt occupiers did very well indeed, using, of course, the maggot for bait.

NOTES FROM SHROPSHIRE.

THE long spell of ill-success which trout anglers have experienced during the last few months—a period which is always accounted a bad time for trouting—has at length been partially broken, and after a long and regretted indisposition to feed, the fish have at length commenced to afford sport, and will probably continue to do so until the 1st of October compels the fly-fisher to forsake the riverside, and lay by his tackle till the advent of another season. Trout fishers should make the best of the short time at their disposal, for there is generally good sport to be obtained in the Severn in this locality at the tail end of the season.

THE members of the Ironbridge Severn and District Angling and Protection Society visited Shrewsbury on Wednesday, and held their first prize outing of the season. Judging from the excellence of the takes, the Ironbridge men are very skilled anglers, and, in the event of a contest being arranged between them and the members of the Shrewsbury brotherhood—as it has been proposed there should be—there would doubtless be a very interesting, if not exciting, contest. The Ironbridge anglers thoroughly enjoyed their trip, and the charm of angling was greatly enhanced by the beauty of the scenery around the scene of operations. The piscators were conveyed by brakes from Ironbridge to Uppington, a long and delightful drive.

Mr. J. Toddington secured first prize with 6lb. 4oz. of fish; Mr. H. Aldred capturing 4lb. 10oz.; Mr. J. Norry, 3lb. 8oz.; Mr. J. Edwards, 3lb. 4oz.; Mr. M. Jarratt, 3lb.; Mr. A. Nicholas, 2lb. 10oz.; and Mr. Wilson, 2lb. The following also took prizes in the members' prize fund: Messrs. J. Toddington, H. Aldred, J. Edwards, E. Jarratt, A. Nicholas, W. Wilson, and T. B. Rowley. The members of the Shrewsbury Society have not yet been able to hold an outing, bad weather and other causes preventing them. It is, however, intended to hold one as soon as possible.

THE constant and ever-increasing pollution of the Severn almost from its source to its mouth, and the deleterious effect it cannot but have on the fishing in the river, more especially perhaps the salmon fishing, is a question which is now occupying the serious attention of the Severn Board of Conservators, and through that body it is likely to be taken up by the County Councils of those counties through which the river runs. Many competent authorities almost wholly attribute the constant decrease in the number of salmon, especially in the upper waters, to the pollution of the river by lead works, flannel mills, and sewerage in general, and however opinions may differ as to the primary cause of this lamentable falling off in the supply of fish, it is certain that river pollution has a great deal to answer for. If the Board of Conservators, by inducing the County Councils to exercise jointly with them their legal powers to compel borough councils and local authorities to remove their sewerage from the river and prevent manufacturers from discharging from their works the quantities of poisonous matter now sent down in large quantities, it will earn from the angling fraternity, as well as from those connected with the salmon fishing industry, the heartiest thanks and praises that could be bestowed upon it, and it will furthermore condone for any unsatisfactory or unsuccessful legislation it has carried out in the past. The first step towards this desirable object would be to make the small borough councils and urban sanitary authorities remove the sewerage that is now allowed to flow into the river at all parts from the stream, and if not removed within a certain space of time, an injunction should be obtained against the offending bodies. At a recent meeting of the Shropshire County Council, the decrease of salmon was considered—as reported in our last issue—and Mr. T. Southam, who represents the borough of Shrewsbury on that important body, sought to explain and excuse the apparent neglect of the borough council in regard to the pollution of the river by the town's sewerage. He argued that as this polluting matter was not turned into the river in one volume, but at various parts, it did little or no harm to the fish. He added, however, that the corporation, before tackling the question, was desirous of awaiting the results of experiments in other towns as to the best method, as the removal of the sewage would prove a very difficult and expensive undertaking. Now, as to the sewerage doing little or no harm to the fishing, one has only to go on a hot summer's day when the water is low to have ample evidence of the shocking state of affairs that exist. The Welsh bridge ford, the English bridge ford, and below the railway bridge, are each contaminated to a considerable extent, and below the mouths of these pestilential pipes the river bed is nearly always to be found a layer of festering matter extending for yards. Now it is manifestly a mistake for the Council of Shrewsbury to remain inactive, perhaps, for years to come in order to benefit by the experience of other bodies. If it is not thought advisable to sink money experimentally, the question should be at once taken in hand and one of the best methods in vogue of dealing with sewerage adopted—say by means of a sewerage farm. There is not the slightest doubt that unless a considerable change for the better takes place in regard to this question of river pollution, the endeavours of the Severn Board of Conservators to increase the supply of salmon, and the efforts of the Shrewsbury Severn Angling Society and other bodies to preserve and restock the river will be almost nullified. That salmon will not run against a flow of poisonous sewerage matter is a well-known fact, and even where they do ascend it is questionable whether many are not killed by disease, resulting from this wholesale pollution.

Last year many salmon were found dead from disease above Shrewsbury—it was stated that William Darling, the late water bailiff, discovered between twenty and thirty dead from Shrewsbury to the Vyrnwy—and there is every reason to suppose that pollution was the primary cause of the disease from which they died.

NOTES FROM WORCESTER AND DISTRICT.

THE Severn and Teme and their tributaries have been in capital condition. Angling has been brisk in this neighbourhood during the week; with wasp, grubs, maggot, and worms, the bottom fishers have made good baskets of trout, chub, and dace, the roach biting but slyly, yet a few large ones have been taken. Some capital baskets of grayling have been taken in the Teme with the fly, the Red Spinner, Blue Dun, Red Palmer, Black Gnat, and Little Green insect all killing well; one angler taking sixteen brace in a few hours. Some members of the Izaak Walton Club had good sport among the trout, S. Webb killing six and a-half brace; R. Wingfield, twelve and a-half brace; and C. Evans, five brace of beauties, besides some very fine roach and chub.

THE Izaak Walton Club on Thursday last had a contest on the Teme at Stanford Bridge, the prizes amounting to £10, divided into seven prizes given by Hubert Holland, Esq., one of the hon. members of the society. Twenty members were down to compete, and the journey made by brake *via* Martley, through some twelve miles of the most beautiful scenery of Worcestershire, lunch being partaken of on the way. The competition did not commence until 12.30, and terminated at 7.30 p.m., the weighing in being at eight o'clock to the minute, when Mr. Chas. Evans, who had been wading, won first prize, £3, with 10½lb. of perch and chub, mostly taken with the minnow; Mr. E. Millington, second, £2; Mr. W. Smith, third, £1 10s.; Mr. R. Wingfield, fourth, £1 5s.; Mr. S. Webb, fifth, £1; Mr. G. Mapp, sixth, 15s.; and Mr. A. Cooper, seventh, 10s. There was also a consolation sweepstake, divided among, first, Mr. W. Roberts, and, second, Mr. C. Wall, of the non-prize winners. The contestants were much worried with samlets and minnows, which attacked any bait as soon as it was in the water. The prize winners being those who fished the roughest water, a great many fish were taken that were not weighable, being under the regulation size. An excellent dinner was provided by Host Smith, of the Stanford Bridge Inn, and full justice was done to it.

THE Avon is in capital order for fishing, and some capital baskets of roach, perch, and bream have been taken during the week, and any angler may be sure of good sport at either Defford or Eckington with stewed wheat or malt, or the lively worm.

NOTES FROM YORK AND DISTRICT.

THE state of the Ouse has not been entirely consistent with good angling during the past week. Large quantities of polluted water from the Aire have been forced into the river, and there has been a great destruction of fine and useful salmon. This having occurred as it has, just at about the height of the salmon fishing season, which is of course drawing to a close, the loss will undoubtedly be great. The Foss has been in a fair condition, and has attracted a goodly number of fishermen, who have met with encouraging sport. The water of the Derwent, at Hackness, last week, was reported to be in capital condition, and lively sport was said to be the rule; whilst at Malton things are somewhat more backward. More heavy rains this week, however, have put the river in flood.

THE report mentioned by me in my last week's notes that the right of fishing between Stamford Bridge and Buttercrambe had been stopped, seems to have been "hardly the thing," nevertheless, there has doubtless been some cause, however slight, for the origin of the rumour. In an explanatory letter, the new tenant, Mr. Fred B. Lysaght-Knight, who has come into possession of the land through which that portion of the stream flows, contradicts the assertion, and says that it is not, and has never been, his intention to stop any one fishing so long as they do not injure the fences, &c., and will readily grant permission between Stamford Bridge and Buttercrambe Church for all who may ask for it; but the remaining waters he intends to reserve for himself and friends. That no one be allowed to angle without such permission is, he contends, in the best interest of every true angler, and in a further sentence he denies the conception entertained by some that the waters are free.

THE Melbourne Hotel (York) Angling Society's first match of the season came off in the river Derwent, at Elvington, on Saturday, under but moderately favourable conditions. Sport was consequently only fair, the largest of the numerous takes scaling some 12½oz.

THE third fishing match of the season, held under the auspices of the Fulford Friendly Angling Society, took place on Wednesday, on the farm of Mr. Gilbertson, of Catton. The weather was fine, but unluckily, owing to the heavy rains of this and last week, the catch was but small. There were seventeen competitors, and the eight prize-winners were—Messrs. J. E. Wilkinson, W. Bouttell, C. W. Armison, J. Oliver, H. W. Watson, J. Green, A. Simpson, and E. Staines, rotatively.

Waterproofs (ladies' and gentlemen's).—A large stock selling at low prices to clear. Best quality only.—EAST LONDON RUBBER Co, 8, Shoreditch, E.

James Ogden,
28, Winchcomb Street, Cheltenham,
Practical Angler, Fly Dresser, and Manufacturer of every Description of Fishing Tackle.
Maker of High-class Salmon, Grilse, and Trout Rods.
JAMES OGDEN'S CELEBRATED MULTUM IN PARVO FLY RODS, £1 1s.
Every description of Salmon and Trout Flies Dressed on the Premises and despatched per return of post.

THE "STANDARD" MEAT BISCUITS FOR DOGS.
USED BY SOME OF THE LARGEST EXHIBITORS.

TESTIMONIALS.

THE "STANDARD" MEAT BISCUIT CO. GLENBOIG, N.B.
Sirs,—I have given your "Standard" Dog Biscuits a fair trial and I consider them to be as good, if not superior, to any I have yet tried.
Yours truly, ROBERT CHAPMAN.

THE "STANDARD" MEAT BISCUIT CO. EDINBURGH, N.B.
Dear Sirs,—Your Dog Biscuits are simply perfect. My dogs prefer them to any others. Please repeat my last order, namely 5 cwts.
Yours faithfully, W. R. REID.

We take the liberty of recommending to you the
"STANDARD" MEAT BISCUIT
manufactured by this Company from the purest materials, and which has been proved and tested, meeting a decided want in the rearing and feeding of dogs.
The Manager, who has the combined experience of a breeder along with a practical knowledge of biscuit making, finds that a constant use of these biscuits is attended with the best results.
THE BISCUITS ARE EATEN GREEDILY DRY, BUT IF PREFERRED SOFT, THEY SHOULD BE COVERED WITH WARM WATER FOR **10 MINUTES**
Sample 1 cwt. bag, 20s.; ditto ½ do., 11s., carriage paid. Special Terms for larger quantities.
THE "STANDARD" MEAT BISCUIT CO., EDINBURGH.

PARKER'S SELF-STRIKING FLOAT.
By Her Majesty's Royal Letters Patent.
A BOON TO ANGLERS.
Every bite means "hooking" a fish. The most ingenious and effectual contrivance ever produced for enabling an inexperienced and unpractised angler to secure a good bag of fish whenever they are feeding No fish can touch your bait without effecting its own capture, and announcing the fact by signal. This float is simple and durable.
Price 2/6 Post Free.
A. PARKER, 20, WALPOLE STREET, NEW CROSS, S.E.

SPECIAL LIST of NUTTING & CO.,
Fishing Rod & Tackle Manufacturers, 70, Edgbaston Street, Birmingham.
Blue Mahoe Trout Rods, 32s. each.
Genuine American Split Cane Trout Rods, 2 Tops and Travelling Case, 15s. each.
Balance Handle Greenheart Fly Rod, 10s. 6d. each.
Bronzed Rotary Plate Reels, 2in. 4s.; 2½in. 4s. 6d. each.
Solid Leather Fly Books, 3s. each.

NOTICE.

E FISHING GAZETTE is published every Saturday, and can be obtained at Messrs. W. H. Smith and Son's Railway Bookstalls and of the principal Newsagents and Fishing Tackle Dealers in London and the Provinces.

mmunications relating to the Literary Department, Fishing Tackle for Notice, Books for Review, &c., must be addressed to R. B. MARSTON, the Editor of the FISHING GAZETTE, St. Dunstan's House, Fetter Lane, London, E.C.

rrespondents are requested to write on one side of the paper only, and give their real names and addresses, not necessarily as signatures to their letters, but as a guarantee of good faith. Unless this rule be adhered to, no notice will be taken of such communications.

Terms of Subscription.

e GAZETTE can be had by sending Postal Order or Stamps to Messrs. Sampson Low, Marston, and Co., Limited, the Proprietors, St. Dunstan's House, Fetter-lane, London, to whom all money payments should be made.

EDDIES.

WITH THE FLY, "LIGHT AND FINE."

W WATER SUMMER FISHING FOR GRILSE AND SALMON.

By W. MURDOCH.

EDDIES or circling boils are the most difficult all casts to fish aright. The plain round and ınd swirl may often be found bad enough to ınage properly, but when besides a swirl inter-ngling currents come to the surface, and set in ferent directions, not only the tyro or young nd, but even the expert will often be cometely puzzled what to do in order to achieve ccess. In many rivers, in some very frequently, cur casts or water of the character indicated, ich although known to almost constantly ntain fish—yet from having never been properly d persistently tried, or from the right place, are arly always passed by without even the "just e throw" hurried flick over. They remain year er year unexploited, a "sealed book.' "No use ere," says Kenneth, with a shake of the head, d his "shentleman" believes him. But is this t an evidence of incapacity, or of not wishing to bothered—of a want of the qualities of a true rtsman, of that keen enthusiasm for the sport ich rarely admits impossibility, and without ich no difficulty save of the most rudimentary aracter can be quickly surmounted? I trow so. rsonally I know of nothing in the whole range angling that affords such real satisfying pleasure to get at last to the light—to discover, so to speak after much study, resorting to many advices, and being baffled again and again, the key to the situation. It is the crowning triumph for the enthusiast.

To describe how all eddies should be fished were impossible; there are such a great many sorts of them, each of all of which has its own individual peculiarity. Therefore, rather than picture in fancy even but a few, and describe minutely how they should be fished, I prefer, as being far more practical for the generally occurring circumstances, to give a hint or two, which very often, I conceive, will be found to prove useful. It is first and foremost in importance to see, after the cast or throw is made, that the line is not lying in the water in sweeps and curves, all bulged and bellied, part of it perhaps, sucked down by the current and part remaining on the surface. Very quickly eddies and cross-currents, and the suction frequently connected with them, will cause this ugly fish-frightening sight. The young angler, most likely, never thinks of it: he is standing (it is assumed) level with the water and so does not see it; he has his rod point low down, and what little of the line he sees appears to be all right; he has no thought of the rest being wrong, but from a height opposite or close by it is distinctly seen to be utterly wrong. And why is it so? Partly from too much line being out, partly from the water being allowed to wimple it as it wills, or from both circumstances combined. To prevent the display of such an ugly piece of art—most inartistic alike to the eye of the fish and the fisher, and so fatal to success—the thing to do is to cast no more line than is necessary to get over the water sought to be fished and then to hold the rod up to keep the reel line off the water while the fly is brought toward the angler or taken in whatever direction he desires to guide it. When a great length of line gets daddled about and all bagged and bulged by the water, not only are the fish likely to be scared (especially in clear low water, when very fine light fishing is inseparable from success), but in nine cases out of ten they are about sure to be lost sooner or later from the line, when they rise to the fly, being neither tight nor straight to cause them to hook well or aright, nor the water itself of a character calculated to make them hook themselves. Here I wish to remove a misconception, if such has arisen in the minds of my readers with regard to the remark as to fish occupying eddies. They do, it is true, lie in some eddies, especially where the water is not very strong or when it is low; they also are often seen rising in them; but, as a rule, it is outside the eddies proper that their "lies" are, although very commonly just on the verge of them. The angler will very likely often notice that if the bottom is not entirely sandy the sides of eddies, the water of a straight run current close above an eddy, and the commencement to run in the straight of the water as it leaves an eddy, are particularly favourite holds. But while this is so, peculiarities are multifarious—as multifarious as the bottom formations, and strength and set of the currents which wholly account for them.

Although eddy casts are usually of considerable depth (comparatively), it is not required—in the summer season, at least—that they should be fished "deep"; hence no sinker or lead is needed; and the short line which I have advised for such fishing enables the angler—since here it is specially desirable—to always keep the fly swimming "light," as also at the same time "true"—to play it exactly where and wherever he wishes, and in whatever manner or manners his fancy dictates. In fine, by the use of the short line the angler possesses perfect and absolute control of the movement of the fly entirely to his mind. In the case of casts, which are thoroughly understood, he needs no advice; he knows quite well what to do, or his gillie tells him, and he has but to act; but it is quite a different affair when unexploited casts come to be tacked. What, then, is he to do? My advice to him is: Attack from all points, resort to all known ways of working the fly, fish at different times of day and under different lights, and use various patterns and sizes of flies, giving "rests" to the water between the changes—if necessary. Last of all, if fishing over the fish in all manners, at all times of day, under various natures of light, with all thought-of flies, and from all positions obtained from one side or by wading, should prove ineffectual, I recommend the angler to take himself to the other side (if he has the right), and repeat the performance in all its variety. "From the other side you'll be sure to get him," I have often heard it remarked, and have often proved it to be the case. And how can it be accounted for? Perhaps, previously the fly was not seen by the fish, or, if seen, not seen in a position for them to take it from their "lies." Or it may be they had not time or the *instant* impulse to take it from only getting a momentary glimpse of it, like a flash, whilst passing over them, after which boulders, rocky shelves, or ridges intervening, completely obscured the view. It is, indeed, true that the formation of the bottom much more frequently than many imagine accounts for this. But very much oftener, I feel sure, the fact that the fly, after being persistently refused from the one side, is readily taken from the other side is due about wholly to the totally different—entirely *new*—direction of its track, which, with (not unlikely) its better and more tempting play, tickles the fancy of the fish irresistibly.

Without the conceit that it will be instructive to the expert, but simply in the hope that it may be useful to the young hand, both for his guidance and encouragement, the foregoing has been written. I have purposely avoided any reference to the patterns and sizes of flies, the methods of playing the same, and the hooking and playing of the fish, thinking it better not to cram in too much at one time; as of tough and heavy matter, such as this I am afraid must seem, digestion proceeds but slowly. Accordingly, until a future occasion, when probably the appetite for a fresh supply will have been acquired by the readers whom I seek to assist in developing into anglers fit to hold their own against most, consideration of the subjects mentioned, as well as of others of which I mean to treat, is deferred.

A REMINISCENCE OF THE MAY-FLY IN IRELAND.

By C.

THE season had been up to the average. The fish were in prime condition and taking freely. The May-fly was on; an English angling club was encamped on the lake shore, and the weather was favourable. Will experienced anglers please note particularly the last fact—the weather was exactly right? It is a thing that, to my knowledge, had never happened before, and, life being short, probably never will again. But on this first (and last) occasion the sun, the wind, the clouds, and the May-fly were all on our side, and I dare say the English club was at least neutral. Mac. arranged the details of the venture, and to watch the way he swaggered over it, you would think he had included the atmosphere in his programme; certainly the clerk of the weather himself could not have managed it better.

While the "kyar" was being adjusted to a horse several sizes too small for it, a happy thought struck me. This adjustment would take some time. The harness was aged, and did not lend itself readily to unfamiliar surroundings—that is, to surrounding an unfamiliar horse. Why not occupy the interval by addressing labels and writing notes to friends who, I knew, would expect a nice consignment of fish once they heard I was in the neighbourhood of Lough Sheelin? The happy thought was acted on. I wrote the pleasant little letters (of course, "regretting that I had not better luck, but hoping the accompanying parcel would not come amiss," and so forth), and addressed all the labels with my compliments. This filled up the time nicely, and when I was through with my correspondence, the "kyar" was quite ready—the horse seemed in no hurry. But Pat Brady, with the aid of a stout stick, induced the "shiltie" to make up his mind on the point, and we started for the lough.

It was pleasant to look forward to one complete and satisfying day's sport—to a vast ingathering of the trout of Lough Sheelin; a slaughter grim and great that should last till the going down of the sun, if not quite from the rising of the same. Long before we caught sight of the lough, I could see in imagination the slow-drifting boat glide over the wimpling wavelets, and hear the "Troth, gintlemin, and it's a fine day ye've got any way," of Larry, as the long blow-line floated out upon the summer breeze, then dropped its tiny burden delicately on the curl of mimic breakers. Also, as we jogged along, I mentally revised the bestowal of my spoils. Half-a-dozen nice trout would do very well for Smith, a bachelor friend; but Brown, a married man (with whom I dine on wet Sundays), was fairly entitled to a dozen. Jones (who proposed my health last lodge night) must have the pick of the basket, and Robinson (who put me in for a subscription to a Zenana mission) should go troutless, if not supperless, to bed—and so on, till we pulled up at the boatman's cottage, and hailed it cheerfully.

"Is it me fether ye want?" a small boy asked.

"The same man," I replied, with a vague effort after the vernacular.

"He's down at the lough, spearin' eels."

"Spearing eels!" Alas! the gentle breeze had died away unnoticed what time I built those castles in the air, or, say, those round towers in the waves beneath me shining. The metaphor's a little mixed, but it drags in Erin's poet, and no Irish reminiscence is complete without him. The sun, unnoticed as we drove under the cool shade of overhanging trees for the last mile or so (the shiltie's pace was leisurely), now blazed brilliantly overhead in a grand expanse of spotless blue, and the clouds which had been done to a turn, so to speak, when we started were all vanished. The day, after all our hopes, was only fit for basking in the shade with a shilling novel, amateur photography, or "spearin' eels." Mac. looked guilty—as well he might.

"Can you find your 'fether' for us?" I demanded moodily.

"Yis," the urchin briefly answered.

"Then up you get!"

The lad clambered up beside me, and swung his short, brown legs about in great content as we drove down to the lough. I think both Mac. and I envied him. He seemed so completely happy; while, as for us, we came to the beach of Lough Sheelin with hearts as heavy as ever the poor exile's could have been. Larry had speared about a hundredweight of eels. When he learned our business, however, he was not altogether hopeless of our catching a trout, provided, of course, that we took his boat. He never is quite hopeless under the circumstances, although long experience should have taught him better knowledge. Anyway, we got out the ship, secured as many May-flies as would have stocked the whole English club, and pushed off.

And then began our final preparations—half-hearted preparations they were, instead of the eager bustle my fancy had foreseen. The thing was such an utterly foregone conclusion nobody could get excited about it. There was not a ripple on the glossy surface of the still water—so clear that you could see far down into its sunlit depths. It would be absurd to expect a trout with a well-balanced mind to seize our plainly captive insects when thousands of winged wanderers were to be had for the gobbling. The fish that would swallow a hook on such a day must certainly be soft in the head. If any such did really live and move in the blue waters of Lough Sheelin, I decided in my mind that it would be a sin to eat him and a shame to sell him. I would send him to Henrik Ibsen, who would probably be able to use him as a new character for a play—a new one being badly wanted just now.

I leant lazily over the side of the boat, and watched the big eels and little fish glide to and fro beneath us, while Mac., with a faint show of expectation, put the rods together. From the groves which line the lough shores a gay chorus of singing birds floated out. The fields were all deserted, for the cattle, driven by the pitiless sun, were now ruminating drowsily in the leafy shade of scented hawthorn hedgerows—but we came to fish, and must not remain merely to admire the scenery. The rods were ready, the long light lines were cast upon the summer air, but breeze there was none, so they fell in tangled bunches on the water. Then we reeled up again, unravelled the tiresome knots, and this time the lines were flung afar with an angry cast, and the "natural" flies were flung still farther. Larry knew perfectly well that the game was useless, but he saw that we were determined to go on with it, so he gave us the best advice he could by way of lending us his moral support.

When this sort of thing had lasted long enough for my taste, I threw down my rod and lit my pipe. Mac. continued drearily for some time longer, then he too threw down his rod and lit his pipe. Thus we smoked in moody silence for half an hour. The whole thing was Mac.'s fault, so I could not feel very cordial to him; and as for him, although he neither spoke nor wept, I could see he felt his position keenly. I began to wish he would say something, but I wasn't going to be so mean as to give him a lead. At last a benign expression showed on his usually good-natured countenance. It commenced small, but it developed fast, and by the time he got back from the bow of the boat with a basket in his hand it had become a decided grin. I forgave him. Where would the fishing man be without his basket—I mean his lunch basket? He could dispense with the other mostly—except for the look of the thing.

We felt better presently. There was no better sign of fishing, but life without it seemed less desolate. When the afternoon was far spent a strange thing happened, as they say in story books. I was looking idly at the lough shore, thinking about nothing in particular, my line trailing out some dozen yards behind the boat, when I got a pull that sent my heart into my mouth.

"Give him line, sir!" Larry shouted. "He's a big one!"
